It is up to investors to assess what level of lending against MV-STT is prudent based on an RP's asset and income cover. Savills makes no recommendation of the maximum level of borrowing the Issuer is capable of supporting globally based on MV-STT.

6.5. Lotting and Value Disaggregation

We have valued the Properties as a single lot. As a result we have not assessed individual valuations for each Property. We have, however, provided a disaggregation of the overall valuation figures by reference to the appropriate rent and these figures are shown on the property schedule at **Appendix 1**.

The lender must be aware that the per unit figures shown in the schedule should not be regarded as individual valuations of the Properties. They are provided as indicative figures for administrative purposes only.

7. Suitability and Verification

7.1. Suitability as Loan Security

7.1.1. Lender's Responsibility

It is usual for a valuer to be asked to express an opinion as to the suitability of a property as security for a loan, debenture or mortgage. However, it is a matter for the lender to assess the risks involved and make its own assessment in fixing the terms of the loan, such as the percentage of value to be advanced, the provision for repayment of the capital, and the interest rate.

In this Report we refer to all matters that are within our knowledge and which may assist you in your assessment of the risk.

We have made subjective adjustments during our valuation approach in arriving at our opinion and whilst we consider these to be both logical and appropriate they are not necessarily the same adjustments which would be made by a purchaser acquiring the Properties.

Where we have expressed any reservations about any Property we have reflected these in the valuation figure reported. However it may be that the purchasers in the market at the time the property is marketed might take a different view.

7.1.2. Suitability as Security

We have considered each of the principal risks associated with the Properties within the context of the wider property market and these risks are reflected in our valuation calculations and reported figures as appropriate.

Overall, we consider that the Properties provide good security for a loan secured upon it, which reflects the nature of the Properties, our reported opinions of value and the risks involved.

7.2. Verification

This Report contains many assumptions, some of a general and some of a specific nature. Our valuations are based upon certain information supplied to us by others. Some information we consider material may not have been provided to us. All of these matters are referred to in the relevant sections of this Report.

We hope the above is acceptable for your purposes, should you have any queries, please do not hesitate to contact us.

Yours faithfully
For and on behalf of Savills Advisory Services Limited
