

IMPORTANT NOTICE

NOT FOR DISTRIBUTION IN, OR INTO, THE UNITED STATES EXCEPT TO QUALIFIED INSTITUTIONAL BUYERS (“QIBs”), AS DEFINED IN, AND IN COMPLIANCE WITH, RULE 144A UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE “SECURITIES ACT”) OR OTHERWISE THAN TO PERSONS TO WHOM IT CAN LAWFULLY BE DISTRIBUTED.

IMPORTANT: You must read the following disclaimer before continuing. The following applies to the offering circular (“**Offering Circular**”) following this page, whether received by e-mail, accessed from an internet page or received as a result of electronic transmission, and you are therefore required to read this carefully before reading, accessing or making any other use of the attached Offering Circular. In accessing the attached Offering Circular, you agree to be bound by the following terms and conditions, including any modifications to them any time you receive any information from the Issuer and the Joint Bookrunners (each as defined below) as a result of such access.

The attached Offering Circular has been prepared solely in connection with the proposed offering to certain institutional and professional investors of the securities described herein, which are exempt from registration under the U.S. Securities Act of 1933, as amended (the “**Securities Act**”). Nothing in this electronic transmission constitutes an offer of securities for sale in the United States.

NOTHING IN THIS ELECTRONIC TRANSMISSION CONSTITUTES AN OFFER OF SECURITIES FOR SALE OR A SOLICITATION OF AN OFFER TO BUY SECURITIES IN ANY JURISDICTION WHERE THE OFFER, SALE OR SOLICITATION IS NOT PERMITTED. ANY SECURITIES TO BE ISSUED HAVE NOT BEEN, AND WILL NOT BE, REGISTERED UNDER THE SECURITIES ACT, OR THE SECURITIES LAWS OF ANY STATE OR OTHER JURISDICTION OF THE UNITED STATES, AND THE SECURITIES MAY NOT BE OFFERED OR SOLD WITHIN THE UNITED STATES, EXCEPT PURSUANT TO AN EXEMPTION FROM, OR IN A TRANSACTION NOT SUBJECT TO, THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT AND APPLICABLE STATE SECURITIES LAWS.

Confirmation of Your Representation: In order to be eligible to view the attached Offering Circular or make an investment decision with respect to the securities, you must be either: (i) outside of the United States; or (ii) a QIB within the meaning of Rule 144A under the Securities Act. The attached Offering Circular is being sent at your request, and by accessing the attached Offering Circular you have confirmed to Citigroup Global Markets Limited and The Standard Bank of South Africa Limited as joint bookrunners (the “**Joint Bookrunners**”) and the Republic of Kenya, acting through the National Treasury (the “**Issuer**”) that: (i) you understand and agree to the terms set out herein; (ii) in respect of securities being offered in an offshore transaction pursuant to Regulations S under the Securities Act, you are outside the United States, its territories and possessions, and to the extent the attached Offering Circular is delivered via e-mail, the e-mail address to which, pursuant to your request, the attached Offering Circular has been delivered by electronic transmission is not located in the United States, its territories and possessions for the purposes of Regulation S under the Securities Act; (iii) in respect of securities offered and sold in reliance on Rule 144A, you are a QIB within the meaning of Rule 144A under the Securities Act; (iv) you consent to delivery by electronic transmission; (v) you will not transmit the attached Offering Circular (or any copy of it or part thereof) or disclose, whether orally or in writing, any of its contents to any other person except with the consent of the Joint Bookrunners and the Issuer (each as defined in the attached Offering Circular); and (vi) you acknowledge that you will make your own assessment regarding any legal, taxation or other economic considerations with respect to your decision to subscribe for or purchase any of the securities.

Restrictions: THE FOLLOWING ELECTRONIC TRANSMISSION MAY NOT BE FORWARDED OR DISTRIBUTED OTHER THAN AS PROVIDED BELOW AND MAY NOT BE REPRODUCED IN ANY MANNER WHATSOEVER. THIS DOCUMENT MAY ONLY BE DISTRIBUTED OUTSIDE THE UNITED STATES IN ACCORDANCE WITH REGULATION S UNDER THE SECURITIES ACT AND WITHIN THE UNITED STATES TO QIBS PURSUANT TO RULE 144A UNDER THE SECURITIES ACT (“**RULE 144A**”). ANY FORWARDING, DISTRIBUTION OR REPRODUCTION OF THIS DOCUMENT IN WHOLE OR IN PART IS UNAUTHORISED. FAILURE TO COMPLY WITH THIS DIRECTIVE MAY RESULT IN A VIOLATION OF THE SECURITIES ACT OR THE APPLICABLE LAWS OF OTHER JURISDICTIONS. IF YOU HAVE GAINED ACCESS TO THIS DOCUMENT CONTRARY TO ANY OF THE FOREGOING RESTRICTIONS, YOU ARE NOT AUTHORISED AND WILL NOT BE ABLE TO PURCHASE ANY NOTES DESCRIBED THEREIN.

You are reminded that the attached Offering Circular has been delivered to you on the basis that you are a person into whose possession the attached Offering Circular may be lawfully delivered in accordance with the laws of the jurisdiction in which you are located and you may not, nor are you authorised to, deliver the attached Offering Circular, electronically or otherwise, to any other person and in particular to any U.S. person or to any U.S. address. Failure to comply with this directive may result in a violation of the Securities Act or the applicable laws of other jurisdictions.

UK MiFIR product governance / Professional investors and ECPs only target market: Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is only eligible counterparties, as defined in the FCA Handbook Conduct of Business Sourcebook ("**COBS**"), and professional clients, as defined in Regulation (EU) No 600/2014 as it forms part of United Kingdom domestic law by virtue of the European Union (Withdrawal) Act 2018 ("**UK MiFIR**"); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturers' target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the "**UK MiFIR Product Governance Rules**") is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers' target market assessment) and determining appropriate distribution channels.

The attached Offering Circular is being distributed only to and directed only at (i) persons who are outside the United Kingdom, or (ii) persons who have professional experience in matters relating to investments falling within Article 19(5) of The Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "**Order**"), or (iii) high net worth entities and other persons falling within Article 49(2)(a) to (d) of the Order, or (iv) persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000 ("**FSMA**") in connection with the issue or sale of any securities of the Issuer may otherwise lawfully be communicated or caused to be communicated (all such persons in (i)-(iv) collectively being referred to as "**relevant persons**"). The attached Offering Circular is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which the attached Offering Circular relates is available only to relevant persons and will be engaged in only with relevant persons. No other person should rely on it.

The attached Offering Circular does not constitute, and may not be used in connection with, an offer or solicitation in any place where offers or solicitations are not permitted by law. No action has been or will be taken in any jurisdiction by the Joint Bookrunners or the Issuer that would, or is intended to, permit a public offering of the securities, or possession or distribution of the attached Offering Circular or any other offering or publicity material relating to the securities, in any country or jurisdiction where action for that purpose is required. If a jurisdiction requires that the offering of securities described in the attached Offering Circular be made by a licenced broker or dealer and a Joint Bookrunner or any affiliate (as defined under Rule 501(b) of Regulation D of the Securities Act) of the applicable Joint Bookrunner is a licenced broker or dealer in that jurisdiction, the offering shall be deemed to be made by the Joint Bookrunners or such affiliate on behalf of the Issuer or holders of the applicable securities in such jurisdiction.

The attached Offering Circular has been sent to you in an electronic form. You are reminded that documents transmitted via this medium may be altered or changed during the process of electronic transmission and consequently none of the Issuer, the Joint Bookrunners, any person who controls any of the Issuer, the Joint Bookrunners, any director, officer, employee or agent of any of them, or any affiliate of any such person accepts any liability or responsibility whatsoever in respect of any difference between the attached Offering Circular distributed to you in electronic format and the hard copy version available to you on request from any of the Joint Bookrunners. Please ensure that your copy is complete. You are responsible for protecting against viruses and other destructive items. Your use of this document is at your own risk, and it is your responsibility to take precautions to ensure that it is free from viruses and other items of a destructive nature.

THE REPUBLIC OF KENYA
US\$900,000,000 7.875% Amortising Notes due 2034
Issue Price: 98.819%
and
US\$1,350,000,000 8.700% Amortising Notes due 2039
Issue Price: 98.186%

The US\$900,000,000 7.875% Amortising Notes due 2034 (the “**2034 Notes**”) and the US\$1,350,000,000 8.700% Amortising Notes due 2039 (the “**2039 Notes**” and, together with the 2034 Notes, the “**Notes**”) to be issued by the Republic of Kenya, acting through the National Treasury (the “**Issuer**” or “**Kenya**”) are direct, unconditional and unsecured obligations of the Issuer.

The 2034 Notes shall be finally redeemed at their final Amortisation Amount payable on 26 February 2034 (the “**2034 Notes Maturity Date**”). The 2034 Notes will bear interest on their outstanding principal amount from time to time (as determined in accordance with “*Terms and Conditions of the 2034 Notes—Redemption and Purchase*”). The 2034 Notes will bear interest from (and including) 26 February 2026 at the rate of 7.875% per annum, payable semi-annually in arrear on 26 February and 26 August of each year, commencing on 26 August 2026. Unless previously redeemed or purchased and cancelled, the 2034 Notes will be redeemed in three equal instalments of US\$300,000,000, on each of 26 February 2032, 26 February 2033 and 26 February 2034 as described under “*Terms and Conditions of the 2034 Notes—Redemption and Purchase*” (such amounts in respect of the 2034 Notes, each a “**2034 Notes Amortisation Amount**”).

The 2039 Notes shall be finally redeemed at their final Amortisation Amount payable on 26 February 2039 (the “**2039 Notes Maturity Date**”). The 2039 Notes will bear interest on their outstanding principal amount from time to time (as determined in accordance with “*Terms and Conditions of the 2039 Notes—Redemption and Purchase*”). The 2039 Notes will bear interest from (and including) 26 February 2026 at the rate of 8.700% per annum, payable semi-annually in arrear on 26 February and 26 August of each year, commencing on 26 August 2026. Unless previously redeemed or purchased and cancelled, the 2039 Notes will be redeemed in three equal instalments of US\$450,000,000, on each of 26 February 2037, 26 February 2038 and 26 February 2039 as described under “*Terms and Conditions of the 2039 Notes — Redemption and Purchase*” (such amounts in respect of the 2039 Notes, each a “**2039 Notes Amortisation Amount**”).

Payments on the Notes will be made in US dollars without deduction for or on account of taxes imposed or levied by Kenya to the extent described under “*Terms and Conditions of the 2034 Notes—Taxation*” and “*Terms and Conditions of the 2039 Notes—Taxation*”.

Application has been made to the United Kingdom Financial Conduct Authority (the “**FCA**”) for the Notes to be admitted to the official list of the FCA (the “**Official List**”) and to the London Stock Exchange plc (the “**London Stock Exchange**”) for the Notes to be admitted to trading on the London Stock Exchange’s main market. For the purposes of any such application, the Notes, as non equity securities issued by a sovereign issuer, are treated, in accordance with PRM 1.3.1(R) of the FCA’s Prospectus Rules: Admission to Trading on a Regulated Market sourcebook (the “**PRM**”), made under the Public Offers and Admissions to Trading Regulations 2024 (the “**POATR**”), as transferable securities that are not subject to the requirement to produce a prospectus for admission to trading on a regulated market under the PRM. Accordingly, this Offering Circular has not been reviewed or approved by the FCA as a prospectus for the purposes of the PRM. Notes admitted to the Official List and admitted to trading on the London Stock Exchange’s main market will not be subject to the prospectus requirements of the PRM, but will be issued in accordance with the listing rules of the London Stock Exchange.

References in this Offering Circular to the Notes being “**listed**” (and all related references) shall mean that the Notes have been admitted to trading on the London Stock Exchange’s main market and have been admitted to the Official List. The London Stock Exchange’s main market is a United Kingdom (“**UK**”) regulated market

for the purposes of Regulation (EU) No. 600/2014 on markets in financial instruments as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 (the “EUWA”).

An investment in the Notes involves a high degree of risk. Prospective investors should have regard to the factors described under the heading “*Risk Factors*”.

The Notes have not been and will not be registered under the US Securities Act of 1933, as amended (the “**Securities Act**”), or with any securities regulatory authority of any State or other jurisdiction of the United States, and may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. For a summary of certain restrictions on resale, see “*Transfer Restrictions*” and “*Plan of Distribution*”. The Notes will be offered and sold outside the United States in reliance on Regulation S under the Securities Act (“**Regulation S**”) and within the United States to qualified institutional buyers (“**QIBs**”) within the meaning of Rule 144A under the Securities Act (“**Rule 144A**”). Prospective purchasers are hereby notified that sellers of the Notes may be relying on the exemption from the provisions of Section 5 of the Securities Act provided by Rule 144A.

The Notes are expected to be rated B- by Fitch (Hong Kong) Limited (“**Fitch**”) and B by S&P Global Ratings UK Limited (“**S&P**”). The ratings issued by Fitch have been endorsed by Fitch Ratings Ltd. (“**Fitch UK**”), in accordance with Regulation (EC) No. 1060/2009 as it forms part of UK domestic law by virtue of the EUWA (the “**UK CRA Regulation**”) and have not been withdrawn. Each of S&P and Fitch UK have been registered under the UK CRA Regulation and appear on the list of registered credit rating agencies on the website of the Financial Conduct Authority. S&P and Fitch UK are established in the UK and registered in accordance with the UK CRA Regulation. As such, the ratings issued by S&P and Fitch may be used for regulatory purposes in the UK in accordance with the UK CRA Regulation. Any change in the rating of the Notes may adversely affect the price that a purchaser may be willing to pay for the Notes. A rating is not a recommendation to buy, sell or hold securities and may be subject to revision, suspension or withdrawal at any time by the assigning rating organisation.

The Notes will be offered and sold in registered form in denominations of US\$200,000 or any amount in excess thereof which is an integral multiple of US\$1,000. The Notes that are offered and sold in reliance on Regulation S (the “**Unrestricted Notes**”) will be represented by beneficial interests in one or more global notes (the “**Unrestricted Global Notes**”) in registered form without interest coupons attached, which will be registered in the name of Citivic Nominees Limited, as nominee for, and will be deposited on or about 26 February 2026 (the “**Closing Date**”) with, Citibank Europe plc, as common depository for Euroclear Bank SA/NV (“**Euroclear**”) and Clearstream Banking S.A. (“**Clearstream, Luxembourg**”). The Notes that are offered and sold in reliance on Rule 144A (the “**Restricted Notes**”) will be represented by beneficial interests in one or more global notes (the “**Restricted Global Notes**”) in each case in registered form without interest coupons attached, which will be deposited on or about the Closing Date with Citibank, N.A. as custodian (the “**Custodian**”) for, and registered in the name of Cede & Co. as nominee for, The Depository Trust Company (“**DTC**”). Interests in the Restricted Global Notes will be subject to certain restrictions on transfer. Beneficial interests in the Unrestricted Global Notes and Restricted Global Notes (together, the “**Global Notes**”) will be shown on, and transfers thereof will be effected only through, records maintained by DTC, Euroclear, Clearstream, Luxembourg and their respective participants. Except in the limited circumstances as described herein, certificates will not be issued in exchange for beneficial interests in the Global Notes.

This Offering Circular is dated 24 February 2026

RESPONSIBILITY STATEMENT

Kenya accepts responsibility for the information contained in this Offering Circular and declares that, having taken all reasonable care to ensure that such is the case, the information contained in this Offering Circular is, to the best of its knowledge, in accordance with the facts and contains no omission likely to affect its import.

To the best of the knowledge and belief of Kenya, the information contained in this Offering Circular is true and accurate in every material respect and is not misleading in any material respect, and this Offering Circular does not omit to state any material fact necessary to make such information not misleading. The opinions, assumptions, intentions, projections and forecasts expressed in this Offering Circular with regard to Kenya are honestly held by Kenya, have been reached after considering all relevant circumstances and are based on reasonable assumptions.

IMPORTANT NOTICE

No person has been authorised to give any information or to make any representation other than those contained in this Offering Circular in connection with the offering of the Notes and, if given or made, such information or representation must not be relied upon as having been authorised by Kenya or the Joint Bookrunners. Neither the delivery of this Offering Circular nor any sale made hereunder shall, under any circumstances, constitute a representation or create any implication that there has been no change in the affairs of Kenya since the date hereof. This Offering Circular may only be used for the purpose for which it has been published.

None of the Joint Bookrunners nor any of their respective affiliates have authorised the whole or any part of this Offering Circular, and none of them makes any representation or warranty or accepts any responsibility as to the accuracy or completeness of the information contained in this Offering Circular. None of the Joint Bookrunners or any of their directors, affiliates, advisers and agents has made any independent verification of the information contained in this Offering Circular in connection with the issue or offering of the Notes, and no representation or warranty, express or implied, is made by any of the Joint Bookrunners or their directors, affiliates, advisers or agents with respect to the accuracy or completeness of such information. Nothing contained in this Offering Circular is, is to be construed as, or shall be relied upon as, a representation or warranty, whether to the past or the future, by any of the Joint Bookrunners or their respective directors, affiliates, advisers or agents in any respect.

This Offering Circular does not constitute an offer of, or an invitation by, or on behalf of, Kenya or the Joint Bookrunners to subscribe for, or purchase, any of the Notes in any jurisdiction in which such offer or invitation is unlawful. This Offering Circular does not constitute an offer, and may not be used for the purpose of an offer to, or a solicitation by, anyone in any jurisdiction or in any circumstances in which such an offer or solicitation is not authorised or is unlawful. The distribution of this Offering Circular and the offering, sale and delivery of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this Offering Circular comes are required by Kenya and the Joint Bookrunners to inform themselves about and to observe any such restrictions.

This Offering Circular has been prepared by the Issuer for use in connection with the offer and sale of the Notes and the admission of the Notes to the Official List and to trading on the London Stock Exchange's main market. The Issuer and the Joint Bookrunners reserve the right to reject any offer to purchase Notes, in whole or in part, for any reason. This Offering Circular does not constitute an offer to any person in the United States other than any QIB to whom an offer has been made directly by one of the Joint Bookrunners or its respective U.S. broker-dealer affiliate. Distribution of this Offering Circular to any person within the United States, other than any QIB and those persons, if any, retained to advise such QIB with respect thereto, is unauthorised, and any disclosure without the prior written consent of the Issuer of any of its contents to any person within the United States, other than any QIB and those persons, if any, retained to advise such QIB, is prohibited.

This Offering Circular is not intended to provide the basis of any credit or other evaluation and should not be considered as a recommendation by Kenya or the Joint Bookrunners that any recipient of this Offering Circular should purchase any of the Notes. Each prospective investor contemplating purchasing Notes should make its own independent investigation of the financial Condition and affairs, and its own appraisal of the creditworthiness, of Kenya. Prospective investors should also consult their tax advisers as to the consequences under the tax laws of the country of which they are resident for tax purposes and the tax laws of Kenya of

acquiring, holding and disposing of the Notes and receiving payments of principal, interest and/or other amounts under the Notes.

Notwithstanding anything herein to the contrary, from the commencement of discussions with respect to the transaction contemplated by this Offering Circular, all persons may disclose to any and all persons, without limitation of any kind, the tax treatment and tax structure of the transaction described herein and all materials of any kind (including opinions and other tax analyses) that are provided to such persons relating to such tax treatment and tax structure, except to the extent that any such disclosure could reasonably be expected to cause this transaction not to be in compliance with securities laws. For the purposes of this paragraph, the tax treatment of this transaction is the purported or claimed US federal income tax treatment of this transaction and the tax structure of this transaction is any fact that may be relevant to understanding the purported or claimed US federal income tax treatment of this transaction.

This Offering Circular may not be copied or reproduced in whole or in part nor may it be distributed or any of its contents disclosed to anyone other than the prospective investors to whom it is originally submitted.

Each purchaser or holder of interests in the Notes will be deemed, by its acceptance or purchase of any such Notes, to have made certain representations and agreements as set out in “*Transfer Restrictions*”.

For a description of certain restrictions on offers, sales and deliveries of the Notes, see “*Plan of Distribution*”.

The Republic of Kenya is a sovereign state. Consequently, it may be difficult for investors to obtain or enforce judgments or arbitral awards. See “*Risk Factors—Risks Relating to the Notes—Kenya is a sovereign state and, accordingly, it may be difficult to obtain or enforce judgments or arbitral awards against it*”.

UK MiFIR product governance / Professional investors and ECPs only target market – Solely for the purposes of each manufacturer’s product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is only eligible counterparties, as defined in the FCA Handbook Conduct of Business Sourcebook (“**COBS**”), and professional clients, as defined in Regulation (EU) No 600/2014 as it forms part of UK domestic law by virtue of the EUWA (“**UK MiFIR**”); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a “**distributor**”) should take into consideration the manufacturers’ target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the “**UK MiFIR Product Governance Rules**”) is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturers’ target market assessment) and determining appropriate distribution channels.

PROHIBITION OF SALES TO EEA RETAIL INVESTORS – The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (“**EEA**”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “**MiFID II**”); or (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the “**Insurance Distribution Directive**”), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “**PRIIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

STABILISATION

In connection with the issue of the Notes, Citigroup Global Markets Limited (the “**Stabilisation Manager**”) (or any person acting on behalf of the Stabilisation Manager) may over allot Notes or effect transactions with a view to supporting the market price of the Notes at a higher level than that which might otherwise prevail. However, stabilisation may not necessarily occur. Any stabilisation action may begin on or after the date on which adequate public disclosure of the terms of the offer of the Notes is made and, if begun, may cease at any time, but it must end no later than the earlier of 30 days after the issue date of the Notes and 60 days after the date of the allotment of the Notes. Any stabilisation action or over-allotment must be conducted by the Stabilisation Manager (or any person acting on behalf of the Stabilisation Manager) in accordance with all applicable laws and rules.

NOTICE TO PROSPECTIVE INVESTORS IN THE UNITED STATES

THE NOTES HAVE NOT BEEN APPROVED OR DISAPPROVED BY THE U.S. SECURITIES AND EXCHANGE COMMISSION, ANY STATE SECURITIES COMMISSION IN THE UNITED STATES OR ANY OTHER U.S. REGULATORY AUTHORITY, NOR HAVE ANY OF THE FOREGOING AUTHORITIES REVIEWED OR PASSED UPON OR ENDORSED THE MERITS OF THE OFFERING OF THE NOTES OR APPROVED THIS OFFERING CIRCULAR OR CONFIRMED THE ACCURACY OR DETERMINED THE ADEQUACY OF THE INFORMATION CONTAINED IN THIS OFFERING CIRCULAR. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENCE IN THE UNITED STATES.

PRODUCT CLASSIFICATION PURSUANT TO SECTION 309B OF THE SECURITIES AND FUTURES ACT 2001 OF SINGAPORE

Product Classification pursuant to Section 309B of the Securities and Futures Act 2001 – In connection with Section 309B of the Securities and Futures Act 2001 of Singapore as modified or amended from time to time (the “SFA”) and the Securities and Futures (Capital Markets Products) Regulations 2018 of Singapore (the “**CMP Regulations 2018**”), the Issuer notifies all relevant persons (as defined in Section 309A(1) of the SFA), that the Notes are ‘prescribed capital markets products’ (as defined in the CMP Regulations 2018) and Excluded Investment Products (as defined in the Monetary Authority of Singapore (the “MAS”) Notice SFA 04-N12: Notice on the Sale of Investment Products and the MAS Notice FAAN16: Notice on Recommendations on Investment Products).

SUITABILITY OF INVESTMENT

An investment in the Notes may not be suitable for all investors. Generally, investment in emerging markets such as Kenya is only suitable for sophisticated investors who fully appreciate the significance of the risks involved in, and are familiar with, investing in emerging markets. Prospective investors are urged to consult their own legal, tax and financial advisers before making an investment. Such risks include, but are not limited to, higher volatility and more limited liquidity in respect of the Notes, a fragile export base, budget deficits, lack of adequate infrastructure necessary to accelerate economic growth and changes in the political and economic environment. Emerging markets can also experience more instances of corruption by government officials and misuse of public funds than do more mature markets, which could affect the ability of governments to meet their obligations under issued securities.

Investors should also note that emerging markets such as Kenya are subject to rapid change and that the information set out in this Offering Circular may become outdated relatively quickly.

Each prospective investor in the Notes must determine the suitability of that investment in light of its own circumstances. In particular, each prospective investor may wish to consider, either on its own or with the help of its financial and other professional advisers, whether it:

- has sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained in this Offering Circular or any applicable supplement;
- has access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- has sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes, including where the currency for principal or interest payments is different from the potential investor’s currency;
- understands thoroughly the terms of the Notes and is familiar with the behaviour of any relevant financial markets; and
- is able to evaluate possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Legal investment considerations may restrict certain investments. The investment activities of certain investors are subject to investment laws and regulations, or review or regulation by certain authorities. Each prospective investor should consult its legal advisers to determine whether and to what extent the Notes are legal investments for it, the Notes can be used as collateral for various types of borrowing and other restrictions apply to its purchase or pledge of the Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of the Notes under any applicable risk-based capital or similar rules.

PRESENTATION OF ECONOMIC AND OTHER INFORMATION

Annual information presented in this Offering Circular is based upon a fiscal year commencing on 1 July in one year and ending on 30 June in the subsequent year, unless otherwise indicated. While the fiscal year ends on 30 June of each year, certain information in this Offering Circular provided by the Kenya National Bureau of Statistics, including GDP and GDP sector information, are provided as of 31 December of each year. Certain figures included in this Offering Circular have been subject to rounding adjustments; accordingly, figures shown for the same category presented in different tables may vary slightly and figures shown as totals in certain tables may not be the sum of the figures which precede them. Statistical information reported herein has been derived from official publications of, and information supplied by, a number of agencies and ministries of Kenya, including the National Treasury, the Central Bank of Kenya (the “**CBK**”) and the Kenya National Bureau of Statistics. Some statistical information has also been derived from information publicly made available by third parties such as the International Monetary Fund (the “**IMF**”) and the World Bank (the “**World Bank**”). Where such third-party information has been so sourced, the source is stated where it appears in this Offering Circular. Kenya confirms that it has accurately reproduced such information and that, so far as it is aware and is able to ascertain from information published by third parties, it has omitted no facts which would render the reproduced information inaccurate or misleading. As used in this Offering Circular, references to the “Government” are to the government of Kenya, and the term “Central Government” is interchangeable with, and means the same as, “National Government”.

Similar statistics may be obtainable from other sources, but the date of publication, underlying assumptions, methodology and, consequently, the resulting data may vary from source to source. In addition, statistics and data published by one ministry or agency may differ from similar statistics and data produced by other agencies or ministries due to differing underlying assumptions, methodology or timing of when such data is reproduced. Certain historical statistical information contained herein is provisional or otherwise based on estimates that Kenya and/or its agencies believe to be based on reasonable assumptions. Kenya’s official financial and economic statistics are subject to internal review as part of a regular confirmation process. Accordingly, the financial and economic information set out in this Offering Circular may be subsequently adjusted or revised and may differ from previously published financial and economic information. In addition, Kenya’s budget figures as presented in the Offering Circular may be subject to subsequent revision. While Kenya does not expect such revisions to be material, no assurance can be given that material changes will not be made.

References to any individual period, such as 2024/25, are references to a fiscal year commencing on 1 July in one year and ending on 30 June in the subsequent year. References to any individual calendar year, such as 2025, are references to a calendar year commencing on 1 January and ending on 31 December in the same year. All references in this document to “**Kenyan shilling**”, “**shilling**” and “**KES**” are to the currency of the Republic of Kenya; to “**US dollars**”, “**US\$**” and “**\$**” are to the currency of the United States of America; and to “**euro**” are to the currency introduced at the start of the third stage of European economic and monetary union pursuant to the Treaty on the Functioning of the European Union, as amended. For ease of information, certain financial information relating to the Republic of Kenya included herein is presented as translated into US dollars at the US dollar/KES rates of exchange deemed appropriate by Kenya. Unless otherwise specified, such rates were applicable as of the end of such specified period(s). Such translations should not be construed as a representation that the amounts in question have been, could have been or could be converted into US dollars at that or any other rate. References to “**SDR**” are to the Special Drawing Right, a unit of account having the meaning ascribed to it from time to time by the Rules and Regulations of the IMF. References in this document to “billions” are to thousands of millions.

The Kenya National Bureau of Statistics releases an economic survey covering socio-economic information for Kenya on an annual basis. This economic survey is generally released in May every year.

Information contained herein that is identified as being derived from a publication of the Republic of Kenya or one of its agencies or instrumentalities is included herein on the authority of such publication as an official public document of the Republic of Kenya. All other information contained herein with respect to the Republic of Kenya is included as an official public statement made on the authority of the Minister of Finance of the Republic of Kenya.

Rebasing of National Accounts

In September 2021, Kenya National Bureau of Statistics rebased its national accounts, changing the base year from 2009 to 2016, and revised the annual and quarterly national accounts statistics for the period 2009 to 2016. Kenya National Bureau of Statistics applied the System of National Accounts 2008 and the International Standard Industrial Classification revision 4 system (“ISIC”) to compile the rebased GDP estimates. The System of National Accounts is the internationally agreed standard set of recommendations on how to compile measures of economic activity, and ISIC is the international standard for the classification of productive economic activities. This revision is the seventh time that Kenya has revised the national account statistics. The first revision was carried out in 1957 and subsequent revisions were carried out in 1957, 1967, 1976, 1985, 2005, 2014 and 2021. The UN Statistical Commission recommends that countries rebase every five years.

Rebasing enables economic estimates to better understand the current structure of the economy and sectoral growth drivers, and to better reflect the performance of the most important parts of the economy. For example, the rebasing in 2021 allowed the Government to account for changes in production structure, relative product prices and products. These measures have led to changes in the size of GDP, growth rates, contributions by sector and related indicators that use GDP.

FORWARD-LOOKING STATEMENTS

This Offering Circular includes forward-looking statements, which involve risks and uncertainties. These forward-looking statements can be identified by the use of forward-looking terminology, including the terms “believes”, “estimates”, “anticipates”, “expects”, “intends”, “may”, “will” or “should” or, in each case, their negative or other variations or comparable terminology. These forward-looking statements include all matters that are not historical facts. They appear in a number of places throughout this Offering Circular and include statements regarding the Government’s intentions, beliefs or current expectations concerning, amongst other things, the general political and economic conditions in Kenya. All forward-looking statements are based upon information available to Kenya on the date of this Offering Circular, and Kenya undertakes no obligation to update any of these in light of new information or future events. Kenya derives many of its forward-looking statements from its budgets and forecasts, which are based upon many detailed assumptions. While Kenya believes that its assumptions are reasonable, it cautions that it is difficult to predict the impact of known factors, and it is impossible to anticipate all factors that could affect Kenya’s actual results. These factors include, but are not limited to:

external factors, such as:

- the impact of changes in international oil prices;
- the impact of changes in other international commodity prices, including tea, coffee and horticultural products;
- interest rates in financial markets outside Kenya;
- the impact of changes in the credit rating of Kenya;
- economic conditions in Kenya’s major export markets;
- the impact of possible future regional instability;
- changes in global inflation rates;
- changes in the amount of remittances from non-residents;
- the decisions of international financial institutions, multilateral development banks and creditor countries regarding the amount and terms of their financial assistance to Kenya;

- the impact of global geopolitical conflicts; and
- the impact of climate change on international conditions,

as well as internal factors, such as:

- general economic, political and business conditions in Kenya;
- the impact of possible future social and political unrest;
- present and future exchange rates of the Kenyan currency;
- the level of foreign currency reserves;
- the impact of natural disasters, health epidemics and droughts and other agricultural blights;
- the level of domestic and external public debt;
- domestic inflation;
- the ability of Kenya to implement important economic reforms;
- the ability of Kenya to upgrade its infrastructure;
- the levels of foreign direct and portfolio investment; and
- the levels of domestic interest rates in Kenya.

ENFORCEMENT OF CIVIL LIABILITIES

Kenya is a sovereign state, and substantially all of the assets of Kenya are located in Kenya. Consequently, it may be difficult for investors to obtain or enforce judgments of courts and/or arbitral tribunals in England, the United States or anywhere else against Kenya. Kenya has not submitted to the jurisdiction of any courts in respect of the Notes, but instead has agreed to resolve disputes by arbitration in accordance with rules and procedures of the London Court of International Arbitration (“**LCIA**”). Kenya has waived certain immunities for the purpose of arbitration of disputes arising out of or in connection with the Notes. Kenya has not, however, waived immunity from execution or attachment in respect of certain of its assets. See “*Terms and Conditions of the Notes—Governing Law, Arbitration and Enforcement Consent to Enforcement and Waiver of Immunity*”. Kenya is a party to the United Nations (New York) Convention on Recognition and Enforcement of Foreign Arbitral Awards (the “**New York Convention**”).

Kenya’s waiver of immunity is, however, limited. Such a waiver constitutes only a limited and specific waiver for the purposes of the Notes, and under no circumstances shall it be interpreted as a general waiver by Kenya or a waiver with respect to proceedings unrelated to the Notes.

Arbitral awards obtained outside Kenya may be enforced in Kenya, in accordance with the New York Convention and under the Arbitration Act 1995. Leave to enforce the award as a decree of the High Court must be obtained. Such leave may be refused where the recognition or enforcement of such award is contrary to public policy in Kenya or falls under section 37 of the Arbitration Act, 1995. Where an order is made against the Government for the payment of money or costs, a further application must follow for a certificate of order against the Government and must be served on the Attorney General. The amount can then be paid out of appropriations provided in the national budget. Aside from this procedure, no execution, attachment or process may be issued by any Kenyan court for enforcing payment by the Government of any money or costs, and no person shall be individually liable under any order for payment by the Government, any Government department or any officer of the Government in relation to such money or costs. Injunctive relief and orders for specific performance may not be made by Kenyan courts against the Government.

OVERVIEW

You should read this overview as an introduction to this Offering Circular. Any decision to invest in the Notes should be based on a consideration of this Offering Circular as a whole. This overview does not purport to be complete and is qualified in its entirety by the more detailed information elsewhere in the Offering Circular. Prospective investors should also carefully consider the information set forth in the “Risk Factors” below prior to making any investment decision. Capitalised terms not otherwise defined in this overview have the same meaning as elsewhere in this Offering Circular. See “Republic of Kenya” and “The Economy”, amongst other sections, for a more detailed description of the Issuer. References in this overview to a “Condition” are to the corresponding numbered condition thereto set out, in respect of the 2034 Notes, in the “Terms and Conditions of the 2034 Notes and, in respect of the 2039 Notes, the “Term and Conditions of the 2039 Notes” (as applicable)”.

Republic of Kenya

General

Kenya occupies a land area of 580,876.3 square kilometres on the equator and is bordered by the Indian Ocean to the southeast, Tanzania to the south, Uganda to the west, South Sudan to the northwest, Ethiopia to the north and Somalia to the northeast. Kenya is divided into 47 semi-autonomous counties that are headed by governors who are elected in the general elections held every five years in accordance with the Constitution of Kenya, 2010 (the “**Constitution**”). Nairobi is the capital city of the country. On 9 August 2022, general elections were held in Kenya and William Samoei Ruto was sworn in as President of Kenya on 13 September 2022. Kenya’s next general elections are scheduled to take place on August 2027.

The Economy

Kenya has experienced continued growth in GDP over the last few years. Real GDP experienced a contraction of 0.3% in 2020. However, it rebounded with a significant growth of 7.6% in 2021, followed by an increase of 4.9% in 2022. The upward trend continued with a growth of 5.7% in 2023 and a slightly lower growth rate of 4.7% in 2024. The Government attributes the decline to reduced growth in several sectors of the economy and the peak in 2021 to the significantly high growths that signified recovery from the economic downturn in 2020. In the third quarter of 2025, real GDP grew by 4.9% compared to a 4.2% growth in the corresponding quarter of 2024. The growth was mainly supported by accelerated growth in a number of sectors. Notably, the agriculture, forestry and fishing sector expanded by 3.2% while the construction sector rebounded from a 2.6% contraction in the third quarter of 2024, expanding by 6.7% in the third quarter of 2025. Kenya’s economy is expected to remain resilient, supported by a robust performance in the services and agriculture sectors.

Source: National Treasury; Central Bank of Kenya.

Kenya's overall inflation has declined significantly, with 12-month inflation falling from a peak of 9.6% in October 2022 to 3.0% in December 2024. This decline reflects the effectiveness of the Central Bank's tight monetary policy and pass-through effects of the strengthening exchange rate that have eased food and energy prices. Overall inflation remained within the target range from December 2023 to January 2025, mainly on account of low food and fuel prices. Food inflation declined to 6.1% in January 2025 from 7.7% in December 2023, mainly due to significant decreases in prices of select non-vegetable items reflecting seasonal patterns and developments in international food prices. Fuel inflation declined to 1.0% in December 2024 from 13.7% in December 2023, mainly driven by lower electricity prices and stable domestic pump prices. However, overall inflation increased to 4.4% in January 2026, indicating a slight reversal from the prior downward trend. Although tighter monetary policies have historically helped to curb inflation, the impact on inflation of heightened geopolitical tensions and conflicts (especially in the Middle East and Africa) and higher fuel and other import prices is beyond the Government's control.

The resulting fiscal deficit inclusive of grants of KES 835.1 billion (5.3% of GDP) for 2023/2024 were financed by a net external financing of KES 222.7 billion (1.4% of GDP) and a net domestic financing of KES 595.6 billion (3.8% of GDP). Developments in expenditure rationalisation and the revenue recovery resulted in total revenues for the FY 2023/24 at KES 2,724.6 billion (18.9% GDP) and total expenditures at KES 3,605 billion (25.0% of GDP). In 2022/23, the fiscal deficit (including grants, on a cash basis), amounted to KES 800.4 billion (5.6% of GDP) against a target of KES 846.2 billion (5.8% of GDP). The fiscal deficit was financed

through net external financing amounting to KES 310.8 billion (2.1% of GDP) and net domestic financing of KES 459.5 billion (3.2% of GDP). In FY 2024/25, the fiscal deficit amounted to KES 1,019.1 billion (5.8% of GDP), against a target of KES 1,012.3 billion (5.8% of GDP). This increase is primarily attributed to a reduction in anticipated revenue collection, due to the withdrawal of the Finance Bill 2024 which was expected to raise an additional revenue amounting to KES 344.3 billion. The fiscal deficit in FY 2024/25 was financed through net domestic financing of KES 854.5 billion (4.9% of GDP) which was above target by KES 28.7 billion. The net external financing amounted to KES 179.7 billion (1.0% of GDP), representing a shortfall of KES 6.8 billion from target. For the FY 2025/26, the fiscal deficit (including grants) is expected to be KES 901.0 billion, down from KES 1,019.1 billion in FY 2024/25. This deficit will be financed through net external borrowing of KES 287.4 billion and net domestic borrowing of KES 613.5 billion, supporting a reduction of the fiscal deficit from 6.3% of GDP in FY 2024/25 to 4.7% of GDP in FY 2025/26 as part of ongoing fiscal consolidation efforts.

Vision 2030

In 2007, the Government announced “Vision 2030” as its long-term plan for attaining middle-income status as a nation by 2030. In line with Vision 2030, the Government prepares successive medium-term plans (“MTPs”) that outline the policies, programmes and projects that the Government intends to implement over a five-year period. The first MTP covered the period from 2008 to 2012, with the second MTP covering the 2013 to 2017 period. The third MTP, covered the 2018 to 2022 period, and the MTP IV covers the 2023 to 2027 period.

In the initial year of the first MTP, a number of projects aimed at national healing and reconciliation following the post-election violence were implemented. Repair of damaged infrastructure, assistance to affected small-scale businesses and resettlement of internally displaced persons were all undertaken in order to raise GDP growth (which fell to 1.5% in 2008) and to promote national reconciliation.

The Government announced the second MTP of Vision 2030 in October 2013. The second MTP gave priority to devolution as specified in the Constitution and to more rapid socio-economic development with equity as a tool for building national unity. The second MTP also aimed to build on the successes of the first MTP, particularly in increasing the scale and pace of economic transformation through infrastructure development, and placed strategic emphasis on priority sectors under the economic and social pillars of Vision 2030. Under the second MTP, transformation of the economy focused on rapid economic growth in a stable macro-economic environment, modernisation of infrastructure, diversification and commercialisation of agriculture, food security, a higher contribution of manufacturing to GDP, wider access to African and global markets, wider access for Kenyans to better quality education and health care, job creation targeting unemployed youth, provision of better housing and provision of improved water sources and sanitation to Kenyan households.

The Government announced the third MTP of Vision 2030 in March 2017. The third MTP aims to carry forward and complete the programmes and projects initiated during the second MTP. It also aims to achieve high inclusive and broad based economic growth. A key objective of the third MTP is to include policies, programmes and projects aimed at meeting the Sustainable Development Goals, which replaced the Millennium Development Goals from January 2016.

The Fourth Medium Term Plan 2023-2027 (“MTP IV”) is intended to implement the BETA which is geared towards economic turn-around and inclusive growth through a value chain approach. The Fourth MTP is aligned with BETA, the objectives of which are to: a) bring down the cost of living and lower the annual inflation to 5%, b) eradicate hunger, c) create an average of 1.2 million new jobs annually, d) expand the tax base and increase revenue collection to 19.7% of GDP, and e) improve foreign exchange and achieve inclusive growth. The MTP IV for Kenya aims to address the challenges facing the economy through targeted interventions across key sectors. By focusing on enhancing productivity, infrastructure development, social welfare, environmental sustainability, and governance, MTP IV seeks to drive inclusive, broad-based, and sustainable economic growth. The plan emphasises the importance of coordinated efforts and strategic investments to create a resilient and prosperous economy for all Kenyans. See “*The Fourth MTP*” below.

The 2025/2026 Budget

The FY 2025/26 Budget was introduced under the theme: “Sustaining Bottom-up Economic Transformation Agenda, Fiscal Consolidation, and Investing in Climate Change Mitigation and Adaptation for Improved Livelihoods”. The Government has set a fiscal deficit target of 4.7% of GDP, down from 5.4% in FY 2024/25, as part of efforts to reduce public debt vulnerabilities and enhance fiscal discipline. The Budget focuses on strategic interventions to support economic transformation, including upholding macroeconomic stability,

enhancing national security, and accelerating the development of key infrastructure such as roads, railways, energy, and water. The implementation of the FY 2025/26 Budget is on track, with the Government continuing to ensure that projected revenues of KES 3,321.7 billion and planned expenditures of KES 4.2699 trillion remain consistent with the approved Budget Policy Statement and the overall fiscal consolidation framework. For more information, see “*Public Finance – Revenue and Grants – The 2025/2026 Budget*”.

The 2026/2027 Budget

On 10 February 2026, the Cabinet Secretary of the National Treasury presented Kenya’s FY 2026/27 Budget Policy Statement under the theme: “People-Driven, Investment-Led Budget: Prioritizing Capital Projects, Human Capital Development, and Infrastructure Expansion while Reinforcing Fiscal Responsibility and Public Participation.”

In the proposed Budget, total expenditure for FY 2026/27 is estimated at KES 4,703.9 billion, up from KES 4,532.8 billion projected in FY 2025/26. Of this, KES 3,456.9 billion is allocated to recurrent expenditures (up from KES 3,338.7 billion), KES 749.5 billion to development expenditures (up from KES 707.3 billion), covering domestic and foreign-financed projects, the Contingency Fund, and transfers to County Governments. Transfers to County Governments are projected at KES 495.5 billion, including the equitable share, compared with KES 484.8 billion in FY 2025/26.

Total projected revenue collection, including Appropriation-in-Aid, is KES 3,533.7 billion (16.9% of GDP), up from KES 3,352.1 billion (17.6% of GDP) in FY 2025/26. This comprises KES 2,901.9 billion in ordinary revenue (13.9% of GDP), compared to KES 2,744.4 billion (14.4% of GDP) in FY 2025/26, supported by ongoing reforms in tax policy and revenue administration aimed at broadening the tax base and enhancing compliance. For more information, see “*Public Finance – Revenue and Grants – The 2026/2027 Budget*”.

THE OFFERING

The following is an overview of the terms of (and other matters relating to) the Notes and, where applicable, the Notes.

Issuer	The Republic of Kenya, acting through the National Treasury.
Legal Entity Identifier (LEI)	549300VVURQQYU45PR87
Notes Being Issued	US\$900,000,000 7.875% Amortising Notes due 2034; and US\$1,350,000,000 8.700% Amortising Notes due 2039
Issue Price of 2034 Notes	98.819%
Issue Price of 2039 Notes	98.186%
Issue Date of 2034 Notes	26 February 2026
Issue Date of 2039 Notes	26 February 2026
Redemption of 2034 Notes	Unless previously redeemed or purchased and cancelled, the Issuer will redeem the 2034 Notes in three equal instalments of US\$300,000,000 on 26 February 2032, 26 February 2033 and 26 February 2034.
Redemption of 2039 Notes	Unless previously redeemed or purchased and cancelled, the Issuer will redeem the 2039 Notes in three equal instalments of US\$450,000,000 on 26 February 2037, 26 February 2038 and 26 February 2039.
Interest Rate and Interest Payment Dates of 2034 Notes	The 2034 Notes bear interest from and including 26 February 2026 at the rate of 7.875% per annum to but excluding 26 February 2034 payable semi-annually in arrear on the outstanding principal amount from time to time of the Notes (as determined in accordance with Condition 7 (<i>Redemption and Purchase</i>)) on 26 February and 26 August in each year commencing on 26 August 2026.
Interest Rate and Interest Payment Dates of 2039 Notes	The 2039 Notes bear interest from and including 26 February 2026 at the rate of 8.700% per annum to but excluding 26 February 2039 payable semi-annually in arrear on the outstanding principal amount from time to time of the Notes (as determined in accordance with Condition 7 (<i>Redemption and Purchase</i>)) on 26 February and 26 August in each year commencing on 26 August 2026.
Status	The Notes constitute direct, unconditional, unsubordinated and (subject to a negative pledge, described below) unsecured obligations of the Issuer and rank <i>pari passu</i> without any preference amongst themselves and at least <i>pari passu</i> with all other present and future unsubordinated and (subject as provided in the negative pledge described below) unsecured obligations of the Issuer, save only for such obligations as may be preferred by mandatory provisions of applicable law, provided, further, that the Issuer shall have no obligation to effect equal or rateable payment(s) at any time with respect to any such other obligations and, in particular, shall have no obligation to pay such other obligations at the same time or as a Condition of paying sums due on the Notes and vice versa. The Notes are backed by the full faith and credit of the Issuer.
Negative Pledge	So long as any Note remains outstanding, the Issuer has undertaken that it will not (save for the specific exceptions provided in the Conditions) create, incur, assume or permit to subsist any Security (as defined in the Conditions) upon the whole or any part of its present or future assets or revenues to secure:

- (a) any of its Public External Indebtedness;
- (b) any guarantees in respect of Public External Indebtedness; or
- (c) Public External Indebtedness of any other person, without, at the same time or prior thereto, securing the Notes equally and rateably therewith or providing such other arrangement as shall be approved by relevant Noteholders.

Events of Default.....

Condition 10 (*Events of Default*) provides that holders of the Notes who hold at least 25% in aggregate principal amount of the relevant Notes then outstanding may declare such Notes to be immediately due and payable at their principal amount together with accrued interest if, inter alia:

- (a) the Issuer fails to pay principal or interest on such Notes when due and continues to do so for 15 business days or 30 days, respectively;
- (b) the Issuer does not comply with one or more of the terms of such Notes, the applicable Agency Agreement or the applicable Deed of Covenant and (if capable of remedy) such default continues for 45 days following service of notice by any relevant Noteholder requiring such breach be remedied;
- (c) the Issuer is in default or there is an acceleration in maturity in relation to any External Indebtedness or default in any guarantee thereof in excess of US\$25,000,000;
- (d) the Issuer declares a moratorium in respect of its External Indebtedness;
- (e) the Issuer ceases to be a member of the IMF or ceases to be eligible to use the general resources of the IMF;
- (f) the Issuer denies the validity of the Notes or any of its obligations under such Notes, or it shall become unlawful for the Issuer to perform or comply with all or any of its obligations set out in such Notes as a result of any change in law or regulation in Kenya or final and unappealable ruling of a court in Kenya; or such obligations cease to be in full force and effect; or
- (g) if any authorisation, consent of, or filing or registration with any governmental authority necessary for the payment of such Notes when due ceases to be in effect; all as more particularly described in Condition 10 (*Events of Default*).

A declaration of acceleration may be rescinded in certain circumstances by the resolution in writing of the holders of at least 50% in aggregate principal amount of the outstanding Notes (as the case may be) in accordance with the procedures in Condition 10 (*Events of Default*).

Noteholder Meetings

The Conditions contain provisions for calling meetings of Noteholders and, in certain circumstances, holders of other debt securities of the Issuer, to consider matters affecting their interests generally. These provisions permit defined majorities (which may, in certain circumstances, be formed of holders of debt securities of the Issuer other than the Notes) to bind all Noteholders including Noteholders who did not attend and vote at the relevant meeting and Noteholders who voted in a manner contrary to the majority. See Condition 13 (*Meetings of Noteholders; Written Resolutions*) and “*Risk Factors— The terms of the*

Notes may be modified, waived or substituted without the consent of all the holders of the Notes.”

Modification and Amendment...	In addition to any modifications made by way of Noteholder Meetings under Condition 13 (<i>Meetings of Noteholders; Written Resolutions</i>), the Conditions also contain provisions permitting the Notes, the Conditions or the Agency Agreement to be amended without the consent of the Noteholders either (i) for the purpose of curing any ambiguity or of curing, correcting or supplementing any manifest or proven error or any other defective provision contained herein or therein or (ii) in any other manner which is, in the sole opinion of the Issuer, not materially prejudicial to the interests of the Noteholders. See Condition 13.8 (<i>Manifest error, etc.</i>).
Taxation and Additional Amounts	All payments in respect of the Notes by or on behalf of the Issuer shall be made without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature (“ Taxes ”) imposed or levied by or on behalf of the Relevant Jurisdiction, unless the withholding or deduction of the Taxes is required by law. In that event, the Issuer will pay such additional amounts as may be necessary in order that the net amounts received by the Noteholders after the withholding or deduction shall equal the respective amounts which would have been receivable in respect of the Notes in the absence of the withholding or deduction, subject to certain exceptions described in Condition 8 (<i>Taxation</i>).
Listing and Admission to Trading	Application has been made to the FCA for the Notes to be admitted to the Official List and to the London Stock Exchange for the Notes to be admitted to trading on the London Stock Exchange’s main market.
Denomination of the Notes.....	The Notes will be in registered form and will be offered and sold in a minimum denomination of US\$200,000 and integral multiples of US\$1,000 in excess thereof.
Form of the Notes	<p>The Notes will be in registered form, without interest coupons attached.</p> <p>The Notes will initially be represented by Global Notes. One or more Restricted Global Notes will be issued in respect of Notes offered and sold in reliance on Rule 144A. The Unrestricted Global Notes will be issued in respect of the Notes offered and sold in reliance on Regulation S.</p> <p>Except in limited circumstances, certificates for the Notes in definitive form will not be issued to investors in exchange for beneficial interests in the Global Notes. See “<i>The Global Notes</i>”.</p>
Transfer Restrictions.....	The Notes have not been and will not be registered under the Securities Act or any U.S. state securities laws. Consequently, the Notes may not be offered, sold or resold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable U.S. state securities laws. See “ <i>Transfer Restrictions</i> ”.
Use of Proceeds	The net proceeds of the issue of the Notes are intended to be utilised to repay outstanding debt of the Issuer, including to purchase its 2028 Notes and 2032 Notes (each as defined below), which have been accepted for purchase by the Issuer in the Tender Offer announced on 18 February 2026. In addition, if the principal amount of the Notes exceeds the aggregate amount of the 2028 Notes and 2032 Notes tendered in the Tender Offer, the Issuer intends to utilise the balance for general

budgetary purposes, which may include the refinancing of other external indebtedness.

Ratings	The Notes are expected to be assigned a rating of B by S&P and B- by Fitch. A rating is not a recommendation to buy, sell or hold securities and may be subject to revision, suspension, reduction or withdrawal at any time by the assigning rating organisation.
Further Issues	The Issuer may from time to time, without notice to or the consent of the registered holders of the Notes, issue additional securities that will form a single series with such Notes, subject to certain conditions set out in Condition 15 (<i>Further Issues</i>).
Governing Law	The Agency Agreement, the Deed of Covenant and the Notes (including any non-contractual obligations arising from or in connection with any of them) are governed by, and will be construed in accordance with, English law.
Arbitration	Any dispute arising out of or in connection with the Notes shall be resolved by arbitration under the Arbitration Rules of the London Court of International Arbitration, as more particularly described in Condition 16 (<i>Governing Law, Arbitration and Enforcement</i>). The parties have expressly excluded the jurisdiction of the courts.
Risk Factors	Any one or more of the risk factors below could affect Kenya's economy, its ability to fulfil its obligations under the Notes and your investment in the Notes.
Fiscal Agent, Paying Agent and Transfer Agent	Citibank, N.A., London Branch.
Registrar	Citibank Europe plc, Germany Branch

RISK FACTORS

An investment in the Notes involves a high degree of risk. You should carefully consider the risks described below as well as the other information contained in this Offering Circular before buying any of the Notes. Any of the following risks could materially adversely affect Kenya's economy and your investment in the Notes. The risks described below are not the only risks Kenya faces. Additional risks and uncertainties not currently known to Kenya or that Kenya currently deems to be immaterial may also materially affect Kenya's economy and its ability to fulfil its obligations under the Notes. In any such case, you may lose all or part of your investment in the Notes.

Risks Relating to the Republic of Kenya

Investing in securities of emerging market countries such as Kenya poses a greater degree of risk than investment in more mature market economies because the economies in emerging markets are more susceptible to destabilisation resulting from domestic and international developments.

Investing in securities of emerging market countries such as Kenya generally poses a greater degree of risk than investment in more mature market economies because the economies in emerging markets are more susceptible to destabilisation resulting from domestic and international developments. These risks include, but are not limited to, higher volatility and more limited liquidity in respect of the Notes, political risk, social unrests, terrorism and obstacles to effectively combating the financing of terrorism, inflation, currency volatility, exchange controls, instability in neighbouring countries and surrounding regions, corruption, money-laundering, a narrow export base, budget deficits, delays in reform and transformation agendas, lack of adequate infrastructure necessary to accelerate economic growth and changes in the political and economic environment. Emerging market countries can also experience more instances of corruption by government officials and misuse of public funds than do more mature markets, which could adversely affect the country and the perception of doing business therein, all of which can affect the ability of governments to meet their financial commitments domestically and internationally, including but not limited to obligations under issued securities.

Although significant progress has been made in reforming Kenya's economy and its political and judicial systems, Kenya is still in the process of developing the necessary infrastructure, regulatory and judicial framework that is essential to support market institutions and broad-based social and economic reforms. Generally, investment in securities of issuers in emerging markets, such as Kenya, is only suitable for sophisticated investors who fully appreciate the significance of risks involved in, and are familiar with, investing in emerging markets and investors are urged to consult their own legal and financial advisers before making an investment.

Furthermore, because international investors' reactions to events occurring in one emerging market country sometimes appear to demonstrate a "contagion" effect, in which an entire region or class of investment is disfavoured by international investors, Kenya could be adversely affected by negative economic or financial developments in other emerging market countries. This is particularly the case in the current economic environment where a number of emerging economies globally have entered periods of financial stress and distress following the Covid-19 pandemic and its impact on the global economy. For example, according to the International Monetary Fund (2025 Regional Economic Outlook: Sub-Saharan Africa), twenty countries in Sub-Saharan Africa are at high risk of or in debt distress (including Kenya). Any possible defaults or forced restructuring in other African nations currently ongoing or which could occur may affect the market's perception of Kenya and have consequential and adverse effects on Kenya's economy. See "*Risk Factors—Risks Relating to the Republic of Kenya—High levels of indebtedness could have a material adverse effect on Kenya's economy, its sovereign credit ratings and its ability to service its debt, including the Notes*" for further information.

In addition, Kenya's economy and macroeconomic goals are susceptible to adverse external shocks, including potential global economic and/or health crises, a global economic slowdown, the ongoing instability in the international financial markets, geopolitical events, new or ongoing global conflicts (see "*Risk Factors – Risks Relating to the Republic of Kenya – Impact of global and regional conflicts could have an adverse effect on the Kenyan economy and political stability*"), exchange rate depreciation, turmoil in the European banking system and the sovereign debt market of certain members of the European Monetary System, tightening of US monetary policy and consequent increase in US interest rates, persistent geopolitical uncertainty in the international oil and commodities markets and fluctuations in remittances as a consequence of various factors

including economic and financial changes in developed markets, and immigration policy changes in countries with a significant diaspora presence such as the United Kingdom, the U.S. and South Africa. Fluctuations in remittances—an important source of foreign exchange—are increasingly linked to economic performance and policy shifts in these developed economies.

Investors should also note that emerging markets, such as Kenya, are subject to rapid changes and that the information set out in this Offering Circular may become outdated relatively quickly.

High levels of indebtedness could have a material adverse effect on Kenya’s economy, its sovereign credit ratings and its ability to service its debt, including the Notes.

As at 30 September 2025, Kenya’s stock of public and publicly guaranteed debt stood at KES 12,053.95 billion, of which KES 5,393.53 billion (44.74%) was external debt and KES 6,660.42 billion (55.26%) was domestic indebtedness. In US Dollar terms, the total external debt as at 30 September 2025 amounted to approximately US\$41.73 billion. In addition, as of 30 June 2025, the National Government guaranteed approximately KES 83.2 billion of the indebtedness of the non-financial public sector, principally state-owned enterprises. While such guarantees fell by 16.97% from KES 100.2 billion as of 30 June 2024, on account of the novation of Kenya Airways debt and repayment of called-up guaranteed debt, these enterprises continue to have substantial reliance on direct Government financing.

The high levels of public indebtedness of Kenya represents a constraint for the management of public finances. The joint IMF-World Bank Debt Sustainability Analysis (“**DSA**”) of November 2024 qualifies Kenya’s debt distress risk as high, with the country’s debt carrying capacity assessed as medium, reflecting the cumulative impact of external shocks, declines in exports and growth, as well as expansionary fiscal measures such as increased expenditures and tax relief.

Kenya regularly evaluates its debt portfolio and engages with existing lenders with a view to optimizing its rate and maturity structure. In addition, Kenya is currently in discussions with a number of official, commercial and multilateral lenders for financing on a mix of concessional and commercial rates.

As at the date of this Offering Circular, Kenya has either met in a timely manner all payment obligations to all of its external creditors or agreed the terms for debt suspension under the DSSI (as defined below), including with respect to its outstanding international bonds. Nevertheless, the Covid-19 Pandemic and the various containment and mitigation measures deployed by the Government adversely impacted the economy and placed significant pressure on Kenya’s balance of payments and budgetary needs. While debt service costs increased to 68.0% of total state revenue in the fiscal year 2023/2024 from 58.8% in the fiscal year 2022/2023, this percentage increase does not account for the refinancing of the US\$2 billion Eurobonds due in June 2024, which were partially refinanced by a US\$1.5 billion Eurobond issued in February of that year. Total interest payments as a ratio of revenue (i.e., removing any principal repayments) increased to 36.7% in the FY 2023/24 from 33.8% in the FY 2022/23 (See *Annual Public Debt Management Report 2023/2024*).

The National Government projects total borrowing of KES 831.0 billion for FY 2025/26, representing a 8.12% increase from KES 768.6 billion in FY 2024/25. The Government intends to finance the fiscal deficit through additional borrowings, a mix of concessional and non-concessional sources, including funds from development partners and domestic and international capital and loan markets. These borrowings are expected to increase the overall debt stock.

The total net financing requirement for FY 2025/26 is projected at KES 923.22 billion (4.8% of GDP), comprising net external borrowing of KES 287.7 billion (31.15%) and net domestic borrowing of KES 635.5 billion (68.85%). The increased reliance on domestic financing may pose a risk to private sector lending, as heightened government demand for domestic credit could constrain the availability of funds for private borrowers. (See *2025 Medium-Term Debt Management Strategy*)

To support its debt sustainability goals, Kenya has relied on a number of initiatives from multilateral institutions. For instance, the Government took steps to join the Debt Service Suspension Initiative (the “**DSSI**”), a programme established by the G20 member states and Paris Club creditors which offered temporary suspension of debt service payments for all eligible countries that made such a request in order to support the poorest countries in their Covid-19 containment measures and their respective economies. The Government finalised the deferral agreements for debt service payments individually with the G20 member states. The first phase of

entering into the deferral agreements was completed by 30 June 2021, after which Government sought suspension of debt service payments between July and December 2021. The first phase of the DSSI freed up approximately KES 46.2 billion, while the second phase deferred approximately KES 9.5 billion of debt service payments between July and December 2021. The deferred payments are required to be repaid over five years, following a one-year grace period. See “*Public Debt—Debt Management*”. The first phase of the DSSI freed up approximately KES 46.2 billion, while the second and final phase deferred approximately KES 9.5 billion of debt service payments between July and December 2021. Under the DSSI, Kenya’s total repayment period is of five years, including a one-year grace period.

In addition, on 2 April 2021, the Executive Board of the IMF approved 38-month arrangements under the Extended Credit Facility (the “ECF”) and the Extended Fund Facility (the “EFF”) for Kenya in an amount equivalent to SDR 1.655 billion (305% of quota or approximately US\$2.34 billion) to support the next phase of the Covid-19 response, address the urgent need to reduce debt vulnerabilities and for safeguarding resources to protect vulnerable groups. Further, on 10 June 2021, the World Bank approved a US\$750 million in development policy financing to support reforms in sectors significantly impacted by the Covid-19 Pandemic, such as healthcare, education and energy, as well as to generally support the Government’s Post-Covid-19 Economic Recovery Strategy.

Since the Covid-19 Pandemic, Kenya has continued to engage with multilateral institutions, particularly the IMF, to address its debt issues. For instance, the arrangements under the ECF and EFF for Kenya were extended by 10 months on 17 July 2023 during the period of the fourth and fifth review. Additionally, on the 17 July 2023, the IMF Board approved a 20-month arrangement under the Resilience and Sustainability Facility (the “RSF”) in an amount of US\$551.4 million. On 19 July 2023, the Government and the IMF concluded the fifth review of the IMF Programme, agreeing on an additional US\$ 110.3 million in IMF financing. The IMF Program aimed to reduce Kenya’s fiscal deficit by broadening the existing tax base, strengthening revenue administration and cutting non-priority expenditures while maintaining allocations to social and growth-enhancing development programs. In response to ongoing balance of payment pressures, the IMF approved a disbursement of approximately US\$ 941.2 million on 17 January 2024 during its sixth review. On 30 October 2024, the executive board of the IMF concluded the seventh and eighth reviews under the ECF, EFF and RSF with Kenya. The IMF Programme further advanced broader reform and governance agendas, addressing weaknesses in some state-owned enterprises (the “SOEs”) and strengthening transparency and accountability through the anti-money laundering and anti-corruption frameworks. The Government also undertook measures to advance fiscal consolidation and improve debt burden management. The Government of Kenya and the IMF mutually agreed not to proceed with the final and ninth review of the IMF programme under the EFF/ECF in order to pave way for a new programme. As at the date of this Offering Circular, an IMF team is scheduled to visit Kenya from 24 February to 4 March 2026 to continue discussions on a successor arrangement aimed at supporting key policy reforms and potentially providing financial assistance. The consultations are intended to ensure that the new arrangement aligns with Kenya’s fiscal and economic priorities while reinforcing macroeconomic stability.

While the DSA contemplates that Kenya will continue to be able to access international capital markets, such as through the issue of the Notes, a significant increase in the level of debt-to-GDP or worsening of the fiscal situation in Kenya may result in Kenya’s debt becoming unsustainable. The National Government has utilised private placements, exemplified by the recent issuance of a US\$ 500.0 million amortising note maturing in 2032 in April 2025, indicating efforts to secure funds amid constrained access to external financing. Furthermore, as part of a broader liability management strategy, Kenya is proactively reviewing its debt stock and implementing measures such as term extensions, currency conversions, and other tools to reduce its overall debt servicing burden. For example, in October 2025, Kenya converted its U.S. dollar–denominated loans from China Exim Bank for the Standard Gauge Railway into renminbi. The conversion reflects a pragmatic debt management decision by the Government to lower debt-servicing costs, ease currency and interest rate pressures, and improve fiscal space.

In addition, some of the policy reforms may prove unpopular or difficult to implement or maintain. For example, planned tax increases included in the Finance Bill 2024 to broaden the tax base prompted social unrest in the country resulting in the proposed tax increases not being adopted. Further, the Government has not been able to maintain the debt ceiling of $\pm 55\%$ of the GDP in present value terms implemented in revisions to the Public Finance Management Act 2012 (“PFMA”) adopted on 1 November 2023. The new cap provides that such threshold may be exceeded by not more than 5% in exceptional circumstances, although as at 31 December

2023, Kenya's debt was 68.2% in present value terms and continues to remain elevated as of the date of this Offering Circular. While the PFMA also provides that the Cabinet Secretary of the Ministry of Finance has five years from the date of adoptions of the amendments (until 1 November 2028) to take measures to ensure that borrowing complies with the threshold, failure to do so within the grace period may result in Kenya's debt being deemed unsustainable.

Any failure to continue to meet the conditions of the economic and sectorial programs agreed with the IMF and the World Bank or its own policy initiatives may adversely affect Kenya's ability to make further drawings under the various facilities offered by these institutions and ultimately affect the Government's ability to service the Notes. Kenya is also expected to continue to rely on external financing, including international debt issuances and concessional borrowings from multilateral financial institutions, in order to meet its fiscal requirements, which may increase its overall debt obligations. The high levels of indebtedness of state-owned enterprises, and the Government guarantees given in respect of these enterprises, may further increase the Government's financing requirements. If the Government fails to successfully implement its debt strategy or is unable to access sufficient financing, it may be unable to refinance its debt when due or debt levels could rise to an unsustainable level, which may negatively impact Kenya's ability to make timely payments of interest and/or principal on the Notes. Failure to achieve budgetary targets and/or to limit Kenya's fiscal deficit may adversely affect Kenya's economic growth.

Failure to achieve budgetary targets and/or to limit Kenya's fiscal deficit may adversely affect Kenya's economic growth.

The fiscal deficit for 2025/26 is estimated at 4.7% of GDP, a reduction from the estimated 5.8% of GDP in 2024/25, 5.1% in 2023/24, 5.3% in 2022/23, 6.2% in 2021/22 and 8.2% in 2020/21 (See *Budget Statement for FY 2025/26, Annual Public Debt Management Report 2023/2024; Annual Public Debt Management Report 2022/2023 and Annual Public Debt Management Report 2021/2022*). Government revenue for FY 2025/26 is projected at KES 3.32 trillion, equivalent to 17.2% of GDP, compared to an estimated KES 3.34 trillion (18.46% of GDP) in FY 2024/25. Despite the increase in projected revenue, this remains below budget targets, highlighting the challenges in achieving desired revenue performance.

The Government expects to finance the funding gap resulting from the 2025/2026 fiscal deficit largely from borrowings including funding from development partners (such as the IMF, World Bank and African Development Bank), bilateral creditors, from commercial sources (including commercial lending, such as the Notes being offered hereby), from project financing and from domestic borrowings.

The Government is taking active measures to reduce expenditures and increase revenues in order to reduce its fiscal deficit, with the downward trend in Kenya's tax-to-GDP ratio being noted by the IMF as a key issue. In particular, it plans to enhance domestic revenue mobilisation and reduce recurrent spending in favour of capital investment to promote sustainable and inclusive growth. Revenue enhancement measures include extensive revisions to the current Income Tax Act in order to strengthen tax administration and expand the tax base and initiatives to address transit diversion and inefficiency in the clearing of imports, although a number of the proposals to broaden tax revenues have been met with legal challenges and social unrest. See "*Public Finance—Taxation Policy*" and "*Public Finance—Revenues and Expenditures*".

For example, Kenya has struggled to implement such tax reforms due to their unpopularity and the resulting nationwide protests. On 26 June 2023, the President signed the Finance Act 2023 into law, introducing widespread reforms to the Kenyan tax regime. The reforms introduced by the Finance Act 2023 include changes to income tax, introduction of taxation of repatriated income for non-residents, changes to turnover tax (including an increase on the TOT rate to 3%), additional requirements for withholding tax, introduction of new Pay-As-You-Earn tax bands and a new housing levy. While initially challenged as unconstitutional, which was upheld by the Court of Appeal in July 2024, Kenya's Supreme Court overturned the Court of Appeal's decision in October 2024.

Further, the Finance Bill, 2024, approved by Kenya's National Assembly on 25 June 2024 which proposed higher taxes on goods, including 16% VAT on bread and a 25% excise duty on Kenyan raw and refined vegetable cooking oil, aiming to raise an additional US\$2.7 billion in taxes, proved unpopular, prompting widespread youth-led protests and riots and an attack on the Kenyan Parliament, with rioters setting part of the building on fire. In response to the unrest, on 26 June 2024, the President issued a Presidential Memorandum of Referral declining to assent the Finance Bill, 2024.

Certain amendments were introduced to the Finance Bill, 2024 in November 2024, which lessened potential burden on taxpayers, but also result in lower expected tax revenue than the original U.S.\$2.7 billion (approximately KES 390 billion) package as envisaged in the Finance Bill, 2024. Given Kenya's low tax compliance rates, it is unclear how effective it will be in broadening the tax base in light of the resistance it faced to the Finance Bills introduced in 2023 and 2024. The proposed tax reforms may not be successfully implemented and may lead to further unrest, which could adversely affect the market's perception of Kenya and its economic stability. For more information, see "*Republic of Kenya – 2024 Protests*" and "*Public Finance – Finance Bill, 2024, the Tax Laws (Amendment) Bill, 2024, and the Tax Procedures (Amendment) Bill, 2024*".

Recently, under U.S. Executive Order 14169 in January 2025, the Trump Administration paused new foreign development assistance, initiating a comprehensive review of programmes. As of 1 July 2025, the United States Agency for International Development ("USAID") has ceased implementing foreign aid and its operations have been folded into the State Department, and approximately 83% of USAID programmes were terminated. These changes have disrupted funded programmes in Kenya, particularly in HIV/AIDS, maternal-child health, immunisation, nutrition, and outreach services. Health clinics have been closed or had staffing reduced, and many health workers were laid off. While in December 2025 the U.S. Government signed a five-year, US\$2.5 billion bilateral Health Cooperation Framework under its "America First" global health strategy, which is intended to replace prior USAID-managed programming with direct government-to-government funding, it is too early to determine the impact of this agreement on Kenya's health programmes. As at the date of this Offering Circular, the Health Cooperation Framework has been suspended pending a High Court determination related to data protection and privacy concerns. For more information, see "*Republic of Kenya – International Relations – United States*". The suspension and restructuring of U.S. development assistance in Kenya may increase the Government's domestic fiscal burden. Depending on how replacement funding is mobilised, such developments could exacerbate debt service obligations and place additional strain on the sustainability of public finances, potentially affecting the Government's ability to maintain current expenditure levels or service its debt.

Further, if the Government is not able to realise additional revenues or raise sufficient debt on affordable terms to address the deficit, it may be forced to cut expenditures, particularly as the current strength of the U.S. dollar makes dollar-based financing options available to the Government more expensive at this time. Failure to reduce the fiscal deficit may result in an increase in Kenya's debt levels and a subsequent increase in debt servicing costs, which puts further strain on Kenya's fiscal stability and debt sustainability and could in turn have a material adverse effect on the Kenyan economy and its ability to service its debts.

High inflation could have a material adverse effect on Kenya's economy

Historically, inflation in Kenya has fluctuated year to year, being largely driven by global price and inflationary trends stemming from supply related factors. This includes elevated international oil and food prices in 2021 and 2022 which were impacted by global supply chain constraints triggered by multiple factors, including the lingering effects of the Covid-19 pandemic, the war in Ukraine, and severe drought conditions. These elements collectively exerted upward pressures on domestic prices. Additionally, following the rapid monetary policy tightening in advanced economies, particularly the U.S., domestic currencies in emerging and frontier economies including Kenya, depreciated against the U.S. dollar, exerting upward pressure on prices of imported goods. (See "*The impact of climate change has negatively affected Kenya in the past and may negatively affect it in the future*" and "*Any significant depreciation of the Kenyan shilling against the US dollar or other major currencies might have a negative effect on Kenya's ability to repay its debt denominated in currencies other than the Kenyan shilling, including the amounts due under the Notes*" below). Russia's invasion of Ukraine has already had, and likely will continue to have, a material impact on global economic and market conditions, including increasing inflation (particularly for food, energy, and shipping costs) (see "*Risk Factors – Risks Relating to the Republic of Kenya – Impact of global and regional conflicts could have an adverse effect on the Kenyan economy and political stability*"). In August 2023, to curb the rising price of petrol, kerosene and diesel, Kenya's energy regulator reintroduced fuel subsidies which aimed to maintain the price of petrol, diesel and kerosene until September 2023. In May 2024, the National Treasury reduced fuel subsidy allocations from KES 54.18 billion in the previous financial year to KES 27 billion for the 2024/25 financial year.

Kenya's overall inflation has declined significantly with 12-month inflation declining from a peak of 9.6% in October 2022 to 3.0% in December 2024 reflecting the effectiveness of the Central Bank's tight monetary policy and pass-through effects of the strengthening exchange rate that have eased food and energy prices. However,

inflation increased to 4.4% in January 2026, indicating a slight reversal from the prior trend. Although tighter monetary policies have historically helped to curb inflation, the impact on inflation of heightened geopolitical tensions and conflicts (especially in the Middle East and Africa) and higher fuel and other import prices is beyond the Government's control. There can be no assurance that the inflation rate will not rise in the future. Further, the economic policies are subject to further change and revision at any time and there can be no assurance that these measures will not result in further volatility. Significant inflation could have a material adverse effect on Kenya's economy and the ability to service the Notes, including compelling the Central Bank of Kenya to increase or maintain high interest rates. See *"Monetary and Financial System - Structure and Development of the Kenyan Banking System - Inflation and Interest Rates"*.

Kenya may be unable to meet its economic growth and reform objectives and policies which may adversely affect the performance of the Kenyan economy.

The Government has announced its intention to pursue a series of economic and fiscal reform initiatives, including those set forth in Vision 2030 and the second, third and fourth Medium Term Plan (the "MTP"). However, there can be no assurance that such initiatives will be adequately funded, will achieve or maintain the necessary long-term political support, will be fully implemented or prove successful in achieving their objectives. There can also be no assurance that the targets envisioned by the Government's economic and fiscal reform initiatives will be achieved, including the target of 10% GDP growth set in Vision 2030. Continued pursuit of long-term objectives such as those set forth in Vision 2030 and the MTP IV will depend on a number of factors, including continued political support at many levels of Kenyan society, adequate funding, effective transition to devolved government, improved security, power sector reform, availability of human capital and significant coordination. The MTP IV focuses on implementing the Bottom-Up Economic Transformation Agenda ("BETA") plan for economic turn-around and inclusive growth through a value chain approach focused on five pillars: agricultural transformation, micro, small and medium enterprise ("MSME") economy, healthcare, housing and settlement and digital superhighway and creative industry. The five pillars are expected to contribute towards six objectives: ensure inclusive economic growth, lower the cost of living, enhance social security, manage unemployment, expand the tax base and increase foreign exchange earnings. The significant funding requirements for these plans may prove difficult or impossible to meet. Kenya may be unable to complete planned flagship projects or may experience difficulties implementing reforms. The Government was not able to achieve its medium-term objective under the third MTP of 7% real GDP growth in 2022 (See *Third Medium Term Plan, 2018-2022* and *Third National Reporting Indicator Handbook, 2018-2022*).

For example, in relation to the implementation of the MTP IV, Kenya is already facing certain challenges. The current MTP, which runs for a period of three fiscal years from FY 2024/25 to FY 2026/27, aims to grow the tax-to-GDP ratio from 14.1% to 20% within this timeframe, which were intended to be implemented in part through the Finance Bill, 2024. However, as a result of national protests, the Government has yet to implement some of these tax reforms. For more information, see *"Republic of Kenya – 2024 Protests"* and *"Public Finance – Finance Bill, 2024, the Tax Laws (Amendment) Bill, 2024, and the Tax Procedures (Amendment) Bill, 2024"*. If the Government is not able to fund or implement the medium-term objectives contained in the MTP IV, or if there is a delay in such funding or implementation, then the Government may not be able to meet the long-term strategic objectives set forth in Vision 2030, which could result in a material adverse effect on the economy.

Kenya faces uncertainty as its duty-free trade agreement with the United States under the African Growth and Opportunity Act ("AGOA") expired on 30 September 2025. AGOA was instrumental in granting Kenyan products, such as textiles, coffee beans, and macadamia nuts, preferential access to the U.S. market. On 3 February 2026, U.S. President Donald Trump signed a retroactive extension of the AGOA through 31 December 2026. This one-year extension, backdated to 30 September 2025, is expected to save over 66,000 Kenyan jobs in the textile and apparel sectors. There can be no assurance that AGOA will be extended beyond 31 December 2026, or if extended, on what terms or for what duration. The U.S. Administration and Congress may modify the programme's eligibility criteria, reduce the scope of products covered, or decline to renew it altogether.

Similarly, Kenya faces continued uncertainty in relation to the Kenya–European Union Economic Partnership Agreement ("EPA"), which remains subject to an interim suspension issued in November 2025 by the East African Court of Justice pending the determination of a legal challenge concerning its compatibility with Kenya's obligations under the EAC Treaty. Although the Government of Kenya has appealed the ruling, the timing and outcome of the appellate proceedings remain uncertain. If the suspension is upheld or the EPA is otherwise delayed or terminated, Kenya's preferential duty-free, quota-free access to the European Union

market may be adversely affected, which could in turn negatively impact export volumes, foreign exchange earnings, customs revenues and investor confidence. For more information, see “*Republic of Kenya – International Relations – EU Relations*”.

Since 2020, Kenya’s real GDP has experienced notable fluctuations, growing by 7.6% in 2021 following a 0.3% contraction in 2020, and subsequently expanding by 4.9% in 2022, 5.7% in 2023, and 4.7% in 2024. Despite this GDP growth, poverty levels in Kenya remain elevated, with the most recent overall poverty headcount at 39.8% in 2022. The country’s Vision 2030 acknowledges that there are also large disparities in incomes and access to education, healthcare and land, as well as to basic needs, including clean water, adequate housing and sanitation. High and persistent levels of poverty and unemployment and increasing inequality may individually or in the aggregate have negative effects on the Kenyan economy in addition to increasing the risk of social instability and higher violent crime. If reforms do not adequately address the high levels of poverty, unemployment and inequality, or if Kenya is unable to meet its reform objectives in such areas, such continued conditions may materially adversely affect Kenya’s economic growth.

The impact of recent policy measures proposed to be introduced by the Government to implement measures recommended under the IMF Program aimed to strengthening revenue collection and cut non-priority expenditures have led to political and social instability in the country.

Kenya has faced recent political instability resulting from the 2022 General Election, where President William Ruto won 50.5% of the votes and was subsequently elected as Kenya’s fifth President. In August 2022, the opposition party filed an unsuccessful Supreme Court challenge to the 2022 General Election result and subsequently the opposition has urged its supporters to protest against measures introduced by the current Government, with certain protests having escalated to and resulted in violence and civilian casualties. There can be no assurance that opposition to Government policy and possible protests will not continue, which may in turn affect market perceptions of Kenya and general socioeconomic stability. In particular, election related instability may arise in conjunction with the 2027 elections.

In May 2024, the proposed tax increases in the Finance Bill, 2024 were heavily criticised by younger Kenyans. Peaceful protests began on 18 June 2024 in Nairobi, prompting a number of arrests. On the same day, the Kenyan Parliament amended the bill, removing certain controversial clauses. However, the bill was nonetheless passed the next day, leading to nationwide protests and heavy clashes with security forces. On 25 June 2024, protesters stormed the Parliament buildings, resulting in casualties and numerous injuries due to clashes with police. The following day, President Ruto held a press conference and decided to withhold the signing of the bill due to its unpopularity. Despite this, protests escalated into riots on 2 July 2024.

The withdrawal of the bill led to an initial shortfall in revenue in July 2024, causing GDP growth rates to slow down moderately between the first quarter and third quarter of 2024, from 5.0% to 4.0%. In response, the Government has been taking active measures to strengthen its institutional resilience following the protests. The Supreme Court of Kenya has given a decision on what is required and what is to be considered in relation to the guidelines around how to carry out public participation. Several reforms have also been proposed in the National Dialogue Committee Report, adopted by the Senate and National Assembly on 21 February 2024 and 22 February 2024 respectively, with the consensus to recommend constitutional, legal and policy reforms on issues of concern to the people of Kenya. In addition, the Independent Electoral and Boundaries Commission (“IEBC”), which had been non-functional since January 2023 due to expired and vacant commissioner positions, was only reconstituted in July 2025, after substantial legal delays. This delayed reconstitution has disrupted key electoral functions—including boundary delimitation, continuous voter registration, and the holding of by-elections—and may pose a material risk to further reforms. As Kenya prepares for the 2027 General Election, the delayed operationalisation of a fully independent IEBC could weaken implementation of reforms, increase legal and reputational risk, and undermine public confidence in electoral outcomes.

In response to the ongoing unrest, several cabinet ministers were removed from office, and President Ruto established a new "broad-based unity government" in July 2024. However, this measure did not alleviate the protests. Political instability persisted in Kenya, and in October 2024, the Senate impeached former Deputy President Rigathi Gachagua on charges of corruption, inciting ethnic divisions, and supporting anti-government protests.

In May 2025, the Government’s proposed Finance Bill 2025 sparked widespread protests, particularly among the youth. The bill included provisions such as the introduction of advance pricing agreements and changes to

the use of the import declaration fee, which were met with public concern. On 26 June 2025, President William Ruto assented to the Finance Act 2025, which came into effect on 1 July 2025. The Act introduced several changes, including the limitation of tax loss carryforwards to five years and adjustments to per diem allowances for employees. Despite the government's efforts to implement these reforms, public discontent persisted.

If required policy measures are not able to be implemented for social or political reasons, or future protests were to persist for an extended period, they could negatively impact the economy, which in turn could adversely affect the Kenya's ability to meet its debt obligations, including those under the Notes.

For more information, see “*Republic of Kenya –2024 Protests*” and “*Public Finance – Finance Bill, 2024, the Tax Laws (Amendment) Bill, 2024, and the Tax Procedures (Amendment) Bill, 2024*”.

Any significant depreciation of the Kenyan Shilling against the US dollar or other major currencies might have a negative effect on Kenya's ability to repay its debt denominated in currencies other than the Kenyan shilling, including the amounts due under the Notes.

In the third quarter of 2025, the Kenyan Shilling experienced a slight appreciation of 0.2% against the US Dollar, but depreciation against several other major global currencies, including a decline of 6.2% against the Euro and 3.6% against the British pound. As of 16 February 2026, the exchange rate stood at KES 129.00 per US Dollar. Throughout 2025, the Shilling maintained relative stability, trading on average around KES 129 per US Dollar.

The Shilling remains susceptible to external shocks. Factors such as fluctuations in global commodity prices, particularly oil, and uncertainties surrounding international trade policies continue to pose risks. In addition, the Government's substantial external debt, with approximately 62% denominated in US Dollars as of December 2024, underscores the vulnerability of Kenya's balance of payments to exchange rate volatility.

For the foregoing reasons, a continued depreciation of the Kenyan shilling against the US dollar or other major currencies might have a material adverse effect on Kenya's ability to repay its debt denominated in currencies other than the Kenyan shilling, including the amounts due under the Notes.

Impact of global and regional conflicts could have an adverse effect on the Kenyan economy and political stability.

Geopolitical events and developments significantly affect the macroeconomic and political environment and can create sources of uncertainty and concern both globally and for Kenya. In February 2022, Russian forces invaded Ukraine, and Russia recognised the independence of the so-called “Donetsk People's Republic” and the “Luhansk People's Republic”, two separatist regions within Ukraine, and a military conflict has since commenced between Russia and Ukraine and is continuing as of the date of this Offering Circular. These actions led the United States, the European Union and the United Kingdom, among others, to impose economic sanctions against Russia, Russian government officials and Russian corporates and financial institutions. The ongoing conflict has had a significant impact on international capital markets, investor sentiment and commodity prices (including oil and gas, which has led to rising fuel prices, and arable crops, which has led to rising food prices and consequently increased inflationary pressures). The sanctions announced to date include restrictions on selling or importing goods, services or technology in or from affected regions, travel bans and asset freezes impacting connected individuals and political, military, business and financial organisations in Russia. Such sanctions have direct and indirect effects on Kenya, as is the case with other participants in the global economy, which could become more significant if Kenya does not comply or is not seen to adequately comply with the sanctions. There remains a risk of further escalation and a resulting further impact on geopolitical conditions. Western and allied governments could impose wider sanctions and take other actions should the conflict further escalate. In particular, increased prices and supply shortages of products, such as wheat and energy, could further contribute to inflationary pressure. While the full extent of the impact of the conflict remains to be seen, the effects of the conflict could affect the Kenya economy.

Kenya shares a border with Ethiopia and South Sudan, who in turn share a border with Sudan. On 15 April 2023, the Sudanese ‘Rapid Support Forces’ attacked various bases belonging to the Sudanese Armed Forces across Sudan. The conflict between the paramilitary group and the Sudanese Armed Forces continues to be concentrated around the capital city of Khartoum and the Darfur region, resulting in significant civilian casualties and widespread displacements. Despite repeated negotiation attempts, and the introduction of sanctions by the United States, the European Union and the United Kingdom in response to the violence across

Sudan, the conflict remains ongoing as of the date of this Offering Circular. Moreover, the ongoing famine in Sudan, driven by conflict, is causing a major displacement crisis, with millions fleeing to neighbouring countries like Kenya, straining its resources and humanitarian efforts. Any escalation of the current conflict in Sudan any impact on its neighbouring countries such as Kenya, could be detrimental to wider geopolitical stability in East Africa, which may in turn have a material adverse effect on the Kenyan economy.

Moreover, Kenya and Tanzania share a long border that presents security challenges and a risk of instability in the region. However, joint border patrols and information sharing help mitigate cross-border crime. Bilateral agreements have led to joint operations targeting organised criminal networks and insurgent threats, especially along their shared border near the Indian Ocean.

In addition, the ongoing conflict and instability in the Democratic Republic of the Congo (“DRC”), exacerbated by repeated military incursions by rebels alleged to be backed by the Rwandan government, may pose significant risks to the stability and economic prospects of the region. Uganda has also been involved in supporting the DRC government in its fight against such rebel groups, which could further complicate regional dynamics. In this context, the signing of the Washington Accords for Peace and Prosperity between the DRC and Rwanda in December 2025 represents a potentially positive step toward de-escalation and improved bilateral relations. If effectively implemented, the accords could contribute to enhanced security cooperation, reduced cross-border hostilities, and improved economic integration in the region. However, given the long history of conflict and the fragility of prior peace initiatives, it remains too early to assess the durability and practical impact of the agreement.

Separately, tensions between Ethiopia and Egypt regarding the construction and operation of the Grand Ethiopian Renaissance Dam have raised concerns about regional stability, particularly in relation to water security and potential conflict outcomes. There can be no assurance as to how this situation will develop in the future. Relatedly, Ethiopia’s reported efforts to secure access to the sea, including through arrangements with Somaliland, have increased tensions in the Horn of Africa. The international response to these developments may add further uncertainty.

Lastly, the conflict initiated on 7 October 2023 when Hamas carried out coordinated attacks on Israel has persisted in various forms through 2025 and into 2026. Although a U.S.-brokered ceasefire agreement reached in January 2025 reduced large-scale hostilities, subsequent fighting resumed in March 2025, and localised violence continues in Gaza and adjoining territories. Recent developments have seen a limited reopening of the Rafah border crossing under the ceasefire framework, yet civilian casualties and humanitarian needs remain substantial. Beyond the Israel–Hamas front, related regional tensions — including attacks linked to Iran-aligned actors such as Yemen’s Houthi movement and periodic escalations involving Hezbollah along the Lebanon–Israel border — have contributed to broader instability across the Middle East. Maritime security in the Red Sea and Gulf of Aden remains sensitive, as Houthi-linked actions have at times disrupted international shipping and prompted military responses. Continued tensions between Israel and Iran, including through proxy engagements, as well as instability in Iran itself, further heighten the risk of wider regional conflict. The scale, duration, and direction of these conflicts and geopolitical dynamics remain uncertain. Any significant escalation or renewal of hostilities, or deterioration in regional security, could have adverse implications for global geopolitical stability and economic conditions, potentially affecting macroeconomic framework, which may in turn have a material adverse effect on the Kenyan economy.

Kenya continues to be challenged by internal security issues as well as unfavourable media coverage, which has had and may continue to have a negative impact on the economy, including the tourism industry.

Kenya has from time-to-time experienced internal security concerns. The Al-Shabaab group, an extremist militant group, has claimed responsibility for multiple attacks in recent years and continues to threaten further attacks, not only against Kenya but also against Western countries for their intervention in Somalia. Al-Shabaab activity increased materially in 2022 and has persisted at elevated levels through 2024 and 2025, particularly in Kenya’s north-eastern and coastal border counties. Recent incidents include a March 2025 attack on a police reservist camp in Garissa that killed six officers, an April 2025 ambush in Mandera that left five quarry workers dead, and a December 2024 IED strike in Wajir that injured eight security personnel. In response, Kenyan authorities have periodically tightened border controls, delayed the phased reopening of the Kenya–Somalia border, and intensified counter-terrorism operations. Kenya also continues to contribute troops to the African Union Support and Stabilisation Mission in Somalia (AUSSOM, successor to ATMIS) as part of wider regional stabilisation efforts.

In addition, the Dadaab refugee complex in northeast Kenya, originally established in 1991 to house refugees from the Somali civil war, has elicited concerns that the camp is a ground for recruiting Islamist militants, compromising border security and causing significant law and order problems within Kenya's territory. The government has been working to manage the risks posed by the camp but has faced numerous challenges. For instance, in November 2023, the Somali and Kenyan Governments signed an agreement with the United Nations High Commission for Refugees to begin the voluntary repatriation of Somali refugees. However, any forced repatriation or even the perception of such repatriation, could potentially build resentment amongst affected individuals and enhance Al-Shabaab's recruitment efforts in Kenya. Government efforts to manage the risks posed by the camp also faced legal hurdles. In February 2017, the High Court ruled against the Government proposal to close the camp. Similarly, on 24 March 2021, the Cabinet Secretary for Interior announced jointly with the UNHCR that Kenya intended to expedite the repatriation of individuals residing in both Dadaab and Kakuma refugee camps with a view to closing the camps by 30 June 2022. However, the Nairobi High Court issued an injunction temporarily blocking the Government from repatriating refugees and asylum seekers dwelling at Kakuma and Dadaab camps. As of the date of this Offering Circular, the Dadaab refugee complex is still open and is one of the largest refugee camps in the world. For more information, see "*Republic of Kenya—Anti-Corruption, Anti-Money Laundering, Crime and Combating Terrorism*".

The Refugees Act 2021, came into effect in February 2022 and is designed to provide legal protection to refugees and acknowledge their rights as asylum seekers. The positive shift of Kenya's refugee law provides an opportunity for refugees to integrate socially and economically.

As of the date of this Offering Circular the Dadaab camp remains open. As of 30 April 2025, the camp housed over 431,216 refugees and asylum-seekers and the Government, together with UN agencies, continues to provide new refugees with basic services. The camp's population increased rapidly in 2023 due to an extended drought in Somalia, leading to severe overcrowding, increased pressure on services and a cholera outbreak. Should the Somali state fail, such as in the case that international actors withdraw security support, risks to Kenya may become more acute and severely impact Kenya's investment climate.

Other internal security threats include the rise of pastoralist militias and incidents of mob violence. In March 2023 alone, pastoralist militia violence in the North Rift region surged by 89% compared to February 2023. Although there was a temporary decrease in violence in the subsequent months, the levels of violence increased again from September 2023 to March 2024 in the North Rift, Baringo and Samburu counties. In 2022, the capital also faced a peak in mob violence, with 440 mob violence events reported. Much of the mob violence were linked to the 2022 General Election and the campaign process. See "*Risk Factors—Risks Relating to the Republic of Kenya—Investing in securities of emerging market countries such as Kenya poses a greater degree of risk than investment in more mature market economies because the economies in emerging markets are more susceptible to destabilisation resulting from domestic and international developments.*"

Kenya also suffers from high crime rates. In 2020, 69,645 crimes were reported to the police. This increased by 16.7% to 81,272 cases in 2021, 8.4% to 88,083 cases in 2022 and further increased by 19% to 104,842 in 2023, primarily as a result of increased usage of dangerous drugs and criminal damages. Kenya experienced a slight decrease in reported crimes in 2024, with a 3.5% drop to 101,220 cases compared to 104,881 in 2023. However, Nairobi remains a hotspot, recording the highest number of crimes nationally. Violent crimes, such as kidnapping and extortion, continue to pose a significant risk to businesses and economic growth.

Foreign tourism is an important contributor to Kenya's economy, as well as being an important source of foreign exchange and one of Kenya's largest employers. As a result of security concerns, the United Kingdom, the United States, France and Australia have, in the past, issued travel advice recommending that their citizens avoid or reconsider travel to certain areas within Kenya, although some of these travel advisories have since been revised or withdrawn. The United States and the United Kingdom were, respectively, the largest and second largest sources of foreign tourists to Kenya in 2023. Similarly, in considering the top 30 performing source markets in 2022, the United States took the top position with 209,360 which was 16% of the total tourists. This was closely followed by Uganda, the United Kingdom, and the United Republic of Tanzania with 12%, 10%, and 10% market shares respectively. Accordingly, such travel warnings, as well as unfavourable media coverage, including coverage of extremist violence or violence in some parts of Kenya or future analogous events may create a negative perception of Kenya as a holiday destination and thus have a detrimental impact on the level of tourism. See "*Risk Factors—Risks Relating to the Republic of Kenya—Investing in securities of emerging market countries such as Kenya poses a greater degree of risk than investment in more mature market*

economies because the economies in emerging markets are more susceptible to destabilisation resulting from domestic and international developments”. Earnings from tourism decreased significantly in 2020 primarily due to the impact of the Covid-19 Pandemic and related social and travel restrictions. The Government has estimated that the Covid-19 Pandemic cost the Kenyan tourism industry over KES 68 billion to date in hotel receipts and associated revenue. However, tourism earnings have shown a sustained recovery since 2020. In Kenya, inbound tourism receipts rose by 19.79% to KES 452.5 billion in 2024, up from KES 352.5 billion in 2023 and KES 268.1 billion in 2022, with current projections indicating a continued upward trajectory into 2025 and 2026, albeit subject to broader economic and regional stability conditions. This growth reflects improved security measures and effective domestic and international marketing campaigns. (Source: *Annual Tourism Sector Performance Report 2024*) Despite the steady growth since 2020, any decrease in tourism is likely to have an adverse economic impact. See “*The Economy—Principal Sectors of the Economy—Tourism*” for more information.

Although the Government has implemented security measures, investments and public campaigns to counter terrorism and criminal activities, as well as economic measures to promote tourism in Kenya, there can be no assurance that such measures will be sufficient. As long as these issues remain unaddressed, civil unrest and insurgent activities will continue to create social, ethnic and political tension. This, in turn, can negatively impact the economy and fiscal stability, potentially having a material adverse effect on Kenya’s economy and, consequently, on its ability to meet its debt obligations, including those under the Notes.

The impact of climate change has negatively affected Kenya in the past and may negatively affect it in the future.

Climate change has significantly impacted Kenya and continues to pose a substantial threat to the country’s economy, sustainable development goals and Vision 2030. The global increase in the mean temperature is likely to alter precipitation patterns, raise sea level and increase the frequency of extreme weather events such as prolonged droughts and flash floods.

Given that Kenya’s economy heavily relies on climate-sensitive sectors like agriculture, tourism and energy, the country remains particularly vulnerable to climate change. For instance, agriculture, forestry, and fishing account for 22.5% of Kenya’s GDP in 2024. The economy’s reliance on these sectors makes it particularly susceptible to natural disasters such as floods and droughts. Floods may lead to casualties, the destruction of crops and livestock, trigger outbreak of waterborne diseases, and damage infrastructure such as roads and bridges. Droughts may negatively affect the supply of agricultural commodities, overall food supply and security as well as the hydroelectric power generation. The costs associated with natural disasters and related relief efforts may adversely affect Kenya’s budgetary position and its ability to service financial obligations, including servicing of the Notes.

The effects of climate change are already being felt in Kenya. Potential consequences of these climatic changes include reduced agriculture productivity, damage to coastal infrastructure, fragile ecosystems, adverse health impacts, biodiversity loss, financial market disruptions, lower GDP and altered migration patterns.

For example, since 2019, Kenya has faced consecutive below-average rainy seasons, culminating in the longest and most severe drought in 40 years in 2024. This drought has led to increased food insecurity due to livestock losses and rising food prices. In 2023, 2.6 million livestock deaths were attributed to the drought, and the price of staple commodities such as maize and beans surged by 60% to 90% above the average. Acute food insecurity peaked to its highest level in at least a decade, with 5.4 million people in the arid and semi-arid region of Kenya projected to have faced Crisis (IPC Phase 3) or Emergency (IPC Phase 4) levels by March 2023. Although the number of food-insecure individuals decreased from 2.8 million in July 2023 to 2.0 million in February 2024, at least 1.2 million people are still projected to have faced acute food insecurity (IPC Phase 3 and above) between April and June 2024. The draught also caused a significant increase in food prices, with the annual inflation rate reaching a five-year high of 8.3% in August 2022. Access to water was further compromised, with almost 35% of water pans drying up in 2022, forcing people to travel between 8.6 and 17.6 kilometres to access water, at least 38% above the three-year average. Lastly, the drought also had knock-on effects on electricity generation in 2022 with a 17.3% decline in hydroelectricity generation from 2021 to 2022 due to insufficient rains. The October to December 2025 rainy season was one of the driest on record, with eastern Kenya facing its most severe drought for that period since 1981.

Conversely, from October 2023 to January 2024, Kenya experienced El Niño-related flooding. Above-average rainfall in October 2023 caused severe flooding, particularly in the coastal regions, displacing approximately 6,000 households and damaging farmland and infrastructure. Continued heavy rains in November 2023 led to further flash floods, resulting in significant losses of livestock, farmland, and homes. The floods affected 38 of Kenya's 47 counties, caused 76 fatalities and prompted President Ruto to activate the National Disaster Operation Centre. By April 2024, El Niño had resulted in 174 deaths and displaced more than 500,000 households. More than 17,000 acres of farmland were destroyed, and 13,400 livestock deaths were recorded. These impacts and the costs to mitigate them are expected to negatively impact the Kenyan economy.

In response to climate change, Kenya has established the National Treasury as the National Designated Authority for Green Climate Fund and created mechanisms to involve the private sector in financing mitigation and adaptation initiatives through the issuance of green bonds. Despite these efforts, adverse weather conditions as well as any natural disasters or other effects associated with climate change could have a continued material adverse effect on the Kenyan economy.

China is Kenya's largest creditor and an adverse impact on the Chinese economy may impact the future ability of Kenya to increase its borrowings.

As at March 2025, outstanding bilateral external debt due to China (excluding Chinese commercial banks) amounted to US\$ 5.0 billion, making China Kenya's largest creditor. This debt is primarily concentrated in infrastructure projects such as the Standard Gauge Railway, roads, and energy sectors. See "*Public Debt*". During the years 2018 and 2019, the Government through various implementing ministries entered into three loans with Exim Bank of China, amounting to a total sum of approximately CNY1.66 billion to finance projects in roads and ICT sectors. Such loans mature between 2038 and 2039. In September 2024, Kenya entered negotiations with the China Development Bank (CDB) and secured approval for a loan of approximately US\$280 million to fund the completion of 15 rural roads, which were 20% complete at the time. Furthermore, as part of a broader liability management strategy, Kenya is actively reviewing its debt stock and implementing measures such as term extensions, currency conversions, and other tools to reduce its overall debt servicing burdens. For example, in October 2025, Kenya converted its U.S. dollar-denominated loans from China Exim Bank for the Standard Gauge Railway into renminbi. See "*Republic of Kenya – International Relations – China*".

Kenya's reliance on China for such a significant portion of its bilateral external debt and a key financing source to various infrastructure projects means that any disruption to China's economic stability or shifts in Chinese appetite for funding infrastructure projects in emerging markets could have an adverse effect on Kenya's ability to increase bilateral borrowings from the country in the future. Further, as has been cited in media and ratings agency reports, the terms of Chinese lending may be less favourable to borrowers than debt from other multilateral or bilateral lenders. In addition, external factors such as international trade tensions, including the re-imposition of tariffs by the United States on Chinese exports under the Trump administration, could negatively impact China's economy and, in turn, its capacity or willingness to extend further financing to Kenya. See "*Risk Factors—Risks Relating to the Republic of Kenya— Kenya may be unable to meet its economic growth and reform objectives and policies which may adversely affect the performance of the Kenyan economy*" for more information.

Failure to address actual and perceived risks of corruption and money laundering may adversely affect Kenya's economy and ability to attract foreign direct investment.

Although Kenya has implemented and is pursuing major initiatives to prevent and fight corruption and money laundering, both remain important issues in Kenya and a key constraint on economic growth. Kenya is ranked 121 out of 180 in Transparency International's 2024 Corruption Perceptions Index and placed at the 32 percentile rank (with 100 the highest rank) on the World Bank's Worldwide Governance Indicators for 2024 (control of corruption indicator). On 23 February 2024, the FATF placed Kenya under increased monitoring, commonly referred to as the "grey list". This was due to several factors, including a lack of clear strategy for prosecuting money laundering offences, inadequate investigations or prosecutions of legal or natural persons for terrorist financing offences despite several terrorism-related investigations, and a significant lack of regulation and supervision of the country's large non-profit sector. For more information, see "*Republic of Kenya - Anti-Corruption, Anti-Money Laundering, Crime and Combating Terrorism*".

However, Kenya has taken positive steps towards enhancing its anti-money laundering laws for instance, the Anti-Money Laundering and Combating of Terrorism Financing Laws (Amendment) Bill, 2025 was passed by the National Assembly on 16 April 2025 and was assented by President Ruto on 17 June 2025. The provisions of this legislation are currently being implemented by the respective authorities. In addition, the Conflict of Interest Bill, 2023—originally criticised for delays and opposition amendments—has now been signed into law. This law consolidates conflict-of-interest provisions, repeals the Public Officer Ethics Act, and gives the Ethics & Anti-Corruption Commission stronger powers over declarations of interest and enforcement. The effectiveness of the law will depend on implementation, enforcement, and the political will to resist attempts to dilute its standards.

Despite Kenya's efforts to mitigate corruption and money laundering risks, there is no certainty regarding the success of these measures or that Kenya will cease to be subject to enhanced monitoring. Failure to implement these strategies, continued corruption in the public sector and deficiencies in the systems for addressing money laundering activities could have a material adverse effect on the Kenyan economy and may have a negative effect on Kenya's ability to attract foreign investment. See also "*The Economy—Major Infrastructure Projects — Expansion of Railway Transport*" for a discussion of the procurement process in the SGR.

Failure to continue to restructure and enhance the banking and financial sector may constrain Kenya's economic growth.

The Kenyan banking sector is subject to a number of risks and uncertainties, that include inflationary pressures, the effects of tighter monetary policy conditions on credit flows and by extension economic activity, sustained depreciation of the Kenyan shilling versus the major currencies, and concerns of debt sustainability amidst upcoming external debt maturities. In particular, asset quality in the Kenyan banking sector has decreased in recent years as reflected by the sector's high non-performing loan ratio which was 14.1% in December 2021, 13.9% in December 2022 and 15.6% in December 2023 and 16.4% in December 2024. However, decreases in non-performing loans were noted in the real estate, manufacturing, trade, building and construction, and personal and household sectors, and the non-performing loan ratio stood at 15.5% in January 2026. The decline in 2022 was mainly attributable to improved business activities as the economy continued to recover from the COVID-19 pandemic. Conversely, the increase in non-performing loans in 2023 was driven by deteriorating asset quality due to challenges in the business environment and delayed payments. The concentration of non-performing loans was mainly in Trade, Manufacturing, Real Estate, and Personal and Household sectors in December 2022, December 2023 and December 2024. This was mainly due to delayed payments from public and private sectors, slow uptake of housing units and a challenging business environment. If the non-performing loan ratio continues to increase, this could have a material adverse effect on the Kenyan banking sector and the Kenyan economy due to likelihood of higher credit costs. (Source: CBK 2022 and 2023 Bank Supervision Annual Report). In September 2022, rising Kenyan banks' asset-quality risks were reported due to weaker global and domestic conditions with continued asset-quality pressures expected from SMEs and retail loan books. Such conditions contributed in Fitch viewing the Kenyan banks' sector with negative outlook. Separately, stress tests conducted by CBK in September 2023 showed capital shortfalls at some banks in scenarios with large interest rate increases or significant currency depreciation. The Central Bank of Kenya is monitoring the implementation of the bank's capital restoration plans and encouraging adequate provisioning for loan losses.

In December 2023, amidst continued global uncertainty, volatility in international oil prices, a weak global growth outlook, and escalating geopolitical tensions, the Monetary Policy Committee ("MPC") noted persistent domestic inflationary pressures and a depreciating shilling, which contributed to the rising cost of imports and higher domestic prices. In response, the Central Bank of Kenya raised the base lending rate by 2 percentage points to 12.5%, leading commercial banks to increase their loan rates. As of February 2026, the MPC lowered the Central Bank Rate to 8.75%, down from 9.00% in December 2025, 9.25% in October 2025, 9.50% in August 2025, 9.75% in July 2025. This marks a consistent sequence of consecutive rate cuts, aiming to stimulate economic activity and enhance private sector lending. The average commercial banks' lending rate stood at 14.8% in January 2026, down from 15.0% in October 2025, 15.3% in June 2025 and 17.2% in November 2024.

The banking sector is also particularly concentrated amongst certain major banks. In 2013, the CBK developed a framework for identifying Domestic Systemically Important Banks ("D-SIBs"). However, the framework on D-SIBs has not been regularised under the Banking Act and/or the CBK's Prudential Guidelines 2013 for institutions licenced under the Banking Act (the Prudential Guidelines) and therefore remains non-

operationalised. The capital and liquidity requirements are enforced under the Banking Act. As at 31 December 2024, out of the 39 banking institutions, 37 were privately owned while the Kenya Government had majority ownership in 2 institutions. Nine banks are designated as D-SIBs and of the 37 privately owned banks, 20 were locally owned (the controlling shareholders are domiciled in Kenya) while 17 were foreign owned. These D-SIBs collectively hold a significant portion of total banking sector deposits. According to the Kenya Bankers Association State of the Banking Industry Report 2025, as of December 2024, the top 10 banks (which includes the D-SIBs) held approximately 78.6% of total deposits, highlighting the concentration of deposits among a few large institutions. Consequently, the potential failure of one or more D-SIBs and any remedial measures could pose a systemic risk to the banking industry and have a material adverse impact on the Kenyan banking sector and the Kenyan economy.

Furthermore, the National Bank of Kenya, one of the largest banks in the country, is largely supported by Government shareholdings. However, it has faced challenges in recent years due to a distressed portfolio as well as issues relating to governance. As a result, Kenya Commercial Bank Group (“**KCB Group**”) acquired 100% shareholding in the National Bank of Kenya in 2019. This relationship between the Kenyan banking sector and the Government is further seen in the sensitivity of Kenyan bank ratings to a lower sovereign rating and high sovereign debt exposure pressures. During 2020, three significant transactions involving the consolidation of smaller banks were concluded. Access Bank of Nigeria acquired Transnational Bank which was subsequently renamed Access Bank Kenya. CIB Bank of Egypt acquired a majority stake in Mayfair Bank and renamed it to Mayfair CIB Bank. The Co-operative Bank of Kenya acquired Jamii Bora Bank and renamed it Kingdom Bank. Since the Covid-19 pandemic, all Kenyan banks continue to strengthen their capital and liquidity buffers and business models. A number of smaller banks have experienced capital deficiencies necessitating sector consolidation and asset and liability selling. In 2023, Equity Bank (Kenya) Limited acquired certain assets and liabilities of Spire Bank Limited. As of 30 September 2023, 20 banks accounting for 60% of the asset base were accessing the CBK’s “discount window,” a lending facility of last-resort. The Kenyan market for banking and financial services is fragmented and a number of smaller banks in Kenya are undercapitalised and operating at a loss. The Kenyan banking sector is currently undergoing a period of consolidation to reduce the number of existing banks. However, to the extent such efforts to consolidate are unsuccessful, fragmentation in the banking sector could continue to hinder smooth transmission of monetary policy, increase the burden on the regulators and supervisors of the Kenyan banking system and prevent smaller banks from achieving economies of scale to help sustain profitability. Each of the foregoing elements could in turn have a material adverse effect on the Kenyan economy and its ability to service its debts, including the Notes.

The Kenyan banking sector is subject to operational risks relating to the introduction of and reliance on information technology systems including cybersecurity and privacy risks.

As part of the Government’s “Vision 2030” strategy and successive MTPs, information and communication technology (“**ICT**”) has been prioritised by the Government as having a key role in expanding access to financial services and improving the ways of doing business in Kenya as a whole. As various ICT products and infrastructure have been implemented throughout the Kenyan banking sector, including the increasing usage of mobile financial services and additional ICT financial products, there has been an inherent operational risk with Kenyan banks’ dependency on their ICT systems to process a large number of transactions on an accurate and timely basis, and to store and process business and operating data. The proper functioning of the banks’ financial controls, risk management, credit analysis and reporting, accounting, customer service and other ICT functions are critical to the individual banks’ business as well as to the overall health of the banking sector. In addition, as various financial products have been leveraged on the new ICT payment platforms, including the provision of Government services to the private sector and the collection of Government payments, the banking sector and other businesses whose performance is linked to these ICT systems remain an important source of corporate tax revenue for the Government. Therefore, any failure or disruption to mobile banking services or other ICT products operated by the banking sector may lead to significant loss of potential Government revenue, customers’ deposits and market confidence. Such failures can be caused by a variety of factors, including natural disasters, extended power outages, computer viruses, and/or complications related to the availability and operation of the national fibre optic coverage. The proper functioning of ICT systems also depends on accurate and reliable data and other system inputs, which are subject to human errors.

In addition, information security risks for large financial institutions have increased in recent years, in part because of the proliferation of new technologies, the use of internet and telecommunications technology and the

increased sophistication and activities of organised criminals and hackers. Kenyan banks' databases contain personal data of their customers, which may be vulnerable to damage, including telecommunications and network failures, natural disasters and human acts both by individuals external to the banks' business as well as the banks' employees. Although Kenyan banks maintain information security software, their computer systems, software and networks may be vulnerable to unauthorised access, misuse, denial-of-service attacks, phishing attacks (SMS phishing by which individuals or organised groups send SMS or text messages to customers to obtain sensitive information or account credentials), computer viruses or other malicious codes. In the first quarter of 2025, the National KE-CIRT/CC detected over 2.5 billion cyber threat events, marking a 201.85% increase from the previous quarter. This surge is attributed to factors such as inadequate system patching, limited user awareness, and the growing adoption of AI-driven attacks.

Cyber-attacks could give rise to the loss of significant amounts of customer data and other sensitive information, loss of significant levels of liquid assets (including cash) and the disablement of the banks' ICT systems used to service the banks customers, including the Government. As attempted attacks continue to evolve in scope and sophistication, banks may incur significant costs in their attempts to modify or enhance protective measures against such attacks, or to investigate or remediate any vulnerability or resulting breach. The risk of cyber-attacks resulting in hacker access to sensitive data may also disincentivise certain foreign investors from launching financial infrastructure in Kenya and dampen economic opportunity.

Any substantial failure of the Kenyan banking sector ICT systems or any failure by Kenyan banks to effectively manage cybersecurity and privacy risks, may affect the health of the banking sector as a whole, and therefore have a material adverse effect on Kenya's economy.

A significant portion of the Kenyan economy is not recorded.

A significant portion of the Kenyan economy is composed of the informal, or shadow, economy. Based on information from the Kenya National Bureau of Statistics, approximately 83.3% of employment in 2020, 83.6% in 2021, 83.8% in 2022, 83.5% in 2023 and 83.7% in 2024 was in the informal sector, which the Government defines as including all small-scale activities that are semi-organised, unregulated and which use low and simple technologies while employing few persons. The informal economy is not recorded and is only partially taxed, resulting in a lack of revenue for the Government, ineffective regulation, unreliability of statistical information (including the understatement of GDP and the contribution to GDP of various sectors) and inability to monitor or otherwise regulate a large portion of the economy. However, this informal sector is estimated to contribute between 20 and 40% of Kenya's GDP and is mainly composed of work conducted by young women aged between 18 to 35. Lack of effective regulation and enforcement in this sector also gives rise to other issues, including health and safety issues. Although the Government is attempting to address the informal economy by streamlining certain regulations, particularly tax laws, there can be no assurance that such reforms will adequately address the issues and bring the informal economy into the formal sector, thus having a material adverse effect on Kenya's economy. See "*The Economy—Employment and Wages*".

Furthermore, although unregulated artisanal and small-scale mining serves as an income-generating activity for some vulnerable groups in Kenya, such activity is associated with smuggling, tax evasion, health and safety risks, socio-cultural dislocation and a variety of illicit activities.

Because legal reforms in a number of areas were adopted fairly recently and are largely untested, any perceived inadequacy in the Kenyan legal system may generally deter foreign and domestic investment in Kenya and adversely affect Kenya's economy.

The justice system in Kenya is going through major changes. The reform of the legal and institutional framework includes reforms to the judiciary and the police services. Historically, Kenya's judiciary has suffered from a lack of resources and inefficiencies, and, as a result, has faced a significant backlog of cases. The judiciary and the legal system more generally are subject to a risk of politicisation and corruption which can have a material adverse impact on Kenya's investment climate and economic outlook.

With respect to the judiciary, an independent Judicial Service Commission responsible for nominating judges was established under Article 171(1) of the Constitution, and, thereafter members have been competitively appointed with the approval of Parliament. On 22 March 2011, a Judicial Service Act was enacted which established the mandate and membership of the Judicial Service Commission, created a Judiciary Fund, and regulated appointment and removal of judges, amongst other things. Judges and magistrates have undergone

public vetting, and many new judges and magistrates have been appointed to increase capacity. Infrastructure development, including the construction of new courts and the purchase of equipment, has been completed. The Chief Justice and the Deputy Chief Justice of the Supreme Court were competitively appointed with the approval of Parliament. In addition, the Government has created a Judiciary Fund which was set to be operational in 2021/2020 and covers both recurrent and development spending. In 2020/21, 2021/22, 2022/23, 2023/24 and 2024/25, Government funding to the Judiciary was KES 18.9 billion, KES 16.2 billion, KES 19.8 billion, KES 20.6 billion and KES 24.7 billion, respectively (*Source: 2024 Budget Review and Outlook Report*). Moreover, new court procedural rules have also been promulgated, which are aimed at improving efficiency. As the legal reforms in a number of areas were adopted fairly recently and are largely untested, this could lead to a perceived inadequacy in the Kenyan legal system. Such perceptions may deter foreign and domestic investment in Kenya, thereby adversely affecting the country's economy.

With respect to the police services, the Constitution has provided for major changes to security and police governance, including provisions to diminish political manipulation and increase accountability of the police. The Constitution also merged the prior two police forces (the Kenya Police Service and the Administration Police Service) into one National Police Service. During 2011 three key police reform laws were passed: the National Police Service Act, which provides for the establishment, structure, powers and operations of the police service; the National Police Service Commission Act, which makes further provisions for the functions and powers of the National Police Service Commission and the qualifications and procedures for appointment of such; and the Independent Policing Oversight Authority Act 2011, which provides for civilian oversight of the work of the police and establishes the Independent Policing Oversight Authority, as well as its functions and powers. Reforms to the police force are continuing. No assurance can be given that these reforms might not lead to increased costs for the Government and materially adversely affect Kenya's economy or effectively address the current levels of crime.

Tensions with Kenya's neighbours could disrupt the Kenyan economy and have negative consequences for Kenya in its international diplomatic and trade relations.

Kenya has in the past been involved in territorial disputes with its neighbours, and such disputes may continue. For instance, in 2008, both Kenya and Uganda claimed Migingo Island as their territory. The two countries have since taken steps to make delineation of the boundary of the lake more precise and to patrol the disputed island. In addition, in 2019, Kenya signed a memorandum of understanding with the Ugandan authorities to enable fishermen and other Lake Victoria users to access either side of Lake Victoria's boundary. However, this memorandum of understanding may be threatened by any future territorial disputes between Kenya and Uganda.

Also, Kenya has submitted to the UN Commission on the Limits of the Continental Shelf (the “**UN Commission**”) a filing on claims to mineral exploitation rights in ocean waters beyond the 200 nautical mile baseline. Somalia and Kenya are in discussion over the non-objection of their respective submissions. In addition, in 2014, Somalia instituted proceedings against Kenya before the International Court of Justice (the “**ICJ**”) with regard to the dispute concerning the location of the maritime boundary between the two countries in the Indian Ocean. Hearings proceeded in March 2021 without Kenya making oral arguments. The court rendered its judgement on 12 October 2021. In its judgment, the court rejected the claim made by Somalia, alleging that Kenya, by its conduct in the disputed area, had violated its international obligations. See “*Republic of Kenya—Border Disputes*” for more information.

In addition, structural differences between East African countries may result in a hampering of intra-regional trade due to barriers to the free movement of goods. Challenges may also include the informality of cross-border trade, poor infrastructure, and non-tariff barriers. For instance, Kenya and Uganda continue to face some non-tariff barriers that hinder smooth trade, including discriminatory excise duty imposed on Kenyan juices and interceptions of fish exports from Kenya which are in transit to the DRC. As Kenya is a manufacturing and financial hub of the region, this may limit the realisation of the potential for trade with other East African nations. While 56 trade barriers have been removed through collaborative efforts between Kenya and Tanzania, 14 remain pending.

Tensions have also increased between Kenya and its neighbour Sudan over the ongoing conflict in Sudan. See “*The Republic of Kenya—Regional Relations—Sudan*” for further information. In January 2024, Sudan recalled its ambassador to Kenya due to allegations of Kenyan interference in Sudanese internal affairs and threatening Sudanese sovereignty.

Tensions also remain with South Sudan over Kenya's border with the country. In May 2023, the Minister for Roads and Bridges of the Republic of South Sudan stated that the construction of the Nadapal-Nakodok road may not continue until the boundaries between Kenya and South Sudan are established. Border-related issues are also relevant to an ongoing lawsuit between Kenya and Rwanda regarding land in Miritini, Mombasa which was allocated to Rwanda for use as a dry dock for exports and imports.

The region may also face instability as a result of Ethiopia entering an agreement with Somaliland for access to Somaliland waters. This also impacts the Lamu Port-Southern Sudan-Ethiopia Transport project which aims to provide reliable transport for Ethiopia and South Sudan and promote trade within the region. See "*The Economy—The Lamu Port-Southern Sudan-Ethiopia Transport Corridor*" for further information on the project. Any escalation in tensions with Kenya's neighbours could materially adversely affect the Kenyan economy and have negative consequences for Kenya in its international diplomatic and trade relations.

Failure to significantly improve Kenya's infrastructure could adversely affect Kenya's economy, competitive ranking and growth prospects, including its ability to meet GDP growth targets.

Failure to improve infrastructure may impede growth of key sectors of the economy and may constrain Kenya's economic growth. The lack of infrastructure (including inadequate power supply and transportation systems) may be a significant constraint in further development in the key sectors of the economy, and Kenya's current rate of growth may decline in future periods as a result of poor infrastructure development. It may be difficult to fund further infrastructural development due to potential fiscal constraints stemming from the burden of servicing debts accrued for the purpose of funding infrastructure projects. Over the last several years, however, Kenya has made progress in the development and expansion and improvement of airports, ports, rail, pipelines, hydropower, geothermal plants, ferries, housing and public works facilities.

Certain large infrastructure projects, such as the Mombasa port, have faced significant under-investment in regional logistics which have in turn hampered the ability to foster greater intra-regional trade. Infrastructure projects also pose additional risks, including the displacement of communities living along proposed infrastructure sites, which could exacerbate the vulnerability of these communities due to loss of homes, livelihoods, and social and cultural heritage. A failure to significantly improve Kenya's infrastructure in order to support growth in the key sectors of its economy may constrain Kenya's overall economic growth and make it difficult to meet the objectives of Vision 2030, which may in turn result in a material adverse effect on Kenya's ability to meet its debt obligations, including those under the Notes. For more information on risks to growth of key sectors of the economy, see "*Risk Factors—Risks Relating to the Republic of Kenya—Kenya may be unable to meet its economic growth and reform objectives and policies which may adversely affect the performance of the Kenyan economy*".

Statistical information published by Kenya may differ from that produced by other sources and may be unreliable. Statistical information may also be more limited in scope and published less frequently than in the case of other countries such that adequate monitoring of key fiscal and economic indicators may be difficult.

The National Treasury, Kenya National Bureau of Statistics and the CBK all produce statistics relating to Kenya and its economy. Although collaborative efforts are being taken by the relevant agencies in order to produce accurate and consistent social and economic data, there may be inconsistencies in the compilation of data and methodologies used by some of these agencies, and in common with many developing economies, given the relative size of the informal economy in Kenya there may be material omissions or misstatements in the statistical data prepared by such agencies. As a result, there can be no assurance that these statistics are as accurate or as reliable as those published by more developed countries. In addition, Kenya's statistical information may also be more limited in scope and published less frequently than in the case of other countries such that adequate monitoring of key fiscal and economic indicators may be difficult.

Some of the statistics contained in this Offering Circular for 2020, 2021, 2022, 2023, 2024 and 2025 may be estimated or provisional figures that are subject to later revision. In September 2021, the Government published rebased and revised national accounts estimates from 2009 to 2016. Although there has been significant efforts to improve the compilation of Kenya's balance of payments data in recent years, including through technical assistance provided by the IMF, errors and omissions in the balance of payments data persist and may complicate the assessment of such data.

Failure to compile accurate and timely data on fiscal and economic indicators may affect how effectively Government policy is made in response to such statistical information and thus have a material adverse effect on Kenya's economic growth. Prospective investors should be aware that figures relating to Kenya's GDP, its balance of payments and other figures cited in this Offering Circular may be subject to some degree of uncertainty and that the information set forth in this Offering Circular may become outdated relatively quickly, which may result in such figures being revised in future periods.

Kenya's energy sector relies exclusively on imported oil to meet its petroleum requirements and is therefore vulnerable to oil price increases and prolonged weakness in the Kenyan shilling to US dollar exchange rate.

Kenya relies solely on imported oil to meet its petroleum requirements. Since 2021, import levels have been on a downward trend. In 2022, oil imports decreased by 7.8% to 5.9 million tonnes, and further declined by 27.1% to 4.3 million tonnes in 2024. This downward trend is primarily due to government policies promoting the use of cleaner energy sources such as liquefied petroleum gas, coupled with high taxes and levies on fuel, leading to reduced consumption. Notwithstanding the recent decrease in oil import level, a rise in the international price of oil can significantly affect Kenya's economy because, amongst other things, a higher oil price increases Kenya's imports cost and thereby increases its trade and current account deficits and exerts upward pressure on prices and inflation. In 2020, measures were taken to confirm oil reserve quality and continuity in the Ngamia and Amosing fields and the development of domestic oil reserves is expected to lead to significant product growth from 2026.

Previously, Kenya procured oil through an open tender system, under which the Government tendered online for petroleum products to be purchased every month. The oil marketing company that offered the lowest price on freight and premium won the tender and was engaged to deliver the petroleum products on behalf of the other licenced oil marketing companies. However, Kenya introduced a government-to-government oil import arrangement replacing the previous open tendering system in March 2023, as measure to help ease foreign exchange pressures. The arrangement is based on a master framework agreed between Kenya and suppliers from the Gulf that are state-owned. The arrangement provides a six-month credit for oil imports, backed by letters of credit issued by participating commercial banks. Under the arrangement, the Ministry of Energy and Petroleum centrally procures the petroleum product from the supplier through an identified seller who is responsible for opening the letter of credit and payment for the product can take place in KES. The scheme was for an initial 9 months but was extended for 12 months to December 2024. As of the date of this Offering Circular, gasoline, automotive gas oil and kerosene are imported under the government-to-government arrangement and current supply agreements, which was extended in April 2025 for another two years.

Oil prices and markets historically have been volatile, and they are likely to continue to be volatile in the future. Prices of oil are subject to wide fluctuations in response to relatively minor changes in the supply of, and demand for, oil, market uncertainty and a variety of additional factors that are beyond Kenya's control. These factors include, but are not limited to, political conditions in the Middle East and other regions, internal and political decisions of the Organisation of the Petroleum Exporting Countries ("OPEC") and other oil producing nations to decrease or increase production of crude oil, US and other international sanctions targeting oil producing countries (including Iran, Russia and Venezuela), domestic and foreign supplies of oil, consumer demand, weather conditions, domestic and foreign government regulations, transport costs, the price and availability of alternative fuels and overall economic conditions. For example, Brent crude oil prices fell below US\$21 per barrel in April 2020 and subsequently rose to above US\$68 per barrel by April 2021 due to shifts in global demand and OPEC policy. Kenya does not have a hedging policy to manage oil price risk. In August 2023, as a consequence of an increase in pump prices, the Government introduced a fuel stabilisation plan in the July-August pricing cycle, and this has continued until February 2024. The stabilisation is funded using resources from the Petroleum Development Fund (set up under the Petroleum Development Levy Order 2020). As of July 2025, the National Treasury disclosed that it could not honour a request for fuel stabilisation during the pricing cycle because the Petroleum Development Fund had been nearly depleted, leaving it insufficient to support the subsidy programme amid surging pump prices. The subsidy fund's depletion has had immediate economic consequences, leading to higher transportation and commodity costs, raising inflation, and drawing public criticism and concern about affordability. The Government's stance on fuel subsidies has not changed since the depletion of the fund in mid-2025. The Government continues to move away from consumption-based fuel subsidies. However, despite the depleted Petroleum Development Fund, fuel prices in Kenya have stabilised as a result of lower international landed costs and currency stability.

Further, international oil prices are typically denominated in US dollars and so prolonged weakness in the exchange rate of the Kenyan shilling against the US dollar will increase the local cost of petroleum and other oil-based products, even if there is no change in the international price of oil. Should oil prices increase and/or prolonged weaknesses in the Kenyan shilling against the US dollar occur, such events could have a material adverse effect on Kenya's economy.

Periodic strikes by doctors and teachers disrupt the provision of health and education services in Kenya and may lead to further increases in the public sector wage bill, which could crowd out spending in much-needed infrastructure and affect the stability of the Kenyan economy.

There have been periodic strikes by doctors, nurses and teachers, demanding increased salaries and collective bargaining agreements with unions.

In December 2020, doctors and nurses went on a strike over delayed salaries, inadequacy of personal protective equipment and health insurance during the Covid-19 Pandemic. The strike was called off in less than a week following conciliatory intervention by the Ministry of Health. On 29 February 2024, hundreds of health workers, joined by officials from the Kenya Medical Practitioners, Pharmacists and Dentists Union (the "KMPDU"), marched to the Ministry of Health and the National Treasury in Nairobi. Demonstrators protested the health ministry's failure to open internship posts for medical graduates in February 2024, which the KMPDU claimed had been agreed upon during talks with the health ministry in January. As at 15 March 2024, 27 demonstrations by health workers were recorded, nearly matching the 28 demonstrations recorded in the entire year of 2023. Similarly, intern teachers initiated their own wave of demonstrations in April and May 2024, demanding that the Teachers' Service Commission (the "TSC") pay them full salaries as permanent, pensionable employees in compliance with an order by the Employment and Labor Relations Court of Nairobi on 17 April. Similar to health workers', there has been threats for industrial actions by teachers in 2025. In a rising trend, Universal Health Coverage workers staged protests in April 2025, rejecting plans to shift their payrolls to county systems.

Most recently, university lecturers launched a nationwide strike on 17 September 2025, seeking full payment of arrears under the 2021–2025 Collective Bargaining Agreement ("CBA") and negotiation of a new pay deal. The Employment and Labour Relations Court suspended the strike on 19 September 2025, ordering conciliation, and the Government released KES 2.73 billion toward Phase 2 of the CBA, though unions deemed the offer insufficient. In November 2025, universities issued resumption notices and directed lecturers and students to return to campuses following a KES 7.8 billion settlement.

The occurrence of such strikes significantly disrupts the provision of health and education services in Kenya, and there can be no assurance that doctors, nurses and teachers will not carry out further strikes, or that strikes may not occur in other sectors. Such strikes may result in the Government having to increase wages or implement costly measures to prevent further disruption, thus increasing Government expenditure. While the wage bill has declined in recent years—from 29.8% of government revenue in 2020/21 to 23.2% in 2023/24—any further increases could crowd out spending on infrastructure and social protection. Measures to address the wage bill could include freezing public sector employment and reforming the remuneration policy. Resistance to these reforms by those most likely to be immediately affected may be followed by further protests, demonstrations and strikes. Instability in the civil service sector could affect the stability of the Kenyan economy. On the other hand, if the Government fails to implement reforms to the wage bill, the Government's fiscal position could deteriorate and the Kenyan economy may be materially adversely affected.

Changes in monetary policies in developed markets may cause capital outflows from emerging and frontier markets and may generate a negative impact on emerging and frontier economies, such as Kenya.

Changes in monetary policies in developed markets outside the control of Kenyan policymakers may cause capital outflows from emerging and frontier markets and may generate a negative impact on emerging and frontier economies, such as Kenya. Of significance, short-term private capital flows, a large source of financing for Kenya's capital and financial account, may decline if developed markets scale back expansionary monetary policy measures. This would adversely affect the funding of Kenya's current account deficit. A portfolio shift to larger economies with increasing yields could lead to a depreciation of the Kenyan shilling and increase exchange rate volatility. Higher volatility in the exchange rate could bring uncertainty in the currency market. Faced with uncertainty, investors tend to postpone making investment decisions, which could lead to less investment in the economy and have a material adverse effect on Kenya's economy.

Power shortages, over-dependence on hydropower and high energy costs may negatively impact economic growth.

The issue of power blackouts and unreliable electricity supply in Kenya continues to be exacerbated by high transmission and distribution losses. As of December 2024, total system losses surged to approximately 23.65%, up from 23.16% in mid-2024. During the second half of 2024, average system losses stood at 24.2%, exceeding the Energy and Petroleum Regulatory Authority's permissible threshold of 17.5% by 6.7 percentage points. In the financial year ended June 2025, total system losses averaged 23.36%, and as of February 2026, electricity losses have further dropped to 21.7%.

According to the International Trade Administration, about 84% of the population has access to electricity. Assistance from, amongst others, the Development Partners, African Development Bank, World Bank and the Global Partnership of Output Based Aid have greatly contributed to the development of Kenya's electricity network. Nevertheless, lack of reliable electricity supply remains a serious impediment to Kenya's economic growth and development. Insufficient power generation, aging or insufficient infrastructure, high initial investment costs, inadequate funding and weak distribution networks result in occasional power outages, inadequate generation and transmission capacity, high transmission and distribution losses and power rationing, particularly during the dry season. For example, in late 2023, successive nationwide power blackouts took place with the most recent blackout in December 2023 disrupting two terminals of Nairobi airport where back-up power generators failed to activate. Droughts have also impacted electricity generation as Kenya depends on hydropower generation for much of its power generation capacity (approximately 838.9 megawatts of total power generation in 2022), with geothermal capacity accounting for approximately 871 megawatts in 2022.

The deterioration in power supply reliability is reflected in worsened interruption metrics. The System Average Interruption Duration Index (SAIDI) averaged 9.15 hours per month, well above EPRA's cap of 3.25 hours, while the Customer Average Interruption Duration Index (CAIDI) was 2.56 hours per interruption, exceeding the 2.45-hour limit. The System Average Interruption Frequency Index (SAIFI) also rose to 3.57 interruptions per customer per month, more than double the threshold of 1.63. These challenges stem from both technical and commercial factors—aging infrastructure, expanded distribution networks, meter tampering, illegal connections—and are further aggravated by vandalism and the strain of integrating variable renewable energy.

Kenya's Vision 2030 seeks to achieve universal access to electricity by 2030. The Government's LCPDPs for 2022-2041 set out a series of recommendations and plans to develop Kenya's renewable energy capabilities, and to improve its energy infrastructure to meet the country's energy demands. See "*The Economy—Increasing Electricity Availability through Power Generation*". In December 2023, Davis Chirchir, Kenya's Energy Minister, announced that Kenya would be considering scheduled power outages known as "load shedding" as a method for managing blackouts, as well.

No assurance can be given that Kenya will be able to improve the power sector effectively, or that the improvements will not cost significantly more than estimates. While the Government intends to develop the transmission network to minimise transmission distances and losses, it may not be able to adequately finance these initiatives to achieve its targets or meet socio-economic and environmental sustainability concerns. Failure to address adequately the significant deficiencies in Kenya's power generation, transmission and distribution infrastructure could lead to lower GDP growth and reduce the country's ability to attract investment, thereby causing a material adverse effect on Kenya's economy.

Health risks could adversely affect Kenya's economy.

Total disease incidences as reported by public health authorities decreased by 6.9% from 94.3 million in 2021 to 87.8 million in 2022. Respiratory system diseases were the leading cause of morbidity at 19.5% of all disease instances in 2022.

Most recently, the temporary closure of the United States Agency for International Development (USAID) may pose notable risks for Kenya. This decision has led to the suspension of services responsible for transporting essential drugs, resulting in a disruption of the health supply chain, particularly affecting the Northern, Northeast, and Savannah regions.

HIV/AIDS, tuberculosis (which is exacerbated in the presence of HIV/AIDS) and malaria are major healthcare challenges in Kenya and other East African countries. However, according to estimates from the World Health

Organisation, national HIV prevalence of adults aged 15-49 years has shown a consistent decline, decreasing from 4.2% in 2019 to 4.1% in 2020, 3.9% in 2021, 3.8% in 2022, and 3.7% in 2023.

Incidences of tuberculosis infections are predominantly opportunistic infections occurring in individuals with compromised immune systems as a result of HIV. Tuberculosis deaths remain a challenge for Kenya due to a number of reasons such as malnutrition, late diagnosis, and HIV co-infection. In 2024–2025, Kenya experienced a 41% decline in tuberculosis incidence since 2015, yet it remains a high-burden on the country with approximately 130,000 annual cases. While tuberculosis-related deaths dropped by 66%, significant challenges persist, including over an estimated 28,000 missed diagnoses in 2024 and rising drug-resistant tuberculosis, requiring enhanced AI diagnostics and community screening.

Malaria continues to exert a heavy toll. The Kenya Malaria Policy 2024 notes that approximately 6 million cases are reported annually, with approximately 70% of the population living in areas at risk of malaria transmission. While nationwide malaria prevalence has decreased from 14.9% in 2019 to 11.7% in 2022, the number of confirmed cases has been increasing since 2021. Confirmed cases of malaria in Kenya rose from approximately 4.3 million in 2021 to 4.9 million in 2022, representing a 14% increase, and further increased to 5.6 million in 2023, representing an approximately 14.3% increase from the previous year. The western and Nyanza Lake endemic zones continue to bear the greatest burden of malaria, where many Kenyans live, with a significant majority of them being under the age of 15.

Since October 2022, Kenya has been facing an outbreak of cholera with 17 of the 47 counties on high alert in April 2023. The outbreak has been concentrated in the northern regions and was triggered by the impact of prolonged and severe droughts. In February 2023, the Kenyan health authorities launched the cholera vaccination drive to control the outbreak and targeted 2.2 million people in the four worst-affected counties.

Kenya also faces ongoing health system data limitations—most notably, the official maternal mortality rate for 2023 and 2024 remain unconfirmed amid conflicting figures, with the National Bureau of Statistics now tasked with delivering reliable data.

There can be no assurance that the high prevalence rate of HIV/AIDS, tuberculosis, malaria, cholera or other diseases or the possible spread of diseases across the African continent into Kenya will not have a material adverse effect on the economy of Kenya and its ability to service its debt, including the Notes.

Risks Relating to the Notes

Events in other emerging markets, including those in other African countries, may negatively affect the Notes.

Economic distress in any emerging market country may adversely affect prices of securities and the level of investment in other emerging market issuers as investors move their money to more stable, developed markets. Financial problems or an increase in the perceived risks associated with investing in emerging market economies could dampen foreign investment in Kenya, adversely affect the Kenyan economy or adversely affect the trading price of the Notes. Even if the Kenyan economy remains relatively stable, economic distress in other emerging market countries could adversely affect the trading price of the Notes and the availability of foreign funding sources for the Government. Adverse developments in other countries in sub-Saharan Africa, in particular, may have a negative impact on Kenya if investors perceive risk that such developments will adversely affect Kenya or that similar adverse developments may occur in Kenya. Risks associated with sub-Saharan Africa include political uncertainty, civil unrest and conflict, corruption, the outbreak of diseases and poor infrastructure. Investors' perceptions of certain risks may be compounded by incomplete, unreliable or unavailable economic and statistical data on Kenya, including elements of the information provided in this Offering Circular. See *“Statistical information published by Kenya may differ from that produced by other sources and may be unreliable. Statistical information may also be more limited in scope and published less frequently than in the case of other countries such that adequate monitoring of key fiscal and economic indicators may be difficult”*.

The Notes have amortising redemption features.

The Notes have amortising obligations. Principal on the 2034 Notes is scheduled to be repaid in three equal instalments of US\$300,000,000 on 26 February 2032, 26 February 2033 and 26 February 2034 and principal on the 2039 Notes is scheduled to be repaid in three equal instalments of US\$450,000,000 on 26 February 2037, 26 February 2038 and 26 February 2039. Holders of the Notes may only be able to reinvest any amounts they

receive upon such amortisation in lower-yielding securities than the Notes. Prospective investors should consider the reinvestment risk in light of other investments available at the relevant time.

Credit ratings may not reflect all risks.

The Notes are assigned a rating of B by S&P and B- by Fitch. In January 2026, Moody's Ratings ("Moody's") upgraded its assessment of Kenya's debt, raising its rating to B3 and citing a reduced risk of default in the near-term. These ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above and other factors that may affect the value of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency. A credit rating is generally dependent on a number of factors, including public debt levels, past and projected future budget deficits and other considerations. Any adverse change in the credit ratings of the Notes, or of the Issuer, could adversely affect the trading price of the Notes.

Investors regulated in the UK are subject to restrictions under the UK CRA Regulation. As such, UK regulated investors are required to use for UK regulatory purposes ratings issued by a credit rating agency established in the UK and registered under the UK CRA Regulation. In the case of ratings issued by third country non-UK credit rating agencies, third country credit ratings can either be: (a) endorsed by a UK registered credit rating agency; or (b) issued by a third country credit rating agency that is certified in accordance with the UK CRA Regulation. Note this is subject, in each case, to (a) the relevant UK registration, certification or endorsement, as the case may be, not having been withdrawn or suspended, and (b) transitional provisions that apply in certain circumstances. In the case of third country ratings, for a certain limited period of time, transitional relief accommodates continued use for regulatory purposes in the UK, of existing pre-2023 ratings, provided the relevant conditions are satisfied.

European regulated investors are similarly restricted under the Regulation (EC) No. 1060/2009 (the "**CRA Regulation**") from using credit ratings for regulatory purposes in the EEA, unless such ratings are issued by a credit rating agency established in the EEA and registered under the CRA Regulation (and such registration has not been withdrawn or suspended), subject to transitional provisions that apply in certain circumstances. Such general restriction will also apply in the case of credit ratings issued by third country non-EEA credit rating agencies, unless the relevant credit ratings are endorsed by an EEA-registered credit rating agency or the relevant third country rating agency is certified in accordance with the CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). The list of registered and certified rating agencies published by ESMA on its website in accordance with the CRA Regulation is not conclusive evidence of the status of the relevant rating agency included in such list, as there may be delays between certain supervisory measures being taken against a relevant rating agency and the publication of the updated ESMA list.

If the status of the rating agency rating the Notes changes for the purposes of the CRA Regulation or the UK CRA Regulation, relevant regulated investors may no longer be able to use the rating for regulatory purposes in the EEA or the UK, as applicable, and the Notes may have a different regulatory treatment, which may impact the value of the Notes and their liquidity in the secondary market. Certain information with respect to the credit rating agencies and ratings is set out on the cover of this Offering Circular.

The liquidity of the Notes may be limited and trading prices may fluctuate.

The Notes have no established trading market. While application has been made to admit the Notes to trading on the London Stock Exchange's main market and any one or more of the Joint Bookrunners may make a market in the Notes, they are not obliged to do so and may discontinue any market making, if commenced, at any time without notice. There can be no assurance that a secondary market will develop for the Notes or, if a secondary market does develop, that it will continue. If the Notes are traded after their initial issuance, they may trade at a discount to their initial offering prices, depending upon prevailing interest rates, the market for similar securities, general economic conditions and the financial condition of Kenya.

Fluctuations in exchange rates and interest rates may adversely affect the value of the Notes.

The Issuer will pay principal and interest on the Notes in US dollars. This presents certain risks relating to currency conversions if an investor's financial activities are denominated principally in a currency or currency unit (the "**Investor's Currency**") other than US dollars. These include the risk that exchange rates may

significantly change (including changes due to devaluation of the US dollar or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the US dollar would decrease the equivalent Investor's Currency yield on the Notes, the Investor's Currency equivalent value of the principal payable on the Notes and the Investor's Currency equivalent market value of the Notes.

Government and monetary authorities (including where the investor is domiciled) may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, investors may receive less interest or principal than expected, or no interest or principal. In addition, investment in the Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Notes.

Definitive Notes not denominated in an integral multiple of US\$200,000 or its equivalent may be illiquid and difficult to trade.

The Notes have denominations consisting of a minimum of US\$200,000 plus integral multiples of US\$1,000 in excess thereof. It is possible that the Notes may be traded in amounts that are not integral multiples of US\$200,000. In such a case, a holder who, as a result of trading such amounts, holds an amount which is less than US\$200,000 in their account with the relevant clearing system would not be able to sell the remainder of such holding without first purchasing a nominal amount of Notes at or in excess of US\$200,000 such that its holding amounts to US\$200,000. Further, a holder who, as a result of trading such amounts, holds an amount which is less than US\$200,000 in their account with the relevant clearing system at the relevant time may not receive a Certificate in respect of such holding (should Certificates be printed) and would need to purchase a nominal amount of Notes at or in excess of US\$200,000 such that its holding amounts to US\$200,000.

If Certificates are issued, holders should be aware that Certificates which have a denomination that is not an integral multiple of US\$200,000 may be illiquid and more difficult to trade than Notes denominated in an integral multiple of US\$200,000.

The terms of the Notes may be modified, waived or substituted without the consent of all the holders of the Notes.

The Terms and Conditions of the Notes contain provisions for convening meetings of holders of the Notes to consider matters affecting their interests and for the passing of written resolutions of holders without the need for a meeting. Such provisions are commonly referred to as "collective action clauses". The provisions permit defined majorities to bind all holders of the Notes including any such Noteholders who did not attend and vote at the relevant meeting or sign the relevant written resolution and any such Noteholders who voted in a manner contrary to the majority.

In addition, the Terms and Conditions of the Notes permit "cross-series modifications" to be made to more than one series of debt securities, provided that each affected series of debt securities also contains a cross-series modification provision. Under certain circumstances, including the satisfaction of the Uniformly Applicable condition (as more particularly described in the Terms and Conditions), such cross-series modification may be made to more than one series of debt securities with the approval of the applicable percentage of the aggregate principal amount of the outstanding debt securities of all affected series and without requiring the approval of a particular percentage of the holders of any individual affected series of debt securities.

There is therefore a risk that the terms of the Notes may be modified in circumstances where the holders of debt securities approving the modification may be holders of different series of debt securities and the majority of Noteholders would not necessarily have approved such modification. In addition, there is a risk that the provisions allowing for aggregation across multiple series of debt securities may make the Notes less attractive to purchasers in the secondary market and adversely affect the market value of the Notes in circumstances where such modification or a proposal for such modification is expected to be made by the Issuer.

The Terms and Conditions of the Notes also provide that the Notes, their terms and conditions and the provisions of the Agency Agreement (as defined in the Terms and Conditions) may be amended without the consent of the Noteholders for the purpose of curing any ambiguity or of curing, correcting or supplementing any manifest or proven error or any other defective provision contained therein or in any other manner which is, in the sole opinion of the Issuer, not materially prejudicial to the interests of the Noteholders.

The Conditions restrict the ability of an individual holder to declare an Event of Default, and permit a majority of holders to rescind a declaration of such an Event of Default.

The Conditions contain a provision which, if an Event of Default occurs, allows the holders of not less than 25% in aggregate principal amount of the outstanding series of Notes to declare all of the Notes of that series to be immediately due and payable by providing notice in writing to the Issuer, whereupon the principal, interest and all additional amounts payable on the relevant series of Notes will become immediately due and payable on the date on which the Issuer receives written notice of the declaration as aforesaid.

The Conditions also contain a provision permitting the holders of at least 50% in aggregate principal amount of the outstanding series of Notes to notify the Issuer to the effect that the Event of Default or Events of Default giving rise to any above-mentioned declaration is or are cured following any such declaration and that such holders wish the relevant declaration to be withdrawn. The Issuer shall give notice thereof to the Noteholders of such series of Notes, whereupon the relevant declaration shall be withdrawn and shall have no further effect.

The Issuer is not required to effect equal or rateable payment(s) with respect to its other debt obligations pursuant to the Conditions, and is not required to pay other debt obligations at the same time or as a condition of paying sums on the Notes and vice versa.

In accordance with Condition 3 (*Status*), the Notes will at all times rank *pari passu* with all other present and future unsecured obligations of the Issuer. However, the Issuer shall have no obligation to effect equal or rateable payment(s) at any time with respect to any such other unsecured obligations of the Issuer and, in particular, shall have no obligation to pay other unsecured obligations at the same time or as a condition of paying sums due on the Notes and vice versa. Accordingly, the Issuer may choose to grant preferential treatment to, and therefore prioritise payment obligations to, other unsecured creditors of the Issuer as payments fall due.

Kenya is a sovereign state and, accordingly, it may be difficult to obtain or enforce judgments or arbitral awards against it.

Kenya is a sovereign state and has waived only certain immunities and has not submitted to the jurisdiction of any court outside Kenya, but instead it has agreed to resolve disputes by arbitration in accordance with rules and procedures of the LCIA. As a result, an LCIA arbitration proceeding is the exclusive forum in which a holder may assert a claim against Kenya. In addition, it may not be possible for investors to effect service of process upon Kenya within their own jurisdiction, obtain jurisdiction over Kenya in their own jurisdiction or enforce against Kenya judgments or arbitral awards obtained in their own jurisdiction. See “*Enforcement of Civil Liabilities*” and Condition 16(b) (*Arbitration*).

The value of the Notes could be adversely affected by a change in English law or administrative practice.

The Terms and Conditions of the Notes are based on English law in effect as at the date of this Offering Circular. No assurance can be given as to the impact of any possible judicial decision or change to English law or administrative practice after the date of this Offering Circular and any such change could materially adversely impact the value of any Notes affected by it.

USE OF PROCEEDS

Kenya intends to apply the net proceeds of the issue of the Notes towards the repayment of the outstanding debt of Kenya, including to purchase a portion of its US\$1,200,000,000 8.000 per cent. Amortising Notes due 2032 (the “**2032 Notes**”) and US\$1,000,000,000 7.250 per cent. Notes due 2028 (the “**2028 Notes**”) which have been accepted for purchase by Kenya in the tender offer announced by Kenya on 18 February 2026 (the “**Tender Offer**”). In addition, if the principal amount of the Notes exceeds the aggregate amount of the 2032 Notes and/or the 2028 Notes repurchased in the Tender Offer, the Republic intends to utilise the balance for general budgetary purposes, which may include the refinancing of other external indebtedness.

REPUBLIC OF KENYA

Location and Geography

Kenya occupies a land area of 580,876.3 square kilometres on the equator and is bordered by the Indian Ocean to the southeast, Tanzania to the south, Uganda to the west, South Sudan to the northwest, Ethiopia to the north and Somalia to the northeast. Kenya is divided into 47 semi-autonomous counties that are headed by governors who are elected in the general elections held every five years in accordance with the Constitution of Kenya, 2010. Nairobi is the capital city of the country.

Kenya has a warm and humid climate along its Indian Ocean coastline, with wildlife-rich savannah grasslands inland towards the capital. Nairobi has a cool climate that gets colder approaching Mount Kenya. Further inland, there is a warm and humid climate around Lake Victoria and temperate forested and hilly areas in the western region. The north-eastern regions along the border with Somalia and Ethiopia are arid and semi-arid areas with near-desert landscapes. Lake Victoria, the world's second largest fresh-water lake and the world's largest tropical lake, is situated to the southwest; Kenya, Uganda and Tanzania share its border.

The "long rains" season occurs from March to May. The "short rains" season occurs from October to December. The rainfall is sometimes heavy and often falls in the afternoon and evening. The temperature remains high throughout these months of tropical rain. The hottest periods are February and March, leading into the season of long rains, and the coldest periods are in July and August. In recent years, Kenya has also experienced major droughts and flooding. (*See "Risk Factors—The impact of climate change has negatively affected Kenya in the past and may negatively affect it in the future."*).

Kiswahili and English are both official languages in Kenya. Kiswahili is the national language.

Border Disputes

The Maritime Border with Somalia

Kenya has a long-running boundary dispute with Somalia concerning the location of the maritime boundary between the two countries in the Indian Ocean. On 6 May 2009, Kenya submitted information to the UN Commission on the boundary limits of the continental shelf beyond 200 nautical miles from the baselines from which the breadth of the territorial sea is measured. The submission was intended to give Kenya the right to explore and exploit mineral resources in this additional territory under the United Nations Convention on the Law of the Sea. On 28 August 2014, Somalia started proceedings against Kenya before the ICJ regarding the boundary dispute. Somalia contended that both countries disagree about the location of the maritime boundary in the area where their maritime entitlements overlap. Somalia requested that the ICJ determine the complete course of the single maritime boundary dividing all the maritime areas appertaining to Somalia and Kenya in the Indian Ocean and for the ICJ to determine the precise geographical co-ordinates of the single maritime boundary in the Indian Ocean, including the continental shelf beyond 200 nautical miles. On 7 October 2015, Kenya raised preliminary objections to the jurisdiction of the Court and the admissibility of the Application by

Somalia. In February 2017, the Court rendered its decision on the preliminary objections and dismissed the preliminary objections. The Court determined that it had authority to hear the full case. The hearing took place in between 15 and 18 March 2021. Kenya declined to participate in the proceedings, citing that new counsel was introduced on record and needed to be given proper instructions and they did not want to proceed without proper representation. The hearing therefore proceeded without Kenya making its oral arguments, solely on the basis of the written proceedings submitted by Kenya.

The ICJ delivered its decision on the merits of the case on 12 October 2021 by which it determined the maritime boundary between Somalia and Kenya. In its judgment, the court rejected the claim made by Somalia, alleging that Kenya, by its conduct in the disputed area, had violated its international obligations.

Migingo Island

Migingo is a 2,000-square-metre (half-acre) island in Lake Victoria. In 2008, both Kenya and Uganda claimed the island as part of their territory. The basis for the dispute revolves primarily around the lucrative fishing rights associated with the island, mostly for valuable Nile perch. In July 2009, the Ugandan government stated that, while Migingo Island was in fact part of Kenya, much of the waters near the island were Ugandan territory.

In April 2009, the Ugandan flag on the island was lowered and Ugandan security personnel withdrew from the island. A joint re-demarcation line of the border was launched on 2 June 2009 to recover and to place survey markers on land, making delineation of the boundary on the lake more precise. The two countries have established a joint technical experts committee to demarcate the borderline along the island. The committee has held several meetings aimed at concluding the exercise. In August 2016, Kenya and Uganda announced a joint taskforce comprising police from both countries that will patrol the disputed island and the entire common border. In 2019, Kenya signed a memorandum of understanding with Uganda, which has enabled fishermen and other Lake Victoria users to access either side of the boundary. The joint taskforces remain united under one island, despite the ongoing dispute over the ownership of the island.

Ilemi Triangle

The Ilemi Triangle is an area of disputed land in East Africa, measuring between 10,320 and 14,000 square kilometres (3,985 and 5,405 square miles). The territory borders Ethiopia, and both South Sudan and Kenya have claimed the territory. However, since its independence, Kenya, has had *de facto* control of the area.

History

In 1890, Britain established the East Africa Protectorate, which became a crown colony in 1920, by the name of the Colony and Protectorate of Kenya. Organised resistance to colonial rule emerged in the 1920s, intensified in the 1940s, and became violent in 1952, following the formation of the Mau Mau Resistance movement. After nearly eight decades of British colonial rule, Kenya gained independence in 1963 and became a republic a year later. Jomo Kenyatta, an icon of the struggle for liberation, became Prime Minister, and later, its President, from independence in 1963 until his death in 1978, when President Daniel Moi took power in a constitutional succession. The country was a *de facto* one-party state from 1969 until 1982 when the ruling Kenya African National Union (“KANU”) made itself the sole legal party in Kenya. President Moi retired in December 2002 following democratically held elections. Mwai Kibaki ran as the candidate of the multi-ethnic, united opposition group, the National Rainbow Coalition (“NARC”) and defeated KANU candidate Uhuru Kenyatta (the son of founding President Jomo Kenyatta) with a successful anti-corruption campaign. Kibaki assumed the presidency in 2002. His NARC coalition splintered in 2005 over a constitutional review process. Government defectors joined with KANU to form a new opposition coalition, the Orange Democratic Movement (“ODM”), which defeated the Government’s draft constitution in a referendum in November 2005. President Kibaki’s re-election in December 2007 brought charges of vote rigging from ODM candidate Raila Odinga, resulting in two months of violence in which it is estimated that 1,133 people died. The African Union conducted mediation, led by former UN Secretary General Kofi Annan, in late February 2008. Through this mediation process, the parties agreed to a power-sharing accord bringing Mr. Odinga into the Government as Prime Minister.

The power-sharing accord included a broad reform agenda, the centrepiece of which was constitutional reform. In August 2010, Kenya promulgated a new Constitution following a national referendum. The Constitution introduced a bill of rights for Kenyan citizens, and significant devolution of power and resources to 47 newly created counties. It also abolished the position of Prime Minister and the first presidential elections were held

under the Constitution on 4 March 2013. There were allegations of voting irregularities; however, the 2013 elections were not marred by violence. Uhuru Kenyatta won in the first round by a close margin, and the newly constituted Supreme Court dismissed the opposition's petition against the election results. Uhuru Kenyatta was sworn into office on 9 April 2013. Uhuru Kenyatta was re-elected as President in August 2017; however, the election results were annulled by the Supreme Court, which cited irregularities in the votes and it ordered re-elections to be held. The October 2017 re-election was boycotted by the opposition, the National Super Alliance ("NASA") led by Raila Odinga. Voter turnout for the election was significantly lower than for the August 2017 elections. Uhuru Kenyatta was re-elected in the October 2017 re-election and the results were again challenged in the Supreme Court. In November 2017, the Supreme Court ruled the petitions were without merit and declared that Uhuru Kenyatta had been validly re-elected as President and he was subsequently sworn in as President of Kenya. In March 2018, Raila Odinga officially recognised Uhuru Kenyatta as President of Kenya and the two released a joint press statement promising reconciliation and collaboration on economic and political reforms.

See "Risk Factors—Risks Relating to the Republic of Kenya—Investing in securities of emerging market countries such as Kenya poses a greater degree of risk than investment in more mature market economies because the economies in emerging markets are more susceptible to destabilisation resulting from domestic and international developments."

On 9 August 2022, general elections were held in Kenya to elect, among others, the President of the Republic of Kenya for a five-year term as prescribed by the Constitution. The Chairperson of the Independent Electoral and Boundaries Commission (the "IEBC") declared William Samoei Ruto as the President-elect and Rigathi Gachagua, as the Deputy President having been satisfied that the terms of Article 138(4) of the Constitution had been met. The Chairperson of the IEBC issued Gazette Notice No. 9773 of 16 August 2022 to formalise the declaration. The said declaration precipitated the institution and filing of nine Presidential Election Petitions challenging among other issues: (i) whether the technology deployed by the IEBC for the conduct of the 2022 General Elections met the standards of integrity, verifiability, security, and transparency to guarantee accurate and verifiable results; (ii) whether there were unexplainable discrepancies between the votes cast for Presidential candidates and other elective positions; and (iii) whether the declared President-elect attained requisite majority of votes cast in accordance with Article 138(4) of the Constitution.

The Supreme Court upon scrutiny of the evidence supplied by the petitioners, held that the election of William Samoei Ruto as President is valid under Article 140(3) of the Constitution. William Samoei Ruto was sworn in as President of Kenya on 13 September 2022.

The decision of the Supreme Court went against the opposition leader, Hon. Raila Odinga who mobilised his supporters to take part in a series of violent demonstrations which also protested against the rising cost of living, high tax rates, joblessness among the youth, and other political and socio-economic issues. The President and Raila Odinga came together to address the issues and formed the National Dialogue Committee which sought to end the demonstrations. In 2023, the National Dialogue Committee published a report that provided recommendations which included auditing of the election process, restructuring of the IEBC to ensure that minority perspectives, electoral law reforms to increase the timeline within which the Supreme Court can hear presidential election petitions and proposals to lower the cost of living by reducing some taxes and Government expenditure. Additionally, the National Dialogue Committee report recommended the transfer of the role of settlement of electoral disputes from IEBC to the Political Parties Disputes Tribunal in order to give IEBC room to discharge its core mandate effectively.

Protests in 2024 and 2025

In May 2024, widespread protests, mainly led by young Kenyans using social media, took place in response to unpopular tax hikes in the Finance Bill 2024. Demonstrations began on 18 June, leading to arrests and national condemnation. Parliament amended and passed the bill on 25 June 2024, but violent clashes occurred when protestors stormed Parliament. President Ruto, facing public outcry, withdrew the bill the following day and later reshuffled his cabinet to include opposition members. Despite the bill's withdrawal, unrest continued, escalating into riots in July 2024.

In October 2024, former Deputy President Rigathi Gachagua was impeached for corruption, inciting ethnic divisions and supporting anti-government protests and was replaced by Kithure Kindiki. In June 2025, new youth-led protests broke out after a blogger died in police custody, echoing the previous year's unrest. Large

commemorative protests on 25 June 2025 led to further clashes and a temporary adjournment of Parliament. Protests resumed on 7 July 2025, aligning with Saba Saba Day. There have been ongoing commemorations and public demonstrations honouring victims of the protests, while also calling for justice and reforms.

Kenya’s next general elections are set for August 2027.

Energy

Supply

The main source of energy in Kenya is biomass, accounting for 69% of the primary energy consumption, followed by petroleum at 22% and electricity 9%. Other forms of energy in use include solar, hydro, biogas, thermal and wind. National Energy Policy 2025-2034 indicates that as at December 2024, the interconnected installed capacity was 3,811.6 megawatts, accounting for national electricity access rate of approximately 75%, with 90% and 68% access in urban and rural areas respectively. Electricity access rate is estimated at about 9,800,000 customers connected to the national grid as at June 2025, representing an increase of 44% from 6,700,000 customers in June 2018. The peak demand in the financial year 2024/2025 was registered as 2,316 megawatts, a 27% increase from 2018. The Muhoroni power station has been restored recently by the Government, injecting an additional 60 megawatts to the grid which is expected to improve access in western Kenya and further improve the capability and reliability. Further improvement in electricity access is to be facilitated by the Government with the Cabinet Secretary announcing Government plans to establish a new power substation at Thurdibuoro in Nyakach in Kisumu County, start the construction of the Sondu-Ndhiwa electricity transmission line and upgrade the Gogo hydro-power station in Migori from 2 megawatts to 8 megawatts. All of this is geared towards improving power generation and ending perennial blackouts. Interventions from the development partners, mainly the African Development Bank, the World Bank, European Investment Bank, the EU and Japan International Cooperation Agency through the Last Mile Connectivity project and Global Partnership of Output Based Aid have greatly contributed to growth in access.

The Power Transmission Network is currently operating at 132 kilo Volts (“kV”), 220 kV, 400 kV & 500kV. The size of transmission network (500kV, 400kV, 220kV and 132kV) by circuit length is approximately 9,484 km. The distribution network comprises an approximate medium voltage network with a length of approximately 15,149 km. The total system losses, including both technical and commercial, was 23.5% in the financial year 2023/2024 due to technical and commercial factors arising from the expanded transmission and distribution network. The System Average Interruption Frequency Index and Customer Average Interruption Duration Index are estimated to be below international standards, at 3.57 hours per month and 2.56 hours per month, respectively, during the financial year 2024/2025. The energy sector is working towards minimizing these losses and improving system reliability by implementing transmission and distribution projects from 2,919 megawatts in 2021 to 8,920 megawatts in 2041.

Electricity demand is projected to grow to 9,130 megawatts by 2,043 according to the LCPDP. The Government plans to expand the generation capacity to meet this demand and the transmission network to 8,644 km by 2040. Renewable energy will continue playing a dominant role in the supply of energy accounting for about 94% of the energy dispatched. The Government plans to expand the generation capacity to meet this demand and the transmission network to 12,672 km by 2041. To achieve the increased demand, the Least Cost Power Development Plan (“LCPDP”) 2022-2041 aims for generation coming from geothermal, hydro, solar and wind with development by public and private sector actors. In 2021, The Ministry restructured the Feed In Tariff Policy for small renewable energy projects and the Renewable Energy Policy for wind and solar projects. Future electricity supply plans are expected to remain focussed on increasing renewable components and flexible generation through hydroelectric sources. This is central in achieving the country’s development agenda under the Vision 2030 and the BETA (See “*The Economy - The Bottom-up Economic Transformation Agenda*”).

The following table presents Kenya’s installed and effective/contracted electricity-producing capacity as at 30 June 2025.

Technology	Installed			Effective /Contracted		
	Interconnected Capacity (megawatts)		Captive Capacity (megawatts)	Off grid Capacity	Total Installed Capacity	% Total Installed
	Installed				Effective	
Geothermal.....	940.0	876.1	3.7		943.7	25.92
Hydro	839.5	809.7	33.0	0.1	872.5	23.97

Technology	Installed		Effective /Contracted			
	Interconnected Capacity (megawatts)	Captive Capacity (megawatts)	Off grid Capacity	Total Installed Capacity	% Total Installed	
				Effective		
	Installed		Effective			
Thermal	564.8	558.4	21.3	41.0	627.1	17.22

WHRC	-	-	83.5		83.5	2.29
Total	3,192.0	3,082.0	603.8	45.0	3840.8	100.00%

Source: Ministry of Energy & Petroleum.

Geothermal energy accounts for the largest portion of Kenya’s installed capacity, at 25.92%. Hydro and thermal power follow, with 23.97% and 17.22% respectively. Solar photovoltaic systems and wind generation contribute 14.12% and 11.98% to the total installed capacity as at 30 June 2025.

Currently, there is limited cross-border power supply between Kenya and Uganda and Tanzania. In 2021, the connection between Kenya and Ethiopia was energised and Kenya is currently importing 200 megawatts with an aim to import 400 megawatts in 2026. There are several regional interconnectors under implementation. These will increase and facilitate regional power trade. The lines are 400kV Kenya - Tanzania interconnector, 400kV Kenya – Uganda interconnector and the 500kV HVDC Kenya – Ethiopia interconnector.

Government strategy

The Ministry of Energy undertakes long-term electricity planning through an annual 20-year rolling LCPDP the latest of which is for 2022-2041.

The LCPDP projects that demand for electricity will grow from 12,416 gigawatt hours (“GWh”) in 2021 to 34,321 GWh in 2041, with the corresponding peak demand increasing from 2,036 megawatts in 2021 to 5,757 megawatts in 2041. This will be supplied with generation originating from geothermal, hydro, solar and wind sources that are under development by the public and private sectors.

A total of 12,672 kilometres in circuit length of power transmission lines and 18,497 MVA in substation capacity will be constructed in addition to the construction of a modern National Load Dispatch and Control Centre. In addition, the distribution footprint will entail the construction of 116 new primary distribution substations with a distribution capacity of 2,809 MVA and 1,244 kilometres of associated 66kV and 33kV lines, 20 new bulk supply substations and installation of 336.5 megavolt ampere of reactive power (“MVAR”) reactive power compensation equipment in 15 transmission substations.

The Government in achieving its target of universal access of electricity by the year 2030. The Last Mile Connectivity and KOSAP project involves expansion of the national power distribution grid and development of off-grid solutions to achieve this goal. However, there can be no assurance that the Government will meet such target as a result of possible challenges including inadequate financing to achieve the targets and difficulties in meeting the socio-economic and environmental sustainability concerns. This could slow down economic growth given the importance of the sector to industrial development.

See “*The Economy—Oil and Gas—Renewable Energy*” for details regarding renewable energy policies.

Population

According to the 2019 census, Kenya had an estimated population of approximately 47.5 million in 2019, of which 23.54 million were male and 24.01 million were female, accounting for 50.5% of the total population.

The five largest ethnic groups are Kikuyu, Luhya, Kalenjin, Luo and Kamba, while the five smallest ethnic groups are Dahalo, El Molo, Konso, Gosha and Wayyu.

Population density is estimated at approximately 82 people per square kilometre according to the 2019 census, with approximately 28% of the population living in urban areas. Nairobi, the capital of the country and its largest city, has an estimated population of 4.3 million according to the 2019 census.

The following table sets out selected comparative socio-economic indicators for 2024 for Kenya and for certain other countries in the region.

	Per capita GDP (in current prices US\$) ⁽¹⁾	Life Expectancy (in years) ⁽²⁾	Adult Literacy Rate ⁽³⁾	Doing Business Ranking ⁽⁴⁾	Debt/GDP ⁽⁵⁾ (% of GDP)
Ghana	2,390.8	65.7	80	118	61.8
Kenya	2,132.4	63.8	83	56	64.5
Tanzania	1,186.7	67.2	82	141	48.2
Uganda	1,077.9	68.5	81	116	52.1
Rwanda.....	999.7	68	76	38	78.7

Public Health

Kenya’s public health policy is to achieve the highest attainable standard of health in a manner responsive to the needs of the population. Under the current health sector structure, the sector is composed of the Ministry of Health and eight semi-autonomous Government agencies, which provide the Ministry of Health with support in specialised health, service delivery, medical research and training, procurement and distribution of drugs and financing through health insurance.

The Ministry of Health is primarily responsible for developing national policy, providing technical support, monitoring quality standards of performance of the County Governments and community organisations, providing guidelines on tariffs and conducting studies required for administrative and management purposes.

Pursuant to the Constitution, most of the delivery of health services is provided by the counties, with further responsibilities at the county level being provided at a sub-county and community level. The one exception is the Ministry of Health, which retains national referral services, comprising all secondary and tertiary referral facilities that provide specialised services. The county health services are primarily responsible for comprehensive in-patient diagnostics, medical, surgical and rehabilitative care, including reproductive health services, specialised outpatient services and facilitating and managing referrals from the sub-county and community health level. The primary responsibilities at the sub-county level are disease prevention and health promotion, basic outpatient diagnostic, medial surgical and rehabilitative services, inpatient services for emergency patients awaiting referral, patient observation and normal delivery services. County health services are funded from locally generated revenue, rather than from national grants. The sub-county level institutions are also responsible for facilitating referrals from the community health level. The community health level institutions in the country, comprised of the community units, are primarily responsible for the promotion of better health behaviours, recognition of signs and symptoms of conditions requiring referral and facilitation of community diagnostics, management and referrals to the higher levels.

Reflecting the emphasis placed on delivering these services to the population, budget allocations in the periods 2025/26, 2026/27 and 2027/28 have been made in the amounts of KES 204.5 billion, KES 214.8 billion and KES 231.0 billion, respectively.

Universal Healthcare

The Government has identified healthcare delivery as one of the core pillars of the BETA.

Under the BETA, the Government made commitments to progress the universal healthcare coverage. In this regard, the Government allocated KES 138.1 billion to the healthcare and social support sector in the FY 2025/26, including KES 6.2 billion for universal healthcare coverage.

The Government has committed to invest in the primary healthcare system through; (i) establishment of stakeholder managed primary health care funds as strategic purchasers at each level 4 facility; (ii) establishment and operationalisation of emergency medical fund and establish a fund to bridge the financial gaps in the wake

of diminishing donor funding in support of key programmes including HIV/AIDS, tuberculosis, malaria, family planning and reproductive health, vaccines and nutrition. To achieve this, the Government has identified the following as areas of priority in respect of the implementation of universal health coverage:

- Kenya has made notable progress in its pursuit of universal health coverage through enactment of four Acts. These Acts, namely the Primary Health Care Act, the Digital Health Act, Facility the Improvement Financing Act and the Social Health Insurance Act, are aimed at revolutionising the healthcare sector in the country. The Facility Improvement Financing Act aims to improve the financial governance of public health facilities by ensuring that public health facilities can retain their funds and have management autonomy. It also aims to provide a unified system for financial management in public health facilities. Under the Facility Improvement Financing Act, the Government has developed and operationalised the ‘Facility Improvement Fund’. The Primary Health Care Act and the Digital Health Act took effect on 2 November 2023, and the Social Health Insurance Act took effect on 22 November 2023. However, the constitutionality of these acts has been challenged and is currently the subject of ongoing litigation before the Court of Appeal. Though the matter is still pending before the Court of Appeal, the Court has stayed the High Court’s decision, allowing the acts to remain in effect to avoid uncertainty in the health sector;
- As part of the health sector interventions highlighted above, the Government has sought to reform the National Health Insurance Fund (“NHIF”) as a necessary imperative. The enactment of the Social Health Insurance Act establishes the Social Health Authority under which three funds have been created: the Primary Healthcare Fund, the Social Health Insurance Fund and the Emergency, Chronic, and Critical Illness Fund. All the funds, assets and other property held by NHIF Board were vested in the Social Health Authority with effect from 22 November 2023. The NHIF Act has been repealed and the NHIF Board is required to wind up the NHIF within one year from the stated effective date. NHIF was wound up on 22 November 2024;
- The Government has also changed the contribution structure from an occupational scheme for persons in formal employment to a household contribution model with the aim of enhancing the health insurance membership. The Social Health Insurance Fund introduces a new funding model that is not reliant only on the contributions from members but also from the National Assembly. The Act introduced a 2.75% flat rate for contributions from Kenyans to increase the monies available to ensure universal health coverage;
- The Government has ring fenced and up scaled research funding for the Kenya Medical Research Institute in the FY 2023/24 and the subsequent medium term; and
- The Government is also supporting Kenya Bio Vax Limited to locally produce vaccines and other health products and technologies.

Other commitments of the Government to facilitate the implementation of universal health coverage include:

- employment and initiation of payment for community health workers who shall form part of the Primary Health Care system;
- prioritisation of employment of 20,000 healthcare workers- doctors, nurses, clinical officers, laboratory technologists, physiotherapists, among others, to bridge the gap according to WHO recommendations of 23 HC per 10,000 populations;
- the establishment of an emergency medical treatment fund to cater for emergency, cancer treatment and referrals;
- setting aside of KES 50 billion for medical schemes associated with the Kenya Association of Retired Officers;
- integration of preventive and promotive services/ establish of MDT (a primary healthcare approach) as envisioned in the Afya Bora Mashinani;
- setting aside of seed deposit amount of KES 100 billion into co-funding the strategic programs for HIV, tuberculosis, blood transfusion, malaria, family planning and reproductive health;

- ring-fencing funds for healthcare from facility improvement funds to allocations from the Treasury in collaboration with County Governments; and
- building up supply chain management systems to ensure efficiency and accountability in the medical supplies to all health facilities.

HIV/AIDS, Malaria and Tuberculosis

HIV/AIDS, malaria and tuberculosis are major healthcare challenges in Kenya and other East African countries. According to estimates from the World Bank, national HIV prevalence in adults declined from 101,448 in 2013 to 16,752 in 2023. Tuberculosis deaths remain a challenge due to a number of reasons such as malnutrition, late diagnosis, and HIV co-infection.

The Government has implemented specific strategies to address the prevention and treatment of HIV/AIDS, including provision of counselling and testing, public education, provision of free antiretrovirals to those infected and increasing efforts to prevent stigmatisation and discrimination of those infected. The estimated annual cost for HIV commodities is KES 27-30 billion. Unfortunately, there has been a decline in proportionate donor funding and expectation for increase in Government contribution towards HIV commodities. The decision to suspend US foreign aid has disrupted essential health and humanitarian programmes, including programs meant for HIV/AIDS, malaria and tuberculosis in Kenya.

The Government's efforts on malaria include establishment of the National Malaria Control Programme under the Ministry of Health which is administratively under the State Department of Public Health and Professional Standards and technically positioned within the Directorate of Preventive and Promotive Health Services of the Ministry of Health. The programme is charged with the responsibility of providing policy strategic guidance and support capacity development in the Counties as well as coordination of the scaling up of an effective malaria control and prevention strategies and interventions. This scale-up is based on the Kenya Malaria Strategic plans, which are developed after every 5 years following comprehensive Malaria Program reviews.

Since October 2022, Kenya's northern regions have been affected by a cholera outbreak triggered by the impact of a severe drought and the outbreak has affected 26 of the 47 counties. As of 28 August 2023, Kenya recorded more than 11,872 cases and 196 deaths, with a fatality rate of 1.7%. The outbreak led the country's health authorities to launch a cholera vaccination drive in February 2022 to control the spread of disease and the campaign targeted 2.2 million people in the four worst-affected counties. According to the World Health Organisation, the campaign ultimately managed to reach 99.2% of the target population by 21 February 2023. An additional vaccination campaign in eight high-risk counties took place in August 2023 with vaccinations of 1.59 million people.

Ebola

In March 2014, the WHO reported an outbreak of Ebola in Guinea, and the virus later spread to other West and Central African countries, including Liberia, Nigeria, Senegal and Sierra Leone. Ebola is a dangerous and contagious virus that often results in death. The West Africa Ebola outbreak was the largest in history, affecting multiple countries in and beyond West Africa. According to the WHO, 28,616 suspected, probable, and confirmed cases with a total of 11,310 deaths were recorded in Guinea, Liberia, and Sierra Leone in 2014.

On 29 March 2016, the WHO lifted the Public Health Emergency of International Concern related to Ebola in West Africa. While there have been no confirmed cases of Ebola in Kenya, the Government issued an Ebola alert in May 2017, following an outbreak of the disease in the DRC, and again in 2019, following an outbreak in Uganda. Kenya has invested in significant training and equipment to combat any possible outbreak and has recently strengthened screening and surveillance of persons travelling from or through the DRC.

Education

The overall goal of the education sector is to increase access to education and training, improve quality and relevance of education, reduce inequality as well as develop knowledge and skills in science, technology and innovation for global competitiveness. The education sector is composed of the State Department for Basic Education, State Department for Universities, State Department for Vocational and Technical Training and Teachers Service Commission, together with their affiliated agencies and institutions. The National

Government’s role is in setting policy, allocating the national education budget, and supervising and regulating the education system.

The Kenyan government has made notable progress in integrating Information and Communication Technology into education and enhancing infrastructure across learning institutions. The National Education Sector Plan (NESSEP) 2018-2022 acknowledges ICT as a priority area to achieve Sustainable Development Goal No 4. Consequently, information and communication in education has been mainstreamed in both curriculum development and education management. Through the Digital Literacy Programme, over 1.2 million digital devices have been distributed to 21,638 public primary schools, ensuring that learners gain essential digital skills. The Kenya Institute of Curriculum Development has also approved coding content to enrich the digital curriculum. Additionally, approximately 331,000 teachers have undergone training to effectively incorporate digital tools in delivering the Competency-Based Curriculum. To further support Information and Communication Technology adoption, the government has prioritised school connectivity, with over 200 institutions linked to the internet in the past three months alone, as part of a broader initiative to achieve full connectivity by 2025.

In addition to Information and Communication Technology integration, the government is focusing on expanding vocational training, internships, and employment opportunities for young Kenyans. Total enrollment of Technical and Vocational Colleges (“TVET”) institutions grew by 10.4% to 709,885 in 2024. Plans are underway to construct Technical and Vocational Education and Training institutions in 52 constituencies that currently lack them, aiming to enroll two million youths in TVET programs by mid-2025. To bridge the gap between education and employment, a government-private sector partnership has been established to create over 100,000 paid industrial internships, with financial incentives to encourage private firms to mentor young professionals. Furthermore, the Public Service Internship Programme provides graduates with practical experience in various government ministries and agencies. As at 30 June 2025, the Programme has enrolled six cohorts and on-boarded 26,016 graduate interns. An amount of KES 14,933 million has been allocated to this Programme for the period between 2025 and 2029. These initiatives reflect the government's commitment to equipping Kenyan youth with the skills and opportunities needed to thrive in a competitive job market.

Primary, Secondary and Higher Education

At present, basic education covers eight years of primary education, four years of secondary education and four years of basic university degree (8-4-4 system). The table below provides information as to student enrolment in primary and secondary schools as at the dates indicated.

	As at 31 December				
	2020	2021	2022	2023	2024
	<i>(thousands of students)</i>				
Primary school	10,170.1	10,285.1	10,364.2	10,241.0	13,647.7
Secondary school.....	3,520.4	3,692	3,920.3	4,109.5	4,321.6

Source: Ministry of Education, Science and Technology.

Kenya is transitioning from the current 8-4-4 system to 2-6-6-3 Competency Based Curriculum system. Kenya has adopted the “Competency Based Curriculum” for all levels of basic education which has already been rolled out in the “Early Years Education”, which consists of Pre-Primary 1 and 2, and Grades 1, 2 and 3.

The table below provides student enrolment in public and private universities for the periods provided.

	2020/21	2021/22	2022/23	2023/24	2024/25 ⁽¹⁾
Public Universities ⁽²⁾	489,333	480,399	491,297	411,349	469,688
Private Universities	94,610	113,584	112,287	135,709	144,007
Total Enrolment	583,943	593,983	603,584	559,620	628,541

(1) Provisional

Political System

General

Kenya is a multiparty democratic state composed of the executive, the legislature, the judiciary and the devolved County Governments.

The President, the Deputy President and the Cabinet constitute the executive branch of the Government. The President is the Head of State and Government, the Commander in Chief of the Kenya Defence Forces (“KDF”) and the chair of the National Security Council. The President is elected by registered voters in a national election for a five-year term and can only be re-elected for one additional term. The Deputy President is the principal assistant of the President and deputises the President in the execution of the President’s functions. The Cabinet is composed of the President, the Deputy President, the Attorney General, and the Cabinet Secretaries, of which there may be no less than 14 and no more than 22. The President nominates and, with the approval of the National Assembly, appoints Cabinet Secretaries. The President has appointed 21 Cabinet Secretaries.

The legislature is composed of the Senate and the National Assembly.

There are 67 Senators; 47 are elected by the registered voters in the 47 counties of Kenya; 16 women members are nominated by political parties according to their proportion of members in the Senate and four members (two men and two women) represent the youth and persons with disabilities and are elected on the basis of proportional representations by use of party lists. The Speaker is an *ex officio* member of the Senate. The Speaker is elected from candidates who are not Senators by the votes of two-thirds of all the Senators. If no candidate reaches the required number of votes, then a runoff election is held between the two candidates who receive the highest and next highest number of votes; however, if more than one candidate receives the highest number of votes, then only the candidates who receive the highest number of votes will participate in the runoff election. The candidate who receives the highest number of votes in the runoff election is declared the Speaker.

There are 349 members of the National Assembly. Each of the 290 constituencies elect a member to the National Assembly. Under the Constitution, there must be a women’s representative Member of Parliament elected from each county, guaranteeing a minimum of 47 women members in the National Assembly. Twelve additional members are nominated by parliamentary political parties according to their proportion of members in the National Assembly. Similar to the Senate, the Speaker is an *ex officio* member of the National Assembly and is elected from candidates who are not members of the National Assembly. The procedure for election of the Speaker of the National Assembly is similar to the election of the Speaker of the Senate.

President Ruto currently enjoys the support of the majority of members of both the National Assembly and the Senate.

Since the occurrence of the 2007-2008 post-election violence, Kenya has made concerted efforts to put in place an institutional framework intended to facilitate the peaceful transition of successive governments. The most notable measures that have been implemented are the following:

- the Constitution, which contains detailed provisions in respect of general election cycles and the requirement that election petitions be determined within six months after the declaration of results. It established the Supreme Court of Kenya, whose mandate includes hearing and determining petitions arising out of a presidential election and provides for the process of swearing in a newly elected President;
- the enactment of legislation containing provisions aimed at addressing concerns that might have contributed to the 2007 post-election violence, as further detailed below;
- the establishment of various independent commissions whose mandates are to implement the provisions of the Constitution, as further detailed below;
- undertaking extensive ongoing judicial reforms to instil public confidence in the Kenyan judicial system, in particular the public vetting of judicial officers, including Magistrates and Judges of Kenya’s subordinate and superior courts, respectively; and

- the establishment of the Constitutional Implementation Oversight Committee, a select committee of Parliament established under the Constitution to oversee implementation of the Constitution.

As mentioned above, several independent commissions have been established under the Constitution respectively to entrench constitutionalism and respect for the rule of law and to implement the devolved system of government. The independent commissions include:

- the National Cohesion and Integration Commission which, amongst other things, facilitates and promotes the elimination of all forms of discrimination, promotes arbitration and other dispute resolution mechanisms, investigates complaints of ethnic or racial discrimination and makes recommendations to the Attorney General, the Kenya National Commission on Human Rights or any other relevant authority on the remedial measures where such complaints are valid;
- the Kenya National Commission on Human Rights, which monitors, investigates and reports on the observance of human rights; investigates complaints about alleged abuses of human rights and takes steps to secure appropriate redress where human rights have been violated;
- the Independent Electoral and Boundaries Commission, which supervises elections and referenda at the County and National Government levels;
- the National Police Service Commission, whose role includes staffing of the National Police Service, observing due process and exercising disciplinary control over the members of the National Police Service; and
- the National Land Commission, whose functions include managing public land on behalf of the National and County Governments, initiating investigations, on its own initiative or on a complaint, into present or historical land injustices, and recommending appropriate redress.

In addition, a number of statutes have been enacted with the aim of fostering the peaceful transition of successive governments, including the following:

- the Assumption of the Office of President Act, 2012, which came into force upon the announcement of the date of first elections in March 2013 under the Constitution and set out the procedure for the swearing in ceremony of the President and the Deputy President;
- the National Police Service Act, which amongst other provisions, provides for the recruitment, enlisting and training of police officers and the implementation of the ongoing police reforms, which involve, amongst other measures, the public vetting of senior officials serving in the National Police Service;
- the Land Act 2012 and the Land Registration Act, which were intended to address unequal distribution of land, one of the perceived causes of the 2007 post-election violence. The two statutes revise, consolidate and rationalise existing land ownership in accordance with the Constitutional principles aimed at ensuring equitable access to land, security of land rights, transparent and cost-effective land administration, amongst others; and
- the PFMA which provides for the effective management of public finances by the National and County Governments, the oversight responsibility of Parliament and County Assemblies and the different responsibilities of government entities.

Judicial System

The judiciary is composed of three superior courts: the Supreme Court, the Court of Appeal, and the High Court.

The Supreme Court is the highest judicial body consisting of the Chief Justice, the Deputy Chief Justice and five other judges. The Supreme Court has exclusive original jurisdiction to hear and determine disputes relating to the Presidential elections and appellate jurisdiction to hear and determine appeals from the Court of Appeal and any other court or tribunal as prescribed by national legislation.

The Court of Appeal consists of such number of judges, not fewer than 12, as may be prescribed by an Act of Parliament. This court has jurisdiction to hear appeals from the High Court and any other court or tribunal as prescribed by an Act of Parliament.

The High Court consists of such number of judges prescribed by an Act of Parliament and has unlimited original jurisdiction in civil and criminal matters, jurisdiction to determine any infringements of the rights and freedoms under the Bill of Rights to hear appeals from a decision of a tribunal appointed under the Constitution to consider the removal of a person from office, and to hear any questions with respect to interpretation of the Constitution and supervisory jurisdiction over all other subordinate courts and any other persons, body or authority exercising judicial or quasi-judicial functions.

The Constitution of Kenya also provides for the establishment of courts with the status of the High Court to hear and determine disputes relating to employment and labour relations, and the environment and the use and occupation of, and title to, land. The Magistrates' Courts Act establishes the subordinate courts and various other laws establish tribunals. In an aim to provide accessible, affordable and expedited resolution of disputes, the Small Claims Court was introduced as a subordinate court with jurisdiction over civil and commercial disputes which do not exceed KES 1 million. The Small Claims Court prioritises the resolution of disputes within 60 days and allows individuals and small businesses to resolve contractual claims without needing extensive legal representation.

After a competitive recruitment process by the Judicial Service Commission on 21 May 2021, the first-ever female Chief Justice of the Republic of Kenya, Martha Karambu Koome, took her oath of office following the retirement of the previous Chief Justice David K. Maraga. The Chief Justice is the head of the Judiciary, President of the Supreme Court and President of the Judicial Service Commission. Justice William Ouko, from the Court of Appeal, was also appointed as a Judge of the Supreme Court.

In addition, in a Special Gazette release dated 3 June 2021, it was reported that the former President appointed 34 judges who took their oath of office on 4 June 2021. There were calls to the former President to appoint the remaining judges. The newly elected President in two Gazette Notices dated 13 September 2022, appointed the remaining 6 judges. The 6 judges took their oath of office on the same day. There are 7 judges on the Supreme Court. As at the date of this Offering Circular, the Judicial Service Commission is conducting interviews for judicial appointments to the Court of Appeal, the High Court and the Environment and Land Court.

Procurement

Article 227 of the Constitution provides that state or public entities entering into contracts for goods or services shall do so in a fair, equitable, transparent, competitive and cost-effective way. The Public Procurement and Asset Disposal Act, 2015 and related regulations set provisions for awarding such contracts and emphasise maximisation of value for money, promotion of citizen contractors and promotion of local industry, sustainable development and protection of the environment. An open tender is considered to be the preferred procurement method; however, there are also alternative methods. In July 2025, Parliament passed the Public Procurement and Asset Disposal Bill (2025) to restructure Kenya's procurement process. The law introduces e-procurement as the standard for all government purchases and imposes more stringent penalties for non-compliance. However, in September 2025 the High Court temporarily halted a Treasury directive that required exclusive use of the new Electronic Government Procurement System (E-GPS), allowing both electronic and manual submissions while the case is under review. As at the date of this Offering Circular, the High Court's order to temporarily halt the Treasury's directive remains in effect.

Various controls are in place to ensure appropriate procurement procedures:

- a clear separation of responsibilities in various stages of the procurement process;
- the head of procurement function of a procuring entity is required to prepare a signed professional opinion to the accounting officer for each procurement proceeding;
- a complaints procedure and an appeals procedure for aggrieved parties;
- an annual audit by the Office of the Auditor General; and
- a regular Public Procurement Regulatory Authority inspection audits.

The Public Procurement Administrative Review Board hears and determines appeals lodged by aggrieved bidders in the procurement process.

County Governments

The Constitution establishes 47 counties, each with its own County Government. County Governments consist of a county assembly and a county executive.

The county assembly is made up of members elected from different wards in the county, the number of special seat members necessary to ensure that no more than two-thirds of the membership of the assembly are the same gender and the number of members of marginalised groups, including persons with disabilities and youth, prescribed under an act of Parliament. The speaker of the county assembly is an *ex officio* member and is elected by the county assembly from amongst persons who are not members of the county assembly.

The executive authority of the county is vested in and exercised by a county executive committee. The executive committee consists of the county governor, the deputy governor and members appointed by the county governor with the approval of the county assembly (from amongst persons who are not members of the assembly).

Voters in each county elect their governor. Each county governor nominates a candidate for deputy governor. The governor and the deputy governor shall not hold office for more than two terms.

Some of the provisions of the Constitution with regard to devolved governments are still in the process of being implemented. Since February 2012, the National Assembly has enacted a number of laws to implement devolution, which, together with the Constitution, provide a set of institutional arrangements for managing the transition to devolved County Governments.

The 2010 Constitution and Devolution

After the 1997 general elections, Parliament passed the Constitution of Kenya Review Act (1997) (later amended by the Constitution of Kenya Review Act (2002)) which formed the legal groundwork for constitutional reforms. A constitutional review body was created to provide civic education, seek public input and draft a new constitution to be studied by a National Constitutional Conference. Voters initially rejected the draft constitution, in a referendum in 2005. Parliament approved the revised constitution in April 2010. The proposed constitution was approved by 67% of Kenyan voters in a referendum in August 2010 and became the Constitution. The Constitution introduced additional checks and balances to executive power, including a bill of rights for Kenyan citizens and significant devolution of power and resources to 47 newly created counties. The purpose of devolution was largely to increase accountability and provision of services and to reduce poverty.

There have been various initiatives to support and facilitate a successful devolution framework. Examples of such support initiatives include:

- the World Bank's Kenya Devolution Support Program that assist capacity building and provision of technical assistance to all 47 County Governments;
- the European Union's Instrument for Devolution Advice and Support programme which supports economic development in 15 County Governments;
- USAID's Agile and Harmonised Assistance for Devolution Institution which supports general devolution activities in Kenya; and
- UNDP's support consolidating gains and deepening devolution.

There is a strain on resource allocation between County Governments and demand for resources occurs annually. This is resolved by the relevant institution established by the Constitution to determine distribution of revenue between different levels of government.

The financial management and reporting by County Governments have improved, with more County Governments reporting qualified statements of accounts. As a result, accountability has improved. The counties' revenue collection has also continued to improve, which has improved the financial position of counties. Despite this, debt has been increasing and nation debt remains high.

Legal Proceedings

The Republic is involved in various ongoing legal proceedings and disputes. To the knowledge of the Republic, there are no current, pending or threatened judicial or arbitral procedures that could have, or recently have had, a significant impact on the economic and financial situation of the country.

Anti-Corruption, Anti-Money Laundering, Crime and Combating Terrorism

Anti-Corruption and Money Laundering

Parliament has enacted various legislation dealing with corruption and money laundering, including the Anti-Corruption and Economic Crimes Act which provides for the prevention, investigation and punishment of corruption, economic crime and related offences; the Proceeds of Crime Act and Anti-money Laundering Act Cap 59A (Proceeds of Crime Act), which establishes the offence of money laundering and introduces measures for combating the offence; and the Ethics and Anti-Corruption Commission Act 2011, which established the EACC to combat and prevent corruption, economic crime and unethical conduct in Kenya through law enforcement, prevention, public education and the promotion of standards and practices of integrity, ethics and anti-corruption. The Ethics and Anti-Corruption Commission also enforces the Anti-Corruption and Economic Crimes Act 2003, which is the principal law that provides for the investigation, prosecution and adjudication of corruption and economic crime in Kenya. On 28 March 2013, the Proceeds of Crime and Anti-Money Laundering Regulations 2013 were issued by the Minister for Finance which provide for the due diligence and reporting requirements of certain reporting institutions licenced and regulated by Kenyan regulatory authorities. In 2017, the Proceeds of Crime Act was amended to enhance the Financial Reporting Centre's ("FRC") powers to impose civil monetary penalties and to take administrative action for non-compliance with the legislation, and the Asset Recovery Agency has also been strengthened by making it an autonomous institution with its own budget. The Statute Law (Miscellaneous Amendments) Act 2018 amended section 48 of the Proceeds of Crime Act to introduce reporting obligations for accountants when preparing or carrying out transactions for their clients in various situations including management of client money, securities or other assets, and management of bank, savings or securities accounts. In addition, amendments to the Companies Act 2015 to provide, amongst other things, the identification of beneficial owners, have also been passed. Kenya has an Anti-Money laundering/Combating the Financing of Terrorism (AML/CFT) legal and regulatory framework that is aligned to international standards.

In 2023, Kenya's Parliament passed amendments to various provisions of the law through the Anti-Money Laundering and Combating the Financing of Terrorism (AML/CFT) Financing Laws (Amendment) Act of 2023 (the "**AML/CFT Amendment Act 2023**"). The amendments made significant changes to 16 Acts of Parliament to combat money laundering in Kenya. To curb the high risk of money laundering within the legal profession, the AML/CFT Amendment Act 2023 included the Law Society of Kenya as a body that falls within the bodies that should report money laundering crimes within its membership. The Law Society of Kenya was previously excluded as a reporting agent under the AML/CFT legal and regulatory framework. The AML/CFT Amendment Act, 2023 requires legal professionals to report any suspicious activities or transactions carried out by their clients including but not limited to suspected activities in real estate transactions, management of client assets, management of client accounts, management of companies, and buying and selling of business entities. The punishment for failure to report money laundering activities has also been increased to 50% of the amount of monetary instruments or an imprisonment for up to 5 years or both. This penalty was increased from the previous 10%.

The AML/CFT (Amendment) Act 2023 has also bolstered the power of the EACC in investigating financial crimes by including money laundering as an economic crime. The amendments expanded the definition of economic crimes in the Anti-Money Laundering and Economic Crimes Act to include an offence involving the laundering of proceeds of corruption. Previously, the EACC could not investigate money laundering separately from corruption as that was the power of the Directorate of Criminal Investigations. The AML/CFT Amendment Act 2023 now empowers the EACC to investigate money-laundering as a separate crime from corruption.

In addition, companies and other legal entities including limited liability partnerships are now required to provide information on beneficial owners. Companies and limited liability partnerships are also required to keep a register of nominee directors and partners respectively to help create more stringent controls around

beneficial ownership. Through these requirements, the EACC can effectively investigate legal entities connected with individuals who suspected to be engaged in illicit financial activity.

In February 2024, the Financial Action Task Force (“**FATF**”) placed Kenya on its grey list, as one of the countries with strategic AML/CFT deficiencies. Kenya was given up to May 2026 to address the deficiencies. For CBK, FATF Action Plan Items require CBK to improve risk-based supervision of financial institutions, particularly non-bank financial institutions. CBK has taken several steps to address these action items, including conducting onsite inspection of high-risk and medium risk financial institutions and implementation of enforcement actions pursuant inspection findings, and carrying out training to financial institutions on key areas of AML/CFT/CPF. As of the date of this Offering Circular Kenya remains on the grey list.

On 17 June 2025, Kenya enacted the Anti-Money Laundering and Combating of Terrorism Financing (Amendment) Act, 2025 (the “**AML/CFT Amendment Act 2025**”). The AML/CFT Amendment Act 2025 introduced significant regulatory changes to combat money laundering and terrorism financing. The amendments aim at addressing strategic and structural shortcomings in Kenya’s AML/CFT framework identified in Kenya’s Mutual Evaluation Report and in response to the specific requirements set out in the FATF Action Plan.

The AML/CFT (Amendment) Act 2025 introduced amendments across various Acts covering Kenya’s AML/CFT/CPF framework, including the Proceeds of Crime and Anti-Money Laundering Act and Prevention of Terrorism Act. Key amendments include a broader scope of terrorism financing offences, applying reporting obligations to dealers in precious stones and metals and expanding the roles of the Financial Reporting Center, supervisory bodies and The Law Society of Kenya to include supervision and enforcement of the application of preventative measures to combat money laundering and terrorism financing.

On 30 July 2025, President Ruto signed the Conflict of Interest Bill into law, which is aimed at addressing issues of conflict of interest among public officials, government employees, and individuals in positions of power in government.

The Central Bank of Kenya, the Capital Markets Authority, the Insurance Regulatory Authority and other financial regulatory authorities are also required to supervise the entities they regulate. Their supervision includes but is not limited to vetting significant shareholders and proposed directors, inspecting the entities, conducting audits and compelling production of documents, imposing sanctions, and allowing cooperation and information sharing between the regulatory authorities.

Kenya is also a member of the Eastern and Southern Africa Anti-Money Laundering Group (ESAAMLG). Members of ESAAMLG carry out mutual evaluations and prepare independent reports (containing analysis, findings and recommendations) of the country’s compliance with the FATF Standards, in terms of both technical compliance and effectiveness. Kenya addressed a significant number of the findings from its first ESAAMLG mutual evaluation in 2010. The second round of evaluations was completed in 2022, with adoption of the Mutual Evaluation Report by ESAAMLG’s Council in September 2022.

Since then, Kenya has made further progress under follow-up reviews: by August 2024, 14 technical compliance Recommendations from the 2022 report were re-rated, showing improvement in areas previously found deficient. Kenya remains under enhanced follow-up to address remaining gaps, especially in effectiveness and in strategic compliance areas. Kenya has already completed its National Risk Assessment on money laundering and terrorist financing, a process that was launched in 2019 and culminated in the publication of the final report in 2022. The assessment identified key threats and vulnerabilities in the financial system and now guides the country’s national strategy and action plan for anti-money-laundering and counter-terrorist-financing reforms. Current efforts focus on implementing the report’s recommendations and strengthening laws and supervision to meet FATF and ESAAMLG standards.

The EACC has set out a strategic plan for 2023 - 2028 (the “**EACC Strategic Plan**”) to focus on the following:

- effectively deterring and punishing corruption and unethical practices;
- promoting ethics and integrity;
- improving institutional accountability in public and private sectors;

- increasing public involvement in the fight against corruption and unethical practices;
- enhancing cooperation, collaboration and coordination in the fight against corruption and unethical practices; and
- improving organisational efficiency and effectiveness.

The EACC Strategic Plan outlines an implementation and coordination framework aimed at achieving the above objectives. It envisions growing the EACC by 749 officers to ensure effective asset tracing, investigations, and efficient recovery of assets. It also seeks to strengthen policies on money laundering through partner and stakeholder engagement. The risk management framework under the EACC strategic Plan identifies 7 high risk areas that would hinder its strategic objectives and offers accompanying mitigating measures to help reduce the associated risks. The mitigating strategies offered include engaging the Office of the Director of Prosecution to increase prosecution of cases, engaging with the Judiciary to increase the number of judges and magistrates under the Anti-Corruption and Economic Crimes Court, and establishing a liaison office to upscale tracing of unexplained wealth or assets acquired through corruption.

The EACC also employs various additional corruption prevention strategies, which include:

- Disruption of corruption networks, through which the EACC has averted possible loss of public funds worth approximately KES 30.4 billion over the last five years;
- Review of systems, policies, procedures and practices of public bodies, including interventions in over 15 National Government ministries, departments and agencies (“MDAs”) and 20 County Governments. The EACC has also issued over 400 advisories to Government MDAs;
- Integrity verification for persons seeking appointments to public office. In the last five years, the Commission has processed 258,676 self-declaration forms under section 12A of the Leadership and Integrity Act, 2012 and undertook integrity vetting of over 30,000 persons seeking appointment to public office.
- Review and approval of Codes of Leadership and Integrity. Over 70% of state officers elected or appointed to public office following the 2017 General Election have signed these Codes;
- Regulation of bank accounts. The EACC has approved 565 bank accounts held outside Kenya by state and public officers; and
- Establishment of the National Integrity Academy which focuses on training on ethics and anti-corruption.

In addition, the EACC has undertaken systems review of public bodies, which have been conducted in more than 15 National Government MDAs and 20 County Governments, and it has issued more than 400 advisories to MDAs. The EACC has also developed: bribery regulations and guidelines, an asset management policy and provided inputs towards the Conflict-of-Interest Bill. At the national level, the Kenya has now adopted a National Ethics and Anti-Corruption Policy which has bolstered accountability in both the public and private sector. These interventions have created increased accountability and deterrence in engaging in corruption across all sectors.

Some of the EACC’s key partnerships and collaborations to combat corruption and promote good governance in Kenya include:

- the Framework for the Return of Assets from Corruption and Crime in Kenya, which is a multi-lateral agreement between Kenya, Jersey, Switzerland and the United Kingdom that sets out a framework for return of stolen assets to Kenya;
- the Multi Agency Framework, which is a collaborative framework that consists of oversight, law and enforcement agencies whose mandates relate to combatting corruption; and

- the East African Association of Anti-Corruption Authorities (the “EAAACA”). The EACC is a member of EAAACA, which provides a forum for exchange of information, experience and best practice standards in asset recovery and other anti-corruption initiatives.

Positive developments combatting corruption and money laundering have been reported. For example, over the past five years, the EACC has concluded 1,000 investigations into corruption and related offences. A total of 275 corruption cases have been finalised in court, with 169 of these resulting in a conviction over the same period. In addition, the Commission recovered corruptly acquired assets worth approximately US\$250,000,000 and disrupted possible loss of public funds worth approximately US\$304,000,000. Finally, the EACC is also pursuing forfeiture of approximately US\$25,500,000 as unexplained wealth possessed by certain National and County Government officials. Assets worth approximately KES 28 billion have been recovered and surrendered back for public benefit. In order to ensure the integrity of the EACC’s investigation processes and to ensure it does not prejudice the rights of the persons of interest, the Commission upholds confidentiality on matters under investigation. In the FY 2024/25, the EACC averted corruption-related losses of KES 16.5 billion and recovered assets worth KES 3.4 billion.

A key legal provision is the Proceeds of Crime Act which is aligned with international standards such as the Financial Action Taskforce Recommendations and the United Nations Convention Against Corruption (the “UNCAC”). The Proceeds of Crime Act establishes two institutions:

- The FRC, which became operational in 2012, is a government institution created by the Proceeds of Crime Act. Its main function is to review, analyse and disseminate reports of unusual or suspicious transactions made by reporting institutions to law enforcement agencies.
- Assets Recovery Agency, whose function is to trace, identify, freeze, seize and confiscate proceeds of crime.

Key provisions in the AML/CFT legal framework include:

- The requirement for reporting institutions to apply counter measures to transactions or business relationships from countries that have been identified as posing a higher risk of money laundering, terrorism financing or proliferation financing.
- The inclusion of trust and company service providers as designated non-financial businesses and professionals that are subject to AML/CFT obligations.
- Banks are to submit annual compliance reports on their AML/CFT activities to the CBK.
- Banks are required to account for the source of cash deposits above the equivalent of US\$10,000 and submit cash transaction reports to the FRC.
- Bank CEOs are required to declare under oath to the CBK that their institutions have complied with all applicable AML/CFT laws, that they and their employees have received training on AML/CFT compliance.
- The CBK conducts onsite inspections of payment service providers that provide, amongst other services, mobile money transfer. CBK requires the Chief Executive Officers of the PSPs to sign a declaration of their institutions compliance with all applicable AML and CFT laws, regulations and prudential guidelines.

Kenya’s anti-corruption legal, policy and institutional framework is benchmarked against the UNCAC in accordance with the implementation review mechanism established by the State parties to the UNCAC.

For more information, see “*Risk Factors—Risks Related to the Republic of Kenya—Failure to address actual and perceived risks of corruption and money laundering may adversely affect Kenya’s economy and ability to attract foreign direct investment.*”

Crime

Kenya suffers from high crime rates. The total number of crimes reported to the police amounted to 104,842 in 2023, which principally consisted of crimes relating to theft and other offences against persons. This decreased

by 3.5% to 101,220 in 2024. The overall crime rate has not experienced a significant decrease over the past five years (excluding the impact of COVID-19). Certain types of violent crime, such as kidnappings and armed attacks on civilians and businesses, as well as crimes relating to dangerous drugs continue to remain prevalent.

The Government have implemented various policies to reduce crime, particularly the high crime rates in urban areas. These measures include: (i) establishing clear accountability structures in terms of response and escalation of investigations within the National Police Service, (ii) ensuring the National Police Service are adequately equipped and deploying more police officers in urban areas and (iii) installing street lights and promoting civilian involvement in crime prevention through Community Policing initiatives and (iv) increased training and use of technology for the police officers of the National Police Service.

Managing inter-ethnic violence amongst the Kenyan population remains a challenge. The Rift Valley, Nairobi, the pastoralist drylands, and the coast are amongst the most affected areas. Hostilities have arisen over inequality in land ownership, grazing rights and access to resources with the most violent incidences occurring around election times such as in 2007 and 2017, when 1,200 and 100 were killed, respectively, in post-election violence. There have been 39 incidences of inter-ethnic violence in 2022, which occurred as a result of cattle rustling and political clashes. The Government has introduced legislation and policies to manage violence amongst ethnic groups, and to reduce the incidences of violent outbreaks around election times such as (i) establishing Peace and Security Committees at regional, county and sub-county level, (ii) organising community forums, especially in hotspot regions and (iii) active monitoring of political rallies. The Government enacted the National Cohesion and Integration Act 2008, following the violence after the 2007 elections, and introduced the Policy on Peacebuilding and Conflict Management in 2014. The Government continues to address these conflicts through regional meetings and community forums.

See *“Risk Factors—Risk relating to the Republic of Kenya—Kenya continues to be challenged by internal security issues as well as unfavourable media coverage, which has had and may continue to have a negative impact on the economy, including the tourism industry”*.

Combating Terrorism

Kenya has from time-to-time experienced internal security concerns. The Al-Shabaab group, an extremist militant group, has claimed responsibility for past attacks and resumed its threats of continued attacks, not only against Kenya but also against Western countries for their intervention in Somalia. Al-Shabaab claimed that the presence of Kenyan troops in southern Somalia as part of the peacekeeping forces of the African Union Mission in Somalia (“AUSSOM”) prompted attacks and announced that it would continue its attacks until Kenya withdrew its troops from Somalia. For example, on 3 February 2025, al-Shabaab militants abducted five local government officials, who were held in captivity inside Somalia for more than two months before being released to Kenyan authorities. In November 2025, al-Shabaab militants attacked two police stations in the counties of Wajir and Garissa. The attacks were repulsed and no casualties were reported. See *“Risk Factors — Risks Relating to the Republic of Kenya - Kenya continues to be challenged by internal security issues as well as unfavourable media coverage, which has had and may continue to have a negative impact on the economy, including the tourism industry”*.

As a result of such incidents, the United Kingdom, the United States, France and Australia have, in the past, issued travel advisories advising their citizens to avoid or reconsider travel to certain areas within Kenya. See *“Risk Factors—Risks Relating to the Republic of Kenya— Investing in securities of emerging market countries such as Kenya poses a greater degree of risk than investment in more mature market economies because the economies in emerging markets are more susceptible to destabilisation resulting from domestic and international developments”*.

As of April 2025, the Dadaab refugee complex in north-east Kenya housed over 430,000 refugees and asylum-seekers and the Government, together with UN agencies, continues to provide new refugees with basic services. Originally established in 1991 to house refugees from the Somali civil war, the Dadaab complex has elicited tension amongst the surrounding communities. Some have alleged that the existence of the settlement can compromise border security and has caused significant law and order problems within Kenya’s territory. For example, in January 2019, police arrested 12 people at the Dadaab camp suspected of involvement in the terror attack in Nairobi on 15 January 2019. In March 2021, Kenya announced that it intended to close two refugee camps, Dadaab and Kakuma, by June 2022. However, the High Court in Nairobi, issued an injunction temporarily blocking the Government from repatriating refugees and asylum seekers dwelling at Kakuma and

Dadaab camps. Following discussions with the UNHCR, in March 2021 the Government and the UNHCR agreed on a roadmap for orderly closure of the Kakuma and Dadaab camps by 30 June 2022. In November 2025, the decision was taken by the Government to reclassify these camps as municipalities in order to provide refugees with opportunities to better integrate into Kenyan society. As of the date of this Offering Circular, the camps remain open. See *“Risk Factors—Risks Relating to the Republic of Kenya - Kenya continues to be challenged by internal security issues as well as unfavourable media coverage, which has had and may continue to have a negative impact on the economy, including the tourism industry”*.

In addition, the Mombasa Republican Council, a separatist organisation based at the coastal town of Mombasa, has demanded that Mombasa secede from the rest of the country. The Mombasa Republican Council was formed in 1999 to address perceived historical injustice against the indigenous people of the coast who do not own land. The Government believes that members of Mombasa Republican Council could potentially be a recruiting ground for Al-Shabaab.

Anti-Terrorism Measures

The Prevention of Terrorism Act 2012, as amended, provides the legal framework to fight terrorism and gives law enforcers more powers to investigate and combat terrorism. In 2016, the Government launched the National Strategy on Countering Violent Extremism, aimed at fostering greater engagement with religious and civil society groups, enhancing inter-agency coordination in counter-terrorism strategies and strengthening security operations, surveillance and border controls. Furthermore, Kenya is in the process of joining Operation Gallant Phoenix, a US-led multinational initiative based in Jordan aimed at sharing information on terrorist threats, further strengthening counter-terrorism cooperation between the two markets.

International Relations

WTO Membership

Kenya has been a member of the World Trade Organisation (the “WTO”) since 1 January 1995. In connection with Kenya’s WTO membership, the Government is committed to supporting the progressive elimination of export subsidies as well as the substantial reduction of trade-distorting domestic support, while ensuring that it retains the right to support its own producers. As part of Kenya’s goal of ensuring its citizens have access to foreign goods and services that are not readily available in the country, the Government is committed to engage in successive WTO Services negotiations to improve market access in partner WTO countries.

United Nations

Kenya has been a member of the UN since independence. Kenya recognises the vital role of the UN in establishing and maintaining international peace and security, as well as in sustainable development and democratisation. Kenya continues to contribute military, police and corrections personnel to UN peace keeping operations, mostly in Africa. Kenya is currently involved in peacekeeping operations involved in Somalia, Sudan, South Sudan, Sierra Leone, Liberia and Haiti.

On 21 October 2024, the Haiti head of the Transitional Presidential Council requested that the international peacekeeping mission in the country be transformed into a formal peacekeeping UN operation. Kenya is leading that operation at the request of the Security Council. As at December 2025, Kenya has deployed 980 police officers to Haiti in support of tackling gang violence and upholding public order.

World Bank and IMF

Kenya has been a member of the World Bank and the IMF since 1964. See *“Public Debt—Relations with the IMF”* for more information on Kenya’s relationship with the IMF.

EU Relations

Kenya participates in political, trade and co-operation relations with the EU through the “Cotonou Agreement”, the revised draft of which the EU and 79 countries in Africa, the Caribbean and the Pacific (the “ACP”) signed in March 2010. The agreement has the objective of reducing and eventually eradicating poverty consistent with the objectives of sustainable development and the gradual integration of the ACP countries into the world economy. The agreement is designed to establish a comprehensive partnership, based on three complementary

pillars: development cooperation, economic and trade cooperation, and the political dimension. Kenyan and EU bilateral cooperation is guided by the Kenya-EU Joint Cooperation Strategy 2018-2022.

In September 2023, Kenya and the EU signed a deal that will result in the disbursement by the EU of approximately EKS1.9 billion (\$13 million) in grants for investment in Kenya's green hydrogen industry. The roadmap sets out Kenya's ambitions to develop its green hydrogen industry to 2032 and beyond. It focuses on domestic market development and growth, exports, and includes specific objectives related to emission reduction, job creation, and direct investments. In December 2023, Kenya and the EU signed the Kenya—EU Economic Partnership Agreement. The Agreement is expected to boost trade in goods and create new economic opportunities, with targeted cooperation to enhance Kenya's economic development. The agreement will provide duty-free, quota-free EU market access to all exports from Kenya as soon as it enters into force, as well as partial and gradual opening of the Kenyan market to imports from the EU.

In November 2025, the East African Court of Justice (“EACJ”) issued an interim order suspending the implementation of the Kenya-EU Economic Partnership Agreement pending the determination of a legal challenge brought by a non-governmental organisation. The EACJ, which is the judicial organ of the East African Community, granted the suspension following concerns raised regarding the agreement's compatibility with Kenya's obligations under the EAC Treaty and regional integration commitments. Although the Government of Kenya has appealed the ruling, the timing and outcome of the appellate proceedings remain uncertain. Whilst the suspension remains in effect, there is uncertainty regarding Kenya's preferential access to European Union markets under the EPA framework, which could affect trade flows, customs revenue and investor confidence. The duration of the suspension and the ultimate outcome of the legal proceedings cannot be predicted at this time.

United States

Kenya has a ‘Strategic Partnership’ with the United States based around four pillars: (1) Economic Prosperity, Trade and Investment, (2) Defence Cooperation, (3) Democracy, Governance and Civilian Security, and (4) Multilateral and Regional Issues. The partnership involves a strategic dialogue held annually by the Kenyan Ministry of Foreign Affairs and the US Department of State. Kenya and the United States have collaborated in military efforts to counter terrorism and radicalisation in the fight against Al-Shabaab in Somalia. The US has offered military support in the form of equipment (including donations of helicopters, patrol boats and 12 bastion armoured personnel carriers to KDF and training of military and security officers).

Following the inauguration of President Donald Trump in January 2025, U.S.-Kenya relations are anticipated to maintain their robust partnership, with a continued focus on economic prosperity, trade, and investment. However, the administration's decision to freeze the US Agency for International Development (USAID), which has provided aid to Kenya in areas such as HIV/AIDS treatment, family planning, and emergency response, may intensify humanitarian challenges in the country.

On 3 February 2026, U.S. President Donald Trump signed a retroactive extension of the AGOA through 31 December 2026. This one-year extension, backdated to 30 September 2025, is expected to save over 66,000 Kenyan jobs in the textile and apparel sectors.

In December 2025, Kenya and the U.S. signed a five-year Health Cooperation Framework which marked the first bilateral health agreement under the U.S.'s new global health policy approach for Africa. As at the date of this Offering Circular, the Health Cooperation Framework has been suspended pending a High Court determination related to data protection and privacy concerns.

China

China is Kenya's bilateral largest creditor and currently Chinese investment in the Kenyan economy is on the rise as there are more than 400 Chinese companies operating in Kenya, employing over 150,000 Kenyans. While Kenya and China enjoy cordial relations, Kenya's trade with China remains currently is heavily in favour of China, with most of Kenya exports being in primary form, while imports from China are mainly industrial products.

Cooperation between Kenya and China is undertaken through bilateral means, through the Forum for Cooperation with African Countries, the Belt and Road Initiative and others.

Following President Ruto’s state visit to China in April 2025, more than 20 bilateral co-operation agreements were signed between Kenya and China, across trade, digital innovation, health, education, agriculture and infrastructure. This marked an important strengthening of economic cooperation between the two countries, especially in light of the imposition of U.S. tariffs on Kenyan exports.

Kenya plans to extend the Standard Gauge Railway (“SGR”) from Naivasha to the Ugandan border (Malaba) under a hybrid financing model. The Chinese government will provide a portion of the financing, with a Chinese commercial consortium and Chinese infrastructure financiers also contributing funds.

In November 2025, Kenya converted three loans from China EXIM Bank, which originally totalled US\$5 billion from U.S. Dollars into renminbi. The conversion of the three dollar-denominated railway loans into renminbi reflects a pragmatic debt management decision by the Government to lower debt-servicing costs, ease currency and interest rate pressures, and improve fiscal space. It has resulted in significant annual savings and more manageable repayment terms.

See “*Risk Factors—Risks Relating to the Republic of Kenya—China is Kenya’s largest creditor and an adverse impact on the Chinese economy may impact the future ability of Kenya to increase its borrowings.*”

In alignment with the National Trade Policy’s objective to rebalance existing trade deficits and diversify export destinations, Kenya reached a preliminary 'Early Harvest' Trade Arrangement with the People’s Republic of China in January 2026. This landmark framework is a precursor to a full bilateral EPA and marks a significant shift in Kenya’s economic diplomacy within the Far East.

United Kingdom

The UK has consistently ranked in the top five export destinations for Kenya’s exports with the UK accounting for approximately 26.7% of Kenya’s total value of exports to Western Europe in 2024.

Following the UK’s exit from the European Union, Kenya and the UK entered into an Economic Partnership Agreement, pursuant to which Kenya’s exports to the UK continue on duty-free and quota-free terms. This will support Kenya’s agriculture and manufacturing sectors. The UK is one of Kenya’s major trading partners outside the East African Community (“EAC”), especially for the commodity sector, and the countries signed an Economic Partnership Agreement on 8 December 2020.

On 1 July 2025, Kenya and the UK announced the 2025-2030 UK-Kenya Strategic Partnership, which aims to deepen ties across sectors including trade, security, education, climate change, and regional stability. Indeed, both countries will aim to double bilateral trade by 2030 in areas such as financial services, technology and defence and security. The inaugural Kenya–UK Security Compact was signed on 28 September 2015, and has been renewed four times (in 2018, 2021, 2023 and most recently, in June 2025). The 2025 Security Compact aims to strengthen cooperation in Digital and Cyber Threats, Irregular Migration, and Illicit Finance, while sustaining progress in traditional security areas.

Regional Relations

African Union. Kenya is an active member of the African Union (the “AU”), the successor of the Organisation of African Unity, which formally launched in July 2002 at a meeting in South Africa of African heads of state. The AU is modelled on the EU and has plans for a parliament, a central bank, a single currency, a court of justice and an investment bank. These plans include the Pan-African Parliament, which was inaugurated in March 2004 and has since held a number of sessions, although it does not yet play a legislative role.

AUSSOM. AUSSOM, which is the successor to both AMISOM and ATMIS, is an active regional peace support mission originally set up by the Peace and Security Council of the AU with the full support of the UN. The principal aim of the mission is to provide support for the Federal Republic of Somalia in its efforts to stabilise the country and foster political dialogue and reconciliation. AUSSOM is also mandated to facilitate the delivery of humanitarian aid and create necessary conditions for the reconstruction and sustainable development of Somalia. AUSSOM staff come from a wide range of nations across Africa, although a large number of its troops come from five countries: Uganda, Burundi, Djibouti, Kenya and Sierra Leone. AMISOM was originally created with an initial six-month mandate though subsequent renewals of its mandate by the AU Peace and Security Council and the UN Security Council have been authorised. In December 2025, under UN Security Council Resolution 2809(2025), its mission was extended until 31 December 2026.

East African Community. Kenya is also an active member of the EAC. The EAC is a regional intergovernmental organisation of the Republics of Burundi, Kenya, Rwanda, Somalia, South Sudan, Uganda, the DRC, and the United Republic of Tanzania. The Treaty for Establishment of the EAC was signed on 30 November 1999 and entered into force on 7 July 2000 following its ratification by the original three partner states of Kenya, Tanzania and Uganda. Rwanda and Burundi acceded to the treaty on 18 June 2007 and became full members on 1 July 2007. In 2016, South Sudan became the sixth member of the EAC. The DRC acceded in 2022 and Somalia in March 2024. The EAC aims at widening and deepening co-operation amongst its members in, amongst others, political, economic and social fields for their mutual benefit. The EAC countries established a customs union in 2005 and a common market in 2010. The common market comprises approximately 330 million people across eight member states, with a combined nominal GDP in excess of US\$300 billion. President Ruto was elected as the new Chairman of the East African Community in November 2024, affirming the growing demand for Kenya's leadership both globally and regionally. The next phase of EAC integration contemplates monetary union and a political federation of the member states.

The EAC customs union has assisted with the imposition of uniform competition policy and laws, customs procedures and external tariffs on goods imported from third countries, supporting the region to advance its economic development and poverty reduction agenda. The customs union has also promoted cross-border investment and served to attract investment into the region. As an enlarged market with minimal customs clearance formalities, it is more attractive to investors than the smaller markets of individual nations. In addition, the customs union offers a more predictable economic environment for both investors and traders across the region, as the regionally administered Common External Tariff and trade policy tend to be more stable.

Kenya has benefited from EAC integration, with trade in goods and services increasing since the launch of the customs union. In 2023, EAC member states (including South Sudan) accounted for 70.3% of Kenya's total exports to Africa, with Uganda as the leading destination within the EAC, accounting for approximately 41.3% of exports to the EAC. Trade between the EAC and Europe grew 28.4% in 2024, with Kenya accounting for 43% of such trade following its EU bilateral trade deal implemented in July 2024. EAC members are now pursuing alternative trade partnerships, with plans to identify key areas for free trade agreement negotiations with prioritised third parties by the end of 2025. In January 2025, Kenya already signed a Comprehensive Economic Partnership Agreement with the UAE.

In order to enhance trade within the EAC, member states have been addressing issues relating to movement of goods and services. Recently, the heads of state of Kenya, Uganda and Rwanda launched a project to revamp the existing railway from the port of Mombasa to Nairobi extending to Kampala, Uganda, which also is expected to have links to Kigali, Rwanda. The Government has also commenced building a new railway, road and pipeline as part of the Lamu Port-Southern Sudan-Ethiopia Transport ("LAPSSET") corridor project from Lamu, Kenya to South Sudan, which also is expected to have a connection to Ethiopia. The EAC member states expect these infrastructure projects to boost trade and economic integration amongst the members. The three member states also launched the single customs territory that saw the reduction of transit time for goods from Mombasa port to Kigali from 22 days to eight, and to Kampala from 18 days to five days.

COMESA. Kenya attaches great significance to COMESA, as it provides a market for its manufactured products. The COMESA region is a vibrant economic area and membership in the free trade area was launched in October 2000 and has since been a catalyst to increased trade and investment. The COMESA member states are Burundi, Comoros, DRC, Djibouti, Egypt, Eritrea, Ethiopia, Kenya, Libya, Madagascar, Malawi, Mauritius, Rwanda, Seychelles, Sudan, Swaziland, Uganda, Zambia and Zimbabwe.

In 2024, exports to COMESA reached \$2.2 billion (KES 262.3 billion), accounting for 71% of Kenya's total exports to Africa. Kenya's primary exports to COMESA include tea, cement, natural sodium carbonate, iron and steel bars and cigarettes. Kenya now hosts a number of COMESA institutions which include the Monetary Institute, ZEP-RE (re-insurance company) and COMESA reference laboratory for plant health at the Kenya Plant Health Institute.

Within the framework of EAC and COMESA, Kenya has been negotiating the Tripartite Free Trade Area Agreement, an umbrella of organisations consisting of three of Africa's regional economic communities, which are EAC, COMESA and South African Development Community. The TFTA entered into force on 25 July 2024, after the requirement of 14 countries ratifying the agreement had been met. The 14 countries that now trade under the TFTA are Angola, Botswana, Burundi, Egypt, Eswatini, Kenya, Lesotho, Malawi, Namibia,

Rwanda, South Africa, Uganda, Zambia and Zimbabwe, accounting for 75% of tripartite GDP in 2022. Djibouti has also ratified the agreement.

The objective of the Tripartite Free Trade Area is to contribute to the broader objectives of the AU, namely accelerating economic integration of the continent and achieving sustainable economic development, thereby reducing poverty and improving the quality of life for the people of eastern and southern Africa. The Tripartite Free Trade Area works towards harmonisation of the various regional integration programmes of its member regional economic communities. These regional integration programmes focus on expanding and integrating trade and include the establishment of a free trade area, a customs union, a monetary union, and a common market; as well as infrastructure development projects in transport, information, communication, technology and energy sectors. Kenya is expected to benefit from the Tripartite Free Trade Area framework due to an increased market for goods and services as well as increased investments with member states.

On 7 April 2025, COMESA launched the World-Bank funded Inclusive Digitalization for East and Southern Africa (IDEA) Programme, which aims to empower 180 million people with internet access and provide digitally enabled services to 100 million people over the next eight years.

Nile Water Agreement of 1929. The Nile Water Agreement of 1929 grants Egypt the majority share of the Nile River's waters. Under the treaty, Egypt is guaranteed access to 55.5 billion cubic metres of water out of a total of 84 billion cubic metres. To forestall any potential disputes, the Nile Basin Initiative was formally launched in February 1999 by the water ministers of nine countries that share the river Egypt, Sudan, Ethiopia, Uganda, Kenya, Tanzania, Burundi, Rwanda and the DRC, with Eritrea as an observer. The Nile Basin Initiative is a partnership amongst the Nile riparian states that "seeks to develop the river in a cooperative manner, share substantial socioeconomic benefits, and promote regional peace and security". The Nile Basin Initiative has ten member states: Burundi, the DRC, Egypt, Ethiopia, Kenya, Rwanda, South Sudan, Sudan, Tanzania and Uganda. Eritrea is an observer.

Relations with Neighbouring Countries

South Sudan. South Sudan remains a country with special links to Kenya premised on cultural, social, political, economic and other strategic factors. Culturally, the border communities share languages and traditions. Kenya hosted many of South Sudan's refugees during its struggle for independence. However, when South Sudan achieved independence in 2005, some of the refugees returned to South Sudan. The foregoing factors have contributed to the close relations both between the governments and the people of the two countries.

Kenya also helped the negotiation processes between South Sudan and Sudan leading to the creation of South Sudan. This process included the signing of the Comprehensive Peace Agreement in Nairobi in January 2005. Following the independence of South Sudan, the two countries agreed on several initiatives aimed at strengthening and formalising relations. As a priority area, Kenya supported South Sudan in establishing its new government system. Kenya also strongly supports the AU process led by the High Level Implementation Panel aimed at securing permanent and conclusive solutions to the pending issues between Sudan and South Sudan including resolution over the disputed area of Abyei and the border dispute between South Sudan and Sudan.

Kenya continues to support South Sudan's development. For example, a new 1,800-kilometre railway and a road and pipeline under the LAPSSSET project are expected to be built from Lamu, Kenya to South Sudan, which also will have a connection to Ethiopia, and mobilisation of funds are underway. See "*The Economy – Major Infrastructure Projects – the Lamu Port-Southern Sudan-Ethiopia Transport Corridor*".

Sudan. Kenya maintains diplomatic relations with Sudan and, as a COMESA member state, Kenya maintains an ordinary course trading relationship with Sudan and expects to continue to do so. However, tensions have also increased between Kenya and its neighbour Sudan over the ongoing conflict in Sudan. See "*Risk Factors – Risks Relating to the Republic of Kenya – Impact of global and regional conflicts could have an adverse effect on the Kenyan economy and political stability*" for further information. In January 2024, Sudan recalled its ambassador to Kenya due to allegations of Kenyan interference in Sudanese internal affairs and threatening Sudanese sovereignty. In March 2025, the Sudanese government suspended all imports from Kenya in protest after the paramilitary Rapid Support Forces (RSF), who are fighting the army in a civil war, were hosted in Nairobi. Tensions continued to rise in July 2025, in response to accusations and evidence suggesting Kenya's

involvement in the UAE's supply of weapons to the RSF. The Government has denied claims that it is supporting either side in the conflict.

Somalia. Although Kenya has sought to maintain good relations with the Federal Republic of Somalia, the current relationship has been subject to a number of challenges. The launch of the Joint Commission of Cooperation in June 2013 aims to boost bilateral ties as well as provide a platform for the economic and technical cooperation between Kenya and Somalia. Following the conflict in Somalia in October 2011, Kenya intervened to help create stability and promote peace and reconciliation in the war-torn country, which has contributed to good bilateral relations between the two countries. In addition, Kenya is involved in regional peace initiatives in Somalia and has contributed troops to the AUSSOM peacekeeping forces in Somalia. The relationship was recently strained as Somalia severed diplomatic ties with Kenya in December 2020 after accusing Kenya of meddling in internal affairs before an election. Relations have since normalised in May 2021 and both committed to seek mutual benefit and growth. Since 2014, Kenya was involved in a maritime boundary dispute with Somalia that was heard by the ICJ, and hearings proceeded in March 2021 without Kenya making oral arguments. The court rendered its judgement on 12 October 2021. In its judgment, the court rejected the claim made by Somalia, alleging that Kenya, by its conduct in the disputed area, had violated its international obligations. See “*Republic of Kenya—Border Disputes*” for more information.

Uganda. Kenya has good relations with Uganda, Kenya's largest export destination. Exports to Uganda totalled US\$671.2 million in 2020, US\$814.7 million in 2021, US\$789.9 million in 2022, US\$902.7 million in 2023 and US\$951 million in 2024. There is a large population of Kenyan students in Uganda. Additionally, Uganda and Kenya agreed to remove all tariff and non-tariff barriers blocking cross-border trade during a bilateral ministerial meeting held on 29–30 August 2025 between Uganda's Trade Minister Gen. Wilson Mbasu Mbadi and Kenya's Investment, Trade and Industry Cabinet Secretary Lee Kinyanjui.

On 1 March 2016, Uganda and Tanzania agreed to construct a pipeline for the transportation of crude oil from Hoima, Uganda to Tanga, Tanzania on the grounds that this route would be shorter and more secure than a pipeline routed from Hoima through Lokichar to Lamu, in the process traversing territory with higher rates of attack by Islamist militants. The Hoima-Tanga East Africa oil pipeline commenced construction on 11 November 2017 and remains on track for completion in July 2026. The construction of this pipeline may make the completion of the LAPSSSET project more uncertain.

Similarly, there have been delays in discussions with Uganda with respect to the SGR. While it is believed that construction will continue as discussed, in the event Uganda decides to instead build a central railway through Tanzania, maximum economic returns from the SGR may not be realised.

Kenya was involved in a territorial dispute with Uganda over Migingo Island in 2008. The two countries have since taken steps to make delineation of the boundary of the lake more precise and to petrol the disputed island. In 2019, Kenya signed a memorandum of understanding with the Ugandan authorities to enable fishermen and other Lake Victoria users to access either side of Lake Victoria's boundary. However, this memorandum of understanding may be threatened by any future territorial disputes between Kenya and Uganda.

Ethiopia. Kenya has good relations with Ethiopia. Kenya plans to import electricity from Ethiopia under the Eastern Electricity Highway Project, a project that aims to connect Ethiopia's electrical grid with Kenya's and allow Ethiopia to sell its surplus power to Kenya. Kenya and Ethiopia signed a Special Status Agreement, which aims to promote economic activity between the two countries, on 21 November 2012. In addition, the new railway, road and pipeline under the LAPSSSET project expected to be built from Lamu, Kenya to South Sudan are also expected to have a connection to Ethiopia. The Government has secured financing and the projects are ongoing. In June 2025, Kenyan and Ethiopian officials agreed to progress the Horn of Africa Gateway Development Project, which aims to boost infrastructure, trade, and digital connectivity across the region. This project is supported by US\$750 million from the World Bank and targeted for completion by June 2028. See “*The Economy—Major Infrastructure Projects—The Lamu Port-Southern Sudan-Ethiopia Transport Corridor*”. In September 2025, Kenya and Ethiopia signed a new Defence Cooperation Agreement to deepen military collaboration on joint training, border security, counter-terrorism coordination, operational and defence industry development matters.

Tanzania. Kenya has good relations with Tanzania. Kenya and Tanzania have agreed to revive the Joint Commission of Cooperation with an aim to deepening economic and political cooperation. Exports to Tanzania totalled US\$295.8 million in 2020, US\$406.8 million in 2021, US\$466.4 million in 2022, US\$495.1 million in

2023 and US\$488 million in 2024. Imports from Tanzania totalled US\$259.1 million in 2020, US\$486.4 million in 2021, US\$437.6 million in 2022, US\$312.2 million in 2023 and US \$453.25 million in 2024. In May 2021, Kenya and Tanzania agreed to build a liquefied natural gas pipeline from Dar-es-Salaam to Mombasa. The bilateral agreement has been finalised and the agreement has been executed. The project is expected to boost electricity generation in Kenya. The construction of the pipeline is awaiting confirmation.

Other international relations

The Kenyan army plays a pivotal role in both regional and international security efforts. It maintains relationships with NATO, participates actively in local peace operations such as the African Union Mission in Somalia (AUSSOM), and contributes to international peacekeeping missions, including in Haiti (see “*International Relations - United Nations*” for more information). In addition, the Kenyan military engages in extensive cooperation with other countries, fostering strategic alliances and enhancing its capabilities through joint training exercises and shared expertise.

THE ECONOMY

Background and Economic History

Kenya is the largest economy in East Africa and is a regional financial and transportation hub. After independence, Kenya promoted rapid economic growth through public investment, encouraged smallholder agricultural production and provided incentives for private (often foreign) industrial investment.

Kenya has experienced continued growth in GDP over the last few years. Real GDP experienced a contraction of 0.3% in 2020. However, it rebounded with a significant growth of 7.6% in 2021, followed by an increase of 4.9% in 2022. The upward trend continued with a growth of 5.6% in 2023 and a slightly lower growth rate of 4.6% in 2024. The Government attributes the decline to reduced growth in several sectors of the economy and the peak in 2021 to the significantly high growths that signified recovery from the economic downturn in 2020. In the third quarter of 2025, real GDP grew by 4.9%, compared to a 4.2% growth in the corresponding quarter of 2024. The growth was mainly supported by accelerated growth in a number of sectors. Notably, the agriculture, forestry and fishing sector expanded by 3.2% while the construction sector rebounded from a 2.6% contraction in the third quarter of 2024, expanding by 6.7% in the third quarter of 2025.

Kenya's economy is expected to remain resilient, supported by a robust performance in the services and agriculture sectors.

Vision 2030

In 2007, the Government announced Vision 2030 as its long-term plan for attaining middle-income status as a nation by 2030. In line with Vision 2030, the Government prepares successive MTPs that outline the policies, programmes and projects that the Government intends to implement over a five-year period. The first MTP covered the period from 2008 to 2012, with the second MTP covering the 2013 to 2017 period. The third MTP, covered the 2018 to 2022 period, and the MTP IV covers the 2023 to 2027 period. There can be no assurance that the Vision 2030 targets will be met. See *“Risk Factors—Risks Relating to the Republic of Kenya—Kenya may be unable to meet its economic growth and reform objectives and policies which may adversely affect the performance of the Kenyan economy”* for further information.

The First MTP

The first MTP focused on post-election recovery, national reconciliation and economic stabilisation following the 2007–08 violence, during which GDP growth fell to 1.5%. Key interventions included infrastructure repair, support for affected small businesses, and resettlement of internally displaced persons.

Up to the year 2012, progress recorded under the first MTP included the following:

- enrolment in early childhood education increased by 40% from 1.72 million in 2008 to 2.4 million;
- transition rate from primary to secondary education increased from 64% in 2008 to 77%;
- the number of students enrolled in university education increased by 103% from 118,239 in 2008 to 240,551;
- a total of 2,200 km of roads were constructed exceeding the MTP target of 1,500 km;
- three undersea submarine fibre optic networks linking Kenya to the global internet networks were completed including 5,500 km of terrestrial fibre optic network;
- total installed capacity for generation of electricity increased by 22%. In the MTP period (2008-2021); and
- enactment of the Constitution, promulgated on 27 August 2010.

The Second MTP

Launched in 2013, the second MTP prioritised devolution, inclusive socio-economic growth, and accelerated economic transformation, building on the infrastructure and institutional gains of the first MTP. The strategy focused on growth within a stable macroeconomic environment, infrastructure modernisation, diversification of

agriculture, expansion of manufacturing, job creation (particularly for youth), and improved access to education, health, housing, water, and sanitation.

The economic pillar targeted seven priority sectors: tourism; agriculture, livestock and fisheries; trade; manufacturing; financial services; information technology; and oil and minerals.

Material achievements under the second MTP included:

- A 38% increase in electricity generation capacity, driven largely by wind and solar power projects.
- Completion of major transport and logistics infrastructure, including the Mombasa–Nairobi Standard Gauge Railway, expansion of the Port of Mombasa, and over 1,300 km of new roads.
- Rapid growth in ICT penetration, with a substantial increase in internet users and expanded fibre-optic coverage across counties.
- Improved health and water outcomes, including increased access to safe drinking water and reduced infant mortality.
- Progress in the extractives sector, including oil exploration, licensing of exploration blocks, and establishment of a national petroleum data centre.

The Third MTP

The Government announced the third MTP of Vision 2030 in March 2017. The third MTP aims to carry forward and complete the programmes and projects initiated during the second MTP. It also aims to achieve high inclusive and broad based economic growth. A key objective of the third MTP is to include policies, programmes and projects aimed at meeting the Sustainable Development Goals, which replaced the Millennium Development Goals from January 2016.

Key priorities of the third MTP include:

- to develop infrastructure and enable the environment to support the country's oil and gas and other mineral resources sector by means of investment in research and technology development and development of relevant local content policy and regulations;
- to develop the maritime sector by enhancing technical cooperation, maritime spatial planning and integrated coastal zone management, protecting and regulating the marine ecosystem, enhancing the sustainable exploitation of agriculture-based marine resources and developing fishing ports and associated infrastructure;
- to irrigate 1.3 million acres of land (increasing the area of irrigated arable land from 355,000 acres to 484,000 acres by 2016) and increase value addition of agricultural products through the Galana-Kulalu Food Security Project, National Expanded Irrigation Program, and Community Based Smallholder and Irrigation Projects;
- to build domestic capacity and capabilities, especially in engineering and construction, through local and overseas training and cooperation and joint ventures with leading foreign construction and technology firms;
- to progressively achieve universal access to water and sanitation, by building approximately 200,000 additional water connections and 350,000 new sewer connections annually;
- to create sustainable employment opportunities and green jobs, build a skilled, adaptive and enterprising labour force, improve labour market efficiency through strengthening the labour administration system and promoting public-private partnerships in employment creation, as well as establishing more youth polytechnics and technical and vocational education and training institutions to impart the requisite technical skills; and
- to prevent corruption, improve governance and accountability, deepen public sector reforms, strengthen the capacity of County Governments and coordination between National and County Governments.

The Bottom-up Economic Transformation Agenda

In September 2022, the Kenyan Kwanza Administration came into office with a commitment to transform the economy through the Bottom-Up Economic Transformation Agenda (“**BETA**”). The Government launched the Fourth Medium Term Plan (MTP IV) of Kenya Vision 2030 covering the period 2023–2027. MTP IV takes forward the BETA which has been designed to address the current challenges facing the economy, stimulate economic recovery and bolster resilience.

The BETA places emphasis on reduction to the cost of living, eradication of hunger, creation of jobs, achievement of more equitable distribution of income and inclusive growth, enhancement of social security, expansion of the tax base and an increase of foreign exchange earnings. These priorities are to be achieved through targeted investments in five core pillars: Agriculture; Micro, Small and Medium Enterprises (“**MSME**”) Economy; Housing and Settlement; Healthcare; and Digital Superhighway and Creative Economy.

For MSMEs, the Government established the Financial Inclusion Fund (commonly referred to as the “Hustlers Fund”) in November 2022 which has disbursed KES 71.0 billion of personal loans as of January 2026. Viewed as a core pillar in BETA, for housing reform, the Government has established the Affordable Housing Programme across the country with a total of 746,795 housing units in the pipeline, undergoing various stages of design. To deliver Universal Health Coverage and strengthen the legal basis for health financing and service provision, four new health laws have been enacted and the Government has reformed the National Health Insurance Fund. In order to entrench the digital economy, the Government, as part of their Digital Superhighway Project, is currently rolling out the last mile of 100,000 km of fibre optic infrastructure throughout the country and concurrently setting up 25,000 WiFi hotspots.

Agriculture

Under the agricultural transformation pillar, the government has established a fertilizer subsidies program, progressively reduced the cost of fertilizer and implemented an e-voucher system through which farmers received their fertilizer consignments for planting and top-dressing of maize, tea, coffee, rice, potatoes, cotton and edible oil crops. Additionally, the Government has made adequate arrangements, including investment in necessary infrastructure, to facilitate post-harvest management and prevent losses.

Agricultural Transformation and Inclusive Growth Pillar is aimed at addressing the cost, quality and availability of inputs; reducing the cost of food and cost of living in general; reducing food insecurity; raising productivity of key food value chains; increasing access to affordable credit and agricultural extension services; creating direct and indirect jobs, increasing average daily income of farmers and exchange earnings and tackling underperforming and collapsed export crops while expanding emerging crops. The Government rolled out a fertilizer subsidy programme that made available 5.5 million bags of fertilizers to farmers across Kenya. The Government has also progressively reduced the cost of fertilizer from KES. 6,500 to KES. 2,500, increased maize acreage under production by an extra 200,000 acres and enhanced maize production by an additional 18 million bags.

To achieve efficiency, transparency and accuracy in fertilizer distribution, the Government rolled out a countrywide farmer registration programme, which enrolled farmers on a digital register, with accurate details of the location and acreage of their agricultural landholding. The database enabled the Government to implement an e-voucher system through which farmers received their fertilizer consignments for planting and top-dressing of maize, tea, coffee, rice, potatoes, cotton and edible oil crops.

On the other hand, the Government granted a duty waiver on importation of key food products such as white maize, rice, yellow maize, soya beans, soya bean meal, assorted protein concentrates, and feed additives to tackle the food stocks deficit as well as lower and stabilise food prices.

In addition, the Government has made investments in infrastructure to facilitate post-harvest management and prevent losses. This includes 17 certified warehouses, jointly managed by the National Cereals and Produce Board and private sector owners, with a combined capacity of 365,000 metric tonnes in the maize growing areas. Further, the Government has mainstreamed nine priority value chains including crops that impact on the cost of living (maize), crops that can be exported and increase overall exports (tea, dairy, leather) and methods to reduce food imports (rice, edible oils, blue economy).

In 2025, under BETA, Kenya significantly expanded agricultural risk management by insuring 649,518 Tropical Livestock Units (TLUs), up from 78,175 in 2022; a 730% increase. The Guaranteed Minimum Return (GMR) for milk increased from KES 37 to KES 50 per litre, the price of fertilizer was cut by 67% (from KES 7,500 to KES 2,500 per 50-kg bag), and maize production increased by 39%, from 61.7 million to 85.7 million 50-kg bags. Maize imports reduced by about two-thirds, sugar cane acreage increased by 19%, and sugar output increased by 76%. Kenya sharply expanded edible oil crop acreage by 90.6%, boosted rice production by 32%, increased tea earnings from KES 138 billion to KES 181.7 billion, and enhanced exports of meat and dairy, while reducing live-animal exports.

Transforming the Micro, Small and Medium Enterprises (MSME) Economy

The Micro, Small and Medium Enterprise (MSME) Economy provides enormous opportunities for Kenya's socio-economic transformation, particularly by providing income opportunities for youth, women, persons with disabilities and low-skilled persons, who experience disproportionately high unemployment. In order to support individuals and MSMEs, the Government established the Financial Inclusion Fund (also known as the "Hustlers Fund") in November 2022 to cushion the MSMEs against high cost of credit.

As at January 2026, the Fund had disbursed KES 71.0 billion. As at 31 December 2024, the Fund had disbursed KES 68.3 billion, with repayments totalling KES 50.75 billion and realised savings of KES 2.95 billion. This benefited 27.17 million customers as at January 2026. Comparatively, 25.31 million customers were benefited as at 31 December 2024, including 8.82 million repeat borrowers, with an overall repayment rate of 73%. As at 31 December 2024, voluntary deposits totalled KES 0.55 billion, while long-term and short-term savings amounted to KES 3.39 billion and KES 0.34 billion, respectively.

The top borrower of the Fund has accessed a total of KES 6.2 million across 1,316 transactions, and the top voluntary saver has saved KES 631,491.

During the intervening period, the Hustler Fund launched a group product, which has attracted 58,709 active groups to the platform. These groups have received KES 196.68 million and realised group savings of KES 9.83 million.

Additionally, the Bridge Loan product has attracted 790,551 customers, who have received KES 11.45 billion and realised savings of KES 572 million.

Housing and Settlement

As a core pillar in BETA, the Government is committed to ensuring that the constitutional right to accessible and adequate housing to all citizens is achieved. There is an estimated shortfall of 200,000 urban housing units a year, has led to high cost for poor-quality housing. In order to bridge the housing gap, the Government has established the Affordable Housing Programme across the country.

The Government is also implementing policy and administrative reforms to lower the cost of construction and improve access to affordable housing finance. In this regard, the Government is structuring affordable long-term housing finance schemes, including a National Housing Fund and Cooperative Social Housing Schemes, that will guarantee off-take of houses from developers. As part of the process, the Housing Levy that was enacted in Finance Act 2023 is providing an off-take fund that will de-risk investors and offer affordable finance to home-owners.

The Affordable Housing Programme is a systematic job creation mechanism with the creation of jobs in the construction sector and indirectly throughout other value chains in the housing development ecosystem. These jobs are also providing entrepreneurial opportunities to all Kenyans especially the youths and employed graduates from technical colleges and universities. 120,000 Kenyans, who were previously unemployed, are now engaged directly or indirectly, in various parts of the country in the programme, and the numbers are expected to significantly increase as the rest of the projects move into the next phases.

The housing scheme also indirectly supports the formal and informal manufacturing of materials, fixtures, fittings and accessories required in the construction. The Government has continued to upgrade and support the Jua Kali sector capacity to produce high quality construction material by linking it with technical and vocational education institutions.

As at September 2025, under BETA's Affordable Housing pillar, the Government of Kenya significantly scaled up housing supply and sectoral employment: there were 130,988 affordable housing units under construction, up from 8,872 in 2022; 127,476 houses are in procurement; the total number of construction and related jobs rose to 261,976 (from 17,744 in 2022), an increase of over 1,376%. The Ministry ring-fenced KES 4.4 billion for the Jua Kali and MSME sectors to boost local artisans and building materials producers. Mortgages also became more accessible: 1,005 additional KMRC-refinanced mortgages were issued, reflecting a 40% increase from 2022, and interest rates were reduced. Developers building 100 affordable homes annually are now eligible for tax incentives (including reduced corporate tax, a cut in Import Declaration Fee, and a lower Railway Development Levy), alongside government support via land provision and favourable financing.

Healthcare

The Constitution guarantees Kenyans the right to the highest standards of health and hence the Government identified healthcare delivery as one of the core pillars of the BETA. According to the 2022 Kenya National Demographic and Health Survey, health insurance coverage in Kenya has generally been low at 26% in 2022, where coverage is much higher in urban areas (40%) compared to rural areas (19%). Many Kenyans have incurred catastrophic expenditures from out-of-pocket healthcare payments, while many more do not seek care when they fall ill.

In this regard, the Government has embarked on various interventions in order to deliver Universal Health Coverage. Notably, to strengthen the legal basis for health financing, health service provision and achievement of UHC, four new health laws have been enacted. These comprise the (i) Social Health Insurance Act, 2023 which establishes the Social Health Authority and creates the Social Health Insurance Fund; (ii) the Primary Health Care Act, 2023 which provides the framework for strengthening primary healthcare service delivery at community and county levels; (iii) the Digital Health Act, 2023 which establishes the legal framework for integrated and interoperable digital health systems; and the (iv) Facility Improvement Financing Act, 2023 which provides for financing and management of public health facilities to enhance service delivery. See "*The Republic of Kenya—Public Health*" for further information.

The Government has reformed the National Health Insurance Fund to meet the urgent needs of Kenyans at the bottom of the socioeconomic structure by actualizing its purpose as a social medical insurance facility. The Social Health Insurance Act 2023 creates a Social Health Authority and has repealed the National Health Insurance Fund Act 1998.

Pursuant to the Social Health Insurance Act, 2023, the Government has transitioned from the National Hospital Insurance Fund to the Social Health Authority, thereby reforming the national health insurance architecture and anchoring Universal Health Coverage within a new statutory and institutional framework.

The new Act establishes, among other things, the publicly financed Primary Health Fund, a fully publicly financed chronic, emergency and critical illness fund and the Social Health Insurance Fund. The Government will be implementing a per-household payment system, where a flat rate applies to everyone, regardless of their income. As part of implementation, over 27 million Kenyans had registered with the new system by October 2025.

To increase the availability of human capital in public health sector, the Government has scaled up investment in healthcare workforce. Approximately 20,000 new healthcare workers have been employed, 8,429 workers whose contracts had lapsed deployed and 3,394 interns enrolled across the country. Additionally, the Government has collaborated with all the County Governments to recruit and deploy 100,000 community health promoters (CHP) throughout the country. Each community health promoter is allocated 100 homes within their neighbourhoods countrywide. Public facilities house the most health workers of a proportion of 58.1% compared to private facilities which have 41.9%. Approximately 90% of health workers are either nurses or clinical officers, leaving a disproportionate number of doctors. Kenya has at least 9 health workers per facility with a majority serving in the urban centres (52.7%).

To better deliver universal health coverage, the Government has leveraged the digital health agenda starting from the community level. In this regard, the electronic community health information systems (e-CHIS) is being used by the community health promoters across the country to collect real-time accurate household data, initiate planning for health service delivery and provide linkage to health facilities. Along with the CHP kits, the Government has provided 110,000 smartphones for use by the promoters and Community Health Assistants.

This will provide quality community health data that is essential for the planning, resource allocation and monitoring of progress towards Universal Health Coverage.

Digital Superhighway and Creative Economy

The Government recognises that digital economy is the emerging frontier of opportunity, productivity and competitiveness. In order to entrench Kenya's lead in digital economy, the Government under the BETA has onboarded 20,985 services and with a target of digitalising and automating 80% of government services. This has increased efficiency in service delivery, revenue collection and enhanced accountability. In delivery of the Digital Super Highway and Creative Economy, the government aims at reducing the cost of doing business which will play a tremendous achievement in the four government agendas being Health Care, Agriculture, MSME and Housing as well as enhancing revenue collection.

Working with the private sector, the Government launched the local assembly of affordable smartphones in November 2023 in Athi River. In particular, the Government has prioritised digital registration in order to promote reliable identification and authentication system for all citizens and reduce fraud linked to identity theft. A reliable and centralised identification system will also support better management of social programmes, delivery of essential services, transparency and accountability in Government operations.

The Government is currently rolling out the last mile 100,000 km of fibre optic infrastructure throughout the country to improve internet connectivity in health facilities, schools, judiciary offices, and other public institutions. The Government is also concurrently setting up 25,000 Wi-Fi hotspots targeting fresh produce markets, bus parks and other public spaces.

Further, the Government is working with Members of Parliament to provide to 1,450 ICT Hubs in every ward in the country, 8 remote working centres and other online enterprises to enable the youth to find opportunities. Teaching and learning of digital skills, including coding, has also been prioritised to prepare children for the economy of the future. The education curriculum will continuously be reviewed to make sure they are in line with global technological changes. The initiatives are expected to spur e-commerce, the creative arts and the digital economy.

The Fourth MTP

The Fourth Medium Term Plan 2023-2027 ("**MTP IV**") is intended to implement the BETA which is geared towards economic turn-around and inclusive growth through a value chain approach. The Fourth MTP is aligned with BETA, the objectives of which are to: a) bring down the cost of living and lower the annual inflation to 5%; b) eradicate hunger; c) create an average of 1.2 million new jobs annually; d) expand the tax base and increase revenue collection to 19.7% of GDP; e) improve foreign exchange and achieve inclusive growth. The MTP IV for Kenya aims to address the challenges facing the economy through targeted interventions across key sectors. By focusing on enhancing productivity, infrastructure development, social welfare, environmental sustainability, and governance, MTP IV seeks to drive inclusive, broad-based, and sustainable economic growth. The plan emphasises the importance of coordinated efforts and strategic investments to create a resilient and prosperous economy for all Kenyans.

The MTP IV macroeconomic framework acknowledges three primary challenges the Kenyan economy currently faces which are external shocks due to geopolitical disruptions, fiscal distress caused by high levels of expenditure, low revenue collection, low exports, and high costs of servicing debt and structural weaknesses, including a large portfolio of public investment projects characterised by cost escalation, delays, and stalled projects. The MTP IV framework aims to strengthen economic resilience, driving inclusive, broad-based, and sustainable economic growth. During the MTP IV period, the focus will be on reducing the cost of living, eradicating hunger, creating jobs, expanding the tax revenue base, improving foreign exchange balances, and promoting inclusive growth.

In 2025, implementation of the MTP IV has continued, with the Government publishing the Second Annual Progress Report (2024–2025) in August. Recent initiatives under MTP IV include the launch of the first public–private partnership plantation phase focused on certified seed maize, alignment of national priorities with the United Nations Sustainable Development Cooperation Framework, and the development of a framework to implement the constitutional two-thirds gender principle in elective positions. In addition, infrastructure

development has advanced with plans for three new berths at the port to strengthen trade capacity and logistics efficiency.

Macroeconomic Framework

Economic transformation will be realised through targeted interventions in the MTP IV sectors and corresponding BETA pillars (see “*The Economy – The Bottom-up Economic Transformation Agenda*” above). The overall real GDP growth is projected to increase from 4.9% in 2022 to 5.0% in 2027. This growth is expected to be driven by:

- Raising agricultural productivity through investments in BETA priority value chains in crops and livestock, including leather products, dairy, tea, edible oils, rice, and textile and apparel. The Government aims to provide adequate and affordable working capital to all farmers through cooperative societies and deploy modern agricultural risk management instruments that ensure farming is profitable and income is predictable. In addition, it aims to transform poor farmers from food deficit to surplus producers through input finance, subsidies, and intensive agricultural extension support; raise the productivity of key food value chains; reduce dependence on basic food imports by 30%; revamp underperforming/collapsed export crops and expand emerging ones; and boost tea value chain (blending and branding). Some of the specific objectives of the Government include:
 - (i) **leather and leather products value chain:** the Government intends to boost productivity along the leather value chain; and increase income from leather to KES 120 billion and job opportunities from 17,000 to 100,000;
 - (ii) **dairy value chain:** the Government intends to double dairy productivity through appropriate feeding, enhancement of export to one (1) billion litres of milk, increase farm gate price to at least KES 40 per litre; create 500,000 jobs and increase farmers monthly income to an average of KES 6,000 per cow;
 - (iii) **tea value chain:** the project entails mobilisation of tea farmers into cooperatives, provision of 155,400 MT of subsidised fertiliser to tea growers through tea factories and the provision of processing equipment to tea cooperatives; promotion of tea cottage industries; diversification to specialty teas; construction of tea research and development factory; establishment of tea value addition hubs and warehouses; development and implementation of incentives for tea value addition; establishment of common user facilities within Dongo Kundu SEZ; establishment of incubation centres for speciality tea varieties; and the establishment of 10 orthodox tea manufacturing lines in smallholder tea factories;
 - (iv) **edible oil value chains:** the project aims to enhance local production and processing of edible oils. It entails supporting 20,000 farmers to access 300 MT certified oil crops seeds (canola, sunflower and soya bean) and seedlings; support the production of 2,500,000 oil palm seedlings; availing 4,940 MT of sunflower seeds to farmers under the food security and crop diversification project; supporting the counties to mobilise and register farmers into cooperatives and groups; sensitisation of farmers on opportunities available in the edible oil value chain; establishment of central registry and guarantee scheme funds to enhance access to credit and financial products and prioritisation of financial inclusion for edible value chains;
 - (v) **textile and apparel value chains:** the Government aims to enhance local production of cotton, which involves mobilisation of cotton growers into cooperatives, distribution of 70 MT of certified cotton seeds (Bio Technology cotton and hybrid) to farmers through existing and established cooperatives; availing 1,320 MT of seed cotton through food security and crop diversification project; increasing acreage under cotton from 26,000 acres to 200,000 acres through distribution of Bio Technology cotton in the 24 cotton growing counties; promote the use of alternative fibre (natural and artificial); sensitisation and mobilisation of MSMEs within cotton catchment areas; supply of subsidised fertiliser to farmer; establishment of aggregation centres in CIDCs within the catchment areas; and prioritisation of financial inclusion funds for textile and apparels value chain.

- Transforming the MSME economy by providing KES 50 billion Hustler Fund annually for affordable finance, capacity building, and market linkages. Further, Government intends to support the MSME by business and investment in climate reforms; mobilisation and aggregation of MSMEs into cooperatives around specific value chains; investment promotion; industrial infrastructure development; and improving productivity and sustainability of MSMEs. Further, the sector will prioritise financial inclusion through interventions such as the Hustler Fund; market access and product market diversification; and promotion of fair-trade practices.
- Increasing investment in housing and settlements through the construction of 200,000 housing units annually, enabling low-cost mortgages, and strengthening the Jua Kali industry. 60,000 units will be financed through Government support while 140,000 units will be financed through the National Housing Development Fund. Further, it seeks to increase the number of low-cost mortgages from 30,000 to one (1) million.
- Strengthening healthcare by delivering Universal Health Coverage through fully public-funded primary healthcare, implementing a universal seamless health insurance system, establishing a national fund for chronic and catastrophic illnesses, and scaling up manufacturing of essential medical supplies. In addition, the Government aims to prioritise employment of healthcare workers; setting up of an emergency medical treatment fund, ringfence funds for healthcare for facility improvement; and integrate information communication systems to enhance telemedicine and health management information systems.
- Investing in the digital superhighway and the creative economy to enhance productivity and competitiveness by laying an additional 100,000 km of the National Optic Fibre Backbone Infrastructure network, establishing an Africa Regional Hub, promoting software development for export, and developing arts and culture infrastructure. In addition, the Government aims to enhance government service delivery through digitisation and automation of all Government critical processes and make available 80% of government services online. The Government intends to expand and mainstream culture and arts infrastructure, build capacities and other support required to scale up the cultural production and creative economy.

Sectoral Contributions to GDP Growth

The agriculture sector growth is projected to improve from a contraction of 1.6% in 2022 to 5.2% in 2027. Over the same period, the industry sector is projected to grow from 3.9% to 5.9%, and the services sector from 7.0% to 8.0%. The finance and production sector is projected to grow from 3.4% in 2022 to 8.2% in 2027, supported by increased productivity in crops and livestock value chains, revamping export crops, promoting agro-processing, establishing Special Economic Zones and industrial parks, and increasing credit to MSMEs.

Climate change efforts

Amongst the emerging challenges, climate change impacts continue to exert negative effects on key sectors of the economy and may stunt long-term economic growth prospects as well as the ability to meet the targets set in Vision 2030. In September 2023, Kenya hosted the Africa Climate week in Nairobi – positioning Kenya as a regional climate leader. Kenya hosted the Climate Action Summit 2025 in October 2025 at the Kenya School of Government in Nairobi, bringing together regional and international stakeholders to advance climate action, sustainable development, and Africa’s green transition. Priority will be given to effectively mainstream and integrate climate change measures in the MTP IV. The Government has already taken steps towards developing key policy documents and legislation including the Climate Change Act (2016), the National Climate Change Framework Policy, the National Climate Change Action Plan and the National Climate Change Response Strategy. Under the National Climate Change Action Plan II, Kenya developed National Long Term Low Emission Development Strategy for 2050 and achieved increased forest cover from 6.99% in 2010 to 8.83% in 2021, construction of 11 seed centres and submitted Kenya’s Nationally Determined Contributions targeting to reduce greenhouse emissions by 32% by 2030.

Kenya’s environmental legislation and policies include the National Climate Change Action Plan III (2023-2027). The action plan has identified priority climate actions for both mitigation and adaptation for implementing the Nationally Determined Contributions (NDC) in the short to medium term. Such priorities include strengthening environmental, forestry and climate change governance, a focus on sustainable

development, protection of wetlands, forests and water resources, enhancing waste management and coordinating national climate action and reporting and capacities for meteorological services. The plan also aims to develop agroforestry and commercial forestry and sustainable financing for the environment, climate change and forestry conservation.

Recently, Kenya has introduced the Climate Change (Carbon Markets) Regulations, 2024, to guide the implementation of carbon projects and support the country’s Nationally Determined Contribution (NDC) under the Paris Agreement. These Regulations apply to voluntary and compliance carbon markets, ensuring emission reductions, proper documentation, and environmental integrity. A Designated National Authority will oversee carbon market transactions, ensure compliance, and prevent double counting of emissions reductions. This Authority, supported by the Climate Change Directorate and a multi-sectoral committee, will guide project eligibility and maintain a list of recognised carbon standards.

The National Carbon Registry, managed by the National Registrar, will maintain sector-specific registers of carbon projects. Each project must comply with specific standards, undergo independent certification, and demonstrate contributions to national policies and community involvement.

Incentives include potential fiscal benefits, such as a reduced corporate income tax rate for certified carbon-market exchanges. The Regulations also require social contributions from carbon projects, with land-based projects allocating 40% of earnings to community development and non-land-based projects contributing 25% to both community development and the Climate Change Fund.

In addition, carbon market exchanges and emissions trading companies certified under the Nairobi International Financial Centre (NIFC) benefit from a reduced corporate income tax rate of 15% for their first ten years of operation, a measure designed to anchor Kenya as Africa’s premier hub for sustainable and climate finance. The NIFC also provides investor facilitation services and access to double taxation treaty benefits, enhancing Kenya’s attractiveness for channelling both domestic and international capital into low-carbon and climate-resilient projects. These measures complement Kenya’s wider climate policy landscape by creating a conducive environment for channelling both domestic and international capital into low-carbon and climate-resilient projects.

2021 Rebase of GDP

In September 2021, Kenya National Bureau of Statistics rebased its national accounts, changing the base year from 2009 to 2016, and revised the annual and quarterly national accounts statistics for the period 2009 to 2016. Kenya National Bureau of Statistics applied the System of National Accounts 2008 and the International Standard Industrial Classification revision 4 system (“ISIC”) to compile the rebased GDP estimates. The System of National Accounts is the internationally agreed standard set of recommendations on how to compile measures of economic activity, and ISIC is the international standard for the classification of productive economic activities. This revision is the seventh time that Kenya has revised the national account statistics. The first revision was carried out in 1957 and subsequent revisions were carried out in 1957, 1967, 1976, 1985, 2005, 2014 and 2021. The UN Statistical Commission recommends that countries rebase every five years.

Rebasing enables economic estimates to better understand the current structure of the economy and sectoral growth drivers, and to better reflect the performance of the most important parts of the economy. For example, the rebasing in 2021 allowed the Government to account for changes in production structure, relative product prices and products. These measures have led to changes in the size of GDP, growth rates, contributions by sector and related indicators that use GDP.

GDP

The nominal GDP was KES 10,715.1 billion for FY 2020/21, KES 12,027.7 billion for FY 2021/22, KES 13,489.64 billion for FY 2022/23, KES 15,108.8 billion for FY 2023/24, KES 16,224.5 billion for FY 2024/25, and KES 4,262.4 billion for the third quarter of 2025.

The following table sets out Kenya’s nominal GDP by economic sector for the periods presented.

Source: Kenya National Bureau of Statistics.

In 2024, the Kenyan economy grew at a similar pace as 2023, but slower than the historical (2000-2019) annual average of 3.8%. This is on account of restrictive monetary policies, withdrawal of fiscal support, low underlying productivity growth, as well as escalating geopolitical fragmentations that could result in higher commodity prices despite a projected decline in global headline and core inflation. See “Risk Factors- Impact of global and regional conflicts could have an adverse effect on the Kenyan economy and political stability”.

Principal Sectors of the Economy

Agriculture

Kenya's agricultural sector has demonstrated remarkable resilience and steady growth, playing a critical role in the country's economic recovery. After facing setbacks in previous years due to prolonged droughts, the sector rebounded in 2023, recording an impressive 7.0% real GDP growth. This recovery was driven by favourable weather conditions, government interventions, and improved access to agricultural inputs, which helped boost productivity across various agricultural activities.

The positive trend continued into 2024, with the sector expanding by 5.6% in the first quarter, according to the Kenya National Bureau of Statistics (KNBS). This growth was largely attributed to adequate rainfall, which supported higher yields in both crop and livestock production. In the second quarter, agricultural growth moderated to 4.5%, contributing to an overall GDP expansion of 4.6% (KNBS, 2024). Despite a slight slowdown, the sector remained a key driver of economic stability. By the third quarter, the sector grew by 4.0%, aligning with the broader economic trend, as reported by Focus Economics.

Over the past five years, agriculture has consistently accounted for a significant portion of Kenya's nominal GDP, highlighting its importance to the economy. According to the Central Bank of Kenya, the sector contributed 22.7% in 2020, 21.5% in 2021, 21.0% in 2022, 21.5% in 2023, 22.5% in 2024. Preliminary estimates for 2025 suggest that agriculture has maintained its strong position, contributing 19.2% of GDP in the third quarter of 2025.

Several factors have fuelled this sustained growth, including increased investment in irrigation, the adoption of climate-smart agricultural practices, and government initiatives aimed at enhancing food security and market access. While some challenges, such as economic disruptions and sectoral declines in related industries, have posed risks, the overall outlook for agriculture remains positive.

With continued policy support, infrastructure improvements, and advancements in agricultural technology, Kenya's agricultural sector is well-positioned to drive long-term economic transformation and ensure food security for future generations.

The following table sets out the agriculture sector's output and input values at current and constant prices for the periods presented.

Source: Kenya National Bureau of Statistics.

Output at current prices increased by 11.0% from KES 3,562.4 billion in 2023 to KES 3,955.5 billion in 2024. Intermediate consumption at current prices increased by 8.4% from KES 704.2 billion in 2023 to KES 763.5 billion in 2024. This resulted in agriculture value added growth of 11.7% at current prices to KES 3,192 billion in 2024. Output at constant prices increased by 5.1% from KES 2,083.2 billion in 2023 to KES 2,188.6 billion in 2024. Intermediate consumption at constant prices grew by 7.5% from KES 449.1 billion in 2023 to KES 482.7 billion in 2024. Consequently, agriculture value added at constant prices grew by 4.4% from KES 1,634.1 billion to KES 1,706.0 billion in 2024.

The value of marketed agricultural production increased by 7.2% to over KES 690 billion between 2020 and 2024. Earnings from cereals increased by 5.7% to KES 51.9 billion in 2024. Earnings from horticulture recorded a downward trend from KES 156.7 billion in 2023 to KES 136.6 billion in 2024, which was partly attributable to cargo export restrictions at Jomo Kenyatta International Airport which limited air cargo availability and pushed up freight costs, particularly for fruit exporters. The earnings from permanent crops recorded a 5.0% increase to KES 214.2 billion in 2024. Temporary industrial crops' earnings also increased from KES 32.9 billion in 2023 to KES 52.1 billion in 2024.

Earnings from tea decreased by 0.05% from KES 178.05 billion in 2023 to KES 177.97 billion in 2024. Earnings from sugar cane increased by 63.5% from KES 29.6 billion in 2023 to KES 48.4 billion in 2024. Earnings from dry pyrethrum flowers decreased from KES 512.4 million in 2023 to KES 503.4 million in 2024. The value of marketed maize decreased from KES 11.3 billion in 2023 to KES 10.9 billion in 2024. However, earnings from coffee increased from KES 19.9 billion in 2023 to KES 29.6 billion in 2024. The value of marketed wheat increased by 21.3% from KES 14.7 billion in 2023 to KES 17.9 billion in 2024. Livestock and products' earnings rose to KES 235.0 billion in 2024 from KES 200.6 billion in 2023. The value of marketed milk increased by 17.4% from KES 51.1 billion in 2023 to KES 60.0 billion in 2024.

Manufacturing

The manufacturing sector was the fifth largest contributor to the economy in 2024. The sector grew by 2.8% in 2024, despite challenges such as high production costs, inflationary pressures and exchange rate fluctuations. In terms of employment generation, the Government estimates that the sector employed approximately 369,200 persons in 2024, an increase of 1.9% from 2023, and accounting for 11.5% of total employment in the formal sector. Further, in 2024, there was an increase of 9.1% in employment in the export processing zone in 2024.

Manufacturing sector recorded an estimated real GDP growth of 2.5% in the third quarter of 2025, compared to 2.3% growth recorded during the same period in 2024. The performance in the period under review showed

mixed results, with growth primarily driven by the non-food sub-sector, while the food sub-sector recorded a decline.

The manufacturing sector accounted for 7.6%, 7.4%, 7.7%, and 8.6% and 7.3% of nominal GDP in 2020, 2021, 2022, 2023 and 2024 respectively.

The following table sets out the quantum index of manufacturing production using 2017 as the base year (Base 2017 = 100).

	Year ended 31 December				
	2020	2021	2022	2023	2024

Source: Kenya National Bureau of Statistics.

According to the Kenya National Bureau of Statistics, Economic Survey 2025, the value added at current prices of the manufacturing sector grew by 2.8% in 2024 compared to 2.2% recorded in the previous year. The volume of output expanded by 4.4% in 2024 compared to a growth of 2.8% in 2023. The contribution of the manufacturing sector to GDP was 7.3% in the same period. The sectors that registered major growth in volume of output in 2024 were dairy products; meat and meat products; prepared and preserved fruits and vegetables; bakery products; leather and related products; plastic products and structural metal products reported growths. On the other hand, sugar; cocoa, chocolate, and sugar confectionery; wood and products of wood; paper and paper products; and motor vehicle, trailers and semi-trailers recorded declines in the year under review.

The quantity of manufactured food products registered a growth of 9.8% in 2024 compared to a growth of 1.2% in 2023. The growth was primarily driven by increased production in sugar, dairy products, prepared and preserved fruits and vegetables; baker products, prepared animal feeds, animal and vegetable fats and oils; and other food products not elsewhere classified.

In 2024, the production of meat and meat products registered a growth of 4.9%. Animal and vegetable fats and oils registered an increase of 3.3% in production. The quantity of processed and preserved fish grew by 1.6% in 2024 from 2.8% in 2023, while that of prepared and preserved fruits and vegetables increased by 8.8%.

In 2024, a growth of 11.5% was realised in the dairy products subsector compared to 16.4% in 2023. The growth was mainly attributed to a 11.8% increase in production of processed milk to 618.1 million litres in 2024. Similarly, the grain milling subsector recorded a growth of 2.1% in 2024, due to a 1.8% rise in wheat flour production from 1,495.7 thousand tonnes in 2023 to 1,523 thousand tonnes in 2024.

Production of bakery products recorded a growth of 7.8% in 2024, compared to 8.5% in 2023. Production in the sugar subsector increased by 72.5% in 2024, a shift from a 40.6% decrease in 2023. Additionally, production of cocoa, chocolate, and sugar confectionery increased by 0.7% in 2024. In 2024, tea production increased to 598.5 thousand tonnes from 570.4 thousand tonnes in 2023. Production of coffee-milled increased to 37.2 thousand tonnes in 2024 from 34.5 thousand tonnes recorded in 2023. The Beverages and Tobacco sub-sector increased by 3.6% in 2024. Production volumes of Tobacco Products contracted by 1.1% in 2024 while production of soft drinks (sodas) increased from 580.5 million litres in 2023 to 671.1 million litres in 2024.

As of 2025, Kenya's manufacturing sector remains a significant component of the economy. In the third quarter of 2025, the sector experienced an estimated growth of 2.5%, slightly above the 2.3% growth recorded in the same period of 2024. This performance in the period under review showed mixed results, with growth primarily driven by the non-food sub-sector, while the food sub-sector recorded a decline.

While specific rankings of sectors for the entirety of 2025 are not yet available, the manufacturing sector continues to be a key contributor to Kenya's GDP. Its performance is closely monitored alongside other major sectors such as agriculture, real estate, financial services, and information and communication.

Wholesale and Retail Trade

Kenya's wholesale and retail trade sector has demonstrated resilience and steady growth over the years, playing a crucial role in the country's economic landscape. In 2020, the sector's real GDP faced a slight contraction of 0.4%, bringing the total to KES 727,726 million. This decline was primarily attributed to the adverse effects of the COVID-19 pandemic, which disrupted supply chains and reduced consumer spending. The sector rebounded strongly in 2021, growing by 8.0% to KES 786,202 million. Growth continued in 2022, albeit at a slower pace, with a 3.8% increase to KES 813,958 million. In 2023, the sector maintained its upward trajectory with a 2.75% growth, reaching KES 836,317 million.

In 2024, the wholesale and retail trade sector continued to expand, recording a 4.9% growth in the first quarter, followed by a 4.4% increase in the second quarter and a further 4.8% expansion in the third quarter. The sector's growth was driven by increased consumer spending and a revival in business activities, particularly following disruptions caused by anti-government protests in mid-2024. The Stanbic Bank Kenya Purchasing Managers' Index (PMI) reflected this recovery, indicating an expansion in wholesale and retail trade during the second half of the year.

Despite the sector's continued growth, its contribution to nominal GDP has seen a gradual decline over the years. In 2020, wholesale and retail trade accounted for -0.4% of Kenya's GDP. This figure slightly increased to 8.0% in 2021, followed by 3.5% in 2022, 3.3% in 2023, and -0.7 in 2024. In 2025, the sector's share of GDP remained relatively stable, reflecting its ongoing importance to Kenya's economy.

The positive performance of the sector in 2024 was largely supported by increased economic activity and rising consumer demand. However, challenges such as inflationary pressures and disruptions in global supply chains continue to pose risks to its sustained growth. Nonetheless, the sector remains a vital contributor to Kenya's economic performance, highlighting its resilience in the face of economic and political challenges.

Transport and Storage

The transport and storage sector comprises land transport, air transport including support services and all other transport including postal and courier activities.

Real GDP in the transport and storage sector contracted by 8.0% in 2020 to KES 830,249 million, grew by 7.4% in 2021 to KES 891,983 million, grew by 5.8% in 2022 to KES 943,944 million, grew by 6.1% to KES 996,251

million in 2023, and grew by 4.4% to KES 1,040,556 million in 2024. The contraction in 2020 was principally a result of the impact of the Covid-19 Pandemic. The transport and storage sector accounted for 10.8%, 11.6%, 13.2%, 13.2%, and 12.7% of nominal GDP in 2020, 2021, 2022, 2023, and 2024 respectively.

The following table sets out the value of output for various transport and storage sub-sectors for the periods presented.

	Year ended 31 December				
	2020	2021	2022	2023	2024
			(KES millions)		
Road transport.....	1,537,403	1,789,928	2,226,222	2,488,721	2,615,928
Railway transport.....	12,553	15,731	16,695	19,821	20,156
Water transport.....	54,649	55,915	58,683	65,701	69,525
Air transport.....	111,010	144,524	226,828	319,893	350,910

Postal and courier services.....	18,734	19,486	19,891	27,059	25,669
Total.....	1,965,149	2,307,716	2,878,259	3,275,597	3,484,863

Source: Kenya National Bureau of Statistics.

There was a 6.4% rise in the total value of output by the sector from KES 3,275.6 billion in 2023 to KES 3,484.9 billion in 2024. Road transport continued to generate the highest value of output in the sector at 75.1% in 2024 compared with 76.0% in 2023. The value of pipeline transport, other services incidental to transport and air transport rose by 13.7%, 13.6% and 9.7% to KES 36.2 billion, KES 366.5 billion and KES 350.9 billion, respectively, in 2024. Conversely, there was a 5.1% decline in the value of output of postal and courier services from KES 27.1 billion in 2023 to KES 25.7 billion in 2024.

The transportation and storage sector grew by 4.4% in 2024 compared to 5.5% growth in 2023. The sector growth was evidenced by increase in consumption of light diesel and port throughput. Consumption of light diesel, a key input for land transportation, increased by 1.4% from 2,163.6 thousand metric tonnes in 2023 to 2,193.0 thousand metric tonnes in 2024. The average prices of motor spirit premium and light diesel oil decreased by 1.4% and 1.1% to KES 191.76 per litre and KES 178.32 per litre, respectively, offering some cost relief to transport operators.

Financial and Insurance Activities

The financial intermediation sector comprises institutions that carry out banking and similar activities, insurance and pension funds and auxiliary financial activities. The financial and insurance sector expanded by 7.6% in 2024 compared to a growth of 10.1% in 2023. The Central Bank Rate (“**CBR**”) was lowered to 8.75% as at February 2026, from 9.00% in December 2025, 11.25% in December 2024 and 12.50% in December 2023 as part of the Monetary policy measures by the regulator to support economic activity. Overall interest rates for commercial banks was 14.8% as at January 2026. The 91-Day Treasury bill interest rate declined to 7.73% in December 2025 from 10.32% in December 2024 and 15.70% in December 2023. Further, the CBK’s inter-bank rate reduced from 11.65% in December 2023 and 11.45% in December 2024 to 8.99% in December 2025.

The CBK has been reviewing the outcomes of its previous decisions and measures aimed at anchoring inflation expectations and maintaining rate stability, including the tightening of monetary policies. In light of an improved global economic outlook, characterised by prospects for growth and lower inflation, the CBK's MPC has been gradually reducing the CBR. In April 2025, the MPC cut the CBR by 75 bps to 10.00%, citing room for further easing amid stable inflation. This was followed by a 25 bps reduction in June 2025 to 9.75%, with the MPC noting a more cautious stance to balance growth support with inflation risks. In August 2025, the CBR was further reduced by 25 bps to 9.50%, as inflation continued to decline and was expected to remain below the midpoint of the target range. Following this trend, the CBR was further reduced to 9.25% in October 2025, 9.00% in December 2025 and 8.75% in February 2026.

Broad money supply (M3) recorded an increase of 9.9% to KES 6,029.4 billion as at 31 December 2025 compared to a moderation of 0.2% to KES 5,488.7 billion as at 31 December 2024, and a growth of 21.2% in 2023. The expansion in money supply was supported by the net foreign assets, which registered an increase to KES 1,183.9 billion as at 31 December 2025 compared to KES 841.7 billion as at December 2024 and KES 792.4 billion as at December 2023. The commercial bank credit to private sector also increased to KES 4,085.8

billion as at the end of December 2025 compared to KES 3,857.7 billion as at end of December 2024. The banking system deposit liabilities also increased to KES 6,006.3 billion as at December 2025 compared to KES 5,663.9 billion as at December 2024.

Total assets of pension funds increased by 20.3% during the review period to KES 2,206.5 billion as at December 2024, with assets held in government securities growing to KES 1,199.5 billion as at December 2024. In the insurance sub-sector, total assets of the life insurance business grew by 23.4% to KES 859.3 billion while total assets of the general insurance business increased by 10.9% to KES 265.4 billion during the year under review. Gross premium income for life insurance business grew by 18.5% to KES 201.6 billion while gross premium income for General insurers grew by 7.1% as at the end of December 2024.

Capital markets reported subdued performance during the review period. The total value of shares traded increased from KES 5.0 billion in June 2024 to KES 12.0 billion in June 2025. The Nairobi Securities Exchange 20 Share Index increased during the review period to 3,139.2 points as at 31 December 2025, up from 2,137.9 points as at 30 December 2023. There was a notable 104.6% increase in the total value of market capitalisation from KES 1,439.0 billion in 2023 to KES 1,939.7 billion in 2024 and KES 2,944.5 billion in 2025. Total bond turnover more than quadrupled from KES 644 billion in 2023 to KES 1.54 trillion in 2024 and KES 2.69 trillion in 2025 due to increased bond trading during the period.

Money supply (M1) grew by 13.4% to KES 2,405.9 billion as at 31 December 2025 compared to a growth of 3.8% recorded as at 31 December 2024 and 3.7% recorded as at 31 December 2023. Further, Broad Money supply (M3) increased by 9.9% as at 31 December 2025 to KES 6,029.4 billion, compared to a moderation of 0.2% as at 31 December 2024 and a growth of 21.2% as at 31 December 2023.

The net foreign assets registered an increase of KES 342.2 billion as at 31 December 2025 compared to an increase of KES 49.3 billion as at December 2024. Total domestic credit registered a growth of 10.5% from KES 6,837.3 billion in June 2024 to KES 7,557.8 billion in June 2025. Credit advanced to the County Governments increased from KES 6.6 billion in June 2024 to KES 16.1 billion in June 2025.

Real GDP in the financial and insurance activities sector grew by 5.9% in 2020 to KES 720,435 million, grew by 11.5% in 2021 to KES 802,964 million, grew by 12.8% in 2022 to KES 899,695 million, grew by 10.1% to KES 990,632 in 2023, and grew by 7.6% in 2024 to 1,066,025 million. The financial and insurance activities sector accounted for 6.7%, 7.2%, 7.4%, 7.8%, and 7.9% of nominal GDP in 2020, 2021, 2022, 2023, and 2024 respectively.

Construction

The construction sector comprises the roads and public/private housing subsectors. Real GDP in the construction sector grew by 10.1% in 2020 to KES 517,977 million, grew by 6.7% in 2021 to KES 552,764 million, grew by 4.1% in 2022 to KES 575,215 million, grew by 3.0% to KES 592,396 in 2023, and decreased by 0.7% to KES 588,157 in 2024. The decelerated growth was evidenced by declines in key inputs in the construction industry such as cement consumption and volume of imported iron and steel, cement clinkers and non-ferrous metals. The construction sector accounted for 7.0%, 7.1%, 7.1%, 6.7%, and 6.3% of nominal GDP in 2020, 2021, 2022, 2023, and 2024 respectively.

The construction sector declined by 0.7% in 2024 compared to 3.0% growth registered in 2023. The average annual inflation for construction materials and other inputs rose to 2.83% in 2024, up from 2.30% in 2023. Loans and advances from commercial banks to the construction sector declined from KES 602.7 billion in 2023 to KES 528.0 billion in 2024. Cement consumption decreased by 7.2% to 8,537.0 thousand metric tonnes, over the same period. Private employment in the sector registered a downward trend decreasing from 226.3 thousand in 2023 to 223.4 thousand in employees in 2024. Public employment in the construction sector increased from 9.7 thousand employees in 2023 to 9.9 thousand employees in 2024.

Electricity and water supply; sewerage and waste management

Real GDP in the electricity and water supply sector grew 0.6% in 2020 to KES 219,518, 5.6% in 2021 to KES 231,759 million, 5.5% to KES 244,552 million in 2022, 3.2% to 252,304 million in 2023, and 1.9% to 257,159 million in 2024. The electricity sector accounted for 1.5%, 1.4%, 1.3%, 1.7%, 1.8% of nominal GDP in 2020, 2021, 2022, 2023 and 2024 respectively. Water supply, sewerage and waste management accounted for 0.6, 0.5, 0.5, 0.5 and 0.4 of nominal GDP in 2020, 2021, 2022, 2023, and 2024 respectively.

Electricity posted a slow growth of 1.9% in 2024 compared to 3.1% growth in 2023. Growth of the sector was supported by increase in generation of hydro power and decrease in generation of electricity from thermal sources. Generation of electricity from hydro increased by 36.2% to 3,630.7 GWh during the review period. Thermal electricity generation declined by 13.5%, marking a positive shift given its reliance on costly inputs. Overall, total electricity generation increased by 0.5% to 12,569.3 GWh in 2024 from 12,504.2 GWh in 2023. Electricity generated from geothermal, wind and solar declined during the period under review. Electricity generated from geothermal sources decreased by 8.0% to stand at 5,551.0 GWh in 2024 compared to 1,305 GWh in 2023. Wind power generation declined by 10.5% to 1,797.7 GWh while solar power generation contracted by 6.3% to 460.4 GWh in 2024.

The following tables set out installed capacity and generation of electricity by producers for the periods indicated.

Year	Installed Capacity megawatts ⁽¹⁾							Total
	Hydro	Thermal Oil	Geo thermal	Wind	Co-generation	Solar	Ethiopia HVDC	
2020.....	834.0	749.1	863.1	336.1	2.0	52.5	-	2,836.7
2021.....	838.1	677.8	863.1	436.1	2.0	172.5	-	2,989.6
2022.....	838.9	681.9	950.0	436.1	2.0	212.5	200.0	3,321.3

IPP: Independent Power Producers.
EPP: Emergency Power Producers.
(1) Includes generation for industrial establishment with generation capacity of over 100KVA plus emergency supply of 99 megawatts by contract.
(2) 1 gigawatt hour = 1,000,000 kilowatt hours.
Source: Kenya Power & Lighting Company Ltd./Kenya Electricity Generation Company Ltd.

Electricity installed capacity increased from 3,243.6 megawatts in 2023 to 3,235.5 in 2024 while solar capacity remained unchanged at 212.5 megawatts. Hydroelectric power capacity increased slightly by 0.1 megawatts to 839.2 megawatts in 2024, while thermal oil electricity installed capacity decreased from 613.8 megawatts in 2023 to 605.8 megawatts in 2024.

Total effective capacity of electricity decreased by 0.2% to 3,107.8 megawatts during the review period. In 2024, the effective solar capacity decreased slightly to 211.9 megawatts. On the other hand, thermal oil electricity effective capacity decreased by 0.7% to 582.6 megawatts in 2024. In addition, geothermal effective capacity remained constant at 876.1 megawatts in 2024, and that of cogeneration also remained constant at 2.0 megawatts in the review period.

Total electricity generation increased by 5.1% to 14,101.9 GWh in 2024. In the review period, wind electricity generation decreased by 210.4 GWh to 1,797.7 GWh. The amount of geothermal electricity generated decreased by 8.0% to 5,551.0 GWh in 2024. However, hydroelectric power generation increased by 36.1% to 3,630.7 GWh. Imports of electricity surged to 1,532 GWh in 2024 on account of full operationalisation of the High Volante Direct Current (HVDC) Power plant in Ethiopia.

Total domestic demand for electricity increased by 4.2% to 10,751.7 GWh in 2024. During the review period, demand for electricity increased in all categories except street lighting which declined by 17.6% to 89.9 GWh. Local electricity generation increased to 12,569.3 GWh in 2023, while imports of electricity increased by 66.7% to 1,532.6 GWh, in the same period.

The country's stock of transmission lines remained at circuit length kilometres (cKm) with voltages of 132kV, 220kV, 400kV and 500kV as at 31st December 2024. In addition, there were 311,625 cKm of transmission and distribution lines of between 400/230v and 66kv in the same period. In 2024, four transmission lines including the 132kV Isinya – Namanga; the 220 kV Ortum Kitale; the 132 kV Sultan Hamud – Merueshi – Loitoktok and the 400kV Kenya-Tanzania interconnector were completed with a combined circuit length of 471.5 ckm and a combined capacity of 2,064 MW. In addition, 132/33kV Namanga, 220/66kV Kimuka, 220/132kV Kitale and

132/33kV Loitoktok lines were completed in the period. The following table sets out demand and supply of electricity for the periods indicated.

	Year ended 31 December				
	2020	2021	2022	2023	2024
	(megawatts)				
Demand					
Domestic and Small Commercial	3,829.1	4,088.6	4,291.5	4,252.4	4,459.1

Information and Communication

The information and communications sector comprises telecommunications, publishing, broadcasting and other IT and information activities.

Real GDP in the information and communications sector grew by 6.0% to KES 273,440 million in 2020, grew by 6.1% to KES 290,224 million in 2021, grew by 9.9% to KES 316,437 million in 2022, grew by 9.3% to KES 345,722 in 2023, and grew by 7.0% to 373,721 in 2024. The information and communications sector accounted for 2.6%, 2.4%, 2.3%, 2.3% and 2.2% of nominal GDP in 2020, 2021, 2022, 2023, and 2024 respectively.

The following table sets out information regarding landline and portable phone connections, international call traffic and mobile connections as at the dates indicated.

	As at 31 December				
	2020	2021	2022	2023	2024
	(millions)

Information and Communication Technologies (“ICT”) in Kenya have continually evolved to meet the increasing demand for connectivity, engaging social platforms, dynamic e-commerce, flexible remote work solutions, accessible online education and meetings, and seamless financial services. The growing reliance on digital technologies and the internet has led service providers to focus on expanding network infrastructure, transitioning from voice to data services and launching of rural tower expansion, fifth Generation (5G) networks and expansion of fibre rollouts. The government’s commitment to improving digital connectivity was demonstrated by the launching of the Digital Masterplan 2022-2032 in 2022 to support the growth of the digital economy.

In 2023, ICT output value saw an 8.3% growth, from KES 647.5 billion in 2023 to KES 702.3 billion in 2024. Intermediate consumption increased from KES 308.1 billion in 2023 to KES 336.7 billion in 2024 while ICT value added increased by 7.4% from KES 339.5 billion in 2023 to KES 364.5 billion in 2024. Mobile subscriptions rose to 71.47 million in 2024 from 66.7 million in 2023. The fixed broadband exhibited growth in 2024, with total subscriptions rising by 21.6% to 1,248,709. A key driver of this growth was the 33.18% increase in Fibre to the Home (FttH) subscriptions to 973,749 in 2024, accounting for 78.0% of total fixed broadband subscriptions. The expansion reflects the country's commitment to enhancing digital connectivity and infrastructure. In the Network Readiness Index 2024, which measures a country's ability to exploit opportunities offered by ICT, Kenya ranked 73rd out of 133 economies included (*Source: Kenya Performance Overview, Network Readiness Index*).

Wireless internet subscriptions increased from 1.457 million in 2023 to 1.552 million in 2024, with terrestrial wireless data recording a growth of 42%. The 4G transceivers increased by 14.4% from 93,240 in 2023 to 106,620 in 2024 indicating a rising demand for faster internet connectivity. In the period under review, the number of Fifth Generation transceivers rose from 102 in 2022 to 2,796 in 2023, signifying continuous growth in high-speed connectivity.

Fixed telephony capacity has remained constant, whereas fixed connections have consistently declined culminating in a 6.1% reduction to 9.8 thousand in 2024. This trend is mainly attributed to the continuous adoption of mobile technology, as many people continue abandoning fixed telephony in preference of mobile services. The number of fixed Voice over Internet Protocol (VoIP) subscribers reduced from 57,356 in 2023 to 47,176 in 2024.

The capacity of mobile telephony grew by 1.8% to KES 123.7 million lines in. The International Mobile Telecommunications (IMT) spectrum expanded from 560 Megahertz (MHz) in 2021 to 1,121 MHz in 2023, out of which operators utilised 1,121 MHz in 2023, compared to the 740 MHz used in 2022. Mobile subscriptions slightly increased to 66.7 million in 2023, from 65.7 million in 2022.

The number of mobile money transfer agents and transactions recorded steady growth. In 2023, the number of mobile money subscribers increased by 11.3% to 42.3 million in 2024. In 2024, the value of transfers from subscriber to subscriber grew by 24.8% to KES 6.8 billion. The value of mobile commerce transactions grew by 6.1% from KES 20.7 trillion in 2023 to KES 22.0 trillion in 2024.

The CBK regulates all mobile phone-based banking products offered by banks, pursuant to the National Payment System Act 2011 (Cap. 493E) and the National Payment System Regulations 2014, to ensure that effective, transparent and adequate governance arrangements and anti-money laundering protections are in place.

The Government recognises ICT as a foundation for socio-economic development and as a means of reducing the cost of doing business, creating job opportunities and enhancing efficiency in service delivery. In light of this, over the last four years, the Government has implemented a number of initiatives to enhance the use of ICT including the expansion of National Optic Fibre Backbone (“**NOFBI**”) infrastructure, which was expected to enable internet connectivity across 30 out of 42 counties in order to facilitate internet connectivity, recruiting and training ICT graduates under the Presidential Digital Talent Programme aimed at improving ICT skills amongst the youths to enhance their employability. Furthermore, the Government utilises the Integrated Financial Management Information System (“**IFMIS**”), an automated system used for public financial management that enhances budget planning, procurement process, financial data recording, tracking and information management. The Government has also introduced the 2019 and 2020 Digital Economy Blueprints that seek to ensure every citizen, enterprise, and organisation has digital access and the capacity to participate in the digital economy. As at the date of this Offering Circular, the 5G transceivers grew from 2,796 mobile transceivers in 2023 to 3,556 mobile transceivers in 2024, indicating the gradual rollout of next-generation technology.

Going forward, the Government aims to build on the progress made so far to improve ICT infrastructure and increase ICT skills and innovation in order to drive the attainment of The Big Four Agenda. The strategy has focus on expanding ICT infrastructure connectivity by further roll out of NOFBI, connecting all state departments to a unified Government communications system and digitising Government records, managing and improving cyber security and increasing youth ICT training and facilitating their absorption to the job market.

The Data Protection Act, No. 24 of 2019 was assented to on 8 November 2019 and came into force on 25 November 2019. In November 2020, the first Data Commissioner was appointed and mandated with the administration and enforcement of the Data Protection Act. The Data Protection (General) Regulations, 2021, the Data Protection (Complaints, Handling and Enforcement Procedures) Regulations, 2021 and the Data Protection (Registration of Data Controllers and Data Processors) Regulations, 2021 were gazetted on 14 January 2022. The National Information Communications and Technology (ICT) Policy Guidelines, 2020 was gazetted on 7 August 2020 (the “**ICT Policy**”). In March 2021, the Ministry of Information Communication and Technology published amendments to the ICT Policy which amended the equity participation requirement amongst others. The Government is also establishing an integrated identity management system with biometric records of all citizens and foreigners, National Integrated Identity Management System (“**NIIMS**”). In the first two weeks of the project, 10.2 million Kenyans were registered and had their biometrics taken. In total, the NIIMS project will entail registering over 40 million Kenyans.

One of the major projects commenced under the second MTP is the development of the Konza Technology City that aims to position Kenya as the ICT hub of Africa. The Government expects to develop the project in phases and the first phase includes construction of a BPO park, a science park, residential buildings, a data centre and part of the central business district. The first phase of implementation of Konza Technology City is underway with development of basic infrastructure including water supply, installation of electricity to the site and ongoing construction of two sub-stations to guarantee adequate and stable power. The project is projected to generate approximately 17,000 jobs and provide homes for approximately 30,000 residents. The Government estimates the development of on-site infrastructure and sales pavilion, including roads, power, sewerage and railway to cost approximately US\$760 million over five years, of which it expects 10% to be funded by the national budget and the balance, through public-private partnerships.

In 2024, Kenya has made significant strides in strengthening its ICT sector, positioning itself as a key player in Africa’s digital transformation. The government, through the ICT Authority, has unveiled an ambitious strategic plan for 2024-2027, with an estimated budget of KES 304.37 billion (approximately U.S.\$2.35 billion). This plan focuses on expanding broadband infrastructure, improving cybersecurity, enhancing digital literacy, and implementing e-government services to make public services more accessible to citizens.

To reinforce regulatory oversight in the ICT sector, the government introduced the ICT Authority Bill 2024 in May 2024. This legislation seeks to formalise ICT operations by requiring service providers to obtain operational licenses, ensuring higher standards of service delivery, security, and efficiency.

Infrastructure development has also been a key priority, with the government launching a nationwide initiative to construct 1,450 ICT hubs across all wards in the country. These hubs are designed to provide digital literacy training, support creative industries such as film production, and facilitate public access to government services, thereby promoting grassroots digital inclusion.

In a bid to attract global talent and boost the local economy, Kenya has introduced a digital nomad visa, allowing remote workers to live and work in the country while enjoying its diverse cultural and natural attractions. This initiative aligns with Kenya’s broader vision of integrating itself into the global digital economy.

Kenya has also strengthened its position as a regional technology hub through international collaborations. In May 2024, the country secured U.S.\$250 million in funding from the U.S. International Development Finance Corporation to enhance digital connectivity and support its growing e-mobility sector. Furthermore, partnerships with global technology firms continue to drive innovation and infrastructure development in the country.

Under the MTP IV, Kenya continues to prioritise technology and innovation commercialisation as a cornerstone for economic growth. The government has laid out a clear roadmap to foster a robust innovation ecosystem that can harness the potential of modern science and technology to drive social and economic development.

A key initiative is the development of Science and Technology Innovation Parks at Dedan Kimathi University of Technology and Konza Technopolis. These innovation hubs are designed to provide the necessary infrastructure, resources, and support to facilitate research and development, foster collaboration between academia and industry, and promote the commercialisation of innovations. The parks will serve as incubators for start-ups and small-to-medium enterprises, allowing them to access critical technology, funding, and market networks to scale their solutions.

In addition, the government is establishing a National Centre for Innovation Technology Transfer and Commercialization. This centre will play a pivotal role in facilitating the transfer of new technologies from research institutions and universities to the market. It will bridge the gap between scientific research and its practical application, ensuring that innovations can be effectively commercialised and contribute to the country's industrialisation goals.

By focusing on these initiatives, the government aims to strengthen Kenya's position as a regional leader in technology and innovation, enhance its global competitiveness, and create new employment opportunities in the tech sector. The development of these projects under the Fourth Medium Term Plan aligns with the broader vision of transforming Kenya into a knowledge-based economy that fosters innovation-driven growth.

Safaricom PLC (Safaricom), Kenya's leading telecommunications provider, plays a pivotal role in the country's digital economy by delivering mobile, data, and financial services nationwide through its network infrastructure. The Government, currently holding a 35% stake in Safaricom, has announced its intention to divest 15% of its shareholding—equivalent to approximately KES 204 billion in gross proceeds—at a premium of 23.6% to the six-month volume weighted average price ended 2 December 2025. This transaction is designed to mobilise resources for critical infrastructure development. Proceeds from the sale are earmarked exclusively for financing commercially viable infrastructure projects, including those in the energy sector, through the newly established National Infrastructure Fund Limited. The proposed divestiture is subject to parliamentary approval of Sessional Paper 3 and is expected to take effect from 26 March 2026.

Tourism

Tourism is an important contributor to the economy, accounting for over 7.3% of the GDP in 2024. The sector is estimated to employ an average of 8% of the labour force in the formal sector. In 2024, tourism accounted for 1.61 million jobs across Kenya representing 7.9% of the labour work force.

The following table sets out annual departing tourists by country of residence for the periods indicated.

The tourism sector contributes to the hospitality and restaurant activities, wholesale and retail trade and transport and storage sectors. Real GDP in the hospitality and restaurant sector contracted by 47.7% to KES 53,114 million in 2020, grew by 52.6% to KES 81,037 million in 2021, grew by 26.2% to KES 102,286 million in 2022, increased by 33.6% to KES 137,204 million in 2023, and grew by 25.7 to 172,507 in 2024. The hospitality and restaurant sector accounted for 0.7%, 1.1%, 1.1%, 1.3%, and 1.6% of nominal GDP in 2020, 2021, 2022, 2023 and 2024 respectively.

The sector recorded an improved performance in 2024 mainly attributed to strategic interventions, including Electronic Travel Authorization (ETA), aggressive marketing, enhanced tourism product diversification, and adoption of digital tools such as smart booking platforms and targeted online promotion. The performance was also boosted by the new entry and return of long-haul carriers. The increase was mainly on account of continued relaxation of Covid-19 Pandemic-related travel restrictions in 2022. The number of international visitor arrivals increased by 14.7% to 2,394,376 in 2024 surpassing the 2019 levels reaching a recovery rate of 102.5%. The improvement was mainly attributed to strategic interventions adopted during the year. In 2024, Kenya experienced a notable increase in international tourist arrivals, welcoming 2,394 thousand visitors – up from 2,089 thousand in 2023 (marking a growth of 14.7%). This continued the strong recovery from previous years, with 1,484 thousand visitors recorded in 2022, 870 thousand in 2021, and 568 thousand in 2020. The upward trend continued in 2025, with an estimated 2,539 thousand of arrivals recorded. The inbound tourism earnings increased to KES 452.20 billion in 2024 compared to KES 377.49 billion in 2023 translating to a growth of 19.79%. In 2024, there was an increase in international tourist arrivals by 11.0% according to United Nations World Tourism Organization (UNWTO) Barometer compared to 2023, representing a resilient post COVID-19 recovery. In 2024, hotel bed-nights occupancy rose by 18.9% to 10,262.1 thousand from 8,632.8 thousand in 2023, of which 47.9% were occupied by Kenyan residents, pointing to a growing domestic tourism. Visitors to national parks and game reserves increased by 2.8% to 3,741.9 thousand in 2024. The number of visitors to select museums, snake parks and historical sites grew by 6.9% to 1,152.7 thousand in 2024. The number of international conferences increased by 2.3% to 999 in 2024 while that of local conferences grew by 4.7% to 11,225 in 2024. This was largely attributed to increased visitor arrivals, hosting of high-profile meetings and improved domestic market.

The Government has taken various measures to mitigate the effects of terrorism and national security threats and promote tourism in Kenya. These include the promotion of local tourism, exemption of value added taxes to all travel agents, scrapping landing charges in Mombasa and Malindi as the main tourist destinations and providing budgetary reallocations to promote domestic tourism. In the recent past, terrorist activities and violent extremism have continued to have a negative impact upon the tourism sector. Travel advisories, including travel bans to Kenya from the main sources of tourists such as the United States and Europe, have significantly affected tourist arrivals and tourism earnings in Kenya. However, the Government has undertaken recent security measures, investments and public campaigns to counter terrorism and criminal activities. See *“Risk Factors—Risks Relating to the Republic of Kenya—Kenya continues to be challenged by internal security issues as well as unfavourable media coverage which has had and may continue to have a negative impact on the economy, including the tourism industry.”*

The Government has developed the “New Vision for Kenya Tourism” to accelerate recovery of the tourism industry in Kenya, with plans around brand positioning Kenya as an upmarket destination and increasing investment into parks, reserves and coastal beaches. Tourism is projected to contribute US\$12.38 billion to the country’s GDP by 2027.

Oil and Gas

Between 2012 and 2014, several oil and gas discoveries were made by oil corporations in Kenya, including at the Sunbird 1, Sala 1 and Mbawa 1 exploration wells. On 15 January 2014, Tullow Oil plc announced oil discoveries at the Amosing-1 and Ewoi-1 exploration wells in Block 10BB onshore northern Kenya. As a result of these discoveries and prior discoveries at Ekales-1 and Agete-1, Tullow Oil plc updated its estimate of discovered resources in this basin to over 600 million barrels of oil.

By 2025, an estimate of 95 oil exploration wells were drilled with a majority located in Tertiary Rift and 17 new exploration blocks were created. An estimate of 2.91 billion of Stock Tank Oil Initially In Place (“**STOIIP**”) with 2C resources estimated at 585 million Barrels have been encountered in the Lokichar sub-basin by Tullow Plc and its partners, with recovery oil estimated to be 750 million barrels. The Early Oil Pilot Scheme at Ngamia and Amosi fields, commissioned in June 2018, continued to register improved production with daily

transportation increasing from 600 bbl./day to 2,000bbl./day. The initial 200,000bbl capacity of crude oil was achieved and the first consignment flagged off by the President on 3 June 2018. The transported crude oil is stored at the Kenya Petroleum Refineries Storage tanks prior to export.

Seeking prospects, exploring for and developing oil reserves involves a high degree of operational and financial risk. The actual costs of seeking prospects, drilling, completing and operating wells may exceed Tullow Oil plc's budgeted costs and can increase significantly when drilling costs rise due to a tightening in the supply of various types of oil field equipment and related services. Prospects may be unsuccessful for many reasons, including geological conditions, weather, cost overruns, equipment shortages and mechanical difficulties. Exploratory wells bear a much greater risk of loss than development wells. Moreover, the successful drilling of an oil well does not necessarily result in a profit on investment. A variety of factors, both geological and market-related, can cause a well to become uneconomic or only marginally economic. Initial costs associated with identifying prospects and drilling wells require significant additional exploration and development, regulatory approval and commitments of resources prior to commercial development.

Kenya stopped its licensing of new open blocks of petroleum exploration to allow time for the ongoing review of the legal and regulatory framework of oil and gas operations in the country. The Government plans to propose a different licensing process under new energy legislation that would be more competitive and use bidding rounds instead of a first-come, first-serve approach under the current framework. In order to facilitate development of the oil and gas sector, the Petroleum Act 2019 was assented into law on 12 March 2019. In addition, the Mining Act 2016 has replaced the old mining legislation and is aligned with the provisions of the Constitution and with the industry international best practices. To complement private investment exploration and in a bid to de-risk investments in mining, the government mooted and implemented a National Airborne Geophysical Survey (NAGS) between January 2019 and June 2022. The objective of the exercise was to collect geophysical magnetics and radiometric datasets all over Kenya and its exclusive economic zone. The collected datasets aided in mapping the mineralised ore environment followed by identifying the mineralised zones. Following completion of the survey, the sector has recorded increased attention from investors across the globe with over 400 applications for various mineral rights. The government is committed to the promotion of the mining sector as a new frontier of economic growth and revenue diversification. In this regard, the government is committed to promoting and provide the necessary incentives to enhance exploration and in-country mineral value addition. Further in 2025, Kenya restructured its petroleum exploration acreage to 50 blocks based on basin potential and available data. The reason behind this was to allow the country to offer 10 of the blocks for competitive bidding in an attempt to boost economic growth. The government is also investing in strengthening mining sector institutions such as the Geological Survey and the Directorate of Mines as well as the National Mining Corporation to position them to better respond to emerging issues in mining. In December 2024, Base Titanium, the largest mineral exporter in Kenya concluded its operations. The decision was attributable to the exhaustion of commercially viable mineral deposits in the specific mining areas.

Global oil prices fell in the first quarter of 2020 and global demand fell due to the Covid-19 Pandemic. Kenya benefited from the sharp drop in international oil prices in 2020 due to reduced global demand attributed to the Covid-19 Pandemic. In terms of value, Kenya's imports of petroleum products reduced from KES 316.6 billion in 2019 to KES 209.1 billion in 2020, KES 348.3 billion in 2021 further, to KES 628.3 billion in 2022, to KES 626.3 billion in 2023 and KES 575.5 billion in 2024. The increase in 2022 was principally a result of the sharp increase of oil prices following the outbreak of the Russia and Ukraine conflict.

The Kenya Pipeline Company ("KPC"), a state corporation established under the Companies Act (Cap 486) and fully owned by the Government, plays a critical role in the sector by transporting, storing, and delivering petroleum products to various depots across the country through its extensive pipeline network. KPC operates the country's oil pipeline system and manages strategic fuel reserves, ensuring energy security and efficient supply to the economy. As part of its strategy to deepen capital markets, increase liquidity and mobilise resources, the Government is working to privatise KPC. The Government of Kenya, through the National Treasury, holds 99.9% while 0.1% is held by the Ministry of Energy and Petroleum. Of the 99.9% of the National Treasury, the Government is offering for sale 11,812,644,350 shares in the ordinary share capital of KPC, which comprises of 65% of the issued ordinary KPC shares on the Nairobi Securities Exchange. The use of proceeds of the offer will be directed to the National Treasury to finance 2025/2026 budget priorities, specifically for infrastructure projects in energy, roads, water, irrigation and airports. This move by the Government will enhance operational efficiency and innovation while the Government retains a strategic role

to safeguard national interest and energy security. As at the date of this Offering Circular, the proposed listing date is 9 March 2026.

Renewable energy

Electricity in Kenya is mainly generated from renewable sources. In 2024, 44.2% of electricity generated in Kenya is from geothermal sources, 28.9% from hydro, 14.3% from wind, 3.7% from solar and 8.9% from thermal power plants. Electricity demand is forecasted to grow to 13,495 megawatts by 2043. There are planned expansions of Kenya's generation capacity to meet this demand. The Government plans for renewable energy to account for about 94% of the energy dispatched in the country.

As at June 2025, geothermal energy accounts for the largest portion of Kenya's installed capacity at 26.13% with hydro and thermal power following at 24.16% and 17.36% respectively. Solar photovoltaic systems and wind generation contribute 13.43% and 12.07% to the total installed capacity.

Due to the expiration of the Power Purchase Agreement for the Kipevu 1 power plant, Kenya's interconnected capacity decreased by 73.5 megawatts, bringing the total to 3,199.9 megawatts. However, the Sossian geothermal power plant began full commercial operations in October 2023 strengthening power supply and improving reliability in the Central Rift region. Captive power capacity as at December 2024 was 574.6 megawatts, making up 15.04% of the country's installed capacity. Captive power generation remains attractive to commercial and industrial consumers due to its cost-effectiveness, ease of setup, and supportive government policies. Captive solar PV and bioenergy capacities increased to 271.3 megawatts and 163.8 megawatts, respectively.

In 2018, the Government adopted the Energy Policy 2018, which sets out the Government's role in promoting the use of renewable energy in Kenya, such as:

- *investments*: designing incentive packages to promote the utilisation and exploitation of emerging renewable energy technologies, supporting public private partnership arrangements to accelerate investment in cogeneration developments;
- *geothermal energy*: supporting for geothermal energy development by managing geothermal exploration risk, attracting investors, streamlining the licensing and allocation process of geothermal blocks;
- *hydroelectricity*: financing conservation of hydro power water catchment areas, incentivising public private partnerships into small hydro developments;
- *frameworks*: providing a framework for connecting solar and wind generated electricity to national and isolated grids through direct sale or net metering;
- *policy*: developing and implementing a plan for renewable energy, partner with relevant institutions to support green energy certification schemes, develop and regularly review model power purchase agreements; formulate and implement an information dissemination strategy to investors on matters such as licensing, taxation and Feed-In-Tariff policy;
- *wind*: providing incentives for wind energy development, investment in transmission lines to facilitate transmission of power from areas with high wind generation potential to major load centres;
- *waste*: providing incentives for conversion of municipal waste into energy; and
- *Feed-In-Tariff Policy ("FiT Policy")*: encouraging the private sector to develop sites to generate electricity for their own consumption and for export of any surplus to the national grid.

The FiT Policy was adopted to help Kenya meet its targets to reduce reliance on fossil fuels. The FiT Policy promotes the generation of electricity from renewable energy sources by enabling power producers to sell electricity generated at a pre-determined tariff for a given period. Tariffs are available for energy generated

from wind power, biomass, small-hydro, solar, biogas and resources. The tariff is calculated based on the following factors:

- Investment costs for the plant (including the costs of feasibility studies, site development, construction costs etc.).
- Operation and maintenance costs.
- Fuel costs (where applicable).
- Financing costs.
- Estimated lifetime of the power plant.
- Amount of electricity to be generated.

Under the FiT Policy, the Off-taker (defined as Buyer of electrical energy for the purpose of selling the electricity to customers connected to the national grid or off-grid (mini-grid) systems) guarantees priority purchase, transmission and distribution of all electricity supplied by small renewable energy projects (capacity up to 10 megawatts). The purchase, transmission and distribution of electricity supplied by large renewable energy projects (capacity exceeding 10 megawatts) is subject to the terms of the negotiated power purchase agreements (PPA) between the sellers and the Off-taker. Off-takers shall recover from electricity consumers 70% of the portion of the Feed-In-Tariff except for solar plants connected to off-grid systems, where the Off-taker shall recover 85%, or as may be directed by the national Energy Regulatory Commission at the time of approval of the PPA or review thereafter. The pass through costs shall enable the Off-taker to remain revenue neutral after contracting a Feed-in-Tariff power plant.

In 2021, the Government restructured the FiT Policy so that small renewable energy sources are now classed as capacities not exceeding 20 megawatts. Cumulative contracted capacity contribution by FIT projects of up to 20 megawatts shall not exceed 10% of System wide generation capacity. PPAs will be energy based and there will be no capacity payment. Deemed Generated Energy payments shall be paid if the grid availability falls below the guaranteed levels as specified under the PPA at a rate equivalent to 75% of the applicable tariff values. All projects approved for implementation shall not require any form of security or guarantee from the Government. Through the FiT Policy, there are a total of 299 projects in various stages of development, with a total capacity of 5,044 megawatts.

As part of changes to the FiT Policy, the Government also plans to set up a Renewable Energy Auction Policy, an energy auction system for all the solar and wind energy capabilities and for other renewable energy projects larger than 20 megawatts. The renewable energy auction policy proposes to transition all solar and wind projects that do not have a PPA to the energy auction in order to have a competitive tariff. Successful bidders will sign PPAs with the Off-taker. The aim is to promote competitive bidding and lead to cost effective renewable energy programmes in Kenya. The Ministry of Energy will appoint a Renewable Energy Auction Committee to be responsible for the implementation of the Renewable Energy Auction Policy. The transition is part of the recommendations listed in the Updated LCPDP for the study period 2017-2037.

LCPDPs

Energy generation and transmission system planning is based on medium term and 20-year long-term rolling LCPDPs. The LCPDP 2022 –2041 estimates that energy demand will increase from 12,416 GWh in 2021 to 34,321 GWh in 2041 with the corresponding peak demand estimated to increase from 1,972 megawatts in 2020 to 5,526 megawatts in 2040. Under the plan, energy demand will be supplied by energy generated from geothermal, hydro, solar and wind by private and public development. See “*The Republic of Kenya—Energy*” for further information.

The renewable energy sector is subject to various risks that may affect, among other things, power generation and transmission continuity. See “*Risk Factors—Risks Relating to the Republic of Kenya—Failure to significantly improve Kenya’s infrastructure could adversely affect Kenya’s economy, competitive ranking and growth prospects, including its ability to meet GDP growth targets.*” for further information.

Role of the State in the Economy; Privatisation

General

State corporations comprise both commercial and non-commercial entities. Amongst commercial state corporations are corporations that have a “public goods” mandate, such as the Kenya Broadcasting Corporation and Kenya Ferry Services Limited, for which the Government is required to meet full cost using budgetary resources approved by the National Assembly. Non-commercial state corporations are specialised agencies that act as implementing agencies of the Government that deliver public projects and programmes, including Vision 2030 flagship projects. Commercial state corporations do not, in general, depend on Central Government funds to meet their operations, except in cases where: (i) the corporation is required to carry out social (non-commercial) programmes/activities on behalf of the Government or (ii) the corporation is unable to sustain itself on account of persistent poor performance. Some commercial state corporations are key implementing agencies for purposes of major governmental infrastructure projects and therefore receive Central Government budgetary resources for these projects. The Government from time to time also provides guarantees on their behalf for purposes of raising funds to finance projects of national importance.

The state-owned companies that have undergone partial privatisation include the Kenya Electricity Generating Company, Kenya Power and Lighting Company, Kenya Reinsurance Corporation and East African Portland Cement Company. In addition, the Government is working to conclude the partial privatisation of KPC, aiming to offer 65% of its ownership – equivalent to 11,812,644,350 shares – through an Initial Public Offering that opened on 19 January 2026. The IPO was originally scheduled to close on 19 February 2026 but has been extended to 24 February 2026 to allow additional investor participation, while all other terms remain unchanged. In December 2025, the National Treasury, via a sessional paper, proposed to partially divest 15% of its equity stake in Safaricom PLC. Following this divestment, the Government will retain a 20% stake. These transactions are expected to mobilise substantial non-tax revenue to support the Government’s delivery of critical infrastructure development. The specific state-owned companies to be privatised in the medium to long term will be determined based on the recommendations of the Privatization Commission in accordance with the Privatization Act 2023. State corporations such as Kenya Ports Authority, Kenya Railways Corporation and Kenya Airports Authority have been established under specific Acts of Parliament to carry out specific mandates on commercial principles. For such strategic state-owned entities, the immediate and ongoing strategy is to strengthen the corporate governance practices and both financial and non-financial performance of the entities.

To meet their recurrent and development budgetary requirements, non-commercial state corporations rely on internally generated revenue and/or Central Government funding. In any given year, however, these corporations post surpluses or deficits. The corporations either retain these surpluses or remit whole, or part of it, to the Central Government. According to the State Corporations Act and the PFMA, state corporations may contract commercial debts on the strength of their balance sheets with the approval of the Cabinet Secretaries of the relevant line ministry and with the approval of the National Treasury. In accordance with the PFMA, the Government may provide guarantees to borrow provided that the proceeds of the loan are utilised for capital expenditure, the guarantee is approved by the National Assembly and the loan is accommodated within the approved national debt ceiling.

In September 2024, the High Court declared the Privatization Act 2023 unconstitutional due to insufficient public participation, disrupting President William Ruto’s privatisation plans and the sale of 11 state-owned entities. The ruling emphasised the need for genuine public engagement in legislative processes, echoing past legal precedents. The court’s decision blocked the planned sale of companies such as the National Oil Corporation of Kenya.

In January 2025, the Government approved a series of recommendations aimed at reforming state corporations in line with its commitment to streamline government operations. The directive would result in the merger of 42 state-owned entities, reducing their number to 20.

The following table sets out information regarding the mandate and summary financial information of major commercial state-owned entities.

		As at and for the year ended 30 June 2024		
Name	Mandate	Assets	Liabilities	Profits/ (Losses)
		<i>(in KES millions)</i>		
Kenya Electricity Generating Company	Power generation and sale of electricity	358,086	270,772	30,080
Kenya Pipeline Company	To provide efficient, reliable, safe and cost-effective means of transporting petroleum products from Mombasa to the hinterland and to market, process, treat, deal in petroleum products and other products and goods.	120,722.92	31,637.809	6,867.25
Geothermal Development Company	To fast-track development of geothermal resource, which is indigenous, abundant, affordable, reliable, and environmentally-friendly source of electricity.	117,708.51	6,563.47	111,145.04
National Housing Corporation	To play a principal role in the implementation of the government's Housing Policies and Programmes and provision of affordable housing.	22,572.14	1,773.04	20,799.10
Kenya Airports Authority	To construct, operate and maintain aerodromes and other related facilities.	1,056,584.54	28,235.40	1,028,349.14
Kenya Ports Authority	To maintain, operate, improve and regulate all scheduled seaports situated along Kenya's coastline.	351,531.71	80,097.11	271,434.60
Kenya Railways Corporation	Provide effective railway services and promote, facilitate and participate in railway networks developments	788,484.59	904,065.43	(115,580.85)

Recent Developments in relation to Certain State-Owned Enterprises

Unbundling of Kenya Railways Corporation

In January 2024, the Railways Amendment Bill 2024 was approved by the Cabinet. The Bill proposes to unbundle Kenya Railways into three entities to enhance efficiency of the Kenyan railway system and improve regional competitiveness. Kenya Railways will be unbundled into three segments that will in turn be separately responsible for: (a) the commercial business, (b) asset management, and (c) regulation. In particular, the Bill will enable private investors and County Governments to lead rail development projects (as opposed to the Government), and Kenya Railways would function as a regulator in respect of such developments.

Restructuring of Kenya Power and Lighting Company

The COVID-19 Pandemic caused both supply and demand shocks across the sector and has put existing energy systems under pressure. Electricity consumption declined by about 15.4% in the first three months of the pandemic and the sector revenue shortfall continued as a result of lower sales into the first half of FY 2020/21. Kenya Power has also struggled with less-than-expected demand as a result of the slow shift to electricity usage in rural regions and a reduction in tariff by 15% which eroded gains that the business had met in terms of ensuring financial turnaround. Kenya Power also has large foreign exchange exposure with 65% of PPP projects denominated in foreign currency and 90% of its loan book denominated in foreign currency. The National Treasury chaired a Kenya Power Financial Stability Task Force to review the financial status of the Energy Sector, with particular focus on Kenya Power. The Task Force recommended a government granted moratorium for payment of principal & interest on on-lent loans which was approved for two years for KETRACO and one year for Kenya Power and KenGen. Kenya Power also requested for the extension of the moratorium for another one year which was approved and extended to June 2024. As of December 2024, Kenya Power was anticipating to capitalise on lifting of the moratorium to increase electricity sales as peak demands increase. To manage foreign exchange exposure, Kenya Power has also sought approvals for refinancing of foreign debt into KES. A key project initiated by the Government was a proposed transfer of Kenya Power transmission assets to KETRACO to strengthen its balance sheet. This was aimed to harness efficiencies with KETRACO already having a large proportion of transmission length and address foreign exchange challenges, annual debt service and improving the working capital of the business. Currently, identification of assets for transfer is on-going for the valuation process.

As the effects of the pandemic dissipate, Kenya Power has recorded positive business performance. The Company announced a KES 24.47 billion profit-after-tax for the financial year 2024/25. This was driven by lower costs of sales, higher electricity unit sales, and system efficiencies. Moving into 2026, Kenya Power aims to increase efficiencies in power supply and diversify its revenue streams. Kenya Power is advancing the transformer metering project to improve energy balance and system efficiency. Kenya Power has also commenced the Government Digital Superhighway Project which involves rolling out the last mile fibre optic cable connectivity to approximately 6,000 government institutions nationwide. It plans to increase economic productivity in the Eastern Africa region by launching and promoting a regional power market. The rationale is to integrate shared physical infrastructure with mechanisms for trading low-cost energy including renewable energy sources. This move aims to establish Kenya Power as a regional power supply and distribution giant which will positively contribute to its balance sheets.

Kenya Airways

As of November 2023, the Government had not provided any new direct budget support to Kenya Airways in the preceding year. Kenya Airways reported operational profits in the first six months of 2023, but incurred losses due to exchange rate depreciation. In 2024, Kenya Airways has demonstrated a strong performance turnaround, marking its first profit since 2013, a significant milestone driven by its Project Kifaru strategy. This plan emphasises operational excellence, financial discipline, and an enhanced customer experience. For the first half of the year ending June 2024, the airline reported a net profit of KES 513 million, a major improvement from the KES 21.7 billion loss reported during the same period in 2023. For the first half of the year ending June 2025, the airline reported a net loss of KES 12.2 billion. The novation of Kenya Airways' guaranteed external debt, for which the Government took up the servicing obligations in 2022 following a call on the guarantee, has also been completed. The authorities agree to continue with the least-cost approach to the exchequer in providing any support to the SOEs.

State-Owned Financial Institutions

The Government owns a substantial majority of the capital stock of several financial institutions such as the Development Bank of Kenya and the Consolidated Bank of Kenya, although it intends to decrease its participation in the financial system over the medium term, providing assistance only to specific sectors of the Kenyan economy.

Following an acquisition in 2019, the National Bank of Kenya (“NBK”) became a wholly-owned subsidiary of KCB. Subsequently, in 2024, Access Bank Plc, a leading pan-African financial institution headquartered in Nigeria, entered into a binding agreement to acquire NBK from KCB Group. The transaction was subject to receipt of all requisite approvals, including from the Central Bank of Kenya, the Competition Authority of Kenya, and the Central Bank of Nigeria. The acquisition was approved by both Kenyan and Nigerian competition and banking regulators, and was completed on 30 May 2025. Accordingly, NBK has become a wholly-owned subsidiary of Access Bank Plc, and the Government of Kenya will no longer retain any direct or indirect stake in NBK. In the long term, the privatisation policy is expected to enable full divestiture of Government ownership in commercial banks.

Under the parastatal reform programme, ten parastatals were transferred to the Agriculture and Food Authority (“AFA”), following the enactment of the AFA Act 2013. The AFA now performs the functions of the ten parastatals, and during the transition in order to enable the transfer of the functions, assets, and liabilities of those institutions and their accounts have been frozen.

The Government is currently reviewing the parastatal sector for reforms, which could include privatisation of state-owned corporations and mergers of certain state corporations. The Government is considering classifying state corporations as commercial and non-commercial, separate institutions overseeing each class of corporations. A proposal provides that the Government establish a Government investment corporation to serve as a holding company for commercial state corporations.

Major Infrastructure Projects

Kenya enjoys an extensive transportation network that remains superior to that of its neighbours. Kenya is the transportation and logistics hub for Eastern and Central Africa, and Nairobi is the largest city between Cairo

and Johannesburg. The Port of Mombasa is a major gateway for the region, serving over 200 million people in northern Tanzania, Uganda, Rwanda, Burundi, and the DRC.

In order to ensure every Kenyan enjoys the benefits of an expanded road network, the Government has been scaling up the construction of modern highways as well as urban and rural roads in every part of the country. This will continue to open up many areas to economic activities and spur growth in other sectors of the economy. Kenya has an estimated 246,757 Km of total road network. This comprises national trunk roads, which are maintained, rehabilitated, and developed by the national road agencies, and county roads which are developed and maintained by the respective County Governments. In respect to key national trunk roads, the construction of the Nairobi Expressway Project, a US\$3.5 billion initiative involving the construction of a 419 Km, 4-lane expressway in Nairobi, and Africa's largest Public-Private Partnership funded project (the Nairobi-Mau-Summit Express Way) which is a priority under Kenya's Medium-Term Plan IV, involving the upgrade and dualling of approximately 233 Km of the A8 corridor from Rironi to Mau Summit into a 4-6 lane tolled highway, launched in November 2025. This Public-Private Partnership will have significant positive impacts on the economy by decongesting Nairobi's gateways on the part of the Expressway Project and by opening up the economies of and increasing connectivity in Western, Rift Valley and Central Kenya on the part of the Nairobi-Mau-Summit Project.

For FY 2024/25, Kenya significantly increased its investment and activity in transport infrastructure. The roads budget rose to KES 171.9 billion, with development, rehabilitation and maintenance being prioritised. The State Department for Roads set ambitious targets: about 2,200 km of new road construction, 420 km of rehabilitation, and maintenance works on over 122,600 km of roads. Concurrently, plans to expand Jomo Kenyatta International Airport include a new terminal, second runway and major upgrades to facilities (access roads, drainage, baggage handling), part of a KES 258 billion expansion package with projected completion by 2027. Kisumu International Airport is also set for expansion, including runway extensions and a cargo terminal/cold storage to facilitate perishable exports. Several previously stalled road projects (for example, the Mamboleo-Kipsitet road) resumed following the unlocking of funding.

In December 2025, the Cabinet approved plans to establish both an infrastructure fund and a sovereign wealth fund as part of efforts to finance large-scale projects while reducing pressure on public borrowing. The funds are expected to support priority investments such as roads, power generation and other critical infrastructure without further straining government finances.

In July 2025, Kenya Roads Board securitised a portion of the Road Maintenance Levy Fund, specifically committing KES 7 of every KES 25 collected per liter of fuel for the next decade. Through a SPV, the programme raised KES 175 billion upfront from private investors, which is being used to clear verified contractor arrears and revive over 580 stalled road projects. Furthermore, in July 2025, the Sports, Arts and Social Development Fund (SASDF) securitised a portion of its future levy receivables through an Infrastructure Asset-Backed Securities (IABS) programme, issuing Notes via an SPV and raising approximately KES 45 billion upfront from private investors, with the proceeds applied toward the financing of the Talanta Sports City Stadium project. These securitised arrears are not recorded as debt of the Republic. The Government may consider similar securitisation transactions in the future as part of its broader financing strategy.

Kipevu Container Terminal

The development of the new container terminal at the port of Mombasa on an area of 100 hectares at the western side of the existing Kipevu Oil Terminal is complete and operational. It has a yard capacity of 4,135 ground slots, 1,090 and 3,045 slots for yard 20 and 21, respectively. The new terminal is composed of two berths of Panamax and Post-Panamax container vessels of 20,000 tons and 60,000 tons, respectively. The whole project is divided into three phases with phases 1 and 2 completed and handed over to the Kenya Port Authority (KPA). The Terminal will create an additional capacity of 1.2 million TEU (or more depending on the cargo dwell times). It involves reclamation of the sea to create a terminal with three berths measuring 15 metres, 12 metres and 11 metres deep. Phase 1 of the project was completed and handed to in March 2016. Phase 2 involved construction of berth 22 which is 320 metres long and 15 metres deep and was completed in May 2022. Phase 3 will be development of berth 23 which will be 230 metres in length, 12 metres deep and a side berth of 4.5 metres deep and 80 metres long. There will also be construction of additional stacking yards, procurement of equipment and dredging works.

Expansion of Railway Transport

The railway design and its current state of repair limits its capacity and delivery speed and cannot therefore meet future demand for rail transport in the country and the region. To facilitate trade and industrial development within the East Africa Region, the Government believes that Uganda and the DRC need a fast and dependable means of access to the part of Mombasa that can facilitate trade and industrial development. In view of expected local and international demand for reliable transport, the Government has commenced the development of the Standard Gauge Railway (“SGR”) between Mombasa through Nairobi to Malaba with connectivity to Kisumu, Uganda, Rwanda and the DRC. With the construction of the SGR from Mombasa to Malaba, the Government expects rail transport to handle 50% of the freight cargo throughput, thus easing the pressure on roads, lowering the cost of doing business and enhancing trade and regional integration in East Africa.

The Government upgraded the existing Meter Gauge Railway (“MGR”) network and associated infrastructure to improve its operational efficiency, reliability and safety. This was achieved through rehabilitating sections of the mainline (Mombasa - Konza, Nairobi-Konza Longonot-Malaba and Nairobi-Kikuyu) and branch lines including: Thika–Nanyuki (177 Km), Nakuru–Kisumu (217 Km), Kisumu–Butere (69 Km), GilgilNyahururu (78 Km) and Leseru–Kitale (65 Km) and the Nairobi Commuter Rail (NCR) network of 165 Km. An MGR rail-link of 23.5 Km has been constructed from Mai-Mahiu to connect with the Malaba MGR from Longonot Suswa MGR station. The Longonot Suswa – Malaba MGR is also being upgraded to provide a better network to Kampala, Uganda. In addition, Nakuru-Kisumu MGR and Nairobi-Nanyuki lines have been upgraded, the Nakuru-Kisumu line will support the newly upgraded inland water route in Kisumu to provide short accessible routes to Uganda, Burundi, Tanzania and DRC. This project is funded through Government funds. The SGR also has a new 43 Km MGR link from Suswa-Longonot to Maai Mahiu SGR to connect with the Rehabilitated Longonot-Malaba Metre Gauge Railway to provide seamless railway transport awaiting completion of the SGR to Kisumu and Malaba. Other MGR associated infrastructure recently implemented include: a) Revitalization of Kisumu Port with rehabilitation of MV Uhuru and MV Peeda; link-span rehabilitation; Rehabilitation of the 5.5 Km railway line from the Port to the National Cereals and Produce Board (NCPB) and Reinstatement of track line within the Port and Yard area; MV Uhuru commenced operations between Kisumu – Port Bell in Uganda in 2020; b) Establishment of Kenya Railways Transit Shed (KRTS) which is a National Deconsolidation Centre in Nairobi. The Centre is a bonded customs facility aimed at decongesting ICD Nairobi and lowering the cost of transporting cargo for SMEs within Nairobi and its environs; c) Upgrade of learning facilities at the Railway Training Institute (RTI) main campus and operationalisation of the Kisumu Campus for Marine Safety and Training in which two standard, one executive hostel blocks and marine safety training facilities were constructed; and d) Establishment of a cargo handling facility at Malaba to facilitate intermodal connectivity for transit freight. In September 2025, the President commissioned the Mombasa Commuter Rail Service linking Miritini SGR terminus to Mombasa’s central business district. The project involved the construction of modern passenger stations in Mombasa town and Miritini, the building of a 2.3-kilometre railway bridge across the ocean at Makupa, and the rehabilitation of 16.6 kilometres of existing Metre Gauge Railway (MGR) line. The Mombasa Commuter Rail Service is designed to enhance last-mile connectivity for passengers using the Madaraka Express Passenger Service, while also serving local commuters along the corridor.

The Lamu Port-Southern Sudan-Ethiopia Transport Corridor

The LAPSSET corridor project is another major transport and infrastructure project of the Government. The LAPSSET Corridor Program is instrumental in promoting regional integration and is anticipated to enhance economic interdependence among participating countries, thereby fostering a sense of unity and cooperation. This increased integration is critical for Africa’s ambition to establish a Continental Free Trade Area (AfCFTA), as it directly supports the free movement of goods, people, and services across borders. Underpinning its significance, in 2025, the Government enhanced security along the construction, with multi-agency teams deployed under Operation Amani Boni to secure construction works in Lamu, thereby reducing previous security-related delays and providing assurance to contractors.

LAPSSET is intricately linked to the Programme for Infrastructure Development in Africa Priority Action Plan 2 (PIDA PAP 2) for the period 2021-2030. PIDA PAP 2 is a strategic continental initiative, developed under the auspices of the African Union Commission (AUC), the NEPAD Agency, the African Development Bank (AfDB), and the United Nations Economic Commission for Africa (UNECA). The objective of the project is to open up access to northern Kenya, provide a reliable transport corridor for Ethiopia and Southern Sudan,

promote trade between regions and enhance socio economic activity along the corridor and open up new tourist destinations by initiating development of resort cities. In January 2015, the project was awarded the status of a high-impact development project regionally under the Presidential Infrastructure Championship Initiative of the AU. The project includes the following components:

- a standard gauge railway line;
- a new road network;
- an oil pipeline, crude oil pipeline and refined oil pipeline from Lamu to Juba and Ethiopia;
- an oil refinery at Lamu with capacity of 120,000 barrels per day;
- a modern oil terminal at Lamu port to facilitate tanker loading and offloading;
- a refined petroleum products pipeline from Lamu connecting to the existing Mombasa Kampala pipeline;
- international airports at Lamu, Isiolo and Lokichoggio;
- a free port at Lamu (Manda Bay) including a total of 32 berths to handle container, conventional and bulk cargo vessels;
- Lamu port management building, Lamu port police station and staff housing, as well as a dispensary and club house;
- three resort cities in Lamu (at Manda Bay), Isiolo and on the shores of Lake Turkana; and
- 1,420km 220 kV double circuit electricity transmission line along the LAPSSSET corridor.

Construction of the first three berths at Lamu commenced in October 2016. The three berths are currently completed. The first berth opened in October 2019. The second and third berths were completed in 2020 with only yard construction pending. The second and third berths were opened in December 2021.

Major auxiliary facilities are in place, with the Port Headquarters and the Lamu Port police station, Port Management Housing Scheme and port workshop completed. Currently the Port Management Houses are occupied by port security/police officers. Electric power has been delivered from Rabai to Lamu via a 220 kV line to power the infrastructure. The water reticulation network to the port has been undertaken. The Government has awarded consultancy services contracts for construction of roads from Lamu to Garissa and Garissa to Isiolo. Construction of a 505 Km road from Marsabit and from Moyale was completed in 2016. The Garsen-Witu-Lamu (110 Km) road, part of the LAPSSSET Corridor alternative routes that connects the 10 Km Lamu Port Access Road to Garissa County was commissioned while the construction of the Lamu-Garissa-Isiolo (Phase 1) road, a major LAPSSSET Corridor Highway is underway.

Fundraising efforts are underway for the construction of the 1,800 Km Lamu South Sudan and Ethiopia Railway and the Lamu and Lake Turkana airports. The Government expects the cost of the projects to reach KES 1.6 trillion (US\$18.1 billion). The Government anticipates that funding for the various components is expected to be made through a public-private partnership of government and one or more private sector companies.

With respect to the crude oil pipeline, on 11 November 2017 Uganda and Tanzania commenced construction of an oil pipeline from Hoima, Uganda to Tanga, Tanzania on the grounds that this route would be shorter and more secure than a pipeline routed from Hoima through Lokichar to Lamu. The construction of this pipeline may make the completion of the LAPSSSET project more uncertain. For more information, see “*The Republic of Kenya—Regional Relations—Uganda.*”

Improvement of Shipping and Maritime Facilities

The Government hopes to implement a programme to build port capacity of 50 million tonnes and transform Kenya into a maritime hub by facilitating trans-shipment of cargo at the port of Mombasa. In order to achieve this goal, the Government plans to improve port efficiency, construct a second container terminal at the

Mombasa port, provide new handling facilities at the Mombasa port, develop Dongo Kundu Free Trade Port and modernise ferry services to increase passenger capacity per year.

Phase I of the programme to develop the Mombasa port was completed in February 2016 and the terminal became fully operational in April 2016. The second terminal with a capacity of 1.2 million twenty foot equivalent units has been completed and is fully operational. The KES 38.0 billion (US\$ 350 million) project was funded by a JPY 26.7 billion loan from the Japan International Cooperation Agency. In the last three years, Phase II of the Mombasa port development was completed, increasing container capacity by 450,000 TEUs to 2.1 million TEUs. Operationalisation of first three berths of the Lamu Port was completed in June 2022 and construction of the New Kipevu Oil Terminal (KOT) was also completed at the Mombasa port in February 2022, enabling handling of at least four post-Panamax vessels. Nairobi's ICD capacity has also been improved from 450,000 designed TEUs to 628,000.

Amongst other port development and construction projects, plans are underway to purchase a second wagon ferry from Kenya Shipyard Ltd to improve inland water transport across Lake Victoria. In this regard, Kenya marked a milestone in its ambitions to increase trade and expand its capabilities in shipbuilding and repair. The country celebrated the commissioning of its first domestically-built ship, the *Uhuru II* which will operate on Lake Victoria transporting dry cargo and fuel. To further increase the capacity, the government has earmarked the development of several port projects in the next five years including development of Dongo Kundu Berth 1 and 2 and channel dredging for the Mombasa port. Kenya is implementing the Mombasa Special Economic Zone (MSEZ) at Dongo Kundu with the government of Japan committed to financing the basic infrastructure of Phase 1 of the MSEZ through a concessional loan of US\$ 210.8 million (JPY 37,090 million) and grant assistance of US\$ 58.9 million. The loan component will support the development of Berth 1, the port access road and power transmission. The grant component covers water supply and drainage around the port. The Government will provide the necessary infrastructure for MSEZ and invite the private sector to develop and operate industries on the 3,000 acres of land owned by the Government. The tender for civil works (port and link road) has been concluded, and KPA is awaiting the signature of the government of Japan's to the contract.

In 2025, the Government has sustained momentum on its maritime-hub strategy. For instance, the Construction of Berth 1 at the Dongo Kundu Free Trade Port/Mombasa Special Economic Zone (MSEZ) advanced after conclusion of civil-works tenders, with basic infrastructure financed through the ongoing Japan International Cooperation Agency (JICA) concessional loan and grant package. The Kenya Ports Authority (KPA) has also initiated a new channel-dredging programme at the Port of Mombasa to maintain deeper drafts for post-Panamax vessels and invited bids for long-term maintenance dredging.

Increasing Electricity Availability through Power Generation

The Government plans to improve the energy infrastructure network and promote development and use of renewable energy sources to create a reliable, adequate and cost-effective energy supply regime to support industrial take off for economic growth. One of the key projects prioritised for implementation is the development of an additional 3,085 megawatts of geothermal energy at Olkaria, Menengai and Silali Bogoria. The Government expects the cost of the project to reach KES 753.9 billion (US\$ 8.7 billion). The Government anticipates that funding will be made through a public-private partnership of Government, development partners and one or more private sector companies. Construction of the Olkaria V Geothermal plant, which has a capacity of 165.4 megawatts of geothermal energy, and the Garissa solar plant, which has a capacity of 50 megawatts of solar energy, is complete. In July 2022, the Government officially commissioned Olkaria I Additional Unit (AU) 6 Geothermal Power Plant, which injects an additional 86 megawatts into the national grid. The Government has also launched the construction of a 310 megawatts power plant in Lake Turkana.

Other key projects are the development of multi-purpose dams such as the High Grand Falls dam (700 megawatts), the Magwagwa dam (120 megawatts) and the Nandi Forest dam (50 megawatts). In October 2023, Kenya's National Irrigation Authority signed a project development agreement (PDA) with UK construction firm GBM Limited to undertake final project studies and designs for the implementation of the High Grand Falls dam. The Nandi Forest dam Project comprises the construction of a dam with a design total plant output of 50 megawatts and a reservoir to supply water to Kaimosi in Vihiga Counties and also provide water for irrigation. The Government anticipates that funding will be made through a public-private partnership.

The Government also plans to upgrade and expand the national power transmission and distribution network to improve supply and reliability, reduce losses and connect two million new customers. The Government aims

to connect 6,304 public facilities, including electrifying 2,600 main public facilities (trading centres, secondary schools, health centres and dispensaries) and other facilities such as primary schools, tea buying centres, water supply systems and places of worship, amongst others. Kenya achieved an electricity access rate of 76% in 2022 with over 8.9 million customers connected to electricity as of 30 June 2022. The amount increased from approximately 8.2 million in 2021.

There are also several regional interconnectors under implementation, to increase and facilitate the regional power trade. The lines are the 400kV Kenya to Tanzania interconnector, the 400kV Kenya to Uganda interconnector and the 500kV HVDC Kenya to Ethiopia interconnector.

In July 2025, Kenya's national electricity grid recorded a new all-time peak demand of 2,362.28 megawatts, reflecting rising industrial activity, rapid urbanisation, and higher household energy use. According to figures released by the Energy and Petroleum Regulatory Authority (EPRA), the milestone was achieved on 23 July and was largely sustained by the Kenya Electricity Generating Company PLC (KenGen).

EPRA reported that KenGen's geothermal plants supplied 13,678.35 megawatts-hour—about 31.85% of total energy dispatched—while its hydropower stations contributed 10,915.93 megawatts-hour, or 25.42%. Combined, these sources accounted for more than 57% of the country's daily electricity generation, underscoring KenGen's key role in ensuring a stable, clean and affordable power supply.

Airport Expansion

Jomo Kenyatta International Airport is Kenya's largest aviation facility, and the busiest airport in east and central Africa. It serves as a transit hub for major airlines as well as the gateway for visitors to other airports in Africa. The airport also serves as a major cargo centre for both inbound and outbound goods.

JKIA has recently been expanded by the addition of two terminal buildings and the refurbishment and expansion of existing terminal buildings. Passenger capacity has increased significantly, and recently, JKIA achieved category one status, which now enables direct flights to operate between Nairobi and the United States. Kenya Airways launched direct flights from Nairobi to New York in October 2018.

The Government has also announced the planned construction of a 4.9-Km second runway informed by the JKIA Master Plan of 2010, including connecting taxiways, additional parking stands for aircraft, and an air rescue firefighting unit. The second runway will support more air traffic and facilitate increased tourism and business travel and expedite a two-way cargo traffic, as well as achieving the strategic objective of making the airport a regional hub. The development objective of the proposed project is to enhance regional integration and expand international trade via improved regional and international air connectivity by improving reliability of air transport to and from JKIA by reducing aircraft delays at peak hours and costly flight diversions arising from incidences on existing runway, and abiding constraining configuration of the existing single runway facility that undermines its usability and overall operational efficiency of the airport; and expand airfield capacity for the new generation (long-haul) aircrafts that would be attracted to JKIA after the airport attained in 2017 category I status. It is expected that the new runway will increase the existing annual service volume by approximately 13%.

The Government continues to develop several airstrips to enhance connectivity within Kenya and its neighbouring countries, including the rehabilitation and expansion of Lokichoggio Airport, Ikanga Voi Airstrip, Kabunde Airport, Suneka Airstrip, Wajir Airport, Manda Airport and Nanyuki Airstrip.

In 2025, plans for Jomo Kenyatta International Airport's second runway progressed to the procurement and environmental-approval stages, with government confirming the project remains a priority for easing congestion and attracting more long-haul flights. Regional upgrades also advanced, including runway and terminal works at Wajir and Manda airports and design studies for extending Nanyuki Airstrip, strengthening Kenya's position as an East African aviation hub.

Crude Oil Pipeline

In 2017, Kenya signed an agreement with a consortium comprising of Tullow Oil, Africa Oil and A.P. Moller-Maersk for a feasibility study on a proposed pipeline to transport crude oil from the country's oilfields to Lamu. Kenya discovered commercial oil reserves in its Lokichar basin in the country's northwest in 2012.

The pipeline is expected to run 820 Km between Lokichar and Lamu on Kenya’s coast. The consortium has indicated that survey work on the pipeline was already being carried out and the consortium would likely make a final investment decision on its Kenya project. In June 2023, Tullow Oil took up the sole ownership of the Turkana operation following the exit of its joint venture partners.

Proven commercial discoveries of oil and natural gas in the South Lokichar basin resulted in Tullow Oil and its partners submitting a draft South Lokichar field development plan, which has been approved by the Government, aiming to start commercial production by December 2026.

FID of the project was to be approved in 2024. The FID has been delayed due to pending approvals and the need for a strategic partner. Tullow Oil entered negotiations with Gulf Energy Ltd to sell a majority stake in its Kenyan assets, while retaining a 30% cost-free participation in potential future developments. As of the date of this Offering Circular, Tullow Oil has successfully completed the sale of its entire working interest in Kenya to Auron Energy E&P Limited, an affiliate of Gulf Energy Ltd, following satisfaction of all conditions precedent under the Sale and Purchase Agreement (SPA) announced on 21 July 2025. Additionally, the Government has allocated US\$9 million in the 2025/26 budget for research, feasibility studies, and project preparation related to the pipeline.

Employment and Wages

The total jobs created in the economy increased by 782.3 thousand in 2024 compared to 848.2 thousand in 2023, representing a 2.4% growth rate. The informal sector contributed 90% to the new jobs created representing 703.7 thousand jobs in the year under review.

The total number of people employed in the modern and informal sectors, outside small-scale agriculture and pastoralist activities, stood at 20.8 million persons in 2024 compared with 20.0 million persons in 2023.

The following table sets out recent employment data trends per sector over a five-year period (2020 – 2024):

	As at 30 June				
	2020	2021	2022	2023	2024
	<i>(in thousands)</i>				
Modern Establishments Urban and Rural Areas.					
Wage employees	2,742.6	2,906.1	3,015.4	3,138.3	3,213.8
Self-employed and unpaid family workers.....	156.1	163.7	168.1	172.4	175.5
Informal sector ⁽¹⁾	14,508.0	15,261.8	15,964.7	16,685.6	17,389.3
Total	17,406.7	18,331.6	19,148.2	19,996.3	20,778.6

(1) Estimated.

Source: Kenya National Bureau of Statistics.

Wage employment in the modern sector increased by 2.4% from 3.13 million persons in 2023 to 3.21 million persons in 2024. Further, the total number of self-employed and unpaid family workers within the modern sector was estimated to have grown from 172.4 thousand persons in 2023 to 175.5 thousand persons in 2024.

The nominal wage bill rose by 7.2% from KES 2,798.6 billion in 2023 to KES 2,998.8 billion in 2024. The private sector wage bill went up by 7.7% to stand at KES 2,117.4 billion in 2024, while the public sector wage bill rose by 5.8%. The contribution of the public sector to the total wage bill in the modern sector reduced from 29.8% in 2023 to 29.4% in 2024.

The following table sets out wage employment in the formal sector by industry for the periods presented.

	As at 30 June				
	2020	2021	2022	2023	2024
	<i>(in thousands)</i>				
Agriculture, forestry and fishing	280.6	295.3	299.7	302.4	308.9

Private Sector

In 2024, the leading industries providing wage employment in the private sector were manufacturing, agriculture, forestry and fishing, and wholesale and retail trade accounting for 15.9, 14.1 and 12.6% of the total private sector employment, respectively. Accommodation and food service activities recorded employment growth of 6.1%. Other industries that recorded marked growths during the review period were other service activities at 4.8%, education and administrative support service activities, each at 3.4%.

Public Sector

Wage employment registered a growth of 3.1% in 2024, 5.9% in 2023, 1.6% in 2022, 4.4% in 2021, and 2.6% in 2020.

During the year under review, electricity, gas, steam, and air conditioning supply recorded the highest growth of 6.9%. This was followed by human, health and social work activities; and education which registered a growth of 5.5% and 3.8%, respectively. The leading industries with highest employment levels in the public sector were education, public administration, and defence; compulsory social security which accounted for 45.2% and 34.4% of total employment in the sector, respectively.

Informal Sector

The informal sector represents an important part of the economy and plays a major role in employment creation, production and income generation. The Kenyan informal sector covers mainly small-scale activities that are typically semi-organised, unregulated and use simple technologies. With shrinking job creation in the formal sector, most of the youth who exit from learning institutions and individuals who leave formal employment can still join the informal sector. The majority of the small businesses such as retailers, street vendors and other service providers fall in the informal sector. The sector has also expanded to cover areas such as manufacturing and information and communications. The informal sector plays a central role in the economy as a source of employment opportunities for persons exiting from the formal sector of the economy. The sector also plays a vital role in the economic development of the country by increasing competition and fostering innovation, besides generating employment. The inter-linkages between the informal sector and the formal sector including Government are also crucial in fostering growth in the sector. The Government expects to build on the current tax and revenue reform movement to seal tax loopholes, broaden the tax base to ensure equity in the tax system, review and modernise existing tax legislation, and enhance the capacity of tax administration including widening the tax brackets to include the informal sector.

The informal sector has registered steady growth in employment over the last five years. In 2024, the number of persons estimated to have been engaged in the informal sector went up by 4.2% to 17.4 million compared to the 16.7 million registered in 2023. In the year under review, the number of persons engaged in the informal sector grew by 3.9%.

The following table sets out the estimated distribution of the informal sector by industry for the periods presented.

	Year ended 31 December				
	2020	2021	2022	2023	2024
			(in thousands)		
Manufacturing	2,874.2	3,067.1	3,181.0	3,371.8	3,487.9
Construction	406.6	416.0	419.7	457.3	459.3
Wholesale and Retail Trade, Hotels and Restaurants	8,879.3	9,114.5	9,320.9	9,634.9	10,315.1
Transport and Communications ⁽¹⁾	390.1	431.9	444.9	482.5	506.9
Community, Social and Personal Services	1,334.3	1,521.6	1,846.4	1,981.4	1,828.5
Others	623.3	710.8	751.8	757.7	791.6
Total	14,508.2	15,261.8	15,964.7	16,685.6	17,389.3

(1) Includes mainly support services to transport activity.

Minimum Wage

The Salaries and Remuneration Commission (“SRC”) is established under the Constitution, with its functions, powers, governance, and procedures provided for in the Salaries and Remuneration Commission Act, 2011. The SRC’s mandate is to set and periodically review the remuneration and benefits of State officers, and to promote harmony, equity, and coherence in the public service remuneration structure and banding system. In carrying out this mandate, the SRC is required to ensure that the overall public compensation bill remains fiscally sustainable, while enabling the public service to attract and retain the requisite skills, recognise productivity and performance, and uphold transparency and fairness.

The Government has had an active minimum wage setting policy since Kenya's independence in 1963. Minimum wages apply to all salaried employees who are at least 18 and work in the formal sector. However, the minimum wages do not apply to the skilled and professional personnel.

On average, the monthly basic minimum wage for the agricultural industry was KES 9,014 in 2020, KES 9,014 in 2021, KES 10,107 in 2022, KES 10,107 in 2023 and KES 10,714 in 2024. As of the date of this Offering Circular, there has been no new minimum wage gazetted.

The following table sets out the average monthly basic minimum wage for the agricultural sector.

	Year ended 31 December

Social Security

The National Social Security Fund (“NSSF”) provides social security protection to workers in the formal and informal sectors and in the private and Government sectors. Both the number of registered employers and employees have increased in line with general employment rates.

In December 2013, the National Social Security Fund Act 2013 (the “NSSF Act”) transformed the NSSF from a provident fund, which fund a limited number of lump sum benefits, into a social security scheme paying retirement pensions as well as additional benefits such as invalidity and funeral grants. The NSSF Act also increased contribution rates by members and employers significantly from the prior capped amount of KES 400.0 to a total of 12.0% of a member’s pensionable earnings. In June 2014, certain trade unions brought legal action against NSSF alleging that certain provisions of the NSSF Act, including those related to mandatory contributions to NSSF are inconsistent with the Constitution. The NSSF Act was declared unconstitutional by the Employment and Labour Relations Court (“ELRC”) on 19 September 2022. The matter was appealed, and the Court of Appeal overturned the decision of the ELRC and declared that the NSSF Act was constitutionally enacted rendering the NSSF Act effective. The NSSF issued a notice on 9 February 2023 informing employers that the rates were effective immediately.

The NSSF Act divides a member's contributions into Tier I and Tier II. Tier I is based on emoluments up to the average minimum wage, while Tier II is based on emoluments above this level. Tier I contributions must be paid into the NSSF, whereas an employer can 'opt out' of the NSSF and make Tier II contributions to another retirement benefits scheme, subject to fulfilling certain requirements. In determining pensionable earnings, the NSSF Act sets an upper limit at the average national wage in the first year but rising to four times the average national wage in the fifth year. Annual contributions increased by 2.5% in 2020, 6.5% in 2021, 7.5% in 2022 and 157.5% in 2023 and benefits increased by 0.8% in 2019, 10.2% in 2020, 33.0% in 2021, 7.9% in 2022, 22.9% in 2023, and 21% in 2024.

The following table sets out details of registered employers, registered employees, annual contributions and benefits to members of the NSSF.

The Social Protection Fund was established to minimise vulnerability across gender lines, reduce excessive inequality and disparities between social strata and to mitigate against any distinction and exclusion. The funds allocated to older persons increased from KES 18,343.5 million in 2020/21, KES 17,543.6 million in 2021/22 and to KES 19,561.7 million in 2023/24, and 30,058.3 in 2024/25. Direct cash disbursement increased from KES 18,325.3 in 2020/21, KES 18,169.5 million in 2021/22, KES 17,811.4 in 2022/23, KES 20,995.1 in 2023/24, and KES 15,029.1 in 2024/25.

The Social Protection Fund for orphans and vulnerable children (“OVC”) started in 2004 in response to the strong need to protect and assist the highly vulnerable children and to strengthen the capacity of the households to protect and care for OVC within their families and communities. The fund is currently directed to poor households taking care of OVC through the department of children's services. The increased allocation and direct cash disbursements were attributed to increased capital transfers and an increase in the number of targeted households. The funding allocated for OVC increased from KES 7,063.2 million in 2020/21, KES 7,930.7 million in 2021/22 and 2022/23, KES 6,217.0 in 2023/24, and KES 10,655.3 in 2024/25. The amount disbursed reduced from KES 7.1 billion in 2020/21, KES 6.7 billion in 2021/22, KES 6.5 billion in 2022/23, KES 6.2 billion in 2023/24 and KES 5.3 billion in 2024/25.

The following table sets out the funds allocated for social protection by the National Government.

Social Protection Financing is undertaken pursuant to the Kenya National Social Protection Investment Plan, the Kenya National Social Protection Strategy and the Proposal for Sustainable Financing for Social Protection. The Government is currently undertaking a review of the Social Assistance Act, 2013, National Social Protection Policy and the Children Act, 2001. Pursuant to this legislation, the Government aims to strengthen

and develop its information systems for the management of social protection as well as its monitoring and evaluation frameworks.

BALANCE OF PAYMENTS AND FOREIGN TRADE

Balance of Payments

The balance of payments records the value of the transactions carried out between a country's residents and the rest of the world. The balance of payments is composed of:

- The current account, which includes:
 - net exports of goods and services (the difference in value of exports minus imports);
 - net financial and investment income;
 - net transfers; and
- The capital and financial accounts, which comprise the difference between financial capital inflows and financial capital outflows.

The following table sets forth Kenya's balance of payments for the periods indicated:

Current Account

In 2020, the current account deficit improved to KES 350.3 million (3.3% of nominal 2020 GDP) mainly reflecting reduced imports despite lower receipts from services and secondary income transfers.

In 2021, the current account deficit widened to KES 553.2 million (4.6% of nominal 2021 GDP) mainly reflecting increased expenditure on imports and payment for services.

In 2022, the current account deficit further widened to KES 566.6 million (4.2% of nominal 2022 GDP) mainly reflecting an increase in imports.

In 2023, the current account deficit improved to US\$2,728 million (2.5% of nominal 2023 GDP). The narrowing of the current account deficit reflected lower imports of energy and all goods with the exception of food, attributed to relatively lower international oil prices and completion of major infrastructure projects,

respectively, despite the reduction in exports of goods and services. The value of imports decreased by 7.3% from US\$22.2 billion in 2022 to US\$20.6 billion in 2023. The value of exports increased by 3.6% from US\$10.7 billion to US\$11.0 billion in the same period attributed to improved earnings from re-exports and manufactured goods. Total receipts from services were lower in 2023 compared to 2022, primarily due to a decline in receipts from transport and other services (Telecommunications and Government services).

The narrowing of the current account deficit in 2023 was also supported by a resilient performance of the secondary income account.

In 2024, the current account narrowed further to a recorded deficit of US\$1.6 billion (1.3% of projected GDP). The narrowing of the current account deficit reflected an improvement in the goods balance and secondary income balance, which jointly offset the services balance and primary income balance. Improvement in goods exports and remittance inflows also contributed to the current account development.

The country's current account deficit is projected at US\$3.3 billion (2.4% of GDP) in 2025 and 2.2% of GDP in 2026 and 2027, mainly reflecting continued growth in goods imports, amid resilient exports growth and diaspora remittances inflows. However, the pressure on the Kenyan shilling will be limited given that the deficit is not expected to meet an all-time high recorded average of 5.9% between 2014 and 2023.

Remittance inflows reached US\$ 4,190 million in 2023, compared to US\$ 4,028 million in 2022, an increase of 4.0%. Remittance inflows reached an all-time high of US\$ 4,945 million in 2024, compared to US\$ 4,190 million in 2023 and US\$ 4,028 million in 2022. For 2025, cumulative 12-month remittances to December reached about US\$ 5.036 million, reflecting continued growth and underscoring the importance of remittances as a foreign exchange source.

Balance of Trade

(1) Cover ratio is the ratio of exports to imports.

*Provisional, 12 months to September 2025.

*Source: Central Bank of Kenya, KRA.

Source: Kenya National Bureau of Statistics Economic Survey 2025.

In 2020, exports increased by 7.8% to KES 643.7 billion in 2020 from KES 596.7 billion in 2019. This was a result of improved exports. The export/import cover ratio increased from 33.0% in 2019 to 39.2% in 2020.

In 2021, exports increased by 15.5% to KES 743.7 billion in 2021 from KES 643.7 billion in 2020. This was a result of increase in total export. The export/import cover ratio declined from 39.2% in 2020 to 35.1% in 2021.

In 2022, exports further increased by 17.4% to KES 873.1 billion in 2022 from KES 743.7 billion in 2021. This was a result of further increase in total export. The export/import cover ratio remained unchanged at 35.1%.

In 2023, exports increased by 15.4% to KES 1,008 billion in 2023 from KES 873.1 billion in 2022. This was a result of increased revenues from horticultural products and tea as well as the increase in total imports to KES

2,612.0 billion in 2023. The export/import cover ratio increased from 35.1% in 2022 to 38.6% in 2023. The total trade balance deficit reduced to KES 1,604.1 in 2023 from KES 1,617.6 in 2022.

In 2024, exports increased by 10.36% to KES 1,112.3 billion in 2024 from 1,008 billion in 2023. This was largely driven by increased re-exports as well as an increase in total imports to KES 2,706.3 billion in 2024. The export to import cover ratio improved from 38.6% in 2023 to 41.1% in 2024.

In the 12 months to September 2025, exports declined by 0.8 percent to KES 1,103.5 billion reflecting lower re-exports. Domestic exports increased by 1% to KES 941.6 billion in the 12 months to September 2025. The export to import cover ratio was 39.9 % in the 12 months to September 2025.

Diaspora remittances, along with tourism, tea and horticulture are amongst Kenya's leading foreign exchange earners. The United States of America remains the main country contributing to more than half of the total remittances flowing into Kenya. For the first time in three years, the United Kingdom has surpassed Saudi Arabia to become Kenya's second-biggest source of diaspora remittances.

Directions of Foreign Trade

Exports

Other African countries collectively remain the largest export destination for Kenyan trade, accounting for 38.2%, 41.6%, 41.0%, 43% and 38.3% of total exports in 2020, 2021, 2022, 2023 and 2024 respectively. Within Africa, Uganda is Kenya's predominant trade partner, accounting for 29.3%, 29.6%, 27.2%, 29.0% and 29.6% of total African exports in 2020, 2021, 2022, 2023 and 2024 respectively. Exports to Africa increased by 9.8%, 25.6%, 15.7% and 21.6% in 2020, 2021, 2022 and 2023 respectively. In 2024, Kenya's exports to Africa decreased by 2.1%. Several factors drove the decline including decreased export revenues from Somalia, Egypt, Tanzania, and South Sudan. Total exports to the EAC increased by KES 96.5 billion to KES 226.5 billion in 2022 (accounting for 25.9% of the total exports), to KES 305.9 billion in 2023 (making up 29.1% of total exports during the 2023/2024 financial year) and KES 321.4 billion in 2024 (making up 28.9% of total exports). In 2024, the value of exports to Tanzania, Rwanda and Uganda decreased by 2.96%, 1.27% and 0.2% to KES 67.2 billion, KES 41.8 billion, and KES 125.9 billion respectively, mainly attributed to a decline in domestic exports of cement clinkers, palm oil, medicaments and soap. The value of exports to Somalia increased from KES 13.5 billion in 2021 to KES 15.3 billion in 2022 and further increased to KES 21.6 billion in 2023 but decreased to KES 17.5 billion in 2024.

As at 30 September 2025, Kenya's exports to Africa increased to KES 437.9 billion from KES 425.6 billion in 2024, reflecting continued strength in intra-African trade. Exports to the EAC rose to KES 334.2 billion as at September 2025 from KES 321.4 billion in 2024, underscoring the EAC's position as Kenya's principal regional export market. Within the EAC, Uganda remained Kenya's predominant trading partner, with export earnings increasing to KES 142.9 billion as at September 2025 from KES 125.9 billion in 2024. The growth in exports to Africa was primarily driven by increased demand for manufactured goods and agricultural products across the region, partially offset by softer export performance to selected non-EAC African markets.

Exports to Europe accounted for 26.6%, 25.8%, 23.3%, 23.3% and 22.2% of total exports value in, 2020, 2021, 2022, 2023 and 2024 respectively. Exports to Europe increased by 13.4%, 11.6%, 6.1%, 12.7% and 6.38% in 2020, 2021, 2022, 2023 and 2024, respectively. Within Europe, the Netherlands and the United Kingdom were the main destinations accounting for 28.4% and 29.1% respectively in 2020, 32.2% and 25.8% respectively in 2021, 34.3% and 21.9% respectively in 2022, 35.3% and 25.4% respectively in 2023, and 29.3% and 24.7% respectively in 2024. Foreign export earnings for the United Kingdom increased from KES 54.7 billion in 2023 to KES 61.0 billion in 2024, due to an increase in exports of tea and cut flowers.

As at 30 September 2025, exports to Europe increased to KES 254.8 billion compared to KES 246.9 billion in 2024. The European Union continued to account for the majority of exports to Europe, with export earnings rising to KES 162.5 billion as at September 2025. The United Kingdom remained a key export destination, with exports amounting to KES 59.2 billion as at September 2025, compared to KES 61.0 billion in 2024. The Netherlands continued to be the leading destination within the European Union, supported by sustained exports of horticultural products and tea, notwithstanding moderation in export growth to certain European markets during the period.

Exports to Asia accounted for 24.5%, 23.1%, 24.9%, 25.9% and 28.55% of total exports value in 2020, 2021, 2022, 2023 and 2024, respectively. In 2021, total exports to Asia increased by 8.8% with exports to the Middle East increasing by 0.3%, and exports to the Far East increasing by 14.0%. In 2022, the value of exports to Asia increased by 26.9% to an overall KES 217.6 billion. The value of exports to the Middle East rose by 42.4% to KES 85 billion in 2022, by 25.5% to KES 106.6 billion in 2023 and increased by 54.5% to KES 164.4 billion in 2024. Exports to the Far East increased by 18.6% and 15.42% to KES 132.6 billion and 153.1 billion in 2022 and 2023 respectively but declined by 0.1% to 152.9 billion in 2024. The value of exports to China (mainland) went up by 25.9% and 5.1% in 2022 and 2023 respectively, but decreased by 9.1% to 26.3 billion in 2024. Export earnings from Asia increased by 19.3% from KES 217.6 billion in 2022 to KES 259.7 billion in 2023 and increased by 22.3% in 2024 to KES 317.5 billion, with Pakistan, the United Arab Emirates and Saudi Arabia being the top export destinations contributing to this increase. Exports to Saudi Arabia recorded an increase of 46.3% and 50% in 2023 and 2024 respectively. Exports to the United Arab Emirates recorded an increase of 27.0% and 81.2% in 2023 and 2024 respectively. Exports to Pakistan recorded an increase of 23.1% in 2023 and a decline of 3.1% in 2024. Exports to Asia increased to KES 317.5 billion in 2024 primarily on account of increased re-exports of kerosene type jet fuel to UAE and domestic exports of pigeon peas and tea to India.

As at 30 September 2025, exports to Asia amounted to KES 273.9 billion, compared to KES 317.5 billion in 2024. Exports to the Middle East totalled KES 141.5 billion as at September 2025, while exports to the Far East amounted to KES 132.4 billion. Export earnings from China (mainland) declined to KES 20.4 billion as at September 2025 from KES 26.3 billion in 2024. The overall performance of exports to Asia during the period was influenced by reduced re-exports of petroleum products and softer demand in certain Far Eastern markets, partially offset by continued exports of agricultural commodities to the Middle East.

Imports

Kenya is largely dependent on external imports, particularly for capital goods and fuel. The majority of Kenya's imports originate from Asia. Imports from the Far East and the Middle East accounted for 51.5% and 12.0% respectively in 2020, for 48.4% and 16.8% respectively in 2021, for 44.6% and 24.6% respectively in 2022, for 42.1% and 23.5% respectively in 2023 and for 46% and 20% respectively in 2024.

Within Asia, India and China accounted for 18.1% and 34.7% respectively in 2020, for 16.7% and 32.0% respectively in 2021, for 14.5% and 26.3% respectively in 2022, for 14.9% and 25.4% respectively in 2023 and for 32% and 15% respectively in 2024.

In 2024, total imports from Asia recorded an increase of 3.5% amounting to KES 1,797 billion. Imports from South Korea declined by 18.6% to KES 2.3 billion in 2024 while imports from Taiwan increased by 5% to KES 12.8 billion. The value of imports from Singapore, Indonesia, Saudi Arabia, and India amounted to 0.3%, 1.4%, 2.9% and 14.6% respectively.

The value of imports from Europe accounted for 18.8% in 2020, 16.8% in 2021, 13.0% in 2022, 26.1% in 2023 and 15.2% in 2024 at KES 411.9 billion. This represented an increase of 1% in comparison to 2023, when total import expenditure in Europe made up KES 407.8 billion. In 2020, imports from the United Kingdom decreased by 17.2% and imports from the Netherlands increased by 31.2%. In 2021, imports from the United Kingdom increased by 15.1% and imports from the Netherlands increased by 11.8%. In 2022, imports from the United Kingdom increased by 3.4% and imports from the Netherlands decreased by 31.5%. In 2023, imports from the United Kingdom increased by 17.7%, imports from the Netherlands increased by 36.2% and imports from France increased by 73.7%. In 2024, imports from the United Kingdom increased by 9.4%, imports from the Netherlands increased by 5.5% and imports from France decreased by 17.7%.

The imported commodities from these countries that largely contributed to the growth consisted of food supplements, motor spirit (gasoline) premium and aeroplanes and other aircrafts.

African countries accounted for 11.3% in 2020, 10.9% in 2021, 11.0% in 2022, 10.3% in 2023 and 10.0% of imports in 2024. In 2020, the value of imports from Africa decreased by 20.9%, with the value of imports from South Africa decreasing by 38.2%. In 2021, the value of imports from Africa increased by 24.6%, with the value of imports from South Africa decreasing by 3.7%. In 2022, the value of imports from Africa increased by 18.5%, with the value of imports from South Africa increasing by 38.5%. In 2023, the value of imports from Africa declined by 2.1%, with the value of imports from South Africa increasing by 25.8%. In 2024, the value of imports from Africa decreased by 2.3% with the value of imports from South Africa declining by 19.6%.

The value of imports from America (including Canada and North and South America) decreased by 9.6% in 2020, increased by 49.6% in 2021, increased by 10.8% in 2022, increased by 19.4% in 2023. The import bill increased to KES 215.2 billion in 2024 from KES 173 billion in 2023. The imported commodities was attributable mainly to the United States of America and consisted of butanes, aeroplanes, and other aircraft.

In 2025, Kenya's import landscape continued to be dominated by trade with Asian countries, particularly China, India and the United Arab Emirates. In the 12 months to September 2025, imports from China accounted for 23.1%, while those from the United Arab Emirates and India and accounted for 12.2% and 10.2%, respectively.

The key import categories included non-food industrial supplies, which accounted for 34.5% of total imports, followed by fuel and lubricants at 23.2%, and food and beverages at 10.6%. Trade with Europe also remained significant. Imports from Belgium surged by 141.2% in 2024, making it a notable contributor, while imports from the United Kingdom rose by 9.4% and imports from France declined by 17.7%. Major commodities driving import growth included machinery and other capital equipment, motor spirit (gasoline) premium, and aircraft, reflecting Kenya's ongoing industrial and transport investment needs.

Kenya's trade with African nations experienced a slight decline in 2024, with the continent accounting for 10.0% of total imports, a decrease from previous years. In the 12 months to September 2025, Africa's share of total imports remained at approximately 10%. Imports from South Africa decreased by 19.6% in 2024, with South Africa accounting for about 2% of total imports as at 30 September 2025.

The overall import trends in 2024 reflected Kenya's continued reliance on external sources for essential commodities such as fuel, industrial supplies, and food products, while also highlighting the shifting dynamics in regional and global trade partnerships. The following table sets out the value of total imports by country of origin for the periods presented.

Content of Foreign Trade

The primary contributors to foreign exchange are as follows: (a) exports (tea, coffee, horticulture produce, manufactured goods, etc.), (b) tourism, (c) international organisation/aid agencies, (d) foreign investments (foreign direct investment, portfolio investments, etc.), (e) loans and grants, and (f) remittances.

Kenya's horticulture exports were the leading contributor to foreign exchange in 2023 and accounted for 24.0%, 24.8%, 19.5%, 20.7% and 21.8% of total export earnings in, 2020, 2021, 2022, 2023 and 2024 respectively. Export earnings from horticulture increased by 10.6% to KES 136.0 billion in 2020 and further increased by 21.8% to KES 165.7 billion in 2021 before decreasing by 8.1% to KES 152.3 billion in 2022. They increased further by 23% to KES 187.4 billion in 2023 and increased by 8.7% to KES 203.6 billion in 2024.

The volume of horticultural exports increased by 9.9%, from 391.5 thousand tonnes in 2022 to 430.2 thousand tonnes in 2023 and decreased by 14.1% to 402.0 thousand tonnes in 2024.

Tea exports accounted for 23.0%, 19.6%, 20.9%, 20.9% and 20.3% of total export earnings in 2020, 2021, 2022, 2023 and 2024 respectively. Export earnings from tea increased by 14.8% in 2020 to KES 130.4 billion, increased by 0.4% to KES 130.9 billion in 2021, increased by 24.7% to KES 163.3 billion in 2022, increased by 15.3% to KES 188.7 billion in 2023 and increased by 0.2% to KES 189.1 billion in 2024.

The volume of exported tea decreased by 5.2% in 2019 to 475,502 tonnes, increased by 21.1% in 2020 to 576,053 tonnes, decreased by 3.2% in 2021 to 557,351 tonnes, further decreased by 1.0% to 551,804 tonnes in 2022, increased by 2.3% to 564,546 tonnes in 2023 and increased by 11% to 626,579 tonnes in 2024. Re-exports also contributed significantly to the performance of total exports in 2024.

Petroleum products and industrial machinery are Kenya's principal imports, collectively accounting for 26.3%, 27.8%, 36.4%, 36.8% and 32% of the total import value in 2020, 2021, 2022, 2023 and 2024 respectively.

The value of imported petroleum products decreased by 34% to KES 209.1 billion in 2020 and increased by 66.6% to KES 348.3 billion in 2021, increased by 80.4% to KES 628.4 billion in 2022, decreased marginally by 0.3% to KES 626.4 billion in 2023 and decreased by 8.1% to KES 575.5 billion in 2024. The value of imported industrial machinery decreased by 10.0% to KES 231.9 billion in 2020, and increased by 9.6% to KES

254.9 billion in 2021, increased by 21.4% to KES 308.5 billion in 2022, decreased by 6.1% to KES 289.8 billion in 2023 and increased by 8.0% to KES 312.9 billion in 2024.

The following tables set out the value of principal exports and imports for the periods presented.

Capital and Financial Account

The capital account recorded surpluses of KES 14.0 billion, KES 21.5 billion, KES 16.5 billion, KES 17.3 billion and KES 31.2 billion in 2020, 2021, 2022, 2023 and 2024, respectively. In the 12 months to September 2025, the capital account recorded a surplus of KES 33.9 billion. These surpluses were mainly due to an increase in project grants.

The following table sets out the balance on the capital and financial account for the periods indicated.

Source: Capital Markets Authority-CMA statistical bulletin Quarter ended 31 September 2025.

The Government plans to implement the following objectives in order to increase foreign investment in Kenya:

- expand energy sources to provide reliable energy to industries at competitive rates;
- improve Kenya's investment climate by simplifying processes;
- finalise commercial laws aimed at increasing efficiency in business and investment in the country;
- improve investor facilitation by creating "one-stop shops" for information;
- prioritise and effectively carry out the necessary institutional reforms to improve governance;
- maintain and expand existing infrastructure; and
- enhance internal security.

Through its Industrial Transformation initiative, the Government has sought to increase connectivity through affordable rail and road networks and ports, re-engineer processes and reduce costs through a broad range of business-related measures. In addition, the Government's multi-institutional Business Environment Delivery Unit and the Department of Business Reforms and Transformation in collaboration with the private sector coordinated implementation of the reforms required to make Kenya competitive locally and internationally. To this end, Kenya's ranking in the World Bank Doing Business Indicators has improved, reflecting reforms undertaken in the areas of starting businesses, construction permits, getting credit, payment of taxes, protecting minority investors, and resolving insolvency. In addition, Kenya maintains a flexible exchange rate regime and a fully liberalised capital account.

Foreign direct investment is largely in the form of equity and retained earnings. The main sources of investment are Europe (United Kingdom, France and Netherlands), and Africa (South Africa and Mauritius). These investments are largely in finance and insurance, wholesale and retail trade, information and communication, and manufacturing activities.

Foreign Reserves

Foreign reserves decreased to US\$8.3 billion (4.9 months of imports) as at 31 December 2020. Foreign reserves increased to US\$9.5 billion (5.2 months of imports) as at 31 December 2021 but decreased to US\$8.0 billion (4.0 months of imports) as at 31 December 2022. As at 31 December 2023, foreign reserves slightly decreased to US\$7.3 billion, sufficient to cover 3.4 months of imports. As at 31 December 2024, foreign reserves increased to US\$10.1 billion equivalent to 4.4 months of import cover. The statutory requirement for import cover is to endeavour to maintain at least 4 months of import cover.

As of 31 December 2025, the CBK reported that foreign exchange reserves had climbed to US\$12.39 billion, equivalent to 5.3 months of import cover. By mid-February 2026, reserves reached an all-time record of US\$12.49 billion (5.4 months of cover). These levels comfortably exceed the statutory requirement to maintain at least 4 months of import cover and the EAC) convergence target of 4.5 months, providing the economy with a substantial buffer against external shocks.

The following tables sets out foreign reserves held by the CBK and the Central Government as at the dates indicated (in US dollars and KES).

Foreign Exchange

Kenya has a flexible exchange rate regime where the value of the Kenya shilling is determined by the market according to the demand and supply of foreign exchange, with the Central Bank intervening only to prevent excess volatility in the currency's trading level. In 2019, the shilling depreciated by 0.7% against the dollar, 2.0% against the Japanese Yen and appreciated by 3.7 % against the pound sterling and 4.6% against the Euro. In 2020, the shilling depreciated by 4.4% against the dollar, 5.0 % against the pound sterling, 6.6% against the Japanese Yen and by 6.5% against the Euro, mainly due to Covid-19 related concerns. In 2021, the shilling depreciated by 3.0% against the dollar, 10.4% against the pound sterling, 0.2% against the Japanese Yen and by 6.8% against the Euro. In 2022, the shilling depreciated by 7.5% against the dollar, appreciated by 3.3% against the pound sterling, appreciated 9.8% against the Japanese Yen and appreciated by 4.3% against the Euro. In 2023, the shilling depreciated by 18.7% against the dollar, 19.3% against the pound sterling, 26.3% against the Japanese Yen and by 21.8% against the Euro. In 2024, the shilling appreciated by 17.6% against the dollar, 18.8% against the pound sterling, 25.7% against the Japanese Yen and by 22.4% against the Euro.

The table below sets out selected mean exchange rates for the Kenyan shilling, computed as a simple average of the daily average buying and selling rates.

	As at 31 December					
	2020	2021	2022	2023	2024	2025

Trade Policy

Kenya is a signatory to a number of multilateral and bilateral trade agreements and is also a beneficiary to trade enhancing schemes, including: the EU and African, Caribbean and Pacific countries (the “**ACP EU Trade Agreement**”); African Continental Free Trade Area (the “**AfCFTA**”); the United States’ AGOA; the COMESA; the EAC; the economic partnership agreement between the EAC and the EU (the “**EAC-EU EPA**”); and the Generalised System of Preferences (the “**GSP**”), which, together, provide Kenyan exports with preferential access to a range of African and world marks. Kenya will leave the GSP effective 1 January 2027 since its Economic Partnership Agreement (“EPA”) with the EU provides better or similar access. Kenya is also a member of the WTO, which grants Kenya’s export products “most favoured nation” treatment in more than 90% of world markets.

Regional Agreements

Kenya’s membership of several regional agreements provides a strong multilateral basis for Kenya to engage in intra-African trade. As a member of the EAC, Kenya enjoys preferential tariff, duty, and customs trade with neighbouring Tanzania, Uganda, Burundi, Rwanda and South Sudan. Through the COMESA, Kenya further benefits from reduced tariff and non-tariff barriers and the elimination of customs duties with the 21 COMESA states. In November 2025, Kenya formally exited the COMESA Sugar Safeguard regime after 24 years, signaling a transition toward a more competitive and integrated regional sugar market. The AfCFTA launched on 1 January 2021 after being delayed by the Covid-19 Pandemic and aims to work towards creating a single liberalised market across the 54 participating African States. The AfCFTA has moved beyond its initial launch phase into active commercial implementation. Kenya was a pioneer in the Guided Trade Initiative (GTI), and by late 2025, the framework facilitated landmark shipments, such as Ethiopia’s first preferential exports to Kenya through the Moyale border. The agreement has now progressed into Phase 2 and Phase 3, which include new protocols on Digital Trade and Women and Youth in Trade, aimed at creating a more inclusive and technologically advanced single market across the continent.

Under the ACP EU Trade Agreement, exports from Kenya entering the EU are entitled to duty reductions and freedom from all quota restrictions. Trade preferences include duty free entry of all industrial products as well as a wide range of agricultural products including beef, fish, dairy products, cereals, fresh and processed fruits and vegetables. Once in force, the EAC-EU EPA will provide for duty and quota-free access for Kenyan exports to the EU, customs facilitative-provisions, and protections for key Kenyan industries.

Under the AGOA, many Kenyan exports qualify for duty-free access to the US market including textiles, apparels and handicrafts. The AGOA has been extended to 31 December 2026.

Under the GSP, a wide range of Kenya’s manufactured products are entitled to preferential duty treatment in the United States, the United Kingdom, Japan, Canada, New Zealand, Australia, Switzerland, Norway, Sweden, Finland, Austria and other European countries. In addition, no quantitative restrictions are applicable to Kenyan exports on any of the 3,000 plus items currently eligible for GSP treatment.

Bilateral Trade Agreements

Kenya has also signed bilateral trade agreements, including sectoral agreements, with several countries around the world. In December 2020, Kenya signed a trade agreement with the United Kingdom which entered into force on 1 January 2021, giving Kenya duty-free, quota-free access for many of its exports, while Kenya agreed to gradual liberalisation of certain tariffs.

Kenya has also negotiated and signed Avoidance of Double Taxation Agreements with the United Arab Emirates, the United Kingdom, Germany, India, Canada, Norway, Sweden, Denmark, Zambia, the Republic of

Korea, the State of Qatar, the Republic of Iran, France, South Africa, and Singapore, and is currently negotiating a number of others with various countries such as Portugal, Turkey, and Botswana. Kenya has also concluded Investment Promotion and Protection Agreements with France, Finland, Germany, Italy, Switzerland, China, Libya, Iran, Burundi and the United Kingdom, amongst others. Kenya has diplomatic relations with Cuba and trade relations as demonstrated by Kenya's participation in trade fairs.

In 2024, Kenya actively pursued and formalised several bilateral trade agreements to enhance its economic partnerships. In February 2024, Kenya concluded a Comprehensive Economic Partnership Agreement (“CEPA”) with the United Arab Emirates. The CEPA was officially signed in January 2025. This agreement aims to advance trade, investment, and economic cooperation between the two nations. Notably, the UAE has become Kenya's sixth-largest export market and second-largest source of imports. The partnership includes favourable credit terms for oil supplies from UAE companies, contributing to the stabilisation of Kenya's currency and reduction of fuel prices for consumers.

On 1 July 2024, the EPA between the EU and Kenya entered into force. This agreement represents a significant milestone in the EU-Kenya Strategic Partnership, as it reciprocally applies benefits to both parties. Under the EPA, the EU fully liberalises access to its market from day one, allowing all goods from Kenya, primarily agricultural products such as vegetables, cut flowers, fruits, tea, and coffee, to enter the EU market without tariffs and quotas. The EPA provides a permanent legal framework that secures duty-free, quota-free access for Kenyan goods, replacing previous unilateral trade arrangements. Under this transition, Kenya is scheduled to officially exit the EU's Generalised Scheme of Preferences (GSP) on 1 January 2027. This shift from a trade assistance beneficiary to a full bilateral partner provides Kenyan exporters – particularly in the floriculture and fresh produce sectors – with long-term legal certainty and protection from the periodic reviews or expirations inherent in the standard GSP scheme. However, in November 2025, the East African Court of Justice (EACJ) issued an interim order suspending the implementation of the EPA pending the determination of a legal challenge brought by a non-governmental organisation. Although the Government of Kenya has appealed the ruling, the timing and outcome of the appellate proceedings remain uncertain. For more information, see “*Republic of Kenya – International Relations - EU Relations*”.

In alignment with the National Trade Policy's objective to rebalance existing trade deficits and diversify export destinations, Kenya reached a preliminary 'Early Harvest' Trade Arrangement with the People's Republic of China in January 2026. This landmark framework is a precursor to a full bilateral EPA and marks a significant shift in Kenya's economic diplomacy within the Far East.

Under the terms of this arrangement, 98.2% of Kenyan tariff lines have been granted duty-free access to the Chinese market. The deal is strategically engineered to benefit Kenya's robust agricultural sector by eliminating barriers for high-value exports, including avocados, tea, coffee, macadamia nuts, and cut flowers.

Export Promotion Council

The Export Promotion Council (“EPC”) supports producers and exporters of goods and services through enhancing market access, value addition and dissemination of trade information. The EPC exposes the beneficiary firms to the opportunities available through enhanced international visibility for their products and ease of transacting business.

Under the trade facilitation policy, the EPC advocates a trade policy environment that aids growth and development of Kenya's export sector. This was achieved through participation and contribution in several bilateral and multilateral trade negotiations policy forums, including the EAC-EU EPA, the EAC/COMESA/SADC tripartite negotiations, the AGOA, the COMESA, and the EAC common market negotiations amongst others.

The EPC assists in identifying and expanding export opportunities for Kenya through market research and trade statistical analyses and organises and facilitates participation of Kenya's exhibitors in international trade fairs and exhibitions, as well as providing training to enhance exporters' skills and knowledge.

Kenya-USA Strategic Trade and Investment Partnership

In 2022, Kenya and the United States of America (USA) agreed to commence negotiations under the framework of the Strategic Trade and Investment Partnership (“STIP”). Building on the multiple negotiating rounds held throughout 2024, both nations have significantly accelerated their engagement in early 2026. While the STIP

aims to establish a permanent, reciprocal trade framework focusing on digital trade, agriculture, and workers' rights, Kenya has simultaneously secured its short-term market access through a one-year extension of the African Growth and Opportunity Act (AGOA), passed by the U.S. Administration in February 2026. This extension, which runs through December 2026, provides a critical 'runway' for Kenyan exporters while negotiators finalise the more comprehensive STIP. These parallel tracks underscore Kenya's strategic effort to transition from a beneficiary of unilateral trade preferences to a full bilateral partner with its largest export market.

MONETARY AND FINANCIAL SYSTEM

Central Bank of Kenya

The Central Bank of Kenya Act (Cap. 491) established the Central Bank of Kenya. The establishment of the CBK was a direct result of three East African states' desire to have independent monetary and financial policies. This led to the collapse of the East Africa Currency Board in the mid-1960s. Following the promulgation of the Constitution on 27 August 2010, the CBK was established as an autonomous institution under Article 231 of the Constitution. Under this Article, the CBK has the responsibility to formulate monetary policy, promote price stability, issue currency and perform any other functions conferred on it by an act of Parliament. The Central Bank of Kenya Act (Cap. 491) limits the CBK's lending to the Government to 5% of the latest Government's audited revenue. The Kenyan banking industry has experienced transformation through digitalisation and modernisation of the banking sector. See "*Risk Factors—Risks relating to the Republic of Kenya—The Kenyan banking sector is subject to operational risks relating to the introduction of and reliance on information technology systems including cybersecurity and privacy risks*" for further information regarding operational risk in the banking sector.

The functions and powers of the CBK are the following:

- to formulate and implement monetary policy directed to achieving and maintaining stability in the general level of prices;
- to foster the liquidity, solvency and proper functioning of a stable market-based financial system;
- subject to the above, the CBK shall support the economic policy of the Government, including its objectives for growth and employment;
- to formulate and implement foreign exchange policy;
- to hold and manage its foreign exchange reserves;
- to licence and supervise authorised dealers;
- to formulate and implement such policies as best promote the establishment, regulation and supervision of efficient and effective payment, clearing and settlement systems;
- to act as banker and adviser to, and as fiscal agent of the Government;
- to issue currency notes and coins; and
- to licence to supervise mortgage refinance companies.

Under the Central Bank of Kenya Act (Cap. 491), the responsibility for determining the policy of the CBK, other than the formulation of monetary policy, is given to the Board of Directors. The board comprises 11 members consisting of the Chairperson, the Governor, the Principal Secretary to the National Treasury or his representative who must be a non-voting member, and eight other non-executive directors. The chairperson and directors are appointed by the President with the approval of Parliament and hold office for a period of four years but are eligible for re-appointment for one additional term of four years. Persons eligible to be appointed to the board must be citizens of Kenya who are knowledgeable or experienced in monetary, financial, banking and economic matters or other disciplines relevant to the functions of the CBK.

The CBK operates from its head office in Nairobi and has branch offices in Mombasa, Kisumu and Eldoret. The CBK also runs currency centres in Nyeri, Nakuru, Meru and Kisii. The Central Bank of Kenya Institute of Monetary Studies (CBK-IMS), which is headed by a director, is answerable to the Governor of the CBK.

As part of strengthening the banks' corporate governance, board capabilities and best practises in line with international financial institutions, CBK developed and issued the Kenyan Banking Sector Charter through Banking Circular No. 1 of 2019 on 28 February 2019. The objective was to ensure a responsible and disciplined banking sector. The Charter applies to institutions carrying on banking business, financial business, mortgage finance business and micro-financing business.

The following table sets out the financial position of the CBK as at the dates indicated.

	As at 30 June				
	2021	2022	2023	2024	2025
Assets					
Balances due from banking institutions.....	430,968	295,836	421,469	484,312	548,702

Structure and Development of the Kenyan Banking System

Commercial Banks and Mortgage Finance Institutions

Commercial banks and mortgage finance institutions are licenced and regulated pursuant to the provisions of the Banking Act (Cap. 488) and the Regulations and Prudential Guidelines issued thereunder. They are the dominant institutions in the Kenyan banking system.

As at the date of this Offering Circular, there are 38 licenced commercial banks and 1 mortgage finance company. Out of the 39 banking institutions, 37 were privately owned while the Kenya Government had majority ownership in 2 institutions. Of the 37 privately owned banks, 20 were locally owned (the controlling shareholders are domiciled in Kenya) while 17 were foreign owned. The 20 locally owned institutions comprised 19 commercial banks and 1 mortgage finance company. Of the 17 foreign-owned institutions, all are commercial banks with 14 being local subsidiaries of foreign banks and 3 are branches of foreign banks.

On 16 April 2025, the Central Bank of Kenya announced the lifting of the moratorium on licensing of new commercial banks in Kenya, effective 1 July 2025. The moratorium had been in place since 17 November 2015. The moratorium was imposed against a backdrop of governance, risk management, and operational challenges in the banking sector. It was intended to provide space for the strengthening of the Kenyan banking sector. The lifting of the moratorium followed the significant strides CBK have made in strengthening the legal and regulatory framework for Kenya's banking sector. Notably, there have been a number of mergers and acquisitions by existing players and entry of new domestic and foreign strategic investors into the sector over the last six years as:

- Equity Bank Kenya Limited (EBKL) acquired certain Assets and Liabilities of Spire Bank Limited (Spire) effective 31 January 2023.

- Shorecap III, LP (Shorecap) acquired 20% of the shareholding of Credit Bank PLC (CBP) effective 15 June 2023.
- Premier Bank Limited, Somalia (PBLs) acquired 62.5% of the shareholding of First Community Bank Limited (FCB) effective 27 March 2023.
- Commercial International Bank (Egypt) S.A.E. (CIB) acquired 49% of the shareholding of Mayfair Bank Limited (MBL) effective 31 January 2023.
- On 14 April 2025, CBK announced the acquisition of 100% shareholding of National Bank of Kenya Limited (NBK) by Access Bank PLC (Access) from KCB Group PLC (KCB Group).
- On 21 January 2026, Nedbank Group Limited, announced that it had submitted an offer to acquire approximately 66% of NCBA Group PLC, which upon successful completion of the transaction will result in NCBA becoming a subsidiary of Nedbank while the remaining approximately 34% will continue to trade publicly on the Nairobi Securities Exchange (NSE).
- On 22 January 2026, the Competition Authority of Kenya (CAK) announced its conditional approval of the proposed acquisition of 100% of the shareholding of Paramount Bank Limited by Zenith Bank PLC subject to conditions aimed at safeguarding employment.

Over the last six years, CBK has focused on strengthening the banking sector by strengthening business models to enhance resilience through capital and liquidity buffers. CBK has also entrenched the Internal Capital Adequacy Assessment Process (ICAAP) by banks. ICAAP ensures that banks maintain adequate capital in relation to their risk profile and market niche.

Through the Business Laws (Amendment) Act, 2024, the minimum core capital for commercial banks increased from KES 1 billion to KES 10 billion. This will reinforce the strengthening of the banking sector. The increase is gradual, with banks required to reach KES 3 billion by the end of 2025, progressing to KES 10 billion by December 2029. As at December 2025, Kenya's banking sector core capital and total capital ratios to risk weighted assets were 17.5% and 20.0% against the minimum statutory ratios of 10.5% and 14.5%, respectively, under the Central Bank of Kenya's Prudential Guideline on Capital Adequacy. Kenyan commercial banks continue to maintain capital adequacy ratios comfortably above these statutory minimums. Following Kenya's adoption of the Basel III framework, banks are required to maintain robust risk-based capital charges for credit, market and operational risks, together with additional high-quality capital buffers, including the capital conservation buffer, to enhance loss-absorbing capacity under stress. In addition to maintaining risk-based capital charges for credit, market and operational risks, in April 2025, CBK issued final guidelines introducing Basel III liquidity and leverage standards, including the Liquidity Coverage Ratio (LCR), the Net Stable Funding Ratio (NSFR) and a minimum leverage ratio, to strengthen banks' resilience to short-term liquidity shocks and excessive leverage. Kenyan banks are required to demonstrate compliance with these Basel III liquidity and leverage requirements within CBK-prescribed transition timelines, reflecting a significant expansion of the regulatory framework beyond capital adequacy alone and further aligning Kenya's banking supervision with international standards.

The major risks affecting the Kenyan banking sector are credit risk, operational risk particularly cyber risk, market risk and liquidity risk. Credit risk is the current or prospective risk to earnings and capital arising from an obligor's failure to meet the terms of any contract with the bank or if an obligor otherwise fails to perform as agreed. The rise in credit risk in the Kenyan banking sector can be seen in the increase of its non-performing loans ("NPL") ratio from 14.5% in December 2020 to 15.4% in December 2025. However, decreases in NPLs were noted in the real estate, manufacturing, trade, building and construction, and personal and household sectors, and the NPL ratio stood at 15.5% in January 2026. Banks have continued to make adequate provisions for the NPLs. Credit risk has recently increased mainly due to a challenging business and operating environment. CBK is addressing the deterioration in asset quality by enhancing provisioning measures for NPLs as well as strengthening the banking sector's credit underwriting standards.

Cyber risk is the risk of financial loss, disruption, or damage to the reputation of an organisation from a failure of its information technology systems. The rollout of digital service platforms has made banks and other financial service providers vulnerable to cyber-threats and attacks. In recognition of these enhanced risks, CBK issued a guidance note to banking institutions in August 2017 and to payment service providers in July 2019 on

the management of cyber risks. CBK has commenced the review of the guidance note on cybersecurity to align with the emerging technological advancements and the dynamic business environment.

Market risk is expected to remain stable on the backdrop of stabilizing interest rates. To further stabilise the market risk, banks have set aside sufficient capital. CBK is closely monitoring market risk management by banks.

Liquidity risk is the risk that a bank may be unable to meet short-term financial demands. The average liquidity position in the Kenyan banking sector reached 59.3% as at September 2025, against a regulatory minimum of 20%. Liquidity is currently evenly distributed in the banking sector. In April 2025, CBK issued Guidelines on the Basel III Liquidity Standards, Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR), and the Leverage Ratio (LR), effective 1 October 2025. LCR focuses on a bank's ability to withstand a short-term stress scenario (30 days). The objective is to promote the short-term resilience of the liquidity risk profile of banks. NSFR requires banks to maintain a stable funding profile in relation to the composition of their assets and off-balance sheet activities.

On 26 August 2025, CBK announced the issuance of a revised Risk-Based Credit Pricing Model (“**RBCPM**”) with the objective to strengthen monetary policy transmission, enhance transparency in lending, and promote responsible lending by aligning credit pricing with the borrowers’ risk profiles. The RBCPM is anchored on the overnight interbank average rate, now renamed Kenya Shilling Overnight Interbank Average (“**KESONIA**”), to align it to the international best practices. KESONIA closely aligns with the policy rate (Central Bank Rate) under the CBK’s current monetary policy implementation framework. Under this revised framework, loan interest rates will be based on KESONIA plus a premium. The premium covers the bank’s costs, its expected profit, and the borrower’s risk level. The full cost of credit will include KESONIA, plus the premium and any fees and charges. Where KESONIA is not practical, customers may be availed the use of the Central Bank Rate (“**CBR**”) as the alternative reference rate. The revised new RBCPM took effect from 1 September 2025, for all new variable rate loans. The revised RBCPM will be fully operational by March 2026, by which time banks are required to have transitioned all variable rate loans outstanding as at 1 December 2025 to the new pricing framework.

Microfinance Banks

The Microfinance Act and the Microfinance Regulations issued thereunder set out the legal, regulatory, and supervisory framework for the microfinance industry in Kenya. The Microfinance Act took effect in 2008. As at the date of this Offering Circular, there are 14 licenced microfinance banks in Kenya. The Microfinance Bill 2021 was approved by Cabinet in May 2022, for tabling in the National Assembly. In August 2024, the National Treasury forwarded the draft Microfinance Bill, 2021 to the Solicitor General for tabling in Parliament. Subsequently, the Attorney General transmitted the Bill to the National Assembly for introduction in October 2024. CBK continues to follow-up with the National Treasury on the enactment of the Bill.

The Business Laws (Amendment) Act 2024 amended the Microfinance Act and the Central Bank of Kenya Act, 2015 (“**CBK Act**”). It introduced substantial changes to the regulatory framework for Digital Credit Providers (“**DCPs**”) and non-deposit-taking microfinance institutions in Kenya. Digital lenders are now classified as Non-Deposit Taking Credit Providers (“**NDTCs**”), expanding the oversight authority of the CBK. This reclassification subjects digital lenders to the same regulatory framework as traditional non-deposit taking microfinance institutions, imposing stricter regulatory requirements. Consequently, there is an increased need for compliance with the regulations governing NDTCs, including licensing, reporting obligations, and governance standards. To operationalise the amendments to the CBK Act, CBK developed the Draft Regulations on Non-Deposit Credit Providers, 2025 which was issued for public comments on 7 August 2025. As at 30 December 2025, CBK had licensed 195 DCPs to conduct DCP business.

Business Laws (Amendment) Act, 2024

On 11 December 2024, the President of Kenya signed into law the Business Laws (Amendment) Bill, 2024, which subsequently became the Business Laws (Amendment) Act, 2024. This Act, which took effect on 27 December 2024, introduced significant amendments to several key business-related legislations, including the Banking Act (Cap. 488) Laws of Kenya (the “**Banking Act**”), the Central Bank of Kenya Act (Cap 491) Laws of Kenya (the “**Central Bank of Kenya Act**”), and the Microfinance Act. (Cap. 493C) Laws of Kenya (the “**Microfinance Act**”). Some of the key amendments are highlighted below.

Banking Act

The amendments to the Banking Act increased penalties for noncompliance for both financial institutions and individuals. The maximum penalty for institutions was raised from KES 5 million to KES 20 million or three times the gross gain or loss avoided, whichever is higher. Individual penalties increased from KES 200,000 to KES 1 million, while corporate entities face penalties up to KES 3 million. The Act also allows the CBK to impose daily penalties for continued noncompliance, raising the daily amount from KES 20,000 to KES 100,000. Additionally, commercial banks and mortgage finance companies were required to increase their core capital from KES 1 billion to KES 10 billion by 31 December 2029, with a staggered increase as follows: KES 3 billion by 31 December 2025, KES 5 billion by 31 December 2026, KES 6 billion by 31 December 2027, KES 8 billion by 31 December 2028, and KES 10 billion by 31 December 2029.

Central Bank of Kenya Act

The Central Bank of Kenya Act was amended to broaden the scope of regulated businesses to include all non-deposit-taking credit providers (“NDTCs”). This includes services such as buy now pay later, peer-to-peer lending, and asset financing. These entities must now obtain licenses from CBK and comply with its regulations, including credit pricing models. The act also introduced regulations for credit guarantee businesses, mandating registration, and compliance with CBK guidelines. Penalties for non-compliance include fines and imprisonment terms.

Microfinance Act

The Microfinance Act saw updates to the definition of non-deposit-taking microfinance businesses, specifying that they involve credit secured by physical collateral. A new operational requirement section was included for these businesses, which must now register and obtain licenses from CBK. Existing businesses had six months to comply, from 27 December 2024. Non-compliance carries penalties including fines and imprisonment. The act also empowers the cabinet secretary to exempt certain businesses from the act’s application, provided their annual revenues do not exceed KES 500,000. Consumer protection measures were also established to prevent harassment during debt collection.

Forex Bureaus and Money Remittance Providers

Forex bureaus were established and first licenced in January 1995 to foster competition in the foreign exchange market and to narrow the exchange rate spread in the market. As authorised dealers, forex bureaus conduct business and are regulated and supervised by the Central Bank of Kenya Act, and guidelines issued thereunder. As at the date of this Offering Circular, there are 90 licenced forex bureaus across the country.

Money remittance providers were first licenced as standalone entities in 2013 to facilitate regulation of international remittances in Kenya. As at the date of this Offering Circular, there are 33 licenced money remittance providers in Kenya.

Credit Reference Bureaus

Credit reference bureaus complement the central role played by banks and other financial institutions in extending financial services within an economy. Credit reference bureaus help lenders make faster and more accurate credit decisions. They collect, manage and disseminate customer information to lenders within the framework of the Credit Reference Bureau Regulations 2020 which governs the licencing, operation and supervision of Credit Reference Bureaus by the CBK. CBK is currently working with stakeholders to strengthen the credit information sharing mechanism. This is to among others, support risk-based credit pricing in the banking sector and expand data sources.

As at the date of this Offering Circular, there are three licenced credit reference bureaus in Kenya.

Capital Adequacy Ratios

The table below sets out the two main capital adequacy ratios for the Kenyan banking sector.

	At 31 December				
	2021	2022	2023	2024	2025
CAR Ratio ⁽¹⁾⁽²⁾			(%)		
Core Capital (tier 1) to Risk Weighted Assets	16.6	16.0	15.4	17.3	17.5
Total (Regulatory) Capital to Risk Weighted Assets	19.5	18.9	18.6	19.7	20.0

Source: Central Bank of Kenya.

(1) Ratios are based on Basel I and relevant aspects of Basel II and III Capital Accords.

(2) The current minimum core capital requirement is KES 1 billion with the minimum core capital and total capital ratios to risk weighted assets at 10.5% and 14.5%, respectively.

The East African Central Banks have adopted a common position on Basel III and CBK has implemented some aspects of Basel III. The East African Central Banks are currently harmonising regulatory frameworks which, once complete, will result in implementation of relevant provisions of Basel II and III.

In April 2025, CBK published its guidelines on Liquidity Coverage Ratio, Net Stable Funding Ratio and Leverage Ratio for Institutions Licensed Under the Banking Act. These guidelines form part of CBK's implementation of Basel III standards adapted for the Kenyan market where banks are required to maintain adequate liquidity and leverage buffers in line with international standards. Key requirements include (i) Liquidity Coverage Ratio (LCR) whose objective is to promote the short-term resilience of the liquidity risk profile of banks by ensuring that banks have an adequate stock of unencumbered high-quality liquid assets (HQLA) that can be converted easily and immediately into cash to meet their liquidity needs for a 30-calendar day liquidity stress scenario: (ii) net stable funding ratio (NSFR) which will require banks to maintain a stable funding profile in relation to the composition of their assets and off-balance sheet activities and (iii) Leverage Ratio, a non-risk-based measure that is calibrated to act as a credible supplementary measure to the risk-based capital requirements. Compliance with these standards was required from 1 October 2025, with CBK monitoring adherence and taking corrective action for non-compliance.

Non-Performing Loans

The CBK classifies credit exposures of commercial banks in five categories according to their performance at a given point in time. These five categories are:

- Normal: Loans performing in accordance with the contractual terms and which are up to date on repayments, and expected to continue in this condition.
- Watch: Loans which are generally past due by between 30 and 90 days.
- Substandard: Loans which are generally past due for more than 90 but less than 180 days.
- Doubtful: Loans which are generally past due for more than 180 but less than 360 days.
- Loss: Loans which are generally past due for 360 days or more.

Loans classified as sub-standard, doubtful and loss are considered as NPLs.

The ratio of gross NPLs to gross loans stood at 15.5 per cent in January 2026, down from 16.5 per cent in November 2025, 16.7 per cent in October and 17.6 per cent in August. Decreases in NPLs were noted in the mining and quarrying, energy and water, personal/household, and transport and communication sectors. Banks have continued to make adequate provisions for the NPLs.

The table below sets out the gross loans, NPLs and returns as at the dates indicated.

	As at 31 December				
	2021	2022	2023	2024	2025
Gross loans	3,248.7	3,677.3	4,199.5	4,070.2	4,369.6
Gross NPLs	426.8	487.7	621.3	697.3	674.4
Return on Assets (%)	2.6	3.0	2.3	3.0	3.0

	As at 31 December				
	2021	2022	2023 (KES billions)	2024	2025
Return on Equity (%).....	21.6	25.2	22.9	22.0	22.2
Net profit after tax	143.3	175.5	172.9	208.1	237.2 ⁽¹⁾

Source: Central Bank of Kenya.

(1) CBK confirmed that the net profit after tax for the year ended December 2025 is unaudited.

* Based on unaudited financial statements.

Monetary Policy Framework

The CBK’s principal objective is the formulation and implementation of monetary policy directed at achieving and maintaining stability in the general level of prices (i.e., overall inflation) and the value of the Kenyan shilling against the major currencies. As at the date of the Offering Circular, the CBK targets overall inflation at 5% with an allowable margin of 2.5% on either side, as prescribed by the National Treasury at the beginning of the financial year.

Monetary policy is the main tool used in the preservation of the value of the currency in an economy. It involves the control of liquidity circulating in an economy to levels consistent with growth and price objectives set by the Government. The volume of liquidity in circulation influences the levels of interest rates, inflation and the relative value of the local currency against other currencies. To enhance monetary policy transmission, the MPC adopted a new monetary policy implementation framework in August 2023. The framework is based on inflation targeting and on interest rate corridor around the CBR. Consistent with the new framework monetary policy operations are aimed at ensuring the interbank rate, renamed KESONIA since September 2025, as an operating target closely targets the CBR. It is the responsibility of the MPC to formulate the monetary policy of the CBK.

The membership of the MPC is as follows:

- the Governor, who is the chairman;
- the Deputy Governor, who is the deputy chairman;
- two members appointed by the Governor from the CBK, one being a person with executive responsibility within the CBK for monetary policy analysis and the other is a person with responsibility within the CBK for monetary policy operations;
- four external members who have knowledge, experience and expertise in matters relating to finance, banking, fiscal and monetary policy, who are appointed by the Cabinet Secretary for the National Treasury; and
- the Principal Secretary, National Treasury, or his designated alternate as representing the National Treasury. The National Treasury representative is a non-voting member of the committee.

Each external member of the MPC serves for a term of three years, which is renewable once. The MPC meets at least once every two months.

The CBK pursues its monetary policy objectives using the following instruments:

- The CBR is reviewed and announced by the MPC at least every two months. Movements in the CBR, both in direction and magnitude, signal the monetary policy stance. To enhance clarity and certainty in monetary policy implementation, the CBR is the base for all monetary policy operations. To enhance monetary policy transmission the MPC adopted a new monetary policy implementation framework in August 2023. The framework is based on inflation targeting and on interest rate corridor around the CBR. On 10 February 2026, the MPC narrowed the interest rate corridor around the CBR from ± 75 basis points to ± 50 basis points, to enhance the transmission of monetary policy and ensure short-term money market rates, including KESONIA, remain closely aligned with the CBR. The efficiency in the Repo and interbank markets is crucial for the transmission of monetary policy decisions. The CBK monitors the overnight interbank money market. It responds to the tightness or slackness in the interbank market liquidity through OMO.

- **Open Market Operations (“OMO”)**: This refers to actions by the CBK involving purchases and sales of eligible securities to regulate the money supply and the credit conditions in the economy. OMO can also be used to stabilise short-term interest rates. When the Central Bank buys securities on the open market, it increases the reserves of commercial banks, making it possible for them to expand their loans and hence increase the money supply. To achieve the desired level of money supply, OMO is conducted using:
- **Repurchase Agreements (“Repos”)**: A repo is a collateralised loan involving a contractual arrangement between two parties, in which one party sells a security at a specified price with a commitment to buy the security back at a later date. Both parties therefore, meet their investment goals of secured funding and liquidity. CBK Repos are conducted through auctions with tenors of three and seven days and are for mopping up liquidity from the market. The Late Repo, sold in the afternoon, has a four-day tenor and is issued at 100 basis points below the repo rate of the day. Reverse Repos, on the other hand, are for liquidity injections and involve purchase of securities from commercial banks. The current tenors for Reverse Repos are 7, 14, 21, 28 and 91 days;
- **Term Auction Deposits (TAD)**: The TAD is used when the securities held by the CBK for Repo purposes are exhausted or when CBK considers it desirable to offer longer dated tenors. TAD is essentially not backed by collateral and is conducted through an auction, similar to Repos. Currently, the tenors for such deposits at CBK are 1, 7, 14, 21, 28 or 91 days and upon maturity of TAD, the CBK credits the respective commercial bank with the deposit and interest; and
- **Horizontal Repos**: Horizontal Repos are modes of improving liquidity distribution between commercial banks, and are conducted under CBK supervision. They are transacted between commercial banks on the basis of signed agreements using Government securities as collateral, and have negotiated tenors and yields. Commercial banks, short of deposits at the CBK, borrow from banks with excess deposits on the security of an appropriate asset, normally a Government security. Horizontal Repos also help banks overcome the problem of limits to lines of credit, thus promoting more efficient management of interbank liquidity.
- **Standing Facilities**: The CBK does not have automatic standing facilities with respect to overnight lending. The CBK, as lender of last resort, provides secured loans to commercial banks on an overnight basis at a penal rate that is over the CBR. This facility is referred to as the Discount Window, and the applicable interest rate as at the date of this Offering Circular is 50 basis points above CBR, which is the upper bound of the interest rate corridor. Access to the Window is governed by rules and guidelines which are reviewed from time to time by the CBK. Banks making use of this facility more than twice in a week are scrutinised closely, and supervisory action taken.
- **The Cash Reserves Ratio (“CRR”)**: In accordance with the law, the CRR is the proportion of a commercial bank’s total deposit liabilities which must be held as deposits at CBK. These deposits are held in the CRR Account at no interest. The ratio is currently 3.25% of the total of a bank’s domestic and foreign currency deposit liabilities. To facilitate commercial banks’ liquidity management, commercial banks are currently required to maintain their CRR based on a daily average level from the 15th of the previous month to the 14th of the current month and not to fall below a CRR of 2% on any day. An increase in reserve requirements restricts commercial banks’ ability to expand bank credit and the reverse is regarded as credit easing. Changes to the CRR have rarely been utilised by the MPC as an instrument of monetary policy.
- **Monetary policy communication**: The increasing use of communication media ensures a wider dissemination of monetary policy decisions and background data thereby increasing the efficiency of information transmission and managing expectations. The regular interaction between the MPC and the Chief Executive Officers of banks has ensured that monetary policy decisions are transmitted to the banking sector. The regular Governor’s Press Conferences have also enhanced the media understanding of monetary policy decisions. The CBK website is an important source of up-to-date data on all aspects of the financial market including interest rates, exchange rates, results of auctions of Government securities, and the MPC releases.

The following monetary policy reforms have been implemented by the CBK:

- The core and non-core measures of inflation for Kenya, jointly developed by the Kenya National Bureau of Statistics and the CBK, were launched in January 2025. Core inflation excludes products whose prices are highly volatile or transient, and therefore provides a more comprehensive measure of the underlying trend of inflation. The introduction of core and non-core inflation measures also aligns with the EAC guidelines on computation of harmonised CPI in the region. The total core CPI basket constitutes items with a total weight of 81.1% in the overall CPI and is therefore a more representative basket and closely tracks overall inflation.
- The MPC published a White Paper on Modernization of the Monetary Policy Framework and Operations in July 2021, which outlines the reforms that would enhance the effectiveness of monetary policy and support anchoring of inflation expectations. These reforms entail: refining macroeconomic modelling and forecasting frameworks in line with changing structure of the economy, improving the functioning of the interbank market in order to strengthen monetary policy transmission and operations, and continued improvement of communication of monetary policy decisions.
- The CBK implemented the DhowCSD on 31 July 2023, which has improved the functioning of the interbank market by facilitating collateralised lending amongst commercial banks and reducing segmentation in the interbank market.
- To enhance monetary policy transmission, the CBK adopted a new monetary policy implementation framework in August 2023. The new framework is based on inflation targeting and introduces an interest rate corridor around the CBR set at $\text{CBR} \pm 250$ basis points and was reviewed to ± 150 basis points in June 2024, ± 75 basis points in April 2025 and further to ± 50 basis points in February 2026. Consequently, monetary policy operations aim at ensuring the KESONIA, as an operating target, closely tracks the CBR.
- To improve access to the Discount (Overnight) Window, the CBK adopted changes to the terms and conditions for the facility. The applicable interest rate on the facility was reviewed from 600 basis points above the CBR to 400 basis points above the CBR in August 2023, which was further revised to 300 basis points above the CBR in June 2024 and further to 75 basis points above the CBR in April 2025 and 50 basis point above the CBR in February 2026, which is the upper bound of the interest rate corridor. The improved access to the facility is designed to enhance monetary policy transmission and complement the effectiveness of the interest rate corridor. Setting the interest rate on the CBK Discount Window at the upper bound of the corridor ensures that the KESONIA remain within a predictable range. The repeal of interest rate caps in November 2019 restored the clarity of monetary policy decisions and is expected to strengthen the transmission of monetary policy.

Other CBK reforms relating to enhancing the efficiency of the foreign exchange market were as follows:

- –In March 2023, CBK issued the Kenya Foreign Exchange Code (the FX Code) to commercial banks. The FX Code sets out standards for commercial banks and aims to strengthen and promote the integrity and effective functioning of the wholesale foreign exchange (FX) market in Kenya. It will facilitate better functioning of the market, reinforcing Kenya’s flexible exchange rate regime for greater resilience of the economy. It borrows heavily from the FX Global Code and best practices adapted in leading jurisdictions. The FX Code focuses on six leading principles to be adhered to by institutions: ethics; government; execution; information sharing; risk management and compliance; and confirmation and settlement processes.
- Changes to the Interbank Foreign Exchange Market: to streamline and improve operations in the FX interbank market:
- Introduced Electronic Matching System (EMS) in the FX interbank market to increase efficiency, accountability and transparency in a market that was trading manually before.
- CBK moved to publish the official exchange rate based on the weighted average of executed interbank FX transactions, rather than based on indicative rates reported by select participants, contributing to a more representative and unified exchange rate.

- CBK issued circulars to review the following:
- Indicative spread of 0.20 cents in the interbank market.
- Reduce swap limits for foreign counterparties from 1-year to 6-months to increase liquidity in the foreign exchange market. No tenor limits for resident counterparties. Counterparties operating within the EAC will be treated as local counterparties.
- Minimum amount that can be traded in the interbank market reviewed from USD 500,000 to USD 100,000. Banks wishing to trade amounts smaller than the set minimum can do so on a market taker basis and such trades will not be considered as interbank.

Inflation and Interest Rates

During the MPC meetings in July, September and November 2020 as well as in January, March and May 2021, the Committee retained the CBR at 7.0%, observing that the package of policy measures adopted since March 2020 were having the intended effect on the economy, and that these measures would be augmented by the announced fiscal measures for 2020/21.

From 2019 through May 2022, inflation remained well-anchored within the target range due to stable prices and appropriate monetary policy. However, inflation peaked at 9.6% in October 2022, driven by global commodity price surges from the Russia–Ukraine war and local harvest failures. In response, the MPC tightened monetary policy, cumulatively raising the CBR by 550 basis points between May 2022 and December 2023, and the CBR was further increased to 13.00% in February 2024. These actions aimed to stabilise the exchange rate and anchor expectations against supply-side pressures. Following the restoration of stability, the MPC began easing policy in August 2024 to stimulate bank lending and support economic activity. Indeed, between August 2024 and February 2026, the MPC lowered the CBR by a cumulative 425 basis points. The MPC meeting on 5 February 2025 lowered the CBR to 10.75% from 11.25%. In addition, the MPC reduced Cash Reserve Ratio (CRR) by 100 basis points to 3.25% from 4.25%, to complement the lowering of the CBR, and support lowering of lending rates. The MPC Meetings on 12 August, 7 October, 9 December 2025 and 10 February 2026 lowered the CBR by 25 basis points at each Meeting to 9.50%, 9.25%, 9.00% and 8.75%, respectively.

Kenya's overall inflation has declined significantly, with 12-month inflation falling from a peak of 9.6% in October 2022 to 3.0% in December 2024. This decline reflects the effectiveness of the Central Bank's tight monetary policy and pass-through effects of the strengthening exchange rate that have eased food and energy prices. Overall inflation remained within the target range from December 2023 to January 2025, mainly on account of low food and fuel prices. Food inflation declined to 6.1% in January 2025 from 7.7% in December 2023, mainly due to significant decreases in prices of select non-vegetable items reflecting seasonal patterns and developments in international food prices. Fuel inflation declined to 1.0% in December 2024 from 13.7% in December 2023, mainly driven by lower electricity prices and stable domestic pump prices. However, overall inflation increased to 4.4% in January 2026, indicating a slight reversal from the prior downward trend. Although tighter monetary policies have historically helped to curb inflation, the impact on inflation of heightened geopolitical tensions and conflicts (especially in the Middle East and Africa) and higher fuel and other import prices is beyond the Government's control.

The core and non-core measures of inflation for Kenya, jointly developed by the Kenya National Bureau of Statistics and the CBK, were launched in January 2025. Core inflation excludes products whose prices are highly volatile or transient, from the overall CPI and therefore provides a more comprehensive measure of the underlying trend of inflation.

Overall inflation remained below the mid-point of the target range of $5\pm 2.5\%$ in August 2025, but increased to 4.5% from 3.0% in December 2024, largely on account of higher non-core inflation. Core inflation increased slightly to 3.0% in August 2025 from 2.2% in December 2024, but remained low reflecting muted demand pressures in the economy. The increase in core inflation was mainly on account of increased prices of processed food items. Non-core inflation rose to 9.2% in August 2025 from 4.9% in December 2024, reflecting higher prices of food crops and related items, particularly vegetables, tomatoes and carrots, on account of seasonal factors. Non-core inflation reached 11.2% in December 2025, decreasing to 10.3% in January 2026, mainly driven by lower prices of some vegetables, particularly tomatoes and onions.

The capping of bank interest rates was repealed through the enactment of the Finance Act 2019. Interest on commercial bank loans and advances reduced to 12.02% as at December 2020. Interest rates on commercial loans increased slightly to 12.16% as at December 2021. The 91-day Treasury Bills rate was 7.26% as at December 2021 and 6.90% as at December 2020. The loans-deposits interest rate spread decreased to 5.66% as at 31 December 2021 from 5.73% as at December 2020.

Interest rates increased for most of 2024, reflecting a tightened monetary policy stance and liquidity conditions in the money markets. The interbank interest rate rose from 5.06% in June 2022 to 5.39% in December 2022, 12.36% in September 2023, and 13.14% in June 2024, up from 11.65% in December 2023, remaining within the prescribed interest rate corridor around the CBR. The interbank rate/KESONIA then declined to 11.45% in December 2024, then to 9.55% in August 2025, and further to 9.08% in December 2025, reflecting an easing of monetary policy and improved liquidity conditions. The MPC reduced the CBR to 9.25%, in October 2025, to 9.00% in December 2025 and again to 8.75% in February 2026 as inflation remained within the target range.

Similarly, the 91-day Treasury bill rate increased from 7.90% in June 2022 to 9.33% in December 2022, 14.38% in September 2023, and 15.97% in June 2024, compared to 15.70% in December 2023. The average 182-day Treasury bill rate rose to 16.67% from 15.80% during the same period. Both the 91-day and 182-day Treasury bill rates declined to 10.32% and 10.39% respectively in December 2024, and further to 8.05% and 8.19% in August 2025, and to 7.78% and 7.80%, respectively, in December 2025.

Interest on commercial bank loans increased from 12.27% in June 2022 to 12.67% in December 2022, 13.62% in September 2023, and peaked at 17.22% in November 2024, before declining to 16.89% in December 2024 and further to 14.82% in December 2025. The loan-deposit interest rate spread decreased to 5.33% in September 2023 from 5.51% in December 2022 and 5.66% in December 2021, but then increased to 6.44% in December 2024 from 4.53% in December 2023, and increased further to 7.18% in July 2025 and to 7.69% in December 2025.

(1) Weighted average commercial bank interest rates (for 2025 data is up to July).

Average headline inflation rose from 4.7% in 2018 to 6.6% in 2023, before declining to 3.0% in 2024 largely on account of supply factors associated with developments in food and energy prices. The global headline inflation is expected to fall from 4.1% in 2025 to 3.8% in 2026.

Inflation developments in the period 2020-2022 were exacerbated by supply chain disruptions associated with the Covid-19 Pandemic and the Russia-Ukraine war. Food inflation averaged 8.5% in 2021, 13.1% in 2022 and 9.7% in 2023. However, food inflation declined to 4.8% in December 2024 from 7.7% in December 2023 mainly on account of significant decreases in prices of select non-vegetable items reflecting improved supply attributed to favourable weather conditions and lower international food prices.

Fuel inflation declined to 7.9% in 2020, reflecting lower international oil prices on account of low global demand following the Covid-19 Pandemic. However, the pick-up in global demand coupled with supply chain constraints, resulted in a significant increase in international oil prices between 2021 and 2022. As a result, fuel inflation increased to average 12.1% in 2021 and 13.9% in 2023. Fuel inflation further declined to 1.0% in December 2024 from 13.7% in December 2023, mainly driven by lower electricity prices and stable domestic pump prices. However, fuel price pressure re-emerged in 2025, and the fuel/transport component contributed to an uptick in headline inflation through the first half of 2025.

The headline inflation rate in Kenya stood at 4.4% in January 2026.

The following table sets out the headline inflation rates for the periods indicated.

	2021	2022	2023	2024	2025	2026
January	5.7	5.4	9.0	6.9	3.3	4.4
February	5.8	5.1	9.2	6.3	3.5

Net foreign assets in the banking system decreased by 21.0% to KES 590.1 billion as at 31 December 2021 and further decreased 51.9% to KES 283.9 billion as at 31 December 2022. Net foreign assets in the banking system increased by 179.1% to KES 792.4 billion as at 31 December 2023 compared with similar period in 2022. As at 31 December 2024, the net foreign assets in the banking system was KES 841.7 billion, an increase of 6.2% from KES 792.4 billion in 31 December 2023. Net foreign assets in the banking system increased by 40.7% to KES 1,183.9 billion as at 31 December 2025 compared with KES 841.7 billion in a similar period in 2024.

Domestic credit within the banking system had an increase of 17.0% as at 31 December 2020, and an increase of 14.9% as at 31 December 2021, and an increase of 11.5% as at 31 December 2022 and an increase of 14.9% as at 31 December 2023. As at 31 December 2024, the domestic credit within the banking system increased by 3.3%, and was largely unchanged as at 31 December 2025 compared to December 2024. Domestic credit growth to the private sector increased by 8.4% to KES 2,811 billion as at 31 December 2020, and increased by 8.6% to KES 3,053 billion as at 31 December 2021, and increased by 12.5% to KES 3,434 billion as at 31 December 2022 and increased by 13.9% to KES 3,911 billion as at 31 December 2023. As at 31 December 2024, the domestic credit growth in the private sector was KES 3,857.7 billion, a decline of 1.4% compared with December 2023. As at 31 December 2025 the domestic credit growth in the private sector increased by 5.9% to KES 4,085.8 billion compared to similar period in 2024. As at 31 December 2025, lending to the private sector accounted for 63.6% of total lending, while lending to the Central Government accounted for 35.6% of total lending.

As at 31 December 2020, broad money supply increased by 11.9% to KES 3,250.2 billion. As at 31 December 2021, broad money supply increased by 5.6% to KES 3,431.6 billion. As at 31 December 2022, broad money supply increased by 5.4% to KES 3,617.4 billion. As at 31 December 2023, broad money supply increased by 9.3% to KES 3,952 billion compared with similar period in 2022. As at 31 December 2024, the broad money

supply increased by 7.1% to KES 4,231.3 billion, compared with 31 December 2023. As at 31 December 2025, the broad money supply increased by 10.7% to KES 4,682.6 billion, compared with 31 December 2024.

Extended broad money supply (M3) grew to KES 3,990.9 billion as at 31 December 2020. Extended broad money supply (M3) further grew to KES 4,235.2 billion as at 31 December 2021, KES 4,538.5 as at 31 December 2022, KES 4,528.6 billion as at 31 December 2023, with a slight moderation to KES 5,488.7 billion as at 31 December 2024. As at 31 December 2025 extended broad money supply (M3) increased to 6,029.4 billion. Total domestic credit was largely unchanged at KES 6,429.8 billion as at 31 December 2025, compared to KES 6,458.5 billion as at 31 December 2024. In 2024, total domestic credit grew by 3.3% to KES 6,458.5 billion compared to a growth of 14.9% to KES 6,252.0 billion in 2023 and a growth of 11.5% in 2022. Overall liquidity of the banking system grew by 18.8% to KES 10,290.2 billion, compared to December 2024, while it grew by 5.7% to KES 8,662.0 billion in 2024. The currency outside banks increased to KES 323.2 billion as at 31 December 2025 compared to KES 292.8 billion in December 2024, and KES 282.1 billion in December 2023.

The following table sets out monetary and liquidity indicators for Kenya as at the dates indicated.

	As at 31 December

Narrow money supply (M1) increased by 12.8% to KES 1,720 billion as at 31 December 2020, increased by 7.4% to KES 1,848 billion as at 31 December 2021, increased by 6.7% to KES 1,971 billion as at 31 December 2022 and increased by 3.7% to KES 2,044 billion as at 31 December 2023. As at 31 December 2024, narrow money supply (M1) increased by 3.8% to KES 2,121.4 billion, compared to 31 December 2023, and increased by 13.4% to KES 2,405.9 billion as at 31 December 2025, compared to December 2024.

The overall liquidity increased by 17.3% to KES 5,665 billion as at 31 December 2020, increased by 9.5% to KES 6,202 billion as at 31 December 2021, increased by 11.2% to KES 6,897 billion as at 31 December 2022 and increased by 18.9% to KES 8,198 billion as at 31 December 2023. As at 31 December 2024, the overall

liquidity increased by 5.7% to KES 8,662.0 billion, compared to 31 December 2023, and increased by 18.8% to KES 10,290.2 billion in December 2025 compared to December 2024.

Securities Markets

Kenya has one stock exchange, the Nairobi Securities Exchange, which was established in 1954 and currently has 61 listed companies. The Capital Markets Authority of Kenya (the “**Capital Markets Authority**”) is the Government regulator charged with licencing and regulating the capital markets in Kenya with the prime responsibility of supervising, licensing and monitoring the activities of market intermediaries, including the Securities Exchange and the Central Depository and Settlement Corporation (CDSC). It also approves public offers and listings of securities traded at the Nairobi Securities Exchange. The Capital Markets Authority was established in 1989 and approved the demutualisation of the Nairobi Securities Exchange and the initial public offering of its shares and subsequent listing of its shares on the Nairobi Securities Exchange in June 2014. The Government and the CMA Investor Compensation Fund each hold a 5.1% interest in the Nairobi Securities Exchange. In September 2014, the Nairobi Securities Exchange announced the conclusion of the initial public offering. As at the date of this Offering Circular, the number of investment banks was 17, while the number of stockbrokers and fund managers was 10 and 43, respectively. The number of custodians was 223 in 2024. Kenya has also established a new Central Securities Depository to provide a settlement and clearing services.

The following table sets out information on various capital market indicators for the periods indicated.

	Year ended 31 December

PUBLIC FINANCE

Budget Process

The Constitution provides that the National Government must share all revenue that it raises equitably amongst the National and County Governments. For every financial year, the revenue allocated to the County Governments shall not be less than 15% of the total revenue that the National Government collects. This amount is calculated on the basis of the most recent audited accounts of revenue received, as approved by the National Assembly. County Governments may however be given additional allocations from the National Government's share of the revenue either conditionally or unconditionally. In line with this requirement, the equitable share allocation to counties has averaged 20.3% of the shareable revenues and 22.1% of the four taxes (Excise, import duties, income taxes and VAT) since the inception of Kenyan devolution in FY 2013/14 to the FY 2024/25. In addition to equitable share allocation, the Government has continued to transfer conditional allocations to the counties to address critical policy objectives at the grass roots. These conditional allocations have risen from KES 3.4 billion in FY 2013/14 to KES 26.3 billion in FY 2024/25. For the FY 2025/26, Parliament has approved KES 69.8 billion to be distributed as additional allocations, in addition to the KES 56.9 billion that County Governments will receive from Development Partners for the implementation of a range of development projects.

At least two months before the end of each financial year, a Division of Revenue Bill is introduced in Parliament to divide revenue raised nationally between the National Government and the County Governments. Similarly, a County Allocation of Revenue Bill is introduced in Parliament that divides amongst the counties the revenue allocated to the County Governments. Both these bills must be passed by the National Assembly and the Senate. The National Assembly, however, has power under the Constitution to amend or veto the County Allocation of Revenue Bill passed by the Senate by a resolution supported by two-thirds of the members of the National Assembly.

The Division of Revenue Bill, the County Allocation of Revenue Bill and the County Governments Additional Allocation Bill are submitted to Parliament by 15 February of each year. Based on an ordinary revenue projection of KES 2,901.9 billion in FY 2026/27, the Division of Revenue Bill, 2026 proposes that KES 420.0 billion be allocated to County Governments as their equitable revenue share and KES 9.6 billion be allocated to the Equalization Fund. The Bill proposes to allocate an additional KES 5.6 billion in FY 2026/27 as partial payment to arrears owed to the Equalization Fund.

Pursuant to Article 202(2) of the Constitution, the County Governments Additional Allocation Bill, 2026 proposes an additional allocation (both conditional and unconditional) of KES 75.7 billion to County Governments in the FY 2026/27, of which KES 18.3 billion will be financed from the National Government's share of revenue and KES 57.4 billion will be financed from proceeds of loans and grants from Development Partners. Taking into consideration the proposed additional allocations to County Governments, the proposed total transfers to County Governments in FY 2026/27 is KES 495.7 billion.

The revenue allocated to the National Government must be dealt with through a process involving the introduction of budget estimates (proposals as to how the money should be spent) and then the annual Appropriation Bill (which authorises the executive to spend).

Three separate sets of "budget estimates" are submitted to the National Assembly. They are:

- the expenditure of the National Government prepared by the National Treasury and submitted by the Cabinet Secretary for the National Treasury;
- the expenditure by the parliamentary service submitted by the Parliamentary Service Commission; and
- the expenditure by the judiciary submitted by the Chief Registrar of the Judiciary.

The budget estimates prepared by the National Treasury incorporates estimates of the projects and programs provided for in the MTP.

The Constitution does not require estimates for the parliamentary service or the judiciary to be considered by the National Treasury before they are submitted to Parliament.

Before the National Assembly considers the estimates of revenue and expenditure, a committee of the National Assembly discusses and reviews the estimates and makes recommendations to the National Assembly. In discussing and reviewing the estimates, the committee must seek representations from the public which are taken into account when the committee makes its recommendations to the National Assembly.

When the estimates of the National Government expenditure and the estimates of expenditure for the Judiciary and the Parliament have been approved by the National Assembly, they are included in an Appropriation Bill which is introduced to the National Assembly. The Appropriation Bill authorises the withdrawal, from the Consolidated Fund, of the money needed for the expenditure and appropriation of that money for purposes mentioned in the Appropriation Bill. The budget estimates and Appropriation Bill are submitted to the National Assembly by 30 April of each year.

On the basis of the Division of Revenue Act passed by Parliament, each County Government prepares and adopts its own budget and appropriation bill based on the revenue they raise themselves as well as their share of the revenue raised nationally that is divided amongst the counties in a County Allocation of Revenue Act.

In line with the Constitution, Section 15 of the PFMA sets out fiscal responsibility principles to ensure prudence and transparency in the management of public resources. The law provides that:

- over the medium term, a minimum of 30% of the national budget shall be allocated to development expenditure;
- the National Government's expenditure on wages and benefits for its public officers must not exceed 35% of total National Government revenue;
- over the medium term, the National Government's borrowings should be used only for the purpose of financing development expenditure and not for recurrent expenditure;
- the public debt should be maintained at a sustainable level;
- fiscal risks should be managed prudently; and
- a reasonable degree of predictability with respect to the level of tax rates and tax bases should be maintained, taking into account any tax reforms that may be made in the future.

In order to control the flow of cash between treasury and spending units and reduce the procedural delays encountered in the actual execution of budgets, the PFMA provides for the establishment of single treasury accounts for the National Government and County Governments through which payments of money should be made.,

Following the promulgation of the Constitution and the introduction of devolution, County Governments now play a greater role in the budget process. The Constitution also establishes and continues to provide the basis for a coherent public financial management legal framework. Under the Constitution, the controller of budget shall oversee the implementation of the budgets of the national and County Governments by authorising withdrawals from public funds. In addition, the PFMA also provides that the County Fiscal Strategy Paper must align with the national objectives in the Budget Policy Statement (BPS).

The County Fiscal Strategy Paper contains the broad strategic priorities and policy goals that is intended to guide the County Governments in their budgeting process. County Governments rely on allocations from the National Government to finance their budgets, with Government allocations accounting for approximately 78.1% in 2019/20, 72.5% in 2020/21, 74.7% in 2021/22, 79.4% in 2022/23 and 88.0% in 2023/24. In the FY 2025/26, a total of KES 415.0 billion was allocated to County Governments as their equitable share and KES 69.8 billion as conditional allocations. The 2026 BPS proposes that KES 420.0 billion be allocated to County Governments in FY 2026/27 as the equitable revenue share and KES 9.6 billion to the Equalization Fund. The National Treasury proposes to allocate an additional KES5.6 billion in FY 2026/27 as partial payment to arrears owed to the Equalization Fund. The County Governments are responsible for their own budgets and are expected to prepare balanced budgets, with no deficit. If there are any such deficits, these are not subsumed by the National Government and consequently do not impact the national debt obligation.

In addition, intergovernmental fora (such as the Intergovernmental Budget and Economic Council, the Intergovernmental Relations Summit and the Council of county governors) have been established to facilitate closer cooperation between the National and County Governments. The Intergovernmental Budget and Economic Council is a forum for consultation on economic and financial matters. Moreover, the National Government, in accordance with the requirements of the Constitution, has been supporting County Governments by building their capacity in the management of public finances. The Government is also working closely with the SRC, which is mandated to set and advise on salary policy in the public sector.

The 2025 Budget Review and Outlook Paper (BROP) was submitted to Cabinet on 30 September 2025 and subsequently to Parliament on 3 October 2025. The document provides an overview of how the actual performance of FY 2024/25 affected compliance with the fiscal responsibility principles outlined in the PFM Act, CAP 412A and the financial objectives set out in the 2025 BPS. It also presents the recent economic developments, macroeconomic and fiscal projections, and the indicative sector ceilings for the FY 2026/27 and the medium-term budget. The 2025 BROP forms the basis for the development of the 2026 BPS that will detail the progress in the implementation of Government policy priorities anchored on the Bottom-Up Economic Transformation Agenda. The 2026 BPS has been prepared pursuant to Section 25 of the PFM Act, CAP 412A for submission to the Cabinet for approval, after which the approved BPS will be submitted to Parliament by 15 February 2026.

Taxation Policy

Overview of Taxation Legislation

Taxation policy in Kenya is primarily set out under Article 209 of the Constitution of Kenya, which grants the National Government the authority to levy various taxes such as Income Tax, Value-Added Tax (VAT), Excise Duty, Customs Duties, and other duties on imports and exports. This authority extends to any other tax established by an Act of Parliament or County Assembly. Additionally, County Governments have the power to impose property rates, entertainment taxes, and other taxes as sanctioned by Parliament.

Additionally, Article 210 of the Constitution stipulates that the imposition, waiver, or alteration of taxes must be done through an Act of Parliament. Complementing this, Article 201 of the Constitution mandates the fair distribution of the tax burden and equitable sharing of nationally raised revenue between the National and County Governments. Article 201 delineates the principles of public finance, which are foundational to tax laws, administrative processes, and procedures. The PFMA further outlines fiscal responsibility principles, including the need for predictability in tax rates and tax base. In addition to the Constitution and the PFMA, there are specific tax laws and administration laws overseen by the National Government.

The key tax laws include:

- **The Income Tax Act (Cap. 470)**, governs the determination, assessment, and collection of income tax;
- **The Value Added Tax Act (Cap. 476)**, which imposes VAT on goods and services produced or imported into Kenya;
- **The Excise Duty Act (Cap 472)**, outlining the charge, assessment, and collection of Excise Duty on excisable goods and services;
- **The Tax Procedures Act (Cap 469B)**, standardizing and consolidating the procedural rules for administering tax laws in Kenya;
- **The East African Community Customs Management Act, 2004**, managing Customs-related issues within the EAC;
- **The Miscellaneous Fees and Levies Act (Cap 469C)**, imposing fees and levies on imported goods for Kenyan consumption and export duties to promote value addition;
- **The Tax Appeals Tribunal Act (Cap 469A)**, establishing a tribunal for tax appeal management and administration; and

- **The Kenya Revenue Authority Act (Cap. 469)**, which establishes the Kenya Revenue Authority, responsible for revenue assessment and collection, and enforcing revenue laws.

Generally, the overall aim of Kenya's tax policy is to move towards expenditure-based taxes that cover all sectors, including the informal sector and away from direct taxes. Over the years, incremental improvements have been made to the country's taxation regime.

As of September 2025, Kenya's tax base constituted 44.1% income tax, 30.2% Value Added Tax (both domestic and import), 12.9% Excise Duty, 7.1% Import Duty and 5.8% Other Taxes. Other taxes include stamp duty, capital gain tax, traffic revenue, land revenue, fines and forfeitures, import declaration fees (IDF), tax on property, reimbursement and Anti Adulteration Levy.

Challenges to the Income Tax Act

In *Nairobi HC Petition E280 OF 2021 Eliud Karanja Matindi Vs Cabinet Secretary, The National Treasury & Planning; The Attorney General; The National Assembly & The Commissioner General, Kenya Revenue Authority*, the Petition was lodged in the High Court against the decision to exempt income accrued in or derived from Kenya by Japanese companies, consultants and employees involved in the projects under the Financing Agreements specified in Legal Notice No. 15 of 2021 from the provisions of the Income Tax Act. The Petitioner contended that this amounted to discrimination against Kenyan Citizens who were already facing steep taxation.

The High Court determined the matter by a judgement delivered on 17 February 2023, finding that the Petition had merit and the exemption from payment of income tax by the Japanese companies, consultants and employees involved in the projects under the Financing Agreements specified in Legal Notice No. 15 of 2021 was deemed to be in violation of the provisions of Article 27 of the Constitution, as it was discriminating on the grounds of race. Additionally, the court declared that Section 13(2) of the Income Tax Act was unconstitutional to the extent that it authorised an income tax waiver through a gazette notice rather than legislation. Consequently, the court directed the Kenya Revenue Authority (the "**KRA**") to commence tax collection from the previously exempted individuals as of the judgment date.

However, on 30 December 2024, the Court of Appeal overturned the High Court's judgment. Addressing the claim that the legal notice failed to comply with Article 210 of the Constitution and was discriminatory, the Court of Appeal referred to Article 94(5) of the Constitution, emphasizing that while legislative authority is primarily vested in Parliament, it can be delegated to other entities with the express authority of the Constitution or legislation. The Court of Appeal found that the Cabinet Secretary for the Treasury exercised their powers in accordance with Article 94(5) of the Constitution and Section 13(2) of the Income Tax Act. Furthermore, the Court of Appeal noted that the Legal Notice was issued following negotiations between the Governments of Kenya and Japan and applied to other countries with financing agreements with the Government of Japan, not just Kenya. Regarding the constitutionality of Section 13(2) of the Income Tax Act, the Court of Appeal ruled that the issue was neither pleaded nor requested in the petition before the High Court. Consequently, the High Court erred in making such a determination without being prompted by any of the parties.

Following the Court of Appeal's judgment declaring section 13(2) of the Income Act and Legal Notice No. 15 of 2021 constitutional, all legal notices based on Section 13(2) of the Income Tax Act, including Legal Notice No. 86 of 2014 (exempting tax on interest payable on a bond issued outside of Kenya by Government of Kenya) (the "**Interest Exemption**") Legal Notice No. 87 of 2014 (exempting from tax gains made on the transfer of any bond issued outside Kenya) (the "**Capital Gains Exemption**"), Legal Notice No. 46 of 2014 (exempting the Interest Exemption and Capital Gains Exemption from expiry), Legal Notice No. 91 of 2015 (granting waivers on withholding tax on foreign-sourced loans for investment in energy, water, and related sectors) and Legal Notice No. 165 of 2015 (exempting withholding tax on payments for services rendered by non-residents under a power purchase agreement), remain effective as of the date of this Offering Circular. As at the date of this Offering Circular, the decision is subject to appeal before the Supreme Court in *Petition No. E006 of 2025- Eliud Karanja Matindi vs The Cabinet Secretary, Ministry of National Treasury & Planning & 3 Others*. The prevailing position would, therefore, need to be reassessed should the Supreme Court depart from the finding of the Court of Appeal.

Enactment of Finance Act 2023

On 26 June 2023, the Kenyan Parliament introduced significant changes to taxation with the enactment of the Finance Act 2023, which reflected the government's efforts to enhance revenue collection and address fiscal challenges to meet the expansive KES 3.6 trillion budget. The Finance Act 2023 introduced pivotal changes across various tax structures, aiming to augment national revenue while considering the socio-economic impacts on individuals and businesses. Some of the key tax amendments are as follows:

- Introduction of the Housing Levy. Both employers and employees were required to contribute 1.5% to the National Housing Development Fund. This levy, initially proposed to be refundable or applicable for house purchases, has been legislated as a non-refundable contribution, symbolizing the government's effort to address housing needs. The High Court declared the housing levy unconstitutional in Petition No. E181 of 2023, however the Affordable Housing Act, 2024 was assented to on 19 March 2024 curing the defects that the Court had declared. Accordingly, the imposition of the levy remains at 15% by both employees and employers pursuant to Sections 4 and 5 thereof.
- The Finance Act, 2023 brought a progressive change in the PAYE tax structure. It incorporated new tax bands of 32.5% for incomes ranging between KES 500,000 and KES 800,000 and 35% for those exceeding KES 800,000. This adjustment is expected to have a noteworthy impact on tax collections from high-income earners.
- Further, the Finance Act, 2023 has increased the VAT on petroleum products from 8% to 16%, excluding liquefied petroleum gas. This increment reflects the government's approach to balance revenue generation with the economic realities of Kenyans. More on VAT reforms seeking to align with global norms, the Finance Act 2023 introduced a 0% tax rate on services exported from Kenya, a strategic move to encourage international trade and service exportation.
- It has introduced a more stringent requirement for withholding tax remittance which should now be to the KRA within five days post-deduction. This measure was aimed at enhancing the efficiency of tax collection. Marking a significant shift, the Finance Act 2023 imposed a 15% tax on repatriated income for non-residents with a permanent establishment in Kenya, alongside a reduction in their Corporate Income Tax rate from 37.5% to 30%. Equally, to promote domestic vaccine production, the corporate tax for companies manufacturing human vaccines has been reduced from 30% to 10%. The Act further adjusts the turnover tax by reducing the upper threshold to KES 25 million from KES 50 million and increasing the rate from 1% to 3%. This change targeted the broader inclusion of businesses within the tax net.
- The Finance Act 2023 introduced a tax on income derived from digital assets, including cryptocurrencies, at a rate of 3%, acknowledging the evolving digital economy.
- Other changes include Mortgage Interest Deduction, where individuals are now entitled to claim deductions on mortgage interest expenses up to KES 300,000 annually for loans obtained from cooperative societies. There is a Rental Income Tax Reduction with the Residential Rental Income Tax reduced from 10% to 7.5%, a measure likely to have a positive impact on the real estate sector.

The Finance Act 2023 amendments exemplify Kenya's strategic approach to fiscal policy, balancing the need for revenue generation with the economic welfare.

Challenges to the Finance Act 2023

During 2023, various petitions were filed in the High Constitutional Court Division, namely Petition No. E181 of 2023, which was consolidated with Petitions No. E211, 217, 219, 221, 227, 228, 232, 234, 237 and 254 of 2023. These petitions challenged the constitutionality and legislative process that led to the enactment of Finance Act 2023. On 28 November 2023, the Court delivered its judgment finding that the legislative process and the entire Act were unconstitutional. In particular, the Court found the following:

- (a) Sections 76 and 78 of the Finance Act 2023 amending Section 7 of the Kenya Roads Act 1999; Section 87 of the Finance Act 2023 amending Section 28 of the Unclaimed Assets Act 2011 and 88 and 89 of the Finance Act 2023 which repeals Section 21 of the Statutory Instruments Act were all unconstitutional, null and void.

- (b) Section 84 of Finance Act 2023 violates Article 10 (2) (b) and (c) and 201 of the Constitution and were therefore unconstitutional, null and void.
- (c) Order of prohibition was issued prohibiting the Respondents from charging, levying or in any way collecting tax, otherwise known as the ‘Affordable Housing Levy’ on the basis of the aforesaid Section 84 of Finance Act 2023.

The Executive, along with the National Assembly, being dissatisfied with part of the judgment, filed applications for a stay in the Court of Appeal, specifically Civil Application Nos. E581 of 2023 and E577 of 2023. They sought a stay of execution and/or conservatory orders to suspend the effect of the judgment declaring Sections 76, 78, 84, 87, 88, and 89 of the Finance Act, 2023 unconstitutional, pending the hearing and determination of the intended appeal. On 26 January 2023, the Court of Appeal declined to grant the stay, holding that public interest weighed against granting the requested stay or suspension. The Court directed that the appeal be heard expeditiously. In its judgment delivered on 31st July 2024, the Court of Appeal declared the entire Act unconstitutional. In addition, the Court of Appeal declined an invitation to exercise its discretion to set aside the High Court’s declaration on unconstitutionality of Section 89 of the Finance Act, 2023 (which was intended to repeal Section 21 of the Statutory Instruments Act, thus doing away with expiry of legal notices) on the basis of the doctrine of mootness. The Court of Appeal noted that a Bill has been tabled by the appellants which sought to address the shortcomings identified by the High Court nullifying Sections 88 and 89 of the Finance Act, 2023 and in so doing, they had taken decisive steps in complying with the High Court’s decision.

On 29 October 2024, Kenya’s Supreme Court overturned the Court of Appeal’s decision, issuing final orders that set aside the Court of Appeal’s declaration of the entire Act as unconstitutional. The Supreme Court upheld the Court of Appeal’s determination regarding the mootness of the affordable housing issue, as well as on the unconstitutionality of Section 89 of the Finance Act, 2023. Additionally, the Supreme Court found Sections 76 and 78 of the Act, which amend Section 7 of the Kenya Roads Act 1999, and Section 87 of the Act, which amends Section 28 of the Unclaimed Financial Assets Act 2011, to be unconstitutional, as they were neither incidental to nor directly connected to a money bill.

Except for these sections, the Supreme Court upheld the constitutionality of the Finance Act 2023. Consequently, the amendments introduced by the Act to various tax statutes are now in effect and constitute the applicable law.

KRA Initiatives

The KRA has implemented several new initiatives and reforms to enhance tax collection and administration. These initiatives are part of a broader strategy to increase efficiency, compliance, and broaden the tax base.

Amongst these initiatives are several measures intended to combat tax evasion and fraud through the use of intelligence and risk-based forward-looking enforcement. Some of the specific reforms undertaken include the: (i) roll out of the Integrated Customs Management System (“**ICMS**”) to improve the efficient clearance of goods and prevent undervaluation, mis-declarations and falsifications of import documents; (ii) implementation of the Regional Electronic Cargo Tracking (“**RECTS**”) to tackle transit diversion; (iii) enhancement of scanning activities to detect concealment; (iv) scaling-up of ongoing and routine activities such as Pre-Verification of Conformity (“**PVOC**”), benchmarking and auctions; (v) data matching and use of third-party data to enhance compliance; (vi) integration of iTax with IFMIS to ensure timely collection of withholding VAT and other withholding taxes; (vii) expansion of the tax base by targeting the informal sector, betting, lotteries and gaming; (viii) pursuit of non-filers and an increased focus on the taxation of international transactions and transfer pricing; and (ix) enhancement of investigations and intelligence capacity to support revenue collection.

Kenya has also signed and ratified international conventions on tax such as the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting.

Above this, the Kenyan government has proposed various economic and tax reforms for the fiscal year 2023/2024 as outlined in the 2023 Budget Policy Statement (BPS). These reforms include the development of the National Tax Policy and the Medium-Term Revenue Strategy (MTRS) for the period FY 2023/24-2026/27. The focus of these reforms is to reduce tax gaps, enhance revenue per unit, and increase tax compliance rates. The reforms are crucial for financing the government’s economic plan, which focuses on agriculture, MSME economy, housing and settlement, healthcare, digital superhighway and creative economy, and environment and

climate change. The National Tax Policy provides broad guidelines for governing tax administration and the tax system in Kenya. More specifically, the policy provides a set of guidelines for taxation of income, goods and services and forms the basis for review of tax legislation, development and administration. The overall objective of the policy is to guide the development of a progressive tax system that enhances revenue mobilisation by the Tax administration, promotes investment and fosters a flexible fiscal space. The aim is to ensure that tax rates do not affect the demand of the product and the tax structure do not distort markets and to ensure that taxes do not affect investment.

In response to missing its revenue targets, KRA has also initiated several changes to improve tax collection. These include halting payment for tax reliefs to audit and enhance tax relief processes, implementing new regulations for hunting tax evaders with overseas accounts, and strengthening the domestic taxes enforcement division. Kenya's Treasury has also signed regulations to allow KRA access to information on bank accounts held by Kenyans in various countries, aiming to step up efforts against tax evasion. These initiatives represent a comprehensive approach by the Kenyan government and KRA to enhance the country's tax system's efficiency and effectiveness. The KRA announced further upgrades to its iTax system, effective 1 January 2026, designed to strengthen tax compliance and improve the accuracy of return filings, including tighter criteria for issuing Tax Compliance Certificates. Additionally, the KRA will also begin to validate income and expenses declared in income tax returns against data from the Electronic Tax Invoice Management System (eTIMS), import records from customs and withholding tax certificates.

Kenya is set to be among the early adopters in Sub-Saharan Africa of automated, data-driven tax validation integrated into its tax administration system. Effective 1 January 2026, the KRA will begin automatically validating income and expenses declared in both individual and non-individual tax returns submitted through the iTax platform, by cross-checking them against specified electronic data sources, including TIMS/eTIMS invoices, withholding tax gross amounts, and customs import records. This initiative, part of the government's broader tax modernisation agenda, aims to enhance compliance, reduce under-reporting and fraud, and improve the accuracy of tax reporting in real time.

However, challenges remain. One of the primary challenges is the low level of tax compliance. This is partly due to a large informal sector that is not fully captured in the tax net. The lack of compliance is also attributed to the complexity of the tax system, which can discourage voluntary compliance. Further, the Kenyan tax base is relatively narrow, with a heavy reliance on a small number of taxpayers. This puts a disproportionate tax burden on formal sector employees and compliant businesses, while a significant portion of the economy operates outside the tax system. Equally, economic factors such as inflation, unemployment, and fluctuating economic growth also impact tax revenue collection. Lastly, globalisation and the digital economy present new challenges for tax collection, such as the difficulty in taxing international transactions and transfer pricing issues.

In September 2023, the MTRS was approved by Cabinet for implementation. The MTRS is aligned to the National Tax Policy and will guide tax administration to improve efficiency in the administration of tax laws, close loopholes for tax evasion, and enhance voluntary tax compliance. The additional resources raised from the MTRS will facilitate the implementation of the Government's BETA geared towards economic turn-around and inclusive growth through the MTP IV of the Vision 2030, as well as the MTEF.

The objectives of the Medium-Term Revenue Strategy (MTRS) are to: (i) improve efficiency in revenue administration; (ii) ensure equity and fairness in the tax regime; (iii) enhance tax-payer compliance with tax obligations; (iv) expand the tax base; (v) create certainty in the tax regime to attract investment; and (vi) promote investment across various sectors by removing market distortions. The implementation of MTRS is expected to among others: (i) raise revenue to GDP ratio from 14.3% in FY 2022/23 to 20.0% by end of the FY 2026/27; (ii) increase tax compliance rate from 70% in FY 2022/23 to 90% by FY 2026/27; (iii) promote investment through removing market distortions through rationalisation tax expenditures and review of tax rate; and (iv) align tax policy with government priorities. The MTRS is to be implemented within a three-year period from FY 2024/25 to FY 2026/27. The implementation of administrative measures under MTRS began in 2024, while the implementation of policy measures was initiated through the Tax Laws (Amendment) Act, 2024, and the Tax Procedures (Amendment) Act, 2024 and continues under various Tax Amendment Bills and Finance Bills.

Finance Bill, 2024, the Tax Laws (Amendment) Bill, 2024, and the Tax Procedures (Amendment) Bill, 2024

Tax policy reforms were expected to be implemented through the Finance Acts and Regulations, beginning with the Finance Bill, 2024. Notable among these tax proposals was (i) the introduction of a contentious motor

vehicle tax set at a rate of 2.5% of the value of the vehicle, with a floor of KES 5,000 and ceiling of KES 100,000, (ii) extending the timeframe for the KRA to issue decisions from 60 to 90 days, and (iii) to increase the VAT registration threshold for taxpayers making taxable supplies from KES 5 million to KES 8 million.

On 26 June 2024, the President declined to assent to the Finance Bill, 2024. In referring the Bill for reconsideration by the National Assembly, the President took note of the widespread expression of dissatisfaction by members of the public on the contents of the Bill.

The Finance Bill, 2024, sought to implement significant changes; however, its lack of assent highlighted the necessity for further review and dialogue. Consequently, the new proposals aim to refine the earlier suggestions and introduce new measures to align with Kenya's broader economic priorities, such as expanding the tax base, promoting business investment, and addressing challenges posed by the evolving global economic landscape.

Key proposed changes include:

- the introduction of a 30% Significant Economic Presence (SEP) Tax to replace the Digital Service Tax, which will impact non-residents conducting business over digital marketplaces. Additionally, the bill proposes a 5% withholding tax on interest earned from infrastructure and social bonds;
- Regarding VAT, several changes to the First Schedule of the VAT Act are proposed, including the exemption of agricultural pest control products and fertilizers, which are currently zero-rated;
- For personal income taxes, there is a proposal to remove the affordable housing levy and post-retirement medical fund relief, while allowing deductions of these payments when computing taxable income; and
- On employment benefits, the Bill proposes to increase the tax-exempt non-cash employment benefits from KES 36,000 per year to KES 60,000 and raise the value of tax-free meals provided by employers from KES 48,000 to KES 60,000.

The Bill also includes proposals for tax exemptions on pension benefits upon retirement and extends the exemption period for withdrawals from 15 years to 20 years.

In November 2024, the Tax Laws (Amendment) Bill, 2024, and the Tax Procedures (Amendment) Bill, 2024, were introduced following the rejection of the Finance Bill, 2024. These new bills provide the Government with an opportunity to revisit some of the provisions that were previously proposed in the Finance Bill, 2024, and which the public had rejected. The President of the Republic of Kenya signed these bills into law on 11 December 2024 and the Tax Laws (Amendment) Act 2024 and the Tax Procedures (Amendment) Act, 2024 became effective on 27 December 2024, and are currently under the implementation stages.

The constitutionality of Section 2 of the Tax Procedures (Amendment) Act, 2024 was challenged in *Law Society of Kenya v National Assembly of Kenya & 3 others (Petition E004 of 2025) [2025] KEHC 5472 (KLR) (Constitutional and Human Rights) (2 May 2025) (Judgment)*. The provision, suspending Kenya's compliance with certain international and regional treaty obligations on import duties for steel billets and wire rods, was argued to have bypassed public input and violated Article 2(6) of the Constitution. The Court dismissed the Petition, stating that the provision arose from public participation and stakeholder views, thus not requiring renewed public input. It also held that domestic laws take precedence over non-domesticated international treaties and found that the Petitioners did not specify conflicting treaty provisions. The decision underscores the latitude of Kenya's executive and legislative bodies to adjust domestic laws for national economic interests, provided due process is followed.

Some of the key reforms among others include:

- Imposing of withholding tax on income deemed to have accrued in or derived from a digital marketplace made to resident and non-resident persons at the rate of 5% or 20% for resident persons and non-resident persons, respectively;
- Introduction of withholding tax on supply of goods to a public entity at a rate of 0.5% for resident persons and 5% for non-resident persons;

- Replacement of digital services tax with a significant economic presence (SEP) tax, imposing a 30% tax on deemed taxable profits for non-resident business without a permanent establishment;
- Introduction of a minimum top-up tax payable by a covered person if the combined effective tax rate in respect of that person for a year is less than 15%; and
- Under the Tax Procedures (Amendment) Act, 2024, extension of the tax amnesty period from 30 June 2024 to 30 June 2025.

Enactment of Finance Act 2025

The Finance Act 2025, enacted in July 2025, introduces a range of tax reforms aimed at enhancing revenue collection, simplifying tax administration, and aligning with evolving business and economic dynamics. The Act amends various tax laws including the Income Tax Act, VAT Act, Excise Duty Act, and others. The Act also limits the carry-forward of tax losses to five years, potentially impacting businesses with long-term loss strategies.

In the digital economy space, the previously introduced Digital Asset Tax has been repealed. Instead, a 10% excise duty is imposed on fees charged by Virtual Asset Service Providers (VASPs). Additionally, a 5% excise duty is now charged on deposits made into betting wallets. The Act introduces excise duty on virtual asset services at the rate of 10%; and on imported tea; uncoated craft paper and paperboard; craft liner; fully built and semi-built air capture machines; aluminium profiles; fabricated doors and fabricated windows; and imported multiple walled insulating units of glass.

From an employee and personal tax perspective, the Act increases the tax-exempt subsistence allowance from KES 2,000 to KES 10,000 per day, and fully exempts gratuity payments and certain pension withdrawals from tax. It also allows mortgage interest deductions on loans used to construct (not just buy) residential properties. Employers are now mandated to automatically apply all tax reliefs and deductions at payroll level, easing compliance for individual taxpayers.

On the VAT and corporate tax front, the Act introduces new VAT exemptions and zero-rating provisions for inputs in specific sectors such as agriculture and health, and incentivises startups and financial firms under the Nairobi International Financial Centre (NIFC) with reduced corporate tax rates. For instance, startups enjoy a 15% rate for the first 3 years, and NIFC companies benefit from 15% for 10 years and 20% thereafter.

Overall, the Finance Act 2025 seeks to expand the tax base, modernise taxation in line with digital trends, and improve efficiency and fairness in Kenya's tax system. However, it also raises the compliance burden for some sectors and tightens rules for digital and foreign-based businesses.

Revenues and Expenditures

In FY 2020/21, the fiscal deficit including grants amounted to KES 929.3 billion (estimated to be 8.2% of GDP). The higher deficit is largely due to increased spending pressures for containing the spread of COVID-19 Pandemic and implementation of containment measures including review of tax rate to increase disposable income that worsened revenue performance. In particular, severe disruptions on economic activities in the first half of the FY 2020/21 arising from the COVID-19 Pandemic containment measures coupled with tax reliefs implemented by Government in April 2020 to cushion Kenyans majorly explain the subdued revenue performance which led to an increase in the fiscal deficit.

In FY 2021/22, the fiscal deficit improved to amount to KES 785.1 billion (estimated to be 6.2% of GDP) from the deficit of 8.2% of GDP in FY 2020/21. This was largely attributed to improved operating business environment following the recovery of the economy from the adverse impact of COVID-19 Pandemic resulting to above target performance of total revenue mainly on account of surplus collection of ordinary revenue. This good performance was however overshadowed by the effects of the Russia-Ukraine conflict which put pressure on fuel and commodity prices prompting the Government to increase spending in order to cushion citizens. This coupled with the unfavourable conditions in the sovereign bond market which resulted to below target performance in foreign financed resources and shortfalls in domestic market affected expenditure performance during the reporting period.

In FY 2022/23, the fiscal deficit amounted to KES 800.4 billion (estimated to be 5.6% of GDP) from the deficit of 6.2% of GDP in FY 2021/22. The implementation of the FY2022/23 budget marked the transition from the previous Regime to the current Administration. The first half of the FY 2022/23 was marked by slow implementation of programmes and projects due to inadequate resources. In part, revenue performance was affected by the general slowdown of economic activities occasioned by the adverse impact of shocks that hit the country including the uncertain operating environment related to the general elections and the negative impact of the geo-politics that led to global economic slowdown and supply chain disruptions. There were also constraints in raising resources from the domestic market due to tight liquidity conditions and short-term instruments becoming saturated. Given the realities, the Government embarked on reprioritisation and cost-cutting measures to ensure smooth implementation of priority programmes for the remainder of the financial year.

The following tables sets forth the fiscal accounts of the Government for the periods indicated.

Budget execution in the FY 2023/24 was hampered by challenges in revenue mobilisation and difficulties in raising resources from the domestic market. By the end of June 2024, total revenue collected including A-I-A amounted to KES 2,702.7 billion (17.3% of GDP) against a target of KES 2,907.5 billion. The shortfall of KES 204.9 billion was on account of below target ordinary revenue collection by KES 172.1 billion while collection of the ministerial A-I-A was also below target by KES 32.8 billion. This revenue performance represented an improved growth of 14.5% compared to a growth of 7.3% recorded in a similar period in the FY 2022/23. The total expenditure and net lending in FY 2023/24 amounted to KES 3,605.2 billion, against a target of KES 3,871.0 billion. The resultant under expenditure of KES 265.8 billion is attributed to lower absorption recorded

in recurrent and development expenditures by the National Government and below target equitable share transfers to the County Governments. In line with the performance in expenditure and revenues, the fiscal deficit (including grants, on a cash basis), amounted to KES 835.1 billion (5.3% of GDP) against a target of KES 925.0 billion (5.7% of GDP). This resulted in a primary surplus of KES 22.4 billion (0.1% of GDP).

The fiscal performance for FY 2024/25 was characterised by revenue shortfalls caused by the withdrawal of the Finance Bill 2024 and public protests that disrupted economic activities. To sustain fiscal consolidation and protect essential services, the Government implemented various revenue and expenditure measures. On the revenue side, the Government enacted the Tax Laws (Amendment) Act, 2024, Tax Procedures (Amendment) Act, 2024, and Business Laws (Amendment) Act, 2024. On expenditure side, the Government rationalised spending on non-essential services.

Despite a challenging fiscal environment, the Government met key obligations such as debt repayments, releasing funds due to Ministries, Departments and Agencies, and disbursing 100% of the equitable share to all 47 counties by 30 June 2025. Additionally, by the end of June 2025, total revenue including Appropriations-in-Aid (AiA) increased by 8.2% amounting to KES 2,923.6 billion, equivalent to 16.8% of GDP. The revenue was below target by KES 62.0 billion. Total expenditure and net lending amounted to KES 3,975.9 billion (22.8% of GDP) against a target of KES 4,045.1 billion, resulting in an under-expenditure of KES 69.1 billion. This deviation was mainly attributed to below target absorption in both recurrent and development expenditures. The resultant fiscal deficit including grants (on a cash basis), amounted to KES 1,019.1 billion, equivalent to 6.3% of GDP.

The following tables sets forth the fiscal accounts of the Government for the periods indicated.

Kenya believes it has access to adequate concessional and non-concessional financing and reserves buffer to finance both fiscal and balance of payments gaps, while a robust domestic securities market provides further flexibility. The Government is committed to implement the 2025 Medium Term Debt Strategy, as well as the 2026/27 – 2028/29 Medium Term Debt Strategy, which envisage maximisation of concessional and semi concessional external debt while proposing liability management operations in the domestic and international capital markets.

In 2024/25, the fiscal policy and the medium-term budget seeks to support the Government’s BETA, through continued implementation of a growth responsive fiscal consolidation plan designed towards slowing down public debt without compromising service delivery. The fiscal policy endeavours to strike an appropriate balance while recognizing the difficult trade off exerted by Kenya’s limited fiscal space that has been exacerbated by continued financing constraints. This will be achieved through broadening the revenue base and containing non-priority expenditures while enhancing social safety nets. Additionally, the law under the Public Finance Management Act (Cap. 412A, Sections 50(2)(a) and 50(2)(c)) requires the government to progressively reduce the present value of the debt-to-GDP ratio to a statutory anchor of 55%. The improvement in debt levels is anchored on fiscal consolidation tied to implementation of fiscal reforms under the IMF Extended Credit Facility program.

The National Government’s cumulative revenue collection, including AiA, for the period July to September 2025 amounted to KES 709.6 billion, falling short of the target of KES 793.2 billion by KES 83.6 billion, mainly due to underperformance in ordinary revenue. During the same period, total expenditure and net lending, including transfers to County Governments, amounted to KES 993.0 billion, slightly above the target of KES 987.2 billion. Consequently, the fiscal balance, including grants and measured on a commitment basis, recorded a deficit of KES 280.5 billion (1.6% of GDP) as at the end of September 2025.

The following table outlines the fiscal accounts of the Government as at 30 September 2025.

Nonetheless, in the FY 2025/26 and the medium-term budget, the Government will continue to implement a fiscal consolidation plan designed towards slowing down growth of public debt without compromising economic growth. This will be supported by enhanced domestic revenue mobilisation as well as expenditure rationalisation and prioritisation while safeguarding priority Government programmes and social spending. In line with the fiscal consolidation plan, the overall fiscal deficit is projected to decline to 4.7% of GDP in the FY 2025/26 budget from 6.3% of GDP in the FY2024/25. This will boost the country's debt position and ensure the country's development agenda is sustainably funded.

Revenue and Grants

Actual revenue in 2020/21 was KES 1,803.5 billion, or 2.4%, less than the target revenue included in the budget for the fiscal year. The shortfall was primarily a result of underperformance in both ordinary revenues and the A-i-A revenues by KES 32.0 billion and KES 12.5 billion, respectively.

The following table sets forth information regarding the composition of fiscal revenues as a percentage of total revenues and grants, for the periods indicated.

	2020/21

Actual revenue in 2021/22 was KES 2,199.8 billion, or 0.4%, more than the targeted revenue included in the budget for the fiscal year. The above target collection was primarily as a result of surplus ordinary revenue collection amounting to KES 66.4 billion with tax revenues above target in all broad categories except excise duty. Performance of ministerial A-i-A was below target by KES 58.5 billion on account of shortfalls recorded in both recurrent and development A-i-A.

Actual revenue in 2022/23 was KES 2,360.5 billion, or 4.8%, less than the target revenue included in the budget for the fiscal year. The shortfall was primarily a result of underperformance in both ordinary revenues and the A-i-A revenues by KES 104.3 billion and KES 13.8 billion, respectively. Tax revenue from the broad tax categories were below their respective targets in the period under review with Excise duty recording the highest shortfall of KES 29.5 billion. The shortfall in excise duty is explained by the decline in oil volumes, motor vehicle imports and deliveries of domestic excisable goods such as cosmetics, beer and spirits.

The following table sets forth information regarding the composition of fiscal revenues as a percentage of total revenues and grants, for the periods indicated.

In the FY 2023/24, total revenue collected including A-i-A amounted to KES 2,702.7 billion (17.1% of GDP) against a target of KES 2,907.5 billion (18.0% of GDP). The shortfall of KES 204.9 billion was on account of below target ordinary revenue collection by KES 172.1 billion while the collection of the ministerial A-i-A was also below target by KES 32.8 billion. This revenue performance represented an improved growth of 14.5% compared to a growth of 7.3% recorded in the similar period in the FY 2022/23.

In FY 2024/25, total revenue, including Appropriations-in-Aid (AiA), amounted to KES 2,923.6 billion (16.8% of GDP). This fell short of the target of KES 2,985.6 billion (17.1% of GDP) by KES 62.0 billion on account of shortfall recorded in ordinary revenue. The ordinary revenue was KES 2,420.2 billion against a target of KES 2,496.2 billion, a shortfall of KES 76.0 billion. The Ministerial AiA was above target by KES 14.0 billion during the period under review. Overall, total revenue inclusive of the Ministerial AiA grew by 8.2%.

The following table sets forth information regarding the composition of fiscal revenues as a percentage of total revenues and grants, for the periods indicated.

For the period between July to September 2025, cumulative revenue collection including AiA for the period between July – September 2025 amounted to KES 709.6 billion (3.7% of GDP) against a target of KES 793.2 billion. This is largely attributed to underperformance in ordinary revenue, which amounted to KES 573.5 billion against a target of KES 663.5 billion. However, ministerial AiA was above target by KES 6.4 billion, recording a total of KES 136.1 billion.

Total external grants for the same period amounted to KES 2.9 billion against a target of KES 4.4 billion, which quantifies to KES 1.5 billion of underperformance.

The following table sets forth information regarding the composition of fiscal revenues as a percentage of total revenues and grants as at 30 September 2025.

Expenditure and Net Lending

Total expenditure and net lending in 2020/21 recorded an under spend of KES 122.7 billion (or 4.2% deviation from budget). This shortfall was attributed to lower absorption in both recurrent and development expenditures by the National Government.

The following table sets forth information regarding the composition of fiscal expenditures as a percentage of total expenditures and net lending for the periods indicated.

	2020/21	
	Actual	Target
	(%)

Total expenditure and net lending in the FY 2021/22 amounted to KES 3,027.8 billion against a revised target of KES 3,286.1 billion, representing an under spending of KES 258.2 billion (7.9% deviation from the revised budget). The shortfall in spending was attributed to low A-i-A related spending on account of reduced collections, lower than targeted spending on interest payments and low absorption of both externally and domestically funded development projects.

Total expenditure and net lending in the FY 2022/23 amounted to KES 3,221.0 billion against a revised target of KES 3,366.6 billion, representing an under spending of KES 145.6 billion (4.4% deviation from the revised budget). The shortfall was attributed to low spending on both recurrent and development expenditure items. There was delayed disbursement of project funds and a shortfall in domestic borrowing resulting in unfunded expenditures items.

The following table sets forth information regarding the composition of fiscal expenditures as a percentage of total expenditures and net lending for the periods indicated.

	2021/22		2022/23

The total expenditure and net lending in FY 2023/24 amounted to KES 3,605.2 billion, against a target of KES 3,871.0 billion. The resultant under expenditure of KES 265.8 billion is attributed to lower absorption recorded in recurrent and development expenditures by the National Government and below target equitable share transfers to the County Governments.

In the FY 2024/25, total expenditure and net lending amounted to KES 3,975.9 billion against a target of KES 4,045.1 billion, resulting in an under-expenditure of KES 69.1 billion. This deviation was mainly attributed to below target absorption in both recurrent and development expenditures by the National Government.

The total expenditure and net lending for the first quarter of FY 2025/26 amounted to KES 993.0 billion against a target of KES 987.2 billion, resulting in above-target expenditure of KES 5.6 billion. This is mainly attributed to above-target disbursements towards recurrent and development expenditure

The 2020/21 Budget

The fiscal performance in the FY 2020/21 was satisfactory despite the slight underperformance in revenue and elevated expenditures associated with the adverse impact of COVID-19 Pandemic. In particular, severe disruptions on economic activities in the first half of the FY 2020/21 arising from the COVID-19 Pandemic containment measures coupled with tax reliefs implemented by Government in April 2020 to cushion Kenyans majorly explain the subdued revenue performance. However, revenue performance gradually picked up

beginning November 2020 following the reopening of the economy and the reversal of tax relief measures that was implemented in January 2021.

Total cumulative revenue including Appropriation in Aid for FY 2020/21 amounted to KES 1,803.5 billion against a revised target of KES 1,837.8 billion, indicating a shortfall of KES 34.3 billion. Ordinary revenue collection amounted to KES 1,562.0 billion against a target of KES 1,578.8 billion. Collections from the main tax categories were broadly on target with Value Added Tax and Import Duty above the revised target by KES 7.7 billion and KES 6.0 billion, respectively. The good performance in the main tax categories was however dampened by poor collection from the 'Other revenues' category which was below target by KES 25.8 billion. This was due to lower than anticipated mop up of idle cash from state corporations, accounting for KES 30.8 billion of the shortfall in this category.

Total expenditure and net lending in the FY 2020/21 amounted to KES 2,769.3 billion against a revised target of KES 2,886.9 billion, representing an under spending of KES 117.7 billion (4.1% deviation from the revised budget). The shortfall in spending was attributed to low A-i-A related spending on account of reduced collections and low absorption of both externally and domestically funded development projects.

In line with the performance in expenditure and revenues, the fiscal deficit (including grants) amounted to KES 929.3 billion (8.3% of GDP) against a target of KES 976.2 billion (8.7% of GDP). The fiscal deficit was financed through net external financing amounting to KES 323.3 billion (2.9% of GDP) and net domestic financing of KES 626.9 billion (5.6% of GDP).

The following table sets forth figures available from the 2020/21 Budget.

The 2021/22 Budget

The fiscal performance in the FY 2021/22 was satisfactory, largely attributed to improved operating business environment following the recovery of the economy from the adverse impact of COVID-19 Pandemic. Revenue performance recorded a growth of 22.0% compared to a marginal growth of 0.3% in FY 2020/21. The growth in revenue collection was recorded in all broad tax categories in the period under review. This good performance was however overshadowed by the effects of the Russia-Ukraine conflict which put pressure on fuel and commodity prices prompting the Government to increase spending in order to cushion citizens. This coupled with the unfavourable conditions in the sovereign bond market which resulted to below target performance in foreign financed resources and shortfalls in domestic market affected expenditure performance during the reporting period.

Total revenue including A-i-A for FY 2021/22 was KES 2,199.8 billion against a revised target of KES 2,192.0 billion, recording a surplus of KES 7.9 billion. Ordinary revenue collection was KES 1,917.9 billion against a target of KES 1,851.5 billion. Collections from the broad tax categories were above target except Excise Duty which was slightly below target by KES 3.8 billion. Performance of ministerial A-i-A was below target by KES 58.5 billion on account of shortfalls recorded in both recurrent and development A-i-A of KES 44.9 billion and KES 13.7 billion, respectively.

Total expenditure and net lending in the FY 2021/22 amounted to KES 3,027.8 billion against a revised target of KES 3,286.1 billion, representing an under spending of KES 258.2 billion (7.9% deviation from the revised budget). The shortfall in spending was attributed to low A-i-A related spending on account of reduced collections, lower than targeted spending on interest payments and low absorption of both externally and domestically funded development projects. The underspending of KES 258.2 billion was also partly attributed to below target transfers to County Governments and lower disbursement of Governments contribution to civil servant superannuation pension scheme.

In line with the performance in expenditure and revenues, the fiscal deficit (including grants), amounted to KES 785.1 billion (6.2% of GDP) against a target of KES 1,031.2 billion (8.2% of GDP). The fiscal deficit was financed through net external financing amounting to KES 142.5 billion (1.1% of GDP) and net domestic financing of KES 605.3 billion (4.8% of GDP).

The following table sets forth figures available from the 2021/22 Budget.

The 2022/23 Budget

The implementation of the FY2022/23 budget marked the transition from the previous Regime to the current Administration. The first half of the FY 2022/23 was marked by slow implementation of programmes and projects due to inadequate resources. In part, revenue performance was affected by the general slowdown of economic activities occasioned by the adverse impact of shocks that hit the country including uncertain operating environment related to the general elections and the negative impact of the geo-politics that led to global economic slowdown and supply chain disruptions. Additionally, there were liquidity constraints in raising resources from the domestic market. Given the realities, the Government embarked on reprioritisation and cost-cutting measures to ensure smooth implementation of priority programmes for the remainder of the financial year. This demonstrated the Government's strong commitment to manage the expenditures, create fiscal space and signal fiscal consolidation and public debt sustainability.

Total revenue including external grants was KES 2,383.6 billion against a revised target of KES 2,520.3 billion recording a shortfall of KES 136.7 billion. Revenue performance, including Appropriation in Aid (A-i-A), was KES 2,360.5 billion in FY 2022/23 from KES 2199.8 billion in FY 2021/22, a growth of 7.3%. The growth in revenue collection was recorded in all the broad tax categories. However, the performance fell short of the target with ordinary revenue collection amounting to KES 2,041.1 billion against a target of KES 2,145.4 billion representing a shortfall of KES 104.3 billion.

Tax revenue from the broad tax categories were below their respective targets in the period under review. Excise duty recorded the highest shortfall of KES 29.5 billion, followed by VAT on domestic goods and services and other income tax of KES 24.5 billion and KES 24.4 billion respectively. The shortfall in excise duty is explained by the decline in oil volumes, motor vehicle imports and deliveries of domestic excisable goods such as cosmetics, beer and spirits. Domestic VAT collection was mainly affected by subdued growth in the construction, transport and manufacturing sectors owing to the high cost of inputs and increasing inflationary pressures. The performance of ministerial A-i-A was KES 319.4 billion against a target of KES 333.2 billion. The shortfall of KES 13.8 billion was on account of shortfalls recorded in both recurrent and development A-i-A of KES 9.3 billion and KES 4.5 billion, respectively.

Total expenditure and net lending in the FY 2022/23 amounted to KES 3,221.0 billion against a revised target of KES 3,366.6 billion, representing an under spending of KES 145.6 billion (4.4% deviation from the revised budget). The shortfall was attributed to low spending on both recurrent and development expenditure items. There was delayed disbursement of project funds and a shortfall in domestic borrowing resulting in unfunded expenditures items. This led to a carryover of KES 77.5 billion during the period under review.

In line with the performance in expenditure and revenues, the fiscal deficit (including grants, on a cash basis), amounted to KES 800.4 billion (5.6% of GDP) against a target of KES 846.2 billion (5.8% of GDP). The fiscal deficit was financed through net external financing amounting to KES 310.8 billion (2.1% of GDP) and net domestic financing of KES 459.5 billion (3.2% of GDP).

The 2023/2024 Budget

Budget execution for the FY 2023/24 was hampered by challenges in revenue mobilisation. By the end of June 2024, total revenue collected including A-I-A amounted to KES 2,702.7 billion (17.3% of GDP) against a target of KES 2,907.5 billion (18.0% of GDP). The shortfall of KES 204.9 billion was on account of below target

ordinary revenue collection by KES 172.1 billion while the collection of the ministerial A-I-A was also below target by KES 32.8 billion. This revenue performance represented an improved growth of 14.5% compared to a growth of 7.3% recorded in the similar period in FY 2022/23.

Ordinary revenue collection in the FY 2023/24 amounted to KES 2,288.9 billion (14.6% of GDP) against a target of KES 2,461.0 billion (15.3% of GDP). All ordinary revenue categories recorded below target performance during the period under review. The growth of ordinary revenue collection in FY 2023/24 was 12.1% compared to a growth of 6.4% in FY 2022/23. The growth rates of the major tax heads were as follows: VAT (17.3%), income tax (10.7%), excise duty (4.6%) and import duty (2.9%). The ministerial A-I-A collected was below target by KES 32.8 billion during the period under review. The underperformance of A-I-A was mainly due to underreporting of SAGAs' A.I.A through the Ministerial expenditure returns.

The total expenditure and net lending for the period under review amounted to KES 3,605.2 billion, against a target of KES 3,871.0 billion. The resultant under expenditure of KES 265.8 billion was attributed to lower absorption recorded in recurrent and development expenditures by the National Government and below target equitable share transfers to the County Governments. Recurrent expenditure for National Government amounted to KES 2,619.3 billion (excluding KES 57.9 billion for Parliament and Judiciary) against a target of KES 2,716.9 billion leading to a below target expenditure of KES 97.5 billion. The below target expenditure in recurrent category is mainly attributed to below target expenditure on Operation and Maintenance (O&M) and pension payments. Development expenditure in FY 2023/24 amounted to KES 546.4 billion, against a target of KES 659.2 billion. The below target expenditure of KES 112.9 billion was on account of below-target disbursement towards development projects by KES 107.1 billion, and Ministerial development by KES 23.2 billion. Payment of Guaranteed loans (net lending) surpassed target by KES 17.4 billion.

In line with the performance in expenditure and revenues, the fiscal deficit (including grants, on a cash basis), amounted to KES 835.1 billion (5.3% of GDP) against a target of KES 925.0 billion (5.7% of GDP). This resulted in a primary surplus of KES 22.4 billion (0.1% of GDP). The fiscal deficit in FY 2023/24 was financed through net domestic financing of KES 595.6 billion which was below target by KES 70.1 billion attributed to liquidity challenges in the domestic securities market. Net external financing amounted to KES 222.7 billion (1.4% of GDP). Total disbursements (inflows) including Appropriations-in-Aid amounted to KES 760.5 billion for the period ending 30th June, 2024 against a target of KES 815.8 billion. The total disbursement included KES 317.8 billion Program Loans; KES 87.4 billion Project Loans-Cash; and KES 68.3 billion Project Loans A.I.A. The external repayments (outflows) of principal debt amounted to KES 537.8 billion. The amount comprised of principal repayments due to commercial institutions; bilateral sources; and multilateral sources.

The 2024/2025 Budget

In FY 2024/25, total revenue, including Appropriations-in-Aid (AiA), amounted to KES 2,923.6 billion (16.8% of GDP). This fell short of the target of KES 2,985.6 billion (17.1% of GDP) by KES 62.0 billion on account of shortfall recorded in ordinary revenue. The ordinary revenue was KES 2,420.2 billion against a target of KES 2,496.2 billion, a shortfall of KES 76.0 billion. The Ministerial AiA was above target by KES 14.0 billion during the period under review. Overall, total revenue inclusive of the Ministerial AiA grew by 8.2%.

Ordinary revenue collection in FY 2024/25 amounted to KES 2,420.2 billion, against a target of KES 2,496.2 billion, with most revenue categories underperforming relative to targets over the review period. Income tax recorded the highest shortfall of KES 32.1 billion, due to below-target collections in both individual Pay As You Earn (PAYE), which fell short by KES 6.1 billion, and other income tax, which underperformed by KES 26.0 billion. The performance of PAYE was adversely affected by a policy change that adjusted SHIF and Housing Levy from a relief regime to allowable deductions before tax computation. The shortfall in other income tax was largely due to the use of adjustment vouchers by taxpayers to offset liabilities—particularly KES 28.6 billion against corporation tax—which reduced net remittances. Overall, ordinary revenue grew by 5.7% in FY 2024/25, with all major tax heads recording positive growth rates. Ministerial AiA grew by 21.7% during the period under review, reflecting the revision of fees and charges by MDAs.

Total expenditure and net lending for FY 2024/25 amounted to KES 3,975.9 billion against a target of KES 4,045.1 billion, resulting in an under-expenditure of KES 69.1 billion. This deviation was mainly attributed to below target absorption in both recurrent and development expenditures by the National Government. Recurrent expenditure by the National Government amounted to KES 2,948.4 billion, falling short of the KES 2,989.1 billion target by KES 40.6 billion. The shortfall in recurrent spending was mainly attributed to below-target expenditure in Operations and Maintenance category, foreign interest payments, and pensions payments. Development expenditure amounted to KES 582.9 billion against a target of KES 602.1 billion, translating to an under-spending of KES 19.1 billion. This variance was largely driven by lower-than-projected absorption in Development Projects (Net), which underperformed by KES 21.5 billion. Transfers to County Governments were below target by KES 9.4 billion mainly due to a shortfall in additional allocations.

The fiscal deficit (including grants, on a cash basis) amounted to KES 1,019.1 billion (6.3% of GDP) in FY 2024/25 against a target of KES 1,012.3 billion (5.8% of GDP). The fiscal deficit in FY 2024/25 was financed through net domestic financing of KES 854.5 billion (4.9% of GDP) which was above target by KES 28.7 billion. The net external financing amounted to KES 179.7 billion (1.0% of GDP), representing a shortfall of KES 6.8 billion from target. Total disbursements (inflows) including AiA amounted to KES 527.0 billion for the period ending 30th June 2025 against a target of KES 548.0 billion. The total disbursements included: KES 113.7 billion Program Loans; KES 85.8 billion Project Cash Loans; KES 65.6 billion Project Loans AiA; KES 8.8 billion OPEC Funds; and KES 253.1 billion Commercial Financing. The external repayments (outflows) of principal debt amounted to KES 347.3 billion. The amount comprised of principal repayments due to commercial institutions; bilateral sources; and multilateral sources.

The 2025/2026 Budget

On 12 June 2025, the Cabinet Secretary of the National Treasury presented Kenya's FY 2025/26 Budget under the theme: "Sustaining Bottom-up Economic Transformation Agenda, Fiscal Consolidation and Investing in Climate Change Mitigation and Adaptation for Improved Livelihoods."

In the approved Budget, total expenditure for FY 2025/26 is estimated at KES 4.2699 trillion, up from KES 3.9759 trillion in FY 2024/25. Of this, KES 3.1344 trillion is allocated to recurrent expenditures (up from KES 2.9484 trillion in FY 2024/25) and KES 649.0 billion to development expenditures (up from KES 582.9 billion), covering domestic and foreign-financed projects, the Contingency Fund, and the Equalization Fund. Transfers to County Governments are projected at KES 484.8 billion, including an equitable share of KES 415.0 billion, compared with KES 444.6 billion in FY 2024/25.

Total projected revenue collection, including appropriation-in-aid, is KES 3,321.7 billion, up from KES 2,923.6 billion in FY 2024/25. This comprises KES 2,754.7 billion in ordinary revenue (up from KES 2,420.2 billion), KES 566.9 billion in Ministerial Appropriation-in-Aid (up from KES 503.4 billion), and KES 47.2 billion in grants (up from KES 33.3 billion).

Against projected revenues and grants, the fiscal deficit (including grants) is expected to be KES 901.0 billion, down from KES 1,019.1 billion in FY 2024/25. This deficit will be financed through net external borrowing of KES 287.4 billion and net domestic borrowing of KES 613.5 billion, supporting a reduction of the fiscal deficit from 6.3% of GDP in FY 2024/25 to 4.7% of GDP in FY 2025/26 as part of ongoing fiscal consolidation efforts.

Kenya's public debt is expected to remain sustainable over the medium term, with the debt-to-GDP ratio projected to decline from 63.0% in 2024 towards the Government's target range of 55% ± 5%. The fiscal balance has also shown continuous improvement, moving from a deficit of 6.3% of GDP in FY 2024/25 to the budgeted 4.7% of GDP in FY 2025/26.

The FY 2025/26 fiscal plan and medium-term strategy support the Bottom-Up Economic Transformation Agenda and Medium-Term Plan IV (MTP IV) through a growth-friendly fiscal consolidation framework designed to slow the growth of public debt, enhance debt sustainability, and safeguard essential services and priority programs.

Given the budget performance during the first half of FY 2025/26, there is a need to revise the budget to accommodate the revenue shortfalls and expenditure pressures. The revisions proposed through the Supplementary Estimates I for the 2025/2026 financial year are expected to be tabled in the National Assembly when Parliament resumes from recess in February 2026.

The specific intra-year revisions for 2025/2026 budget are highlighted below:

- Spending Increase: Total government spending is set to increase by KES 262.9 billion.
- Revenue Shortfalls: Ordinary revenue missed targets by KES 115.3 billion by December 2025, primarily due to a slowdown in business activities and policy uncertainties.
- Fiscal Deficit: The deficit is now expected to widen from the original target of 4.8%, as revenue shortfalls outpace expenditure cuts.
- Borrowing Adjustments: The government is expected to adjust the borrowing target to bridge the financing gap.

The 2026/2027 Budget

On 10 February 2026, the Cabinet Secretary of the National Treasury presented Kenya's FY 2026/27 Budget Policy Statement under the theme: "People-Driven, Investment-Led Budget: Prioritizing Capital Projects, Human Capital Development, and Infrastructure Expansion while Reinforcing Fiscal Responsibility and Public Participation."

In the proposed Budget, total expenditure for FY 2026/27 is estimated at KES 4,703.9 billion, up from KES 4,532.8 billion projected in FY 2025/26. Of this, KES 3,456.9 billion is allocated to recurrent expenditures (up from KES 3,338.7 billion), KES 749.5 billion to development expenditures (up from KES 707.3 billion), covering domestic and foreign-financed projects, the Contingency Fund, and transfers to County Governments. Transfers to County Governments are projected at KES 495.5 billion, including the equitable share, compared with KES 484.8 billion in FY 2025/26.

Total projected revenue collection, including Appropriation-in-Aid, is KES 3,533.7 billion (16.9% of GDP), up from KES 3,352.1 billion (17.6% of GDP) in FY 2025/26. This comprises KES 2,901.9 billion in ordinary revenue (13.9% of GDP), compared to KES 2,744.4 billion (14.4% of GDP) in FY 2025/26, supported by ongoing reforms in tax policy and revenue administration aimed at broadening the tax base and enhancing compliance.

Against projected revenues and grants, the fiscal deficit (including grants) is expected to be KES 1,115.8 billion (5.3% of GDP), down slightly from KES 1,140.7 billion (6.0% of GDP) in FY 2025/26. This deficit will be financed through net external borrowing of KES 225.5 billion (1.1% of GDP) and net domestic borrowing of KES 890.4 billion (4.2% of GDP), supporting fiscal consolidation and debt sustainability over the medium term.

The FY 2026/27 fiscal plan and medium-term strategy are aimed to continue to support Kenya's Bottom-Up Economic Transformation Agenda and Medium-Term Plan IV (MTP IV) through a growth-friendly fiscal framework designed to prioritise investment, control public debt, safeguard essential services, and promote inclusive economic growth.

Funding the Fiscal Deficit

The Kenyan Government will continue to mobilise resources from both domestic and external sources to finance fiscal deficits to meet its debt maturities as guided by the Medium-Term Debt Management Strategy. External financing will remain focused on concessional and semi-concessional facilities from multilateral and bilateral partners, while commercial borrowing will be limited to liability management operations and to priority projects that are unable to secure concessional funding but are aligned to the national development agenda.

On the domestic front, the Government will prioritise the issuance of medium- to long-term Treasury bonds to reduce refinancing risks and smoothen the redemption profile, while the use of short-term Treasury bills will be restricted to liquidity management purposes. In line with the PFM Act, CAP 412A, the Government will also continue to broaden the investor base and introduce new instruments to enhance market depth. To diversify financing sources, the Government will explore alternative instruments including sustainability-linked bonds, diaspora bonds, Samurai bonds and Panda bonds. The Government remains firmly committed to narrowing fiscal deficits over the medium term to contain the growth of public debt and safeguard fiscal sustainability.

The table below sets out the sources of financing for the FY 2024/25 fiscal deficit, as well as the potential sources of financing for the FY 2025/26 fiscal deficit.

PUBLIC DEBT

Overview

Government debt comprises external and domestic debt. Domestic debt is reported on a gross basis and excludes Government deposits in commercial banks, CBK and National Treasury advances to parastatals. It consists of Government securities and loans and advances from the banking system. All domestic debt is in local currency; there is no foreign currency domestic debt. External debt consists of public and publicly guaranteed debt from outside the country contracted in foreign currency. As at 30 September 2025, the stock of external debt accounted to 30.1% of GDP at KES 5,393.53 billion (US\$41.73 billion) increasing by 3.95% from KES 5,188.36 billion as at the end 30 September 2024. The domestic debt stock accounted for 37.2% of GDP at KES 6,660.42 billion (US\$51.54 billion), amounting to an 18.89% increase from KES 5,601.73 billion as of 30 September 2024. Domestic and external debt made up 55.3% and 44.7% of the total debt stock, respectively. The majority of external debt is long-term, while the majority of domestic debt consists of Treasury bonds, which are medium- to long-term instruments.

Public debt management is governed by a legislative and regulatory framework including the Constitution and the PFMA. Subject to the provisions of the Constitution and the PFMA, the Government (through the Cabinet Secretary) may borrow or raise money from any reputable source for purposes of economic management and development of the country. The Cabinet Secretary may guarantee or raise a loan on behalf of Government or any other public institution, authority or person as authorised by or under an Act of Parliament. The decision to borrow on behalf of the Government rests with the Cabinet Secretary and is guided by, amongst others, (i) the Constitution, (ii) the PFMA, (iii) the BPS and Medium-Term Debt Strategy (MTDS), and (iv) Annual Budget Estimates approved by the National Assembly.

The PFMA was amended under Section 50 (2A) and (2B) replacing the statutory debt ceiling of KES 10 trillion to a debt threshold of 55% of the Gross Domestic Product (GDP) in present value terms. As of the date of this Offering Circular the Government's debt exceeds the threshold. As at 30 September 2025, Kenya's present value of public debt declined to 63.7% from 64.4% as at the end of September 2024. However, section 50 (2B) of the PFMA permits the threshold to be exceeded by up to 5% in exceptional circumstances. Furthermore, section 50 (2C) of the PFMA requires the Cabinet Secretary, within five years of the commencement of subsections (2A) and (2B), on 1 November 2023, to take measures ensuring that the National Government complies with the threshold prescribed in subsection (2A). From 1 November 2028, five years after the effective date of Section 50 (2A) and 50 (2B), the Cabinet Secretary must submit to Parliament a report on any breach of the debt threshold, if any, specifying the circumstances provided for in subsection (2B).

Under the Constitution, the Government may guarantee borrowings of SOEs, County Governments and any other borrower therein. The Government has adopted a conservative approach to issuing such guarantees, with total outstanding guarantees amounting to less than 2% of total outstanding debt.

As at 30 September 2025, the total outstanding public debt was KES 12,053.95 billion (US\$93.27 billion or 67.3% of nominal GDP) of which foreign debt was KES 5,393.53 billion (US\$41.73 billion) and the total outstanding internal debt was KES 6,660.42 billion (US\$51.51 billion). As at 30 September 2024, the total outstanding public debt was lower at KES 10,790.08 billion (US\$40.16 billion), of which foreign debt was KES 5,188.36 billion (US\$40.16 billion) and the total outstanding internal debt was KES 5,601.71 billion (US\$43.36 billion).

The proportion of the public's external debt to total debt decreased to 52.0% as at 30 June 2021, and decreased further to 49.5% as at 30 June 2022 and thereafter increased to 53.0% as at 30 June 2023 and decreased further to 48.9% as at 30 June 2024 and 46.5% as at 30 June 2025. The following table sets out a summary of the public debt and publicly guaranteed debt disaggregated into foreign and domestic debt as at the dates indicated.

As at 30 June	External			Internal			Total		Total debt as % of GDP
	(KES millions)	(US\$ millions) ⁽¹⁾	As % of GDP	(KES millions)	(US\$ millions) ⁽¹⁾	As % of GDP	(KES millions)	(US\$ millions) ⁽¹⁾

As at 30 June 2025, total external debt was made up of 20.2 % bilateral debt, 55.5 % multilateral debt, 24.1 % commercial debt and 0.3% supplier's credit.

The total multilateral debt increased by 7.40% to KES 3,057,762.58 million as at September 2025 from KES 2,847,165.50 million as at September 2024 while the total bilateral debt decreased by 6.4% to KES 1,065,025.00 million as at September 2025 from KES 1,133,389.30 million as at September 2024.

In 2020, Kenya entered into four new loans totalling US\$187 million through various bilateral and multilateral loan agreements aimed at curbing the impact of the Covid-19 Pandemic and providing necessary support to the Kenyan health system. The loans were to support transformation of health care systems for universal care, specifically: (i) improving quality of care; (ii) strengthening monitoring and evaluation and civil registration and vital statistics; (iii) supporting health financing reforms towards universal health coverage and (iv) purchasing medical equipment.

On 10 June 2021, the World Bank approved a US\$750 million loan in development policy financing to Kenya to generally support the Government's Post-Covid-19 Economic Recovery Strategy and to support reforms in sectors significantly impacted by the Covid-19 Pandemic, such as healthcare, education and energy. This loan will have a concessional annual interest rate of 3.1%.

In the FY 2021/22 the Development Policy Operations (DPO) programme supported by World Bank secured to support institutional reforms and Post COVID Recovery initiatives which amounted to US\$ 945.03 million, while Programme for Results (PforR) secured support of US\$ 37.32 million. In addition, the Government of Kenya secured budget support of US\$269.56 million under the 38-month IMF Extended Credit Facility (ECF) and Extended Fund Facility (EFF) Programme.

In the FY 2022/23 The Government contracted eighteen (18) new external loans equivalent to US\$ 2,461.45 million out of which, eight (8) were from multilateral lenders, six (6) from bilateral lenders and four (4) from commercial banks to finance the budget deficit. In January 2024, the Trade and Development Bank disbursed a loan to Kenya in an aggregate principal amount of US\$210 million.

On 16 February 2024, Kenya issued a US\$1.5 billion Eurobond comprising a 7-year tranche due 16 February 2031. The proceeds from the 2031 Eurobonds partially funded the redemption of Kenya's existing US\$2 billion Eurobonds maturing in June 2024, via a tender offer. In March 2025, Kenya concluded a tender offer for its U.S.\$900 million 7.0% notes due 2027 to manage its debt profile. In April 2025, Kenya concluded a private placement of US\$500 million 8.25% amortising notes due 2032 with the Abu Dhabi Fund for Development as initial investor. On 9 October 2025, Kenya issued a US\$750 million Eurobond due 2033 and a US\$750 million

Eurobond due 2038, the proceeds of which were used to, inter alia, repay outstanding debt including that of its US\$1 billion Notes due 2028.

On 27 January 2025, Kenya announced the commissioning of the 300 megawatts Bogoria-Silale geothermal power project to settle a €60 million (KES 8 billion) loan that Kenya owes Germany in Kenya's first debt-for-climate swap following bilateral agreement with Germany's Federal Ministry of Economic Cooperation and Development.

As at 30 June 2025, the total external debt as a percentage of GDP stood at 31.5%, while it was at 32.7% as at 30 June 2024, 38.2% as at 30 June 2023 and 34.0% as at 30 June 2022. Kenya's external debt is well-diversified in terms of currency and creditor exposures, which enables hedging against exchange rate risks. Efforts are being made to further diversify and sustain Kenya's debt currency mix. The Government's strategy is to manage the currency exposures by seeking to match currency of external liabilities with the currency composition of Kenya's foreign exchange inflows, foreign reserves, and cost of borrowing in each currency.

The following tables set out the total public and publicly guaranteed external and internal debt by source as at the dates indicated.

The Government undertakes Treasury bond auctions every month. This is the main source of financing for the Government. Fixed-rate bonds with maturities of 2, 3, 5, 7, 10, 15, 20, 25 and 30 years are issued during the year under the benchmark bond programme.

The stock of outstanding Treasury bonds held by banks and pension funds rose significantly as at June 2025. Banks' holdings stood at KES 1,645.1 billion (32.2% of total Treasury bonds stock), up from KES 1,408.6 billion in June 2024, while pension funds increased their holdings to KES 870.0 billion (17.0%) from KES 715.2 billion. Similarly, insurance companies' holdings grew to KES 788.1 billion (15.4%) from KES 684.3 billion in June 2024. Notably, household holdings expanded to KES 323.9 billion (6.3% of total Treasury bonds stock) from KES 275.9 billion in June 2024, underscoring the transformational impact of the DhowCSD in broadening retail investor participation in the Government securities market.

As at 29 September 2025, the domestic yield curve extends beyond 20 years, supporting the Government's funding strategy.

Source: Nairobi Securities Exchange (NSE).

As at 30 September 2025, the National Government guaranteed approximately KES 78,169.38 million of the indebtedness of the non-financial public sector.

The table below sets out information on publicly guaranteed debt of the non-financial public sector at the dates indicated.

Medium Term Debt Strategy

The following is an overview of the Government's debt management strategies from 2021 to 2025. These strategies were designed to ensure sustainable financing of the Government's needs while minimising costs and risks associated with public debt. Each year, the strategies were adjusted to respond to changing economic conditions, market dynamics, and the Government's fiscal objectives, with a strong emphasis on optimising the balance between domestic and external borrowing.

The Government implemented the 2021 Medium Term Debt Strategy with a focus on maximising concessional and semi-concessional external debt while managing liabilities in both domestic and international markets. This strategy highlighted the need for comprehensive reforms to enhance the depth and diversification of the domestic debt market, thereby increasing its role in meeting the government's financing needs. Additionally, the 2021 strategy aimed to minimise the costs and risks associated with public debt, proposing a net borrowing ratio of 57% external to 43% domestic. Planned gross borrowing was 27% external and 73% domestic, with actual figures for FY2020/21 showing 18.7% external and 81.3% domestic. The strategy sought to reduce reliance on high-interest domestic debt, facilitate gradual repayment of treasury bills, and manage part of the commercial external debt through liability operations, balancing cost and risk while diversifying funding sources.

The 2022 strategy further encouraged the use of concessional funding from international sources, reducing commercial international borrowing to lower overall debt costs. It aimed to reduce domestic refinancing risk by issuing medium-to-long-term instruments. The net borrowing assumption was 68% domestic and 32% external, with gross borrowing split at 75% domestic and 25% external. Actual borrowing for FY2021/22 was 85% domestic and 15% external, sourced from concessional and semi-concessional loans.

The 2023 strategy sought to balance net financing equally between external and domestic sources, aiming to minimise costs and risks. It emphasised maximising concessional borrowing and reducing commercial borrowing to lower debt service costs. Actual borrowing was 22% external and 78% domestic. The strategy aimed to reduce refinancing risk by maintaining the current stock of treasury bills and issuing medium-to-long-term debt securities.

The 2024 strategy aimed to gradually reduce the stock of treasury bills, focusing on medium-to-long-term Treasury bonds for domestic financing and concessional borrowing for external financing. The net financing assumption was 45% domestic and 55% external, with the outcomes to be assessed in June 2025, the aim of which is to reduce risks and ensure sustainable debt levels. However, the actual net domestic financing to external financing ratio stood at 83:17, diverging from the targeted 55:45 mix. This variance was largely attributed to delayed disbursement from external financing, which necessitated increased reliance on domestic borrowing.

Key outcomes of these strategies included reducing debt costs in terms of interest payments as a percentage of GDP, minimising the present value of debt to GDP, and reducing refinancing risk by lengthening the portfolio's Average Time to Maturity (ATM). The strategies also aimed to minimise interest rate risk through average time to re-fixing and deepen the domestic bond market by issuing more medium-to-long-term instruments as the main source of domestic financing.

Under the 2024 MTDS, borrowing outcomes reflected a moderate deviation from set targets, particularly with respect to refinancing risk. The proportion of debt maturing within one year increased to 13.5% of total debt as of June 2025, compared to the target of 12.4%, signalling elevated refinancing pressure. Similarly, debt maturing within one year as a share of GDP stood at 9.4% against the target of 7.7%, further underscoring the heightened exposure to short-term obligations.

The 2025 Medium-Term Debt Management Strategy (MTDS 2025), developed under Kenya's Public Finance Management Act, provides a framework for managing public debt from FY 2025/26 to 2027/28, focusing on minimising costs and risks amid stable domestic economic conditions but uncertain global markets. The strategy aims to reduce reliance on short-term treasury bills, extend debt maturities, deepen the domestic debt market, and balance external borrowing between concessional and commercial sources, with a gross borrowing mix of 25% external and 75% domestic. Key objectives include reducing refinancing, interest rate, and foreign exchange risks, and promoting intergenerational equity, while excluding certain guaranteed and local debts from its scope.

The MTDS aligns with the 2025 Budget Policy Statement, supporting fiscal consolidation and economic recovery, targeting a decline in the debt service-to-revenue ratio and fiscal deficit, and prioritising long-term debt instruments and high-impact investments. The government's approach emphasises fiscal discipline, revenue enhancement, and prudent borrowing to ensure debt sustainability, with public debt as a share of GDP projected to fall from 67.8% in 2024 to 57.0% in 2029.

Medium Term Debt Strategy 2026/7 - 2028/9

The 2026 Medium Term Debt Management Strategy (MTDS) has been prepared in accordance with Section 33 (2) of the Public Finance Management (PFM) Act, Cap 412A. The Strategy is formulated to guide management of Kenya's public debt over the period FY 2026/27-2028/29. It outlines the strategies and initiatives aimed at minimising costs at a prudent degree of risk over the medium term.

As at 30 September 2025, the stock of public and publicly guaranteed debt was KES 12,053.95 billion (67.3% of GDP), equivalent to US\$ 93.27 billion in nominal terms of which domestic debt was KES 6,660.42 billion while external debt was KES 5,393.53 billion.

The 2025 Debt Sustainability Analysis (DSA) undertaken jointly by the National Treasury indicates that Kenya's public debt remains sustainable but with high risk of debt distress. The Present Value (PV) of total public debt as a percentage of GDP is expected to stay above the 55 percent benchmark until 2029. The present value (PV) of public debt projected was at 65.3 percent of GDP at the end of 2025 against the benchmark debt threshold of 55 percent.

The 2026 MTDS is anchored on the macroeconomic assumptions outlined in the 2026 Budget Policy Statement. Over the medium term, economic growth is projected to remain at 5.3 percent, supported by enhanced agricultural productivity, a resilient services sector, and ongoing implementation of priority programmes under Bottom-Up Economic Transformation Agenda (BETA). Domestic interest rates have declined in line with the easing of monetary policy by the Central Bank of Kenya, following a gradual reduction of the Central Bank Rate from 13.0 percent in August 2024 to 8.75 percent in February 2026 to support private sector credit and economic activity.

The 2026 MTDS aims to reduce public debt costs and risks by sourcing 16 per cent. gross borrowing from external sources and 84 per cent. from domestic sources over the medium term. From the domestic sources, the strategy is to gradually reduce the stock of Treasury bills while lengthening debt maturity by issuance of medium to long term debt securities. On the external end, the target is a mix of concessional financing, new instruments such as sustainability linked bonds and minimal other commercial borrowing.

Public debt management requires both operational, institutional, legal and governance reforms necessary to strengthen debt sustainability, fiscal resilience, and market credibility. The key reforms envisaged include review of the Public Debt and Borrowing Policy to bring on board new developments in debt management, and development of a Liability Management Policy to guide and ensure that liability management operations are executed in line with the MTDS:

- Reducing the foreign exchange risk exposure through currency diversification; and
- Promoting intergenerational equity

The 2026 MTDS provides a clear pathway for the Government to navigate public debt challenges, turning vulnerabilities into opportunities for market development and sustainable growth. The Strategy’s analysis takes into account outstanding public debt and projected borrowing and debt service aimed at stabilising the current and future macroeconomic environment taking into account the conditions in the international and domestic capital markets.

The table below shows the Government’s debt service payments for the next four financial years.

	<u>2025/2026</u>	<u>2026/2027</u>	<u>2027/2028</u>	<u>2028/2029</u>
External Debt				
Interest.....	278,000	263,100	274,200	263,800
Principal	477,000	464,800	610,700	486,000
Total External Debt Service (TEDS).....	755,000	727,900	884,900	749,800
Domestic Debt				
Domestic Treasury Bond Redemption	463,511	735,241	647,858	463,824
Domestic debt Interest.....	851,400	879,400	899,400	932,100
Total Domestic Debt Service.....	1,314,911	1,614,641	1,547,258	1,395,924
Total debt service	<u>2,069,911</u>	<u>2,342,541</u>	<u>2,432,158</u>	<u>2,145,724</u>

Source: National Treasury.

Debt service (inclusive of both external and domestic repayments) to revenue is expected to decrease from 71.2% in 2024/25 to 66.3% by 2028/29. This is due to the fiscal consolidation and planned liability management efforts that are being implemented from 2022/23 to the medium term. The proposed liability management will involve replacement of expensive short to medium term debts in the debt portfolio with less expensive debts through refinancing operations and at the same time lengthen maturity profile of those debts.

Guarantees and Contingent Liabilities

The Government has guaranteed debt for parastatals, primarily in the Energy and Transport sectors. These are guarantees on debt to Kenya Electricity Generating Company, Kenya Ports Authority and Kenya Airways. Guarantees processed by the National Treasury are to SOEs that have strong balance sheets and where their financial performance is able to accommodate debt service obligations. Guarantees are normally processed by the National Treasury and submitted to Parliament for approval. As of 30 September 2025, the Government had a total of KES 78.17 billion in guaranteed debt for parastatals.

Relations with the IMF

In February 2015, the IMF approved a blended Stand-By Arrangement and Standby Credit Facility (the “SBA-SCF 1”) for a combined amount of SDR 488.52 million (approximately US\$688 million), with SDR 379.96 million made available immediately, and the remainder in two equal tranches upon completion of semi-annual programme reviews. The first review was completed in September 2015, where the Executive Board made available an additional SDR54.38 million (approximately US\$76.3 million).

In March 2016, the IMF approved the SBA-SCF 2, comprised of a new SDR 709.259 million (approximately US\$989.8 million) 24-month Stand-By Arrangement and a SDR 354.629 million (approximately US\$494.9 million) 24-month Standby Credit Facility for a combined SDR 1.06 billion (approximately US\$1.5 billion) for Kenya and SDR 542.8 million (approximately US\$757.5 million) was immediately made available. The first review of the SBA-SCF 2 was completed by the IMF in January 2017 and following completion of this review an additional SDR 56.994 million (approximately US\$77.4 million) under the facility was made available to Kenya.

However, the second and third reviews of the IMF programme due in June 2017 and December 2017 could not be completed on time due to the prolonged election period. Following the conclusion of the general election, the IMF was in Nairobi in April 2018 to conduct a review under the SBA-SCF2 and for consultations on whether to extend the existing SBA-SCF or to agree on a new programme. However, this review did not conclude with the agreement of a new programme and accordingly no funds are currently available under an IMF standby arrangement facility, as the SBA-SCF 2 facility expired in September 2018.

On 2 April 2021, the Executive Board of the IMF approved 38-month arrangements under the ECF and the EFF for Kenya in an amount equivalent to SDR 1.655 billion (305% of quota or approximately US\$2.34 billion) to support the next phase of the Covid-19 response, address the urgent need to reduce debt vulnerabilities and for safeguarding resources to protect vulnerable groups. On 17 May 2021, the Government and the IMF concluded the first review of the IMF Programme and agreed that Kenya will receive access to approximately US\$ 410 million in IMF financing when the full review is formally completed.

The IMF completed the Fourth reviews of the 38-month arrangements under the Extended Credit Facility (ECF) and the Extended Fund Facility (EFF) arrangements in December 2022. The approval enabled the immediate disbursement of SDR336.54 million (approximately US\$447.39 million) usable for budget support, including an augmentation under the ECF arrangement of SDR162.34 million (30% of quota, approximately US\$215.81 million). This brought Kenya's cumulative disbursements under the EFF/ECF arrangements to approximately US\$1.655.59 million. With the augmentation, the total amount under the EFF/ECF arrangements rises to SDR 1.818 billion (335% of quota or approximately US\$2.416 billion).

On 17 July 2023, the Executive Board of the IMF completed the fifth reviews under the Extended Fund Facility (EFF) and the Extended Credit Facility (ECF) arrangements for Kenya. The Board also approved an extension of the EFF/ECF arrangements from the 38 months to 48 months (through 1 April 2025) to allow sufficient time to implement the authorities' reform agenda and realise the programme's key objective and an augmentation of access amounting to 75% of quota (SDR407.1 million) over the extended programme duration for balance of payments support. The decision allowed for an immediate disbursement of SDR306.7 million (approximately US\$415.4 million), bringing total disbursements under the arrangements to SDR1.51 billion (approximately US\$2.04 billion). In completing the review, the Executive Board also approved modification of programme conditionalities, waivers of non-observance of the continuous performance criteria on accumulation of external arrears and end-June 2023 tax revenue target in light of corrective measures taken by the authorities and waiver of applicability for all other end-June 2023 and continuous quantitative performance criteria. The Executive Board also approved Kenya's request for an arrangement under the Resilience and Sustainability Facility (RSF) of SDR407.1 million (75% of quota; approximately US\$551.4 million) to support Kenya's ambitious efforts to build resilience to climate change. The quantitative targets of the fifth review were met with the exceptions of the end-June 2023 target on tax collections and the continuous performance criterion on no new external payment arrears. Six out of the seven June—October 2023 structural benchmarks were implemented with delays. The structural benchmarks and reforms to be achieved include a governance structure for state co-operation, a review of fuel pricing mechanism and progressive elimination of fuel subsidy and a comprehensive time bound strategy to address public debt management.

An IMF mission team undertook the sixth review of Kenya's programme under the Extended Fund Facility (EFF)/ Extended Credit Facility (ECF) as well as the first review under the Resilient Sustainability Facility (RSF). This mission, conducted from 30 October to 15 November 2023 concluded successfully. The mission and the Government reached an agreement with the IMF on economic policies and reforms to conclude the sixth review of Kenya's programme under the EFF/ECF as well as the first review of the RSF. In addition, an agreement was also reached on augmentation of access under the EFF/ECF of SDR 707.3 million (approximately US\$941.2 million). The executive board approved the augmentation, the total IMF commitment under these arrangements over the duration of the programme would be SDR3.34 billion (approximately

US\$4.43 billion). Through the anchoring of policies to support economic growth and ensure debt sustainability, the programme has helped mitigate the negative impact of global shocks associated with drought, inflation, unpredictable international commodity prices, and tighter external financing conditions. The Government remains committed to the implementation of the IMF-supported economic programme. The programme remains broadly on track, which the Government considers crucial for maintaining macroeconomic stability and achieving high and sustainable growth rates.

On 30 October 2024, the executive board of the IMF completed the seventh and eighth reviews under the Extended Fund Facility (EFF) and Extended Credit Facility (ECF) and review under the Resilience and Sustainability Facility Arrangement with Kenya. The Executive Board's decision enabled a combined disbursement of approximately US\$606 million under the EFF/ECF arrangements and SDR90.47 million (approximately US\$120.3 million) under the RSF arrangement, supporting the Kenyan authorities' efforts to rebuild fiscal and external buffers including resilience to climate related changes. Under the EFF/ECF arrangements, total IMF financial commitment stands at approximately US\$3.61 billion, of which approximately US\$ 3.12 billion has been approved for disbursement. Under the RSF arrangement, the corresponding amounts are approximately US\$541.3 million and approximately US\$ 180.4 million, respectively. The Board also approved the reduction of the total access under the EFF/ECF arrangements from exceptional access to within normal access limits, thereby adjusting Kenya's interest payments to the IMF.

The Government of Kenya and the IMF mutually agreed not to proceed with the final and ninth review of the IMF programme under the EFF/ECF in order to pave way for a new programme. As at the date of this Offering Circular, an IMF team is scheduled to visit Kenya from 24 February to 4 March 2026 to continue discussions on a successor arrangement aimed at supporting key policy reforms and potentially providing financial assistance. The consultations are intended to ensure that the new arrangement aligns with Kenya's fiscal and economic priorities while reinforcing macroeconomic stability.

History of Debt Restructuring

Paris Club. Kenya has approached the Paris Club of creditors three times since 1990 to seek debt relief and a rescheduling of its external debt. The first debt rescheduling agreement was reached in January 1994 and granted debt relief with respect to US\$535 million of indebtedness to bilateral creditors on non-concessional terms with an eight-year repayment period, including a one-year grace period. The amount covered by the first rescheduling agreement has been fully repaid. While the first rescheduling agreement was "flow" rescheduling, which limited the rescheduling to the debt servicing (principal plus interest) falling due within a specified period (consolidation period), the second rescheduling agreement received "stock" treatment, which takes into account the entire outstanding stock (principal plus accumulated arrears) and re-profiles it over an extended period of time. The second debt rescheduling agreement was signed in November 2000 and granted debt relief with respect to US\$301 million of indebtedness to bilateral creditors, with maturities due from 1 July 2000 to 30 June 2001 (including the debt service payments in arrear as of 1 July 2000). As part of this rescheduling, Kenya received an extension of repayment of Official Development Assistance ("ODA") of 20 years and an extension of repayment of non-ODA credits of 18 years, with a three-year grace period.

The third rescheduling agreement was signed in January 2004. Approximately US\$353 million of debt owed to bilateral creditors was rescheduled and the Republic received an extension of repayment of ODA credits of 20 years, with a ten-year grace period, and an extension of repayment of non-ODA credits of 15 years, with a five-year grace period. The total stock of bilateral debt eligible under the agreement covered maturities falling due from 1 January 2004 to 31 December 2006 (including the debt service payments in arrear as of 31 December 2003).

London Club. Kenya has also received debt relief from the London Club creditors. In 1998, the London Club creditors rescheduled Kenya's debts amounting to US\$70 million over ten years, including a three-year grace period, at prevailing market interest rates. In 2003/04, approximately US\$23 million of debt owed to London Club creditors was rescheduled over two years at prevailing market interest rates.

Bilateral Debts. Kenya has also received bilateral debt cancellations from Finland, Netherlands and China. In 2006, Kenya entered into a debt-for-development swap agreement with the Italian government amounting to US\$44 million. In January 2021, Kenya secured a debt suspension from China until June 2021. Under the terms of the debt suspension, which falls under the G20 DSSI framework, the deferred amount of US\$ 378 million, which Kenya owes to China, will be repaid over a five-year period after a debt suspension period of

one year. The loans under the debt suspension include a loan by Eximbank to fund Kenya's SGR. The suspended amounts are to be paid in ten equal, successive and semi-annual instalments over a five-year repayment period after a one year grace period at the same rate as the rate of interest in the original loan agreement.

To mitigate debt-risks, the Government is committed to:

- Fiscal consolidation under the IMF programme, including continued efforts to improve tax revenues, strengthen exports and continued reliance on concessional financing;
- Limiting use of commercial borrowing to the amounts allowed under the IMF Debt Limits Policy;
- Actively undertaking debt management operations to lower the cost of debt and refinancing risk by seeking to refinance syndicated loans and other outstanding commercial debts with long-dated debt instruments; and
- Implementing reforms to strengthen the domestic debt markets to enhance efficiency in the secondary market and lower the cost of Government securities across the yield curve.

The 2021 debt strategy was formed amid the Covid-19 Pandemic, which affected Kenya's economic growth and the country's capacity to raise revenue leading to expenditure pressures. This adversely impacted its ability to service its public debts. Under the strategy, Kenya has modest exposure levels to foreign exchange rate risk which is consistent with the Government's debt management plan. The envisaged borrowing will be used to maximise concessional and semi-concessional debt from the external sources. The Strategy also envisages debt sourcing from the international capital market.

The National Treasury plans to implement reforms to develop the domestic debt market and position Kenya as the regional financial hub in Africa. Strategic reforms include:

Enhancement of market infrastructure such as automation of processes at both primary and secondary markets.

A new Central Securities Depository to reduced time for primary market auction cycle, efficient payment and settlement processes, greater and convenient access to Government securities by both institutional and retail investors.

Restructuring of the interbank repo to provide for transfer of ownership of securities provided as collateral.

The issuance of fewer but large size benchmark bonds at the primary market to create better market liquidity and the development of the benchmark yield curve.

To establish over-the-counter trading to complement the exchange trading platform (Nairobi Securities Exchange).

The National Treasury will continue to explore diversification of Government securities to include non-plain vanilla instruments as well as undertake liability management operations such as bond exchanges, as part of a market-based debt restructuring approach.

The table below summarises the current status of the rescheduled debts.

Rescheduling year	Amount rescheduled	Outstanding amount
	As at 30 June 2025 (US\$ millions)	
Paris Club		
1994.....	535	0.0
2000.....	301	0.0
2004.....	353	0.79
London Club		
1998.....	70	0.0
2003.....	23	0.0

Debt Management

The DSSI was established on 1 May 2020 by the World Bank and the International Monetary Fund in response to the Covid-19 Pandemic. Under the DSSI, bilateral creditors, for a limited period of time, suspended debt service payments from 73 low-and lower middle-income countries that request the suspension on their debt obligations. Kenya secured debt suspension relief from eight out of its 10 Paris Club member creditors, and China with a view to free up liquidity for Covid-19 Pandemic-related expenditures.

The first phase of the deferral agreements was completed in June 2021, after which the Government sought suspension of eligible debt service payments between July and December 2021. The first phase of the DSSI freed up approximately KES 46.2 billion, while the second phase 1 deferred approximately KES 9.5 billion of debt service payments between July and December 2021.

The Government is not planning to restructure any of its debts, although plans are under way to conduct liability management operations on selected commercial debts with an aim to lengthen the maturity structure and refinance those debts at lower interest rates. Even without the liability management operations, the Government still expects to refinance selected commercial debts as and when they mature.

The Common Framework for Debt Treatments beyond the DSSI (the “**Common Framework**”) is an agreement of the G20 and Paris Club countries to coordinate and cooperate on debt treatments for up to 73 countries that are eligible for the DSSI, and extends beyond bilateral agreements. Kenya does not currently plan to participate in the Common Framework. See “*Risk Factors—Risks Relating to the Republic of Kenya—High levels of indebtedness could have a material adverse effect on Kenya’s economy, its sovereign credit ratings and its ability to service its debt, including the Notes.*”

TERMS AND CONDITIONS OF THE 2034 NOTES

The US\$900,000,000 7.875% Amortising Notes due 2034 (the “**Notes**”, which expression shall in these Conditions, unless the context otherwise requires, include any further notes issued pursuant to Condition 15 and forming a single series with the Notes) issued by the Republic of Kenya (the “**Issuer**”) are issued subject to and with the benefit of an agency agreement dated 26 February 2026 (such agreement as amended and/or supplemented and/or restated from time to time, the “**Agency Agreement**”) made between the Issuer, Citibank Europe plc, Germany Branch as registrar (the “**Registrar**”), Citibank, N.A., London Branch as fiscal agent and principal paying agent (the “**Fiscal Agent**”), Citibank, N.A., London Branch as transfer agent (the “**Transfer Agent**”) and the other initial paying agents named in the Agency Agreement (together with the Fiscal Agent, the “**Paying Agents**”) and the other agents named in it (together with the Fiscal Agent, the Registrar, the Transfer Agent and the other Paying Agents, the “**Agents**”). The Notes also have the benefit of a deed of covenant dated 26 February 2026 (the “**Deed of Covenant**”) executed by the Issuer in relation to the Notes.

The statements in these Conditions include summaries of, and are subject to, the detailed provisions of and definitions contained in the Agency Agreement. Copies of the Agency Agreement and the Deed of Covenant (i) are available for inspection during normal business hours by the holders of the Notes (the “**Noteholders**”) at the Specified Office (as defined in the Agency Agreement) of each of the Paying Agents, or (ii) may be provided by email to a Noteholder following their prior written request to any Paying Agent and provision of proof of holding and identity (in a form satisfactory to the relevant Paying Agent). The Noteholders are entitled to the benefit of, are bound by, and are deemed to have notice of, all the provisions of the Agency Agreement and the Deed of Covenant applicable to them. References in these Conditions to the Fiscal Agent, the Transfer Agent, the Registrar, the Paying Agents and the Agents shall include any successor appointed under the Agency Agreement.

1. Form, Denomination and Title

- (a) *Form and Denomination:* The Notes are issued in registered form in denominations of US\$200,000 and integral multiples of US\$1,000 in excess thereof (each, an “**Authorised Denomination**”). A registered note certificate (each, a “**Certificate**”) will be issued to each Noteholder in respect of its registered holding of Notes. Each Certificate will be numbered serially with an identifying number which will be recorded on the relevant Certificate and in the register of Noteholders (the “**Register**”) which the Issuer will procure to be kept by the Registrar in accordance with the provisions of the Agency Agreement.
- (b) *Title:* Title to the Notes passes only by registration in the Register. The holder of any Note will (except as otherwise required by law) be treated as its absolute owner for all purposes (whether or not it is overdue and regardless of any notice of ownership, trust or any interest or any writing on, or the theft or loss of, the Certificate issued in respect of it) and no person will be liable for so treating the holder. In these Conditions “**Noteholder**”, and in relation to a Note, “**holder**” means the person in whose name a Note is for the time being registered in the Register (or, in the case of a joint holding, the first named thereof) and “**holders**” shall be construed accordingly.

2. Transfers of Notes and Issue of Certificates

- (a) *Transfers:* Subject to Condition 2(d) and Condition 2(e), a Note may be transferred by depositing the Certificate issued in respect of that Note, with the form of transfer on the back duly completed and signed, at the Specified Office of the Registrar or any of the Transfer Agents together with such evidence as the Registrar or Transfer Agent may require to prove the title of the transferor and the authority of the individuals who have executed the form of transfer; provided however, that a Note may not be transferred unless the nominal amount of the Notes transferred and (where not all of the Notes held by a Noteholder are being transferred) the nominal amount of the Notes not transferred, are Authorised Denominations.
- (b) *Delivery of new Certificates:* Each new Certificate to be issued upon transfer or exchange of Notes will, within five business days of receipt by the Registrar or the Transfer Agent of the

duly completed form of transfer endorsed on the relevant Certificate, be mailed by uninsured mail at the risk of the holder entitled to the Note to the address specified in the form of transfer. For the purposes of this Condition 2(b), “**business day**” shall mean a day on which commercial banks are open for business in the city in which the Specified Office of the Registrar or the Transfer Agent with whom a Certificate is deposited in connection with a transfer is located.

Where some but not all of the Notes in respect of which a Certificate is issued are to be transferred a new Certificate in respect of the Notes not so transferred will, within five business days of receipt by the Registrar or the Transfer Agent of the original Certificate, be mailed by uninsured mail at the risk of the holder of the Notes not so transferred to the address of such holder appearing on the Register or as specified in the form of transfer.

- (c) *Formalities free of charge:* Registration of transfer of Notes will be effected without charge by or on behalf of the Issuer, the Registrar or any Transfer Agent but upon payment by the Noteholder (or the giving of such indemnity as the Registrar or any Agent may reasonably require) in respect of any tax or other governmental charges which may be imposed in relation to such transfer.
- (d) *Closed Periods:* No Noteholder may require the transfer of a Note to be registered during the period of 15 calendar days ending on (and including) the due date for any payment of principal or interest on that Note.
- (e) *Regulations:* All transfers of Notes and entries on the Register will be made subject to the detailed regulations concerning transfer of Notes scheduled to the Agency Agreement. The regulations may be changed by the Issuer with the prior written approval of the Registrar. A copy of the current regulations will be mailed (free of charge) by the Registrar to any Noteholder upon request.

3. Status

The Notes constitute direct, unconditional, unsubordinated and (subject to the provisions of Condition 4) unsecured obligations of the Issuer and rank, and will rank, *pari passu* and without any preference among themselves, and at least *pari passu* with all other present and future unsubordinated and (subject as provided in Condition 4) unsecured obligations of the Issuer, save only for such obligations as may be preferred by mandatory provisions of applicable law, **provided, further, that** the Issuer shall have no obligation to effect equal or rateable payment(s) at any time with respect to any such other obligations and, in particular, shall have no obligation to pay such other obligations at the same time or as a condition of paying sums due on the Notes and *vice versa*. The Notes are backed by the full faith and credit of the Issuer.

4. Negative Pledge

- (a) *Negative Pledge:* So long as any Note remains outstanding (as defined in the Agency Agreement) the Issuer will not, save for the exceptions set out below in Condition 4(c) create, incur, assume or permit to subsist any Security upon the whole or any part of its present or future assets or revenues to secure (i) any of its Public External Indebtedness, (ii) any Guarantees in respect of Public External Indebtedness or (iii) the Public External Indebtedness of any other person, without at the same time or prior thereto securing the Notes equally and rateably therewith or providing such other arrangement (whether or not comprising Security) as shall be approved by an Extraordinary Resolution of Noteholders or by a Written Resolution (as defined in Condition 13.1). For the avoidance of doubt, any such approval shall not constitute a Reserved Matter (as defined in Condition 13.5).
- (b) *Interpretation:* In these Conditions:
 - (i) “**Guarantee**” means any obligation of a person to pay the Indebtedness of another person including, without limitation: an obligation to pay or purchase such Indebtedness, an obligation to lend money or to purchase or subscribe shares or other

securities or to purchase assets or services in order to provide funds for the payment of such Indebtedness, an indemnity against the consequences of a default in the payment of such Indebtedness or any other agreement to be responsible for such Indebtedness;

- (ii) “**Extraordinary Resolution**” means a resolution passed at a meeting of Noteholders (whether originally convened or resumed following an adjournment) duly convened and held in accordance with Schedule 7 (*Provisions for Meetings of the Noteholders*) to the Agency Agreement by a majority of not less than three quarters of the votes cast;
 - (iii) “**Indebtedness**” means any obligation (whether present or future) for the payment or repayment of money which has been borrowed or raised (including money raised by acceptances and leasing);
 - (iv) “**person**” means any individual, company, corporation, firm, partnership, joint venture, association, organisation, trust or other juridical entity, state or agency of a state or other entity, whether or not having a separate legal personality;
 - (v) “**Public External Indebtedness**” means any Indebtedness which (i) is expressed, denominated or payable, or at the option of the relevant creditor may be payable, in any currency other than the lawful currency from time to time of the Republic of Kenya, and (ii) is in the form of, or is represented by, bonds, notes or other securities with a stated maturity of more than one year from the date of issue which are, or are capable of being, quoted, listed or ordinarily purchased or sold, dealt in or traded on any stock exchange, automated trading system, over-the-counter or other securities market; and
 - (vi) “**Security**” means any mortgage, pledge, lien, hypothecation, security interest or other charge or encumbrance including, without limitation, anything analogous to the foregoing under the laws of any jurisdiction.
- (c) *Exceptions:* The following exceptions apply to the Issuer’s obligations under Condition 4(a):
- (i) any Security upon property to secure Public External Indebtedness of the Issuer or any Guarantee by the Issuer of Public External Indebtedness of any other person incurred for the purpose of financing the acquisition or construction of such property and any renewal and extension of such Security which is limited to the original property covered thereby and which (in either case) secures any renewal or extension of the original secured financing; and
 - (ii) any Security securing Public External Indebtedness of the Issuer or any Guarantee by the Issuer of Public External Indebtedness of any other person incurred for the purpose of financing all or part of the costs of the acquisition, construction or development of a project; provided that (A) the holders of such Public External Indebtedness or Guarantee expressly agree to limit their recourse to the assets and revenues of such project or the proceeds of insurance thereon as the principal source of repayments of such Public External Indebtedness and (B) the property over which such Security is granted consists solely of such assets and revenues.

5. Interest

- (a) *Interest Rate and Interest Payment Dates:* The Notes bear interest on their outstanding principal amount from time to time (as determined in accordance with Condition 7) from and including 26 February 2026 (the “**Issue Date**”) to but excluding the Maturity Date (as defined in Condition 7(a)) at the rate of 7.875% per annum (the “**Rate of Interest**”), payable semi-annually in arrear on 26 February and 26 August in each year (each, an “**Interest Payment Date**”), subject as provided in Condition 6(d). Each period beginning on (and including) the Issue Date or any Interest Payment Date and ending on (but excluding) the next Interest Payment Date is herein called, an “**Interest Period**”.

- (b) *Interest Accrual:* Each Note will cease to bear interest from and including its due date for redemption unless, upon surrender of the Certificate representing such Note, payment of the principal in respect of the Note is improperly *withheld* or refused or unless default is otherwise made in respect of payment. In such event, interest will continue to accrue at the rate referred to in Condition 5.1(a) (both before and after judgment) until whichever is the earlier of:
- (i) the date on which all amounts due in respect of such Note up to that date have been received by or on behalf of the relevant Noteholder; and
 - (ii) the day which is seven days after the date on which the full amount of the moneys payable in respect of such Notes has been received by the Fiscal Agent and notice to that effect has been given to the Noteholders in accordance with Condition 12 (except to the extent that there is any subsequent default in payment to the relevant Noteholders).
- (c) *Calculation of Interest:* The amount of interest payable in respect of each Note for any Interest Period shall be calculated by applying the Rate of Interest to the then outstanding principal amount of such Note (as determined in accordance with Condition 7), dividing the product by two and rounding the resulting figure to the nearest cent (half a cent being rounded upwards). If interest is required to be calculated for any period other than an Interest Period, it will be calculated on the basis of a year of 360 days consisting of 12 months of 30 days each and, in the case of an incomplete month, the actual number of days elapsed.

6. Payments

- (a) *Payments in respect of Notes:* Payment of principal and interest will be made by transfer to the registered account of the Noteholder or by a cheque in US dollars drawn on a bank that processes payments in US dollars mailed to the registered address of the Noteholder if it does not have a registered account. Payment of principal will only be made against surrender of the relevant Certificate at the Specified Office of any of the Paying Agents. Interest on Notes due on an Interest Payment Date will be paid to the Noteholder shown on the Register at the close of business on the date (the “**record date**”) being the fifteenth day before the due date for the payment of interest.

For the purposes of this Condition 6(a), a Noteholder’s “**registered account**” means the US dollar account maintained by or on its behalf with a bank that processes payments in US dollars, the details of which appear on the Register at the close of business, in the case of principal, on the second Business Day (as defined below) before the due date for payment and, in the case of interest, on the relevant record date, and a Noteholder’s “**registered address**” means its address appearing on the Register at that time.

- (b) *Payments subject to Applicable Laws:* Payments in respect of principal and interest on the Notes are subject in all cases to any fiscal or other laws and regulations applicable in the place of payment, but without prejudice to the provisions of Condition 8.
- (c) *No commissions:* No commissions or expenses shall be charged to the Noteholders in respect of any payments made in accordance with this Condition 6.
- (d) *Payment on Business Days:* Where payment is to be made by transfer to a registered account, payment instructions (for value the due date or, if that is not a Business Day (as defined below), for value the first following day which is a Business Day) will be initiated and, where payment is to be made by cheque, the cheque will be mailed, on the due date for payment or, in the case of a payment of principal, if later, on the Business Day on which the relevant Certificate is surrendered at the Specified Office of an Agent. If any date for payment in respect of a Note is not a Business Day, the Noteholder shall not be entitled to payment until the next following Business Day.

Noteholders will not be entitled to any interest or other payment for any delay after the due date in receiving the amount due if the due date is not a Business Day, if the Noteholder is late in

surrendering its Certificate (if required to do so) or if a cheque mailed in accordance with this Condition 6(d) arrives after the due date for payment.

In this Condition 6, “**Business Day**” means a day (other than a Saturday or Sunday) on which commercial banks are open for general business in London, New York City and, in the case of surrender of a Certificate, in the place in which the Certificate is surrendered.

- (e) *Partial Payments:* If the amount of principal or interest which is due on the Notes is not paid in full, the Registrar will annotate the Register with a record of the amount of principal or interest in fact paid.
- (f) *Agents:* The names of the initial Agents and their initial Specified Offices are set out in the Agency Agreement. The Issuer reserves the right at any time to vary or terminate the appointment of any Agent and to appoint additional or other Agents; **provided that**, there will at all times be: (i) Fiscal Agent, (ii) such other agents as may be required by any stock exchange on which the Notes may be listed, (iii) a Registrar, and (iv) Transfer Agent.

Notice of any termination or appointment and of any changes in Specified Offices will be given to the Noteholders promptly by the Issuer in accordance with Condition 12.

- (g) In acting under the Agency Agreement and in connection with the Notes, the Agents act solely as agents of the Issuer and do not assume any obligations towards or relationship of agency or trust for or with any of the Noteholders.

7. Redemption and Purchase

- (a) *Redemption by Amortisation and Final Redemption:* Unless previously purchased and cancelled as provided below, the Issuer will redeem the Notes in three equal instalments on each amortisation date specified in column A below (each, an “**Amortisation Date**”) at the related amortisation amount specified in column B below (each, an “**Amortisation Amount**”) payable as provided in Condition 6 (*Payments*). The outstanding principal amount of the Notes shall be reduced by the Amortisation Amount so paid by the Issuer on the relevant Amortisation Date for all purposes with effect from such relevant Amortisation Date such that the outstanding aggregate principal amount of the Notes following such payment shall be as specified in column C below. If payment of the relevant Amortisation Amount is improperly withheld or refused in respect of a Note, the relevant principal amount of such Note will remain outstanding until whichever is the earlier of (i) the day on which all sums due in respect of such Note up to that day have been paid and (ii) the Business Day after the Fiscal Agent has given notice to the Noteholders that it has received all sums due in respect of such Notes up to that Business Day (except to the extent that there is any subsequent default in payment in accordance with these Conditions). The Notes shall be finally redeemed at their final Amortisation Amount payable on 26 February 2034 (the “**Maturity Date**”).

Amortisation Date (A)			Amortisation Amount (B)	Outstanding Aggregate Principal Amount of the Notes (C)
			<i>(US\$)</i>	<i>(US\$)</i>
Interest Payment Date				
falling on 26 February 2032			300,000,000	600,000,000
Interest Payment Date				
falling on 26 February 2033			300,000,000	300,000,000
Maturity Date			300,000,000	0

In these Conditions, references to “**principal**” shall, unless the context requires otherwise, be deemed to include any Amortisation Amount and references to the “**due date**” for payment shall, unless the context requires otherwise, be deemed to include any Amortisation Date.

In the event of any purchase and cancellation of the Notes as provided in Condition 7(b) (*Purchases and Cancellation*) below, there shall be a corresponding pro rata reduction in the remaining Amortisation Amounts payable in respect of the Notes to reflect the reduction in the outstanding aggregate principal amount of the Notes following such purchase and cancellation, as the case may be, and to provide for the redemption of the remaining Notes in corresponding instalments on each remaining Amortisation Date.

- (b) *Purchases and Cancellation:* The Issuer may at any time purchase Notes in the open market or otherwise at any price and for any consideration. All Notes so purchased may be cancelled or resold. Any Notes so purchased, while held by or on behalf of the Issuer, shall not entitle the holder of the Notes to vote at any meeting of Noteholders and shall not be deemed outstanding for the purpose of such meetings. Any Notes cancelled shall not be reissued.

8. Taxation

- (a) *Payment without Withholding:* All payments in respect of the Notes by or on behalf of the Issuer shall be made without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature (“**Taxes**”) imposed or levied by or on behalf of the Relevant Jurisdiction, unless the withholding or deduction of the Taxes is required by law. In that event, the Issuer will pay such additional amounts as may be necessary in order that the net amounts received by the Noteholders after the withholding or deduction shall equal the respective amounts which would have been receivable in respect of the Notes in the absence of the withholding or deduction, except that no additional amounts shall be payable in relation to any payment in respect of any Note:
- (i) held by or on behalf of a Noteholder who is liable to the Taxes in respect of such Note by reason of his having some connection with the Relevant Jurisdiction other than the mere holding of the Note; or
 - (ii) in respect of which the Certificate representing it is surrendered for payment more than 30 days after the Relevant Date (as defined below), except to the extent that the relevant Noteholder would have been entitled to such additional amounts on surrendering the Certificate representing such Note for payment on the last day of such period of 30 days assuming, whether or not such is in fact the case, that day to have been a Business Day (as defined in Condition 6).
- (b) *Interpretation:* In these Conditions:
- (i) “**Relevant Date**” in respect of any Note means the date on which the payment first becomes due but, if the full amount of the money payable has not been received by the Fiscal Agent on or before the due date, it means the date on which, the full amount of the money having been so received, notice to that effect has been duly given to the Noteholders by the Issuer in accordance with Condition 12; and
 - (ii) “**Relevant Jurisdiction**” means the Republic of Kenya or any political subdivision or any authority thereof or therein having power to tax in respect of payments in respect of the Notes.
- (c) *Additional Amounts:* Any reference in these Conditions to any amounts in respect of the Notes shall be deemed also to refer to any additional amounts which may be payable under this Condition 8.

9. Prescription

Claims against the Issuer for payment in respect of the Notes will be prescribed and become void unless made within six years (in the case of principal) and five years (in the case of interest) from the Relevant Date (as defined in Condition 8).

10. Events of Default

- (a) *Events of Default:* If any of the following events (“**Events of Default**”) shall have occurred and be continuing:
- (i) *Non-payment:* (A) the Issuer fails to pay any principal on any of the Notes when due and payable and such failure continues for a period of 15 business days; or (B) the Issuer fails to pay any interest on any of the Notes or any amount due under Condition 8 when due and payable, and such failure continues for a period of 30 days; or
 - (ii) *Breach of Other Obligations:* the Issuer does not perform or comply with any one or more of its other obligations under the Notes, the Agency Agreement or the Deed of Covenant, which default is incapable of remedy or is not remedied within 45 days following the service by any Noteholder on the Issuer of notice requiring the same to be remedied; or
 - (iii) *Cross-default:* (A) the acceleration of the maturity (other than by optional or mandatory prepayment or redemption) of any External Indebtedness of the Issuer, or (B) any default in the payment of principal of any External Indebtedness of the Issuer shall occur when and as the same shall become due and payable if such default shall continue beyond the initial grace period, if any, applicable thereto or (C) any default in the payment when due and called upon (after the expiry of any originally applicable grace period) of any Guarantee of the Issuer in respect of any External Indebtedness of any other person; provided that, the aggregate amount of the relevant External Indebtedness in respect of which one or more of the events mentioned in this paragraph (iii) have occurred equals or exceeds US\$25,000,000 or its equivalent in other currencies; or
 - (iv) *Moratorium:* a moratorium on the payment of principal of, or interest on, the External Indebtedness of the Issuer shall be declared by the Issuer; or
 - (v) *IMF Membership:* the Issuer shall cease to be a member of the International Monetary Fund (“**IMF**”) or shall cease to be eligible to use the general resources of the IMF; or
 - (vi) *Validity:* (A) the validity of the Notes shall be contested by the Issuer, or (B) the Issuer shall deny any of its obligations under the Notes (whether by a general suspension of payments or a moratorium on the payment of debt or otherwise) or (C) it shall be or become unlawful for the Issuer to perform or comply with all or any of its obligations set out in the Notes, including, without limitation, the payment of interest on the Notes, as a result of any change in law or regulation in the Republic of Kenya or any ruling of any court in the Republic of Kenya whose decision is final and unappealable or for any reason such obligations cease to be in full force and effect; or
 - (vii) *Consents:* if any authorisation, consent of, or filing or registration with, any governmental authority necessary for the performance of any payment obligation of the Issuer under the Notes, when due, ceases to be in full force and effect or remain valid and subsisting,

then the holders of at least 25% in aggregate principal amount of the Notes then outstanding may, by notice in writing to the Issuer (with a copy to the Fiscal Agent), declare all the Notes to be immediately due and payable, whereupon they shall become immediately due and payable at their outstanding principal amount (as determined in accordance with Condition 7) together with accrued interest without further action or formality. Notice of any such declaration shall promptly be given to all other Noteholders by the Issuer.

If the Issuer receives notice in writing from holders of at least 50% in aggregate principal amount of the Notes then outstanding to the effect that the Event of Default or Events of Default giving rise to any above mentioned declaration of acceleration is or are cured following any such declaration and that such holders wish the relevant declaration to be withdrawn, the Issuer

shall give notice thereof to the Noteholders (with a copy to the Fiscal Agent), whereupon the relevant declaration shall be withdrawn and shall have no further effect but without prejudice to any rights or obligations which may have arisen before the Issuer gives such notice (whether pursuant to these Conditions or otherwise). No such withdrawal shall affect any other or any subsequent Event of Default or any right of any Noteholder in relation thereto.

In this Condition 10, “**External Indebtedness**” means Indebtedness expressed or denominated or payable or which, at the option of the relevant creditor, may be payable in a currency other than the lawful currency from time to time in the Republic of Kenya.

11. Replacement of Certificates

If any Certificate is lost, stolen, mutilated, defaced or destroyed it may be replaced at the Specified Office of the Registrar upon payment by the claimant of the expenses incurred in connection with the replacement and on such terms as to evidence and indemnity as the Issuer may reasonably require. Mutilated or defaced Certificates must be surrendered before replacements will be issued.

12. Notices

All notices to the Noteholders will be valid if mailed to them at their respective addresses in the Register at the time of publication of such notice by pre-paid first class mail (or any other manner approved by the Registrar (or the Fiscal Agent on its behalf), which may be by electronic transmission). Any such notice shall be deemed to have been given on the fourth week day (being a day other than a Saturday or Sunday) after being so mailed. The Issuer shall also ensure that notices are duly published in a manner which complies with the rules of any stock exchange or other relevant authority on which the Notes are for the time being listed or by which they have been admitted to trading including publication on the website of the relevant stock exchange or relevant authority if required by those rules.

13. Meetings of Noteholders; Written Resolutions

13.1 Convening Meetings of Noteholders; Conduct of Meetings of Noteholders; Written Resolutions

- (a) The Issuer may convene a meeting of the Noteholders at any time in respect of the Notes in accordance with the Agency Agreement. The Issuer will determine the time and place of the meeting (which need not be to a physical place and instead may be to the meeting held by way of conference call or by use of a videoconference platform). The Issuer will notify the Noteholders of the time, place and purpose of the meeting not less than 21 and not more than 45 days before the meeting. References to persons being “present” at or “attending” a meeting shall include being present at or attending by means of video or telephone conference facilities.
- (b) The Issuer or the Fiscal Agent will convene a meeting of Noteholders if the holders of at least 10% in principal amount of the Notes then outstanding (as defined in the Agency Agreement and described in Condition 13.9 below) have delivered a written request to the Issuer or the Fiscal Agent (with a copy to the Issuer) setting out the purpose of the meeting. The Fiscal Agent will agree the time and place of the meeting with the Issuer promptly. The Issuer or the Fiscal Agent, as the case may be, will notify the Noteholders within 10 days of receipt of such written request of the time and place of the meeting, which shall take place not less than 21 and not more than 45 days after the date on which such notification is given.
- (c) The Issuer (with the agreement of the Fiscal Agent) will set the procedures governing the conduct of any meeting in accordance with the Agency Agreement. If the Agency Agreement does not include such procedures, or additional procedures are required, the Issuer and the Fiscal Agent will agree such procedures as are customary in the market and in such a manner as to facilitate any multiple series aggregation, if in relation to a Reserved Matter the Issuer proposes any modification to the terms and conditions of, or action with respect to, two or more series of debt securities issued by it.

- (d) The notice convening any meeting will specify, *inter alia*:
- (i) the date, time and location of the meeting;
 - (ii) the agenda and the text of any Extraordinary Resolution to be proposed for adoption at the meeting;
 - (iii) the record date for the meeting, which shall be no more than five business days before the date of the meeting;
 - (iv) the documentation required to be produced by a Noteholder in order to be entitled to participate at the meeting or to appoint a proxy to act on the Noteholder's behalf at the meeting;
 - (v) any time deadline and procedures required by any relevant international and/or domestic clearing systems or similar through which the Notes are traded and/or held by Noteholders;
 - (vi) whether Condition 13.2, or Condition 13.3, or Condition 13.4 shall apply and, if relevant, in relation to which other series of debt securities it applies;
 - (vii) if the proposed modification or action relates to two or more series of debt securities issued by the Issuer and contemplates such series of debt securities being aggregated in more than one group of debt securities, a description of the proposed treatment of each such group of debt securities;
 - (viii) such information that is required to be provided by the Issuer in accordance with Condition 13.6;
 - (ix) the identity of the Aggregation Agent and the Calculation Agent (each as defined in these Conditions), if any, for any proposed modification or action to be voted on at the meeting, and the details of any applicable methodology referred to in Condition 13.7; and
 - (x) any additional procedures which may be necessary and, if applicable, the conditions under which a multiple series aggregation will be deemed to have been satisfied if it is approved as to some but not all of the affected series of debt securities.
- (e) All information to be provided pursuant to Condition 13.1(d) shall also be provided, *mutatis mutandis*, in respect of Written Resolutions and Electronic Consents (as defined in Condition 13.12).
- (f) A “**record date**” in relation to any proposed modification or action means the date fixed by the Issuer for determining the Noteholders and, in the case of a multiple series aggregation, the holders of debt securities of each other affected series that are entitled to vote on a Multiple Series Single Limb Extraordinary Resolution or a Multiple Series Two Limb Extraordinary Resolution, or to sign a Multiple Series Single Limb Written Resolution or a Multiple Series Two Limb Written Resolution.
- (g) An “**Extraordinary Resolution**” means any of a Single Series Extraordinary Resolution, a Multiple Series Single Limb Extraordinary Resolution and/or a Multiple Series Two Limb Extraordinary Resolution, as the case may be.
- (h) A “**Written Resolution**” means any of a Single Series Written Resolution, a Multiple Series Single Limb Written Resolution and/or a Multiple Series Two Limb Written Resolution, as the case may be.
- (i) Any reference to “**debt securities**” means any notes (including the Notes), bonds, debentures or other debt securities issued by the Issuer in one or more series with an original stated maturity of more than one year.

- (j) **“Debt Securities Capable of Aggregation”** means those debt securities which include or incorporate by reference this Condition 13 and Condition 14 or provisions substantially in these terms which provide for the debt securities which include such provisions to be capable of being aggregated for voting purposes with other series of debt securities.

13.2 Modification of this Series of Notes only

- (a) Any modification of any provision of, or any action in respect of, the Notes, these Conditions, the Agency Agreement and/or the Deed of Covenant may be made or taken if approved by a Single Series Ordinary Resolution, a Single Series Extraordinary Resolution or a Single Series Written Resolution as set out below.
- (b) For the purposes of a meeting of Noteholders convened in respect of this Series of Notes only and for the purposes of passing a Single Series Ordinary Resolution and/or a Single Series Extraordinary Resolution (each as defined below) (a **“Single Series Meeting”**), at any such Single Series Meeting any one or more persons present holding Notes or proxies or representatives and holding or representing in the aggregate not less than 50% in principal amount of the Notes for the time being outstanding (or, in the case of an adjourned meeting, one or more persons present holding Notes or being proxies or representatives (whatever the principal amount of Notes so held or represented)) shall (except for the purposes of passing a Single Series Extraordinary Resolution) form a quorum for the transaction of business and no business (other than the choosing of a chairman) shall be transacted at any such Single Series Meeting unless the requisite quorum be present at the commencement of business. The quorum at any such Single Series Meeting convened for the purpose of passing a Single Series Extraordinary Resolution shall be one or more persons present holding Notes or being proxies or representatives and holding or representing in the aggregate not less than 66.67% of the principal amount of the Notes for the time being outstanding, (or, in the case of an adjourned meeting, one or more persons so present holding Notes or being proxies or representatives and holding or representing in the aggregate not less than 33.34% in the principal amount of Notes for the time being outstanding).
- (c) A **“Single Series Ordinary Resolution”** means a resolution passed at a Single Series Meeting duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Conditions 13.1 and 13.2(b) in respect of any matter other than a Reserved Matter, by a majority of at least 66.67% of the votes cast.
- (d) A **“Single Series Extraordinary Resolution”** means a resolution passed at a Single Series Meeting duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Conditions 13.1 and 13.2(b) in respect of a Reserved Matter by a majority of at least 75% of the votes cast.
- (e) A **“Single Series Written Resolution”** means a resolution in writing signed or confirmed in writing by or on behalf of the holders of:
- (i) in the case of a Reserved Matter, at least 75% of the aggregate principal amount of the Notes then outstanding; or
 - (ii) in the case of a matter other than a Reserved Matter, at least 66.67% of the aggregate principal amount of the Notes then outstanding.

Any Single Series Written Resolution may be contained in one document or several documents in the same form, each signed or confirmed in writing by or on behalf of one or more Noteholders.

- (f) Any Single Series Ordinary Resolution, Single Series Extraordinary Resolution duly passed or Single Series Written Resolution approved shall be binding on all Noteholders, whether or not they attended such Single Series Meeting, whether or not they voted in favour thereof and whether or not they signed or confirmed in writing any such Single Series Written Resolution, as the case may be.

13.3 Multiple Series Aggregation - Single limb voting

- (a) In relation to a proposal that includes a Reserved Matter, any modification to the terms and conditions of, or any action with respect to, two or more series of Debt Securities Capable of Aggregation may be made or taken if approved by a Multiple Series Single Limb Extraordinary Resolution or by a Multiple Series Single Limb Written Resolution as set out below, **provided that** the Uniformly Applicable condition is satisfied.
- (b) A “**Multiple Series Single Limb Extraordinary Resolution**” means a resolution considered at separate meetings of the holders of each affected series of Debt Securities Capable of Aggregation, duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Condition 13.1, as supplemented if necessary, which is passed by a majority of at least 75% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate).
- (c) A “**Multiple Series Single Limb Written Resolution**” means each resolution in writing (with a separate resolution in writing or multiple separate resolutions in writing distributed to the holders of each affected series of Debt Securities Capable of Aggregation, in accordance with the applicable bond documentation) which, when taken together, has been signed or confirmed in writing by or on behalf of the holders of at least 75% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate). Any Multiple Series Single Limb Written Resolution may be contained in one document or several documents in substantially the same form, each signed or confirmed in writing by or on behalf of one or more Noteholders or one or more holders of each affected series of debt securities.
- (d) Any Multiple Series Single Limb Extraordinary Resolution duly passed or Multiple Series Single Limb Written Resolution approved shall be binding on all Noteholders and holders of each other affected series of Debt Securities Capable of Aggregation, whether or not they attended any meeting, whether or not they voted in favour thereof, whether or not any other holder or holders of the same series voted in favour thereof and whether or not they signed or confirmed in writing any such Multiple Series Single Limb Written Resolution, as the case may be.
- (e) The “**Uniformly Applicable**” condition will be satisfied if:
 - (i) the holders of all affected series of Debt Securities Capable of Aggregation are invited to exchange, convert, or substitute their debt securities, on the same terms, for (i) the same new instrument or other consideration or (ii) a new instrument, new instruments or other consideration from an identical menu of instruments or other consideration; or
 - (ii) the amendments proposed to the terms and conditions of each affected series of Debt Securities Capable of Aggregation would, following implementation of such amendments, result in the amended instruments having identical provisions (other than provisions which are necessarily different, having regard to different currency of issuance).
- (f) It is understood that a proposal under Condition 13.3(c) above will not be considered to satisfy the Uniformly Applicable condition if each exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation is not offered the same amount of consideration per amount of principal, the same amount of consideration per amount of interest accrued but unpaid and the same amount of consideration per amount of past due interest, respectively, as that offered to each other exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation (or, where a menu of instruments or other consideration is offered, each exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation is not offered the same amount of consideration per amount of principal, the same amount of consideration per amount of interest accrued but unpaid and the same amount of

consideration per amount of past due interest, respectively, as that offered to each other exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation electing the same option from such menu of instruments).

- (g) Any modification or action proposed under Condition 13.3(a) may be made in respect of some series only of the Debt Securities Capable of Aggregation and, for the avoidance of doubt, the provisions described in this Condition 13.3 may be used for different groups of two or more series of Debt Securities Capable of Aggregation simultaneously.

13.4 Multiple Series Aggregation - Two limb voting

- (a) In relation to a proposal that includes a Reserved Matter, any modification to the terms and conditions of, or any action with respect to, two or more series of Debt Securities Capable of Aggregation may be made or taken if approved by a Multiple Series Two Limb Extraordinary Resolution or by a Multiple Series Two Limb Written Resolution as set out below.
- (b) A “**Multiple Series Two Limb Extraordinary Resolution**” means a resolution considered at separate meetings of the holders of each affected series of Debt Securities Capable of Aggregation, duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Condition 13.1, as supplemented if necessary, which is passed by a majority of:
 - (i) at least 66.67% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate); and
 - (ii) more than 50% of the aggregate principal amount of the debt securities then outstanding in each affected series of Debt Securities Capable of Aggregation (taken individually).
- (c) A “**Multiple Series Two Limb Written Resolution**” means each resolution in writing (with a separate resolution in writing or multiple separate resolutions in writing distributed to the holders of each affected series of Debt Securities Capable of Aggregation, in accordance with the applicable bond documentation) which, when taken together, has been signed or confirmed in writing by or on behalf of the holders of:
 - (i) at least 66.67% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate); and
 - (ii) more than 50% of the aggregate principal amount of the debt securities then outstanding in each affected series of Debt Securities Capable of Aggregation (taken individually).

Any Multiple Series Two Limb Written Resolution may be contained in one document or several documents in substantially the same form, each signed or confirmed in writing by or on behalf of one or more Noteholders or one or more holders of each affected series of Debt Securities Capable of Aggregation.

- (d) Any Multiple Series Two Limb Extraordinary Resolution duly passed or Multiple Series Two Limb Written Resolution approved shall be binding on all Noteholders and holders of each other affected series of Debt Securities Capable of Aggregation, whether or not they attended any meeting, whether or not they voted in favour thereof, whether or not any other holder or holders of the same series voted in favour thereof and whether or not they signed or confirmed in writing any such Multiple Series Two Limb Written Resolution, as the case may be.
- (e) Any modification or action proposed under Condition 13.4(a) may be made in respect of some series only of the Debt Securities Capable of Aggregation and, for the avoidance of doubt, the provisions described in this Condition 13.4 may be used for different groups of two or more series of Debt Securities Capable of Aggregation simultaneously.

13.5 Reserved Matters

In these Conditions, “**Reserved Matter**” means any proposal:

- (a) to change the dates, or the method of determining the dates, for payment of principal, interest or any other amount in respect of the Notes, to reduce or cancel the amount of principal, interest or any other amount payable on any date in respect of the Notes or to change the method of calculating the amount of principal, interest or any other amount payable in respect of the Notes on any date;
- (b) to change the currency in which any amount due in respect of the Notes is payable or the place in which any payment is to be made;
- (c) to change the majority or quorum required to pass a Single Series Ordinary Resolution, an Electronic Consent, an Extraordinary Resolution, a Written Resolution or any other resolution of Noteholders or the number or percentage of votes required to be cast, or the number or percentage of Notes required to be held, in connection with the taking of any decision or action by or on behalf of the Noteholders or any of them;
- (d) to change this definition, or the definition of “Electronic Consent”, “Extraordinary Resolution”, “Single Series Ordinary Resolution”, “Single Series Extraordinary Resolution”, “Multiple Series Single Limb Extraordinary Resolution”, “Multiple Series Two Limb Extraordinary Resolution”, “Written Resolution”, “Single Series Written Resolution”, “Multiple Series Single Limb Written Resolution” or “Multiple Series Two Limb Written Resolution”;
- (e) to change the definition of “debt securities” or “Debt Securities Capable of Aggregation”;
- (f) to change the definition of “Uniformly Applicable”;
- (g) to change the definition of “outstanding” set out in the Agency Agreement or to modify the provisions of Condition 13.9;
- (h) to change the legal ranking of the Notes;
- (i) to change any provision of the Notes describing circumstances in which Notes may be declared due and payable prior to their scheduled maturity date, set out in Condition 10;
- (j) to change the law governing the Notes, the arbitral tribunals to the jurisdiction of which the Issuer has submitted in the Notes, the Issuer’s obligation to maintain an agent for service of process in England, any of the arrangements specified in the Notes to enable proceedings to be taken or the Issuer’s waiver of immunity, in respect of actions or proceedings brought by any Noteholder, set out in Condition 16;
- (k) to impose any condition on or otherwise change the Issuer’s obligation to make payments of principal, interest or any other amount in respect of the Notes, including by way of the addition of a call option;
- (l) to modify the provisions of this Condition 13.5;
- (m) except as permitted by any related guarantee or security agreement, to release any agreement guaranteeing or securing payments under the Notes or to change the terms of any such guarantee or security; or
- (n) to exchange or substitute all the Notes for, or convert all the Notes into, other obligations or securities of the Issuer or any other person, or to modify any provision of these Conditions in connection with any exchange or substitution of the Notes for, or the conversion of the Notes into, any other obligations or securities of the Issuer or any other person, which would result in

the Conditions as so modified being less favourable to the Noteholders which are subject to the Conditions as so modified than:

- (i) the provisions of the other obligations or debt securities of the Issuer or any other person resulting from the relevant exchange or substitution or conversion; or
- (ii) if more than one series of other obligations or debt securities results from the relevant exchange or substitution or conversion, the provisions of the resulting series of debt securities having the largest aggregate principal amount.

13.6 Information

Prior to or on the date that the Issuer proposes any Extraordinary Resolution or Written Resolution pursuant to Condition 13.2, Condition 13.3 or Condition 13.4, the Issuer shall publish in accordance with Condition 14, and provide the Fiscal Agent with the following information:

- (a) a description of the Issuer's economic and financial circumstances which are, in the Issuer's opinion, relevant to the request for any potential modification or action, a description of the Issuer's existing debts and a description of its broad policy reform programme and provisional macroeconomic outlook;
- (b) if the Issuer shall at the time have entered into an arrangement for financial assistance with multilateral and/or other major creditors or creditor groups and/or an agreement with any such creditors regarding debt relief, a description of any such arrangement or agreement;
- (c) a description of the Issuer's proposed treatment of external debt securities that fall outside the scope of any multiple series aggregation and its intentions with respect to any other debt securities and its other major creditor groups; and
- (d) if any proposed modification or action contemplates debt securities being aggregated in more than one group of debt securities, a description of the proposed treatment of each such group, as required for a notice convening a meeting of the Noteholders in Condition 13.1(d)(vii).

13.7 Claims Valuation

For the purpose of calculating the par value of the Notes and any affected series of debt securities which are to be aggregated with the Notes in accordance with Condition 13.3 and Condition 13.4, the Issuer may appoint a calculation agent (the "**Calculation Agent**"). The Issuer shall, with the approval of the Aggregation Agent and any appointed Calculation Agent, promulgate the methodology in accordance with which the Calculation Agent will calculate the par value of the Notes and such affected series of debt securities. In any such case where a Calculation Agent is appointed, the same person will be appointed as the Calculation Agent for the Notes and each other affected series of debt securities for these purposes, and the same methodology will be promulgated for each affected series of debt securities.

13.8 Manifest error, etc.

The Notes, these Conditions and the provisions of the Agency Agreement may be amended by the Issuer and the Fiscal Agent without the consent of the Noteholders either (i) for the purpose of curing any ambiguity or of curing, correcting or supplementing any manifest or proven error or any other defective provision contained herein or therein or (ii) in any other manner which is, in the sole opinion of the Issuer, not materially prejudicial to the interests of the Noteholders. Any such modification shall be binding on the Noteholders and shall be notified by the Issuer to the Noteholders as soon as practicable thereafter in accordance with Condition 12.

13.9 Notes controlled by the Issuer

For the purposes of (a) determining the right to attend and vote at any meeting of Noteholders, the right to give an Electronic Consent, or the right to sign or confirm in writing, or authorise the signature of, any Written Resolution, (b) this Condition 12 and (c) Condition 10, any Notes which are for the time being held by or on behalf of the Issuer or by or on behalf of any person which is owned or controlled

directly or indirectly by the Issuer or by any public sector instrumentality of the Issuer shall be deemed not to remain outstanding, where:

- (a) “**public sector instrumentality**” means the Central Bank of Kenya, any other department, ministry or agency of the government of the Republic of Kenya or any corporation, trust, financial institution or other entity owned or controlled by the government of the Republic of Kenya or any of the foregoing; and
- (b) “**control**” means the power, directly or indirectly, through the ownership of voting securities or other ownership interests or through contractual control or otherwise, to direct the management of or elect or appoint a majority of the board of directors or other persons performing similar functions in lieu of, or in addition to, the board of directors of a corporation, trust, financial institution or other entity.

A Note will also be deemed to be not outstanding if the Note has previously been cancelled or delivered for cancellation or held for reissuance but not reissued, or, where relevant, the Note has previously been called for redemption in accordance with its terms or previously become due and payable at maturity or otherwise and the Issuer has previously satisfied its obligations to make all payments due in respect of the Note in accordance with its terms.

In advance of any meeting of Noteholders, or in connection with any Electronic Consent or Written Resolution, the Issuer shall provide to the Fiscal Agent a copy of the certificate prepared pursuant to Condition 14.5, which includes information on the total number of Notes which are for the time being held by any person (including but not limited to the Issuer) on behalf of the Issuer or by any public body owned or controlled, directly or indirectly, by the Issuer or by any public sector instrumentality of the Issuer and, as such, such Notes shall be disregarded and deemed not to remain outstanding for the purposes of ascertaining the right to attend and vote at any meeting of Noteholders or the right to sign, or authorise the signature of, any Written Resolution in respect of any such meeting. The Fiscal Agent shall make any such certificate available for inspection during normal business hours at its Specified Office and, upon reasonable request, will allow copies of such certificate to be taken.

13.10 Publication

The Issuer shall publish all Extraordinary Resolutions, Electronic Consents and Written Resolutions which have been determined by the Aggregation Agent to have been duly passed in accordance with Condition 14.8.

13.11 Exchange and Conversion

Any Extraordinary Resolutions, Electronic Consents or Written Resolutions which have been duly passed and which modify any provision of, or action in respect of, the Conditions may be implemented at the Issuer’s option by way of a mandatory exchange or conversion of the Notes and each other affected series of debt securities, as the case may be, into new debt securities containing the modified terms and conditions if the proposed mandatory exchange or conversion of the Notes is notified to Noteholders at the time notification is given to the Noteholders as to the proposed modification or action. Any such exchange or conversion shall be binding on all Noteholders.

13.12 Written Resolutions and Electronic Consents

A Written Resolution may be contained in one document or in several documents in like form, each signed by or on behalf of one or more of the Noteholders.

For so long as any Notes are in the form of a global Note held on behalf of one or more of Euroclear Bank SA/NV (“**Euroclear**”), Clearstream Banking S.A. (“**Clearstream, Luxembourg**”), The Depository Trust Company (“**DTC**”) or any other clearing system (the “**relevant clearing system(s)**”), then:

- (a) Approval of a resolution proposed by the Issuer given by way of electronic consent communicated through the electronic communications systems of the relevant clearing system(s) in accordance with their operating rules and procedures (i) by or on behalf of all

Noteholders who for the time being are entitled to receive notice of a meeting of Noteholders or (ii) (where such holders have been given at least 21 days' notice of such resolution) by or on behalf of:

- (A) in respect of a proposal that falls within paragraphs (c), (d) and (e) of Condition 13.2, the persons holding at least 75% of the aggregate principal amount of the Notes then outstanding in the case of a Reserved Matter or at least 66.67% of the aggregate principal amount of the Notes then outstanding, in the case of a matter other than a Reserved Matter;
- (B) in respect of a proposal that falls within paragraphs (b) and (c) of Condition 13.3, the persons holding at least 75% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate);
- (C) in respect of a proposal that falls within paragraphs (b) and (c) of Condition 13.4, (x) the persons holding at least 66.67% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate); and (y) the persons holding more than 50% of the aggregate principal amount of the debt securities then outstanding in each affected series of Debt Securities Capable of Aggregation (taken individually),

(in the case of (A), (B) and (C), each an “**Electronic Consent**”) shall, for all purposes (including Reserved Matters) take effect as (i) a Single Series Extraordinary Resolution (in the case of (A) above), (ii) a Multiple Series Single Limb Extraordinary Resolution (in the case of (B) above) or (iii) a Multiple Series Two Limb Extraordinary Resolution (in the case of (C) above), as applicable.

The notice given to Noteholders shall specify, in sufficient detail to enable Noteholders (in the case of a proposal pursuant to Condition 13.2) or holders of each affected series of Debt Securities Capable of Aggregation (in the case of a proposal pursuant to Condition 13.3 or 13.4) to give their consents in relation to the proposed resolution, the method by which their consents may be given (including, where applicable, blocking of their accounts in the relevant clearing system(s)) and the time and date (the “**Relevant Date**”) by which they must be received in order for such consents to be validly given, in each case subject to and in accordance with the operating rules and procedures of the relevant clearing system(s).

If, on the Relevant Date on which the consents in respect of an Electronic Consent are first counted, such consents do not represent the required proportion for approval, the resolution shall, if the party proposing such resolution (the “**Proposer**”) so determines, be deemed to be defeated. Alternatively, the Proposer may give a further notice to Noteholders (in the case of a proposal pursuant to Condition 13.2) or holders of each affected series of Debt Securities Capable of Aggregation (in the case of a proposal pursuant to Condition 13.3 or 13.4) that the resolution will be proposed again on such date and for such period as shall be agreed with the Issuer (unless the Issuer is the Proposer). Such notice must inform Noteholders (in the case of a proposal pursuant to Condition 13.2) or holders of each affected series of Debt Securities Capable of Aggregation (in the case of a proposal pursuant to Condition 13.3 or 13.4) that insufficient consents were received in relation to the original resolution and the information specified in the previous paragraph. For the purpose of such further notice, references to “**Relevant Date**” shall be construed accordingly.

An Electronic Consent may only be used in relation to a resolution proposed by the Issuer which is not then the subject of a meeting that has been validly convened above, unless that meeting is or shall be cancelled or dissolved.

Where Electronic Consent has not been sought, for the purposes of determining whether a Written Resolution has been validly passed, the Issuer shall be entitled to rely on consent or instructions given in writing directly to the Issuer (a) by accountholders in the relevant clearing

system(s) with entitlements to any global Note and/or (b) where the accountholders hold any such entitlement on behalf of another person, on written consent from or written instruction by the person identified by that accountholder as the person for whom such entitlement is held. For the purpose of establishing the entitlement to give any such consent or instruction, the Issuer shall be entitled to rely on any certificate or other document issued by, in the case of (a) above, the relevant clearing system(s) and, in the case of (b) above, the relevant clearing system(s) and the accountholder identified by the relevant clearing system(s). Any such certificate or other document (i) shall be conclusive and binding for all purposes and (ii) may comprise any form of statement or print out of electronic records provided by the relevant clearing system (including Euroclear's EUCLID or Clearstream, Luxembourg's CreationOnline system) in accordance with its usual procedures and in which the accountholder of a particular principal or nominal amount of the Notes is clearly identified together with the amount of such holding. The Issuer shall not be liable to any person by reason of having accepted as valid or not having rejected any certificate or other document to such effect purporting to be issued by any such person and subsequently found to be forged or not authentic.

All information to be provided pursuant to paragraph (d) of Condition 13.1 shall also be provided, *mutatis mutandis*, in respect of Written Resolutions and Electronic Consents.

A Written Resolution and/or Electronic Consent (i) shall take effect as an Extraordinary Resolution and (ii) will be binding on all Noteholders, whether or not they participated in such Written Resolution and/or Electronic Consent, even if the relevant consent or instruction proves to be defective.

14. Aggregation Agent; Aggregation Procedures

14.1 Appointment

The Issuer will appoint an aggregation agent (the “**Aggregation Agent**”) to calculate whether a proposed modification or action has been approved by the required principal amount outstanding of Notes, and, in the case of a multiple series aggregation, by the required principal amount of debt securities then outstanding of each affected series of debt securities. In the case of a multiple series aggregation, the same person will be appointed as the Aggregation Agent for the proposed modification of any provision of, or any action in respect of, these Conditions or the Agency Agreement in respect of the Notes and in respect of the terms and conditions or bond documentation in respect of each other affected series of debt securities. The Aggregation Agent shall be independent of the Issuer.

14.2 Extraordinary Resolutions

If an Extraordinary Resolution has been proposed at a duly convened meeting of Noteholders to modify any provision of, or action in respect of, these Conditions and other affected series of debt securities, as the case may be, the Aggregation Agent will, as soon as practicable after the time the vote is cast, calculate whether holders of a sufficient portion of the aggregate principal amount of the outstanding Notes and, where relevant, each other affected series of debt securities, have voted in favour of the Extraordinary Resolution such that the Extraordinary Resolution is passed. If so, the Aggregation Agent will determine that the Extraordinary Resolution has been duly passed.

14.3 Written Resolutions

If a Written Resolution has been proposed under the terms of these Conditions to modify any provision of, or action in respect of, these Conditions and the terms and conditions of other affected series of debt securities, as the case may be, the Aggregation Agent will, as soon as reasonably practicable after the relevant Written Resolution has been signed or confirmed in writing, calculate whether holders of a sufficient portion of the aggregate principal amount of the outstanding Notes and, where relevant, each other affected series of debt securities, have signed or confirmed in writing in favour of the Written Resolution such that the Written Resolution is passed. If so, the Aggregation Agent will determine that the Written Resolution has been duly passed.

14.4 Electronic Consents

If approval of a resolution proposed under the terms of these Conditions to modify any provision of, or action in respect of, these Conditions and the terms and conditions of other affected series of debt securities, as the case may be, is proposed to be given by way of Electronic Consent, the Aggregation Agent will, as soon as reasonably practicable after the relevant Electronic Consent has been given, calculate whether holders of a sufficient portion of the aggregate principal amount of the Notes then outstanding and, where relevant, each other affected series of debt securities, have consented to the resolution by way of Electronic Consent such that the resolution is approved. If so, the Aggregation Agent will determine that the resolution has been duly approved.

14.5 Certificate

For the purposes of Condition 14.2, 14.3 and Condition 14.4, the Issuer will provide a certificate to the Aggregation Agent up to three days prior to, and in any case no later than, with respect to an Extraordinary Resolution, the date of the meeting referred to in Condition 13.2, Condition 13.3 or Condition 13.4, as applicable, and, with respect to a Written Resolution, the date arranged for the signing of the Written Resolution and, with respect to an Electronic Consent, the date arranged for consenting to the Electronic Consent.

The certificate shall:

- (a) list the total principal amount of Notes outstanding and, in the case of a multiple series aggregation, the total principal amount of each other affected series of debt securities outstanding on the record date; and
- (b) clearly indicate the Notes and, in the case of a multiple series aggregation, debt securities of each other affected series of debt securities which shall be disregarded and deemed not to remain outstanding as a consequence of Condition 13.9 on the record date identifying the holders of the Notes and, in the case of a multiple series aggregation, debt securities of each other affected series of debt securities.

The Aggregation Agent may rely upon the terms of any certificate, notice, communication or other document believed by it to be genuine.

14.6 Notification

The Aggregation Agent will cause each determination made by it for the purposes of this Condition 14 to be notified to the Fiscal Agent and the Issuer as soon as practicable after such determination. Notice thereof shall also promptly be given to the Noteholders.

14.7 Binding nature of determinations; no liability

All notifications, opinions, determinations, certificates, calculations, quotations and decisions given, expressed, made or obtained for the purposes of this Condition 14 by the Aggregation Agent and any appointed Calculation Agent will (in the absence of manifest error) be binding on the Issuer, the Fiscal Agent and the Noteholders and (subject as aforesaid) no liability to any such person will attach to the Aggregation Agent or the Calculation Agent in connection with the exercise or non-exercise by it of its powers, duties and discretions for such purposes.

14.8 Manner of publication

The Issuer will publish all notices and other matters required to be published pursuant to this Condition 14, including any matters required to be published pursuant to Condition 10 and Condition 13:

- (a) on the website of the National Treasury, acting on behalf of the Issuer: www.treasury.go.ke;
- (b) through the systems of Clearstream, Luxembourg, Euroclear, DTC and/or any other international or domestic clearing system(s) through which the Notes are for the time being cleared and otherwise in accordance with Condition 12; and

- (c) in such other places and in such other manner as may be required by applicable law or regulation.

15. Further Issues

The Issuer may from time to time, without the consent of the Noteholders, create and issue further notes having the same terms and conditions as the Notes in all respects (or in all respects except for the first payment of interest) so as to form a single series with the Notes.

16. Governing Law, Arbitration and Enforcement

- (a) *Governing Law:* The Agency Agreement and the Notes (including any non-contractual obligations arising from or in connection with them) are governed by, and will be construed in accordance with, English law.
- (b) *Arbitration:* Any dispute arising out of or in connection with the Notes (including any dispute as to (i) the existence of the Notes, (ii) the validity or termination of the Notes, (iii) any non-contractual obligation arising out of or in connection with the Notes, (iv) the consequences of the nullity of the Notes or (v) this Condition 16(b)) (each, a “**Dispute**”) shall be exclusively referred to and finally resolved by arbitration under the Arbitration Rules of the London Court of International Arbitration (the “**LCIA**”) (the “**Rules**”) as at present in force and as modified by this Condition 16(b), which Rules, as so modified, are deemed incorporated by reference into this Condition 16(b). The number of arbitrators shall be three, one of whom shall be appointed by the claimant(s), one by the respondent(s) and the third of whom, who shall act as chairman, shall be nominated by the two party-nominated arbitrators, provided that if the claimant(s) or respondents(s) fail to nominate an arbitrator within the time limits specified by the Rules or the party-nominated arbitrators fail to nominate a chairman within 30 days of the nomination of the second party-nominated arbitrator, such arbitrator shall be appointed promptly by the LCIA. The seat of Arbitration shall be London, England and the language of the arbitration shall be English. The parties exclude the jurisdiction of the courts under Sections 45 and 69 of the Arbitration Act 1996 (as amended by the Arbitration Act 2025).
- (c) *Appointment of Process Agent:* The Issuer has appointed the High Commissioner of the Republic of Kenya in London, presently located at 45 Portland Place, London W1B 1AS as its agent for service of process in relation to any proceedings (“**Proceedings**”) before the English courts permitted by the Rules in connection with any arbitral proceedings pursuant to Condition 16(b), or in connection with the enforcement of any arbitral award rendered pursuant to Condition 16(b) and hereby undertakes that, in the event of the High Commissioner of the Republic of Kenya ceasing so to act or ceasing to be located in England, it will appoint another person as its agent for service of process in England for such purposes as soon as reasonably practicable thereafter. Nothing in these Conditions shall affect the right to serve Proceedings in any other manner permitted by law.
- (d) *Consent to Enforcement and Waiver of Immunity:* Except as provided below in this Condition 16(d) and, without prejudice to the exclusivity of the remedies provided in Condition 16(b), to the extent the Issuer may in any jurisdiction claim for itself or its assets or revenues immunity from suit, arbitral award, judgment, execution, attachment (whether in aid of execution, before judgment or otherwise) or other legal process in respect of (i) any arbitration proceedings to resolve a Dispute under Condition 16(b) or (ii) any Proceedings, and to the extent that such immunity (whether or not claimed) may be attributed in any such jurisdiction to the Issuer or its assets or revenues, the Issuer agrees not to claim and irrevocably waives such immunity to the full extent permitted by the laws of such jurisdiction (and consents generally for the purposes of the State Immunity Act 1978 to the giving of any relief or the issue of any process in connection with any such proceedings). The Issuer does not hereby waive such immunity from execution or attachment in respect of (a) property, including any bank account, used by a diplomatic or consular mission of the Issuer or its special missions or delegations to international organisations, (b) property of a military character or in use for

military purposes and in each case under the control of a military authority or defence agency of the Issuer, (c) property located in the Republic of Kenya or (d) the assets and reserves of the Central Bank of Kenya, whether located within or outside the Republic of Kenya. The Issuer reserves the right to plead sovereign immunity under the US Foreign Sovereign Immunities Act of 1976 with respect to actions brought against it in any court of or in the United States of America under any United States federal or State securities law.

17. Rights of Third Parties

No rights are conferred on any person under the Contracts (Rights of Third Parties) Act 1999 to enforce any term of the Notes, but this does not affect any right or remedy of any person which exists or is available apart from that Act.

18. Currency Indemnity

If any sum due from the Issuer in respect of the Notes or any arbitration award or any order or judgment given or made in relation thereto has to be converted from the currency (the “**First Currency**”) in which the same is payable under these Conditions or such award, order or judgment into another currency (the “**Second Currency**”) for the purpose of (i) making or filing a claim or proof against the Issuer, (ii) obtaining an award, order or judgment in any arbitral tribunal or court or (iii) enforcing any award, order or judgment given or made in relation to the Notes, the Issuer shall indemnify each Noteholder, on the written demand of such Noteholder addressed to the Issuer and delivered to the Issuer or to the Specified Office of the Fiscal Agent, against any loss suffered as a result of any discrepancy between (x) the rate of exchange used for such purpose to convert the sum in question from the First Currency into the Second Currency and (y) the rate or rates of exchange at which such Noteholder may in the ordinary course of business purchase the First Currency with the Second Currency upon receipt of a sum paid to it in satisfaction, in whole or in part, of any such award, order, judgment, claim or proof. This indemnity constitutes a separate and independent obligation of the Issuer and shall give rise to a separate and independent cause of action.

TERMS AND CONDITIONS OF THE 2039 NOTES

The US\$1,350,000,000 8.700% Amortising Notes due 2039 (the “**Notes**”, which expression shall in these Conditions, unless the context otherwise requires, include any further notes issued pursuant to Condition 15 and forming a single series with the Notes) issued by the Republic of Kenya (the “**Issuer**”) are issued subject to and with the benefit of an agency agreement dated 26 February 2026 (such agreement as amended and/or supplemented and/or restated from time to time, the “**Agency Agreement**”) made between the Issuer, Citibank Europe plc, Germany Branch as registrar (the “**Registrar**”), Citibank, N.A., London Branch as fiscal agent and principal paying agent (the “**Fiscal Agent**”), Citibank, N.A., London Branch as transfer agent (the “**Transfer Agent**”) and the other initial paying agents named in the Agency Agreement (together with the Fiscal Agent, the “**Paying Agents**”) and the other agents named in it (together with the Fiscal Agent, the Registrar, the Transfer Agent and the other Paying Agents, the “**Agents**”). The Notes also have the benefit of a deed of covenant dated 26 February 2026 (the “**Deed of Covenant**”) executed by the Issuer in relation to the Notes.

The statements in these Conditions include summaries of, and are subject to, the detailed provisions of and definitions contained in the Agency Agreement. Copies of the Agency Agreement and the Deed of Covenant (i) are available for inspection during normal business hours by the holders of the Notes (the “**Noteholders**”) at the Specified Office (as defined in the Agency Agreement) of each of the Paying Agents, or (ii) may be provided by email to a Noteholder following their prior written request to any Paying Agent and provision of proof of holding and identity (in a form satisfactory to the relevant Paying Agent). The Noteholders are entitled to the benefit of, are bound by, and are deemed to have notice of, all the provisions of the Agency Agreement and the Deed of Covenant applicable to them. References in these Conditions to the Fiscal Agent, the Transfer Agent, the Registrar, the Paying Agents and the Agents shall include any successor appointed under the Agency Agreement.

1. Form, Denomination and Title

- (a) *Form and Denomination:* The Notes are issued in registered form in denominations of US\$200,000 and integral multiples of US\$1,000 in excess thereof (each, an “**Authorised Denomination**”). A registered note certificate (each, a “**Certificate**”) will be issued to each Noteholder in respect of its registered holding of Notes. Each Certificate will be numbered serially with an identifying number which will be recorded on the relevant Certificate and in the register of Noteholders (the “**Register**”) which the Issuer will procure to be kept by the Registrar in accordance with the provisions of the Agency Agreement.
- (b) *Title:* Title to the Notes passes only by registration in the Register. The holder of any Note will (except as otherwise required by law) be treated as its absolute owner for all purposes (whether or not it is overdue and regardless of any notice of ownership, trust or any interest or any writing on, or the theft or loss of, the Certificate issued in respect of it) and no person will be liable for so treating the holder. In these Conditions “**Noteholder**”, and in relation to a Note, “**holder**” means the person in whose name a Note is for the time being registered in the Register (or, in the case of a joint holding, the first named thereof) and “**holders**” shall be construed accordingly.

2. Transfers of Notes and Issue of Certificates

- (a) *Transfers:* Subject to Condition 2(d) and Condition 2(e), a Note may be transferred by depositing the Certificate issued in respect of that Note, with the form of transfer on the back duly completed and signed, at the Specified Office of the Registrar or any of the Transfer Agents together with such evidence as the Registrar or Transfer Agent may require to prove the title of the transferor and the authority of the individuals who have executed the form of transfer; provided however, that a Note may not be transferred unless the nominal amount of the Notes transferred and (where not all of the Notes held by a Noteholder are being transferred) the nominal amount of the Notes not transferred, are Authorised Denominations.
- (b) *Delivery of new Certificates:* Each new Certificate to be issued upon transfer or exchange of Notes will, within five business days of receipt by the Registrar or the Transfer Agent of the

duly completed form of transfer endorsed on the relevant Certificate, be mailed by uninsured mail at the risk of the holder entitled to the Note to the address specified in the form of transfer. For the purposes of this Condition 2(b), “**business day**” shall mean a day on which commercial banks are open for business in the city in which the Specified Office of the Registrar or the Transfer Agent with whom a Certificate is deposited in connection with a transfer is located.

Where some but not all of the Notes in respect of which a Certificate is issued are to be transferred a new Certificate in respect of the Notes not so transferred will, within five business days of receipt by the Registrar or the Transfer Agent of the original Certificate, be mailed by uninsured mail at the risk of the holder of the Notes not so transferred to the address of such holder appearing on the Register or as specified in the form of transfer.

- (c) *Formalities free of charge:* Registration of transfer of Notes will be effected without charge by or on behalf of the Issuer, the Registrar or any Transfer Agent but upon payment by the Noteholder (or the giving of such indemnity as the Registrar or any Agent may reasonably require) in respect of any tax or other governmental charges which may be imposed in relation to such transfer.
- (d) *Closed Periods:* No Noteholder may require the transfer of a Note to be registered during the period of 15 calendar days ending on (and including) the due date for any payment of principal or interest on that Note.
- (e) *Regulations:* All transfers of Notes and entries on the Register will be made subject to the detailed regulations concerning transfer of Notes scheduled to the Agency Agreement. The regulations may be changed by the Issuer with the prior written approval of the Registrar. A copy of the current regulations will be mailed (free of charge) by the Registrar to any Noteholder upon request.

3. Status

The Notes constitute direct, unconditional, unsubordinated and (subject to the provisions of Condition 4) unsecured obligations of the Issuer and rank, and will rank, *pari passu* and without any preference among themselves, and at least *pari passu* with all other present and future unsubordinated and (subject as provided in Condition 4) unsecured obligations of the Issuer, save only for such obligations as may be preferred by mandatory provisions of applicable law, **provided, further, that** the Issuer shall have no obligation to effect equal or rateable payment(s) at any time with respect to any such other obligations and, in particular, shall have no obligation to pay such other obligations at the same time or as a condition of paying sums due on the Notes and *vice versa*. The Notes are backed by the full faith and credit of the Issuer.

4. Negative Pledge

- (a) *Negative Pledge:* So long as any Note remains outstanding (as defined in the Agency Agreement) the Issuer will not, save for the exceptions set out below in Condition 4(c) create, incur, assume or permit to subsist any Security upon the whole or any part of its present or future assets or revenues to secure (i) any of its Public External Indebtedness, (ii) any Guarantees in respect of Public External Indebtedness or (iii) the Public External Indebtedness of any other person, without at the same time or prior thereto securing the Notes equally and rateably therewith or providing such other arrangement (whether or not comprising Security) as shall be approved by an Extraordinary Resolution of Noteholders or by a Written Resolution (as defined in Condition 13.1). For the avoidance of doubt, any such approval shall not constitute a Reserved Matter (as defined in Condition 13.5).
- (b) Interpretation: In these Conditions:
 - (i) “**Guarantee**” means any obligation of a person to pay the Indebtedness of another person including, without limitation: an obligation to pay or purchase such Indebtedness, an obligation to lend money or to purchase or subscribe shares or other

securities or to purchase assets or services in order to provide funds for the payment of such Indebtedness, an indemnity against the consequences of a default in the payment of such Indebtedness or any other agreement to be responsible for such Indebtedness;

- (ii) “**Extraordinary Resolution**” means a resolution passed at a meeting of Noteholders (whether originally convened or resumed following an adjournment) duly convened and held in accordance with Schedule 7 (*Provisions for Meetings of the Noteholders*) to the Agency Agreement by a majority of not less than three quarters of the votes cast;
 - (iii) “**Indebtedness**” means any obligation (whether present or future) for the payment or repayment of money which has been borrowed or raised (including money raised by acceptances and leasing);
 - (iv) “**person**” means any individual, company, corporation, firm, partnership, joint venture, association, organisation, trust or other juridical entity, state or agency of a state or other entity, whether or not having a separate legal personality;
 - (v) “**Public External Indebtedness**” means any Indebtedness which (i) is expressed, denominated or payable, or at the option of the relevant creditor may be payable, in any currency other than the lawful currency from time to time of the Republic of Kenya, and (ii) is in the form of, or is represented by, bonds, notes or other securities with a stated maturity of more than one year from the date of issue which are, or are capable of being, quoted, listed or ordinarily purchased or sold, dealt in or traded on any stock exchange, automated trading system, over-the-counter or other securities market; and
 - (vi) “**Security**” means any mortgage, pledge, lien, hypothecation, security interest or other charge or encumbrance including, without limitation, anything analogous to the foregoing under the laws of any jurisdiction.
- (c) *Exceptions:* The following exceptions apply to the Issuer’s obligations under Condition 4(a):
- (i) any Security upon property to secure Public External Indebtedness of the Issuer or any Guarantee by the Issuer of Public External Indebtedness of any other person incurred for the purpose of financing the acquisition or construction of such property and any renewal and extension of such Security which is limited to the original property covered thereby and which (in either case) secures any renewal or extension of the original secured financing; and
 - (ii) any Security securing Public External Indebtedness of the Issuer or any Guarantee by the Issuer of Public External Indebtedness of any other person incurred for the purpose of financing all or part of the costs of the acquisition, construction or development of a project; provided that (A) the holders of such Public External Indebtedness or Guarantee expressly agree to limit their recourse to the assets and revenues of such project or the proceeds of insurance thereon as the principal source of repayments of such Public External Indebtedness and (B) the property over which such Security is granted consists solely of such assets and revenues.

5. Interest

- (a) *Interest Rate and Interest Payment Dates:* The Notes bear interest on their outstanding principal amount from time to time (as determined in accordance with Condition 7) from and including 26 February 2026 (the “**Issue Date**”) to but excluding the Maturity Date (as defined in Condition 7(a)) at the rate of 8.700% per annum (the “**Rate of Interest**”), payable semi-annually in arrear on 26 February and 26 August in each year (each, an “**Interest Payment Date**”), subject as provided in Condition 6(d). Each period beginning on (and including) the Issue Date or any Interest Payment Date and ending on (but excluding) the next Interest Payment Date is herein called, an “**Interest Period**”.

- (b) *Interest Accrual:* Each Note will cease to bear interest from and including its due date for redemption unless, upon surrender of the Certificate representing such Note, payment of the principal in respect of the Note is improperly *withheld* or refused or unless default is otherwise made in respect of payment. In such event, interest will continue to accrue at the rate referred to in Condition 5.1(a) (both before and after judgment) until whichever is the earlier of:
- (i) the date on which all amounts due in respect of such Note up to that date have been received by or on behalf of the relevant Noteholder; and
 - (ii) the day which is seven days after the date on which the full amount of the moneys payable in respect of such Notes has been received by the Fiscal Agent and notice to that effect has been given to the Noteholders in accordance with Condition 12 (except to the extent that there is any subsequent default in payment to the relevant Noteholders).
- (c) *Calculation of Interest:* The amount of interest payable in respect of each Note for any Interest Period shall be calculated by applying the Rate of Interest to the then outstanding principal amount of such Note (as determined in accordance with Condition 7), dividing the product by two and rounding the resulting figure to the nearest cent (half a cent being rounded upwards). If interest is required to be calculated for any period other than an Interest Period, it will be calculated on the basis of a year of 360 days consisting of 12 months of 30 days each and, in the case of an incomplete month, the actual number of days elapsed.

6. Payments

- (a) *Payments in respect of Notes:* Payment of principal and interest will be made by transfer to the registered account of the Noteholder or by a cheque in US dollars drawn on a bank that processes payments in US dollars mailed to the registered address of the Noteholder if it does not have a registered account. Payment of principal will only be made against surrender of the relevant Certificate at the Specified Office of any of the Paying Agents. Interest on Notes due on an Interest Payment Date will be paid to the Noteholder shown on the Register at the close of business on the date (the “**record date**”) being the fifteenth day before the due date for the payment of interest.

For the purposes of this Condition 6(a), a Noteholder’s “**registered account**” means the US dollar account maintained by or on its behalf with a bank that processes payments in US dollars, the details of which appear on the Register at the close of business, in the case of principal, on the second Business Day (as defined below) before the due date for payment and, in the case of interest, on the relevant record date, and a Noteholder’s “**registered address**” means its address appearing on the Register at that time.

- (b) *Payments subject to Applicable Laws:* Payments in respect of principal and interest on the Notes are subject in all cases to any fiscal or other laws and regulations applicable in the place of payment, but without prejudice to the provisions of Condition 8.
- (c) *No commissions:* No commissions or expenses shall be charged to the Noteholders in respect of any payments made in accordance with this Condition 6.
- (d) *Payment on Business Days:* Where payment is to be made by transfer to a registered account, payment instructions (for value the due date or, if that is not a Business Day (as defined below), for value the first following day which is a Business Day) will be initiated and, where payment is to be made by cheque, the cheque will be mailed, on the due date for payment or, in the case of a payment of principal, if later, on the Business Day on which the relevant Certificate is surrendered at the Specified Office of an Agent. If any date for payment in respect of a Note is not a Business Day, the Noteholder shall not be entitled to payment until the next following Business Day.

Noteholders will not be entitled to any interest or other payment for any delay after the due date in receiving the amount due if the due date is not a Business Day, if the Noteholder is late in

surrendering its Certificate (if required to do so) or if a cheque mailed in accordance with this Condition 6(d) arrives after the due date for payment.

In this Condition 6, “**Business Day**” means a day (other than a Saturday or Sunday) on which commercial banks are open for general business in London, New York City and, in the case of surrender of a Certificate, in the place in which the Certificate is surrendered.

- (e) *Partial Payments*: If the amount of principal or interest which is due on the Notes is not paid in full, the Registrar will annotate the Register with a record of the amount of principal or interest in fact paid.
- (f) *Agents*: The names of the initial Agents and their initial Specified Offices are set out in the Agency Agreement. The Issuer reserves the right at any time to vary or terminate the appointment of any Agent and to appoint additional or other Agents; **provided that**, there will at all times be: (i) Fiscal Agent, (ii) such other agents as may be required by any stock exchange on which the Notes may be listed, (iii) a Registrar, and (iv) Transfer Agent.

Notice of any termination or appointment and of any changes in Specified Offices will be given to the Noteholders promptly by the Issuer in accordance with Condition 12.

- (g) In acting under the Agency Agreement and in connection with the Notes, the Agents act solely as agents of the Issuer and do not assume any obligations towards or relationship of agency or trust for or with any of the Noteholders.

7. Redemption and Purchase

- (a) *Redemption by Amortisation and Final Redemption*: Unless previously purchased and cancelled as provided below, the Issuer will redeem the Notes in three equal instalments on each amortisation date specified in column A below (each, an “**Amortisation Date**”) at the related amortisation amount specified in column B below (each, an “**Amortisation Amount**”) payable as provided in Condition 6 (*Payments*). The outstanding principal amount of the Notes shall be reduced by the Amortisation Amount so paid by the Issuer on the relevant Amortisation Date for all purposes with effect from such relevant Amortisation Date such that the outstanding aggregate principal amount of the Notes following such payment shall be as specified in column C below. If payment of the relevant Amortisation Amount is improperly withheld or refused in respect of a Note, the relevant principal amount of such Note will remain outstanding until whichever is the earlier of (i) the day on which all sums due in respect of such Note up to that day have been paid and (ii) the Business Day after the Fiscal Agent has given notice to the Noteholders that it has received all sums due in respect of such Notes up to that Business Day (except to the extent that there is any subsequent default in payment in accordance with these Conditions). The Notes shall be finally redeemed at their final Amortisation Amount payable on 26 February 2039 (the “**Maturity Date**”).

Amortisation Date (A)			Amortisation Amount (B) (US\$)	Outstanding Aggregate Principal Amount of the Notes (C) (US\$)
Interest	Payment	Date		
falling on	26 February	2037	450,000,000	900,000,000
Interest	Payment	Date		
falling on	26 February	2038	450,000,000	450,000,000
Maturity	Date		450,000,000	0

In these Conditions, references to “**principal**” shall, unless the context requires otherwise, be deemed to include any Amortisation Amount and references to the “**due date**” for payment shall, unless the context requires otherwise, be deemed to include any Amortisation Date.

In the event of any purchase and cancellation of the Notes as provided in Condition 7(b) (*Purchases and Cancellation*) below, there shall be a corresponding pro rata reduction in the remaining Amortisation Amounts payable in respect of the Notes to reflect the reduction in the outstanding aggregate principal amount of the Notes following such purchase and cancellation, as the case may be, and to provide for the redemption of the remaining Notes in corresponding instalments on each remaining Amortisation Date.

- (b) *Purchases and Cancellation*: The Issuer may at any time purchase Notes in the open market or otherwise at any price and for any consideration. All Notes so purchased may be cancelled or resold. Any Notes so purchased, while held by or on behalf of the Issuer, shall not entitle the holder of the Notes to vote at any meeting of Noteholders and shall not be deemed outstanding for the purpose of such meetings. Any Notes cancelled shall not be reissued.

8. Taxation

- (a) *Payment without Withholding*: All payments in respect of the Notes by or on behalf of the Issuer shall be made without withholding or deduction for, or on account of, any present or future taxes, duties, assessments or governmental charges of whatever nature (“**Taxes**”) imposed or levied by or on behalf of the Relevant Jurisdiction, unless the withholding or deduction of the Taxes is required by law. In that event, the Issuer will pay such additional amounts as may be necessary in order that the net amounts received by the Noteholders after the withholding or deduction shall equal the respective amounts which would have been receivable in respect of the Notes in the absence of the withholding or deduction, except that no additional amounts shall be payable in relation to any payment in respect of any Note:
- (i) held by or on behalf of a Noteholder who is liable to the Taxes in respect of such Note by reason of his having some connection with the Relevant Jurisdiction other than the mere holding of the Note; or
 - (ii) in respect of which the Certificate representing it is surrendered for payment more than 30 days after the Relevant Date (as defined below), except to the extent that the relevant Noteholder would have been entitled to such additional amounts on surrendering the Certificate representing such Note for payment on the last day of such period of 30 days assuming, whether or not such is in fact the case, that day to have been a Business Day (as defined in Condition 6).
- (b) *Interpretation*: In these Conditions:
- (i) “**Relevant Date**” in respect of any Note means the date on which the payment first becomes due but, if the full amount of the money payable has not been received by the Fiscal Agent on or before the due date, it means the date on which, the full amount of the money having been so received, notice to that effect has been duly given to the Noteholders by the Issuer in accordance with Condition 12; and
 - (ii) “**Relevant Jurisdiction**” means the Republic of Kenya or any political subdivision or any authority thereof or therein having power to tax in respect of payments in respect of the Notes.
- (c) *Additional Amounts*: Any reference in these Conditions to any amounts in respect of the Notes shall be deemed also to refer to any additional amounts which may be payable under this Condition 8.

9. Prescription

Claims against the Issuer for payment in respect of the Notes will be prescribed and become void unless made within six years (in the case of principal) and five years (in the case of interest) from the Relevant Date (as defined in Condition 8).

10. Events of Default

- (a) *Events of Default:* If any of the following events (“**Events of Default**”) shall have occurred and be continuing:
- (i) *Non-payment:* (A) the Issuer fails to pay any principal on any of the Notes when due and payable and such failure continues for a period of 15 business days; or (B) the Issuer fails to pay any interest on any of the Notes or any amount due under Condition 8 when due and payable, and such failure continues for a period of 30 days; or
 - (ii) *Breach of Other Obligations:* the Issuer does not perform or comply with any one or more of its other obligations under the Notes, the Agency Agreement or the Deed of Covenant, which default is incapable of remedy or is not remedied within 45 days following the service by any Noteholder on the Issuer of notice requiring the same to be remedied; or
 - (iii) *Cross-default:* (A) the acceleration of the maturity (other than by optional or mandatory prepayment or redemption) of any External Indebtedness of the Issuer, or (B) any default in the payment of principal of any External Indebtedness of the Issuer shall occur when and as the same shall become due and payable if such default shall continue beyond the initial grace period, if any, applicable thereto or (C) any default in the payment when due and called upon (after the expiry of any originally applicable grace period) of any Guarantee of the Issuer in respect of any External Indebtedness of any other person; provided that, the aggregate amount of the relevant External Indebtedness in respect of which one or more of the events mentioned in this paragraph (iii) have occurred equals or exceeds US\$25,000,000 or its equivalent in other currencies; or
 - (iv) *Moratorium:* a moratorium on the payment of principal of, or interest on, the External Indebtedness of the Issuer shall be declared by the Issuer; or
 - (v) *IMF Membership:* the Issuer shall cease to be a member of the International Monetary Fund (“**IMF**”) or shall cease to be eligible to use the general resources of the IMF; or
 - (vi) *Validity:* (A) the validity of the Notes shall be contested by the Issuer, or (B) the Issuer shall deny any of its obligations under the Notes (whether by a general suspension of payments or a moratorium on the payment of debt or otherwise) or (C) it shall be or become unlawful for the Issuer to perform or comply with all or any of its obligations set out in the Notes, including, without limitation, the payment of interest on the Notes, as a result of any change in law or regulation in the Republic of Kenya or any ruling of any court in the Republic of Kenya whose decision is final and unappealable or for any reason such obligations cease to be in full force and effect; or
 - (vii) *Consents:* if any authorisation, consent of, or filing or registration with, any governmental authority necessary for the performance of any payment obligation of the Issuer under the Notes, when due, ceases to be in full force and effect or remain valid and subsisting,

then the holders of at least 25% in aggregate principal amount of the Notes then outstanding may, by notice in writing to the Issuer (with a copy to the Fiscal Agent), declare all the Notes to be immediately due and payable, whereupon they shall become immediately due and payable at their outstanding principal amount (as determined in accordance with Condition 7) together with accrued interest without further action or formality. Notice of any such declaration shall promptly be given to all other Noteholders by the Issuer.

If the Issuer receives notice in writing from holders of at least 50% in aggregate principal amount of the Notes then outstanding to the effect that the Event of Default or Events of Default giving rise to any above mentioned declaration of acceleration is or are cured following any such declaration and that such holders wish the relevant declaration to be withdrawn, the Issuer

shall give notice thereof to the Noteholders (with a copy to the Fiscal Agent), whereupon the relevant declaration shall be withdrawn and shall have no further effect but without prejudice to any rights or obligations which may have arisen before the Issuer gives such notice (whether pursuant to these Conditions or otherwise). No such withdrawal shall affect any other or any subsequent Event of Default or any right of any Noteholder in relation thereto.

In this Condition 10, “**External Indebtedness**” means Indebtedness expressed or denominated or payable or which, at the option of the relevant creditor, may be payable in a currency other than the lawful currency from time to time in the Republic of Kenya.

11. Replacement of Certificates

If any Certificate is lost, stolen, mutilated, defaced or destroyed it may be replaced at the Specified Office of the Registrar upon payment by the claimant of the expenses incurred in connection with the replacement and on such terms as to evidence and indemnity as the Issuer may reasonably require. Mutilated or defaced Certificates must be surrendered before replacements will be issued.

12. Notices

All notices to the Noteholders will be valid if mailed to them at their respective addresses in the Register at the time of publication of such notice by pre-paid first class mail (or any other manner approved by the Registrar (or the Fiscal Agent on its behalf), which may be by electronic transmission). Any such notice shall be deemed to have been given on the fourth week day (being a day other than a Saturday or Sunday) after being so mailed. The Issuer shall also ensure that notices are duly published in a manner which complies with the rules of any stock exchange or other relevant authority on which the Notes are for the time being listed or by which they have been admitted to trading including publication on the website of the relevant stock exchange or relevant authority if required by those rules.

13. Meetings of Noteholders; Written Resolutions

13.1 Convening Meetings of Noteholders; Conduct of Meetings of Noteholders; Written Resolutions

- (a) The Issuer may convene a meeting of the Noteholders at any time in respect of the Notes in accordance with the Agency Agreement. The Issuer will determine the time and place of the meeting (which need not be to a physical place and instead may be to the meeting held by way of conference call or by use of a videoconference platform). The Issuer will notify the Noteholders of the time, place and purpose of the meeting not less than 21 and not more than 45 days before the meeting. References to persons being “present” at or “attending” a meeting shall include being present at or attending by means of video or telephone conference facilities.
- (b) The Issuer or the Fiscal Agent will convene a meeting of Noteholders if the holders of at least 10% in principal amount of the Notes then outstanding (as defined in the Agency Agreement and described in Condition 13.9 below) have delivered a written request to the Issuer or the Fiscal Agent (with a copy to the Issuer) setting out the purpose of the meeting. The Fiscal Agent will agree the time and place of the meeting with the Issuer promptly. The Issuer or the Fiscal Agent, as the case may be, will notify the Noteholders within 10 days of receipt of such written request of the time and place of the meeting, which shall take place not less than 21 and not more than 45 days after the date on which such notification is given.
- (c) The Issuer (with the agreement of the Fiscal Agent) will set the procedures governing the conduct of any meeting in accordance with the Agency Agreement. If the Agency Agreement does not include such procedures, or additional procedures are required, the Issuer and the Fiscal Agent will agree such procedures as are customary in the market and in such a manner as to facilitate any multiple series aggregation, if in relation to a Reserved Matter the Issuer proposes any modification to the terms and conditions of, or action with respect to, two or more series of debt securities issued by it.

- (d) The notice convening any meeting will specify, *inter alia*:
- (i) the date, time and location of the meeting;
 - (ii) the agenda and the text of any Extraordinary Resolution to be proposed for adoption at the meeting;
 - (iii) the record date for the meeting, which shall be no more than five business days before the date of the meeting;
 - (iv) the documentation required to be produced by a Noteholder in order to be entitled to participate at the meeting or to appoint a proxy to act on the Noteholder's behalf at the meeting;
 - (v) any time deadline and procedures required by any relevant international and/or domestic clearing systems or similar through which the Notes are traded and/or held by Noteholders;
 - (vi) whether Condition 13.2, or Condition 13.3, or Condition 13.4 shall apply and, if relevant, in relation to which other series of debt securities it applies;
 - (vii) if the proposed modification or action relates to two or more series of debt securities issued by the Issuer and contemplates such series of debt securities being aggregated in more than one group of debt securities, a description of the proposed treatment of each such group of debt securities;
 - (viii) such information that is required to be provided by the Issuer in accordance with Condition 13.6;
 - (ix) the identity of the Aggregation Agent and the Calculation Agent (each as defined in these Conditions), if any, for any proposed modification or action to be voted on at the meeting, and the details of any applicable methodology referred to in Condition 13.7; and
 - (x) any additional procedures which may be necessary and, if applicable, the conditions under which a multiple series aggregation will be deemed to have been satisfied if it is approved as to some but not all of the affected series of debt securities.
- (e) All information to be provided pursuant to Condition 13.1(d) shall also be provided, *mutatis mutandis*, in respect of Written Resolutions and Electronic Consents (as defined in Condition 13.12).
- (f) A “**record date**” in relation to any proposed modification or action means the date fixed by the Issuer for determining the Noteholders and, in the case of a multiple series aggregation, the holders of debt securities of each other affected series that are entitled to vote on a Multiple Series Single Limb Extraordinary Resolution or a Multiple Series Two Limb Extraordinary Resolution, or to sign a Multiple Series Single Limb Written Resolution or a Multiple Series Two Limb Written Resolution.
- (g) An “**Extraordinary Resolution**” means any of a Single Series Extraordinary Resolution, a Multiple Series Single Limb Extraordinary Resolution and/or a Multiple Series Two Limb Extraordinary Resolution, as the case may be.
- (h) A “**Written Resolution**” means any of a Single Series Written Resolution, a Multiple Series Single Limb Written Resolution and/or a Multiple Series Two Limb Written Resolution, as the case may be.
- (i) Any reference to “**debt securities**” means any notes (including the Notes), bonds, debentures or other debt securities issued by the Issuer in one or more series with an original stated maturity of more than one year.

- (j) **“Debt Securities Capable of Aggregation”** means those debt securities which include or incorporate by reference this Condition 13 and Condition 14 or provisions substantially in these terms which provide for the debt securities which include such provisions to be capable of being aggregated for voting purposes with other series of debt securities.

13.2 Modification of this Series of Notes only

- (a) Any modification of any provision of, or any action in respect of, the Notes, these Conditions, the Agency Agreement and/or the Deed of Covenant may be made or taken if approved by a Single Series Ordinary Resolution, a Single Series Extraordinary Resolution or a Single Series Written Resolution as set out below.
- (b) For the purposes of a meeting of Noteholders convened in respect of this Series of Notes only and for the purposes of passing a Single Series Ordinary Resolution and/or a Single Series Extraordinary Resolution (each as defined below) (a **“Single Series Meeting”**), at any such Single Series Meeting any one or more persons present holding Notes or proxies or representatives and holding or representing in the aggregate not less than 50% in principal amount of the Notes for the time being outstanding (or, in the case of an adjourned meeting, one or more persons present holding Notes or being proxies or representatives (whatever the principal amount of Notes so held or represented)) shall (except for the purposes of passing a Single Series Extraordinary Resolution) form a quorum for the transaction of business and no business (other than the choosing of a chairman) shall be transacted at any such Single Series Meeting unless the requisite quorum be present at the commencement of business. The quorum at any such Single Series Meeting convened for the purpose of passing a Single Series Extraordinary Resolution shall be one or more persons present holding Notes or being proxies or representatives and holding or representing in the aggregate not less than 66.67% of the principal amount of the Notes for the time being outstanding, (or, in the case of an adjourned meeting, one or more persons so present holding Notes or being proxies or representatives and holding or representing in the aggregate not less than 33.34% in the principal amount of Notes for the time being outstanding).
- (c) A **“Single Series Ordinary Resolution”** means a resolution passed at a Single Series Meeting duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Conditions 13.1 and 13.2(b) in respect of any matter other than a Reserved Matter, by a majority of at least 66.67% of the votes cast.
- (d) A **“Single Series Extraordinary Resolution”** means a resolution passed at a Single Series Meeting duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Conditions 13.1 and 13.2(b) in respect of a Reserved Matter by a majority of at least 75% of the votes cast.
- (e) A **“Single Series Written Resolution”** means a resolution in writing signed or confirmed in writing by or on behalf of the holders of:
 - (i) in the case of a Reserved Matter, at least 75% of the aggregate principal amount of the Notes then outstanding; or
 - (ii) in the case of a matter other than a Reserved Matter, at least 66.67% of the aggregate principal amount of the Notes then outstanding.

Any Single Series Written Resolution may be contained in one document or several documents in the same form, each signed or confirmed in writing by or on behalf of one or more Noteholders.

- (f) Any Single Series Ordinary Resolution, Single Series Extraordinary Resolution duly passed or Single Series Written Resolution approved shall be binding on all Noteholders, whether or not they attended such Single Series Meeting, whether or not they voted in favour thereof and whether or not they signed or confirmed in writing any such Single Series Written Resolution, as the case may be.

13.3 Multiple Series Aggregation - Single limb voting

- (a) In relation to a proposal that includes a Reserved Matter, any modification to the terms and conditions of, or any action with respect to, two or more series of Debt Securities Capable of Aggregation may be made or taken if approved by a Multiple Series Single Limb Extraordinary Resolution or by a Multiple Series Single Limb Written Resolution as set out below, **provided that** the Uniformly Applicable condition is satisfied.
- (b) A “**Multiple Series Single Limb Extraordinary Resolution**” means a resolution considered at separate meetings of the holders of each affected series of Debt Securities Capable of Aggregation, duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Condition 13.1, as supplemented if necessary, which is passed by a majority of at least 75% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate).
- (c) A “**Multiple Series Single Limb Written Resolution**” means each resolution in writing (with a separate resolution in writing or multiple separate resolutions in writing distributed to the holders of each affected series of Debt Securities Capable of Aggregation, in accordance with the applicable bond documentation) which, when taken together, has been signed or confirmed in writing by or on behalf of the holders of at least 75% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate). Any Multiple Series Single Limb Written Resolution may be contained in one document or several documents in substantially the same form, each signed or confirmed in writing by or on behalf of one or more Noteholders or one or more holders of each affected series of debt securities.
- (d) Any Multiple Series Single Limb Extraordinary Resolution duly passed or Multiple Series Single Limb Written Resolution approved shall be binding on all Noteholders and holders of each other affected series of Debt Securities Capable of Aggregation, whether or not they attended any meeting, whether or not they voted in favour thereof, whether or not any other holder or holders of the same series voted in favour thereof and whether or not they signed or confirmed in writing any such Multiple Series Single Limb Written Resolution, as the case may be.
- (e) The “**Uniformly Applicable**” condition will be satisfied if:
 - (i) the holders of all affected series of Debt Securities Capable of Aggregation are invited to exchange, convert, or substitute their debt securities, on the same terms, for (i) the same new instrument or other consideration or (ii) a new instrument, new instruments or other consideration from an identical menu of instruments or other consideration; or
 - (ii) the amendments proposed to the terms and conditions of each affected series of Debt Securities Capable of Aggregation would, following implementation of such amendments, result in the amended instruments having identical provisions (other than provisions which are necessarily different, having regard to different currency of issuance).
- (f) It is understood that a proposal under Condition 13.3(c) above will not be considered to satisfy the Uniformly Applicable condition if each exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation is not offered the same amount of consideration per amount of principal, the same amount of consideration per amount of interest accrued but unpaid and the same amount of consideration per amount of past due interest, respectively, as that offered to each other exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation (or, where a menu of instruments or other consideration is offered, each exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation is not offered the same amount of consideration per amount of principal, the same amount of consideration per amount of interest accrued but unpaid and the same amount of

consideration per amount of past due interest, respectively, as that offered to each other exchanging, converting, substituting or amending holder of each affected series of Debt Securities Capable of Aggregation electing the same option from such menu of instruments).

- (g) Any modification or action proposed under Condition 13.3(a) may be made in respect of some series only of the Debt Securities Capable of Aggregation and, for the avoidance of doubt, the provisions described in this Condition 13.3 may be used for different groups of two or more series of Debt Securities Capable of Aggregation simultaneously.

13.4 Multiple Series Aggregation - Two limb voting

- (a) In relation to a proposal that includes a Reserved Matter, any modification to the terms and conditions of, or any action with respect to, two or more series of Debt Securities Capable of Aggregation may be made or taken if approved by a Multiple Series Two Limb Extraordinary Resolution or by a Multiple Series Two Limb Written Resolution as set out below.
- (b) A “**Multiple Series Two Limb Extraordinary Resolution**” means a resolution considered at separate meetings of the holders of each affected series of Debt Securities Capable of Aggregation, duly convened and held in accordance with the procedures prescribed by the Issuer and the Fiscal Agent pursuant to Condition 13.1, as supplemented if necessary, which is passed by a majority of:
 - (i) at least 66.67% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate); and
 - (ii) more than 50% of the aggregate principal amount of the debt securities then outstanding in each affected series of Debt Securities Capable of Aggregation (taken individually).
- (c) A “**Multiple Series Two Limb Written Resolution**” means each resolution in writing (with a separate resolution in writing or multiple separate resolutions in writing distributed to the holders of each affected series of Debt Securities Capable of Aggregation, in accordance with the applicable bond documentation) which, when taken together, has been signed or confirmed in writing by or on behalf of the holders of:
 - (i) at least 66.67% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate); and
 - (ii) more than 50% of the aggregate principal amount of the debt securities then outstanding in each affected series of Debt Securities Capable of Aggregation (taken individually).

Any Multiple Series Two Limb Written Resolution may be contained in one document or several documents in substantially the same form, each signed or confirmed in writing by or on behalf of one or more Noteholders or one or more holders of each affected series of Debt Securities Capable of Aggregation.

- (d) Any Multiple Series Two Limb Extraordinary Resolution duly passed or Multiple Series Two Limb Written Resolution approved shall be binding on all Noteholders and holders of each other affected series of Debt Securities Capable of Aggregation, whether or not they attended any meeting, whether or not they voted in favour thereof, whether or not any other holder or holders of the same series voted in favour thereof and whether or not they signed or confirmed in writing any such Multiple Series Two Limb Written Resolution, as the case may be.
- (e) Any modification or action proposed under Condition 13.4(a) may be made in respect of some series only of the Debt Securities Capable of Aggregation and, for the avoidance of doubt, the provisions described in this Condition 13.4 may be used for different groups of two or more series of Debt Securities Capable of Aggregation simultaneously.

13.5 Reserved Matters

In these Conditions, “**Reserved Matter**” means any proposal:

- (a) to change the dates, or the method of determining the dates, for payment of principal, interest or any other amount in respect of the Notes, to reduce or cancel the amount of principal, interest or any other amount payable on any date in respect of the Notes or to change the method of calculating the amount of principal, interest or any other amount payable in respect of the Notes on any date;
- (b) to change the currency in which any amount due in respect of the Notes is payable or the place in which any payment is to be made;
- (c) to change the majority or quorum required to pass a Single Series Ordinary Resolution, an Electronic Consent, an Extraordinary Resolution, a Written Resolution or any other resolution of Noteholders or the number or percentage of votes required to be cast, or the number or percentage of Notes required to be held, in connection with the taking of any decision or action by or on behalf of the Noteholders or any of them;
- (d) to change this definition, or the definition of “Electronic Consent”, “Extraordinary Resolution”, “Single Series Ordinary Resolution”, “Single Series Extraordinary Resolution”, “Multiple Series Single Limb Extraordinary Resolution”, “Multiple Series Two Limb Extraordinary Resolution”, “Written Resolution”, “Single Series Written Resolution”, “Multiple Series Single Limb Written Resolution” or “Multiple Series Two Limb Written Resolution”;
- (e) to change the definition of “debt securities” or “Debt Securities Capable of Aggregation”;
- (f) to change the definition of “Uniformly Applicable”;
- (g) to change the definition of “outstanding” set out in the Agency Agreement or to modify the provisions of Condition 13.9;
- (h) to change the legal ranking of the Notes;
- (i) to change any provision of the Notes describing circumstances in which Notes may be declared due and payable prior to their scheduled maturity date, set out in Condition 10;
- (j) to change the law governing the Notes, the arbitral tribunals to the jurisdiction of which the Issuer has submitted in the Notes, the Issuer’s obligation to maintain an agent for service of process in England, any of the arrangements specified in the Notes to enable proceedings to be taken or the Issuer’s waiver of immunity, in respect of actions or proceedings brought by any Noteholder, set out in Condition 16;
- (k) to impose any condition on or otherwise change the Issuer’s obligation to make payments of principal, interest or any other amount in respect of the Notes, including by way of the addition of a call option;
- (l) to modify the provisions of this Condition 13.5;
- (m) except as permitted by any related guarantee or security agreement, to release any agreement guaranteeing or securing payments under the Notes or to change the terms of any such guarantee or security; or
- (n) to exchange or substitute all the Notes for, or convert all the Notes into, other obligations or securities of the Issuer or any other person, or to modify any provision of these Conditions in connection with any exchange or substitution of the Notes for, or the conversion of the Notes into, any other obligations or securities of the Issuer or any other person, which would result in

the Conditions as so modified being less favourable to the Noteholders which are subject to the Conditions as so modified than:

- (i) the provisions of the other obligations or debt securities of the Issuer or any other person resulting from the relevant exchange or substitution or conversion; or
- (ii) if more than one series of other obligations or debt securities results from the relevant exchange or substitution or conversion, the provisions of the resulting series of debt securities having the largest aggregate principal amount.

13.6 Information

Prior to or on the date that the Issuer proposes any Extraordinary Resolution or Written Resolution pursuant to Condition 13.2, Condition 13.3 or Condition 13.4, the Issuer shall publish in accordance with Condition 14, and provide the Fiscal Agent with the following information:

- (a) a description of the Issuer's economic and financial circumstances which are, in the Issuer's opinion, relevant to the request for any potential modification or action, a description of the Issuer's existing debts and a description of its broad policy reform programme and provisional macroeconomic outlook;
- (b) if the Issuer shall at the time have entered into an arrangement for financial assistance with multilateral and/or other major creditors or creditor groups and/or an agreement with any such creditors regarding debt relief, a description of any such arrangement or agreement;
- (c) a description of the Issuer's proposed treatment of external debt securities that fall outside the scope of any multiple series aggregation and its intentions with respect to any other debt securities and its other major creditor groups; and
- (d) if any proposed modification or action contemplates debt securities being aggregated in more than one group of debt securities, a description of the proposed treatment of each such group, as required for a notice convening a meeting of the Noteholders in Condition 13.1(d)(vii).

13.7 Claims Valuation

For the purpose of calculating the par value of the Notes and any affected series of debt securities which are to be aggregated with the Notes in accordance with Condition 13.3 and Condition 13.4, the Issuer may appoint a calculation agent (the "**Calculation Agent**"). The Issuer shall, with the approval of the Aggregation Agent and any appointed Calculation Agent, promulgate the methodology in accordance with which the Calculation Agent will calculate the par value of the Notes and such affected series of debt securities. In any such case where a Calculation Agent is appointed, the same person will be appointed as the Calculation Agent for the Notes and each other affected series of debt securities for these purposes, and the same methodology will be promulgated for each affected series of debt securities.

13.8 Manifest error, etc.

The Notes, these Conditions and the provisions of the Agency Agreement may be amended by the Issuer and the Fiscal Agent without the consent of the Noteholders either (i) for the purpose of curing any ambiguity or of curing, correcting or supplementing any manifest or proven error or any other defective provision contained herein or therein or (ii) in any other manner which is, in the sole opinion of the Issuer, not materially prejudicial to the interests of the Noteholders. Any such modification shall be binding on the Noteholders and shall be notified by the Issuer to the Noteholders as soon as practicable thereafter in accordance with Condition 12.

13.9 Notes controlled by the Issuer

For the purposes of (a) determining the right to attend and vote at any meeting of Noteholders, the right to give an Electronic Consent, or the right to sign or confirm in writing, or authorise the signature of, any Written Resolution, (b) this Condition 12 and (c) Condition 10, any Notes which are for the time being held by or on behalf of the Issuer or by or on behalf of any person which is owned or controlled

directly or indirectly by the Issuer or by any public sector instrumentality of the Issuer shall be deemed not to remain outstanding, where:

- (a) “**public sector instrumentality**” means the Central Bank of Kenya, any other department, ministry or agency of the government of the Republic of Kenya or any corporation, trust, financial institution or other entity owned or controlled by the government of the Republic of Kenya or any of the foregoing; and
- (b) “**control**” means the power, directly or indirectly, through the ownership of voting securities or other ownership interests or through contractual control or otherwise, to direct the management of or elect or appoint a majority of the board of directors or other persons performing similar functions in lieu of, or in addition to, the board of directors of a corporation, trust, financial institution or other entity.

A Note will also be deemed to be not outstanding if the Note has previously been cancelled or delivered for cancellation or held for reissuance but not reissued, or, where relevant, the Note has previously been called for redemption in accordance with its terms or previously become due and payable at maturity or otherwise and the Issuer has previously satisfied its obligations to make all payments due in respect of the Note in accordance with its terms.

In advance of any meeting of Noteholders, or in connection with any Electronic Consent or Written Resolution, the Issuer shall provide to the Fiscal Agent a copy of the certificate prepared pursuant to Condition 14.5, which includes information on the total number of Notes which are for the time being held by any person (including but not limited to the Issuer) on behalf of the Issuer or by any public body owned or controlled, directly or indirectly, by the Issuer or by any public sector instrumentality of the Issuer and, as such, such Notes shall be disregarded and deemed not to remain outstanding for the purposes of ascertaining the right to attend and vote at any meeting of Noteholders or the right to sign, or authorise the signature of, any Written Resolution in respect of any such meeting. The Fiscal Agent shall make any such certificate available for inspection during normal business hours at its Specified Office and, upon reasonable request, will allow copies of such certificate to be taken.

13.10 Publication

The Issuer shall publish all Extraordinary Resolutions, Electronic Consents and Written Resolutions which have been determined by the Aggregation Agent to have been duly passed in accordance with Condition 14.8.

13.11 Exchange and Conversion

Any Extraordinary Resolutions, Electronic Consents or Written Resolutions which have been duly passed and which modify any provision of, or action in respect of, the Conditions may be implemented at the Issuer’s option by way of a mandatory exchange or conversion of the Notes and each other affected series of debt securities, as the case may be, into new debt securities containing the modified terms and conditions if the proposed mandatory exchange or conversion of the Notes is notified to Noteholders at the time notification is given to the Noteholders as to the proposed modification or action. Any such exchange or conversion shall be binding on all Noteholders.

13.12 Written Resolutions and Electronic Consents

A Written Resolution may be contained in one document or in several documents in like form, each signed by or on behalf of one or more of the Noteholders.

For so long as any Notes are in the form of a global Note held on behalf of one or more of Euroclear Bank SA/NV (“**Euroclear**”), Clearstream Banking S.A. (“**Clearstream, Luxembourg**”), The Depository Trust Company (“**DTC**”) or any other clearing system (the “**relevant clearing system(s)**”), then:

- (a) Approval of a resolution proposed by the Issuer given by way of electronic consent communicated through the electronic communications systems of the relevant clearing system(s) in accordance with their operating rules and procedures (i) by or on behalf of all

Noteholders who for the time being are entitled to receive notice of a meeting of Noteholders or (ii) (where such holders have been given at least 21 days' notice of such resolution) by or on behalf of:

- (A) in respect of a proposal that falls within paragraphs (c), (d) and (e) of Condition 13.2, the persons holding at least 75% of the aggregate principal amount of the Notes then outstanding in the case of a Reserved Matter or at least 66.67% of the aggregate principal amount of the Notes then outstanding, in the case of a matter other than a Reserved Matter;
- (B) in respect of a proposal that falls within paragraphs (b) and (c) of Condition 13.3, the persons holding at least 75% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate);
- (C) in respect of a proposal that falls within paragraphs (b) and (c) of Condition 13.4, (x) the persons holding at least 66.67% of the aggregate principal amount of the debt securities then outstanding of all affected series of Debt Securities Capable of Aggregation (taken in aggregate); and (y) the persons holding more than 50% of the aggregate principal amount of the debt securities then outstanding in each affected series of Debt Securities Capable of Aggregation (taken individually),

(in the case of (A), (B) and (C), each an “**Electronic Consent**”) shall, for all purposes (including Reserved Matters) take effect as (i) a Single Series Extraordinary Resolution (in the case of (A) above), (ii) a Multiple Series Single Limb Extraordinary Resolution (in the case of (B) above) or (iii) a Multiple Series Two Limb Extraordinary Resolution (in the case of (C) above), as applicable.

The notice given to Noteholders shall specify, in sufficient detail to enable Noteholders (in the case of a proposal pursuant to Condition 13.2) or holders of each affected series of Debt Securities Capable of Aggregation (in the case of a proposal pursuant to Condition 13.3 or 13.4) to give their consents in relation to the proposed resolution, the method by which their consents may be given (including, where applicable, blocking of their accounts in the relevant clearing system(s)) and the time and date (the “**Relevant Date**”) by which they must be received in order for such consents to be validly given, in each case subject to and in accordance with the operating rules and procedures of the relevant clearing system(s).

If, on the Relevant Date on which the consents in respect of an Electronic Consent are first counted, such consents do not represent the required proportion for approval, the resolution shall, if the party proposing such resolution (the “**Proposer**”) so determines, be deemed to be defeated. Alternatively, the Proposer may give a further notice to Noteholders (in the case of a proposal pursuant to Condition 13.2) or holders of each affected series of Debt Securities Capable of Aggregation (in the case of a proposal pursuant to Condition 13.3 or 13.4) that the resolution will be proposed again on such date and for such period as shall be agreed with the Issuer (unless the Issuer is the Proposer). Such notice must inform Noteholders (in the case of a proposal pursuant to Condition 13.2) or holders of each affected series of Debt Securities Capable of Aggregation (in the case of a proposal pursuant to Condition 13.3 or 13.4) that insufficient consents were received in relation to the original resolution and the information specified in the previous paragraph. For the purpose of such further notice, references to “**Relevant Date**” shall be construed accordingly.

An Electronic Consent may only be used in relation to a resolution proposed by the Issuer which is not then the subject of a meeting that has been validly convened above, unless that meeting is or shall be cancelled or dissolved.

Where Electronic Consent has not been sought, for the purposes of determining whether a Written Resolution has been validly passed, the Issuer shall be entitled to rely on consent or instructions given in writing directly to the Issuer (a) by accountholders in the relevant clearing

system(s) with entitlements to any global Note and/or (b) where the accountholders hold any such entitlement on behalf of another person, on written consent from or written instruction by the person identified by that accountholder as the person for whom such entitlement is held. For the purpose of establishing the entitlement to give any such consent or instruction, the Issuer shall be entitled to rely on any certificate or other document issued by, in the case of (a) above, the relevant clearing system(s) and, in the case of (b) above, the relevant clearing system(s) and the accountholder identified by the relevant clearing system(s). Any such certificate or other document (i) shall be conclusive and binding for all purposes and (ii) may comprise any form of statement or print out of electronic records provided by the relevant clearing system (including Euroclear's EUCLID or Clearstream, Luxembourg's CreationOnline system) in accordance with its usual procedures and in which the accountholder of a particular principal or nominal amount of the Notes is clearly identified together with the amount of such holding. The Issuer shall not be liable to any person by reason of having accepted as valid or not having rejected any certificate or other document to such effect purporting to be issued by any such person and subsequently found to be forged or not authentic.

All information to be provided pursuant to paragraph (d) of Condition 13.1 shall also be provided, *mutatis mutandis*, in respect of Written Resolutions and Electronic Consents.

A Written Resolution and/or Electronic Consent (i) shall take effect as an Extraordinary Resolution and (ii) will be binding on all Noteholders, whether or not they participated in such Written Resolution and/or Electronic Consent, even if the relevant consent or instruction proves to be defective.

14. Aggregation Agent; Aggregation Procedures

14.1 Appointment

The Issuer will appoint an aggregation agent (the “**Aggregation Agent**”) to calculate whether a proposed modification or action has been approved by the required principal amount outstanding of Notes, and, in the case of a multiple series aggregation, by the required principal amount of debt securities then outstanding of each affected series of debt securities. In the case of a multiple series aggregation, the same person will be appointed as the Aggregation Agent for the proposed modification of any provision of, or any action in respect of, these Conditions or the Agency Agreement in respect of the Notes and in respect of the terms and conditions or bond documentation in respect of each other affected series of debt securities. The Aggregation Agent shall be independent of the Issuer.

14.2 Extraordinary Resolutions

If an Extraordinary Resolution has been proposed at a duly convened meeting of Noteholders to modify any provision of, or action in respect of, these Conditions and other affected series of debt securities, as the case may be, the Aggregation Agent will, as soon as practicable after the time the vote is cast, calculate whether holders of a sufficient portion of the aggregate principal amount of the outstanding Notes and, where relevant, each other affected series of debt securities, have voted in favour of the Extraordinary Resolution such that the Extraordinary Resolution is passed. If so, the Aggregation Agent will determine that the Extraordinary Resolution has been duly passed.

14.3 Written Resolutions

If a Written Resolution has been proposed under the terms of these Conditions to modify any provision of, or action in respect of, these Conditions and the terms and conditions of other affected series of debt securities, as the case may be, the Aggregation Agent will, as soon as reasonably practicable after the relevant Written Resolution has been signed or confirmed in writing, calculate whether holders of a sufficient portion of the aggregate principal amount of the outstanding Notes and, where relevant, each other affected series of debt securities, have signed or confirmed in writing in favour of the Written Resolution such that the Written Resolution is passed. If so, the Aggregation Agent will determine that the Written Resolution has been duly passed.

14.4 Electronic Consents

If approval of a resolution proposed under the terms of these Conditions to modify any provision of, or action in respect of, these Conditions and the terms and conditions of other affected series of debt securities, as the case may be, is proposed to be given by way of Electronic Consent, the Aggregation Agent will, as soon as reasonably practicable after the relevant Electronic Consent has been given, calculate whether holders of a sufficient portion of the aggregate principal amount of the Notes then outstanding and, where relevant, each other affected series of debt securities, have consented to the resolution by way of Electronic Consent such that the resolution is approved. If so, the Aggregation Agent will determine that the resolution has been duly approved.

14.5 Certificate

For the purposes of Condition 14.2, 14.3 and Condition 14.4, the Issuer will provide a certificate to the Aggregation Agent up to three days prior to, and in any case no later than, with respect to an Extraordinary Resolution, the date of the meeting referred to in Condition 13.2, Condition 13.3 or Condition 13.4, as applicable, and, with respect to a Written Resolution, the date arranged for the signing of the Written Resolution and, with respect to an Electronic Consent, the date arranged for consenting to the Electronic Consent.

The certificate shall:

- (a) list the total principal amount of Notes outstanding and, in the case of a multiple series aggregation, the total principal amount of each other affected series of debt securities outstanding on the record date; and
- (b) clearly indicate the Notes and, in the case of a multiple series aggregation, debt securities of each other affected series of debt securities which shall be disregarded and deemed not to remain outstanding as a consequence of Condition 13.9 on the record date identifying the holders of the Notes and, in the case of a multiple series aggregation, debt securities of each other affected series of debt securities.

The Aggregation Agent may rely upon the terms of any certificate, notice, communication or other document believed by it to be genuine.

14.6 Notification

The Aggregation Agent will cause each determination made by it for the purposes of this Condition 14 to be notified to the Fiscal Agent and the Issuer as soon as practicable after such determination. Notice thereof shall also promptly be given to the Noteholders.

14.7 Binding nature of determinations; no liability

All notifications, opinions, determinations, certificates, calculations, quotations and decisions given, expressed, made or obtained for the purposes of this Condition 14 by the Aggregation Agent and any appointed Calculation Agent will (in the absence of manifest error) be binding on the Issuer, the Fiscal Agent and the Noteholders and (subject as aforesaid) no liability to any such person will attach to the Aggregation Agent or the Calculation Agent in connection with the exercise or non-exercise by it of its powers, duties and discretions for such purposes.

14.8 Manner of publication

The Issuer will publish all notices and other matters required to be published pursuant to this Condition 14, including any matters required to be published pursuant to Condition 10 and Condition 13:

- (a) on the website of the National Treasury, acting on behalf of the Issuer: www.treasury.go.ke;
- (b) through the systems of Clearstream, Luxembourg, Euroclear, DTC and/or any other international or domestic clearing system(s) through which the Notes are for the time being cleared and otherwise in accordance with Condition 12; and

- (c) in such other places and in such other manner as may be required by applicable law or regulation.

15. Further Issues

The Issuer may from time to time, without the consent of the Noteholders, create and issue further notes having the same terms and conditions as the Notes in all respects (or in all respects except for the first payment of interest) so as to form a single series with the Notes.

16. Governing Law, Arbitration and Enforcement

- (a) *Governing Law:* The Agency Agreement and the Notes (including any non-contractual obligations arising from or in connection with them) are governed by, and will be construed in accordance with, English law.
- (b) *Arbitration:* Any dispute arising out of or in connection with the Notes (including any dispute as to (i) the existence of the Notes, (ii) the validity or termination of the Notes, (iii) any non-contractual obligation arising out of or in connection with the Notes, (iv) the consequences of the nullity of the Notes or (v) this Condition 16(b)) (each, a “**Dispute**”) shall be exclusively referred to and finally resolved by arbitration under the Arbitration Rules of the London Court of International Arbitration (the “**LCIA**”) (the “**Rules**”) as at present in force and as modified by this Condition 16(b), which Rules, as so modified, are deemed incorporated by reference into this Condition 16(b). The number of arbitrators shall be three, one of whom shall be appointed by the claimant(s), one by the respondent(s) and the third of whom, who shall act as chairman, shall be nominated by the two party-nominated arbitrators, provided that if the claimant(s) or respondents(s) fail to nominate an arbitrator within the time limits specified by the Rules or the party-nominated arbitrators fail to nominate a chairman within 30 days of the nomination of the second party-nominated arbitrator, such arbitrator shall be appointed promptly by the LCIA. The seat of Arbitration shall be London, England and the language of the arbitration shall be English. The parties exclude the jurisdiction of the courts under Sections 45 and 69 of the Arbitration Act 1996 (as amended by the Arbitration Act 2025).
- (c) *Appointment of Process Agent:* The Issuer has appointed the High Commissioner of the Republic of Kenya in London, presently located at 45 Portland Place, London W1B 1AS as its agent for service of process in relation to any proceedings (“**Proceedings**”) before the English courts permitted by the Rules in connection with any arbitral proceedings pursuant to Condition 16(b), or in connection with the enforcement of any arbitral award rendered pursuant to Condition 16(b) and hereby undertakes that, in the event of the High Commissioner of the Republic of Kenya ceasing so to act or ceasing to be located in England, it will appoint another person as its agent for service of process in England for such purposes as soon as reasonably practicable thereafter. Nothing in these Conditions shall affect the right to serve Proceedings in any other manner permitted by law.
- (d) *Consent to Enforcement and Waiver of Immunity:* Except as provided below in this Condition 16(d) and, without prejudice to the exclusivity of the remedies provided in Condition 16(b), to the extent the Issuer may in any jurisdiction claim for itself or its assets or revenues immunity from suit, arbitral award, judgment, execution, attachment (whether in aid of execution, before judgment or otherwise) or other legal process in respect of (i) any arbitration proceedings to resolve a Dispute under Condition 16(b) or (ii) any Proceedings, and to the extent that such immunity (whether or not claimed) may be attributed in any such jurisdiction to the Issuer or its assets or revenues, the Issuer agrees not to claim and irrevocably waives such immunity to the full extent permitted by the laws of such jurisdiction (and consents generally for the purposes of the State Immunity Act 1978 to the giving of any relief or the issue of any process in connection with any such proceedings). The Issuer does not hereby waive such immunity from execution or attachment in respect of (a) property, including any bank account, used by a diplomatic or consular mission of the Issuer or its special missions or delegations to international organisations, (b) property of a military character or in use for

military purposes and in each case under the control of a military authority or defence agency of the Issuer, (c) property located in the Republic of Kenya or (d) the assets and reserves of the Central Bank of Kenya, whether located within or outside the Republic of Kenya. The Issuer reserves the right to plead sovereign immunity under the US Foreign Sovereign Immunities Act of 1976 with respect to actions brought against it in any court of or in the United States of America under any United States federal or State securities law.

17. Rights of Third Parties

No rights are conferred on any person under the Contracts (Rights of Third Parties) Act 1999 to enforce any term of the Notes, but this does not affect any right or remedy of any person which exists or is available apart from that Act.

18. Currency Indemnity

If any sum due from the Issuer in respect of the Notes or any arbitration award or any order or judgment given or made in relation thereto has to be converted from the currency (the “**First Currency**”) in which the same is payable under these Conditions or such award, order or judgment into another currency (the “**Second Currency**”) for the purpose of (i) making or filing a claim or proof against the Issuer, (ii) obtaining an award, order or judgment in any arbitral tribunal or court or (iii) enforcing any award, order or judgment given or made in relation to the Notes, the Issuer shall indemnify each Noteholder, on the written demand of such Noteholder addressed to the Issuer and delivered to the Issuer or to the Specified Office of the Fiscal Agent, against any loss suffered as a result of any discrepancy between (x) the rate of exchange used for such purpose to convert the sum in question from the First Currency into the Second Currency and (y) the rate or rates of exchange at which such Noteholder may in the ordinary course of business purchase the First Currency with the Second Currency upon receipt of a sum paid to it in satisfaction, in whole or in part, of any such award, order, judgment, claim or proof. This indemnity constitutes a separate and independent obligation of the Issuer and shall give rise to a separate and independent cause of action.

THE GLOBAL NOTES

The Global Notes contain the following provisions which apply to the Notes in respect of which they are issued while they are represented by the Global Notes, some of which modify the effect of the Terms and Conditions of the Notes. Terms defined in the Terms and Conditions of the Notes have the same meaning in paragraphs 1 to 6 below.

1. Accountholders

For so long as any of the Notes are represented by one or more Global Notes, each person (other than another clearing system) who is for the time being shown in the records of DTC or Euroclear or Clearstream, Luxembourg (as the case may be) as the holder of a particular aggregate principal amount of such Notes (each an “**Accountholder**”) (in which regard any certificate or other document issued by DTC or Euroclear or Clearstream, Luxembourg (as the case may be) as to the aggregate principal amount of such Notes standing to the account of any person shall be conclusive and binding for all purposes) shall be treated as the holder of such aggregate principal amount of such Notes (and the expression “**Noteholders**” and references to “**holding of Notes**” and to “**holder of Notes**” shall be construed accordingly) for all purposes other than with respect to payments on such Notes, the right to which shall be vested, as against Kenya, solely in the nominee for the relevant clearing system (the “**Relevant Nominee**”) in accordance with and subject to the terms of the Global Notes. Each Accountholder must look solely to DTC or Euroclear or Clearstream, Luxembourg, as the case may be, for its share of each payment made to the Relevant Nominee.

2. Cancellation

Cancellation of any Note following its purchase by Kenya will be effected by reduction in the aggregate principal amount of the Notes in the register of Noteholders.

3. Payments

Payments of principal and interest in respect of Notes represented by a Global Note will be made upon presentation or, in the case of payment of principal, against presentation and surrender of such Global Note to or to the order of the Fiscal Agent, or such other Agent as shall have been notified to the holders of one or more Global Note for such purpose.

Distributions of amounts with respect to book-entry interests in the Notes held through Euroclear or Clearstream, Luxembourg will be credited, to the extent received by the Fiscal Agent, to the cash accounts of Euroclear or Clearstream, Luxembourg participants in accordance with the relevant system’s rules and procedures.

Holders of book-entry interests in the Notes held through DTC will receive, to the extent received by the Fiscal Agent, all distributions of amounts with respect to book-entry interests in such Notes from the Fiscal Agent through DTC. Distributions in the United States will be subject to relevant US tax laws and regulations.

For the purposes of Condition 6.1 (*Payments in respect of Notes*), so long as the Notes as evidenced by a Global Note are held on behalf of Euroclear and/or Clearstream, Luxembourg and/or DTC, the record date in respect of the Notes shall be the close of the business day (being for this purpose a day on which each clearing system for which the Global Note is being held is open for business) before the relevant due date.

A record of each payment made will be entered in the register of Noteholders by or on behalf of the Fiscal Agent and shall be *prima facie* evidence that payment has been made.

4. Notices

So long as the Notes are represented by a Global Note and such Global Note is held on behalf of a clearing system, notices to Noteholders may be given by delivery of the relevant notice to that clearing system for communication by it to entitled Accountholders in substitution for notification as required by Condition 12 (*Notices*) as set forth herein, **provided that**, so long as the Notes are listed on any stock exchange notices shall also be published in accordance with the rules of such exchange. See “*Terms and Conditions of the Notes*”. Any such notice shall be deemed to have been given to the Noteholders on the day after the day on which such notice is delivered to such clearing system.

While any of the Notes held by a Noteholder are represented by a Global Note, notices to be given by such Noteholder may be given by such Noteholder (where applicable) through the applicable clearing system’s operational procedure approved for this purpose and otherwise in such manner as the Fiscal Agent and the applicable clearing system may approve for this purpose.

5. Registration of Title

The Global Note will be exchangeable (free of charge to the holder) in whole but not in part for Certificates only upon the occurrence of an Exchange Event. An Exchange Event means that:

- (a) an Event of Default (as defined in Condition 10) has occurred and is continuing;
- (b) in the case of Notes registered in the name of a Relevant Nominee for DTC, the Issuer has been notified by DTC that DTC is unwilling or unable to continue to act as depositary with respect to the Global Note and no alternative clearing system is available or DTC has ceased to constitute a clearing agency registered under the US Securities Exchange Act of 1934 (as amended, the “**Exchange Act**”); or
- (c) in the case of Notes registered in the name of a Relevant Nominee for a common depositary for Euroclear and Clearstream, Luxembourg, the Issuer has been notified that both Euroclear or Clearstream, Luxembourg have been closed for business for a continuous period of 14 days (other than by reason of holiday, statutory or otherwise) or have announced an intention permanently to cease business or have in fact done so and no successor clearing system is available.

The Issuer will promptly give notice to the Noteholders in accordance with Condition 12 if an Exchange Event occurs. In the event of the occurrence of an Exchange Event, DTC, Euroclear and/or Clearstream, Luxembourg or any person acting on their behalf (acting on the instructions of any Accountholder) may give notice to the Registrar requesting exchange. Any exchange shall occur no later than ten days after the date of receipt of the first relevant notice by the Registrar.

The Registrar will not register title to the Notes in a name other than that of the Relevant Nominee for a period of fifteen calendar days preceding the due date for any payment of principal or interest in respect of the Notes.

If only one of the Global Notes (the “**Exchanged Global Note**”) becomes exchangeable for Certificates in accordance with the above paragraphs, transfers of Notes may not take place between, on the one hand, persons holding Certificates issued in exchange for beneficial interests in the Exchanged Global Note and, on the other hand, persons wishing to purchase beneficial interests in the other Global Note.

In the event that:

- (d) the Notes as evidenced by the Global Note (or any part of it) have become due and repayable in accordance with the Conditions or that the maturity date of the Notes has occurred and, in either case, payment in full of the amount due has not been made to the Relevant Nominee; or
- (e) following an Exchange Event, the Global Note is not duly exchanged for Certificates by the day provided in the Global Note, then from 8.00 p.m. (London time) on such day each Accountholder will become entitled to proceed directly against the Issuer on, and subject to,

the terms of a deed of covenant dated 26 February 2026 (a “**Deed of Covenant**”) executed by the Issuer in respect of the Notes and the Relevant Nominee will have no further rights under the Global Note (but without prejudice to the rights any person may have under a Deed of Covenant).

6. Transfers

Transfers of book-entry interests in the Notes will be effected through the records of Euroclear, Clearstream, Luxembourg and DTC and their respective participants in accordance with the rules and procedures of Euroclear, Clearstream, Luxembourg and DTC and their respective direct and indirect participants, as more fully described under “Clearing and Settlement Arrangements”.

CLEARING AND SETTLEMENT ARRANGEMENTS

Kenya has obtained the information in this section from sources it believes to be reliable, including from DTC, Euroclear and Clearstream, Luxembourg. Kenya confirms that it has accurately reproduced such information and that, so far as it is aware and is able to ascertain from information published by third parties, it has omitted no facts which would render the reproduced information inaccurate or misleading. Kenya takes no responsibility, however, for the accuracy of this information. Although DTC, Euroclear and Clearstream, Luxembourg have agreed to the following procedures in order to facilitate transfers of interests in the Unrestricted Global Note and in the Restricted Global Note amongst participants of DTC, Euroclear and Clearstream, Luxembourg, they are under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued at any time. Neither Kenya nor the Fiscal Agent will have any responsibility for the performance by DTC, Euroclear or Clearstream, Luxembourg or their respective participants or indirect participants of their respective obligations under the rules and procedures governing their operations.

DTC

DTC is a limited-purpose trust company organised under the New York Banking Law, a “banking organisation” within the meaning of the New York Banking Law, a member of the Federal Reserve System, a “clearing corporation” within the meaning of the New York Uniform Commercial Code and a “clearing agency” registered pursuant to the provisions of Section 17A of the Exchange Act. DTC was created to hold securities for its participating organisations (“**DTC Participants**”) and to facilitate the clearance and settlement of securities transactions between DTC Participants through electronic book-entry changes in accounts of its DTC Participants, thereby eliminating the need for physical movement of certificates. DTC Participants include securities brokers and dealers, brokers, banks, trust companies and clearing corporations and may include certain other organisations, indirect access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (“**Indirect DTC Participants**”).

Because DTC can only act on behalf of DTC Participants, who in turn act on behalf of Indirect DTC Participants and certain banks, the ability of a person having a beneficial interest in a note to pledge such interest to persons or entities that do not participate in the DTC system, or otherwise take actions in respect of such interest, may be affected by the lack of a physical certificate of such interest. The Rules applicable to DTC and its Participants are on file with the US Securities and Exchange Commission.

Euroclear and Clearstream, Luxembourg

Euroclear and Clearstream, Luxembourg hold securities for participating organisations, and facilitate the clearance and settlement of securities transactions between their respective participants, through electronic book-entry changes in accounts of such participants. Euroclear and Clearstream, Luxembourg provide to their participants, amongst other things, services for safekeeping, administration, clearance and settlement of internationally traded securities and securities lending and borrowing. Euroclear and Clearstream, Luxembourg interface with domestic securities markets. Euroclear and Clearstream, Luxembourg participants are recognised financial institutions such as underwriters, securities brokers and dealers, banks, trust companies and certain other organisations and include the Joint Bookrunners. Indirect access to Euroclear or Clearstream, Luxembourg is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodian relationship with a Euroclear or Clearstream, Luxembourg participant, either directly or indirectly.

Book-Entry Ownership

Euroclear and Clearstream, Luxembourg

The Unrestricted Global Notes will have an ISIN and a Common Code and will be registered in the name of a nominee for, and deposited with a common depository on behalf of Euroclear and Clearstream, Luxembourg. The address of Euroclear is 1 Boulevard du Roi Albert II. B1210 Brussels, Belgium, and the address of Clearstream, Luxembourg is 42 Avenue J.F. Kennedy. L-1855, Luxembourg.

DTC

The Restricted Global Notes will have a CUSIP number and will be deposited with a custodian (the “**Custodian**”) for and registered in the name of Cede & Co., as nominee of DTC. The Custodian and DTC will electronically record the principal amount of the Notes held within the DTC system. The address of the DTC is 55 Water Street, New York, New York 10041, USA.

Relationship of Participants with Clearing Systems

Each of the persons shown in the records of Euroclear, Clearstream, Luxembourg or DTC as the holder of a Note evidenced by a Global Note must look solely to Euroclear, Clearstream, Luxembourg or DTC (as the case may be) for his share of each payment made by Kenya to the holder of such Global Note and in relation to all other rights arising under the Global Note, subject to and in accordance with the respective rules and procedures of Euroclear, Clearstream, Luxembourg or DTC (as the case may be). Kenya expects that, upon receipt of any payment in respect of Notes evidenced by a Global Note, the common depositary by whom such Global Note is held, or nominee in whose name it is registered, will immediately credit the relevant participants’ or account holders’ accounts in the relevant clearing system with payments in amounts proportionate to their respective beneficial interests in the principal amount of the relevant Global Note as shown on the records of the relevant clearing system or its nominee. Kenya also expects that payments by direct participants in any clearing system to owners of beneficial interests in any Global Note held through such direct participants in any clearing system will be governed by standing instructions and customary practices. Save as aforesaid, such persons shall have no claim directly against Kenya in respect of payments due on the Notes for so long as the Notes are evidenced by such Global Note and the obligations of Kenya will be discharged by payment to the registered holder of such Global Note in respect of each amount so paid. None of Kenya, the Fiscal Agent or any agent will have any responsibility or liability for any aspect of the records relating to or payments made on account of ownership interests in any Global Note or for maintaining, supervising or reviewing any records relating to such ownership interests.

Settlement and Transfer of Notes

Subject to the rules and procedures of each applicable clearing system, purchases of Notes held within a clearing system must be made by or through direct participants, which will receive a credit for such Notes on the clearing system’s records. The ownership interest of each actual purchaser of each such Note (the “**Beneficial Owner**”) will in turn be recorded on the direct and indirect participants’ records. Beneficial Owners will not receive written confirmation from any clearing system of their purchase, but Beneficial Owners are expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the direct or indirect participant through which such Beneficial Owner entered into the transaction. Transfers of ownership interests in Notes held within the clearing system will be effected by entries made on the books of participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in such Notes, unless and until interests in any Global Note held within a clearing system are exchanged for interests evidenced by a definitive note certificate.

No clearing system has knowledge of the actual Beneficial Owners of the Notes held within such clearing system and their records will reflect only the identity of the direct participants to whose accounts such Notes are credited, which may or may not be the Beneficial Owners. The participants will remain responsible for keeping account of their holdings on behalf of their customers. Conveyance of notices and other communications by the clearing systems to direct participants, by direct participants to indirect participants, and by direct participants and indirect participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

The laws of some jurisdictions may require that certain persons take physical delivery in definitive form of securities. Consequently, the ability to transfer interests in a Global Note to such persons may be limited. Because DTC can only act on behalf of DTC Participants, who in turn act on behalf of Indirect DTC Participants, the ability of a person having an interest in a Restricted Global Note to pledge such interest to persons or entities that do not participate in DTC, or otherwise take actions in respect of such interest, may be affected by a lack of physical certificate in respect of such interest.

Investors that hold their interests in the Notes through DTC will follow the settlement practices applicable to global bond issues. Investors' securities custody accounts will be credited with their holdings against payment in same-day funds on the settlement date.

Investors that hold their interests in the Notes through Clearstream, Luxembourg or Euroclear accounts will follow the settlement procedures applicable to conventional Eurobonds in registered form. The interests will be credited to the securities custody accounts on the settlement date against payment in same-day funds.

Secondary Market Trading

Since the purchaser determines the place of delivery, it is important to establish at the time of trade where both the purchaser's and seller's accounts are located to ensure that settlement can be made on the desired value date.

Trading between DTC Participants

Secondary market trading between DTC Participants will be settled using the procedures applicable to global bond issues in same-day funds.

Trading between Euroclear and/or Clearstream, Luxembourg participants

Secondary market trading between Euroclear participants and/or Clearstream, Luxembourg participants will be settled using the procedures applicable to conventional Eurobonds in same-day funds.

Trading between DTC seller and Euroclear or Clearstream, Luxembourg purchaser

When Notes are to be transferred from the account of a DTC Participant to the account of a Clearstream, Luxembourg or Euroclear participant, the purchaser will send instructions to Clearstream, Luxembourg or Euroclear through a Clearstream, Luxembourg or Euroclear participant, as the case may be, at least one business day prior to settlement. Clearstream, Luxembourg or the Euroclear operator will instruct its respective depository to receive the Notes against payment. Payment will include interest accrued on such beneficial interest on the Note from and including the last interest payment date to and excluding the settlement date. Payment will then be made by the depository to the DTC Participant's account against delivery of Notes. After settlement has been completed, the Notes will be credited to the respective clearing system, and by the clearing system, in accordance with its usual procedures, to the Clearstream, Luxembourg or Euroclear participant's account. The securities credit will appear the next day (European time) and the cash debit will be back-valued to, and the interest on the Note will accrue from, the value date (which would be the preceding day when settlement occurred in New York). If settlement is not completed on the intended value date (i.e., the trade fails), the Clearstream, Luxembourg or Euroclear cash debit will be valued instead as of the actual settlement date.

Euroclear and Clearstream, Luxembourg participants will need to make available to the respective clearing system the funds necessary to process same-day funds settlement. The most direct means of doing so is to pre-position funds for settlement, either from cash on-hand or existing lines of credit. Under this approach, participants may take on credit exposure to the Euroclear operator or Clearstream, Luxembourg until the interests in the Note are credited to their accounts one day later.

As an alternative, if Clearstream, Luxembourg or Euroclear has extended a line of credit to a Clearstream, Luxembourg or Euroclear participant, as the case may be, such participant may elect not to pre-position funds and may allow that credit line to be drawn upon to finance settlement. Under this procedure, Clearstream, Luxembourg participants or Euroclear participants purchasing interests in a Note would incur overdraft charges for one day, assuming they cleared the overdraft when the interest in the Note were credited to their accounts. However, interest on the Note would accrue from the value date. Therefore, in many cases, the investment income on the interest in the Note would accrue from the value date. Therefore, in many cases, the investment income on the interest in the Note earned during that one-day period may substantially reduce or offset the amount of such overdraft charges, although this result will depend on each participant's particular cost of funds.

Since the settlement is taking place during New York business hours, DTC Participants can employ their usual procedures for transferring interests in the Global Notes to the respective depositories of Clearstream, Luxembourg or Euroclear for the benefit of Clearstream, Luxembourg participants or

Euroclear participants. The sale proceeds will be available to the DTC seller on the settlement date. Thus, to the DTC Participants, a cross-market sale transaction will settle no differently than a trade between two DTC Participants.

Trading between Clearstream, Luxembourg or Euroclear Seller and DTC purchaser

Due to time zones differences in their favour, Clearstream, Luxembourg and Euroclear participants may employ their customary procedures for transactions in which interests in a Note are to be transferred by their respective clearing system, through its respective depository, to a DTC Participant, as the case may be, at least one business day prior to settlement. In these cases, Clearstream, Luxembourg or Euroclear will instruct its respective depository to deliver the interest in the Note to the DTC Participant's account against payment. Payment will include interest accrued on such beneficial interest in the Note from and including the interest payment date to and excluding the settlement date. The payment will then be reflected in the account of the Clearstream, Luxembourg participant or Euroclear participant the following day, and receipt of the cash proceeds in the Clearstream, Luxembourg or Euroclear participant's account would be back-valued at the value date (which would be the preceding day, when settlement occurred in New York). Should the Clearstream, Luxembourg or Euroclear participant have a line of credit in its respective clearing system and elect to be in debit in anticipation of receipt of the sale proceeds in its account, the back-valuation will extinguish any overdraft charges occurred over that one-day period. If settlement is not completed on the intended value date (i.e., the trade fails), receipt of the cash proceeds in the Clearstream, Luxembourg or Euroclear participant's account would instead be valued as of the actual settlement date.

Finally, day traders that use Clearstream, Luxembourg or Euroclear to purchase interests in a Note from DTC Participants for delivery to Clearstream, Luxembourg participants or Euroclear participants should note that these trades will automatically fail on the sale side unless affirmative action is taken. At least three techniques should be readily available to eliminate this potential problem:

- borrowing through Clearstream, Luxembourg or Euroclear for one day (until the purchase side of the day trade is reflected in their Clearstream, Luxembourg or Euroclear accounts) in accordance with the clearing system's customary procedures;
- borrowing the interests in the United States from a DTC Participant no later than one day prior to settlement, which would give the interests sufficient time to be reflected in their Clearstream, Luxembourg or Euroclear account in order to settle the sale side of the trade; or
- staggering the value date for the buy and sell sides of the trade so that the value date for the purchase from the DTC Participant is at least one day prior to the value date for the sale to the Clearstream, Luxembourg participant or Euroclear participant.

TRANSFER RESTRICTIONS

Because of the following restrictions, purchasers are advised to consult legal counsel prior to making any offer, resale, pledge or other transfer of the Notes offered hereby.

The Notes have not been registered under the Securities Act, and may not be offered or sold in the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. Accordingly, the Notes are being offered and sold (1) in the United States only to persons reasonably believed to be QIBs within the meaning of Rule 144A under the Securities Act and (2) outside the United States in offshore transactions pursuant to Regulation S under the Securities Act. Terms used herein that are defined in Rule 144A or Regulation S under the Securities Act are used herein as defined therein, as applicable.

General

Transfers will be subject to the transfer restrictions contained in the legend appearing on the face of such Note, as set out below.

The Restricted Global Notes will bear a legend substantially identical to that set out below, and neither a Restricted Global Note nor any beneficial interest in the Restricted Global Notes may be transferred except in compliance with the transfer restrictions set forth in such legend.

A beneficial interest in the Restricted Global Notes may be transferred to a person who wishes to take delivery of such beneficial interest through the Unrestricted Global Notes only upon receipt by the Registrar of a written certification from the transferor (in the form scheduled to the applicable Agency Agreement) to the effect that such transfer is being made in accordance with Regulation S or Rule 144 (if available) under the Securities Act.

Any beneficial interest in either the Restricted Global Notes or the Unrestricted Global Notes that is transferred to a person who takes delivery in the form of a beneficial interest in the other Global Note will, upon transfer, cease to be a beneficial interest in such Global Note and become a beneficial interest in the other Global Note and, accordingly, will thereafter be subject to all transfer restrictions and other procedures applicable to a beneficial interest in such other Global Note for so long as such person retains such an interest.

Kenya is a foreign government as defined in Rule 405 under the Securities Act and is eligible to register securities on Schedule B of the Securities Act. Therefore Kenya is not subject to the information provision requirements of Rule 144A(d)(4)(i) under the Securities Act.

Restricted Notes

Each purchaser of Restricted Notes within the United States, by accepting delivery of this Offering Circular, will be deemed to have represented, agreed and acknowledged as follows:

1. the purchaser (i) is a QIB, (ii) is acquiring the Notes for its own account or for the account of a QIB and (iii) is meeting the requirements of Rule 144A whom the seller has notified, in each case, that the offer, resale, pledge or other transfer is being made in reliance on Rule 144A, (B) in an offshore transaction in accordance with Rule 903 or Rule 904 of Regulation S, (C) pursuant to an exemption from registration under the Securities Act provided by Rule 144 thereunder (if available) or (D) to Kenya; in each case in accordance with any applicable securities laws of any state of the United States, and (ii) no representation can be made as to the availability at any time of the exemption provided by Rule 144 for the resale of the Notes;
3. the purchaser agrees that it will deliver to each person to whom it transfers Notes notice of any restriction on transfer of such Notes;
4. the purchaser understands that the Restricted Notes offered hereby will bear a legend to the following effect, unless Kenya determines otherwise in accordance with applicable law:

THIS SECURITY HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE "SECURITIES ACT"), OR ANY OTHER APPLICABLE U.S. STATE SECURITIES LAWS OR WITH ANY SECURITIES REGULATORY AUTHORITY OF ANY STATE OR OTHER JURISDICTION OF THE UNITED STATES AND,

ACCORDINGLY, THE SECURITIES MAY NOT BE OFFERED OR SOLD WITHIN THE UNITED STATES EXCEPT AS SET FORTH IN THE FOLLOWING SENTENCE. BY ITS ACQUISITION HEREOF, THE HOLDER (A) REPRESENTS THAT IT IS A “QUALIFIED INSTITUTIONAL BUYER” (AS DEFINED IN RULE 144A UNDER THE SECURITIES ACT) (“QIB”), PURCHASING THE SECURITIES FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF ONE OR MORE QIBs; (B) AGREES THAT IT WILL NOT RESELL OR OTHERWISE TRANSFER THE SECURITIES EXCEPT IN ACCORDANCE WITH THE AGENCY AGREEMENT AND, PRIOR TO EXPIRATION OF THE APPLICABLE REQUIRED HOLDING PERIOD DETERMINED PURSUANT TO RULE 144 OF THE SECURITIES ACT FROM THE LATER OF THE ISSUE DATE AND THE LAST DATE ON WHICH THE ISSUER OR AN AFFILIATE OF THE ISSUER WAS THE OWNER OF SUCH SECURITIES OTHER THAN (1) TO THE ISSUER OR ANY AFFILIATE THEREOF, (2) INSIDE THE UNITED STATES TO A PERSON WHOM THE SELLER AND ANY PERSON ACTING ON ITS BEHALF REASONABLY BELIEVES IS A QIB WITHIN THE MEANING OF RULE 144A UNDER THE SECURITIES ACT PURCHASING FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF A QUALIFIED INSTITUTIONAL BUYER IN A TRANSACTION MEETING THE REQUIREMENTS OF RULE 144A, (3) OUTSIDE THE UNITED STATES IN COMPLIANCE WITH RULE 903 OR RULE 904 UNDER THE SECURITIES ACT, (4) PURSUANT TO THE EXEMPTION FROM REGISTRATION PROVIDED BY RULE 144 UNDER THE SECURITIES ACT (IF AVAILABLE) OR (5) PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT UNDER THE SECURITIES ACT, IN EACH CASE IN ACCORDANCE WITH ALL APPLICABLE SECURITIES LAWS OF THE STATES OF THE UNITED STATES AND ANY OTHER JURISDICTION; AND (C) IT AGREES THAT IT WILL DELIVER TO EACH PERSON TO WHOM THIS SECURITY IS TRANSFERRED A NOTICE SUBSTANTIALLY TO THE EFFECT OF THIS LEGEND. NO REPRESENTATION CAN BE MADE AS TO THE AVAILABILITY OF THE EXEMPTION PROVIDED BY RULE 144 FOR REALES OF THE SECURITY.

THIS SECURITY AND RELATED DOCUMENTATION (INCLUDING, WITHOUT LIMITATION, THE AGENCY AGREEMENT REFERRED TO HEREIN) MAY BE AMENDED OR SUPPLEMENTED FROM TIME TO TIME, WITHOUT THE CONSENT OF, BUT UPON NOTICE TO, THE HOLDERS OF SUCH SECURITIES SENT TO THEIR REGISTERED ADDRESSES, TO MODIFY THE RESTRICTIONS ON AND PROCEDURES FOR REALES AND OTHER TRANSFERS OF THIS SECURITY TO REFLECT ANY CHANGE IN APPLICABLE LAW OR REGULATION (OR THE INTERPRETATION THEREOF) OR IN PRACTICES RELATING TO REALES OR OTHER TRANSFERS OF RESTRICTED SECURITIES GENERALLY. THE HOLDER OF THIS SECURITY SHALL BE DEEMED, BY ITS ACCEPTANCE OR PURCHASE HEREOF, TO HAVE AGREED TO ANY SUCH AMENDMENT OR SUPPLEMENT (EACH OF WHICH SHALL BE CONCLUSIVE AND BINDING ON THE HOLDER HEREOF AND ALL FUTURE HOLDERS OF THIS SECURITY AND ANY SECURITIES ISSUED IN EXCHANGE OR SUBSTITUTION THEREFOR, WHETHER OR NOT ANY NOTATION THEREOF IS MADE HEREON).

UNLESS THIS GLOBAL NOTE IS PRESENTED BY AN AUTHORISED REPRESENTATIVE OF THE DEPOSITORY TRUST COMPANY, A NEW YORK CORPORATION (“DTC”), TO THE ISSUER OR ITS AGENT FOR REGISTRATION OF TRANSFER, EXCHANGE OR PAYMENT, AND ANY REGISTERED NOTE ISSUED IN EXCHANGE FOR THIS GLOBAL NOTE OR ANY PORTION HEREOF IS REGISTERED IN THE NAME OF CEDE & CO. OR IN SUCH OTHER NAME AS IS REQUIRED BY AN AUTHORISED REPRESENTATIVE OF DTC (AND ANY PAYMENT IS MADE TO CEDE & CO. OR TO SUCH OTHER ENTITY AS IS REQUESTED BY AN AUTHORISED REPRESENTATIVE OF DTC), ANY TRANSFER, PLEDGE, OR OTHER USE HEREOF FOR VALUE OR OTHERWISE BY OR TO ANY PERSON OTHER THAN DTC OR A NOMINEE THEREOF IS WRONGFUL IN AS MUCH AS THE REGISTERED OWNER HEREOF, CEDE & CO., HAS AN INTEREST HEREIN.

THIS GLOBAL SECURITY MAY NOT BE EXCHANGED, IN WHOLE OR IN PART, FOR A SECURITY REGISTERED IN THE NAME OF ANY PERSON OTHER THAN THE DEPOSITORY TRUST COMPANY OR A NOMINEE THEREOF EXCEPT IN THE LIMITED CIRCUMSTANCES SET FORTH IN THIS GLOBAL SECURITY, AND MAY NOT BE TRANSFERRED, IN WHOLE

OR IN PART, EXCEPT IN ACCORDANCE WITH THE RESTRICTIONS SET FORTH IN THIS LEGEND. BENEFICIAL INTERESTS IN THIS GLOBAL SECURITY MAY NOT BE TRANSFERRED EXCEPT IN ACCORDANCE WITH THIS LEGEND.

5. the purchaser understands that Notes offered in reliance on Rule 144A will be represented by a Restricted Global Note. Before any interest in a Note represented by a Restricted Global Note may be offered, sold, pledged or otherwise transferred to a person who takes delivery in the form of an interest in an Unrestricted Global Note, it will be required to provide the Registrar with a written certification (in the form provided in the Agency Agreement) as to compliance with applicable securities laws; and
6. it understands that the Issuer, the Registrar, the Joint Bookrunners, their respective affiliates and others will rely upon the truth and accuracy of the foregoing acknowledgements, representations and agreements;
7. it acknowledges that neither the Issuer, the Joint Bookrunners nor any person representing the Issuer or the Joint Bookrunners, has made any representation to it with respect to the Issuer or the offer or sale of any of the Notes, other than (in the case of the Issuer) the information contained in this Offering Circular. It acknowledges that the Joint Bookrunners make no representation or warranty as to the accuracy or completeness of this Offering Circular.

Prospective purchasers are hereby notified that sellers of the Notes may be relying on the exemption from the provisions of Section 5 of the Securities Act provided by Rule 144A.

Unrestricted Notes

Each purchaser of Notes outside the United States pursuant to Regulation S, by accepting delivery of this Offering Circular and the Unrestricted Notes, will be deemed to have represented, agreed and acknowledged as follows:

1. it is, or at the time Unrestricted Notes are purchased will be, the beneficial owner of such Unrestricted Notes; it is located outside the United States (within the meaning of Regulation S), and it is not an affiliate of Kenya or a person acting on behalf of such an affiliate;
2. such Unrestricted Notes have not been and will not be registered under the Securities Act and may not be offered, sold, pledged or otherwise transferred within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act;
3. the Notes offered in reliance on Regulation S will be represented by the Unrestricted Global Notes;
4. the Notes, while represented by the Unrestricted Global Notes, or if issued in exchange for an interest in the Unrestricted Global Notes or for Note Certificates, will bear a legend to the following effect:

THIS SECURITY HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE “**SECURITIES ACT**”), OR ANY OTHER APPLICABLE U.S. STATE SECURITIES LAWS AND, ACCORDINGLY, MAY NOT BE OFFERED OR SOLD WITHIN THE UNITED STATES EXCEPT IN ACCORDANCE WITH THE AGENCY AGREEMENT AND PURSUANT TO AN EXEMPTION FROM REGISTRATION UNDER THE SECURITIES ACT OR PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT UNDER THE SECURITIES ACT.

5. it understands that the Issuer, the Registrar, the Joint Bookrunners, their respective affiliates and others will rely upon the truth and accuracy of the foregoing acknowledgements, representations and agreements; and
6. if it is acquiring any Notes for the account of one or more investor accounts, the purchaser represents that it has sole investment discretion with respect to each such account and that it has full power to make the foregoing acknowledgements, representations and agreements on behalf of each such account;
7. it acknowledges that neither the Issuer, the Joint Bookrunners nor any person representing the Issuer or the Joint Bookrunners, has made any representation to it with respect to the Issuer or the offer or sale of any of the Notes, other than (in the case of the Issuer) the information contained in this Offering

Circular. It acknowledges that the Joint Bookrunners make no representation or warranty as to the accuracy or completeness of this Offering Circular.

TAXATION

The following is a general description of certain tax considerations relating to the Notes. It does not purport to be a complete analysis of all tax considerations relating to the Notes. Prospective purchasers of Notes should consult their tax advisers as to the consequences under the tax laws of the country of which they are resident for tax purposes and the tax laws of the Republic of Kenya of acquiring, holding and disposing of Notes and receiving payments of interest, principal and/or other amounts under the Notes. This summary is based upon the law in effect on the date of this Offering Circular and is subject to any change in law that may take effect after such date.

The Republic of Kenya

Income tax in the Republic of Kenya is charged under the provisions of the Income Tax Act (Chapter 470, Laws of the Republic of Kenya) (the “**ITA**”). Pursuant to section 3 of the ITA, income tax is chargeable on all the income of a person, whether resident or non-resident, which accrued in or was derived from the Republic of Kenya. Interest payable on the Notes is exempted from income tax under section 13(2) of the ITA by virtue of the Legal Notice 86/2014 dated 18 June 2014, as amended by the Legal Notice 45/2018 dated 8 February 2018 (together, the “**Income Tax Exemption**”). The Income Tax Exemption was effected upon publication in the Kenya Gazette and was laid before Parliament in accordance with the Statutory Instruments Act, 2013.

The legality of Section 13(2) of the ITA had been impugned by the High Court on 17 February 2023, in the Constitutional Petition No. E280 of 2021, where the Court declared Section 13 (2) of the ITA as unconstitutional to the extent that it authorises income tax waivers through a notice in the Gazette. The Petition had challenged, among others, the constitutionality of the Cabinet Secretary’s action to grant income tax exemption on income accrued in or derived from Kenya by foreign entities. The High Court was of the view that an exemption or waiver of income tax can only be granted by the National Assembly through national legislation that would require a public record of each waiver and the reason for the waiver and each waiver and the reason for it be reported to the Auditor General. The import of the judgment in Constitutional Petition No. E280 of 2021 was that the Cabinet Secretary could not grant tax exemptions through gazette notices, consequently rendering the exemptions potentially legally invalid.

However, the Court of Appeal in National Assembly & Another vs Eliud Karanja Matindi & 4 Others Civil Appeal No. E326 of 2023 (consolidated with Civil Appeal E330 of 2023 The Cabinet Secretary, Ministry of National Treasury & Planning & Another v Eliud Karanja Matindi & 3 Others (Court of Appeal) (30 December 2024) reaffirmed the legality of the exemptions and restored the Cabinet Secretary’s authority under Section 13 (2) of the Income Tax Act to grant income tax exemptions through legal notices. Accordingly, the prevailing jurisprudence is based on the Court of Appeal’s decision wherein the enabling provision (as read together with the legal notices) is operational. This position would need to be reassessed should there be a different finding on appeal to the Supreme Court.

Notwithstanding whether the decision of the Court of Appeal is overturned by the Supreme Court, if the Income Tax Exemption is modified or revoked by Parliament or otherwise ceases to be in force for any reason, interest income earned on the Notes by a person, whether resident or non-resident, could become subject to income tax in the Republic of Kenya. In such circumstances, the Government would be obliged to deduct withholding tax at the rate then prevailing. The current rate applicable to interest income is 15% of the gross amount payable. Under the terms and conditions of the Notes, the Issuer is required to pay additional amounts so that the Noteholders will receive the full net amount which they would otherwise have received had there been no deduction of income tax.

Capital gains tax was reintroduced in the Republic of Kenya by the Finance Act, 2014, with effect from 1 January 2015. Chargeable gains or allowable losses may arise upon the transfer of Notes. The current applicable rate is 15% (as a final tax) of the chargeable gain. Capital gains that accrue on a transfer of the Notes have been exempted from capital gains tax under section 13(2) of the ITA by virtue of the Legal Notice 44/2018 dated 8 February 2018 (the “**Capital Gains Tax Exemption**” and together with the Income Tax Exemption, the “**Legal Notices**”). The Capital Gains Tax Exemption came into effect upon publication in the Kenya Gazette and has been laid before Parliament in accordance with the Statutory Instruments Act, 2013. Similar to the Income Tax Exemption, the prevailing jurisprudence is based on the Court of Appeal’s decision wherein Section 13(2) of the ITA (as read together with the legal notices) is operational. This position would need to be reassessed should there be a different finding on the pending appeal to the Supreme Court.

Finally, Section 89 of the Finance Act, 2023 proposed to repeal Section 21(1) of the Statutory Instruments Act, which until then provided that any statutory instrument would automatically be revoked after ten (10) years unless exempted from expiry under Section 21(2). However, Section 89 of the Finance Act 2023 was declared unconstitutional by the High Court under Petition Number E181 of 2023 on the basis the amendment is extraneous to a money bill. On appeal, the Court of Appeal relied on the doctrine of mootness in deciding the matter given that the introduction of the Statutory Instruments (Amendment) Bill, 2024, provided for the same amendments as Section 89 of the Finance Act, 2023. This position was upheld by the Supreme Court, which did not expressly reverse the decision of the High Court declaring Section 89 of the Finance Act No.4 of 2023 (repealing Section 21 of the Statutory Instruments Act) as unconstitutional.

The Statutory Instruments (Amendment) Act, 2024, which received presidential assent on 11 December 2024 and commenced on 27 December 2024, does not address the deletion of Section 21 of the Statutory Instruments Act. As a result, the applicable provisions on the expiry of statutory instruments, such as the Legal Notices, remain in place. Resultantly, whilst the Legal Notices remain in effect and are valid, they would still be subject to the automatic revocation provided for in the Statutory Instruments Act, (as amended by the Finance Act No. 22 of 2022) subject to the enactment of legislation stipulating otherwise, or gazettment of a new legal notice extending the period of application.

United States Federal Income Taxation

The following is a summary of certain US federal income tax consequences to original purchasers of the Notes of the purchase, ownership and disposition of the Notes by a US Holder (as defined below). This summary is based upon tax laws of the United States, including the Internal Revenue Code of 1986, as amended (the “Code”), its legislative history, existing and proposed Treasury Regulations thereunder, published rulings and court decisions, all as of the date hereof and all subject to change at any time, possibly with retroactive effect. No assurances can be given that any changes in these laws or authorities will not affect the accuracy of the discussions set forth in this summary.

This summary does not purport to discuss all aspects of US federal income taxation that may be relevant to, or the actual tax effect that any of the matters described herein will have on, the acquisition, ownership or disposition of Notes by a particular investor in light of that investor’s individual circumstances, such as investors subject to special tax rules (e.g., financial institutions, insurance companies, dealers in securities or currencies, investors liable for the alternative minimum tax, US Holders whose functional currency is not the US dollar, US expatriates and former citizens or long-term residents of the United States, accrual method taxpayers that are required to include certain amounts in income no later than the time such amounts are reflected on certain financial statements, individual retirement accounts and other tax-deferred accounts, certain securities and currency traders, regulated investment companies, real estate investment trusts, pension plans, tax-exempt organisations, partnerships or other pass through entities for US federal income tax purposes or investors in such entities, and investors that hold Notes as a position in a “straddle,” “conversion,” “hedging,” “integrated” or “constructive sale” transaction for US federal income tax purposes). In addition, this summary does not discuss any non-US, state, or local tax considerations or non-income taxes (such as US estate and gift taxes), nor does it discuss the 3.8% US federal tax on net investment income. This summary only applies to investors that acquire Notes as part of the initial offering at their issue price (generally the first price at which a substantial amount of the Notes is sold for money to the public, not including purchases by bond houses, brokers or similar persons or organisations acting in the capacity of underwriters, placement agents or wholesalers) and hold Notes as “capital assets” (generally, property held for investment) within the meaning of the Code. This summary does not address the tax consequences to a US Holder that also tenders 2028 Notes or 2032 Notes in the Tender Offer.

For purposes of this summary, the term “**US Holder**” means a beneficial owner of a Note who, for US federal income tax purposes, is an individual citizen or resident of the United States, a corporation created or organised in or under the laws of the United States, any state of the United States or the District of Columbia, an estate whose income is subject to US federal income tax regardless of its source or a trust if a court within the United States is able to exercise primary supervision over the administration of the trust and one or more “United States persons,” as defined for US federal income tax purposes, have the authority to control all substantial decisions of the trust or the trust has a valid election in effect to be treated as a United States person.

If a partnership (or other entity or arrangement treated as a partnership for US federal income tax purposes) holds the Notes, the tax treatment of a partner in such partnership will generally depend upon the status of the

partner and the activities of the partnership. Prospective purchasers that are treated as partnerships for US federal income tax purposes should consult their tax advisers concerning the US federal income tax consequences to them and to their partners of the acquisition, ownership and disposition of Notes by the partnership.

THE SUMMARY OF US FEDERAL INCOME TAX CONSEQUENCES SET OUT BELOW IS FOR GENERAL INFORMATION ONLY. ALL PROSPECTIVE PURCHASERS SHOULD CONSULT THEIR TAX ADVISERS AS TO THE PARTICULAR TAX CONSEQUENCES TO THEM OF ACQUIRING, OWNING, AND DISPOSING OF THE NOTES, INCLUDING THE APPLICABILITY AND EFFECT OF STATE, LOCAL, NON-US AND OTHER TAX LAWS AND POSSIBLE CHANGES IN TAX LAW.

Payments of Interest and Additional Amounts

Payments of interest on a Note generally will be taxable to a US Holder as ordinary income at the time they are received or accrued, depending on the US Holder's regular method of tax accounting. In addition to interest on a Note, if withholding taxes are imposed on payments of interest, the Issuer may be required to pay additional amounts to US Holders so that US Holders receive the same amounts they would have received had no withholding taxes been imposed. If taxes are withheld from a payment of interest on the Notes, a US Holder will be required to include the amount of any such tax withheld as ordinary income, even though such holder did not in fact receive it, as well as any additional amounts paid in respect of such tax withheld.

Any Kenyan withholding tax paid in respect of a payment of interest to a US Holder on the Notes may be eligible for a foreign tax credit (or a deduction in lieu of such credit) for US federal income tax purposes. However, there are significant complex limitations on a US Holder's ability to claim such a credit or deduction. US Holders are urged to consult their tax advisors regarding the creditability or deductibility of any withholding taxes under their particular circumstances.

It is expected and this discussion assumes that, for US federal Income tax purposes, the Notes will be issued with less than a de minimis amount of original issue discount.

Sale, Exchange, Retirement or Other Taxable Disposition of a Note

A US Holder generally will recognise gain or loss upon the sale, exchange, retirement or other taxable disposition of a Note in an amount equal to the difference between the amount realised upon that sale, exchange, retirement or other taxable disposition (other than amounts representing accrued and unpaid interest, which will be taxable as interest income to the extent not previously included in income) and the US Holder's adjusted tax basis in the Note. The amount realised is the sum of cash plus the fair market value of any property received upon the sale, exchange, retirement or other taxable disposition of a Note. A US Holder's adjusted tax basis in a Note generally will equal the US Holder's initial investment in the Note, reduced by the amount of any payments (including repayments of principal) received by such US Holder other than payments of qualified stated interest. Gain or loss on the sale, exchange, retirement or other taxable disposition of a Note generally will be capital gain or loss and will be long-term capital gain or loss if the Note is held by the US Holder for more than one year. Capital gains of certain non-corporate US Holders, including individuals, with respect to capital assets held for more than one year, may be eligible for reduced rates of taxation. The deductibility of capital losses is subject to significant limitations.

Any capital gain or loss recognised on the sale, exchange, retirement or other taxable disposition of a Note by a US Holder generally will be treated as income or loss from sources within the United States for foreign tax credit limitation purposes. Therefore, US Holders may not be able to claim a credit for any Kenyan tax imposed upon a sale, exchange, retirement or other taxable disposition of a Note unless (subject to special limits) such holder has other income from foreign sources and certain other requirements are met. There are significant complex limitations on a US Holder's ability to claim such a credit or any deduction in lieu of such credit. US Holders are urged to consult their tax advisors regarding the creditability or deductibility of any Kenyan taxes imposed on the sale, exchange, retirement or other taxable disposition of a Note under their particular circumstances.

Further Issues

The Issuer may from time to time, without the consent of the Noteholders, create and issue further notes having the same terms and conditions as the Notes in all respects (or in all respects except for the first payment of interest) so as to form a single series with the Notes. See “*Terms and Conditions of the Notes—Further Issues.*”

US Holders should note that additional securities that are treated as a single issuance or series for non-tax purposes may not necessarily be treated as part of the same “issue” for US federal income tax purposes. In such case, the new securities may be considered to have been issued with original issue discount, as defined in the Code, and the applicable Treasury Regulations issued thereunder, which may affect the market value of the Notes since such additional securities may not be distinguishable from the Notes.

Information with Respect to Foreign Financial Assets

US Holders that own “specified foreign financial assets,” including debt of foreign entities, with an aggregate value in excess of \$50,000 on the last day of the taxable year, or \$75,000 at any time during the taxable year generally will be required to file information reports with respect to such assets with their US federal income tax returns. Depending on the US Holder’s circumstances, higher threshold amounts may apply. “Specified foreign financial assets” include any financial accounts maintained by foreign financial institutions, as well as any of the following, but only if they are not held in accounts maintained by certain financial institutions: (i) stocks and securities issued by non-US persons, (ii) financial instruments and contracts held for investment that have non-US issuers or counterparties and (iii) interests in non-US entities. The Notes may be treated as specified foreign financial assets and US Holders may be subject to this information reporting regime. Failure to file information reports may subject US Holders to penalties. US Holders should consult their own tax advisors regarding their obligation to file information reports with respect to the Notes.

US Backup Withholding and Information Reporting

In general, information reporting requirements will apply to payments of principal and interest and any additional amounts on the Notes to non-corporate US Holders, and to payments of proceeds on a sale, exchange, retirement or other taxable disposition of a Note, if such payments are made within the United States or by or through certain US-related intermediaries. Backup withholding will apply to such payments if such US Holder fails to provide an accurate taxpayer identification number or otherwise fails to establish an exemption.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules from a payment to a US Holder of a Note generally will be allowed as a refund or a credit against the US Holder’s US federal income tax liability as long as the US Holder provides the required information to the IRS in a timely manner.

PLAN OF DISTRIBUTION

Each of the Joint Bookrunners has, pursuant to Subscription Agreement (the “**Subscription Agreement**”) dated 24 February 2026 severally (but not jointly) agreed to subscribe or procure subscribers for (i) the principal amount of 2034 Notes set out opposite its name in the table below at the issue price of 98.819% of the principal amount of the 2034 Notes and (ii) the principal amount of 2039 Notes set out opposite its name in the table below at the issue price of 98.186% of the principal amount of the 2039 Notes, in each case less a management and underwriting commission.

Joint Bookrunners	Principal Amount of 2034 Notes (US\$)	Principal Amount of 2039 Notes (US\$)
Citigroup Global Markets Limited	450,000,000	675,000,000
The Standard Bank of South Africa Limited	450,000,000	675,000,000
Total	900,000,000	1,350,000,000

Kenya has been informed that the Joint Bookrunners propose to resell the Notes at the respective issue prices set forth on the cover page of this Offering Circular within the United States to persons reasonably believed to be qualified institutional buyers (as defined in Rule 144A) in reliance upon Rule 144A, and to persons outside the United States in reliance upon Regulation S. See “Plan of Distribution – *United States*” and “*Transfer Restrictions*” below. The issue price at which the Notes are offered may be changed at any time without notice.

Kenya has agreed to indemnify the Joint Bookrunners against certain liabilities (including liabilities under the Securities Act) incurred in connection with the issue of the Notes. The Subscription Agreement may be terminated in certain circumstances prior to payment of the net subscription money in respect of the Notes to Kenya.

The Subscription Agreement provides that the obligations of the Joint Bookrunners to subscribe for Notes are subject to certain conditions precedent, including (amongst other things) receipt of legal opinions from legal counsel, and the Subscription Agreement may also be terminated in certain circumstances prior to payment of the issue price to the Issuer. The offering of the Notes by the Joint Bookrunners is subject to the Joint Bookrunners’ right to reject any order in whole or in part.

Offers and sales of the Notes in the United States will be made by those Joint Bookrunners or their affiliates that are registered broker-dealers under the U.S. Securities Exchange Act of 1934, as amended (the “**Exchange Act**”), or in accordance with Rule 15a-6 thereunder.

Allocations of the Notes to potential investors in the offering will be made in accordance with customary allocation processes and procedures following the completion of the book-building process for the offering of the Notes and will be made at the sole discretion of the Issuer.

The Notes are a new issue of securities for which there currently is no market. The Issuer cannot provide assurance that the prices at which the Notes will sell in the market after this offering will not be lower than the initial offering price or that an active trading market for the Notes will develop and continue after this offering. The Joint Bookrunners have advised the Issuer that following the completion of the offering of the Notes, they intend to make a market in the Notes. They are not obligated to do so, however, and any market-making activities with respect to the Notes may be discontinued at any time at their sole discretion without notice. In addition, such market-making activity will be subject to the limits imposed by the Securities Act and the Exchange Act. Accordingly, the Issuer cannot give any assurance as to the development of any market or the liquidity of any market for the Notes.

In connection with the offering of the Notes, the Joint Bookrunners may engage in over-allotment, stabilising transactions and syndicate covering transactions. Over-allotment involves sales in excess of the offering size, which creates a short position for the Joint Bookrunners. Stabilising transactions involve bids to purchase the Notes in the open market for the purpose of pegging, fixing or maintaining the price of the Notes. Syndicate covering transactions involve purchases of the Notes in the open market after the distribution has been completed in order to cover short positions. Any of these activities may prevent a decline in the market price of the Notes, and may also cause the price of the Notes to be higher than it would otherwise be in the absence of these transactions. The Joint Bookrunners may conduct these transactions in the over-the-counter market or

otherwise. If the Joint Bookrunners commence any of these transactions, they may discontinue them at any time.

The Issuer expects that delivery of interests in the Notes will be made against payment therefor on the Issue Date specified on the cover page of this Offering Circular, which will be the fifth Business Day following the date of pricing of the Notes (this settlement cycle being referred to as T+5). Under Rule 15c6-1 of the Exchange Act, trades in the secondary market generally are required to settle in one New York business day, unless the parties to any such trade expressly agree otherwise. Accordingly, investors who wish to trade interests in the Notes on the date of pricing of the Notes or the next New York business day will be required, by virtue of the fact that the Notes initially will settle in T+5, to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement. Investors in the Notes who wish to trade interests in the Notes on the date of pricing of the Notes or the next New York business day should consult their own adviser.

The Joint Bookrunners or their respective affiliates from time to time have provided in the past and may provide in the future investment banking, financial advisory, mergers and acquisitions and commercial banking services to us and our affiliates in the ordinary course of business for which they have received or may receive customary fees and commissions. Certain of the Joint Bookrunners and their affiliates have performed certain investment and commercial banking or financial advisory services for the Issuer and their affiliates from time-to-time, for which they have received customary fees and commissions, and they expect to provide these services to the Issuer and their affiliates in the future, for which they expect to receive customary fees and commissions. "Affiliates" as used in this Offering Circular is defined as under Rule 501(b) of Regulation D of the U.S. Securities Act. One or more of the Joint Bookrunners may purchase Notes offered hereby for their own account.

In addition, in the ordinary course of their business activities, the Joint Bookrunners and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or its affiliates. If the Joint Bookrunners or their affiliates have a lending relationship with the Issuer, they routinely hedge their credit exposure to the Issuer consistent with their customary risk management policies. Typically, the Joint Bookrunners and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in the Issuer's securities, including potentially the Notes. Any such short positions could adversely affect future trading prices of the Notes. The Joint Bookrunners and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

United States

The Notes have not been and will not be registered under the Securities Act and may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. Accordingly, each Joint Bookrunner has agreed, severally (but not jointly), to offer the Notes for resale in the United States initially only (1) to persons they reasonably believe to be QIBs purchasing for their own account or for the account of a QIB in reliance on Rule 144A, or (2) outside the United States in offshore transactions in reliance on Regulation S. Terms used in this paragraph have the respective meanings given to them by Regulation S.

In addition, until 40 days after the commencement of the offering, an offer or sale of Notes within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act if such offer or sale is made otherwise than in accordance with Rule 144A under the Securities Act.

Each Joint Bookrunner has represented and agreed severally (but not jointly), that, except as permitted by the Subscription Agreement, it has not offered and sold, and will not offer and sell, the Notes by means of any general solicitation or advertising in the United States or otherwise in any manner involving a public offering within the meaning of Section 4(a)(2) of the Securities Act. Accordingly, neither such Joint Bookrunner nor its affiliates, nor any persons acting on its or their behalf, have engaged or will engage in any directed selling efforts (as defined in Regulation S) with respect to the Notes.

United Kingdom

Each Joint Bookrunner has represented and agreed that:

- (a) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the United Kingdom Financial Services and Markets Act 2000, as amended (the “FSMA”)) received by it in connection with the issue or sale of any Notes in circumstances in which Section 21(1) of the FSMA does not apply to Kenya; and
- (b) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to the Notes in, from or otherwise involving the United Kingdom.

Prohibition of Sales to EEA Retail Investors

Each Joint Bookrunner has represented and agreed that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Notes to any retail investor in the European Economic Area. For the purposes of this provision:

- (a) the expression “**retail investor**” means a person who is one (or more) of the following:
 - (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “**MiFID II**”); or
 - (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the “Insurance Distribution Directive”), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II.

Hong Kong

Each Joint Bookrunner has represented and agreed that:

- (a) it has not offered or sold and will not offer or sell in Hong Kong, by means of any document, any Notes other than (a) to “professional investors” as defined in the Securities and Futures Ordinance (Cap. 571) of Hong Kong (the “SFO”) and any rules made under the SFO; or (b) in other circumstances which do not result in the document being a “prospectus” as defined in the Companies (Winding Up and Miscellaneous Provisions Ordinance (Cap. 32) of Hong Kong (the “C(WUMP)O”) or which do not constitute an offer to the public within the meaning of the C(WUMP)O; and
- (b) it has not issued or had in its possession for the purposes of issue, and will not issue or have in its possession for the purposes of issue, whether in Hong Kong or elsewhere, any advertisement, invitation or document relating to the Notes, which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to Notes which are or are intended to be disposed of only to persons outside Hong Kong or only to “professional investors” as defined in the SFO and any rules made under the SFO

Republic of Italy

The offering of the Notes has not been registered with the Commissione Nazionale per le Società e la Borsa (“CONSOB”) pursuant to Italian securities legislation and, accordingly, each Joint Bookrunner has represented and agreed that, save as set out below, it has not offered, sold, or delivered and will not offer, sell, or deliver any Notes in the Republic of Italy in a solicitation to the public and that sales of the Notes in the Republic of Italy shall be effected in accordance with all Italian securities, tax and exchange control and other applicable laws and regulation.

Accordingly, each Joint Bookrunner has represented and agreed that it will not offer, sell or deliver any Notes or distribute copies of the Offering Circular and any other document relating to the Notes in the Republic of Italy except:

- (i) to qualified investors (*investitori qualificati*), as defined pursuant to Article 2 of Regulation (EU) 2017/1129 (the “**Prospectus Regulation**”) and any applicable provision of Legislative Decree No. 58 of 24 February 1998, as amended (the “**Financial Services Act**”) and Italian CONSOB regulations; or
- (ii) in other circumstances which are exempted from the rules on public offerings pursuant to Article 1 of the Prospectus Regulation, Article 34-ter of CONSOB Regulation No. 11971 of 14 May 1999, as amended from time to time, and the applicable Italian laws.

Any offer, sale or delivery of the Notes or distribution of copies of this Offering Circular or any other document relating to the Notes in the Republic of Italy under (i) or (ii) above must:

- (a) be made by investment firms, banks or financial intermediaries permitted to conduct such activities in the Republic of Italy in accordance with the Financial Services Act, CONSOB Regulation No. 20307 of 15 February 2018 (as amended from time to time) and Legislative Decree No. 385 of 1 September 1993 as amended (the “**Banking Act**”); and
- (b) comply with any other applicable laws and regulations or requirement imposed by CONSOB, the Bank of Italy (including the reporting requirements, where applicable, pursuant to Article 129 of the Banking Act and the implementing guidelines of the Bank of Italy, as amended from time to time) and/or any other Italian authority.

The Republic of Kenya

This Offering Circular and the initial offering of Notes has not been and will not be approved by the Capital Markets Authority in the Republic of Kenya (the Capital Markets (Public Offers, Listings and Disclosures) Regulations, 2023 do not apply to the Notes) and the Notes will not be listed on the Nairobi Securities Exchange when they are issued. The Notes will not be issued, offered or sold in the Republic of Kenya, except in compliance with all laws and regulations in the Republic of Kenya.

South Africa

Each Joint Bookrunner has represented and agreed that it has not and will not offer for sale or subscription or sell any Notes, directly or indirectly, within the Republic of South Africa or to any person or corporate or other entity resident in the Republic of South Africa except (i) in accordance with the exchange control regulations of the Republic of South Africa and (ii) to any entity resident or within the Republic of South Africa in accordance with the Commercial Paper Regulations issued under Government Notice 2172 published in Government Gazette No. 16167 of 14 December 1994 pursuant to the Banks Act 1990 and the Companies Act 2008 and the Financial Advisory and Intermediary Services Act 2002.

Switzerland

Each Joint Bookrunner has represented and agreed that it will not publicly offer, as such term is defined or interpreted under the Swiss Code of Obligations, sell or advertise, directly or indirectly, the Notes in, into or from Switzerland and agrees and undertakes that it will not publicly distribute or otherwise make publicly available in Switzerland this Offering Circular or any other offering or marketing material relating to the Notes.

This Offering Circular is not intended to constitute an offer or solicitation to purchase or invest in the Notes described herein. The Notes may not be publicly offered, distributed, sold or advertised, directly or indirectly, in, into or from Switzerland and will not be listed on the SIX Swiss Exchange or on any other exchange or regulated trading facility in Switzerland. Neither this Offering Circular nor any offering or marketing material relating to the Notes constitutes a prospectus as such term is understood pursuant to article 652a or article 1156 of the Swiss Code of Obligations or a listing prospectus within the meaning of the listing rules of the SIX Swiss Exchange or any other regulated trading facility in Switzerland or a simplified prospectus or a prospectus as such term is defined in article 5 of the Swiss Collective Investment Schemes Act, and neither this Offering Circular nor any other offering or marketing material relating to the Notes may be publicly distributed or otherwise made publicly available in Switzerland.

Singapore

Each Joint Bookrunner has acknowledged that this Offering Circular has not been and will not be registered as a prospectus with the Monetary Authority of Singapore (the “MAS”). Accordingly, each Joint Bookrunner has represented and agreed that it has not offered or sold any Notes or caused such Notes to be made the subject of an invitation for subscription or purchase and will not offer or sell such Notes or cause such Notes to be made the subject of an invitation for subscription or purchase, and has not circulated or distributed, nor will it circulate or distribute, this Offering Circular or any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of such Notes, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act 2001 of Singapore as modified or amended from time to time (the “SFA”) pursuant to Section 274 of the SFA, or (ii) an accredited investor (as defined in Section 4A of the SFA) pursuant to and in accordance with the conditions specified in Section 275 of the SFA.

Notification under Section 309B(1)(c) of the SFA

The Issuer has determined, and hereby notifies all relevant persons (as defined in section 309A(1) of the SFA) that the Notes are prescribed capital markets products (as defined in the CMP Regulations 2018) and Excluded Investment Products (as defined in the MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and in the MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

United Arab Emirates (excluding the Dubai International Financial Centre and the Abu Dhabi Global Market)

Each Joint Bookrunner has represented and agreed that the Notes have not been and will not be offered, sold or publicly promoted or advertised by it in the UAE other than in compliance with any laws applicable in the UAE governing the issue, offering and sale of securities.

Dubai International Financial Centre

Each Joint Bookrunner has represented and agreed that it has not offered and will not offer the Notes to any person in the Dubai International Financial Centre unless such offer is:

- (a) an “**Exempt Offer**” in accordance with the Markets Rules (MKT) Module of the Dubai Financial Services Authority (the “**DFSA**”) rulebook; and
- (b) made only to persons who meet the Professional Client criteria set out in Rule 2.3.3 of the Conduct of Business Module of the DFSA rulebook.

General

No action has been taken by Kenya or any of the Joint Bookrunners that would, or is intended to, permit a public offer of the Notes or possession or distribution of the Offering Circular or any other offering or publicity material relating to the Notes in any country or jurisdiction where any such action for that purpose is required. Accordingly, each Joint Bookrunner has undertaken that it will not, directly or indirectly, offer or sell any Notes or distribute or publish any offering circular, prospectus, form of application, advertisement or other document or information in any country or jurisdiction except under circumstances that will, to the best of its knowledge and belief, result in compliance with any applicable laws and regulations and all offers and sales of Notes by it will be made on the same terms.

GENERAL INFORMATION

Contact Information

The address of the Issuer is: The National Treasury, Harambee Avenue, Nairobi, GPO 00100, Kenya and its telephone number is +254 20 225 2299.

Listing

An application has been made to the FCA for the Notes to be admitted to the Official List and to the London Stock Exchange for the Notes to be admitted to trading on the London Stock Exchange's main market; however, no assurance can be given that such application will be accepted. It is expected that admission of the Notes to the Official List and to trading on the London Stock Exchange's main market will be granted on or around the Closing Date, subject only to the issue of the Notes.

The expenses in connection with the admission of the Notes to the Official List and to trading on the London Stock Exchange's main market are expected to amount to approximately £10,100.

Indication of Yield

As at the Closing Date and on the basis of the issue price of the 2034 Notes, the interest rate of the 2034 Notes, the redemption amount of the 2034 Notes and the tenor of the 2034 Notes, as calculated on the pricing date, the yield to maturity of the 2034 Notes is 8.10% per annum. This is not an indication of future yield.

As at the Closing Date and on the basis of the issue price of the 2039 Notes, the interest rate of the 2039 Notes, the redemption amount of the 2039 Notes and the tenor of the 2039 Notes, as calculated on the pricing date, the yield to maturity of the 2039 Notes is 8.95% per annum. This is not an indication of future yield.

Authorisations

Kenya has obtained all necessary consents, approvals and authorisations in connection with the issue and performance of its obligations under the Notes. The Government's power to borrow has been duly exercised in accordance with the PFMA.

Documents on Display

For so long as any Notes shall be outstanding, physical copies of: (i) Kenya's budget for the current fiscal year and each of the fiscal years ended 30 June 2025 and 30 June 2024, (ii) the Agency Agreement and (iii) the Deed of Covenant may be inspected during normal business hours at the specified offices of the Fiscal Agent.

Clearing Systems

The Notes have been accepted for clearance through Euroclear, Clearstream, Luxembourg and DTC.

The Unrestricted Global Notes in respect of the 2034 Notes have been accepted for clearance through Euroclear and Clearstream, Luxembourg under the Common Code No. 330583860 and the ISIN XS3305838602 for the Unrestricted Global Note.

The Unrestricted Global Notes in respect of the 2039 Notes have been accepted for clearance through Euroclear and Clearstream, Luxembourg under the Common Code No. 330583894 and the ISIN XS3305838941 for the Unrestricted Global Note.

The Restricted Global Notes in respect of the 2034 Notes have been accepted for clearance through DTC. The CUSIP number is 491798 AR5, the ISIN is US491798AR55 and Common Code is 330521325 for the Restricted Global Note.

The Restricted Global Notes in respect of the 2039 Notes have been accepted for clearance through DTC. The CUSIP number is 491798 AS3, the ISIN is US491798AS39 and Common Code is 330521333 for the Restricted Global Note.

The address of Euroclear is 1 Boulevard du Roi Albert II, B. 1210 Brussels, Belgium, the address of Clearstream, Luxembourg is Avenue J.F. Kennedy, L-1855, Luxembourg and the address of DTC is 55 Water Street, New York, NY, 10041, USA.

Material Change

Since the end of the last fiscal year on 30 June 2025, except as otherwise disclosed in this Offering Circular there has been no significant change in Kenya's (a) tax and budgetary systems, (b) gross public debt or the maturity structure or currency of its outstanding debt and debt payment record (c) foreign trade and balance of payment figures (d) foreign exchange reserves including any potential encumbrances to such foreign exchange reserves as forward contracts or derivatives (e) financial position and resources including liquid deposits available in domestic currency and (f) income and expenditure figures.

Interest of Natural and Legal Persons

So far as the Issuer is aware, no person involved in the offer or the Notes has an interest material to the offer.
