As of the date of this Registration Document, the members of the Audit Committee are Sharon L. Allen (Chair), Arnold W. Donald, Lionel L. Nowell III, Denise L. Ramos, Clayton S. Rose, Michael D. White and R. David Yost.

Corporate Governance

The Issuer has complied in all material respects with the corporate governance regime of the State of Delaware and all applicable provisions of Delaware General Corporation Law.

Ratings

As at the date of this Registration Document, the Issuer's long-term senior debt is rated A2 (Stable) by Moody's, A- (Stable) by S&P and A+ (Stable) by Fitch. As of the date of this Registration Document, the Issuer's subordinated debt is rated Baa1 (Stable) by Moody's, BBB+ (Stable) by S&P and A- (Stable) by Fitch.

According to Moody's, an obligation rated A by Moody's is judged to be upper-medium-grade and subject to low credit risk and an obligation rated Baa by Moody's is judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics. Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. A Moody's rating outlook is an opinion regarding the likely rating direction over the medium term. A stable outlook indicates a low likelihood of a rating change over the medium term.

According to S&P, an obligation rated A by S&P is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories; however, the capacity of the obligor to meet its financial commitments on the obligation is still strong and an obligation rated BBB by S&P exhibits adequate protection parameters; however, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation. S&P's ratings may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories. An S&P rating outlook assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years). In determining a rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions. An outlook is not necessarily a precursor of a rating change or future CreditWatch action. Stable means that a rating is not likely to change.

According to Fitch, an obligation rated A by Fitch is considered high credit quality and indicates that expectations of default risk are low. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings. Rating outlooks indicate the direction a rating is likely to move over a one- to two-year period. They reflect financial or other trends that have not yet reached the level that would trigger a rating action, but which may do so if such trends continue. Positive or negative rating outlooks do not imply that a rating change is inevitable and, similarly, ratings with stable outlooks can be raised or lowered without a prior revision to the outlook, if circumstances warrant such an action.

Credit ratings and outlooks may be adjusted over time, and so there is no assurance that these credit ratings and outlooks will be effective after the date of this Registration Document. A credit rating is not a recommendation to buy, sell or hold any securities.
