Notes to Unaudited Consolidated Financial Statements

1. Basis of preparation:

The accompanying unaudited condensed consolidated financial statements of Toyota Motor Corporation (the "parent company") as of and for the periods ended September 30, 2013, have been prepared in accordance with U.S. generally accepted accounting principles ("U.S.GAAP") and on substantially the same basis as its annual consolidated financial statements except for certain required disclosures which have been omitted. The unaudited condensed consolidated financial statements should be read in conjunction with the Annual Report on Form 20-F for the year ended March 31, 2013. The unaudited condensed consolidated financial statements reflect all adjustments, consisting of only normal recurring adjustments, necessary for a fair presentation of the result for that period and the financial condition at that date. The consolidated results for the six-month and the three-month periods are not necessarily indicative of results to be expected for the full year.

2. Accounting changes and recent pronouncements to be adopted in future periods:

Accounting changes -

In December 2011, the Financial Accounting Standards Board ("FASB") issued updated guidance of disclosures about offsetting assets and liabilities. This guidance requires additional disclosures about gross and net information for assets and liabilities including financial instruments eligible for offset in the balance sheets. The parent company and its consolidated subsidiaries ("Toyota") adopted this guidance from the interim period within the fiscal year, begun on or after January 1, 2013. The adoption of this guidance did not have a material impact on Toyota's quarterly consolidated financial statements.

In February 2013, FASB issued updated guidance on the presentation of items reclassified out of accumulated other comprehensive income. This guidance requires to present, either in a single note or parenthetically on the face of the financial statements, the effect of significant amounts reclassified out of each component of accumulated other comprehensive income based on its source. Toyota adopted this guidance from the interim period within the fiscal year, begun after December 15, 2012. The adoption of this guidance did not have a material impact on Toyota's quarterly consolidated financial statements.

In July 2013, FASB issued updated guidance which permits the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) to be used as a benchmark interest rate for hedge accounting purposes. This guidance also removes the restriction on using different benchmark rates for similar hedges. Toyota adopted this guidance for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. The adoption of this guidance did not have a material impact on Toyota's quarterly consolidated financial statements.

Notes to Unaudited Consolidated Financial Statements

Recent pronouncements to be adopted in future periods -

In July 2013, FASB issued updated guidance on uncertain tax positions. This guidance requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward for tax purposes, a similar tax loss, or a tax credit carryforward. This guidance is effective for fiscal year beginning after December 15, 2013, and for interim period within the fiscal year. Management does not expect this guidance to have a material impact on Toyota's consolidated financial statements.

3. Accounting procedures specific to quarterly consolidated financial statements:

Provision for income taxes

The provision for income taxes is computed by multiplying income before income taxes and equity in earnings of affiliated companies for the first half by estimated annual effective tax rates. These estimated annual effective tax rates reflect anticipated investment tax credits, foreign tax credits and other items, including changes in valuation allowances, that are expected to affect estimated annual effective tax rates.

Notes to Unaudited Consolidated Financial Statements

4. Derivative financial instruments:

Toyota employs derivative financial instruments, including foreign exchange forward contracts, foreign currency options, interest rate swaps, interest rate currency swap agreements and interest rate options to manage its exposure to fluctuations in interest rates and foreign currency exchange rates. Toyota does not use derivatives for speculation or trading.

Fair value hedges -

Toyota enters into interest rate swaps and interest rate currency swap agreements mainly to convert its fixed-rate debt to variable-rate debt. Toyota uses interest rate swap agreements in managing interest rate risk exposure. Interest rate swap agreements are executed as either an integral part of specific debt transactions or on a portfolio basis. Toyota uses interest rate currency swap agreements to hedge exposure to currency exchange rate fluctuations on principal and interest payments for borrowings denominated in foreign currencies. Notes and loans payable issued in foreign currencies are hedged by concurrently executing interest rate currency swap agreements, which involve the exchange of foreign currency principal and interest obligations for each functional currency obligations at agreed-upon currency exchange and interest rates.

For the first half and the second quarter ended September 30, 2012 and 2013, the ineffective portion of Toyota's fair value hedge relationships was not material. For fair value hedging relationships, the components of each derivative's gain or loss are included in the assessment of hedge effectiveness.

Undesignated derivative financial instruments -

Toyota uses foreign exchange forward contracts, foreign currency options, interest rate swaps, interest rate currency swap agreements, and interest rate options, to manage its exposure to foreign currency exchange rate fluctuations and interest rate fluctuations from an economic perspective, and for which Toyota is unable or has elected not to apply hedge accounting.

Notes to Unaudited Consolidated Financial Statements

Fair value and gains or losses on derivative financial instruments -

The following table summarizes the fair values of derivative financial instruments at March 31, 2013 and September 30, 2013:

	Yen in millions	
	March 31, 2013	September 30, 2013
Derivative financial instruments designated as hedging instruments Interest rate and currency swap agreements		
Prepaid expenses and other current assets	10,769	13,106
Investments and other assets - Other	39,569	38,306
Total	50,338	51,412
Other current liabilities	(2,554)	(1,077)
Other long-term liabilities	(143)	
Total	(2,697)	(1,077)
Undesignated derivative financial instruments Interest rate and currency swap agreements		
Prepaid expenses and other current assets	27,731	18,833
Investments and other assets - Other	139,419	129,209
Total	167,150	148,042
Other current liabilities	(37,133)	(37,090)
Other long-term liabilities	(122,420)	(127,533)
Total	(159,553)	(164,623)
Foreign exchange forward and option contracts		
Prepaid expenses and other current assets	7,340	16,236
Investments and other assets - Other		<u> </u>
Total	7,340	16,236
Other current liabilities	(36,087)	(5,747)
Other long-term liabilities	(5)	(7)
Total	(36,092)	(5,754)

As of March 31, 2013 and September 30, 2013, the amounts of counterparty netting and cash collateral received that partially offset derivative assets were $\$158,\!807$ million and $\$128,\!018$ million, respectively. The amounts of counterparty netting and cash collateral pledged that partially offset derivative liabilities were $\$(86,\!477)$ million and $\$(84,\!644)$ million, respectively. These amounts included in the above table were offset in the consolidated balance sheets.

Notes to Unaudited Consolidated Financial Statements

The following table summarizes the notional amounts of derivative financial instruments at March 31, 2013 and September 30, 2013:

Notes to Unaudited Consolidated Financial Statements

Undesignated derivative financial instruments are used to manage economic risks of fluctuations in foreign currency exchange rates and interest rates of certain receivables and payables. Those economic risks are offset by changes in the fair value of undesignated derivative financial instruments.

Cash flows from transactions of derivative financial instruments are included in cash flows from operating activities in the consolidated statements of cash flows.

Credit risk related contingent features -

Toyota enters into International Swaps and Derivatives Association Master Agreements with counterparties. These Master Agreements contain a provision requiring either Toyota or the counterparty to settle the contract or to post assets to the other party in the event of a ratings downgrade below a specified threshold.

The aggregate fair value amount of derivative financial instruments that contain credit risk related contingent features that are in a net liability position after being offset by cash collateral as of September 30, 2013 is ¥1,252 million. The aggregate fair value amount of assets that are already posted as cash collateral as of September 30, 2013 is ¥32,942 million. If the ratings of Toyota decline below specified thresholds, the maximum amount of assets to be posted or for which Toyota could be required to settle the contracts is ¥1,252 million as of September 30, 2013.

Notes to Unaudited Consolidated Financial Statements

5. Contingencies:

Guarantees

Toyota enters into contracts with Toyota dealers to guarantee customers' payments of their installment payables that arise from installment contracts between customers and Toyota dealers, as and when requested by Toyota dealers. Toyota is required to execute its guarantee primarily when customers are unable to make required payments. The maximum potential amount of future payments as of September 30, 2013 is \mathbb{1},984,049 million. Liabilities for guarantees totaling \mathbb{2}6,617 million have been provided as of September 30, 2013. Under these guarantee contracts, Toyota is entitled to recover any amount paid by Toyota from the customers whose original obligations Toyota has guaranteed.

Legal Proceedings

Product Recalls

From time-to-time, Toyota issues vehicle recalls and takes other safety measures including safety campaigns relating to its vehicles. In November 2009, Toyota announced a safety campaign in North America for certain models of Toyota and Lexus vehicles related to floor mat entrapment of accelerator pedals, and later expanded it to include additional models. In January 2010, Toyota announced a recall in North America for certain models of Toyota vehicles related to sticking and slow-to-return accelerator pedals. Also in January 2010, Toyota recalled in Europe, China and other regions certain models of Toyota vehicles related to sticking accelerator pedals. In February 2010, Toyota announced a worldwide recall related to the software program that controls the antilock braking system in certain vehicle models including the Prius. Set forth below is a description of various claims, lawsuits and government investigations involving Toyota in the United States relating to these recalls and other safety measures.

Notes to Unaudited Consolidated Financial Statements

Class Action and Consolidated Litigation

Approximately 200 putative class actions and more than 500 individual product liability personal injury cases have been filed since November 2009 alleging that certain Toyota, Lexus and Scion vehicles contain defects that lead to unintended acceleration. In April 2010, the approximately 190 putative class actions in federal court as well as the federal product liability personal injury cases and warranty and lemon law cases were consolidated for pretrial proceedings into a single multi-district litigation in the United States District Court for the Central District of California. Approximately 10 putative class actions and various product liability personal injury cases pending in state courts were subsequently consolidated into the federal action. The remaining class actions lawsuits are pending in a consolidated state action in California.

In December 2012, Toyota and the plaintiffs announced that they had reached an agreement to settle the economic loss claims in the consolidated federal action. In July 2013, the court signed the order and judgment granting final approval of the settlement and dismissing the economic loss cases. Various objectors have appealed the court's rulings. In fiscal 2013, Toyota recorded a \$1.1 billion pre-tax charge against earnings to cover the estimated costs of this economic loss resolution and other potential recall-related resolutions.

The settlement provides a customer support program covering certain vehicle parts, the free installation of a brake override system on the remaining floor mat entrapment safety campaign vehicles and funds for cash payments to customers who do not receive the brake override system, cash payments to individuals who allegedly suffered a loss on the sale, lease or insuring the residual value of Toyota's vehicles and funds for safety-related research and education programs. The settlement does not cover product liability personal injury claims in the consolidated federal action or pending in various state courts in the United States.

Beginning in February 2010, Toyota was sued in approximately 20 putative class actions alleging defects in the antilock braking system in various hybrid vehicles that cause the vehicles to fail to stop in a timely manner when driving in certain road conditions. The plaintiffs seek an order requiring Toyota to repair the vehicles and claim that all owners and lessees of vehicles, including those for which recalls have been implemented, should be compensated for the alleged defects related to the antilock braking system. These cases have been consolidated into two actions, one in the United States District Court for the Central District of California and one in the Los Angeles County Superior Court. In January 2013, the Court in the federal case issued an order denying the plaintiff's motion for class certification and granting summary judgment in favor of Toyota on the claims of the principal named plaintiff for the cases relating to recalled vehicles. In July 2013, a class certification hearing in connection with the claims related to those vehicles that were not recalled was held, the court denied the motion for class certification and that ruling has been appealed.

Notes to Unaudited Consolidated Financial Statements

Government Investigations

In February 2010, Toyota received a subpoena from the U.S. Attorney for the Southern District of New York and a voluntary request and subpoena from the U.S. Securities and Exchange Commission "SEC". The subpoenas and the voluntary request primarily seek documents related to unintended acceleration and certain financial records. This is a coordinated investigation and has included interviews of Toyota and non-Toyota witnesses, as well as production of documents. In June 2010, Toyota received a second voluntary request and subpoena from the SEC and a subpoena from the U.S. Attorney for the Southern District of New York seeking production of documents related to the recalls of the steering relay rod. Toyota is cooperating with the U.S. Attorney's Office and the SEC in their investigations and expects to continue having discussions with the U.S. Attorney's Office over the coming months.

Beyond the amounts accrued for the recall-related matters, Toyota is unable to estimate a range of reasonably possible loss, if any, for the other recall-related matters because (i) many of the proceedings are in evidence gathering stages, (ii) significant factual issues need to be resolved, (iii) the legal theory or nature of the claims is unclear, (iv) the outcome of future motions or appeals is unknown and/or (v) the outcomes of other matters of these types vary widely and do not appear sufficiently similar to offer meaningful guidance. Toyota continues to evaluate these matters and expects that it may have resolution discussions from time to time in some of them. Although Toyota cannot estimate a reasonable range of loss based on currently available information, the resolution of the recall-related matters could have an adverse effect on Toyota's financial position, results of operations or cash flows.

Other Proceedings

Toyota has various other legal actions, other governmental proceedings and other claims pending against it, including other product liability claims in the United States. For the same reasons discussed above relating to the recall-related legal proceedings, Toyota is unable to estimate a range of reasonably possible loss, if any, beyond the amounts accrued, with respect to these other proceedings. Based upon information currently available to Toyota, however, Toyota believes that its losses from these matters, if any, would not have a material adverse effect on Toyota's financial position, results of operations or cash flows.

Notes to Unaudited Consolidated Financial Statements

Environmental Matters

The European Union brought into effect a directive that requires member states to promulgate regulations implementing automobile manufacturers shall bear the costs for taking back end-of-life vehicles and dismantling and recycling those vehicles. Currently, there are uncertainties surrounding the implementation of the applicable regulations in different European Union member states, particularly regarding manufacturer responsibilities and resultant expenses that may be incurred. Based on the legislation that has been enacted to date, Toyota has provided for its estimated liability. Although Toyota does not expect its compliance with the directive to result in significant cash expenditures, Toyota is continuing to assess the impact of this future legislation on Toyota's financial position, results of operations and cash flows.

6. Segment data:

The operating segments reported below are the segments of Toyota for which separate financial information is available and for which operating income/loss amounts are evaluated regularly by executive management in deciding how to allocate resources and in assessing performance.

The major portions of Toyota's operations on a worldwide basis are derived from the Automotive and Financial Services business segments. The Automotive segment designs, manufactures and distributes sedans, minivans, compact cars, sport-utility vehicles, trucks and related parts and accessories. The Financial Services segment consists primarily of financing, and vehicle and equipment leasing operations to assist in the merchandising of the parent company and its affiliated companies products as well as other products. The All Other segment includes the design, manufacturing and sales of housing, telecommunications and other business.

The following tables present certain information regarding Toyota's industry segments and operations by geographic areas and overseas revenues by destination for the first half and the second quarter ended September 30, 2012 and 2013.

[&]quot;Other" consists of Central and South America, Oceania and Africa.

Revenues are attributed to geographies based on the country location of the parent company or subsidiary that transacted the sale with the external customer.

Transfers between industries segments or geographic areas are made at amounts which Toyota's management believes approximate arm's-length transactions. In measuring the reportable segments' income or losses, operating income consists of revenue less operating expenses.

Notes to Unaudited Consolidated Financial Statements

Overseas Revenues by destination -

The following information shows revenues that are attributed to countries based on location of customers, excluding customers in Japan. In addition to the disclosure requirements under U.S.GAAP, Toyota discloses this information in order to provide financial statement users with valuable information.

Notes to Unaudited Consolidated Financial Statements

Stock options that were not included in the computation of diluted net income attributable to Toyota Motor Corporation per share for the first half ended September 30, 2012 and 2013 were 11,576 thousand shares and 2,663 thousand shares, and for the second quarter ended September 30, 2012 and 2013 were 11,576 thousand shares and 1,523 thousand shares, respectively, because the options' exercise prices were greater than the average market price per common share during the period.

On June 14, 2013, at the Ordinary General Shareholders' Meeting, the shareholders of the parent company approved to distribute year-end cash dividends of ¥190,046 million, ¥60 per share, effective on June 17, 2013. On November 6, 2013, the Board of Directors of the parent company resolved to distribute interim cash dividends of ¥205,984 million, ¥65 per share, effective on November 27, 2013.

Notes to Unaudited Consolidated Financial Statements

8. Fair value measurements:

In accordance with U.S.GAAP, Toyota classifies fair value into three levels of input as follows which are used to measure it.

Level 1: Quoted prices in active markets for identical assets or liabilities

Level 2: Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the assets or liabilities

Level 3: Unobservable inputs for assets or liabilities

The following table summarizes the fair values of the assets and liabilities measured at fair value on a recurring basis at March 31, 2013 and September 30, 2013. Transfers between levels of the fair value are recognized at the end of their respective reporting periods:

Assets Cash equivalents Time deposits Marketable securities and other securities investments 245,264 375,941 — 621 — 57,572 — 57	Yen in millions

The following is description of the assets and liabilities measured at fair value, information about the valuation techniques used to measure fair value, key inputs and significant assumptions:

Cash equivalents and time deposits -

Cash equivalents include money market funds and other investments with original maturities of three months or less. Cash equivalents classified in Level 2 include primarily negotiable certificate of deposit with original maturities of three months or less. These are measured at fair value using observable interest rates in the market. Time deposits include negotiable certificate of deposit with original maturities over three months. These are measured at fair value using observable interest rates in the market.

Marketable securities and other securities investments -

Marketable securities and other securities investments include public and corporate bonds, common stocks and other investments. Public and corporate bonds include primarily government bonds and represent 49% of Japanese bonds, and 51% of U.S., European and other bonds as of March 31, 2013, and 53% of Japanese bonds, and 47% of U.S., European and other bonds as of September 30, 2013. Listed stocks on the Japanese stock markets represent 85% and 88% of common stocks as of March 31, 2013 and September 30, 2013, respectively. Toyota uses primarily quoted market prices for identical assets to measure fair value of these securities. "Other" includes primarily investment trusts. Generally, Toyota uses quoted market prices for similar assets or quoted non-active market prices for identical assets to measure fair value of these securities. These assets are classified in Level 2.

Notes to Unaudited Consolidated Financial Statements

Derivative financial instruments -

See note 4 to the consolidated financial statements about derivative financial instruments. Toyota primarily estimates the fair value of derivative financial instruments using industry-standard valuation models that require observable inputs including interest rates and foreign exchange rates, and the contractual terms. The usage of these models does not require significant judgment to be applied. These derivative financial instruments are classified in Level 2. In other certain cases when market data is not available, key inputs to the fair value measurement include quotes from counterparties, and other market data. Toyota assesses the reasonableness of changes of the quotes using observable market data. These derivative financial instruments are classified in Level 3. Toyota's derivative fair value measurements consider assumptions about counterparty and our own non-performance risk, using such as credit default probabilities.

The changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the first half and the second quarter ended September 30, 2012 and 2013 were not material.

Certain assets and liabilities are measured at fair value on a nonrecurring basis. The assets and liabilities measured at fair value on a nonrecurring basis for the first half and the second quarter ended September 30, 2012 and 2013 were not material.

Notes to Unaudited Consolidated Financial Statements

9. Accumulated Other Comprehensive Income:

Changes in accumulated other comprehensive income (loss) are as follows:

_	Yen in millions			
	Foreign currency translation adjustments	Unrealized gains (losses) on securities	Pensionliability adjustments	Total
Balance at March 31, 2013	(813,480)	666,813	(209,456)	(356,123)
Other comprehensive income (loss) before reclassifications Reclassifications	94,631	311,431 (5,865)	(1,799) 3,888	404,263 (1,977)
Other comprehensive income (loss), net of tax	94,631	305,566	2,089	402,286
Less: Other comprehensive income attributable to noncontrolling interests	8,440	(5,175)	(779)	2,486
Balance at September 30, 2013	(710,409)	967,204	(208,146)	48,649

Reclassifications consist of the following:

		Yen in millions		
	For the first half ended September 30, 2013	Affected line items in the consolidated statements of income		
Unrealized gains (losses) on securities:	3,930	Financing operations		
	5,079	Foreign exchange gain, net		
	(18,543)	Other income, net		
	(9,534)	Income before income taxes and equity in earnings of affiliated companies		
	3,827	Provision for income taxes		
	(158)	Equity in earnings of affiliated companies		
	(5,865)	Net income		
Pension liability adjustments:				
Recognized net actuarial loss	8,623	*1		
Amortization of prior service costs	(2,462)	*1		
	6,161	Income before income taxes and equity in earnings of affiliated companies		
	(2,273)	Provision for income taxes		
	3,888	Net income		
Total reclassifications, net of tax	(1,977)			

Amounts of reclassifications in parentheses indicate gains in the consolidated statements of income.

^{*1:} These components are included in the computation of net periodic pension cost.
