Introduction

The Commonwealth Bank of Australia (CBA) is an Authorised Deposit-taking Institution (ADI) regulated by the Australian Prudential Regulation Authority (APRA) under the authority of the *Banking Act 1959*.

This document is prepared for CBA and its subsidiaries (the Group) in accordance with a Board approved policy and APRA Prudential Standard (APS) 330 *Public Disclosure* (APS 330). It presents information on the Group's capital adequacy and Risk Weighted Assets (RWA) calculations for credit risk including securitisation, traded market risk, Interest Rate Risk in the Banking Book (IRRBB) and operational risk.

This document also presents information on the Group's leverage and liquidity ratios and Countercyclical Capital Buffer (CCyB) in accordance with prescribed methodologies.

The Group is required to report its assessment of capital adequacy on a Level 2 basis. Level 2 is defined as the Consolidated Banking Group excluding the insurance business and certain entities through which securitisation of Group assets is conducted.

The Group is predominantly accredited to use the Advanced Internal-Ratings Based (AIRB) approach for credit risk and the Standardised Measurement Approach for operational risk. The Group is also required to assess its traded market risk and IRRBB requirements under Pillar 1 of the Basel capital framework.

The Group engaged the external auditor (PwC) to perform assurance procedures over the Pillar 3 report in accordance with the Australian Standard on Assurance Engagements ASAE 3000 *Assurance Engagements Other Than Audits or Reviews of Historical Financial Information*.

This Pillar 3 document is available on the Group's corporate website: [Commbank.com.au/regulatorydisclosures](https://commbank.com.au/regulatorydisclosures).

The Group in Review

	31 Dec 23 ¹	30 Jun 23 ¹	31 Dec 22 ²
Summary Group Capital Adequacy Ratios (Level 2)	%	%	%
Common Equity Tier 1	12.3	12.2	11.4
Additional Tier 1	2.4	2.3	1.9
Tier 1	14.7	14.5	13.3
Tier 2	5.8	5.5	4.5
Total Capital	20.5	20.0	17.8

¹ Prepared in accordance with APRA's revised capital framework effective from 1 January 2023.

² Prepared in accordance with APRA's capital framework effective up until 31 December 2022.

Group Capital Ratios

As at 31 December 2023, the Group's Basel III Common Equity Tier 1 (CET1), Tier 1 and Total Capital ratios were 12.3%, 14.7% and 20.5% respectively.

Leverage Ratio

The Group's leverage ratio, which is defined as Tier 1 Capital as a percentage of total exposures, was 5.0% as at 31 December 2023.

Liquidity Coverage Ratio

The Liquidity Coverage Ratio (LCR) requires Australian ADIs to hold sufficient liquid assets to meet 30 day Net Cash Outflows (NCO) projected under an APRA prescribed stress scenario. The Group maintained an average LCR of 136% in the December 2023 quarter.

Net Stable Funding Ratio

The Net Stable Funding Ratio (NSFR) is the ratio of the amount of Available Stable Funding (ASF) to the amount of Required Stable Funding (RSF). Factors prescribed by APRA are used to determine the stable funding requirement of assets and the stability of alternative sources of funding. The Group's NSFR was 121% at 31 December 2023.

Policy Framework

The Group regularly benchmarks and aligns its policy framework against existing prudential and regulatory standards. Potential developments in Australian and international standards, and global best practice are also considered.

The Group continues to monitor and take actions to enhance and strengthen its risk culture. The Group has a formal Risk Management Approach (RMA) that creates clear obligations and transparency over risk management and strategy decisions. A risk accountability model (Three Lines of Accountability) requires business management to operate responsibly by taking well understood and managed risks that are appropriately and adequately priced.

The application is reflected in the Group's overall asset quality and capital position. In particular, the Group remains in a small group of banking institutions with an AA-/Aa3 credit rating. To maintain this strength, the Group continues to invest in its risk systems and management processes.

The Group's capital forecasting process and capital plans are in place to ensure a sufficient capital buffer above minimum levels is maintained at all times. The Group manages its capital by regularly and simultaneously considering regulatory capital requirements, rating agency views on the capital required to maintain the Group's credit rating, the market response to capital levels and stress testing. These views then cascade into consideration of the target capital level. The Group's management of its capital adequacy is supported by robust capital management processes applied in each Business Unit (BU). The results are integrated into the Group's risk-adjusted performance and pricing processes.

2

Scope of Application

This document has been prepared in accordance with Board approved policy and reporting requirements set out in APS 330.

APRA adopts a tiered approach to the measurement of an ADI's capital adequacy:

- **Level 1:** the Parent Bank (CBA) and offshore branches (the Bank) and APRA approved Extended Licensed Entities (ELE);
- **Level 2:** the Consolidated Banking Group excluding the insurance businesses and certain entities through which securitisation of Group assets is conducted; and
- **Level 3:** the conglomerate group including the Group's insurance entity¹ (the Group).

The Group is required to report its assessment of capital adequacy on a Level 2 basis. The head of the Level 2 Group is the Parent Bank. Additional disclosure of capital ratios relating to material ADIs within the Group together with CBA's own Level 1 capital ratios are included under Table 6g of this report (page 7).

ASB Bank Limited (ASB) operates under Advanced Basel III status and is subject to regulation by the Reserve Bank of New Zealand (RBNZ). The RBNZ applies a similar methodology to APRA in calculating regulatory capital requirements.

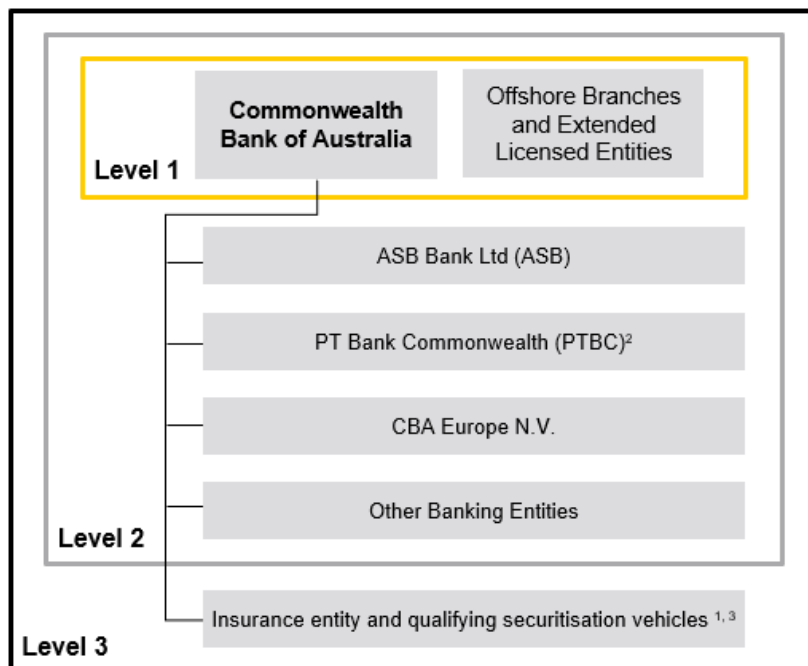

CBA Europe N.V. and PT Bank Commonwealth (PTBC) apply the Standardised Basel III methodology in calculating their local regulatory capital requirements. Effective from March 2022, APRA approved CBA Europe N.V. to apply the Internal Ratings-based (IRB) approach for the purpose of determining the Group's capital requirement at Level 2.

Restrictions on transfer of funds or regulatory capital within the Group

The transfer of regulatory capital and funding within the Group is subject to restrictions imposed by local regulatory requirements. In particular, APS 222 *Associations with Related Entities* establishes prudential limits on the level of exposure that the Bank may have to a related entity.

The Bank and all of the subsidiaries of the Group are adequately capitalised. There are no restrictions or other major impediments on the transfer of funds within the Group. There are no capital deficiencies in non-consolidated (regulatory) subsidiaries in the Group.

APS 330 reporting structure

¹ A detailed list of non-consolidated entities is provided in Appendix 11.5.

² On 16 November 2023, the Group announced that it entered into a binding agreement to sell its 99% shareholding in its Indonesian banking subsidiary, PT Bank Commonwealth (PTBC), to PT Bank OCBC NISP Tbk (OCBC Indonesia), a subsidiary of Oversea-Chinese Banking Corporation Limited (OCBC) for an upfront cash consideration of approximately \$220 million. Completion of the transaction is subject to a number of conditions including regulatory approvals from the Indonesian Financial Services Authority and the Monetary Authority of Singapore. The completion of the transaction is expected by the third quarter of calendar year 2024.

³ Securitisation that meets APRA's operational requirements for regulatory capital relief under APS 120 *Securitisation* (APS 120).

3 Capital

Capital Adequacy

The Group actively manages its capital to balance the perspectives of various stakeholders (regulators, rating agencies and shareholders). This is achieved by optimising the mix of capital, while maintaining adequate capital ratios throughout the financial year. The Group's capital is managed within a formal framework, the ICAAP, which is an integration of risk, financial and capital management processes.

APRA advises the Group of its Prudential Capital Requirement (PCR), which represents the regulatory minimum CET1, Tier 1 and Total Capital ratios that the Group is required to maintain at all times. In order to ensure there is no breach of these minimum levels, APRA expects the Group to maintain a prudent buffer over these prescribed minimum levels. The PCR is subject to an ongoing review by APRA and is formally reassessed on an annual basis. The Group is required to inform APRA immediately of any breach or potential breach of its PCR, including details of remedial action taken or planned to be taken.

The Group has a range of instruments and methodologies available to effectively manage capital. These include share issues and buybacks, dividend and Dividend Reinvestment Plan (DRP) policies, hybrid capital raising and subordinated debt issuances. All major capital related initiatives require approval by the Board.

The Group's capital position is monitored on a continuous basis and reported monthly to the Executive Leadership Team of the Group and at regular intervals throughout the year to the Board Risk and Compliance Committee. Capital forecasts are updated on a continuous basis and a detailed capital plan is presented to the Board annually.

¹ Due to rounding, numbers presented in this section may not sum precisely to the totals provided.

² The 2023 final dividend included the on-market purchase of \$727 million of shares (CET1 impact of -16bpts) in respect of the Dividend Reinvestment Plan.

³ On 9 August 2023, the Group announced its intention to conduct a further on-market share buy-back of up to \$1 billion of CBA ordinary shares, with 1,517,388 ordinary shares bought back at \$101.49 in the half year ended 31 December 2023.

⁴ Excludes equity accounted profits/losses from investments as it is capital neutral with offsetting changes in capital deductions.

⁵ Excludes impact of foreign exchange movements which is included in 'Other'.

⁶ Includes the impact of intangibles, FX impact on Credit RWA, equity accounted profits/losses from associates, movements in reserves and other regulatory adjustments.

Capital Position

The Group's CET1 ratio was 12.3% as at 31 December 2023, compared with 12.2% as at 30 June 2023. The CET1 ratio was well above APRA's regulatory requirement at all times throughout the half year ended 31 December 2023.

Key drivers of the change in CET1 for the 6 months ended 31 December 2023 were:

- Capital generated from earnings;
- Lower total RWA from decreases in IRRBB and Traded Market RWA, partly offset by higher Credit Risk and Operational RWA; partly offset by

- The payment of the 2H23 dividend;
- Completion of \$0.2 billion of the \$1 billion on-market share buy-back; and
- Other regulatory adjustments and movement in reserves.

Further details on the movements in RWA are provided on pages 9-11.

Capital (continued)

Capital Initiatives

In addition to the on-market share buy-back, the following significant capital initiatives were undertaken during the half year ended 31 December 2023:

Common Equity Tier 1 Capital

- The Dividend Reinvestment Plan (DRP) in respect of the 2023 final dividend was satisfied in full by the on-market purchase of shares. The participation rate for the DRP was 18.1%.

Tier 2 Capital

The Group issued the following Basel III compliant subordinated notes:

- AUD85 million in September 2023;
- Two subordinated notes in October 2023, AUD550 million and AUD700 million respectively; and
- AUD300 million in December 2023.

Regulatory Framework

On 1 January 2023, APRA implemented revisions to the capital framework for Authorised Deposit-taking Institutions (ADIs), to increase the risk sensitivity within the capital framework, to enhance the ability of ADIs to respond flexibly to future stress events, and to improve the comparability of the Australian framework with international standards.

Currently, the APRA prudential standards prescribe a minimum CET1 Capital ratio of 10.25% for Internal Ratings-based (IRB) ADIs such as CBA, comprising of a minimum Prudential Capital Requirement (PCR) of 4.5% and a capital conservation buffer (CCB) of 5.75%, which includes a Domestic Systemically Important Bank (D-SIB) buffer of 1% and a baseline countercyclical capital buffer (CCyB) set at 1%¹. The CCyB, which may be varied by APRA in the range of 0%-3.50%, can be released in times of systemic stress and post-stress recovery.

The Group expects to operate with a post-dividend CET1 Capital ratio of greater than 11%, compared to the APRA minimum of 10.25%, except in circumstances of unexpected capital volatility.

The Tier 1 and Total Capital ratio requirements as at 31 December 2023 were 11.75% and 13.75%, respectively.

Under APRA's loss-absorbing capacity requirements, the minimum Total Capital ratio requirement for D-SIBs, including CBA, has increased to 16.75% effective from 1 January 2024. From 1 January 2026, the requirement will increase to 18.25%.

Regulatory Developments

IRRBB Consultation

On 12 December 2023, APRA released an updated draft APS 117 "Capital Adequacy: Interest Rate Risk in the Banking Book", which sets out the requirements that an ADI must meet in managing its Interest Rate Risk in the Banking Book (IRRBB), in response to the November 2022 consultation on proposed changes to the standard. APRA intends to finalise the consultation by mid-2024 ahead of implementation on 1 October 2025.

¹ In December 2023, APRA announced that the CCyB for Australian exposures will remain at 1%. The Group has limited exposures to those offshore jurisdictions which a CCyB in excess of 0% has been imposed.

Traded Market Risk and Counterparty Credit Risk

APRA is expected to commence consultation on revisions to APS 116 "Capital Adequacy: Market Risk", and APS 180 "Capital Adequacy: Counterparty Credit Risk" in 2024 with revisions to both standards expected to be implemented in 2026.

New Zealand bank capital adequacy requirements

The Reserve Bank of New Zealand's revisions to bank capital adequacy requirements are being implemented in stages during a transition period from October 2021 to July 2028. By the end of the transition period, the minimum Tier 1 and Total capital requirements for banks deemed systemically important, including ASB, will increase to 16% and 18% of RWA respectively, of which 13.5% must be in the form of CET1 capital while Tier 2 capital can contribute up to a maximum of 2% of the Total capital requirement.

As at 31 December 2023, the CET1, Tier 1 and Total capital ratio requirements for ASB were 9%, 10.5% and 12.5%, respectively.

Resolution Planning

On 18 May 2023, APRA released its final Prudential Standard CPS 900 "Resolution Planning", which aims to ensure that an APRA-regulated entity can be managed by APRA in an orderly manner where that entity is unable to, or is likely to be unable to, meet its obligations or suspends, or is likely to suspend, payments. In such circumstances, the aim of the resolution is to protect beneficiaries, minimise disruption to the financial system and provide continuity of functions that are critical for the economy. CPS 900 came into effect on 1 January 2024.

Prudential framework for groups

On 24 October 2022, APRA released a letter to all APRA regulated entities indicating that it is reviewing the prudential framework for groups operating in the Australian banking sector to ensure it caters for the increasing array of new groups and it is consistently applied across different structures. APRA is yet to formally consult on any revisions to the relevant standards.

Recovery and Exit Planning

On 1 December 2022, APRA released its final Prudential Standard CPS 190 "Recovery and Exit Planning", aimed at reinforcing the resilience of the financial system. The new standard aims to ensure that APRA regulated entities are better prepared to manage periods of severe financial stress. CPS 190 came into effect on 1 January 2024 for banks.

APRA Discussion Paper: "Enhancing Bank Resilience: Additional Tier 1 Capital in Australia"

On 21 September 2023, APRA released a discussion paper outlining potential options for, and seeking feedback from stakeholders on, the effectiveness of Additional Tier 1 Capital in Australia. APRA intends to follow this process with a formal consultation in 2024 on any proposed amendments to prudential standards.

Targeted changes to ADI liquidity and capital standards

On 15 November 2023, APRA commenced consultation on proposed targeted revisions to ADIs' liquidity and capital requirements with the aim to ensure that ADIs have strong crisis preparedness, prudently value their liquid assets and minimise potential contagion risks. APRA intends to finalise the consultation in the first half of 2024, ahead of implementation from 1 January 2025.

1 Calculated in accordance with the RBNZ Prudential Requirements.

4

Leverage Ratio

The Group's leverage ratio, defined as Tier 1 Capital as a percentage of total exposures, was 5.0% as at 31 December 2023. The ratio reduced by 10 basis points on the prior half with an increase in exposures and payment of the 2H23 dividend, partly offset by capital generated from earnings.

Under APRA's revised capital framework effective 1 January 2023, the minimum leverage ratio requirement for IRB banks, such as CBA, is 3.5%.

Summary Group Leverage Ratio ³	31 Dec 23 ¹	30 Sep 23 ¹	30 Jun 23 ¹	31 Mar 23 ¹	31 Dec 22 ²
Tier 1 Capital (\$M)	68,093	66,359	67,771	66,005	66,864
Total Exposures (\$M) ⁴	1,362,098	1,347,663	1,334,426	1,351,297	1,318,783
Leverage Ratio (%)	5.0	4.9	5.1	4.9	5.1

1 Prepared in accordance with APRA's revised capital framework effective from 1 January 2023.

2 Prepared in accordance with APRA's capital framework effective up until 31 December 2022.

3 Refer to Appendix 11.2 for further details on the composition of the leverage ratio.

4 Total exposures are the sum of on Balance Sheet exposures, derivatives, Securities Financing Transactions (SFTs), and off Balance Sheet exposures, net of any Tier 1 regulatory deductions, as outlined in APS 110 *Capital Adequacy*.

5 Risk Weighted Assets

RWA are calculated using the AIRB approach for the majority of the Group's credit risk exposures, and using the Foundation or Standardised approach as required under the Australian prudential standards. For CBA's New Zealand Subsidiary, ASB, RWA are calculated using the Reserve Bank of New Zealand's prudential rules subject to certain APRA-prescribed adjustments. The Group must use the External Ratings-based Approach where a securitisation exposure is externally rated by an External Credit Assessment Institution (ECAI) or for which an inferred rating is available. Where the Group cannot use the External Ratings-based Approach, the Group must use the Supervisory Formula Approach.

Table 6b to 6f – Basel III Capital Requirements (RWA)

Total risk weighted assets	463,644	467,992	504,380	(4,348)	(1)

1 Prepared in accordance with APRA's revised capital framework effective from 1 January 2023.

2 Prepared in accordance with APRA's capital framework effective up until 31 December 2022.

3 Pursuant to APRA requirements, RWA amounts at 31 December 2023 and 30 June 2023 derived from the risk weighted functions of AIRB, FIRB and the advanced portfolio of RBNZ regulated entities have been multiplied by a scaling factor of 1.10 and RWA amounts at 31 December 2022 derived from AIRB risk weight functions have been multiplied by a scaling factor of 1.06.

4 Includes Corporate PD model overlays of \$4.2 billion at 31 December 2023 (June 2023: \$3.5 billion).

5 As a condition of APRA's approval of the Residential Mortgage LGD model, a \$7.4 billion RWA overlay has been applied at 31 December 2023 and 30 June 2023 for regulatory capital purposes.

6 Operational risk RWA as at 31 December 2023 and 30 June 2023 were determined under the standardised measurement approach in accordance with APS 115 effective from 1 January 2023. Prior to 1 January 2023 operational risk RWA were determined in accordance with the advanced measurement approach.

Traded market risk	9,627	15,390
Operational risk	44,975	43,155
Interest rate risk in the banking book	40,307	46,578
Total	463,644	467,992
Capital Floor at 72.5%	439,058	430,997
Capital floor adjustment	–	–

1 Prepared in accordance with APRA's revised capital framework effective from 1 January 2023.

2 RWA for residential mortgages (excluding RBNZ regulated subsidiaries) measured under the retail IRB approach is \$219 billion (30 June 2023: \$220 billion) when calculated under the standardised approach.

Risk Weighted Assets (continued)

Risk Weighted Assets ¹

Total Group RWA

Total RWA decreased \$4.4 billion or 1.0% on the prior half to \$463.6 billion, driven by a decrease in Interest Rate Risk in the Banking Book RWA and Traded Market Risk RWA; partly offset by higher Credit Risk and Operational Risk RWA.

Credit Risk RWA

Credit Risk RWA increased \$5.9 billion or 2% on the prior half to \$368.7 billion. Key drivers include:

- Volume growth (increase of \$8.1 billion) across commercial portfolios, financial institutions, unsecured retail portfolios, standardised exposures and derivatives; partly offset by lower domestic residential mortgages; and
- Foreign currency movements (increase of \$0.1 billion); partly offset by
- Credit quality (decrease of \$1.8 billion), primarily driven by improvements in domestic mortgages, unsecured retail portfolios, commercial portfolios and financial institutions; partly offset by sovereign and New Zealand portfolios; and
- Data and methodology (decrease of \$0.5 billion), primarily relating to residential mortgages.

¹ Due to rounding, numbers presented in this section may not sum precisely to the totals provided.

Credit Risk Weighted Assets (\$B)

¹ Credit quality includes portfolio mix.

² Includes data and methodology, credit risk estimates changes and regulatory treatments.

Traded Market Risk RWA

Traded market risk RWA decreased by \$5.8 billion or 37% on the prior half year to \$9.6 billion, driven by the APRA accredited implementation of a new market risk engine in July 2023.

Interest Rate Risk in the Banking Book (IRRBB) RWA

IRRBB RWA decreased \$6.3 billion or 13% on the prior half to \$40.3 billion. This was primarily driven by lower embedded losses due to lower swap rates.

Operational Risk RWA

As required by APS 115, operational risk RWA as at December 2023 have been determined based on the annual average value of the relevant components of the Group's net income over the years ended 30 June 2023, 2022 and 2021. Operational risk RWA as at June 2023 were determined based on the annual average value of the relevant components of the Group's net income over the financial years ended 30 June 2022, 2021 and 2020. The increase in operational risk RWA by \$1.8 billion or 4.2% on the prior half to \$45.0 billion was primarily driven by higher average net interest income over the years ended 30 June 2023, 2022 and 2021 as a result of rising interest rates and lending growth.

6

Credit Risk

6.1 Credit Risk Exposure – excluding Equities and Securitisation

The following tables detail credit risk exposures subject to AIRB, FIRB and standardised approaches.

Total	3,036	2,769	1,185	154	364

¹ Disclosures have not been restated and are reported as per APS 330 that was effective up until 31 December 2022.

² Represents loans ≥ 90 days past due but not impaired.

³ Specific provision balance includes certain Australian Accounting Standards collective provisions on some defaulted loans.

⁴ Actual losses equal write-offs from individual provisions and write-offs direct from collective provisions less recoveries of amounts previously written off for the half year ended 31 December 2022.

Factors impacting the loss experience

The overall quality of the portfolio deteriorated slightly during the financial half year ended 31 December 2023. Non-performing exposures increased by 5.1% over the half from \$7.7bn to \$8.1bn. The Group's actual losses increased by \$112 million on a prior half year to \$324 million primarily driven by higher write-offs in the manufacturing, non-retail and unsecured consumer portfolios; partially offset by lower write-offs in other non-retail sectors.

Credit Risk (continued)

6.2 Non-performing Exposures and Provisions (continued)

Table 7f (ii) – Non-performing, specific provisions and write-offs charged by portfolio

For definitions of the line items in the table above refer to Note 3.2 in the 2023 Annual Report.

Credit Risk (continued)

6.3 Portfolios Subject to Standardised and Supervisory Risk Weights

The standardised approach is used by the Group where portfolios or segments are considered to be immaterial by the size of exposure or where the relevant prudential standards require a standardised approach to be used¹.

Portfolios that use the standardised approach include:

APRA regulated entities – portfolios under APS 112: *Capital Adequacy: Standardised Approach to Credit Risk* (APS 112)

- Some retail SME (overdrawn accounts) and small unsecured consumer retail portfolios;
- Corporate exposures without risk ratings;
- Some standard residential property loans (including purchased portfolios);
- Non-standard residential property loans as defined in APS 112 including:
 - Interest only loans not predominantly for business purposes with an LVR greater than 80% and an interest only term specified in the contract as greater than 5 years;
 - Property exposures originated since 1 January 2023 where assessment does not result in a positive determination of the borrower's ability to meet repayment obligations; and
 - reverse mortgages and loans to self-managed superannuation funds;
- PTBC exposures;
- Margin lending; and
- Other assets (including property, plant and equipment, lease right of use assets and the residual value of assets under operating leases).

APRA regulated entities – portfolios under APS 180 *Capital Adequacy: Counterparty Credit Risk* (refer Section 6.6)

- Central counterparties; and
- Credit valuation adjustments (CVA).

¹ Since 1 January 2023 APRA has also required advanced ADIs to calculate risk weighted assets under the relevant standardised approach – refer page 10.

Risk weights have been applied in accordance with APS 112 and, where applicable, with consideration to the type of security held:

- For loans secured by residential property, consideration is given with respect to loan purpose, the Loan to Value Ratio (LVR); and whether lenders mortgage insurance (LMI) is held.
- For loans secured by commercial property, consideration is given to the LVR and the dependency on property cash flows.
- The Group's definition of internal risk ratings used for Corporate, Financial Institutions and Sovereign exposures has been aligned to equivalent rating grades provided by external credit assessment institutions including S&P Global Ratings and Moody's Investors Services.

The Group continues to review portfolios that use the standardised approach. Approval to apply the advanced approach will be sought from APRA when the size of exposures and number of customers within these portfolios are sufficient to qualify for advanced approaches.

For RBNZ regulated entities risk weights pertaining to standardised portfolios have been applied in accordance with RBNZ prudential requirements. Portfolios that use the standardised approach include:

RBNZ regulated entities – portfolios under APS 112

- Personal loans;
- Retail SME;
- Bank;
- Sovereign;
- Central counterparties;
- CVA; and
- Other assets.

APRA also requires certain specialised lending exposures, including Object and Project Finance, to be assigned specific risk weights according to "slotting" criteria defined by the regulator in APS 113 *Credit Adequacy: Internal Ratings-based Approach to Credit Risk*. This approach is also applied to Income Producing Real Estate (IPRE) exposures calculated under New Zealand prudential requirements.

1 APRA requires certain specialised lending exposures to be assigned specific risk weights according to "slotting" criteria as defined by the Regulator.

2 Excludes IPRE exposures now recognised in either AIRB or FIRB asset class.

3 Prepared in accordance with APRA's revised capital framework effective from 1 January 2023.

4 Prepared in accordance with APRA's capital framework effective up until 31 December 2022.

Credit Risk (continued)

6.4 Portfolios Subject to Internal Ratings-based Approaches

Table 9b – Internal ratings structure for credit risk exposures and mapping to external ratings

Description	Internal Rating	Probability of Default	S&P Rating	Moody's Rating
Exceptional	A0 to A3	0% - 0.035%	AAA to AA-	Aaa to Aa3
Very Strong/Strong	B1 to C3	>0.035% - 0.446%	A+ to BBB-	A1 to Baa3
Good/Satisfactory	D1 to E3	>0.446% - 6.656%	BB+ to B	Ba1 to B2
Weak/Doubtful	F1 to G3	>6.656%	B- to CC	B3 to Ca
Restructured	R	100% ¹	-	-
Defaulted	H	100%	D	C

¹ From January 2023 onwards.

Table 9c – PD rating methodology by portfolio segment

Portfolio Segment	PD Rating Methodology
Sovereign exposures	Expert judgement assigned risk rating, informed but not driven by rating agency views.
Financial Institution exposures (including Banks)	PD Rating Calculator or expert judgement assigned risk rating.
Corporate exposures (including property, agri-business)	Combination of expert judgement and PD Rating Model assigned risk ratings depending on the industry sector.
SME corporate exposures	PD Rating Model and expert judgement assigned risk rating.
SME retail exposures	SME behaviour score assigned PD pools.
Consumer retail exposures (including residential mortgages, qualifying revolving credit and other retail)	Depending on the product, PD pools are assigned using product specific application scorecards, behavioural scorecards, payment status or a combination thereof.

Analysis of Losses

The following tables provide a summary of financial losses by portfolio (Table 9e) and a comparison of financial losses to regulatory Expected Loss (EL) estimates (Table 9f (i)). Actual losses may differ from modelled regulatory EL for a number of reasons.

Actual losses (whether from standardised or internal ratings-based portfolios) are historical and are based on the quality of non-performing assets in prior periods, full or partial write-offs, and more recent economic conditions. Actual losses are expected to be below the regulatory EL estimate in most years. Regulatory EL measures economic loss at a point in time and includes costs (such as internal costs) not included in actual losses.

Regulatory EL is calculated on non-defaulted IRB, AIRB and FIRB exposures using long-run PDs and downturn LGDs. For defaulted IRB and AIRB exposures the Best Estimate of Expected Loss (BEEL) is used. For defaulted FIRB exposures regulatory EL is calculated as the downturn LGD rate multiplied by the exposure as required by APS 113. The supervisory slotting approach, calculated as the product of EAD and a prescribed factor, is used to determine regulatory EL for specialised lending exposures. A 50% factor is applied for defaulted specialised lending exposures. Regulatory EL is not required to be calculated on standardised portfolios.

6.4 Portfolios Subject to Internal Ratings-based Approaches (continued)

Accuracy of Risk Estimates

The following tables compare credit risk estimates used in calculating regulatory capital to realised outcomes. The risk estimates are based on prudential requirements prior to the revised capital framework. The prudential standard changes have introduced a number of new asset classes which will be reported once there is adequate historical data available.

Probability of Default

Table 9f (ii) compares estimates of long-run PD to actual default rates averaged over the period from 2016.

Average estimated PD is based on the average of long-run PDs for borrowers that are not in default at the beginning of each financial year in the observation period. Actual PD is based on the number of defaulted borrowers during the year compared to the non-defaulted borrowers measured at the beginning of each financial year.

Table 9f (ii) – Accuracy of risk estimates – PD

Portfolio Type	31 December 2023	
	Average estimated PD	Average actual PD
	%	%
Corporate (incl. SME corporate)	2.17	2.04
Specialised lending ¹	n/a	1.77
Sovereign	0.49	–
Bank	0.35	–
SME retail	2.13	1.63
Residential mortgage	0.71	0.55
Qualifying revolving retail	1.57	1.52
Other retail	6.57	6.28
RBNZ regulated entities:		
Non-retail	1.62	0.84
Retail	1.69	0.91

¹ Average estimated PD not relevant for specialised lending under the Supervisory Slotting approach.

Loss Given Default and Exposure at Default

LGDs for non-retail portfolios are based on accounts that defaulted in 2016 to 2021 financial years. LGDs for retail portfolios are based on accounts that defaulted in 2016 to 2022 financial years. Defaults occurring in the most recent years have been excluded from the analysis, to allow sufficient time for workout of impaired assets, booking of losses and more meaningful disclosures.

The EAD ratio compares estimates of EAD prior to default to realised EAD for borrowers that defaulted.

Table 9f (iii) – Accuracy of risk estimates – LGD and EAD

Portfolio Type	31 December 2023		
	Average estimated downturn LGD	Average actual LGD	Ratio of estimated EAD to actual EAD
	%	%

6.7 Securitisation

Banking Book

The following table provides banking book exposures securitised by the Group and third party securitised assets where the Group is classified as a sponsor. The Group originated exposures can be broken down as follows:

- Group originated assets - capital relief comprise CBA Medallion Trusts subject to capital treatment under APS 120.
- Group originated assets - non-capital relief comprise CBA Medallion Trusts subject to capital treatment under APS 113 *Capital Adequacy: Internal Ratings-based Approach to Credit Risk*.
- Group originated assets - internal RMBS comprise CBA Medallion and ASB Medallion Trusts, held for contingent liquidity purposes.
- Third party originated assets comprise assets managed and sponsored by the Group.

Table 12g (i) – Banking book exposures securitised – traditional securitisation

Underlying Asset	31 December 2023			
	Group originated assets - capital relief	Group originated assets - non capital relief	Group originated assets - internal RMBS	Third party originated assets

Other	–	–	–	–
Total	3,609	3,154	176,438	–

Table 12g (ii) – Banking book exposures securitised – synthetic securitisation

APS 120 provides specific regulatory treatment for synthetic securitisations where credit risk is transferred to a third party, however, legal ownership of the underlying assets remains with the originator. The Group has not undertaken any synthetic securitisation in the banking book.

Table 12m – Banking book exposures subject to early amortisation

The Group has not undertaken any securitisation subject to early amortisation treatment.

Table 12n – Banking book resecuritisation exposures

The Group does not have any retained or repurchased banking book resecuritisation exposure.

Trading Book

Table 12o – Trading book exposures securitised

The Group has no traditional or synthetic securitisation exposures in the trading book.

Table 12p – Trading book exposures intended to be securitised

As at 31 December 2023, the Group does not have any outstanding trading book exposures that are intended to be securitised.

Table 12q – Trading book activity for the reporting period

The Group participated in third party securitisation in the trading book during the half year ended 31 December 2023, relating to nil residential mortgages (30 June 2023: nil, 31 December 2022: nil), \$3 million credit cards and other personal loan (30 June 2023: nil, 31 December 2022: nil), and nil auto and equipment finance (30 June 2023: \$3 million, 31 December 2022: nil) exposures.

Table 12r – Trading book exposures subject to APS 116

The aggregate amount of exposures securitised by the Group and subject to APS 116 *Capital Adequacy: Market Risk* (APS 116) was \$78 million as at 31 December 2023 (30 June 2023: \$39 million, 31 December 2022: \$37 million), all of which are traditional securitisations. This consists of:

- Securities held in the trading book subject to the Standard Method of nil (30 June 2023: nil 31 December 2022: Nil); and
- Derivatives held in the trading book subject to the Internal Models Approach (IMA) of \$78 million (30 June 2023: \$39 million, 31 December 2022: \$37 million).

1 Equity investment exposures include non-traded equity investments as well as investments in associates that are treated as capital deductions and are not risk weighted at Level 2.

2 Comparative information has been revised to reflect the reclassification of the Group's investment in Qilu Bank from an investment in associate to an investment at fair value through other comprehensive income. For further details refer to note 1.1 in CBA Group's financial statements for the half year ended 31 December 2023.

8

Market Risk

8.1 Traded Market Risk

Capital Calculation Methods

The breakdown of RWA for traded market risk by modelling method is summarised in the table below.

	31 Dec 23 \$M	30 Jun 23 \$M	31 Dec 22 \$M
Traded Market Risk RWA by Modelling Approach ¹			
Internal Model Approach	8,547	14,305	12,879
Standard Method	1,080	1,085	894
Total Traded Market Risk RWA	9,627	15,390	13,773

¹ Refer to page 11 for commentary.

The capital requirement for traded market risk under the standard method is disclosed in Table 13b.

Table 13b – Traded Market Risk under the Standard Method

Exposure Type	31 Dec 23 \$M	30 Jun 23 \$M	31 Dec 22 \$M
Interest rate risk	86.4	86.6	71.3
Equity risk	–	–	–
Foreign exchange risk	–	0.2	0.2
Commodity risk	–	–	–
Total	86.4	86.8	71.5
Risk Weighted Asset equivalent ¹	1,080	1,085	894

¹ Risk Weighted Assets equivalent is the capital requirements multiplied by 12.5 in accordance with APS 110.

Traded Market Risk Internal Model

The VaR and SVaR results calculated under the internal model approach are summarised in Table 14f (i).

Table 14f (i) – Value-at-Risk and Stressed Value-at-Risk for Trading Portfolios under the Internal Model Approach

	Aggregate VaR Over the Reporting Period			
	Mean value \$M	Maximum value \$M	Minimum value \$M	As at balance date \$M
Average VaR ¹				
Over the 6 months to 31 December 2023	51	68	36	62
Over the 6 months to 30 June 2023	109	177	73	109
Over the 6 months to 31 December 2022	79	88	71	71

¹ 10 day, 99% confidence interval over the reporting period.

	Aggregate SVaR Over the Reporting Period			
	Mean value \$M	Maximum value \$M	Minimum value \$M	As at balance date \$M
Stressed VaR ¹				
Over the 6 months to 31 December 2023	108	150	80	126
Over the 6 months to 30 June 2023	168	257	99	144
Over the 6 months to 31 December 2022	154	179	123	154

¹ 10 day, 99% confidence interval over the reporting period.

Market Risk (continued)

8.1 Traded Market Risk (continued)

Internal Model Approach – Back-test results

The Internal model is subject to back-testing against hypothetical profit and loss. In the 6 months to 31 December 2023 there were no back test outliers. The back-test results are summarised in Table 14f (ii) and details of these are provided in Table 14f (iii). A comparison of VaR with actual gains or losses during the 6 months to 31 December 2023 is illustrated in Table 14f (iv).

APS 330 Table 14f (ii) - Summary Table of the Number of Back-Testing Outliers ¹

Over the 6 months to 31 December 2023	-
Over the 6 months to 30 June 2023	6
Over the 6 months to 31 December 2022	2

1 Determined in accordance with the standardised measurement approach as required by APS 115 effective from 1 January 2023.

2 Determined in accordance with APRA's capital framework effective up until 31 December 2022.

3 Refer to page 11 for commentary.

10 Liquidity Risk

10.1 Liquidity Coverage Ratio

The Group calculates its LCR position on a daily basis, ensuring a buffer is maintained over the minimum regulatory requirement of 100% and the Board's risk appetite. Over the December 2023 quarter, excess liquid assets averaged \$49.6 billion and the average LCR decreased from 137% to 136%. The decrease in average LCR was due to balance sheet positioning and cash management activities over the Dec-23 quarter. On a spot basis, the LCR was between 129% and 142% over the quarter.

The Group's mix of liquid assets consists of HQLA, such as cash, deposits with central banks, Australian government and semi-government securities, and foreign sovereign securities. Liquid assets also include securities classified as liquid assets by the RBNZ. Liquid assets are distributed across the Group to support regulatory and internal requirements and are consistent with the distribution of liquidity needs by currency. Average liquid assets decreased over the quarter.

NCO are modelled under an APRA prescribed 30 day severe liquidity stress scenario. The Group manages modelled NCO by maintaining a large base of low LCR outflow customer deposits and actively managing its wholesale funding maturity profile as part of its overall liquidity management strategy. Average NCO decreased over the quarter due primarily to a reduction in cash flows from wholesale funding maturities and customer switching to higher yield term deposits.

Liquidity Risk (continued)

10.2 Net Stable Funding Ratio

The NSFR requires Australian ADIs to have sufficient Available Stable Funding (ASF) to meet their Required Stable Funding (RSF) over a one year horizon. The Group calculates its NSFR position daily, ensuring a buffer is maintained over the regulatory requirement of 100% and the Board's risk appetite. The ASF and RSF are calculated by applying factors prescribed by APRA, to liabilities, assets and off Balance Sheet commitments.

The Group's main sources of ASF are deposits from retail and SME customers, wholesale funding and capital. The main contributors to RSF are residential mortgages and loans to business and corporate customers.

The NSFR decreased from 123% at 30 September 2023 to 121% at 31 December 2023. Over the period, the Group's ASF decreased due to changes in the TFF maturity profile, partly offset by retail and SME deposit growth. RSF increased primarily due to an increase in security holdings and an increase in RSF factor applied to residential mortgage securities previously utilised as collateral for TFF drawings.

1 Represents the shortfall between the calculated Regulatory EL and Eligible Provisions (EP) with respect to credit portfolios which are subject to the AIRB approach. The adjustment is assessed separately for both defaulted and non-defaulted exposures. Where there is an excess of EL over EP in either assessments, the difference must be deducted from CET1. For non-defaulted exposures where the EL is lower than the EP, this may be included in Tier 2 capital up to a maximum of 0.6% of total Credit Risk RWA.

2 In accordance with APRA regulations, the surplus in the Group's defined benefit superannuation fund, net of any deferred tax liability, is deducted from CET1.

Non-controlling interests	5	–	5	Table B
Total Shareholders' Equity	72,839	(45)	72,794	

¹ Reflects the deconsolidation of an insurance entity and those entities through which securitisation of the Group's assets are conducted. These entities are classified as non-consolidated subsidiaries by APRA and are excluded from the Level 2 Regulatory Consolidated Banking Group.

Appendices (continued)

11.4 Reconciliation between Detailed Capital Disclosures Template and Regulatory Balance Sheet

The following tables provide additional information on the differences between the Detailed Capital Disclosures Template (Appendix 11.1) and the Regulatory Balance Sheet (Appendix 11.3).

Table A	31 Dec 23 \$M	Template Reference
Share Capital		
Total per Balance Sheet (Ordinary Share Capital) ¹	33,774	Row 1
Treasury Shares held by the Group's employee share scheme trusts (APRA specific adjustment)	147	Row 26a
Total Ordinary Share Capital and Treasury Shares	33,921	

Table B	31 Dec 23 \$M	Template Reference
Non-Controlling Interests		
Total per Balance Sheet ¹	5	
Less other non controlling interests not included in Capital	(5)	
Total per Capital Template	–	Row 5

Table C	31 Dec 23 \$M	Template Reference
Goodwill and Other Intangibles		
Total per Balance Sheet ¹	7,510	
Less capitalised software and other intangibles separately disclosed in template	(2,221)	
Total per Capital Template - Goodwill	5,289	Row 8
Other intangibles (including capitalised software) per Balance Sheet	2,221	
Less deferred tax liability associated with other intangibles	(56)	
Total per Capital Template - Other Intangibles	2,165	Row 9

Table D	31 Dec 23 \$M	Template Reference
Deferred Tax Assets		
Deferred tax assets per Balance Sheet ¹	3,315	
Less deferred tax liabilities per Balance Sheet ¹	(74)	
Net Deferred Tax Assets ²	3,241	
Adjustments required in accordance with APRA prudential standards ³	(86)	
Total per Capital Template	3,155	Row 26e

1 Represents the balance per Level 2 Regulatory Balance Sheet.

2 Represents the balance of deferred tax assets net of deferred tax liabilities per Level 2 Regulatory Balance Sheet.

3 Represents the deferred tax balances associated with reserves ineligible for inclusion in regulatory capital, the general reserve for credit losses, intangibles, and the impact of limitations of netting of balances within the same geographic tax authority.

PERLS XV	1,777	
PERLS XVI	1,550	
Total Additional Tier 1 Capital Instruments	10,862	Row 36
Table F		
	31 Dec 23 \$M	Template Reference
Tier 2 Capital Instruments		
Total included in Balance Sheet	25,857	
Less amount of Tier 2 debt issued by subsidiary ineligible for inclusion in the Group's Capital	–	
Add issue costs ³	35	
Less amortisation of instruments ⁴	(521)	
Total per Capital Template	25,371	Row 46, 47

¹ Represents the balance per Level 2 Regulatory Balance Sheet.

² For regulatory capital purposes, APRA requires these instruments to be included as if they were unhedged.

³ Unamortised issue costs relating to capital instruments are netted off against each instrument in the Balance Sheet. For regulatory capital purposes, these capital instruments are shown at face value. The unamortised issue costs are deducted from CET1 as part of capitalised expenses in Row 26f in the Detailed Capital Disclosures Template.

⁴ APRA requires these instruments to be amortised by 20% of the original amount during each of the last five years to maturity.

Details on the main features of Capital instruments included in the Group's regulatory capital (Ordinary Share Capital, Additional Tier 1 Capital and Tier 2 Capital) as required by APS 330 Attachment B can be found at Commbank.com.au/regulatorydisclosures

Appendices (continued)

11.4 Reconciliation between Detailed Capital Disclosures Template and Regulatory Balance Sheet (continued)

Table G	31 Dec 23 \$M	Template Reference
Equity Investments		
Investment in commercial entities	172	Row 26g
Investments in significant financial entities	2,434	Row 26d, 73
Investments in non-significant financial entities	1,440	Row 26d, 72
	4,046	
Equity investment in non-consolidated subsidiaries ¹	89	Row 26d, 73
Total per Capital Template ²	4,135	

1 Equity investments are classified in the Level 2 Regulatory Balance Sheet across assets at fair value through income statement, investment securities, investment in regulatory non-consolidated subsidiaries and investment in associates and joint ventures. In addition, the Group has loans and undrawn commitments (off Balance Sheet) which are deemed equity in nature for regulatory capital purposes.

2 The aggregate of investments in significant financial entities of \$2,434 million, investments in non-significant financial entities of \$1,440 million and equity investment in non-consolidated subsidiaries of \$89 million is a total of \$3,963 million and is included in Row 26d in the Detailed Capital Disclosures Template. The remaining balance of \$172 million related to investments in commercial entities.

Countercyclical Capital Buffer

The Countercyclical Capital Buffer (CCyB), which is effective for Australian ADIs from 1 January 2016, represents an extension to the capital conservation buffer and may require an ADI to hold additional CET1 of up to 3.5%. The CCyB is calculated as the sum of the specific buffer set by APRA with respect to Australian private sector exposures and the weighted average for offshore private sector exposures where the CCyB has been enacted.

Table H	RWA ¹ \$M	Jurisdictional Buffer %	ADI Specific Buffer ² %	Template Reference
Country ³				
Australia	288,478	1.000	0.803506	
United Kingdom	3,567	2.000	0.019871	
Hong Kong	265	1.000	0.000739	
Luxembourg	248	0.500	0.000345	
Netherlands	211	1.000	0.000587	
Denmark	130	2.500	0.000906	
Norway	61	2.500	0.000422	
Others	66,065	0.000	0.000000	
Total	359,025		0.826376	Row 66

1 Represents total private sector (excludes Banks and Sovereigns) credit and specific market risk RWA.

2 Calculated as each country share of total private sector credit and specific market RWA multiplied by the CCyB applicable in each country.

3 Represents country of ultimate risk as at 31 December 2023.

11.8 Glossary

Term	Definition
Additional Tier 1 Capital (AT1)	Additional Tier 1 Capital is a concept defined by APRA and consists of high quality capital that essentially provides a permanent and unrestricted commitment of funds, is freely available to absorb losses, ranks behind the claims of depositors and other senior creditors in the event of a wind-up, and provides for fully discretionary capital distributions.
Advanced Internal Ratings-based (AIRB) Approach	This approach is used to measure credit risk in accordance with the Group's Basel III accreditation. From 1 January 2023, this allows the Group to use internal estimates of PD and LGD (excluding senior unsecured and subordinated corporate exposures), with supervisory estimates to be used for EAD for the purposes of calculating regulatory capital. Prior to 31 December 2022, PD, LGD and EAD internal estimates could be used for the purposes of calculating regulatory capital.
Advanced Measurement Approach (AMA)	Up until 1 January 2023, the methodology used to measure operational risk in accordance with the Group's Basel III accreditation that allows the Group to use its own internal model for the purposes of calculating regulatory capital. From 1 January 2023, the Standardised Measurement Approach is used.
Alternative Liquid Assets (ALA)	Assets that qualify for inclusion in the numerator of the LCR in jurisdictions where there is insufficient supply of HQLA. No ALA are recognised in the LCR following the reduction of the CLF to zero on 1 January 2023.
APRA's Revised Capital Framework	Refers to APRA's revision to the ADI Capital Framework implemented from 1 January 2023.
ASB	ASB Bank Limited – a subsidiary of the Commonwealth Bank of Australia that is regulated by the RBNZ.
Australian Accounting Standards	The Australian Accounting Standards as issued by the Australian Accounting Standards Board (AASB).
Australian Prudential Regulation Authority (APRA)	The Australian Prudential Regulation Authority is an independent statutory authority that supervises institutions across banking, insurance and superannuation, and is accountable to the Australian parliament. The regulator of banks, insurance companies and superannuation funds, credit unions, building societies and friendly societies in Australia.
Authorised Deposit-taking Institution (ADI)	ADIs are corporations that are authorised under the Banking Act 1959 to carry on banking business in Australia.
Banking Book	The banking book is a term for assets on a bank's Balance Sheet that are expected to be held to maturity, usually consisting of customer loans to, and deposits from retail and corporate customers. The banking book can also include those derivatives that are used to hedge exposures arising from the banking book activity, including interest rate risk.
Basel III	Refers to the Basel Committee on Banking Supervision's framework for more resilient banks and banking systems issued in December 2010 (revised in June 2011), Capital requirements for bank exposures to central counterparties (July 2012), and the subsequent Basel III reforms finalised in December 2017.
Capital Floor	The capital floor is defined as the higher of total RWA as determined under the IRB approach, and 72.5% of total RWA as calculated under the standardised approach.
CBA	Commonwealth Bank of Australia – the head entity of the Group.
Central Counterparty (CCP)	A clearing house that interposes itself between counterparties to contracts traded in one or more financial markets, thereby ensuring the future performance of open contracts.
Collective Provision	All loans and receivables that do not have an individually assessed provision are assessed collectively for impairment. The Collective Provision is maintained to reduce the carrying value of the portfolio of loans to their estimated recoverable amounts. These provisions are reported in the Group's Financial Statements in accordance with Australian Accounting Standards (AASB 9 <i>Financial Instruments</i>).
Commercial Property	Basel asset class – a property exposure that is not a residential property or a land acquisition, development and construction exposure.
Committed Liquidity Facility (CLF)	The RBA provided the CLF to participating ADIs under the LCR, as a shortfall in Commonwealth government and semi-government securities existed in Australia. ADIs could draw under the CLF in a liquidity crisis against qualifying securities pledged to the RBA. APRA phased out sector-wide usage of the CLF to zero on 1 January 2023.
Common Equity Tier 1 (CET1) Capital	The highest quality of capital available to the Group reflecting the permanent and unrestricted commitment of funds that are freely available to absorb losses. It comprises ordinary share capital, retained earnings and reserves; less prescribed deductions.

Appendices (continued)

11.8 Glossary (continued)

Term	Definition
Corporate	Basel asset class – from 1 January 2023, this includes commercial credit risk where annual revenues are greater than or equal to \$75 million but less than \$750 million. Prior to this date annual revenues could be greater than or equal to \$50 million.
Corporate - Large	Basel asset class – applicable from 1 January 2023, and applies to commercial credit risk where annual revenues are more than \$750 million.
Credit Valuation Adjustment (CVA) Risk	The risk of mark-to-market losses related to deterioration in the credit quality of a derivative counterparty.
Domestic Public Sector Entity	Basel asset class – exposures that do not meet the definition of Sovereign exposures, but have a level of control or ownership by any level of the Australian Government or the RBA, including those which do not have specific revenue-raising powers.
Exposure at Default (EAD)	The extent to which the Group may be exposed upon default of an obligor.
Extended Licenced Entity (ELE)	An Extended Licensed Entity is comprised of an ADI and each subsidiary of an ADI as specified in any approval granted by APRA in accordance with Prudential Standard APS 222 <i>Associations with Related Entities</i> .
External Credit Assessment Institution (ECAI)	For example: Moody's Investor Services, S&P Global Ratings or Fitch Ratings.
Financial Institution	Basel asset class – primarily includes exposures which relate to: banking, the management of financial assets, lending, factoring, leasing, provision of credit enhancements, securitisation, investments, financial custody, central counterparty services, and proprietary trading.
Foundation Internal Ratings-based (FIRB) Approach	This approach is applicable from 1 January 2023, and is used to measure credit risk in accordance with the Group's Basel III accreditation that allows the Group to use internal estimates of PD and rely on supervisory estimates for LGD and EAD for the purposes of calculating regulatory capital.
General Provisions	Collective Provisions classified as Stage 1 and Stage 2 in accordance with Australian Accounting Standards (AASB 9 <i>Financial Instruments</i>). All Stage 2 provisions are held on a purely forward-looking basis for future losses presently unidentified; hence all Stage 2 provisions (together with Stage 1) are classified as General Provisions.
General Reserve for Credit Losses (GRCL)	The Group continued to disclose the GRCL, which was retired from 1 January 2022 under Prudential Standard APS 220 <i>Credit Risk Management</i> , until changes under APS 330 came into effect from 1 January 2023. The former APS 220 <i>Credit Quality</i> required the Group to establish a reserve that covered credit losses prudently estimated, but not certain to arise, over the full life of all individual facilities making up the business of the ADI. Most of the Group's collective provisions are included in the GRCL. An excess of required GRCL over the Group's collective provisions was recognised as a deduction from CET1 under the former standard.
Group	Commonwealth Bank of Australia and its subsidiaries.
High Quality Liquid Assets (HQLA)	Assets are considered to be high quality liquid assets if they can be easily and immediately converted into cash at little or no loss of value.
Impaired Assets	Facilities are classified as impaired where there is doubt as to whether the full amounts due, including interest and other payments due, will be achieved in a timely manner.
Individual provisions	Provisions made against individual facilities where there is objective evidence of impairment and full recovery of principal and interest is considered doubtful. These provisions are as reported in the Group's Financial Statements in accordance with the Australian Accounting Standards (AASB 9 <i>Financial Instruments</i>). Also known as individually assessed provisions or IAP.
Interest Rate Risk in the Banking Book (IRRBB)	Interest Rate Risk in the Banking Book is the risk that the Bank's profit derived from Net Interest Income (interest earned less interest paid), in current and future periods, is adversely impacted by changes in interest rates. This is measured from two perspectives: firstly by quantifying the change in the net present value of the Balance Sheet's future earnings potential, and secondly as the anticipated change to Net Interest Income earned over 12 months. This calculation is driven by APRA regulations with further detail outlined in the Group's 30 June 2023 Basel III Pillar 3 report, and section 8.2.
Land Acquisition Development or Construction (ADC)	Basel asset class – exposures secured by land acquired for development and construction purposes, or development and construction of any residential or commercial property.
Level 1	The Parent Bank (Commonwealth Bank of Australia), offshore branches (the Bank) and APRA approved Extended Licensed Entities.
Level 2	The level at which the Group reports its capital adequacy to APRA, being the Consolidated Banking Group comprising the ADI and all of its subsidiary entities other than the insurance business and certain entities through which securitisation of Group assets is conducted. This is the basis on which this report has been produced.
Level 3	The conglomerate group including the Group's insurance entity and qualifying securitisation entities.

Appendices (continued)

11.8 Glossary (continued)

Term	Definition
Leverage Ratio	Tier 1 Capital divided by total exposures, expressed as a percentage.
Liquidity Coverage Ratio (LCR)	The LCR is a quantitative liquidity measure that is part of the Basel III reforms. It was implemented by APRA in Australia on 1 January 2015. It requires Australian ADIs to hold sufficient liquid assets to meet 30 day net cash outflows projected under an APRA-prescribed stress scenario.
Loss Given Default (LGD)	An estimate of the expected severity of loss for a credit exposure following a default event. LGD represents the fraction of EAD that is not expected to be recovered following default.
Monte Carlo simulation	A method of random sampling to achieve numerical solutions to mathematical problems.
Net Cash Outflows (NCO)	Net cash outflows in the LCR are calculated by applying prescribed run-off factors on liabilities and various off Balance Sheet exposures that can generate a cash outflow in the next 30 days.
Net Stable Funding Ratio (NSFR)	The NSFR more closely aligns the behaviour term of assets and liabilities. It is the ratio of the amount of available stable funding (ASF) to the amount of required stable funding (RSF). ASF is the portion of an ADI's capital and liabilities expected to be a reliable source of funds over a one year time horizon. RSF is a function of the liquidity characteristics and residual maturities of an ADI's assets and off Balance Sheet activities.
Non-performing	An exposure that is in default.
Operational Risk under the Standardised Measurement Approach	From 1 January 2023, the methodology used to measure operational risk, utilising an APRA prescribed formulaic approach which is largely dependent on profit or loss from ordinary banking activities.
Other Assets	Basel asset class – primarily includes Cash Items, Investments in Related Entities, Fixed Assets, Lease Assets and Margin Lending.
Other Retail	Basel asset class – primarily includes retail credit exposures not otherwise classed as a residential mortgage, SME retail or a qualifying revolving retail asset.
Past Due	Facilities are past due when a contracted amount, including principal or interest, has not been met when due, or when it is otherwise outside contracted arrangements.
Probability of Default (PD)	The PD reflects a borrower's ability to generate sufficient cash flows in the future to meet the terms of all of its credit obligations to the Group.
Prudential Capital Requirement (PCR)	The regulatory minimum CET1, Tier 1 and Total Capital ratios that the Group is required to maintain at all times.
Qualifying Revolving Retail (QRR)	Basel asset class – represents revolving exposures less than \$0.1 million to individuals, unsecured and unconditionally cancellable by the Group. Only Australian retail credit cards qualify for this asset class.
RBA	Reserve Bank of Australia.
RBNZ	Reserve Bank of New Zealand.
RBNZ regulated entities	All references to RBNZ regulated entities refer to RBNZ regulated subsidiaries and include ASB exposures for which RWA are calculated using the RBNZ's prudential rules subject to certain APRA-prescribed adjustments.
Residential Mortgage	Basel asset class – retail exposures secured by residential mortgage property.
Risk Weighted Assets (RWA)	The value of the Group's on and off Balance Sheet assets are adjusted by risk weights calculated according to various APRA prudential standards.
Scaling Factor	In order to broadly maintain the aggregate level of capital in the global financial system post implementation of Basel II, the Basel Committee on Banking Supervision applies a scaling factor to the RWA amounts for credit risk under the IRB Retail, AIRB and FIRB approaches of 1.10 (31 December 2022: 1.06). This is also applied to advanced exposures within RBNZ regulated entities.
Securities Financing Transactions (SFT)	APRA defines securities financing transactions as transactions such as repurchase agreements, reverse repurchase agreements, security lending and borrowing, and margin lending transactions, where the value of the transactions depends on the market valuation of securities and the transactions are typically subject to margin agreements.
Securitisation	Basel asset class – Group originated securitised exposures and the provision of facilities to customers in relation to securitisation activities.
SME Corporate	Basel asset class – from 1 January 2023, Small and Medium Enterprise (SME) commercial credit risk where annual revenues are less than \$75 million. Prior to this date, this asset class was applicable to SME commercial credit risk where annual revenues were less than \$50 million.
SME Retail	Basel asset class – from 1 January 2023, Small and Medium Enterprise (SME) commercial credit risk where annual revenues are less than \$75 million and exposures are less than \$1.5 million (previously \$1.0 million).
Sovereign	Basel asset class – primarily claims on Australian and foreign governments, central banks (including the RBA), international banking agencies and regional development banks.

Appendices (continued)

11.8 Glossary (continued)

Term	Definition
Specialised Lending	Basel asset classes subject to the supervisory slotting approach which include: object finance, project finance and commodity finance. Prior to 1 January 2023, Income Producing Real Estate exposures were also subject to the supervisory slotting approach.
Specific Provisions	<p>All provisions, both collectively and individually assessed, classified as Stage 3 in accordance with Australian Accounting Standards (AASB 9 <i>Financial Instruments</i>).</p> <p>The Group continued to disclose Specific Provisions as required under the former Prudential Standard APS 220 <i>Credit Quality</i>, which was retired from 1 January 2022, until changes under APS 330 came into effect from 1 January 2023. The former APS 220 required ADIs to report as Specific Provisions all provisions for impairment assessed by an ADI on an individual basis in accordance with the Australian Accounting Standards, and that portion of provisions assessed on a collective basis which are deemed ineligible to be included in the GRCL (which are primarily Collective Provisions on some defaulted assets).</p>
Stage 1	On origination, an impairment provision equivalent to 12 months expected credit losses (ECL) is recognised, reflecting the credit losses expected to arise from defaults occurring over the next 12 months.
Stage 2	Financial assets that have experienced a significant increase in credit risk (SICR) since origination are transferred to Stage 2 and an impairment provision equivalent to lifetime ECL is recognised. Lifetime ECL is the credit losses expected to arise from defaults occurring over the remaining life of financial assets. If credit quality improves in a subsequent period such that the increase in credit risk since origination is no longer considered significant the exposure is reclassified to Stage 1 and the impairment provision reverts to 12 months ECL.
Stage 3	Non-performing (defaulted) financial assets are transferred to Stage 3 and an impairment provision equivalent to lifetime ECL is recognised.
Standardised Approach	An alternate approach to the assessment of credit, operational and traded market risk whereby an ADI uses external ratings agencies to assist in assessing credit risk and/or the application of specific values provided by regulators to determine RWA.
Stressed Value-at-Risk (SVaR)	Stressed Value-at-Risk uses the same methodology as VaR except that the historical data used is taken from a one year observation period of significant market volatility as seen during the Global Financial Crisis.
Term Funding Facility (TFF)	A facility provided by the RBA to certain ADIs to support lending to Australian businesses.
Tier 1 Capital	Comprises CET1 and Additional Tier 1 Capital.
Tier 2 Capital	Capital items that fall short of the necessary conditions to qualify as Tier 1 Capital.
Total Capital	Comprises CET1, Additional Tier 1 Capital and Tier 2 Capital.
Total Exposures (as used in the leverage ratio)	The sum of on Balance Sheet items, derivatives, securities financing transactions (SFTs), and off Balance Sheet items, net of any Tier 1 regulatory deductions that are already included in these items, as outlined in APS 110 <i>Capital Adequacy</i> (APS 110) Attachment D.
Trading Book	Exposures, including derivative products and other off Balance Sheet instruments that are held either with a trading intent or to hedge other elements of the trading book.
Value-at-Risk (VaR)	Value-at-Risk is a measure of potential loss using historically observed market volatility and correlation between different markets.
