During the three months ended June 30, 2017, pursuant to its Medium-Term Management Strategy, adopted in May 2015, entitled "Towards the Next Stage 2.0," NTT implemented measures to embark on a profit growth track by accelerating its self-transformation as a "Value Partner."

#### <Efforts to Expand NTT's Global Business and Increase Profit Generation>

NTT Group seeks to establish and expand its global cloud service as a cornerstone of its business operations, and strengthened its efforts to accelerate overseas profit generation through the following initiatives.

Specifically, NTT Group promoted cross-selling through collaboration among its group companies, including businesses related to global networks, cloud migration, and IT outsourcing. In addition, in response to increased demand for data center services, NTT launched its Dallas TX1 Data Center in the United States, one of the largest data centers in the world, and in Europe launched the Germany Munich 2 Data Center.

Furthermore, each NTT Group Company has been engaged in strengthening and increasing the efficiency of its services and operations, and implementing cost reduction and profit generation measures through, among other things, reviewing its delivery systems.

#### < Efforts to Optimize Domestic Network Businesses and Enhance Profitability>

NTT Group works to enhance profitability by creating high value-added services as well as optimizing capital investments and reducing costs for its domestic network businesses, and works to improve the efficiency of its facility use and reduce procurement costs, in addition to simplifying and streamlining its network systems.

In the regional communications business segment, NTT promoted initiatives for its "Hikari Collaboration Model" and subscriptions for Hikari access services for the "Hikari Collaboration Model" reached 9.57 million. In the mobile communications business segment, NTT worked to continuously enhance profitability by promoting the expansion of its "Kake-hodai & Pake-aeru" billing plan, for which subscriptions reached over 38.0 million. For example, NTT began offering the "Simple Plan," a new basic plan that offers lower rates than previous plans that allows free calls between family members, geared towards customers with low usage rates and who mainly only call family members, and also began offering the "docomo with," a discount monthly plan for customers who purchase select handsets covered by the plan, geared towards customers who use one device for a long period of time.

<Efforts to Achieve Sustainable Growth >

NTT Group will support the communications services field as a Gold Partner (Telecommunications Services) for the Olympic and Paralympic Games Tokyo 2020, and sees the initiative to bring about Society 5.0 (the creation of a new smart society that helps to resolve social issues), which is being promoted through public-private partnerships, as a great opportunity to utilize its collective strength.

NTT Group plans to make use of these opportunities to further accelerate migration to the B2B2X model and, together with businesses in other fields and local governments, strengthen measures aimed at creating services that will become the standards of the next generation.

Specifically, NTT entered into a "Top Partner Agreement" and an "Official Technology Partner Agreement" with the J. League, aiming for regional development mainly through collaborations with club soccer teams, and for the advancement of digital marketing through new viewing experiences. In addition, in collaboration with the National Federation of Livestock Agriculture Cooperative Associations and the Computer Associated Laboratory, Inc., NTT began demonstration experiments aimed to prevent accidental beef cattle deaths caused by falls via notifications to the cattle farmer on a smartphone or other device upon a beef cattle fall, utilizing Wi-Fi and analysis technology of image data.

- Notes: (1) The consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States.
  - (2) NTT, NTT East, NTT West, NTT Communications, and NTT DOCOMO are Gold Partners (Telecommunications Services) for the Olympic and Paralympic Games Tokyo 2020.

## NIPPON TELEGRAPH AND TELEPHONE CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

## 1. Summary of significant accounting policies:

As permitted by the "Ordinance on the Terminology, Forms, and Preparation Methods of Quarterly Consolidated Financial Statements" (Japanese Cabinet Office Ordinance No. 64 of 2007), the accompanying consolidated balance sheets at March 31 and June 30, 2017, the consolidated statements of income and the consolidated statements of comprehensive income for the three months ended June 30, 2016 and 2017 and the consolidated statements of cash flows for the three months ended June 30, 2016 and 2017 of NTT and its subsidiaries (collectively with NTT, "NTT Group") have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). Certain disclosures required by U.S. GAAP have been omitted.

## (1) Application of New Accounting Standards

#### Balance sheet classification of deferred taxes -

On November 20, 2015, the FASB issued ASU2015-17 "Balance sheet classification of deferred taxes" which requires that all deferred tax liabilities and assets be classified as noncurrent on the balance sheet.

Effective April 1, 2017, NTT Group adopted this ASU prospectively and prior periods were not retrospectively adjusted.

## (2) Change in Fiscal Year End of Certain Subsidiaries

As of April 1, 2016, certain of NTT's consolidated subsidiaries changed their fiscal year ends from December 31 to March 31, thereby eliminating a three-month lag between their fiscal year ends and NTT's fiscal year end in NTT's quarterly consolidated financial statements. The elimination of this lag was applied as a change in accounting policy. NTT did not make any retrospective adjustments to its financial statements as these changes did not have a material impact on the consolidated financial statements for the fiscal year ended March 31, 2016. As a result of this change, NTT's retained earnings, accumulated other comprehensive income (loss), and noncontrolling interests have decreased by ¥214 million, ¥1,454 million and ¥1,408 million, respectively, as of the beginning of the previous fiscal year. In addition, the change in cash and cash equivalents resulting from this change in fiscal year end is presented in the consolidated statements of cash flows under "Increase (decrease) in cash and cash equivalents due to change in fiscal year end of consolidated subsidiaries."

As of April 1, 2017, certain of NTT's consolidated subsidiaries changed their fiscal year ends from December 31 or January 31 to March 31, thereby eliminating a three-month or two-month lag between their fiscal year ends and NTT's fiscal year end in NTT's quarterly consolidated financial statements. The elimination of this lag was applied as a change in accounting policy. NTT did not make any retrospective adjustments to its financial statements as these changes did not have a material impact on the consolidated financial statements for the three months ended June 30, 2016 or the year ended March 31, 2017. As a result of this change, NTT's retained earnings, accumulated other comprehensive income (loss) and noncontrolling interests have increased by ¥909 million, ¥484 million and ¥1,180 million, respectively, as of the beginning of the current fiscal year. In addition, the change in cash and cash equivalents resulting from this change in fiscal year end is presented in the consolidated statements of cash flows under "Increase (decrease) in cash and cash equivalents due to change in fiscal year end of consolidated subsidiaries."

## (3) Earnings per Share

Basic earnings per share ("EPS") is computed based on the average number of shares outstanding during the period. Diluted EPS assumes the dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock. Since NTT did not issue dilutive securities for the three months ended June 30, 2016 and 2017, there is no difference between basic EPS and diluted EPS.

#### (4) Reclassifications

Certain items for prior periods' financial statements have been reclassified to conform to the presentation for the three months ended June 30, 2017.

## (5) Recently Issued Accounting Standards

## **Revenue from Contracts with Customers –**

On May 28, 2014, the FASB issued ASU 2014-09 "Revenue from Contracts with Customers," which requires an entity to recognize revenue when the entity transfers control of promised goods or services to customers. Revenue is recognized in an amount that reflects the consideration an entity expects to receive in exchange for those goods or services. An entity also is required to disclose sufficient quantitative and qualitative information to enable users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective.

The FASB also issued ASU 2016-08 "Principal versus Agent Considerations (Reporting Revenue Gross versus Net)," ASU 2016-10 "Identifying Performance Obligations and Licensing," ASU 2016-12 "Narrow-Scope Improvements and Practical Expedients," ASU 2016-20 "Technical Corrections and Improvements to Topic 606," and ASU 2017-05 "Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets" in March, April, May and December 2016, and February 2017, respectively, to amend ASU 2014-09 partially.

On August 12, 2015, the FASB issued ASU 2015-14 "Revenue from Contracts with Customers: Deferral of the Effective Date," and deferred the effective date of ASU 2014-09 by one year. Consequently, the new standard is effective for annual reporting periods beginning after December 15, 2017. The standard is expected to take effect for NTT Group on April 1, 2018. Early adoption of the standard as of April 1, 2017 would also be permitted.

The two permitted transition methods under the new standard are the full retrospective method, or the modified retrospective method. Under the full retrospective method, all periods presented will be updated upon adoption to conform to the new standard and a cumulative adjustment for effects on periods prior to the reporting period will be recorded to retained earnings at the beginning of the initial reporting period. Under the modified retrospective approach, the current reporting period will be updated to conform to the new standard and a cumulative adjustment for effects of applying the new standard to periods prior to the reporting period that includes the date of initial application is recorded to retained earnings as of the date of initial application, and also incremental disclosures related to the amount affected by the application of this new standard are required.

NTT has not decided on a transition method and is currently evaluating the impact of the new standard on NTT's consolidated financial statements and related disclosures. The impact on revenue resulting from the application of the new standard will be subject to assessments that are dependent on many variables, including, but not limited to, the terms, the transaction prices including discounts and the mixture of the goods and services of NTT's contractual arrangements. While NTT is continuing to assess all potential impacts resulting from the application of the new standard, NTT believes that the most significant impacts may include the following items:

- The new standard requires the recognition of incremental costs of obtaining contacts and direct costs of fulfilling contracts with customers as assets. Under the current standard, those costs relating to communication services provided on the Regional communications business, the Long distance and international communications business, and the Mobile communications business are capitalized and amortized up to the upfront fees as the upper limit over the estimated average period of the subscription for each service. After adopting the new standard, all of those costs will be capitalized, and therefore, part of the sales commissions and other charges that have previously been treated as expenses will be recognized as additional assets.
- The new standard requires that if customers are granted by an entity the option to acquire additional goods or services at a discount by a contract agreed between the customer and the entity, the entity shall identify this option as a separate performance obligation upon granting such option as a part of the consideration of the transaction being recognized as contract liabilities, and recognize revenue when the additional good or service is transferred at a discount to the customer or when such option expires. Under the current standard, NTT Group records accrued liabilities relating to the points that customers earn. After adopting the new standard, NTT Group will recognize a part of the consideration for transactions of mobile communications and other services as contract liabilities at the time when the points are granted, and recognize revenue when points are used for additional goods or services at a discount.

NTT Group is in the process of setting up operating processes and internal controls for the adoption of the new revenue recognition standard.

## Recognition and Measurement of Financial Assets and Financial Liabilities -

On January 5, 2016, the FASB issued ASU 2016-01 "Recognition and Measurement of Financial Assets and Financial Liabilities," which makes targeted improvements to the accounting for, and presentation and disclosure of, financial instruments. ASU 2016-01 requires that most equity investments be measured at fair value, with subsequent changes in fair value recognized in net income. ASU 2016-01 does not affect the accounting for investments that would otherwise be consolidated or accounted for under the equity method. The new standard also affects the recognition of changes in fair value of financial liabilities under the fair value option and the presentation and disclosure requirements for financial instruments. ASU 2016-01 is effective for fiscal years beginning after December 15, 2017. The new standard is expected to take effect for NTT Group on April 1, 2018.

NTT is currently evaluating the effect of adopting the ASU.

## Leases -

On February 25, 2016, the FASB issued ASU 2016-02 "Leases," which requires all lessees to recognize right-of-use assets and lease liabilities, principally. The new standard is effective for fiscal years beginning after December 15, 2018. The new standard is expected to take effect for NTT Group on April 1, 2019. Early adoption is permitted.

The adoption of the new accounting standard is expected to result in the recognition of additional right-of-use assets and lease liabilities. NTT is considering the scope and the amounts of assets and liabilities to be recognized.

## Simplifying the Test for Goodwill Impairment –

On January 26, 2017, the FASB issued ASU 2017-04 "Simplifying the Test for Goodwill Impairment," which eliminates Step 2 from the goodwill impairment test. Instead, the amendments in this update require that an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount and an entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value. ASU 2017-04 is effective for fiscal years beginning after December 15, 2019 on a prospective basis. The new standard is expected to take effect for NTT Group on April 1, 2020. Early adoption of the standard for goodwill impairment tests with measurement dates after January 1, 2017 would also be permitted.

NTT is currently evaluating the effect of adopting the ASU.

#### Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost –

On March 10, 2017, the FASB issued ASU2017-07 "Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost," which requires that employers report the service cost component in the same line item(s) as other employee compensation costs arising from services rendered during the period, and report the other components of net benefit cost separately from the service cost component and outside a subtotal of operating income. Only the service cost component will be eligible for capitalization. The updated presentation of net benefit cost in an employer's income statement is to be applied retrospectively while the change in capitalized benefit cost is to be applied prospectively. ASU 2017-07 is effective for fiscal years beginning after December 15, 2017. The standard is expected to take effect for NTT Group on April 1, 2018. Early adoption of the standard as of April 1, 2017 would also be permitted.

NTT is currently evaluating the effect of adopting the ASU.

## 4. Fair value measurements:

The inputs to valuation techniques used to measure fair value are required to be categorized by fair value hierarchy. The fair value hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to measurements involving significant unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1 Quoted prices for identical assets or liabilities in active markets
- Level 2 Quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in inactive markets, inputs derived principally from observable market data
- Level 3 Unobservable inputs

Assets and liabilities measured at fair value on a recurring basis as of March 31 and June 30, 2017 are as follows:

## Available-for-sale securities -

Available-for-sale securities comprise marketable equity securities and debt securities. If active market prices are available, fair value is measured by quoted prices for identical assets in active markets, which is classified as Level 1. If active market prices are not available, fair value is measured by inputs derived principally from observable market data provided by financial institutions, which is classified as Level 2. In cases in which fair value is measured by inputs derived from unobservable data, it is classified as Level 3.

#### Derivatives -

Derivatives comprise forward exchange contracts, interest rate swap agreements, currency swap agreements and currency option agreements. Fair value of derivatives is measured by inputs derived principally from observable market data provided by financial institutions, which is classified as Level 2.

Assets and liabilities measured at fair value on a nonrecurring basis for the three months ended June 30, 2016 and 2017 were immaterial.

## 5. Segment information:

Operating segments are components of NTT Group 1) that engage in business activities, 2) whose operating results are regularly reviewed by NTT Group's chief operating decision maker to make decisions on the allocation of financial resources and to evaluate business performance, and 3) for which discrete financial information is available. Accounting policies used to determine segment profit/loss are consistent with those used to prepare the consolidated financial statements in accordance with accounting principles generally accepted in the United States.

The long distance and international communications business segment principally comprises revenues from fixed voice related services, IP/packet communications services, system integration services and other operating revenues.

The mobile communications business segment principally comprises revenues from mobile voice related services, IP/packet communications services and sales of telecommunications equipment.

The data communications business segment comprises revenues from system integration services.

The other segment principally comprises operating revenues from such activities as building maintenance, real estate rental, systems development, leasing and research and development.

NTT manages these financing receivables by classifying them into "Installment sales receivable," "Lease receivable," "Loans receivable," "Credit receivable" and "Others."

The allowance for doubtful accounts against financing receivables collectively evaluated for impairment is computed based on each historical bad debt experience. The allowance for doubtful accounts against financing receivables individually evaluated for impairment is computed based on the estimated uncollectible amount based on the analysis of certain individual accounts. In addition, financing receivables that are determined to be uncollectible due to, among other factors, the condition of the debtor are written off at the time of determination.

Allowance for doubtful accounts and recorded investment in financing receivables as of June 30, 2016 and 2017, and rollforward of allowance for doubtful accounts for the three months ended June 30, 2016 and 2017 are as follows:
