The accompanying notes are an integral part of these consolidated financial statements.

#### 1. Basis of preparation:

The accompanying unaudited condensed consolidated financial statements of Toyota Motor Corporation (the "parent company") as of and for the period ended June 30, 2015, have been prepared in accordance with U.S. generally accepted accounting principles ("U.S.GAAP") and on substantially the same basis as its annual consolidated financial statements except for certain required disclosures which have been omitted. The unaudited condensed consolidated financial statements should be read in conjunction with the Annual Report on Form 20-F for the year ended March 31, 2015. The unaudited condensed consolidated financial statements, consisting of only normal recurring adjustments, necessary for a fair presentation of the result for that period and the financial condition at that date. The consolidated results for the three-month period are not necessarily indicative of results to be expected for the full year.

#### 2. Accounting changes and recent pronouncements to be adopted in future periods:

#### Accounting changes -

None

#### Recent pronouncements to be adopted in future periods -

In May 2014, the Financial Accounting Standards Board ("FASB") issued updated guidance on the recognition of revenue from contracts with customers. This guidance will supersede the current revenue recognition guidance. This guidance is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

In February 2015, the FASB issued updated guidance that amends the analysis a reporting entity must perform to determine whether it should consolidate certain legal entities. This guidance is effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2015. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

In April 2015, the FASB issued updated guidance that requires debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of the related debt liability instead of being presented as an asset. This guidance is effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

In April 2015, the FASB issued updated guidance to help entities evaluate the accounting for fees paid by a customer in a cloud computing arrangement. This guidance is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

In July 2015, the FASB issued updated guidance to simplify the measurement of inventory. This guidance is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

#### 3. Accounting procedures specific to quarterly consolidated financial statements:

#### Provision for income taxes -

The provision for income taxes is computed by multiplying income before income taxes and equity in earnings of affiliated companies for the first quarter by estimated annual effective tax rates. These estimated annual effective tax rates reflect anticipated investment tax credits, foreign tax credits and other items, including changes in valuation allowances, that are expected to affect estimated annual effective tax rates.

#### 4. Derivative financial instruments:

Toyota employs derivative financial instruments, including foreign exchange forward contracts, foreign currency options, interest rate swaps, interest rate currency swap agreements and interest rate options to manage its exposure to fluctuations in interest rates and foreign currency exchange rates. Toyota does not use derivatives for speculation or trading.

#### Fair value hedges -

Toyota enters into interest rate swaps and interest rate currency swap agreements mainly to convert its fixed-rate debt to variable-rate debt. Toyota uses interest rate swap agreements in managing interest rate risk exposure. Interest rate swap agreements are executed as either an integral part of specific debt transactions or on a portfolio basis. Toyota uses interest rate currency swap agreements to hedge exposure to currency exchange rate fluctuations on principal and interest payments for borrowings denominated in foreign currencies. Notes and loans payable issued in foreign currencies are hedged by concurrently executing interest rate currency swap agreements, which involve the exchange of foreign currency principal and interest obligations for each functional currency obligations at agreed-upon currency exchange and interest rates.

For the first quarter ended June 30, 2014 and 2015, the ineffective portion of Toyota's fair value hedge relationships was not material. For fair value hedging relationships, the components of each derivative's gain or loss are included in the assessment of hedge effectiveness.

#### Undesignated derivative financial instruments -

Toyota uses foreign exchange forward contracts, foreign currency options, interest rate swaps, interest rate currency swap agreements, and interest rate options, to manage its exposure to foreign currency exchange rate fluctuations and interest rate fluctuations from an economic perspective, and for some of which Toyota is unable to or has elected not to apply hedge accounting.

#### Notes to Unaudited Consolidated Financial Statements

#### Fair value and gains or losses on derivative financial instruments -

The following table summarizes the fair values of derivative financial instruments as of March 31, 2015 and June 30, 2015:

|  | Yen in millions |               |  |
|--|-----------------|---------------|--|
|  | March 31, 2015  | June 30, 2015 |  |

| Cost of financing operations  | (5,277)  |   | (4,939)  |   |  |  |
| Foreign exchange gain (loss), net                                     | 24,819   |   | (3,494)  |   |  |  |

Undesignated derivative financial instruments are used to manage economic risks of fluctuations in foreign currency exchange rates and interest rates of certain receivables and payables. Those economic risks are offset by changes in the fair value of undesignated derivative financial instruments.

Cash flows from transactions of derivative financial instruments are included in cash flows from operating activities in the consolidated statements of cash flows.

#### Credit risk related contingent features -

Toyota enters into International Swaps and Derivatives Association Master Agreements with counterparties. These Master Agreements contain a provision requiring either Toyota or the counterparty to settle the contract or to post assets to the other party in the event of a ratings downgrade below a specified threshold.

The aggregate fair value amount of derivative financial instruments that contain credit risk related contingent features that are in a net liability position after being offset by cash collateral as of June 30, 2015 is \$8,079 million. The aggregate fair value amount of assets that are already posted as cash collateral as of June 30, 2015 is \$179,144 million. If the ratings of Toyota decline below specified thresholds, the maximum amount of assets to be posted or for which Toyota could be required to settle the contracts is \$8,079 million as of June 30, 2015.

#### 5. Contingencies:

#### **Guarantees** -

Toyota enters into contracts with Toyota dealers to guarantee customers' payments of their installment payables that arise from installment contracts between customers and Toyota dealers, as and when requested by Toyota dealers. Toyota is required to execute its guarantee primarily when customers are unable to make required payments. The maximum potential amount of future payments as of June 30, 2015 is ¥2,279,091 million. Liabilities for guarantees totaling ¥6,549 million have been provided as of June 30, 2015. Under these guarantee contracts, Toyota is entitled to recover any amount paid by Toyota from the customers whose original obligations Toyota has guaranteed.

#### Legal proceedings -

From time-to-time, Toyota issues vehicle recalls and takes other safety measures including safety campaigns relating to its vehicles. In 2009 and 2010, Toyota issued safety campaigns related to the risk of floor mat entrapment of accelerator pedals and vehicle recalls related to slow-to-return or sticky accelerator pedals. In March 2014, Toyota entered into a Deferred Prosecution Agreement ("DPA") to resolve an investigation by the U.S. Attorney for the Southern District of New York related to unintended acceleration in certain of its vehicles. The DPA provides for an independent monitor to review and assess policies and procedures relating to Toyota's safety communications process, its process for sharing vehicle accident information internally and its process for preparing and sharing certain technical reports.

In 2010, there was a recall related to the software program that controls the antilock braking system in certain models, including the Prius, which led to putative class action lawsuits on behalf of owners of recalled vehicles and owners of vehicles which were not recalled. The United States District Court for the Central District of California denied the plaintiffs' motions for class certification and granted summary judgment in Toyota's favor denying the plaintiffs' claims related to both the recalled vehicles and the non-recalled vehicles. Proceedings involving the recalled vehicles have concluded; the appeals of the granting of summary judgment and the denial of class certification of the claims for the non-recalled vehicles are still pending.

Personal injury and wrongful death claims involving allegations of unintended acceleration are pending in several consolidated cases in federal and state courts, as well as in individual cases in various other states. The judges in the consolidated federal action and the consolidated California state action have approved an Intensive Settlement Process ("ISP") for such claims in those actions. Under the ISP, all individual claims within the consolidated actions are stayed pending completion of a process to assess whether they can be resolved on terms acceptable to the parties. Cases not resolved after completion of the ISP will then proceed to discovery and toward trial. Toyota has offered the ISP process to plaintiffs in other consolidated actions and in individual cases, as well.

Toyota has been named as a defendant in 27 economic loss class action lawsuits, which, together with similar lawsuits against Takata and other automakers, have been made part of a multi-district litigation ("MDL") proceeding in the United States District Court for the Southern District of Florida, arising out of allegations that airbag inflators manufactured by Takata are defective. These lawsuits are at a very early stage.

Toyota also has various other pending legal actions and claims, including without limitation personal injury and wrongful death lawsuits and claims in the United States, and is subject to government investigations from-time-to-time.

Beyond the amounts accrued with respect to all aforementioned matters, Toyota is unable to estimate a range of reasonably possible loss, if any, for the pending legal matters because (i) many of the proceedings are in evidence gathering stages, (ii) significant factual issues need to be resolved, (iii) the legal theory or nature of the claims is unclear, (iv) the outcome of future motions or appeals is unknown and/or (v) the outcomes of other matters of these types vary widely and do not appear sufficiently similar to offer meaningful guidance. Based upon information currently available to Toyota, however, Toyota believes that its losses from these matters, if any, beyond the amounts accrued, would not have a material adverse effect on Toyota's financial position, results of operations or cash flows.

#### 6. Segment data:

The operating segments reported below are the segments of Toyota for which separate financial information is available and for which operating income/loss amounts are evaluated regularly by executive management in deciding how to allocate resources and in assessing performance.

The major portions of Toyota's operations on a worldwide basis are derived from the Automotive and Financial Services business segments. The Automotive segment designs, manufactures and distributes sedans, minivans, compact cars, sport-utility vehicles, trucks and related parts and accessories. The Financial Services segment consists primarily of financing, and vehicle and equipment leasing operations to assist in the merchandising of the parent company and its affiliated companies products as well as other products. The All Other segment includes the design, manufacturing and sales of housing, telecommunications and other businesses.

The following tables present certain information regarding Toyota's industry or geographic segments and overseas revenues by destination for the first quarter ended June 30, 2014 and 2015.

#### Segment operating results -

For the first quarter ended June 30, 2014:

|                                   | Yen in millions |         |                              |              |           |  |
|-----------------------------------|-----------------|---------|------------------------------|--------------|-----------|--|
|                                   |                 |         | Inter-segment<br>Elimination | Consolidated |           |  |
| Net revenues                      |                 |         |                              |              |           |  |
| Sales to external customers       | 5,900,070       | 367,098 | 123,520                      | —            | 6,390,688 |  |
| Inter-segment sales and transfers | 14,597          | 10,330  | 134,796                      | (159,723)    |           |  |
| Total                             | 5,914,667       | 377,428 | 258,316                      | (159,723)    | 6,390,688 |  |
| Operating expenses                | 5,327,915       | 279,215 | 247,517                      | (156,687)    | 5,697,960 |  |
| Operating income                  | 586,752         | 98,213  | 10,799                       | (3,036)      | 692,728   |  |

For the first quarter ended June 30, 2015:

|                                   |                                  | Yen in millions |           |                                       |           |  |  |

"Other" consists of Central and South America, Oceania, Africa and the Middle East.

Revenues are attributed to geographies based on the country location of the parent company or the subsidiary that transacted the sale with the external customer.

Transfers between industry or geographic segments are made at amounts which Toyota's management believes approximate arm's-length transactions. In measuring the reportable segments' income or losses, operating income consists of revenue less operating expenses.

#### Overseas revenues by destination -

The following information shows revenues that are attributed to countries based on location of customers, excluding customers in Japan. In addition to the disclosure requirements under U.S.GAAP, Toyota discloses this information in order to provide financial statements users with valuable information.

For the first quarter ended June 30, 2014:

|  | Yen in millions |         |           |           |           |
|--|-----------------|---------|-----------|-----------|-----------|
|  | North America   | Europe  | Asia      | Other     | Total     |
| Overseas sales                                   | 2,183,929       | 590,732 | 1,046,751 | 1,175,242 | 4,996,654 |

"Other" consists of Central and South America, Oceania, Africa and the Middle East, etc.

#### 7. Per share amounts:

Reconciliations of the differences between basic and diluted net income attributable to Toyota Motor Corporation per share for the first quarter ended June 30, 2014 and 2015 are as follows:

|   | Yen in millions  | Thousands of shares        | Yen   |
|---|--|----------------------------|---|
|   | Net income<br>attributable to<br>Toyota Motor<br>Corporation | Weighted-average<br>shares | Net income<br>attributable to<br>Toyota Motor<br>Corporation<br>per share |
| For the first quarter ended June 30, 2014                                       |  |                            |   |
| Basic net income attributable to<br>Toyota Motor Corporation per common share   | 587,774  | 3,169,812                  | 185.43  |
| Effect of dilutive securities   |  |                            |   |
| Assumed exercise of dilutive stock options                                      | (14)   | 1,389                      |   |
| Diluted net income attributable to<br>Toyota Motor Corporation per common share | 587,760  | 3,171,201                  | 185.34  |
| For the first quarter ended June 30, 2015                                       |  |                            |   |
| Basic net income attributable to<br>Toyota Motor Corporation per common share   | 646,394  | 3,146,894                  | 205.41  |
| Effect of dilutive securities   |  |                            |   |
| Assumed exercise of dilutive stock options                                      | (10)   | 1,522                      |   |
| Diluted net income attributable to  |  |                            |   |
| Toyota Motor Corporation per common share                                       | 646,384  | 3,148,416                  | 205.30  |

Stock options that were not included in the computation of diluted net income attributable to Toyota Motor Corporation per share for the first quarter ended June 30, 2014 were 2,341 thousand shares, because the options' exercise prices were greater than the average market price per common share during the period. There were no stock options that were not included in the computation of diluted net income attributable to Toyota Motor Corporation per share for the first quarter ended June 30, 2015.

On June 16, 2015, at the Ordinary General Shareholders' Meeting, the shareholders of the parent company approved to distribute year-end cash dividends of ¥393,352 million, ¥125 per share, effective on June 17, 2015.

#### 8. Fair value measurements:

In accordance with U.S.GAAP, Toyota classifies fair value into three levels of input as follows which are used to measure it.

- Level 1: Quoted prices in active markets for identical assets or liabilities
- Level 2: Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; valuation of assets or liabilities using inputs, other than quoted prices, that are observable
- Level 3: Valuation of assets or liabilities using unobservable inputs which reflect the reporting entity's assumptions

The following table summarizes the fair values of the assets and liabilities measured at fair value on a recurring basis as of March 31, 2015 and June 30, 2015. Transfers between levels of the fair value are recognized at the end of their respective reporting periods:

|  | Yen in millions |           |         |            |  |
|--|-----------------|-----------|---------|------------|--|
|  | March 31, 2015  |           |         |            |  |
|  | Level 1         | Level 2   | Level 3 | Total      |  |
| Assets   |                 |           |         |            |  |

| Total  |                 | (337,229) |         | (337,229)  |  |

The following is description of the assets and liabilities measured at fair value, information about the valuation techniques used to measure fair value, key inputs and significant assumptions:

#### Cash equivalents and time deposits -

Cash equivalents include money market funds and other investments with original maturities of three months or less. Cash equivalents classified in Level 2 include negotiable certificates of deposit with original maturities of three months or less. These are measured at fair value using primarily observable interest rates in the market. Time deposits consist of negotiable certificates of deposit with original maturities over three months. These are measured at fair value using primarily observable interest rates in the market.

#### Marketable securities and other securities investments -

Marketable securities and other securities investments include public and corporate bonds, common stocks and other investments. Public and corporate bonds include government bonds and represent 43% of Japanese bonds, and 57% of U.S., European and other bonds as of March 31, 2015, and 40% of Japanese bonds, and 60% of U.S., European and other bonds as of June 30, 2015. Listed stocks on the Japanese stock markets represent 88% and 89% of common stocks as of March 31, 2015 and June 30, 2015, respectively. Toyota uses primarily quoted market prices for identical assets to measure fair value of these securities. "Other" includes investment trusts. Generally, Toyota uses quoted market prices for similar assets or quoted non-active market prices for identical assets to measure fair value of these securities. These assets are classified in Level 2.

#### Derivative financial instruments -

See note 4 to the consolidated financial statements about derivative financial instruments. Toyota primarily estimates the fair value of derivative financial instruments using industry-standard valuation models that require observable inputs including interest rates and foreign exchange rates, and the contractual terms. The usage of these models does not require significant judgment to be applied. These derivative financial instruments are classified in Level 2. In other certain cases when market data is not available, key inputs to the fair value measurement include quotes from counterparties, and other market data. Toyota assesses the reasonableness of changes of the quotes using observable market data. These derivative financial instruments are classified in Level 3. Toyota's derivative fair value measurements consider assumptions about counterparty and Toyota's own non-performance risk, using such as credit default probabilities.

The changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the first quarter ended June 30, 2014 and 2015 were not material.

Certain assets and liabilities are measured at fair value on a nonrecurring basis. The assets and liabilities measured at fair value on a nonrecurring basis for the first quarter ended June 30, 2014 and 2015 were not material.

### Notes to Unaudited Consolidated Financial Statements

#### 9. Accumulated other comprehensive income:

Changes in accumulated other comprehensive income (loss) are as follows:

|  | Yen in millions                                   |   |                                     |   |  |
