

Building Society

NATIONWIDE BUILDING SOCIETY

(incorporated in England and Wales under the UK Building Societies Act 1986, as amended)

\$20,000,000,000

Senior Preferred, Senior Non-Preferred and Subordinated Medium-Term Notes Due Twelve Months or More from Date of Issue

We, Nationwide Building Society (the “**Issuer**” or the “**Society**”), may issue at various times up to \$20,000,000,000 aggregate principal amount outstanding at any time of senior preferred, senior non-preferred or subordinated medium-term notes denominated in U.S. dollars or in other currencies or composite currencies. The notes will be issued in series and each series will be the subject of final terms (each “**Final Terms**”). We are privately placing the notes on a delayed or continuous basis to the placement agents named below (the “**Placement Agents**”) or through the Placement Agents to qualified institutional buyers as described in this Base Prospectus under the section entitled “*Plan of Distribution*.”

This Base Prospectus has been approved as a base prospectus by the UK Financial Conduct Authority (the “**FCA**”), as competent authority under Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (“**EUWA**”) (the “**UK Prospectus Regulation**”). The FCA only approves this Base Prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the UK Prospectus Regulation. Such approval should not be considered as an endorsement of the issuer or the quality of the notes that are the subject of this Base Prospectus and investors should make their own assessment as to the suitability of investing in the notes.

See the section entitled “*Risk Factors*” herein for a discussion of certain risks that you should consider prior to making an investment in any notes.

Application has been made to the FCA for such notes issued during the period of twelve months after the date hereof to be admitted to the Official List of the FCA (the “**Official List**”) and to the London Stock Exchange plc (the “**London Stock Exchange**”) for such notes to be admitted to trading on the London Stock Exchange’s main market. The London Stock Exchange’s main market is a UK regulated market for the purposes of Regulation (EU) No 600/2014 on markets in financial instruments as it forms part of domestic law by virtue of the EUWA (“**UK MiFIR**”).

This Base Prospectus is valid for 12 months from its date in relation to the notes which are to be admitted to trading on a regulated market (as defined in UK MiFIR) in the UK (as defined in Financial Services and Markets Act 2000, as amended (“**FSMA**”). The obligation to supplement this Base Prospectus in the event of a significant new factor, material mistake or material inaccuracy does not apply when this Base Prospectus is no longer valid.

By its acquisition of any note, each noteholder (including each beneficial owner) acknowledges and accepts that the Amounts Due arising under any and all notes may be subject to the exercise of the UK Bail-in Power by the Resolution Authority, and acknowledges, accepts, consents, and agrees to be bound by: (a) the effect of the exercise of the UK Bail-in Power by the Resolution Authority, that may include and result in (without limitation) any of the following, or some combination thereof: (i) the reduction of all, or a portion, of the Amounts Due; (ii) the conversion of all, or a portion, of the Amounts Due on the notes into shares, deferred shares (including core capital deferred shares), other securities or other obligations of the Issuer or another person (and the issue to or conferral on the noteholder of such shares, deferred shares (including core capital deferred shares), securities or obligations), including by means of an amendment, modification or variation of the terms of the notes; (iii) the cancellation of the notes; and/or (iv) the amendment or alteration of the maturity of the notes or amendment of the amount of interest payable on the notes, and/or the date on which the interest becomes payable, including by suspending payment for a temporary period; and (b) the variation of the terms of the notes and the Indenture, if necessary, to give effect to the exercise of the UK Bail-in Power by the Resolution Authority.

For the purposes of any note, “**Amounts Due**” means the principal amount of, and any accrued but unpaid interest on, such notes. References to such amounts will include (but will not be limited to) amounts that have become due and payable, but which have not been paid, prior to the exercise of the UK Bail-in Power by the Resolution Authority; “**Resolution Authority**” means the Bank of England or any successor or replacement thereto and/or such other authority in the UK with the ability to exercise the UK Bail-in Power; and “**UK Bail-in Power**” means any write-down, conversion, transfer, modification, moratorium and/or suspension power (including, without limitation, any write-down or conversion powers which may be exercised by the Resolution Authority independently of resolution proceedings) existing from time to time under any laws, regulations, rules or requirements relating to the resolution of banks, building societies, financial holding companies, mixed financial holding companies, credit institutions and/or investment firms (and/or any group company of any of the foregoing) incorporated in the UK in effect and applicable in the UK to the Issuer or other members of our group, including but not limited to any such laws, regulations, rules or requirements that are implemented, adopted or enacted within the context of a resolution regime in the United Kingdom under the Banking Act 2009 and/or the Loss Absorption Regulations (as defined herein), in each case as amended from time to time.

By purchasing the notes, each noteholder (including each beneficial owner) waives any and all claims against The Bank of New York Mellon, London Branch, as trustee, for, agrees not to initiate a suit against the trustee in respect of, and agrees that the trustee will not be liable for, any action that the trustee takes, or abstains from taking, in either case in accordance with the exercise of the UK Bail-in Power by the relevant UK resolution authority with respect to any note.

The notes have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “**Securities Act**”), or any state securities laws, and we are only offering notes outside the United States to non-U.S. persons in reliance on Regulation S under the Securities Act (“**Regulation S**”) and within the United States to qualified institutional buyers (as defined in Rule 144A under the Securities Act (“**Rule 144A**”)) in reliance on Rule 144A or in other transactions exempt from registration under the Securities Act and, in each case, in compliance with applicable securities laws.

In the United Kingdom, this communication is directed only at persons who (i) have professional experience in matters relating to investments or (ii) are persons falling within Articles 49(2)(a) to (d) (“high net worth companies, unincorporated associations etc.”) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (all such persons together being referred to as “**relevant persons**”). This communication must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this communication relates is available only to relevant persons and will be engaged in only with relevant persons.

Each initial and subsequent purchaser of a note will be deemed, by its acceptance or purchase thereof, to have made certain acknowledgements, representations and agreements intended to restrict the resale or other transfer of such note, as described in this Base Prospectus, and, in connection therewith, may be required to provide confirmation of its compliance with such resale or other transfer restrictions in certain cases. See the section entitled “*Transfer Restrictions*” for a further description of these restrictions.

One or more Placement Agents may purchase notes, as principal, from us for resale to investors and other purchasers at varying prices relating to prevailing market prices as determined by any such Placement Agent at the time of resale or, if so agreed, at a fixed offering price. We reserve the right to cancel or modify the medium-term note program described in this Base Prospectus without notice. We, or a Placement Agent if it solicits an offer on an agency basis, may reject any offer to purchase notes in whole or in part. For further information, see the section entitled “*Plan of Distribution*.”

The Placement Agents expect to deliver the notes in book-entry form only through the facilities of The Depository Trust Company (“**DTC**”). Beneficial interests in the notes will be shown on, and transfers thereof will be effected only through, records maintained by DTC and its participants, including Clearstream Banking, S.A., and Euroclear Bank SA/NV.

The rating of certain series of notes to be issued under the medium-term note program described in this Base Prospectus may be specified in the applicable Final Terms. Each of Moody's Investors Service Limited (“**Moody's**”), S&P Global Ratings UK Limited (“**S&P**”) and Fitch Ratings Ltd. (“**Fitch**”) are established in the UK and are registered in accordance with Regulation (EC) No. 1060/2009 as it forms part of domestic law by virtue of the EUWA (the “**UK CRA Regulation**”). None of Moody's, S&P or Fitch is established in the EEA and they have not applied for registration under Regulation (EC) No. 1060/2009 (as amended) (the “**CRA Regulation**”). The ratings issued by Moody's, S&P and Fitch have been endorsed by Moody's Deutschland GmbH, S&P Global Ratings Europe Limited and Fitch Ratings Ireland Limited respectively in accordance with the CRA Regulation. Each of Moody's Deutschland GmbH, S&P Global Ratings Europe Limited and Fitch Ratings Ireland Limited is established in the EEA and registered under the CRA Regulation. As such each of Moody's Deutschland GmbH, S&P Global Ratings Europe Limited and Fitch Ratings Ireland Limited is included in the list of credit rating agencies published by the European Securities and Markets Authority on its website (at <http://www.esma.europa.eu/page/List-registered-and-certified-CRAs>) in accordance with the CRA Regulation.

Notes issued under the program may be rated or unrated by any one or more of the rating agencies referred to above. Where a tranche of notes is rated, such rating will be disclosed in the Final Terms. A security rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.

Amounts payable on Reset Notes and Floating Rate Notes will be calculated by reference to one of the Constant Maturity Treasury Rate, EURIBOR, the Federal Funds Rate, SONIA, SOFR, the Prime Rate or the Treasury Rate as specified in the relevant Final Terms. The applicable Final Terms will indicate whether or not the benchmark is provided by an administrator included in the register of administrators and benchmarks established and maintained by the FCA pursuant to Article 36 of the Regulation (EU) No. 2016/1011 as it forms part of domestic law by virtue of the EUWA (the “**UK Benchmarks Regulation**”). Transitional provisions in the UK Benchmarks Regulation may have the result that the administrator of a particular benchmark is not required to appear in the register of administrators and benchmarks at the date of the Final Terms. The registration status of any administrator under the UK Benchmarks Regulation is a matter of public record and, save where required by applicable law, we do not intend to update the Final Terms to reflect any change in the registration status of the administrator.

NOTICE TO INVESTORS

We are furnishing this Base Prospectus in connection with an offering exempt from registration under the Securities Act and applicable state securities laws solely for the purpose of enabling a prospective investor to consider the purchase of the notes. Delivery of this Base Prospectus to any person or any reproduction of this Base Prospectus, in whole or in part, without our consent is prohibited. The information contained in this Base Prospectus has been provided by us and other sources identified in this Base Prospectus. The source of third-party information is identified where used. Any information provided by a third-party has been accurately reproduced and as far as we are aware and are able to ascertain from information published by that third-party, no facts have been omitted which would render the reproduced information inaccurate or misleading. The Placement Agents or their respective representatives make no representation or warranty, express or implied, as to the accuracy or completeness of the information contained in this Base Prospectus, nor regarding the legality of any investment in the notes. None of the information contained in this Base Prospectus is, or should be relied upon as, a promise or representation by the Placement Agents. You should be aware that since the date of this Base Prospectus there may have been changes in our affairs or otherwise that could affect the accuracy or completeness of the information set forth in this Base Prospectus.

Other than in relation to the documents which are deemed to be incorporated by reference (see “*Documents Incorporated by Reference*”), the information on the websites to which this Base Prospectus refers does not form part of this Base Prospectus and has not been scrutinized or approved by the FCA.

The notes are subject to restrictions on transferability and resale and may not be transferred or resold except as permitted under the Securities Act and applicable state securities laws pursuant to registration or exemption from registration. You should be aware that you may be required to bear the financial risk of an investment in the notes for an indefinite period of time.

You must comply with all applicable laws and regulations in force in any jurisdiction in connection with the distribution of this Base Prospectus and the offer or sale of the notes. If you decide to invest in the notes, you and any subsequent purchaser will be deemed, by acceptance or purchase of a note, to have made certain acknowledgements, representations and agreements to and with us and any applicable Placement Agent intended to restrict the resale or other transfer of the note as described in this Base Prospectus. In addition, you and any subsequent purchaser may be required to provide confirmation of compliance with resale or other transfer restrictions in certain cases. See the section entitled “*Transfer Restrictions*” for more information on these restrictions.

In making your decision whether to invest in the notes, you must rely on your own examination of us and the terms of this offering, including the merits and risks involved. You should not construe the contents of this Base Prospectus as legal, business, financial advice or tax advice. You should consult your own attorney, business advisor, financial advisor or tax advisor.

MiFID II product governance / target market – The Final Terms in respect of any notes may include a legend entitled “MiFID II Product Governance” which will outline the target market assessment in respect of the notes and which channels for distribution of the notes are appropriate. Any person subsequently offering, selling or recommending the notes (a “**distributor**”) should take into consideration the target market assessment; however, a distributor subject to Directive 2014/65/EU (as amended, “**MiFID II**”) is responsible for undertaking its own target market assessment in respect of the notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue of notes about whether, for the purpose of the MiFID II Product Governance rules under EU Delegated Directive 2017/593 (the “**MiFID II Product Governance Rules**”), any Placement Agent subscribing for any notes is a manufacturer in respect of such notes, but otherwise neither the Arranger nor the Placement Agents nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID II Product Governance Rules.

UK MiFIR product governance / target market – The Final Terms in respect of any notes will include a legend entitled “UK MiFIR Product Governance” which will outline the target market assessment in respect of the notes and which channels for distribution of the notes are appropriate. Any person subsequently offering, selling or recommending the notes (a “**distributor**”) should take into consideration the target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the “**UK MiFIR Product Governance Rules**”) is responsible for undertaking its own target market assessment in respect of the notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the UK MiFIR Product Governance Rules, any Placement Agent subscribing for any notes is a manufacturer in respect of such notes, but otherwise neither the Arranger nor the Placement Agent nor any of their respective affiliates will be a manufacturer for the purpose of the UK MiFIR Product Governance Rules.

IMPORTANT – EEA RETAIL INVESTORS – If the Final Terms in respect of any notes includes a legend entitled “*Prohibition of sales to EEA retail investors*”, the notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (“**EEA**”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended or superseded), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “**EU PRIIPs Regulation**”) for offering or selling the notes or otherwise making them available to retail investors in the EEA has been or will be prepared and therefore offering or selling the notes or otherwise making them available to any retail investor in the EEA may be unlawful under the EU PRIIPs Regulation.

IMPORTANT – UK RETAIL INVESTORS – If the Final Terms in respect of any notes includes a legend entitled “*Prohibition of Sales to UK Retail Investors*”, the notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the UK. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the EUWA; or (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently, no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the “**UK PRIIPs Regulation**”) for offering or selling the notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

This Base Prospectus has been prepared on the basis that if any notes are issued with a minimum denomination of less than €100,000 (or equivalent in another currency), such notes will (i) only be admitted to trading on a regulated market (as defined in UK MiFIR), or a specific segment of a regulated market, to which only qualified investors (as defined in the UK Prospectus Regulation) can have access (in which case they shall not be offered or sold to non-qualified investors) or (ii) only be offered to the public pursuant to an exemption under section 86 of the FSMA.

UK BENCHMARKS REGULATION – Interest and/or other amounts payable under the notes may be calculated by reference to certain reference rates. Any such reference rate may constitute a benchmark for the purposes of the UK Benchmarks Regulation. If any such reference rate does constitute such a benchmark, the applicable Final Terms will indicate whether or not the benchmark is provided by an administrator included in the register of administrators and benchmarks established and maintained by the FCA pursuant to Article 36 of Regulation (EU) No. 2016/1011 as it forms part of domestic law by virtue of the EUWA (the “**UK Benchmarks**”).

Regulation”). Transitional provisions in the UK Benchmarks Regulation may have the result that the administrator of a particular benchmark is not required to appear in the register of administrators and benchmarks at the date of the Final Terms. The registration status of any administrator under the UK Benchmarks Regulation is a matter of public record and, save where required by applicable law, we do not intend to update the Final Terms to reflect any change in the registration status of the administrator.

Each potential investor in any notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the relevant notes, the merits and risks of investing in the relevant notes and the information contained or incorporated by reference in this Base Prospectus or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the relevant notes and the impact such investment will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the relevant notes, including where principal or interest is payable in one or more currencies, or where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the relevant notes and be familiar with the behavior of any relevant indices and financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial advisor) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Some notes are complex financial instruments and such instruments may be purchased as a way to reduce risk or enhance yield with an understood, measured, appropriate addition of risk to their overall portfolios. A potential investor should not invest in notes which are complex financial instruments unless it has the expertise (either alone or with the help of a financial advisor) to evaluate how the notes will perform under changing conditions, the resulting effects on the value of such notes and the impact this investment will have on the potential investor's overall investment portfolio.

The notes have not been approved or disapproved by the U.S. Securities and Exchange Commission or any state or foreign securities commission or any regulatory authority. The foregoing authorities have not confirmed the accuracy or determined the adequacy of this Base Prospectus. Any representation to the contrary is a criminal offense.

You should direct any inquiries that you have relating to us, this Base Prospectus or the medium-term note program described in this Base Prospectus to the Placement Agents.

Nationwide Building Society accepts responsibility for the information contained in this Base Prospectus, and to the best of its knowledge the information contained in this Base Prospectus is in accordance with the facts and this Base Prospectus makes no omission likely to affect its import.

In connection with the issue of any tranche of notes, one or more relevant Placement Agents acting as the stabilizing manager(s) (or persons acting on behalf of any stabilizing manager(s)) may over-allot notes or effect transactions with a view to supporting the market price of the notes at a level higher than that which might otherwise prevail. However, stabilization may not necessarily occur. Any stabilization action may begin on or after the date on which adequate public disclosure of the terms of the offer of the relevant tranche of notes is made and, if begun, may cease at any time, but it must end no later than the earlier of 30 days after the issue date of the relevant tranche of notes and 60 days after the date of the allotment of the relevant tranche of notes. Any

stabilization action or over-allotment must be conducted by the relevant stabilizing manager(s) (or persons acting on behalf of any stabilizing manager(s)) in accordance with all applicable laws and rules.

INTERPRETATION

In this Base Prospectus, unless the contrary intention appears, a reference to a law or a provision of a law is a reference to that law or provision as extended, amended or re-enacted.

NOTICE TO CANADIAN INVESTORS

The notes may be sold only to purchasers in Canada purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the notes must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this Base Prospectus or any applicable supplement (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

If applicable, pursuant to section 3A.3 of National Instrument 33-105 Underwriting Conflicts (“**NI 33-105**”), the Placement Agents are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

SINGAPORE: SECTION 309B(1)(C) NOTIFICATION

In connection with Section 309B of the Securities and Futures Act (Chapter 289) of Singapore, as amended or modified from time to time (the “**SFA**”) and the Securities and Futures (Capital Markets Products) Regulations 2018 of Singapore (the “**CMP Regulations 2018**”), we have determined, unless otherwise specified before an offer of notes, and hereby notify all relevant persons (as defined in Section 309A(1) of the SFA), the classification of all the notes to be issued under the medium-term note program described in this Base Prospectus as “prescribed capital markets products” (as defined in the CMP Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

FORWARD-LOOKING STATEMENTS

This Base Prospectus contains projections of some financial data and discloses plans and objectives for the future. This forward-looking information, as defined in the United States Private Securities Litigation Reform Act of 1995, reflects our views regarding future events and financial performance.

The words “believe,” “expect,” “anticipate,” “intend” and “plan” and similar expressions identify forward-looking statements. We caution you not to place undue reliance on these forward-looking statements, which in any event speak only as of the date of this Base Prospectus. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. The risk factors beginning on page 22 of this Base Prospectus and many other factors could cause actual events and results to differ materially from historical results or those anticipated. See the sections entitled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” and “*Description of Business*.”

PRIVATE PLACEMENT OF MEDIUM-TERM NOTES

We have appointed Barclays Capital Inc., BofA Securities, Inc., Citigroup Global Markets Inc., Credit Suisse Securities (USA) LLC, Deutsche Bank Securities Inc., HSBC Securities (USA) Inc., J.P. Morgan Securities LLC, Morgan Stanley & Co. LLC, NatWest Markets Securities Inc., UBS Securities LLC and Wells Fargo Securities, LLC as Placement Agents for the offering, from time to time, of the notes. We will limit the aggregate principal amount of the notes to \$20,000,000,000, or the equivalent of that amount in one or more other currencies or composite currencies, outstanding at any time, subject to increase without the consent of the holders of the notes. We have not registered, and will not register, the notes under the Securities Act and purchasers of the notes may not offer or sell them in the United States or to, or for the account or benefit of, U.S. persons as defined in Regulation S except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. The notes will be offered in the United States only to qualified institutional buyers, as defined in Rule 144A, in transactions exempt from registration under the Securities Act. The notes may be offered outside the United States to non-U.S. persons in accordance with Regulation S. We hereby notify you that the sellers of the notes, other than ourselves, may be relying on the exemption from the provisions of Section 5 of the Securities Act provided by Rule 144A.

You may not transfer notes sold in the United States, except in accordance with the restrictions described under the section entitled “*Transfer Restrictions*” of this Base Prospectus. We will deem each purchaser of the notes in the United States to have made the representations and agreements contained in this Base Prospectus.

We may issue additional notes of any series having identical terms to that of the original notes of that series but for the original issue discount (if any), the first interest payment date, the first interest accrual date, and the offering price. The period of the resale restrictions applicable to any notes previously offered and sold in reliance on Rule 144A shall automatically be extended to the last day of the period of any resale restrictions imposed on any such additional notes.

We will furnish each initial purchaser of the notes with a copy of this Base Prospectus and each applicable amendment and supplement, including the Final Terms to the Base Prospectus describing the terms related to that series of the medium-term notes. Unless the context otherwise requires, references to the Base Prospectus include this Base Prospectus, together with any amendment and supplements applicable to a particular series of the notes.

ENFORCEMENT OF CIVIL LIABILITIES

We are a building society incorporated under the laws of England and Wales. All of our directors and some of the experts named in this Base Prospectus reside outside the United States. All or a substantial portion of our assets and the assets of these individuals are located outside the United States. As a result, it may not be possible for you to effect service of process within the United States upon these individuals or upon us or to enforce against them judgments obtained in U.S. courts based upon the civil liability provisions of the U.S. securities laws. Our English solicitors, Allen & Overy LLP, have advised us that there is also doubt as to the enforceability in the United Kingdom in original actions or in actions for the enforcement of judgments of U.S. courts predicated upon the civil liability provisions of the U.S. securities laws. In addition, awards of punitive damages in actions brought in the United States or elsewhere may be unenforceable in the United Kingdom.

DOCUMENTS INCORPORATED BY REFERENCE

The following documents have previously been published or are published simultaneously with this Base Prospectus and shall be deemed to be incorporated in, and form part of, this Base Prospectus:

- (1) our unaudited condensed consolidated financial statements as of and for the six months ended September 30, 2021 and the auditors' report thereon (contained on pages 64 to 93 (inclusive) of our interim report for the six months ended September 30, 2021);
- (2) our audited consolidated financial statements as of and for the year ended April 4, 2021 and the auditors' report thereon (contained on pages 226 to 325 (inclusive) of our annual report for the year ended April 4, 2021);
- (3) our audited consolidated financial statements as of and for the year ended April 4, 2020 and the auditors' report thereon (contained on pages 220 to 319 (inclusive) of our annual report for the year ended April 4, 2020);
- (4) our audited consolidated financial statements as of and for the year ended April 4, 2019 and the auditors' report thereon (contained on pages 165 to 247 (inclusive) of our annual report for the year ended April 4, 2019);
- (5) the Terms and Conditions of the Notes (previously the Description of the Notes) contained in the previous base prospectuses dated July 6, 2015, pages 164-198 (inclusive), June 23, 2016, pages 156-191, June 30, 2017, pages 170-205 (inclusive), December 20, 2017, pages 218-263 (inclusive), June 26, 2018, pages 193-242 (inclusive), December 18, 2018, pages 216-266 (inclusive), June 25, 2019, pages 201-253 (inclusive), December 20, 2019, pages 216-268 (inclusive), August 19, 2020, pages 208 – 267 (inclusive), January 7, 2021, pages 232-293 (inclusive) and June 29, 2021, pages 219-281 (inclusive).

in each case prepared by us in connection with the program and available at <https://www.nationwide.co.uk/about/investor-relations/funding-programmes/us-mtn-programme>.

Any further information incorporated by reference into the documents indicated in (1) – (5) above does not form part of this Base Prospectus.

Following the publication of this Base Prospectus a supplement may be prepared by us and approved by the FCA in accordance with Article 23 of the UK Prospectus Regulation. Statements contained in any such supplement (or contained in any document incorporated by reference therein) shall, to the extent applicable (whether expressly, by implication or otherwise), be deemed to supersede statements contained in this Base Prospectus or in a document which is incorporated by reference in this Base Prospectus.

We will, in the event of any significant new factor, material mistake or material inaccuracy relating to information included or incorporated by reference in this Base Prospectus which is capable of affecting the

assessment of any notes, prepare a supplement to this Base Prospectus or publish a new prospectus for use in connection with any subsequent issue of notes.

Any non-incorporated parts of a document referred to herein are either deemed not relevant for an investor or are otherwise covered elsewhere in this Base Prospectus.

PRESENTATION OF FINANCIAL INFORMATION

The financial information included in this Base Prospectus as of and for the years ended April 4, 2021, 2020 and 2019 has been extracted from our audited consolidated financial statements prepared in accordance with the International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board, as adopted by the European Commission for use in the European Union (the “EU”). The financial information incorporated by reference in the Base Prospectus as of and for the six month period ended September 30, 2021 has been extracted from our unaudited condensed consolidated financial statements prepared in accordance with IAS 34 as adopted by the EU.

The consolidated financial statements as of and for the years ended April 4, 2021 and April 4, 2020 have been audited by Ernst & Young LLP, independent auditors, as stated in their report incorporated by reference herein.

The consolidated financial statements as of and for the year ended April 4, 2019 have been audited by PricewaterhouseCoopers LLP, independent auditors, as stated in their report incorporated by reference herein.

Certain amounts have been restated in respect of the year ended April 4, 2019 to reflect the adoption on April 5, 2019 of accounting standard, IAS 12 “Income Taxes”, as further described in note 1 to the audited consolidated financial statements as of and for the year ended April 4, 2020, which largely impacts our income statement and members’ interests and equity.

The presentation of the cash flow statement involves judgment by management as to the categorization of different transactions between operating, financing and investing activities in a manner which is most appropriate to the business. To provide a better representation of our cash flows from operating, investing and financing activities, a number of reclassifications and adjustments have been made to such information for the year ended April 4, 2019, as further described in note 1 to the audited consolidated financial statements as of and for the year ended April 4, 2020. As a result, comparability between such information for the year ended April 4, 2018, which has not been reclassified and adjusted, and such information for the years ended April 4, 2019 and 2020, which has been reclassified and adjusted, is therefore affected. These changes had no impact on our net assets or members’ interests and equity at April 4, 2019.

Certain comparative information has been restated in the interim financial statements as at and for the six months ended September 30, 2021 to better reflect the nature of liabilities associated with the UK Bank Levy. Details of such restatements are provided in note 17 to the interim financial statements as at and for the six months ended September 30, 2021. This restatement has no impact on the Group’s or Society’s net assets or members’ interests and equity, or cash and cash equivalents at September 30, 2021.

We have made rounding adjustments to reach some of the figures included in this Base Prospectus. Accordingly, numerical figures shown as totals in some tables may not be an arithmetic aggregation of the figures that preceded them.

Unless otherwise indicated, all references in this Base Prospectus to “pounds sterling,” “sterling” and “£” are to the lawful currency of the United Kingdom, all references to “U.S. dollars,” “dollars,” “USD” and “\$” are to the lawful currency of the United States, all references to “Canadian dollars” or “C\$” are to the lawful currency of Canada and all references to “euro,” “EUR” or “€” are to the single currency of the participating Member States of the European and Monetary Union of the Treaty Establishing the European Community, as amended from time to time.

Alternative performance measures and other non-IFRS financial information

Alternative performance measures

This Base Prospectus includes certain financial information which has not been prepared in accordance with IFRS and which also constitutes Alternative Performance Measures (“APMs”) as defined in the European Securities and Markets Authority Guidelines on Alternative Performance Measures. Certain APMs are discussed

below under “—*Underlying profit before tax*” and are also identified under “—*Selected ratios and other financial data*” in “*Selected Consolidated Financial and Operating Information*” and in “*Selected Statistical Information*”. None of this financial information is subject to any audit or review by independent auditors.

APMs are not a measure of financial performance under IFRS and should not be considered in isolation or as a substitute for operating profit, cash flow from operating activities or other financial measures of our results of operations or liquidity computed in accordance with IFRS. Other companies, including those in financial services industry, may calculate the APMs presented differently from Nationwide. As all companies do not calculate these APMs in the same manner, our presentation of the APMs may not be comparable to other similarly titled APMs presented by other companies.

Underlying profit before tax

Certain sections of this Base Prospectus, including “*Selected Consolidated Financial and Operating Information*” and in “*Selected Statistical Information*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*”, discuss underlying profit before tax, which is not a measure of financial performance under IFRS and which is an APM. In determining underlying profit before tax, we adjust reported profit before tax for certain items which we regard as subject to one-off volatility or as otherwise not being reflective of our ongoing business activities. These items are the costs of the Financial Services Compensation Scheme (the “**FSCS**”), bank levy charges and transformation costs (each of which is added back to reported underlying profit before tax) and losses or gains from derivatives and hedge accounting (which are respectively added to or deducted from reported underlying profit before tax). Accordingly, the purpose of disclosing underlying profit before tax is to present our view of our underlying performance with like for like comparisons of performance across each financial year. However, underlying profit before tax is not a measure of financial performance under IFRS and should not be considered in isolation or as a substitute for operating profit, cash flow from operating activities or other financial measures of our results of operations or liquidity computed in accordance with IFRS. Other companies, including those in our industry, may also calculate underlying financial performance measures differently from Nationwide. As all companies do not calculate these financial measures in the same manner, our presentation of such financial measures may not be comparable to other similarly titled measures of other companies.

The following table sets out a reconciliation of reported profit before tax to underlying profit before tax for the six months ended September 30, 2021 and the three years ended April 4, 2021, 2020 and 2019.

Underlying and statutory results	For the six months ended September 30	For the year ended April 4,		
	2021	2021	2020	2019
		(£ million)		
Net interest income ⁽¹⁾	1,706	3,146	2,810	2,915
Net other income ⁽¹⁾	188	139	236	255
Total underlying income	1,894	3,285	3,046	3,170
Underlying administrative expenses	(1,025)	(2,218)	(2,312)	(2,254)
Impairment losses	34	(190)	(209)	(113)
Underlying provisions for liabilities	(53)	(87)	(56)	(15)
Underlying profit before tax	850	790	469	788
Financial Services Compensation Scheme (FSCS) ⁽²⁾	-	(1)	4	9
Gains/(losses) from derivatives and hedge accounting ⁽²⁾⁽³⁾	3	34	(7)	36
Statutory profit before tax	853	823	466	833

Underlying and statutory results	For the six months ended September 30	For the year ended April 4,		
	2021	2021	2020	2019
		(<i>£ million</i>)		
Taxation ⁽⁴⁾	(168)	(205)	(101)	(197)
Profit after tax⁽⁴⁾	685	618	365	636

Notes:

- (1) The opportunity has been taken to reclassify certain items previously included within net interest income to reflect better the nature of the transactions. As a result, gains and losses recognized on the disposal of investment securities classified as FVOCI (2018: available for sale) are now presented within net other income.
- (2) Within statutory profit:
 - FSCS costs arising from institutional failures are included within provisions for liabilities and charges.
 - Gains from derivatives and hedge accounting are presented separately within total income.
- (3) Although we only use derivatives to hedge market risks, income statement volatility can still arise due to hedge accounting ineffectiveness or because hedge accounting is either not applied or is not achievable. This volatility is largely attributable to accounting rules which do not fully reflect the economic reality of the hedging strategy.
- (4) Comparatives have been restated for the change in treatment of taxation relating to distributions on Additional Tier 1 instruments as detailed in note 1 to the financial statements.

Net interest margin

Net interest margin is not a measure of financial performance under IFRS. In determining net interest margin, we divide our net interest income for each financial year (as shown in our consolidated annual financial statements) by our weighted average total assets. Weighted average total assets are calculated by taking the average of closing monthly total assets over the financial year. We believe that net interest margin is an important supplemental measure of our operating performance and believes that it may be used by securities analysts, investors and other interested parties in the evaluation of our performance in comparison with other building societies and financial institutions. However, net interest margin is not a measure of financial performance under IFRS and should not be considered in isolation or as a substitute for operating profit, cash flow from operating activities or other financial measures of our results of operations or liquidity computed in accordance with IFRS. Other financial institutions may calculate net interest margin differently from Nationwide and our presentation of net interest margin may not be comparable to other similarly titled measures of other financial institutions.

The following table sets out the calculation of our net interest margin for the six months ended September 30, 2021 and the three years ended April 4, 2021, 2020, and 2019.

	For the six months ended September 30	For the year ended April 4,		
	2021	2021	2020	2019
		(<i>£ million, except percentages</i>)		
Net interest income.....	1,706	3,146	2,810	2,915
Weighted average total assets.	280,651	260,500	248,549	238,368
Net interest margin⁽¹⁾	1.24%	1.21%	1.13%	1.22%

(1) Net interest margin is calculated using annualised Net interest income earned on weighted average total assets.

Other APMs

The other APMs included in this document are certain ratios set out in “*Selected Consolidated Financial and Operating Information*” under the heading “*Selected ratios and other financial data*”. Each ratio that constitutes an APM is identified as such in that section. These ratios have been included in this Base Prospectus because we consider them to be important supplemental measures of our operating performance and financial

position and believe that they may be used by securities analysts, investors and other interested parties in the evaluation of our performance in comparison with other building societies and financial institutions.

Other non-IFRS financial information

Capital and leverage ratios

This Base Prospectus includes references to capital and leverage ratios applied under the UK prudential regulation regime (the “**UK Prudential Framework**”) for banks and building societies, which derives in large part from the EU prudential framework set out under the Capital Requirements Directive (2013/36/EU) as amended (“**CRD**”) and, the EU Capital Requirements Regulation (575/2013) as amended (“**CRR**”, and together with the CRD, “**CRD IV**”), which implement the Basel III reforms developed in response to the global financial crisis in the European Union. The Society’s prudential regulator is the Prudential Regulation Authority (the “**PRA**”).

The CRD IV framework, as applicable in the EU as at the end of the transition period (December 31, 2020) relating to the UK’s exit from the EU, has broadly been reflected in the United Kingdom, with CRR and related EU regulations (which had direct binding effect in the United Kingdom until expiration of the transition period) being retained as domestic UK law, with certain exceptions and adjustments, primarily through the European Union (Withdrawal) Act 2018, as amended, and ancillary legislation.

These capital and leverage ratios measure our capital adequacy and financial strength, respectively. The capital ratios comprise:

- the Common Equity Tier 1 capital ratio (“**CET1 ratio**”), which expresses Common Equity Tier 1 (“**CET1**”) capital as a percentage of risk weighted assets (“**RWAs**”). CET1 capital is the highest form of capital defined in the CRR and comprises accumulated reserves and qualifying instruments after regulatory deductions. RWAs represent the value of assets as adjusted in accordance with the CRR to reflect the degree of risk that they represent;
- the tier 1 capital ratio, which expresses total tier 1 capital as a percentage of RWAs. Tier 1 capital comprises CET1 capital and additional tier 1 (“**ATI**”) capital instruments (which are instruments meeting defined criteria under the CRR, including that they convert to CET1 or their principal is written down on the occurrence of a trigger event); and
- the total capital ratio, which expresses total regulatory capital (which is capital defined under applicable regulations less required adjustments and deductions) as a percentage of RWAs.

Each of these capital ratios has been reported in this document on an end point basis under the UK Prudential Framework.

The leverage ratios measure tier 1 capital as a proportion of exposures on a non-risk weighted basis and comprise:

- the CRR leverage ratio (which measures exposures as the sum of (i) on-balance sheet exposures, adjusted for derivatives and securities financing exposures, and (ii) off-balance sheet items); and
- the UK leverage ratio (which is calculated in this document as at April 4, 2019, as at April 4, 2020, as at April 4, 2021 and as at September 30, 2021 on the basis of measurement announced by the PRA in October 2017, which is the same as that used in the CRR leverage ratio save that the exposure measure excludes eligible central bank reserves).

Although the capital and leverage ratios and measures included in this Base Prospectus are not IFRS measures, we believe that they are important to understanding the background of, and rationale for, the offer as well as our capital and leverage position.

None of the capital and leverage ratios and measures included in this Base Prospectus are APMs.

WHERE YOU CAN FIND MORE INFORMATION

Our audited consolidated financial statements are incorporated by reference in this Base Prospectus. We will not distribute these financial statements to holders of notes, but they are available on our website at <https://www.nationwide.co.uk/about/corporate-information/results-and-accounts>. Our website also includes information that is otherwise not included or referenced in this Base Prospectus.

As of the date of this Base Prospectus, we do not file reports or other information with the U.S. Securities and Exchange Commission. To preserve the exemption for resale and other transfers under Rule 144A, we have agreed to furnish the information required pursuant to Rule 144A(d)(4) of the Securities Act if a holder of notes, or a prospective purchaser specified by a holder of notes, requests such information. We will continue to provide such information for so long as we are neither subject to the reporting requirements of Section 13 or 15(d) of the U.S. Securities Exchange Act of 1934, as amended (the “**Exchange Act**”) nor exempt from such reporting requirements pursuant to Rule 12g3-2(b) of the Exchange Act.

OVERVIEW

This overview highlights important information regarding, but is not a complete description of, our medium-term note program. We urge you to read the remainder of this Base Prospectus where we set out a description of our medium-term note program in more detail. You should also review the applicable Final Terms for additional information about the particular series of notes that you are considering purchasing. The following overview does not purport to be complete and is taken from, and is qualified in its entirety by, the remainder of this Base Prospectus and, in relation to the terms and conditions of any particular tranche of notes, the applicable Final Terms.

We may offer senior preferred notes, senior non-preferred notes or subordinated notes under the medium-term note program described in this Base Prospectus, depending on the terms of the applicable Final Terms for each series. In this Base Prospectus, when we refer to “notes” we mean any senior preferred notes, senior non-preferred notes or subordinated notes that we may issue under the medium-term note program described in this Base Prospectus, unless it is clear from the context that we mean otherwise. References to “we,” “us,” “our,” “Nationwide,” “the Group” or “the Society,” mean Nationwide Building Society and its subsidiaries, all of which are consolidated, unless the context otherwise requires.

Issuer	Nationwide Building Society. We are a building society incorporated in England and Wales under the Building Societies Act 1986 (as amended) of the United Kingdom (the “ UK Building Societies Act ”). Our core business is providing personal financial services, including residential mortgage loans, retail savings, general banking services, personal investment products, personal secured and unsecured lending and insurance. We operate through an integrated and diversified distribution network, including branches, automatic telling machines (the “ ATMs ”), call centers, mail and the internet. We have over 16 million members and customers. As a building society, we are a mutual organization managed for the benefit of our “ members ,” who are primarily retail savings customers and residential mortgage customers.
Issuer Legal Entity Identifier (LEI) ...	549300XFX12G42QIKN82
Website of the Issuer:	https://www.nationwide.co.uk/ The information on https://www.nationwide.co.uk/ does not form part of this Base Prospectus, except where that information has otherwise expressly been incorporated by reference into this Base Prospectus.
Placement Agents	Barclays Capital Inc. BofA Securities, Inc. Citigroup Global Markets Inc. Credit Suisse Securities (USA) LLC Deutsche Bank Securities Inc. HSBC Securities (USA) Inc. J.P. Morgan Securities LLC Morgan Stanley & Co. LLC NatWest Markets Securities Inc. UBS Securities LLC Wells Fargo Securities, LLC
Trustee.....	The Bank of New York Mellon, London Branch (the “ Trustee ”). We entered into an indenture with the Trustee relating to the notes

	on December 19, 2017 (as supplemented and amended from time to time, the “ Indenture ”).
Program Size	We may issue up to \$20,000,000,000, or the equivalent of that amount in one or more other currencies or composite currencies, outstanding at any time. We may increase the program size from time to time without the consent of the holders of the notes.
Currencies	Subject to any applicable legal or regulatory restrictions, we may issue notes in any currency as we may agree with the relevant Placement Agent.
Issuance in Series	We may issue senior preferred notes, senior non-preferred notes and subordinated notes in series under an indenture. Within each series, we may issue tranches of notes subject to terms identical to those of other tranches in that series, except that the issue date, the issue price and the amount of the first payment of interest may vary.
Ranking of Senior Preferred Notes ...	<p>The senior preferred notes will constitute our direct, unconditional, unsubordinated and, subject to the provisions set forth in the section entitled “<i>Terms and Conditions of the Notes – Negative Pledge</i>”, unsecured obligations without any preference among themselves and will rank, subject to the provisions set forth in the section entitled “<i>Terms and Conditions of the Notes – Negative Pledge</i>”, equally among themselves, junior to obligations required to be preferred by law (which includes certain member share accounts which are given preferential status by law) and at least equally with all other Ordinary Non-Preferential Debts of the Issuer.</p> <p>Accordingly, subject to the Insolvency Act (and any other Ranking Legislation), the senior preferred notes will (for so long as they are not secured pursuant to the provisions set forth in the section entitled “<i>Terms and Conditions of the Notes – Negative Pledge</i>”) form part of the class of Ordinary Non-Preferential Debts of the Issuer under the Insolvency Act (and any other Ranking Legislation).</p> <p>As used herein:</p> <p>“Hierarchy Order” means The Banks and Building Societies (Priorities on Insolvency) Order 2018;</p> <p>“Insolvency Act” means the Insolvency Act 1986, as amended from time to time (including by the Hierarchy Order);</p> <p>“Ordinary Non-Preferential Debts” means ‘ordinary non-preferential debts’ as defined in Section 387A(3)(a) of the Insolvency Act (or, as the case may be, in the relevant section of any other Ranking Legislation); and</p> <p>“Ranking Legislation” means the Insolvency Act, the Hierarchy Order and, if and to the extent applicable to the Issuer, any other law or regulation which is amended by the Hierarchy Order.</p>
Ranking of Senior Non-Preferred Notes	<p>The senior non-preferred notes may only be issued upon terms such that they (A) have an original contractual maturity of at least one year, and (B) are not derivatives and contain no embedded derivatives for the purposes of Section 387A(3)(b)(ii) of the Insolvency Act (and the relevant section of any other Ranking Legislation).</p> <p>The senior non-preferred notes will constitute our direct and unsecured obligations and, subject to the Insolvency Act (and any other Ranking Legislation), will constitute Secondary Non-Preferential Debts under the Insolvency Act (and any other Ranking</p>

	<p>Legislation) ranking <i>pari passu</i> and without any preference among themselves.</p> <p>Accordingly, subject to the Insolvency Act (and any other Ranking Legislation), claims in respect of principal, interest and any other amount (including, without limitation, any damages awarded for breach of our obligations) in respect of the senior non-preferred notes will, in the event of our winding up or dissolution (subject as otherwise provided in an Excluded Dissolution), rank as provided for Secondary Non-Preferential Debts in the Insolvency Act (and any other Ranking Legislation), as further described in “<i>Terms and Conditions of the Notes—Status and ranking of senior non-preferred notes</i>”.</p> <p>As used herein, “Secondary Non-Preferential Debts” means ‘secondary non-preferential debts’ as defined in Section 387A(3)(b) of the Insolvency Act (or, as the case may be, in the relevant section of any other Ranking Legislation).</p>
Ranking of Subordinated Notes.....	<p>The subordinated notes will constitute our direct, subordinated and unsecured obligations and will rank <i>pari passu</i> and without any preference among themselves.</p> <p>Accordingly, subject to the Insolvency Act (and any other Ranking Legislation), the subordinated notes will form part of the class of Tertiary Non-Preferential Debts under the Insolvency Act (and any other Ranking Legislation), and claims in respect of principal, interest and any other amount (including, without limitation, any damages awarded for breach of our obligations) in respect of the subordinated notes will, in the event of our winding up or dissolution (subject as otherwise provided in an Excluded Dissolution), be subordinated in the manner provided in “<i>Terms and Conditions of the Notes—Status and subordination of subordinated notes</i>”.</p> <p>As used herein, “Tertiary Non-Preferential Debts” means ‘tertiary non-preferential debts’ as defined in Section 387A(3)(c) of the Insolvency Act (or, as the case may be, in the relevant section of any other Ranking Legislation).</p>
Waiver of set-off.....	<p>Subject to applicable law, no holder of any senior non-preferred note or subordinated note nor the Trustee may exercise or claim any right of set-off in respect of any amount owed to it from us arising under or in connection with the senior non-preferred notes or the subordinated notes, and each noteholder shall, by virtue of its being the holder of (or the holder of any interest in) any senior non-preferred note or subordinated note, be deemed to have waived all such rights of set-off.</p>
Issue Price	<p>We may offer notes at par or at a premium or discount to par as specified in the applicable Final Terms.</p>
Maturities	<p>The notes will mature in twelve months or longer as specified in the applicable Final Terms.</p>
Redemption at Maturity	<p>Subject to any purchase or early redemption, the notes will be redeemed at par on the maturity date.</p>
Early Redemption	<p>We are permitted to redeem the notes prior to maturity for taxation reasons and as specified in the applicable Final Terms. We are also permitted to redeem subordinated notes in the event that they cease, in full or in part (as specified in the applicable Final Terms), to qualify towards meeting our Tier 2 capital resources. If so specified</p>

	<p>in the applicable Final Terms, we are also permitted to redeem senior non-preferred notes in the event that they are excluded, in full or in part (as specified in the applicable Final Terms), from our minimum requirements (whether on an individual or consolidated basis) for (A) own funds and eligible liabilities and/or (B) loss absorbing capacity instruments. Additionally, the applicable Final Terms may provide that the notes of a series are redeemable at our option and/or the option of the holder.</p>
Substitution and Variation in respect of Senior Non-Preferred Notes.....	<p>If so specified in the applicable Final Terms, upon the occurrence of a Loss Absorption Disqualification Event we may, subject to certain conditions but without the consent of the noteholders, either substitute all (but not some only) of the relevant series of senior non-preferred notes for, or vary the terms of the relevant series of senior non-preferred notes so that they remain or, as appropriate, become, Loss Absorption Compliant Notes.</p>
Agreement with Respect to the Exercise of UK Bail-in Power.....	<p>Notwithstanding, and to the exclusion of, any other term of any notes or any other agreements, arrangements or understandings between the Issuer and any noteholder (or the Trustee on behalf of any noteholder), by its acquisition of any note (or any interest therein), each noteholder acknowledges and accepts that the amounts due arising under the notes may be subject to the exercise of the UK Bail-in Power, and acknowledges, accepts, consents, and agrees to be bound by the effect of the exercise of the UK Bail-in Power by the Resolution Authority, all in accordance with, and as more fully described in, section “—<i>Agreement with Respect to the Exercise of UK Bail-in Power</i>”.</p>
Repayment of principal and payment of interest after exercise of UK Bail-in Power	<p>No repayment of the principal amount of the notes or payment of interest on the notes will become due and payable after the exercise of any UK Bail-in Power by the relevant UK resolution authority unless, at the time that such repayment or payment, respectively, is scheduled to become due, such repayment or payment would be permitted to be made by us after the exercise of such UK Bail-in Power.</p>
Interest.....	<p>Interest may accrue at a fixed rate or a floating rate. The floating rate may be determined by reference to a base rate, such as SOFR or SONIA, as we agree with the purchaser and describe in the applicable Final Terms.</p>
Reset Notes	<p>Interest on reset notes will be payable in arrear on the dates specified in the Final Terms at the initial rate specified in the Final Terms, and thereafter the rate may be reset with respect to a specified time period by reference to the Reset Reference Rate as described in “<i>Terms and Conditions of the Notes—Interest—Reset Notes</i>”. The rate of interest may be reset on more than one occasion.</p>
Benchmark discontinuation	<p>If so specified in the applicable Final Terms, then in the event that a Benchmark Event or Benchmark Transition Event (as applicable) occurs, such that any rate of interest (or any component part thereof) cannot be determined by reference to the original benchmark or screen rate (as applicable) specified in the applicable Final Terms, then we may (subject to certain conditions) be permitted to substitute such benchmark and/or screen rate (as applicable) with a successor, replacement or alternative benchmark and/or screen rate (with consequent amendment to the terms of the notes and the application of an adjustment spread (which could be positive, negative or zero)) – see “<i>Terms and Conditions of the Notes—Interest—Benchmark discontinuation</i>”.</p>

Interest Payments.....	We may pay interest monthly, quarterly, semi-annually, annually or at such other intervals as we describe in the applicable Final Terms.
Denominations.....	We will issue the senior preferred notes and senior non-preferred notes in minimum denominations of \$200,000 and the subordinated notes in minimum denominations of \$250,000 or, in each case, in integral multiples of \$1,000 in excess of these minimum denominations, or the equivalent of these amounts in other currencies or composite currencies, and in any other denominations in excess of the minimum denominations as we specify in the applicable Final Terms.
Taxation	<p>All payments in respect of the notes will be made without deduction for or on account of United Kingdom withholding taxes, unless the withholding is required by law. In that event, we will (subject to certain exceptions as described in “<i>Terms and Conditions of the Notes—Payment of additional amounts</i>”) pay such additional amounts:</p> <ul style="list-style-type: none"> <li data-bbox="667 808 1396 875">(i) in the case of all senior preferred notes, in respect of interest or principal; or <li data-bbox="667 904 1396 972">(ii) in the case of all subordinated notes and senior non-preferred notes, in respect of interest only, <p>as will result in the holder of any notes receiving such amounts as they would have received in respect of the notes had no such withholding been required.</p> <p>For the avoidance of doubt, in the case of subordinated notes and senior non-preferred notes, we will not pay any additional amounts in respect of principal (including premium and other payments akin to principal, as more fully described herein).</p>
Events of Default	As described in “ <i>Terms and Conditions of the Notes—Events of Default—Senior Preferred Notes</i> ” and “ <i>Terms and Conditions of the Notes—Events of Default—Subordinated Notes and Senior Non-Preferred Notes</i> ”.
Rating	The rating of certain series of notes to be issued under the program may be specified in the applicable Final Terms.
Form, Clearance and Settlement.....	<p>Notes of a series will initially be represented by a global note or global notes in fully registered form (“Global Notes”). Notes offered in the United States to qualified institutional buyers in reliance on Rule 144A will be represented by one or more U.S. global notes (“U.S. Global Notes”) and notes offered outside the United States in reliance on Regulation S will be represented by one or more international global notes (“International Global Notes”).</p> <p>The Global Notes will be issued in fully registered form and, unless specified in any applicable Final Terms, will be held by or on behalf of DTC for the benefit of participants in DTC.</p> <p>No temporary documents of title will be issued.</p> <p>Notes will bear a legend setting forth transfer restrictions and may not be transferred except in compliance with the transfer restrictions set forth therein. Transfers of interests from a U.S. Global Note to an International Global Note are subject to certification requirements.</p>

Governing Law.....	The Indenture and the notes shall be governed by and construed in accordance with the laws of the State of New York; except that Section 11.1 of the Indenture (which contains the subordination provisions in respect of the subordinated notes) and Section 12.1 of the Indenture (which explains the priority of the senior non-preferred notes under the Insolvency Act and any other Ranking Legislation) and the corresponding subordination and ranking provisions, respectively, of each series of such notes pursuant to Section 3.1 of the Indenture and in the terms of such notes will be governed by and construed in accordance with the laws of England, with the intention that such provisions be given full effect in any insolvency proceeding relating to us in England.
Sales and Transfer Restrictions	<p>We have not registered the notes under the Securities Act, and they may not be offered or sold within the United States or to or for the benefit of U.S. persons (as defined in Regulation S), except pursuant to an exemption from, or in a transaction not subject to, the registration requirement of the Securities Act.</p> <p>In addition, there are restrictions on the offer, sale and transfer of the Notes in the United Kingdom, the EEA, Australia, Canada, Hong Kong, Japan, Singapore and Switzerland, and there may be restrictions in other jurisdictions. See the section of this Base Prospectus "<i>Plan of Distribution</i>" below.</p>
Listing	Application has been made to the FCA for the notes to be admitted to listing on the Official List. Application has also been made to the London Stock Exchange for the notes to be admitted to trading on the London Stock Exchange's main market.
Risk Factors	There are certain risks related to any issue of notes under the program, which investors should ensure they fully understand. See the section " <i>Risk Factors</i> " of this Base Prospectus.

RISK FACTORS

We believe that the following factors may affect our ability to fulfil our obligations under the notes. In addition, factors which are specific to the notes are also described below.

In purchasing notes, investors assume the risk that we may become insolvent or otherwise be unable to make all payments due in respect of the notes. There is a wide range of factors which individually or together could result in us becoming unable to make all payments due in respect of the notes. It is not possible to identify all such factors or to determine which factors are most likely to occur, as we may not be aware of all relevant factors and certain factors which we currently deem not to be material may become material as a result of the occurrence of events outside our control. The following is a description of the principal risks associated with the notes and our business as of the date of this Base Prospectus; however, we do not represent that the risks set out in the statements below are exhaustive.

This section of the Base Prospectus is divided into two main sections—“Risks Related to Our Business” and “Risks Related to the Notes.”

Risks Related to Our Business

Our business and prospects are largely driven by the UK mortgage, savings and personal current account markets, which in turn are driven by the UK economy. Consequently, we are subject to inherent risks arising from general economic conditions in the UK.

Our business activities are concentrated in the UK and we offer a range of banking and financial products and services to UK retail customers. As a consequence, our operating results, financial condition and prospects are significantly affected by the general economic conditions in the UK economy and the economic confidence of consumers and businesses.

In recent years, we have benefitted from generally positive economic conditions which helped us grow our core lending and savings operations and also beneficially impacted our underlying impairment charges. The outlook for the UK economy is, however, uncertain, particularly in the short and medium term in light of the outbreak of the Covid-19 pandemic, and the UK’s decision to leave the European Union. The UK experienced a significant contraction in economic activity during 2020 as a result of the Covid-19 pandemic and associated government intervention to reduce the spread of the virus. In response to this crisis, the Bank of England provided significant economic stimulus, including a reduction in its base rate of interest to 0.1% and an increase in the targeted size of its Asset Purchase Facility to £895 billion. Regulators have issued guidance to lenders asking them to act in the best interests of their customers to ease the financial impact on them, as well as releasing counter-cyclical buffer requirements in order to free up resources for lending. While the UK is expected to experience strong economic growth in 2021 and is progressing well with its national vaccination program, there can be no guarantee that new variants of Covid-19 (such as the emergence of the Omicron variant in November 2021) will not be resistant to vaccines and that there will not be further governmental action, both domestically and abroad, to control the spread of the virus. While it is difficult to predict the level and duration of the economic impact of Covid-19 on the UK and global economy at this stage, both the direct health impact of the virus and measures adopted with a view to containing its spread (including lock-downs, travel restrictions and temporary business shut-downs or reduction of capacity and output) have had and are expected to continue to have a material adverse effect on economic conditions and financial markets in the UK and globally at least until the pandemic is under control. See further “*Risks relating to the impact of Covid-19*” below.

Adverse changes and uncertainty in UK economic conditions could lead to a decline in the credit quality of our borrowers and counterparties and have an adverse effect on the quality of our loan portfolio, which could result in a rise in delinquency and default rates, reduce the recoverability and value of our assets and require an increase in our level of provisions for bad and doubtful debts. For the purposes of preparing our financial statements for the six months ended September 30, 2021, we have embedded estimates of the impact of the Covid-19 pandemic and associated actions into our impairment provision. This represents a significant source of

estimation uncertainty but resulted in total impairment provisions of £784 million. See further "*Risks relating to the impact of Covid-19*" below.

Likewise, a significant reduction in the demand for our products and services could negatively impact our business and financial condition. A rise in unemployment could lead to lower consumer spending, loss of income and weak wage growth. These pressures on households may lead to an increase in arrears in our residential mortgage and unsecured lending portfolios, and an associated increase in retail impairments. There can be no assurance that we will not have to increase our provisions for loan losses in the future as a result of increases in non-performing loans and/or for other reasons beyond our control. Material increases in our provisions for loan losses and write-offs/charge-offs could have an adverse effect on our operating results, financial condition and prospects.

The resilience of the UK economic recovery, along with its concomitant impacts on our profitability, remains a risk. This uncertainty extends to the interest rate outlook, where there are plausible scenarios with rates being increased, remaining unchanged or being lowered in the period ahead, depending on economic developments. Any lowering of interest rates could result in the Bank of England's base rate of interest being zero or negative. On August 4, 2021, the Bank of England's Monetary Policy Committee (the "**MPC**") confirmed it now felt it had the ability to deploy a negative base rate of interest, if it were so to choose in the future, following structured engagement with certain firms to ensure the operational readiness of those firms, including with respect to technology capabilities, in the event that a zero or negative bank base rate were to be implemented. However, the MPC noted that this did not imply an expectation or forecast that a negative base rate of interest would need to be deployed in the future and as of the date of this Base Prospectus there appeared to be an expectation in the market that the next change in base rate of interest from the MPC would be an upward move. There is also uncertainty about the UK's future trading relationships, with the impact of trade frictions and non-tariff barriers with the EU still difficult to separate from the impact of the pandemic. There is potential for activity and asset prices to decline should the labor market deteriorate markedly or if strains in the financial system re-emerge and impair the flow of credit to the wider economy. Credit quality could be adversely affected by a renewed increase in unemployment, including as a result of Covid-19. In addition, there may be a weakening in tenant performance in the private rental sector which could adversely impact the buy to let ("**BTL**") market. Any related significant reduction in the demand for our products and services could have a material adverse effect on our operating results, financial condition or prospects.

Worsening economic conditions in the UK could also create uncertainty in relation to the cash flows of our borrowers in the commercial real estate (the "**CRE**") market and in relation to the value of their collateral, leading to further loan loss provisions against our CRE lending. Any weakening in tenant performance and investor appetite could result in increased commercial loan losses which would adversely impact our financial and operational performance. Any further loan loss provisions recorded against our CRE lending could adversely affect our profitability in the future.

Further downward pressure on profitability and growth could occur as a result of a number of external influences, such as the consequences of a more austere economic environment and the impact of global economic forces on the UK economy. Adverse changes in global growth may pose the risk of a further slowdown in the UK's principal export markets, which would have an adverse effect on the broader UK economy. For further information on the risks arising from general economic conditions abroad, see "*—We are vulnerable to disruptions and volatility in the global financial markets and are subject to additional risks arising from general economic conditions in the Eurozone and elsewhere*" below.

Conversely, a strengthened UK economic performance, or a rise in inflationary pressures, may increase the possibility of a higher interest rate environment. In such a scenario, other market participants might offer more competitive product pricing resulting in increased customer attrition. Under such conditions, we may also experience an increase in our cost of funding, as described under "*—Changes to interest rates or monetary policy, whether by the UK, US or other central banking authorities, could affect the financial condition of our customers, clients and counterparties, which could in turn adversely affect us*" below.

Additionally, housing affordability has become more stretched in recent years in some parts of the country. There is a risk that a decline in house sales, including due to house price growth outstripping earnings, could reduce demand for new mortgages in the future. Conversely, significant falls in house prices, as a result of the direct or indirect effects of Covid-19 or otherwise, may reduce the overall amount of equity in our mortgage portfolio. See further, “—*We are exposed to future changes in UK house prices*” below.

Risks relating to the impact of Covid-19.

The Covid-19 pandemic has resulted in unprecedented restrictions on individuals and businesses all around the world, and materially impacted the global economy. Despite significant government intervention, the Covid-19 pandemic has severely impacted both the UK and global economies and the economic environment in which we operate. Any such economic downturn, particularly in the UK housing market, has the potential to impact the Society’s principal risks. We consider that the financial performance framework which has guided our decisions in the past is no longer appropriate in the current environment and we are focusing instead on maintaining strong capital and liquidity positions through the economic cycle. The UK experienced an unprecedented contraction in economic activity during 2020 as a result of the pandemic and associated government intervention to reduce the spread of the virus. Although, the economy has made significant progress towards returning to pre-pandemic output levels, in part due to ongoing policy support and the success of vaccination programs and further adaptation of the UK and global economies, there can be no guarantee that new variants of Covid-19 (including the Omicron variant identified in November 2021) will not be resistant to vaccines and that there will not be further governmental action, both domestically and abroad, to control the spread of the virus.¹ For further information, see “—*Our business and prospects are largely driven by the UK mortgage, savings and personal current account markets, which in turn are driven by the UK economy. Consequently, we are subject to inherent risks arising from general economic conditions in the UK.*”.

Since the start of the Covid-19 pandemic, we have been working with the Government and the wider industry to mitigate the effects of the pandemic, including by offering payment holidays to impacted borrowers in accordance with the requirements of FCA guidance. Initially published in March 2020, the regulator’s “Mortgages and coronavirus: guidance for firms” has been adapted in June, September, November, and January and March 2021 in response to changing needs of mortgage borrowers as the pandemic has progressed. The January guidance means that we were required to continue to offer new payment deferrals to borrowers until March 31, 2021, with a hard stop of July 31, 2021 for borrowers who are looking to extend an existing deferral (on a continuous basis). Total support will be limited to 6 months per borrower. For further information, see “*Supervision and Regulation-Covid-19 relevant legislation and regulation.*”

In response to the pandemic, the Bank of England cut interest rates to historically low levels which may result in longer term economic effects, potentially putting pressure on our financial performance. The potential introduction of negative interest rates may place further pressure on our margins.

With the spread of Covid-19 and the accompanying restrictions, we have modified certain operational practices and may take further actions, as required or as we determine necessary, in order to protect the best interests of our employees, customers, third-party providers and other stakeholders. We have taken measures, such as transitioning our workplace to comply with Government Covid-19 guidance and, where appropriate, enabling colleagues to work from home, as well as working closely with our suppliers to identify and manage constraints and risks faced by their businesses and to ensure that customer services are maintained and uninterrupted, in order to mitigate the impact of Covid-19 on our business.

As well as increased credit risk, including through unemployment and corporate insolvencies which could adversely impact our members and customers and their ability to meet their obligations to us, there have been and may continue to be heightened operational risks related to how we have modified our operations in response to the pandemic, including in the areas of cyber, fraud, people, technology and operational resilience. While we have an ongoing program of model surveillance and extended monitoring of key models to understand

¹https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1033909/Forcomp_November_2021.pdf.

the effects of the pandemic, apply appropriate mitigating actions and develop long term plans to improve model resilience, there can be no assurance that we will be able accurately to model or adequately address the impacts of Covid-19.

In addition, there is an increased risk of material misstatement of expected credit losses under IFRS 9 due to the degree of judgment and inherent uncertainty in the assumptions underlying the reported provisions as a result of the impact of Covid-19. For the purposes of preparing our financial statements for the six months ended September 30, 2021, revised economic scenarios and probability weights have been used to model losses in the residential mortgage, consumer banking and commercial portfolios.

This has resulted in a reduction in balance sheet provisions of £68 million for the six months ended September 30, 2021 (comprising provisions of £44 million, £16 million and £8 million, respectively, in residential mortgage, consumer banking and commercial portfolios). Given the significant uncertainties regarding the level and duration of the impact of Covid-19 and the responses thereto by government and regulators in the UK and globally, there can be no assurance that the estimates and modelling by us will prove accurate or be sufficient to cover actual losses or impairments as a result of Covid-19.

Any and all such events and measures described above could have a material adverse effect on our business, financial condition, results of operations, prospects, liquidity, capital position and credit ratings (including potential changes of outlooks or ratings), as well as on our customers, borrowers, counterparties, employees and suppliers.

We are vulnerable to disruptions and volatility in the global financial markets and are subject to additional risks arising from general economic conditions in the Eurozone and elsewhere.

We are directly and indirectly subject to inherent risks arising from general economic conditions in the UK and other economies, particularly the Eurozone. The outbreak of the Covid-19 pandemic has caused widespread disruption to global financial markets not seen since the global financial crisis of 2007-2008, with the impact on interest rates, credit spreads, foreign exchange rates and commodity, equity and bond prices resulting in the potential for significant market falls, reduced liquidity and rises in volatility. Any future disruptions could again pose systemic risks that negatively affect, among other things:

- consumer confidence;
- levels of unemployment;
- the state of the UK housing market and the CRE sector;
- bond and equity markets;
- counterparty risk;
- the availability and cost of credit;
- transaction volumes in wholesale and retail markets including the availability and duration of funding in wholesale markets;
- the liquidity of the global financial markets; and
- market interest rates, including interest rate rises and the associated impact on affordability,

which in turn could have a material adverse effect on our business, operating results, financial conditions or prospects.

In the UK, there is uncertainty about the current supply chain disruption and cost of gas, and the consequent longevity and trajectory of inflation (and people's expectations for inflation) which are a key part of the decision-making process for the MPC, and hence may present a risk to our performance. In the Eurozone,

there is also uncertainty regarding the trajectory for inflation which, together with high levels of private and public debt, outstanding weaknesses in the financial sector and reform fatigue, is a concern. The possibility of a renewed downturn in the Eurozone could inhibit the UK's own economic recovery, given the extensive economic and financial linkages between the UK and the Eurozone. The UK's trade and current account balances with the Eurozone would be likely to deteriorate further, negatively affecting UK growth. The possibility of a sovereign default and the managed or unanticipated exit of one or more member states from the European Monetary Union could also pose a threat to the stability of financial markets and could cause other risks. For further information, see "*The relationship of the United Kingdom with the European Union after the United Kingdom's withdrawal from the European Union may affect our business*" below.

Although, globally and in the UK, economic and financial market conditions had generally stabilized in the years following the global financial crisis, there have been periods of significant volatility in financial markets around the world, which has generally led to more difficult business conditions for the financial sector. The Covid-19 pandemic has recently had a significant adverse effect on the UK and global economies and financial markets, and could result in further downward pressures and/or increased volatility.

Continued or worsening disruption and volatility in the global financial markets could have a material adverse effect on us, including our ability to access capital and liquidity on financial terms acceptable to us, if at all. If capital markets financing ceases to become available, or becomes significantly more expensive, we may be forced to raise the rates we pay on deposits to attract more customers and we may become unable to maintain certain liability maturities. Any such reduction in availability of funding or increase in capital markets funding costs or deposit rates could have a material adverse effect on our interest margins, liquidity or profitability.

Risks that reduce the availability or increase the cost of our sources of funding, such as retail deposits and wholesale money markets, may have an adverse effect on our business and profitability.

Retail depositors are a significant source of funding for us and, under current legislation, a minimum of 50.0% of our aggregate shares and borrowings (calculated in accordance with the UK Building Societies Act) is required to be in the form of deposits which we accept from members of the public and which are classified as "shares" in our balance sheet as they confer member status on the depositors. Our retail deposits classified as shares totalled £177 billion as at September 30, 2021, £170 billion as at April 4, 2021, £160 billion as at April 4, 2020, and £154 billion as at April 4, 2019, equal to 67.5%, 73.2%, 70.8%, and 70.8%, respectively, of our total shares and borrowings (for the purposes of the UK Building Societies Act) at each such date.

The ongoing availability of retail deposit funding is dependent on a variety of factors outside our control, such as:

- general economic conditions and market volatility;
- the general level of retail deposits in the economy;
- the confidence of retail depositors in the economy in general and in us in particular;
- the impact of technology and 'Open Banking' as further discussed in "*—Competition in the UK personal financial services markets may adversely affect our operations*" below
- the financial services industry specifically; and
- the availability and extent of deposit guarantees, such as under the FSCS.

These or other factors could lead to a reduction in our ability to access retail deposit funding on appropriate terms in the future.

The maintenance and growth of our lending activities depends in large part on the availability of retail deposit funding on appropriate terms. Increases in the cost of such funding together with a low base rate environment could have a negative impact on our margins and profit. Following the Covid-19 pandemic, such

pressures abated with the marketwide reduction in the cost of retail funding, but could return or be exacerbated, including in the event that the UK base rate of interest moves to a negative rate, and, in extreme circumstances, a loss of consumer confidence could result in high levels of withdrawals from our retail deposit base, which could have a material adverse effect on our business, financial position or results of operations.

Like all major financial institutions, we are also dependent on the short- and long-term wholesale funding markets for liquidity. Though our dependence on wholesale funding is less than other financial institutions, due to the requirements of current building society legislation, our business is subject to risks concerning liquidity, which are inherent in financial institutions' operations. If access to liquidity is constrained for a prolonged period of time, this could affect our profitability.

Under exceptional circumstances, our ability to fund our financial obligations could be negatively impacted if we are unable to access funding on commercially practicable terms, or at all. While we expect to have sufficient liquidity to meet our funding requirements, even in a market-wide stress scenario, under extreme and unforeseen circumstances a prolonged and severe restriction on our access to liquidity (including as a result of the withdrawal of government and central bank funding and liquidity support, or a change in the structure, term, cost, availability or accessibility of any such funding or liquidity support) could increase our cost of funding, resulting in a material adverse effect on our profitability or results of operations, and/or could affect our ability to:

- meet our financial obligations as they fall due;
- meet our regulatory minimum liquidity requirements; or
- fulfil our commitments to lend.

In such extreme circumstances we may not be in a position to continue to operate without additional funding support. Inability to access such support could have a material impact on our liquidity. These risks can be exacerbated by many enterprise-specific factors, including an over-reliance on a particular source of funding, changes in credit ratings, or market-wide phenomena such as market dislocation and major disasters. There is also a risk that the funding structure employed by us may prove to be inefficient, giving rise to a level of funding cost that is not sustainable in the long term for us to grow our business or even maintain it at current levels. Our ability to access retail and wholesale funding sources on satisfactory economic terms is subject to a variety of factors, including a number of factors outside of our control, such as liquidity constraints, general market conditions, regulatory requirements and loss of confidence in the UK banking system.

The UK government (the “**Government**”) has in recent years provided significant support to UK financial institutions, including the Bank of England's Term Funding Scheme (“**TFS**”) which opened on September 19, 2016 and closed on February 28, 2018. In addition, in response to the Covid-19 pandemic, the Government and the Bank of England introduced various measures designed to encourage and support the banking sector to continue lending to customers. These measures include, amongst other things, the introduction of: (i) a new Term Funding scheme with additional incentives for Small and Medium-sized Enterprises (“**TFSME**”) (with the express intention, over a 12 month period, to offer at least four-year funding of at least 10% of participants' stock of real economy lending at interest rates at, or very close to, the base rate, with additional funding available for banks that increase lending, especially to small and medium-sized enterprises); the scheme was subsequently extended by six months, and the deadline for drawdowns expired on October 31, 2021; and (ii) other corporate funding facilities, including the UK Covid Corporate Financing Facility (“**CCFF**”), the UK Coronavirus Business Interruption Loan Scheme (“**CBILS**”) and the UK Coronavirus Large Business Interruption Loan Scheme (“**CLBILS**”) and the UK Bounce Back Loan Scheme (“**BBLs**”). While these schemes are now closed to new drawings, the Government has introduced the UK Recovery Loan Scheme (“**RLS**”) to help businesses of any size access loans and other kinds of finance until June 30, 2022.

The continuation and extension of Government schemes designed to support lending may increase or perpetuate competition in the retail lending market, resulting in sustained or intensifying downward pricing pressures and consequent reductions in net interest margins. We also expect to face continued competition in the retail lending market driven by certain ring-fenced banks as they deploy surplus liquidity in lending markets.

We expect to face continuing competition for funding, particularly retail funding on which we are reliant, in the future. Deposit market competition is being driven by smaller lenders with largely non-mortgage loan books whose high asset yields enable them to offer attractive deposit rates. These potential pressures could be exacerbated over time once the sector seeks to replace the funding it obtains from the Bank of England funding schemes. This competition could further increase, impacting our funding costs and adversely affecting our financial position.

Changes to interest rates or monetary policy, whether by the UK, US or other central banking authorities, could affect the financial condition of our customers, clients and counterparties, which could in turn adversely affect us.

The prevailing level of interest rates and the provision or withdrawal of other accommodative monetary and fiscal policies, which are impacted by factors outside of our control, including the fiscal and monetary policies of governments and central banks, as well as UK and international political and economic conditions, affect our results of operations, financial condition and return on capital.

Stimulus measures in the UK and elsewhere have been highly accommodative in recent years, including the Funding for Lending Scheme (“**FLS**”) (which closed in January 2018), the TFS (which closed in February 2018) and the Help to Buy scheme, a Government scheme introduced in 2013 designed to enable buyers to put down a 5% deposit on a home with the Government guaranteeing up to 20% of the mortgage (up to 40% in London) with the remainder funded by a commercial lender. The latter scheme reduced in scope in April 2021 and will cease lending entirely in April 2023, with no central government replacement anticipated. More recently, in response to the Covid-19 pandemic, the Government and the Bank of England introduced additional stimulus measures, including a reduction in the Bank of England base rate of interest to 0.1%, the TFSME (which closed in April 2021) and a new Mortgage Guarantee Scheme with the aim of increasing the availability of 95% loan to value mortgage products. See “*Risks that reduce the availability or increase the cost of our sources of funding, such as retail deposits and wholesale money markets, may have an adverse effect on our business and profitability.*” The relatively long period of stimulus in the UK and elsewhere has increased uncertainty over the impact of its reduction, which could lead to generally weaker than expected growth, or even contracting gross domestic product, reduced business confidence, higher levels of unemployment or underemployment, adverse changes to levels of inflation, potentially higher interest rates and falling property prices in the markets in which we operate, and consequently to an increase in delinquency rates and default rates among our customers. Moreover, higher prevailing interest rates would affect our cost of funding with depositors and creditors, which could adversely affect our profitability, to the extent our margins decline.

The personal financial services sector in the UK remains heavily indebted and vulnerable to increases in unemployment, rising interest rates and/or falling house prices. Changes in the Bank of England base rate affect interest rates payable on a significant portion of our outstanding mortgage loan products over time. Rising interest rates would put pressure on borrowers whose loans are linked to the Bank of England base rate because such borrowers may experience financial stress in repaying at increased rates in the future. A significant portion of our outstanding mortgage loan products are potentially subject to changes in interest rates, resulting in borrowers with a mortgage loan subject to a variable rate of interest or with a mortgage loan for which the related interest rate adjusts following an initial fixed rate or low introductory rate, as applicable, being exposed to increased monthly payments as and when the related mortgage interest rate adjusts upward (or, in the case of a mortgage loan with an initial fixed rate or low introductory rate, at the end of the relevant fixed or introductory period). Since 2009, both variable and fixed interest rates have been at relatively low levels, which has benefited borrowers taking out new loans and those repaying existing variable rate loans, regardless of special or introductory rates. Notwithstanding the uncertainty in the future path of interest rates caused by the Covid-19 pandemic, over time general interest rates may return to historically more normal levels, particularly if inflation persists and/or due to global monetary conditions, including potential rate rises by the U.S. Federal Reserve (anticipated to start in early 2022). Future increases in borrowers’ required monthly payments, which (in the case of a mortgage loan with an initial low introductory rate) may be compounded by any further increase in the related mortgage interest rate during the introductory period, ultimately may result in higher delinquency rates and losses in the future.

Further, in an increasing interest rate environment, borrowers seeking to avoid these increased monthly payments by refinancing their mortgage loans may no longer be able to find available replacement loans at comparably low interest rates. Increased unemployment could lead to borrowers who are made redundant being unable to service the loan payments in a timely fashion which would result in higher levels of arrears, both in our secured residential mortgage loan and unsecured consumer loan portfolios which, in turn, would lead to an increase in our impairment charges in respect of these portfolios. Declines in housing prices may also leave borrowers with insufficient equity in their homes to permit them to refinance. These events, alone or in combination, may contribute to higher delinquency rates and losses.

Conversely, there are risks associated with a continuation of the sustained low interest rate environment or further reductions in interest rates in the UK or other major developed economies, including if the Bank of England were to lower its target rate to a negative rate (as other major central banks, including the European Central Bank and the Bank of Japan, have done). A prolonged period of low interest rates could further reduce incentives for our customers to save, reducing our funding from deposits. Additionally, the low interest rate environment has and may continue to put pressure on net interest income and margins throughout the UK financial industry. Our business, financial performance, net interest income and margin may continue to be adversely affected by the low interest rate environment.

We are exposed to future changes in UK house prices.

The value of our mortgage portfolio is influenced by UK house prices, and a significant portion of our revenue is derived from interest and fees paid on our mortgage portfolio. As at September 30, 2021, £151.6 billion, or 74%, of our loans and advances to customers were UK prime residential mortgages. A decline in house prices in the UK could lead to a reduction in the recovery value of real estate assets held as collateral in the event of a customer default, and could lead to higher impairment provisions, which could reduce our capital and our ability to engage in lending and other income-generating activities. A significant increase in house prices over a short period of time could also have a negative impact on our business by reducing the affordability of homes for buyers, which could lead to a reduction in demand for new mortgages. Sustained volatility in house prices could also discourage potential homebuyers from committing to a purchase, thereby limiting our ability to grow the residential mortgage portfolio. The Covid-19 pandemic and the UK's exit from the EU are both sources of considerable uncertainty about the near-term prospects for UK house prices. Although the impact of the pandemic has been supportive of house prices to-date, significant downwards pressure cannot be discounted.

In addition, we also have a significant portfolio of BTL and legacy mortgages, which amounted to £427 billion, or 21%, of our total loans and advances to customers as at September 30, 2021. The BTL market in the UK is predominantly dependent upon yields from rental income to support mortgage interest payments, and capital gains from capital appreciation. Falling or flat rental rates and decreasing capital values, whether coupled with higher mortgage interest rates or not, could reduce the potential returns from BTL properties. Furthermore, if the Government passes legislation that requires costly upgrades to BTL properties, such as proposed legislation that would increase Minimum Energy Efficiency Standards for BTL properties from E to C by 2028, it could reduce potential returns on certain BTL property investments. In addition, the Government has passed legislation restricting the amount of income tax relief that individual landlords can claim for residential property finance costs (such as mortgage interest) to the basic rate of tax, which may result in lower gross yields, and even negative cashflow, on BTL property investments. This restriction has been introduced gradually, and has been fully in place since April 6, 2020. So far, the measures have had no noticeable impact on BTL market arrears. The Bank of England has also stated that it is considering increasing the regulatory capital requirements of banks holding BTL mortgages on their balance sheets, although no specific proposals have been made. From April 1, 2016, a higher rate of stamp duty land tax (the "SDLT") and, from 1 April 2018, Welsh Land Transactions Tax ("WLTT") has been applied to the purchase of additional properties (such as BTL properties). The current additional rate is 3% (the "3% Surcharge") above the current SDLT and WLTT rates. The Scottish government has implemented a similar additional dwelling supplement tax with effect from 1 April 2016 in respect of land and buildings transaction tax ("LBTT") broadly speaking, the equivalent in Scotland to SDLT. The current additional rate in Scotland is 4% above the current LBTT rates. In addition, from April 1, 2021 persons not resident in the UK, when acquiring freehold or leasehold interests in residential property in England and Northern Ireland, will pay

SDLT at a rate which is 2% above those that apply to purchases made by UK residents. This additional 2% rate for non residents can apply on top of the 3% Surcharge. These factors, and any future changes resulting in a higher SDLT rate, could make the purchase of BTL properties and/or second homes a less viable investment proposition and reduce the demand for related mortgages, which may also affect the resale value of relevant or similar properties.

The Government's intervention into the housing market through buyer assistance schemes, stamp duty holidays (such as the holiday announced in June 2020 to increase the threshold to £500,000, applicable until July 2021 after which the threshold will become £250,000 until October 2021, from when it will become £125,000) enforced or recommended payment holidays or other concessions or allowances on mortgage payments, or indirectly through measures that provide liquidity to the banking sector (as was the case with FLS, TFS and TFSME), may also contribute to volatility in house prices. This could occur, for example, as a result of the sudden end to buyer assistance schemes, which could lead to a decrease in house prices, or due to the extension of funding scheme to the banking sector, which would maintain excess funding liquidity in the mortgage market which has supported a low mortgage interest rate environment, and which could lead to inflation in house prices.

The future impact of these initiatives on the UK housing market and other regulatory changes or Government programs is difficult to predict. Volatility in the UK housing market occurring as a result of these changes, or for any other reason, could have a material adverse effect on our business, financial condition or results of operations.

Given the relatively point-in-time approach used by us for modelling residential mortgage RWAs by comparison with other large UK banking institutions, a reduction in UK house prices, or other deterioration in economic conditions, may have a material impact on our CET1 ratio. The degree to which our CET1 ratio is impacted by such events is likely to change following introduction of more through-the-cycle modelling approaches, which the PRA requires to be in place by the end of January 2022. The results of the concurrent stress testing undertaken by the Bank of England, available on the Bank of England's website, illustrate the impact that certain economic scenarios are projected to have on our capital position.

The relationship of the United Kingdom with the European Union after the United Kingdom's withdrawal from the European Union may affect our business.

On June 23, 2016, the UK held a referendum (the "UK EU Referendum") on its membership of the EU, in which a majority voted for the UK to leave the EU ("Brexit"). Immediately following the result, the UK and global stock and foreign exchange markets commenced a period of significant volatility, including a steep devaluation of the pound sterling.

On January 31, 2020, the United Kingdom ceased to be a member of the EU and the EEA. On December 24, 2020, an agreement in principle was reached in relation to the EU-UK Trade and Cooperation Agreement (the "**Trade and Cooperation Agreement**"), to govern the future relations between the EU and UK following the end of the transition period. The Trade and Cooperation Agreement entered into force on May 1, 2021. The Trade and Cooperation Agreement does not, however, create a detailed framework to govern the cross-border provision of regulated financial services from the United Kingdom into the European Union and from the European Union into the United Kingdom.

The Trade and Cooperation Agreement covers trade in goods and services, establishes a framework for cooperation as to a citizen's security and a governance mechanism. Within the Trade and Cooperation Agreement, the UK and the European Union have made a Joint Declaration on financial services regulatory cooperation ("**Joint Declaration**"). In March 2021, the parties agreed a memorandum of understanding establishing the framework for this cooperation. Despite the memorandum of understanding, there is a significant risk that the UK and the European Union will not reach an agreement on their future relationship in financial services, or may reach a significantly narrower agreement than that envisaged by market participants. There are a number of other areas of uncertainty in connection with the future of the UK and its relationship with the European Union and it is not currently possible to determine the impact that the UK's departure from the European Union and/or any

related matters may have on general economic conditions in the UK, or the impact of these matters on our business or on our regulatory position or the regulatory position of our counterparties relating to European Union regulation or more generally.

To minimize the risks for firms and businesses, the UK government implemented secondary legislation under powers provided in the EUWA to ensure that the UK had a functioning statute book from December 31, 2020. The UK's financial services regulators have also been granted temporary transitional powers to delay or modify certain regulatory obligations firms face pursuant to a statutory instrument made under Section 8 of the EUWA. These modifications are temporary and there can be no assurance that such arrangements will continue to be available in the future.

The pan-European Union authorities, such as the European Commission, have not put in place temporary legislative regimes similar to those in place in the UK to enable continued passporting access, for a time-limited period, for UK firms after their loss of passporting rights from the end of the transition period on December 31, 2020. Some (but not all) national legislators and regulators passed legislation preparing for the prospect of a "hard" Brexit, which has enabled a degree of continuity of access to clients in their jurisdiction. There is, however, little long-term clarity on what the final position will be in many jurisdictions. Many UK firms and businesses have made preparations on the basis that access rights into the European Union will be and have been curtailed as of the application of the Trade and Cooperation Agreement described above.

The continuing effects of the UK's departure from the EU are difficult to predict and there remains both short-term and long-term political and economic uncertainty around the departure that may have a negative impact on the UK economy, affecting its growth. Accordingly, no assurance can be given that the UK's withdrawal from the EU will not adversely affect our business, financial condition and results of operations and/or the market value and/or the liquidity of the notes in the secondary market.

Rating downgrade and/or market sentiment with respect to the Society and the financial services sector and the UK may have an adverse effect on our performance.

The Society and the financial sector

If sentiment towards banks, building societies and/or other financial institutions operating in the United Kingdom, including us, were to deteriorate, or if our ratings and/or the ratings of the sector were to be adversely affected, this may have a material adverse impact on us. In addition, any such change in sentiment or reduction in ratings could result in an increase in the costs of, and a reduction in the availability of, wholesale market funding across the financial sector which could have a material adverse effect on the liquidity and funding of all UK financial services institutions, including us.

Our senior preferred ratings are currently "A+ (stable)" from S&P, "A1 (stable)" from Moody's and "A+ (stable)" from Fitch (December 2019: "A (positive)", "Aa3 (negative)" and "A+ (stable)", respectively) and our short-term ratings are currently "A-1" from S&P, "P-1" from Moody's and "F1" from Fitch (February 2019: "A-1", "P-1" and "F1", respectively). The long-term ratings assigned by each of Moody's and S&P are senior preferred ratings, whereas the long-term rating assigned by Fitch is a senior non-preferred rating. For further information see the section entitled "*Management's Discussion and Analysis of Financial Condition and Results of Operations External Credit Ratings.*"

Any declines in those aspects of our business identified by the rating agencies as significant could adversely affect the rating agencies' perception of our credit and cause them to take negative ratings actions. Any downgrade in our credit ratings could:

- adversely affect our liquidity and competitive position, particularly through cash outflows to meet collateral requirements on existing contracts;
- undermine confidence in our business;

- increase our borrowing costs;
- limit our access to the capital markets; or
- limit the range of counterparties willing to enter into transactions with us.

Our credit ratings are subject to change and could be downgraded as a result of many factors, including the failure to successfully implement our strategies. A downgrade could also lead to a loss of customers and counterparties which could have a material adverse effect on our business, results of operations or financial condition.

If the ratings analysis of any agency that rates our credit is updated to reflect lower forward-looking assumptions of systemic support in the current environment or higher assumptions of the risks in the financial sector, it could result in a downgrade to the outlook or to the credit ratings of UK financial institutions, including us, which could have a material adverse effect on the borrowing costs, liquidity and funding of all UK financial services institutions, including us. Any downgrade in our ratings could also create new obligations or requirements for us under existing contracts with our counterparties that may have a material adverse effect on our business, financial condition, liquidity or results of operations. For example, as at September 30, 2021 we would have needed to provide additional collateral amounting to £0.8 billion in the event of a one notch downgrade by external credit rating agencies or £2.4 billion in the event of a two notch downgrade (subject to management actions that could be taken to reduce the impact of the downgrades).

Market sentiment and ratings downgrades in respect of the UK

Our financial performance has been and will continue to be affected by general political and economic conditions in the UK, the Eurozone and elsewhere, and other adverse developments in the UK or global financial markets would cause our earnings and profitability to decline.

As at the date of this Base Prospectus, the UK's long-term ratings are "AA (stable)" from S&P, "Aa3 (stable)" from Moody's and "AA- (Stable)" from Fitch. Any downgrade of the UK sovereign credit rating or the perception that such a downgrade may occur could destabilize the markets, impact our rating, borrowing costs and ability to fund ourselves and have a material adverse effect on our operating results or financial condition. In addition, a UK sovereign downgrade or the perception that such a downgrade may occur would be likely to depress consumer confidence, restrict the availability, and increase the cost, of funding for individuals and companies, depress economic activity, increase unemployment and/or reduce asset prices. These risks are exacerbated by concerns over general market turmoil, slowing global growth, and trade tensions. Instability within global financial markets might lead to instability in the UK, which could have a material adverse impact on our performance.

Competition in the UK personal financial services markets may adversely affect our operations.

We are currently the fifth largest deposit taker and the second largest provider of residential mortgages in the United Kingdom, with estimated market shares of approximately 9.6% (as calculated by us based on Bank of England data) and 12.4% based on overall mortgage balances (stock) share (according to Bank of England data), respectively, as at September 30, 2021.

We operate in an intensely competitive UK personal financial services market. We compete mainly with other providers of personal finance services, including banks, building societies and insurance companies. In addition, recent technological advances have allowed new competitors to emerge both from within the traditional financial services arena and from outside it, and continued advances in technology may lead to further new entrants from the fintech sector.

For example, both financial institutions and their non-banking competitors face the risk that payments processing and other banking services could be significantly disrupted by technologies, such as private sector 'stablecoins' and other digital currencies, that require no intermediation. New technologies could require us to

spend more to adapt our products, propositions and infrastructure to ensure we remain competitive and can continue to attract and retain new and existing members respectively.

Each of the main personal financial services markets in which we operate is mature and relatively slow growing, which intensifies pressure for firms to take market share from competitors if they are to expand. See “*Competition*” below.

As a consequence, there is a risk that this will create downward pressure on prices, negatively impacting our ability to deliver our strategic income targets and our financial performance. Competition may also intensify in response to consumer demand, further technological changes and the impact of consolidation among our competitors.

As a member-owned business, we are able to provide a financial benefit to our members through the offer of competitive savings and mortgage products. Our member financial benefit is delivered in the form of differentiated pricing and incentives, which we quantify as the sum of our interest rate differential, member reduced fees and incentives. For the half year ended September 30, 2021, we have provided our members with a financial benefit of £145 million (September 30, 2020: £140 million) which is broadly consistent with the value delivered in September 30, 2020. It remains low compared to historic periods primarily due to continued low interest rates on savings accounts. This period of exceptionally low interest rates means it is unlikely that we will meet our member financial benefit target of £400 million for this financial year.

Open banking and regulatory changes to the way in which the personal financial services markets operate could make it harder for us to retain customers and could adversely impact the viability of our business model.

Regulatory action might also increase competitive pressures. For example, the Competition and Markets Authority (the “**CMA**”) and the FCA have undertaken a market investigation and consultations into competition and conduct in the markets in which we operate – see “*Supervision and Regulation—UK Regulation*.” There can be no assurance that our customer base, levels of deposits, revenue or market share will not be adversely affected by the remedial measures and other regulatory actions arising out of such investigation and consultations.

These measures, together with other changes arising from the implementation of the second payment services directive (EU Directive (2015/2366) (“**PSD2**”) in January 2018, are commonly referred to as “open banking” (“**Open Banking**”). While Open Banking presents opportunities for us, there are also significant risks, including if technology is adopted more quickly than anticipated or new propositions offered by competitors attract business away from us or alter customer expectations. Further, the implementation of Open Banking could result in the emergence of new disruptors and competitors, potentially with substantially different business models, that could materially alter the banking environment. Such changes could affect our ability to attract and retain customers, which in turn could potentially adversely affect liquidity and increase our funding costs over time. While we are investing in developing Open Banking solutions to support members’ needs and to mitigate this risk, there can be no assurance that our efforts will be successful or that we will be able to compete effectively with existing competitors and/or new entrants to attract and retain customers. In December 2019, the FCA launched a consultation to explore the opportunities and risks associated with Open Banking; the call for input closed on October 1, 2020. The FCA published a feedback statement on this in March 2021. The CMA issued a consultation on the future oversight of the CMA’s Open Banking remedies, which closed on March 29, 2021. On October 1, 2021, the CMA published an independent report into the management and conduct of the leadership of the Open Banking Implementation Entity (“**OBIE**”). On November 5, 2021, the CMA published an update to set out progress in strengthening corporate governance at the OBIE, and the status of the CMA’s consideration on the future governance of Open Banking. In July 2020, HM Treasury launched a call for evidence as part of the payment landscape review, which closed on October 20, 2020. On October 11, 2021, HM Treasury published its response setting out, at a high level, the Government’s policy agenda for the payments sector. Key priority areas relate to: Faster Payments, unlocking Open Banking, cross-border payments and the legislative/regulatory framework for payments. The Government believes that the best way to tackle authorised push payment scams is to introduce Faster Payments rules setting out reimbursement and liability requirements on all scheme participants. On Open Banking, the Government reiterated its intention to unlock Open Banking to allow consumers to pay for goods and services directly from their accounts creating competition through greater choice, but did not make any

further proposals. In line with the Future Regulatory Framework Review, the Government expects certain areas of the PSRs and EMRs to be taken out of primary legislation and made subject to FCA rule-making powers. This could be a route towards clarifying and improving a range of existing requirements, but at the same time could potentially lead to more frequent rule changes.

Furthermore, increased use of technology may increase our exposure to significant risks associated with cyber security, fraud, IT resilience and data protection, as well as increased compliance costs. For example, under PSD2, we are required to provide third-party providers (“TPPs”) access to customer accounts provided the customer has provided its consent. See “—*If we do not control our operational risks, including, in particular, maintaining cyber security and managing the pace of change around digital products and services, we may be unable to manage our business successfully.*”

Additionally, the implementation of the Independent Commission on Banking's recommendation to separate retail banking activities from wholesale and investment banking activities was carried out by large banking groups operating in the UK in 2019 and has reduced the distinctiveness of the building society model, which we consider to be a competitive advantage. We are not currently subject to the ring-fencing requirements but this framework has altered the business models of ring-fenced banks and may therefore continue to adversely affect our competitive position and that of other mutual institutions. We believe that ring fencing has trapped surplus deposits on the balance sheets of several major UK retail banks which seek to deploy this liquidity in lending markets, which in the medium term is driving further price competition, particularly in mortgages.

The rise of digital banking is changing customer expectations of the availability of banking services. As digital changes make transactions easier and more convenient, we expect customers to transact more frequently, and in many different ways. We may not be able to manage service provision ahead of rising customer expectations or may have competitors who are more successful in meeting demand for digital banking services.

In addition, if our customer service levels were perceived by the market to be materially below those of competitor UK financial institutions, we could lose existing and potential new business. If we are not successful in retaining and strengthening customer relationships, we may lose market share, incur losses on some or all of our activities or fail to attract new deposits or retain existing deposits, which could have a material adverse effect on our business, financial condition or results of operations.

Our guidelines and policies for risk management may prove inadequate for the risks faced by our business and any failure to properly manage the risks which it faces could cause harm to us and our business prospects.

The management of financial and operational risks requires, among other things, robust guidelines and policies for the accurate identification and control of a large number of transactions and events. Such guidelines and policies may not always prove to be adequate in practice. We face a wide range of risks in our business activities, including, in particular:

- liquidity and funding risk, see “—*Risks that reduce the availability or increase the cost of our sources of funding, such as retail deposits and wholesale money markets, may have an adverse effect on our business and profitability*” above;
- credit risk, which is the risk that a borrower or a counterparty fails to pay interest or to repay the principal on a loan or other financial instrument;
- market risks, in particular interest rate risk as well as foreign exchange and bond and equity price risks. Changes in interest rate levels, yield curves and spreads may affect our interest rate margin realized between lending and borrowing costs. Changes in currency rates, particularly in the sterling-dollar and sterling-euro exchange rates, affect the value of assets and liabilities denominated in foreign currencies and may affect income from assets and liabilities denominated in foreign currency. The performance of financial markets may also cause changes in the value of our investment and liquidity portfolios. See also, “—*Changes to interest rates or monetary policy, whether by the UK, US or other central banking authorities, could affect*

the financial condition of our customers, clients and counterparties, which could in turn adversely affect us” above and “—Market risks may adversely impact our business” below; and

- operational risk, see “—If we do not control our operational risks, including, in particular, maintaining cyber security and managing the pace of change around digital products and services, we may be unable to manage our business successfully” below.

We have a range of tools designed to measure and manage the various risks which we face. Some of these methods, such as value-at-risk analyses, are based on historic market behavior. The methods may therefore prove to be inadequate for predicting future risk exposure, which may prove to be significantly greater than what is suggested by historic experience. Historical data may also not adequately allow prediction of circumstances arising due to Government interventions and stimulus packages, which increase the difficulty of evaluating risks. Other methods for risk management are based on evaluation of information regarding markets, customers or other information that is publicly known or otherwise available to us. Such information may not always be correct, updated or correctly evaluated. In addition, even though we constantly measure and monitor our exposures, there can be no assurance that our risk management methods will be effective, particularly in unusual or extreme market conditions. It is difficult to predict with accuracy changes in economic or market conditions and to anticipate the effects that such changes could have on our financial performance and business operations. Unanticipated economic changes or Government interventions could expose us to increased liquidity and funding risk, credit risk, market risks or operational risk, which could have a material adverse effect on our business prospects or results of operations.

If we do not control our operational risks, including, in particular, maintaining cyber security and managing the pace of change around digital products and services, we may be unable to manage our business successfully.

Our success as a financial institution depends on our ability to process a very large number of transactions efficiently and accurately. Operational risk and losses can result from a range of internal and external factors. Internal factors include internal fraud, errors by employees, failure to document transactions properly or to obtain proper internal authorization, failure to comply with regulatory requirements and conduct of business rules and equipment failures, particularly in relation to electronic banking applications. External factors include natural disasters, war, pandemics, terrorist action or the failure of external systems, for example, those of our suppliers or counterparties. These could, for example, prevent our customers from withdrawing cash from our ATMs or from having their salary credited to their accounts with us and, if customers associate their problem with us rather than with the institution causing the problem, this would have an operational and financial impact on our performance. A feature of operational risk is that financial institutions rely on systems and controls such as standard form documentation and electronic banking applications to process high volumes of transactions. As a result, any error in our standard documentation or any defect in our electronic banking applications can be replicated across a large number of transactions before the error or defect is discovered and corrected and this could significantly increase the cost to us of remediating the error or defect, could expose us to the risk of regulatory sanction, unenforceability of contracts and, in extreme cases, could result in significant damage to our reputation.

Increased digital interconnectivity across our customers and suppliers, and the need for resilient IT systems, including hardware, software, cloud computing services and cyber-security, remains an evolving risk to financial institutions including us. We consider that, within the operation and conduct risks profile, IT resilience and cyber security present the main risks, and we focus on striving to protect service availability and customer data. Our implementation of new systems, infrastructures and processes, alongside the maintenance of legacy systems, introduces a level of operational complexity. In an increasingly digital world, customer expectations are rising, with a significantly lower tolerance of service disruption. Ensuring a highly reliable and widely available service requires resilient IT, business systems and processes. Any loss in the integrity and resilience of key systems and processes, data thefts, cyber-attacks, denial of service attacks or breaches of data protection requirements could significantly disrupt our operations and cause significant financial loss and reputational damage to us. This could in turn result in a loss of confidence in us, potentially resulting in existing customers withdrawing deposits and/or deterring prospective new customers.

Meanwhile the significant rise in data used in digital services increases the complexity and cost of managing data securely and effectively. Further, the maturity and sophistication of organized cyber-crime continues to increase and has been highlighted by a number of recent attacks in the financial and non-financial sectors, including payment services. Such attacks have also increased the public awareness of cyber-threats. As a result of the continued increasing threat from cyber-crime, security controls have needed to keep pace to prevent, detect and respond to any threats or attacks. The constant threat posed by a cyber-attack directly impacts the existing risks associated with external fraud, data loss, data integrity and availability. Although we maintain measures designed to ensure the integrity and resilience of key systems and processes, we may be the victim of cyber-attacks, including denial of service attacks which could significantly disrupt our operations and the services we provide to our customers or attacks designed to obtain an illegal financial advantage. Any such attack or any other failure in our IT systems could, among other things, cause significant financial loss and reputational damage to us, and could result in a loss of confidence in us, potentially resulting in existing customers withdrawing deposits and/or deterring prospective new customers.

Significant work has been undertaken to prepare for the planned discontinuation of LIBOR benchmarks by the end of 2021. We have a relatively small number of legacy retail and commercial loans which reference LIBOR, and work is ongoing to manage the impact on the Society and our customers.

Although we have implemented risk controls and loss mitigation actions, and substantial resources are devoted to technology, developing efficient procedures and staff training, it is not possible to implement procedures which are fully effective in controlling each of the operational risks noted above. If such operational risks are not effectively controlled, we may lose market share or, in extreme cases, risk regulatory sanction or reputational damage.

We may not achieve targeted profitability or efficiency savings, which could have an adverse impact on our capital planning and/or results of operations.

We seek to maintain a secure and dependable business for our members through, among other things, generating a level of profit sufficient to meet regulatory capital and future business investment requirements and focusing on how we spend members' money through driving a culture of efficiency.

As a member-owned mutual organization, we aim to make the right level of profit to maintain our financial strength and invest for the future, and we balance these longer-term priorities with delivering value to our members through better rates, incentives and propositions. In recent years, our financial performance framework has focused on parameters that have allowed us to calibrate future performance with a view to achieving the right balance between distributing value to members, investing in the business and maintaining financial strength, including a target profitability range that would enable sustainable capital strength. Upon publication on May 29, 2020 of our preliminary results for the financial year ended April 4, 2020, we announced that we consider that the financial performance framework which has guided our decisions in the past is no longer appropriate in the current environment, and that we are instead focusing on maintaining strong capital and liquidity positions through the economic cycle.

We have cut our costs by £8 million to £1,025 million (September 30, 2020: £1,033 million) as we continue to make the Society more efficient in serving our members. Reductions from reprioritisation of investment spend over the medium term, and lower business as usual run costs have been partly offset by restructuring costs as we took action to reduce our future cost base.

However, there can be no assurance that such targeted cost savings will be achieved. Any failure by us to make sufficient profits to maintain our financial strength and invest for the future and/or to achieve our targeted efficiencies could adversely impact our capital ratios and the results of operations.

Market risks may adversely impact our business.

Market risk is the risk that the net value of, or net income arising from, our assets and liabilities is impacted as a result of changes in market prices or rates, including interest rates or foreign exchange rates.

Changes in interest rate levels, yield curves and spreads may affect the interest rate margin realized between lending and borrowing costs. Changes in currency rates, particularly in the sterling-dollar and sterling-euro exchange rates, affect the value of assets and liabilities denominated in foreign currencies and may affect income from assets and liabilities denominated in foreign currency.

The performance of financial markets may cause changes in the value of our investment and liquidity portfolios. Although we have implemented risk management methods designed to mitigate and control market risks to which we are exposed and our exposures are constantly measured and monitored, there can be no assurance that these risk management methods will be effective, particularly in unusual or extreme market conditions. It is difficult to predict with accuracy changes in economic or market conditions and to anticipate the effects that such changes could have on our financial performance and business operations. Unanticipated market risks could have a material adverse effect on our financial performance or results of operations.

Concentration risks may adversely impact our business.

Our business activities are concentrated in the UK and our banking and financial products and services are offered to UK retail customers. Our business is also concentrated on retail deposit and the residential mortgage markets. Under current building society legislation, our ability to diversify our business is limited. Accordingly, a decline in the UK economy or the predominantly retail markets in which we operate could have a material adverse impact in our financial performance and business operations, which could be disproportionately greater than the impact on other banking groups with more diversified businesses.

Reputational risk could cause harm to us and our business prospects.

Our reputation is one of our most important assets and our ability to attract and retain customers and conduct business with our counterparties could be adversely affected to the extent that our reputation or the reputation of the Nationwide brand is damaged. Failure to address, or appearing to fail to address, various issues that could give rise to reputational risk could cause harm to us and our business prospects. Reputational issues include, but are not limited to:

- failing to appropriately address potential conflicts of interest;
- breaching or facing allegations of having breached legal and regulatory requirements (including money laundering and anti-terrorism financing requirements);
- acting or facing allegations of having acted unethically (including having adopted inappropriate sales and trading practices, see “—We are exposed to risks relating to the mis-selling of financial products, acting in breach of legal or regulatory principles or requirements and giving negligent advice” below);
- failing or facing allegations of having failed to maintain appropriate standards of customer privacy, customer service and record-keeping;
- technology failures that impact upon customer service and accounts or the failure of intermediaries or third parties on whom we rely;
- limiting hours of or closing branches due to changing customer behavior;
- failing to properly identify legal, reputational, credit, liquidity and market risks inherent in products offered;
- a failure to identify and respond appropriately to the challenges and threats presented by climate change; and
- generally poor business performance.

In addition, as with other businesses, how we are perceived to have supported our members, customers, employees and suppliers through the challenges presented by the Covid-19 pandemic could have a material effect on our brand and reputation.

Any failure to address these or any other relevant issues appropriately could make customers, depositors and investors unwilling to do business with us, which could adversely affect our business, financial condition and results of operations and could damage our relationships with our regulators. We cannot ensure that we will be successful in avoiding damage to our business from reputational risk.

We are exposed to risks relating to the mis-selling of financial products, acting in breach of legal or regulatory principles or requirements and giving negligent advice.

There is currently significant regulatory scrutiny of the sales practices and reward structures that financial institutions have used when selling financial products. No assurance can be given that we will not incur liability for past, current or future actions, including failure to comply with applicable regulatory requirements, which are determined to have been inappropriate and any such liability incurred could be significant and materially adversely affect our results of operations and financial position. In particular:

- certain aspects of our business may be determined by the Bank of England, the PRA, FCA, HM Treasury, the CMA, the Financial Ombudsman Service (the “**FOS**”) or the courts as not being conducted in accordance with applicable laws or regulations, or, in the case of the FOS, with what is fair and reasonable in the Ombudsman’s opinion;
- the alleged mis-selling of financial products, including as a result of having sales practices and/or rewards structures that are deemed to have been inappropriate, may result in disciplinary action (including significant fines) or requirements to amend sales processes, withdraw products, or provide restitution to affected customers, all of which may require additional provisions to be recorded in our financial statements and could adversely impact future revenues from affected products; and
- we may be liable for damages to third parties harmed by the conduct of our business.

In addition, we face both financial and reputational risk where legal or regulatory proceedings, or complaints before the FOS, or other complaints are brought against us or members of our industry generally in the UK High Court or elsewhere. For example, in August 2010, the Financial Services Authority (the “**FSA**”) published a Policy Statement (the “**PS10/12**”) on “The Assessment and Redress of Payment Protection Insurance Complaints” (the “**Statement**”). The Statement applies to all types of Payment Protection Insurance (the “**PPI**”) policies and followed Consultation Paper (CP10/06). Following publication of the Statement, the British Bankers Association (the “**BBA**”) and others requested a judicial review of the FSA’s proposed approach to the assessment and redress of complaints in respect of sales of PPI. On April 20, 2011, the High Court ruled in favor of the FSA. The BBA chose not to appeal this ruling and the obligation for firms to comply with PS10/12 resulted in very significant provisions for customer redress made by several UK financial services providers.

We hold provisions for customer redress to cover the costs of remediation and redress in relation to past sales of financial products and ongoing administration, including non-compliance with consumer credit legislation and other regulatory requirements. Our customer redress charge was £53 million for the six months ended September 30, 2021 (six months ended September 30, 2020: £26 million charge) relating to issues with historical quality control procedures, past sales and administration of customer accounts, and other regulatory matters.

No assurance can be given that we will not incur liability in connection with any past, current or future non-compliance with legislation or regulation, and any such non-compliance could be significant and materially adversely affect our results of operations and financial position or our reputation.

We could be negatively affected by deterioration in the soundness or a perceived deterioration in the soundness of other financial institutions and counterparties.

Given the high level of interdependence between financial institutions, we are and will continue to be subject to the risk of deterioration of the commercial and financial soundness, or perceived soundness, of other financial services institutions. Within the financial services industry, the default of any one institution could lead to defaults by other institutions. Concerns about, or a default by, one institution could lead to significant liquidity problems, losses or defaults by other institutions, as was the case after the bankruptcy of Lehman Brothers in 2008, because the commercial and financial soundness of many financial institutions may be closely related as a result of their credit, trading, clearing or other relationships. Even the perceived lack of creditworthiness of, or questions about, a counterparty may lead to market-wide liquidity problems and losses or defaults by us or by other institutions. This risk is sometimes referred to as “systemic risk” and may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges with whom Nationwide interacts on a daily basis. Systemic risk could have a material adverse effect on our ability to raise new funding and on our business, financial condition, results of operations, liquidity and/or prospects.

We routinely execute a high volume of transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds, insurance companies and other institutional clients, resulting in large daily settlement amounts and significant credit exposure. As a result, we face concentration risk with respect to specific counterparties and customers. A default by, or even concerns about the creditworthiness of, one or more financial services institutions could therefore lead to further significant systemic liquidity problems, or losses or defaults by other financial institutions, which could have a material adverse effect on our ability to raise new funding, financial condition, results of operations, liquidity or business prospects.

We are exposed to risks related to the LIBOR transition.

Reference rates and indices, including interest rate benchmarks, such as the London Interbank Offered Rate (“**LIBOR**”), which are used to determine the amounts payable under financial instruments or the value of such financial instruments (“**Benchmarks**”), have, in recent years, been the subject of political and regulatory scrutiny as to how they are created and operated. This has resulted in regulatory reform and changes to existing Benchmarks, with further changes anticipated. These reforms and changes may cause a Benchmark to perform differently than it has done in the past or to be discontinued.

We are exposed to a range of LIBOR-linked assets, liabilities and derivatives that will be impacted by the phasing out of LIBOR in 2021. A delay or failure by us to manage the transition across our balance sheet in a consistent and timely manner could have a material adverse effect on our business, financial performance and results of operation, and may result in regulatory fines or other action. In addition, where the transition affects our products with our customers, in particular our retail members, a failure to manage the transition in a fair and transparent manner could result in additional compliance and conduct risks, which could result in regulatory action and/or adversely affect our reputation.

We have established a LIBOR Transition Working Group, which reports to our Assets and Liabilities Committee (“**ALCO**”), to manage the full range of transition-related issues, including the conversion of existing contracts and the impact on valuations and systems. While we have used basis swaps, which convert one benchmark rate to another, to reduce the economic exposure to affected benchmark rates within the portfolio of existing contracts and, for new transactions which mature after an expected discontinuation date, we are avoiding the use of affected benchmark rates, there can be no assurance this will fully mitigate the economic impact or risks to us from the LIBOR transition.

Transition risk predominantly exists in the remaining remedial operational activities required to transition any residual LIBOR-based loans and derivatives that are included in our financial assets and liabilities, and are held on our results of operations. In addition, it can have important operational impacts through our systems and infrastructure, as our systems will need to be adapted for the changes in the reference rates. Any such factors may have a material adverse effect on our results of operations, financial condition or prospects.

Risks related to climate change.

The physical and transition risks of climate change are becoming ever more apparent and have the potential to pose a significant threat to our business without a coordinated and timely response.

Climate change, and businesses' response to the emerging threats, are under increasing scrutiny by governments, regulators and the public alike. These include physical risks resulting from changing climate and weather patterns and extreme weather-related events, as well as transition risks resulting from the process of adjustment towards a lower carbon economy. Governments and regulators may introduce increasingly stringent rules and policies designed to achieve targeted outcomes, which could increase compliance costs for us, drive asset impairments and result in regulatory fines or other action if we are unable to implement adequate reforms sufficiently quickly. How we assess and respond to these developments and challenges could increase our costs of business, and a failure to identify and adapt our business to meet new rules or evolving expectations, or any perception that we are under-performing relative to our peers, could result in reputational damage and/or risk of legal claims.

Changes in our accounting policies or in accounting standards could materially affect how we report our financial condition and results of operations.

From time to time, the International Accounting Standards Board (the “IASB”) proposes changes to the IFRS, as adopted by the European Commission for use in the European Union. These standards govern the preparation of our financial statements. These changes could materially impact how we record and report our financial condition and results of operations. In some cases, we could be required to apply a new or revised standard retroactively, resulting in restating prior period financial statements.

For example, IFRS 9: “*Financial Instruments*” is the new standard that replaced IAS 39: “*Financial Instruments: Recognition and Measurement*”. It changed the classification and measurement of some financial assets, the recognition and the financial impact of impairment and hedge accounting. IFRS 9 was required to be implemented in our financial statements for the year ending April 4, 2019. On April 5, 2018 we implemented IFRS 9: “*Financial Instruments*”. The total impact on members’ interests and equity, net of deferred tax, was a reduction of £162 million.

Among other changes, IFRS 9 replaced the incurred loss approach to impairment under IAS 39 with a forward-looking model based on expected credit losses (“ECL”), which resulted in earlier recognition of credit losses. This introduced a number of new concepts and changes to the approach to provisioning compared with the methodology under IAS 39.

The European authorities have recognized the risk that application of IFRS 9 may lead to a sudden significant increase in ECL provisions and consequently a sudden decrease in the capital ratios of institutions. Accordingly, Regulation (EU) 2017/2395 (the “**IFRS 9 Regulation**”) has been passed in order to introduce transitional periods for mitigating the impact of the introduction of IFRS 9 on own funds applying from January 1, 2018 by way of amendments to the recast Capital Requirements Regulation.

Similarly, IFRS 16: “*Leases*” is the new standard that replaced IAS 17: “*Leases*” and related interpretations. IFRS 16 has changed the classification of leases as either operating leases or finance leases. Instead, lessees capitalize leases through the recognition of assets representing the contractual rights of use and the present value of contractual payments are recognized as a lease liability. We have adopted the requirements of IFRS 16 from April 5, 2019. The adoption of IFRS 9 and IFRS 16 have created new and more demanding requirements for financial reporting and disclosures, which require further development of our internal controls.

In addition, in response to the Covid-19 pandemic, on April 28, 2020 the European Commission announced a proposed banking package of reforms which includes (amongst other things) a two-year extension of these current transitional arrangements for mitigating the impact of IFRS 9 provisions on regulatory capital. These measures allow banks and building societies to add back to their regulatory capital any increase in new

ECL provisions incurred as of January 1, 2020 and recognized in 2020 and 2021 for financial assets which have not defaulted. The proposals were approved in the European Parliament plenary session on June 9, 2020.

In light of the Covid-19 pandemic, there is increased risk of material misstatement of ECL provisions due to the degree of judgment and inherent uncertainty in the assumptions underlying the Covid-19 related addition to the modeled provision. The European Commission and the PRA have also provided guidance as to the interpretation and flexibility of certain prudential and accounting requirements with respect to non-performing loans and other assets in the context of Covid-19 generally and also specifically in the context of payment holidays and other allowances and concessions afforded to borrowers, including guidance on how banks and building societies might approach key judgment as to whether and when borrowers should be treated as having suffered a significant increase in credit risk (SICR) or credit impaired for accounting purposes under the expected credit loss assessments under IFRS 9.

The IASB may make other changes to financial accounting and reporting standards that govern the preparation of our financial statements, which we may adopt prior to the date on which such changes become mandatory if we determined to be appropriate, or which we may be required to adopt. Any such change in our accounting policies or accounting standards could materially affect our reported financial condition and results of operations.

Our accounting policies and methods are critical to how we report our financial condition and results of operations. They require us to make estimates about matters that are uncertain.

Accounting policies and methods are fundamental to how we record and report our financial condition and results of operations. We must exercise judgment in selecting and applying many of these accounting policies and methods so that they comply with IFRS.

We have identified certain accounting policies in the notes to the audited consolidated financial statements for the year ended April 4, 2021 incorporated by reference in this Base Prospectus in respect of which significant judgment is required in determining appropriate assumptions and estimates when valuing assets, liabilities, commitments and contingencies. These judgments relate to the assumptions used in the determination of impairment provisions on customer loans and advances (see note 10 to the audited consolidated financial statements as at and for the year ended April 4, 2021), the estimates underlying our determination of provisions for customer redress (see note 27 to the audited consolidated financial statements as at and for the year ended April 4, 2021) and the assumptions underlying our calculations of retirement benefit obligations (see note 30 to the audited consolidated financial statements as at and for the year ended April 4, 2021).

A variety of factors could affect the ultimate value that is obtained either when earning income, recognizing an expense, recovering an asset or reducing a liability. We have established detailed policies and control procedures that are intended to ensure that these judgments (and the associated assumptions and estimates) are well controlled and applied consistently. In addition, the policies and procedures are intended to ensure that the process for changing methodologies occurs in an appropriate manner. Because of the uncertainty surrounding our judgments and the estimates pertaining to these matters, we cannot guarantee that we will not be required to make changes in accounting estimates or restate prior period financial statements in the future and any such changes or restatements could be material in nature.

Furthermore, in light of the Covid-19 pandemic, there is increased risk of material misstatement of ECL under IFRS 9 due to the degree of judgment and inherent uncertainty in the assumptions underlying the Covid-19 related addition to the modeled provision, as further described under "*Risks relating to the impact of Covid-19*" above. See also "*Changes in our accounting policies or in accounting standards could materially affect how we report our financial condition and results of operations.*" above.

We may be required to make further contributions to our defined benefit pension schemes if the value of pension fund assets is not sufficient to cover potential obligations. The accounting surplus in our defined

benefit pension scheme does not contribute to our CET1 capital and any future payments to the scheme may reduce our CET1 capital.

We have funding obligations to several defined benefit pension schemes. Pension risk is defined as the risk that the value of the pension schemes' assets will be insufficient to meet the estimated liabilities, creating a pension deficit. Pension risk can negatively impact our capital position and may result in increased cash funding obligations to the pension schemes.

During 2020, Nationwide and the Trustee agreed to a new Deficit Recovery Plan and Schedule of Contributions following the finalisation of the Fund's March 31, 2019 actuarial valuation. In November 2020, Nationwide and the Trustee of the Nationwide Pension Fund entered into an arrangement whereby Nationwide has agreed to provide collateral in the form of retained Silverstone notes to provide additional security to the Fund. The Fund would have access to these notes in the case of certain events such as insolvency of Nationwide. As a consequence of entering into the contingent asset arrangement, no employer deficit contributions were required in the six months ended September 30, 2021. Additionally, no employer deficit contributions will be required in the year ending April 4, 2022 or in future years under the terms of the new Deficit Recovery Plan. Employer contributions of £66 million in the year ended April 4, 2021 relate to the final contributions in respect of benefit accrual prior to the Fund closing to future accrual on March 31, 2021.

The Fund closed to future accrual on March 31, 2021, with affected employees being moved to the defined contribution Nationwide Group Personal Pension Plan (GPP) for future pension savings. These members were moved from active to deferred status, with future indexation of deferred pensions before retirement measured by reference to the Consumer Price Index (CPI).

Any change in the contributions which we are required to pay in respect of our defined benefit pension schemes, including as a result of a future Triennial Valuation of the Fund, could have a negative impact on our results of operations. In addition, any IAS19 accounting deficit in our defined benefit pension scheme would be reflected in our CET1 capital. Accordingly, an increase in deficit can result in a reduction in our capital ratios.

We are exposed to the risk of changes in tax legislation and its interpretation and to increases in the rate of corporate and other taxes

Our activities are principally conducted in the UK and we are therefore subject to a range of UK taxes at various rates. Future actions by the Government to increase tax rates or to impose additional taxes would reduce our profitability. Revisions to tax legislation or to its interpretation might also affect our financial condition in the future. In addition, we are subject to periodic tax audits which could result in additional tax assessments relating to past periods of up to six years being made. Any such assessments could be material which might also affect our financial condition in the future.

The Senior Managers and Certification Regime may have a material adverse effect on our business.

The Senior Managers and Certification Regime (the "SM&CR") came into force for UK banks, building societies, credit unions, PRA-designated investment firms and branches of foreign banks operating in the UK on March 7, 2016, and is intended to govern the individual accountability and conduct of senior persons within such entities. Among other things, the SM&CR introduced: (i) requirements on financial institutions to allocate and map senior management responsibilities and reporting lines across all areas of the organization's activities; (ii) a new senior persons regime governing the conduct of bank staff approved by the PRA or the FCA to perform senior management functions (including certain non-executive directors); (iii) new rules requiring financial institutions to certify the ongoing suitability of a wide range of staff performing certain functions; (iv) the extension (from March 2017) by the FCA of conduct rules (generally enforceable by PRA and/or FCA disciplinary action, including financial penalties and public censure) previously only applicable to Senior Managers and certified staff to all in-scope staff other than those undertaking purely ancillary functions; and (v) the introduction of a criminal offense for reckless misconduct by senior bank staff. Rules regarding regulatory references for persons who are to be appointed as Senior Managers or to perform a certification function within the SM&CR also came into force from March 7, 2017.

The PRA and FCA continue to publish guidance and consult on future changes to the SM&CR. On November 19, 2019, the FCA published its supervisory expectations in relation to SM&CR for firms which are transitioning away from LIBOR and other Benchmarks. Complying with new regulations imposes costs on our business, including legal costs to implement new policies and procedures, as well as the time and attention of senior management. In addition, any violation of the SM&CR could result in disciplinary action against us or our employees, financial penalties as well as reputational damage, any of which could have a material adverse effect on our business, financial position or results of operations. As a result of Covid-19, changes may need to be implemented to our business, for example to take account of modifications which may be required to the responsibilities of senior managers (for example, on April 3, 2020 the regulators published “*Joint FCA and PRA statement Senior Managers and Certification Regime (SM&CR) and coronavirus (Covid-19): our expectations of dual-regulated firms*”). This statement was updated on April 6, 2020 and sets out the PRA and FCA’s expectations in relation to compliance with certain obligations under SM&CR). All of these developments could result in additional costs on our business and require additional time and the attention of senior management.

Risks Related to Regulations/the Regulatory Environment

Very recent or future legislative and regulatory changes could impose operational restrictions on us, causing us to raise further capital, increase our expenses and/or otherwise adversely affect our business, results, financial condition or prospects.

We conduct our business subject to ongoing regulation by the PRA and the FCA, which oversee our prudential arrangements and the sale of financial products, including, for example, residential mortgages, commercial lending, savings, investment, consumer credit and general insurance products. The regulatory regime requires us to be in compliance across many aspects of activity, including the training, authorization and supervision of personnel, systems, processes and documentation. The financial sector has seen an unprecedented volume and pace of regulatory change in the years following the global financial crisis, and significant resource has been required to assess and implement necessary changes. If we fail to comply with any relevant regulations, there is a risk of an adverse impact on our business due to sanctions, fines or other action imposed by the regulatory authorities.

This is particularly the case in the current market environment, which continues to witness significant levels of Government intervention in the banking, personal finance and real estate sectors. Future changes in regulation, fiscal or other policies are unpredictable and beyond our control and could materially adversely affect our business or operations.

A range of legislative and regulatory changes (including those referred to in “*Supervision and Regulation*” below) have been made or proposed which could impose operational restrictions on us, causing us to raise further capital, increase our expenses and/or otherwise adversely affect our business, results, financial condition or prospects.

As at the date of this Base Prospectus it is difficult to predict the full effect that any of these changes and proposals will have on our operations, business and prospects. Up to the end of 2020, the UK regulatory regime was closely aligned with the EU regime. Following the UK’s departure from the EU and the end of the Brexit transition period at the end of 2020, the extent to which the UK may elect to implement or mirror future changes in the EU regulatory regime, or to diverge from the current EU-influenced regime over time, remains to be seen. To the extent that the UK and EU trading relationship is premised on or influenced by the level of equivalence or convergence, or where initiatives are jointly designed on the basis of cooperation and shared outcomes, the EU regulatory regime may continue to have a significant effect on the regime which the UK Government and regulators elect to implement. Depending on the specific nature of the requirements and how they are enforced, the changes could have a significant impact on our operations, structure, costs and/or capital requirements. Accordingly, we cannot assure investors that the implementation of any of the foregoing matters will not have a material adverse effect on our operations, business, results, financial condition or prospects.

Furthermore, we cannot assure investors that any other regulatory or legislative changes or any other Governmental interventions that may have been proposed or which may materialize in the future will not have a material adverse effect on our operations, business, results, financial condition or prospects. While the scope and nature of any such changes are unpredictable, any interventions or regulations designed to increase the protections for UK retail and other customers of banks and building societies, for example through stricter regulation on repossessions and forbearance by mortgage lenders, could materially adversely affect our business or operations.

We are also subject to a number of proposals and measures targeted at preventing financial crime (including anti-money laundering and terrorist financing). While we are committed to operating a business that prevents, deters and detects money laundering and terrorist financing in accordance with such requirements, if there are breaches of these measures or existing law and regulation relating to financial crime, we could face significant administrative, regulatory and criminal sanctions as well as reputational damage which may have a material adverse effect on our operations, financial condition or prospects.

We are also investing significantly to ensure that we will be able to comply with developing regulatory requirements and emerging consumer trends and preferences for digital services. If we are unsuccessful in efficiently adopting the requisite new compliance practices, including as these relate to cryptocurrencies, this will adversely impact our ability to operate in the financial services markets and to deliver an appropriate level of operational and financial performance.

We are subject to wide-ranging regulatory action in the event that we are considered likely to fail and our failure poses a threat to the public interest.

In the UK, the Banking Act 2009 as amended (the “**Banking Act**”) introduced a package of minimum early intervention and resolution-related tools and powers which the UK resolution authorities may apply in respect of in-scope UK financial institutions, including the Society and our group, and provided for special rules for cross-border groups. These tools and powers broadly align with those applicable to relevant financial institutions in the EEA under Directive (EU) 2014/59 (“**BRRD**”), although HM Treasury and the Bank of England have already elected to diverge from certain changes to BRRD which were recently implemented in the EU or are required to be implemented in the EU in the near future. Under the Banking Act, substantial powers have been granted to HM Treasury, the Bank of England (including the PRA) and the FCA (together, the “**Authorities**”) as part of a Special Resolution Regime (the “**SRR**”). These powers enable the Authorities, among other things, to resolve a bank or building society by means of several resolution tools (the “**Stabilization Options**”) in circumstances in which the Authorities consider its failure has become likely and a resolution is considered to be in the public interest. In respect of UK building societies, the relevant tools include:

- (i) modified property transfer powers which also refer to cancellation of shares and conferring rights and liabilities in place of such shares;
- (ii) in place of the share transfer powers, a public ownership tool which may involve (among other things) arranging for deferred shares in a building society to be publicly owned, cancellation of private membership rights and the eventual winding up or dissolution of the building society; and
- (iii) modified bail-in powers such that exercise of the tool may be immediately preceded by the demutualization of the building society through the conversion of it into a company or the transfer of all of our property, rights or liabilities to a company.

In each case, the Banking Act grants additional powers to modify contractual arrangements in certain circumstances and powers for HM Treasury to disapply or modify laws (with possible retrospective effect) to enable the powers under the Banking Act to be used effectively.

The Banking Act also provides that the UK as a last resort, after having assessed and used the resolution tools set out above to the maximum extent practicable while maintaining financial stability, and where certain other mandatory conditions of the Banking Act have been satisfied, may provide extraordinary public financial

support through additional financial stabilization tools. These consist of the public equity support and temporary public ownership tools. There can be no assurance that investors in any notes would benefit from such last resort support even if it were provided.

Secondary legislation which defines the scope of application of the Stabilization Options under the SRR to certain “banking group companies” came into force on August 1, 2014. The definition of “banking group company” encompasses certain of our subsidiaries and affiliates, and allows the Stabilization Options under the SRR and the bail-in stabilization power to be applied to any of our group companies that meet the definition of a “banking group company.”

In addition, the Banking Act contains a separate power, often referred to as the “write-down and conversion tool”, enabling the Authorities – independently of, or in conjunction with, the use of resolution powers – to cancel or transfer CET1 instruments away from the original owners, or write down (including to nil) an institution’s AT1 and Tier 2 capital instruments, or to convert them into CET1 instruments, if the Authorities consider that the institution or the group is at the “point of non-viability” and certain other conditions are met. The write-down and conversion tool must be applied before any of the Stabilization Options provided for in the SRR may be used in practice and may be used whether or not the institution subsequently enters into resolution. Additionally, in respect of building societies, the resolution authority may write-down or convert instruments issued by the building society itself or a successor entity formed through exercise of Stabilization Options. Subordinated notes issued under the program may be Tier 2 capital instruments, and any such subordinated notes could be subject to the write-down and conversion tool. For more information see: *“The UK Banking Act 2009 confers substantial powers on a number of UK authorities designed to enable them to take a range of actions in relation to UK deposit-taking institutions which are considered to be at risk of failing. The exercise of any of these actions in relation to us or any notes could materially adversely affect the value of any notes and/or the rights of noteholders”*.

The SRR may be triggered prior to our insolvency. The purpose of the Stabilization Options is to address the situation where all or part of a business of a relevant entity has encountered, or is likely to encounter, financial difficulties, giving rise to wider public interest concerns. Accordingly, the Stabilization Options may be exercised if:

- (i) the PRA is satisfied that a relevant entity is failing or is likely to fail;
- (ii) having regard to timing and other relevant circumstances, the Bank of England determines that it is not reasonably likely that (ignoring the Stabilization Options) action will be taken that will result in the relevant entity no longer failing or being likely to fail;
- (iii) the Bank of England considers the exercise of the Stabilization Options to be necessary, having regard to certain public interest considerations (such as the stability of the UK financial system, public confidence in the UK banking system and the protection of depositors); and
- (iv) the Bank of England considers that the specific resolution objectives would not be met to the same extent by the winding up of the relevant entity.

It is therefore possible that one or more of the Stabilization Options could be applied prior to the point at which any insolvency proceedings with respect to the relevant entity could be initiated.

The European Banking Authority (the “EBA”) has published guidelines on the circumstances in which an institution shall be deemed by supervisors and resolution authorities as “failing or likely to fail” within the meaning of the BRRD. While the EBA guidelines are not binding on the Authorities when considering their powers under the Banking Act, the Authorities may continue to have regard to them as part of their deliberations, even after Brexit. The guidelines set out the objective criteria which should apply when supervisors and Authorities make such a determination.

Additionally, HM Treasury has issued a Code of Practice on the special resolution regime, in accordance with sections 5 and 6 of the Banking Act, which supports the legal framework of the SRR, and provides guidance as to how and in what circumstances the Authorities will use the special resolution tools.

Although the Banking Act provides for conditions to the exercise of any resolution powers and the EBA guidelines and HM Treasury Code of Practice set out objective elements which the Authorities may elect to consider when determining whether an institution is failing or likely to fail and which powers to use, it is uncertain how the Authorities would assess such conditions in any particular situation. The relevant Authorities are also not required to provide any advance notice to holders of notes of their decision to exercise any resolution power. Therefore, holders of notes may not be able to anticipate a potential exercise of any such powers nor the potential effect of any exercise of such powers on us or the notes.

We are subject to regulatory capital and liquidity requirements which may change.

We are subject to extensive and evolving regulatory capital and liquidity requirements, as further described in “*Supervision and Regulation*”.

Changes to the regulatory capital and liquidity requirements, and/or the prudential framework, under which we operate could hinder growth by prescribing more stringent requirements than those with which we currently comply. Our capital ratios may be adversely affected not only by a reduction in our capital (including if we suffer financial losses) but also by changes in the manner in which we are required to calculate our capital and/or the risk-weightings applied to our assets. For example, we are currently authorized to apply an ‘internal ratings based’ (“**IRB**”) approach to calculating our risk-weighted assets. An IRB approach enables an institution to tailor more closely risk-weights to its particular assets than standardized risk-weights, and accordingly in many cases can be expected to be lower than risk-weights which would apply under a standardized approach. Changes to how we apply our IRB model, or which may require us to calculate our risk-adjusted assets on the basis of standardized or loan-to-value-based standardized risk-weights, could have a material adverse impact on our capital ratios, even if we remain profitable. In particular, as further described in “*Supervision and Regulation—European Union Legislation—RWA floors and IRB modeling*”, RWA output floors are due to be implemented through a transitional period from 2023 to 2028, and other reforms for the calculation of risk-weights are also due to be implemented, including a number of PRA reforms for IRB calibration expected to take effect from January 1, 2022. The introduction of an RWA floor for secured lending combined with IRB calibration changes with the implementation of new secured models will lead to a significant increase in our RWA over time and we currently expect the consequential impact on our reported CET1 ratio ultimately to be a reduction of approximately 45-50% relative to our current position (although organic earnings through the transition are expected to mitigate the impact such that our reported CET1 ratio will in practice remain in excess of the pro forma levels implied by these changes). For further information, please refer to the “*Supervision and Regulation—European Union Legislation—RWA floors and IRB modeling*” section.

In addition, a failure to adequately to manage capital, liquidity and our minimum requirement for own funds and eligible liabilities (“**MREL**”) requirements could have a material adverse effect on us. While we monitor current and expected future capital, liquidity and MREL requirements, including having regard to both leverage and RWA-based requirements, and seek to manage and plan our prudential position accordingly and on the basis of current assumptions regarding future capital and liquidity requirements, there can be no assurance that our assumptions will be accurate in all respects or that we will not be required to take additional measures to strengthen our capital or liquidity position.

Effective management of our capital and regulatory authorizations is critical to our ability to operate and grow our business and to pursue our strategy. Any change that limits our ability to manage our balance sheet and capital resources effectively (including, for example, reductions in profits and retained earnings as a result of credit losses, write-downs or otherwise, increases in RWAs (which may be pro-cyclical under the current capital framework, resulting in risk-weighting increasing in economic downturns), delays in the disposal of certain assets or the inability to raise capital or funding through wholesale markets as a result of market conditions or otherwise) could have a material adverse impact on our business, financial condition, results of operations, liquidity and/or prospects.

Furthermore, if we fail, or are perceived to be likely to fail, to meet our minimum regulatory capital, leverage, liquidity requirements, or MREL, including in connection with any stress tests performed by the Bank of England or any other relevant authority, this may result in administrative actions or regulatory sanctions. In addition, any actual or perceived weakness relative to our competitors could result in a loss of confidence, which could result in high levels of withdrawals from our retail deposit base, upon which we rely on for lending and which could have a material adverse effect on our business, financial position or results of operations.

On December 3, 2021, the Bank of England published a Policy Statement concluding the Bank's review of its approach to setting MREL, accompanied by a revised MREL Statement of Policy. The revised Statement of Policy will be effective from January 1, 2022. The Policy Paper in particular is concerned with improving depositor outcomes in bank or building society insolvency.

Impact of Covid-19

The future impact of Covid-19 on our capital ratios is not yet clear, although it is likely to lead to some RWA inflation and therefore a lower CET1 ratio in the short to medium term. While, based on our current estimates and projections, we currently expect to maintain, over the short to medium term horizon, a surplus above CRD IV (as defined in "*Supervision and Regulation—European Union Legislation*" below) combined buffer requirements that we are expected to meet by the PRA and the threshold at which a maximum distributable amount ("MDA") would be imposed, there remains some uncertainty as to the duration and degree of impact of Covid-19. If this is significantly worse than our base-case estimates, further erosion in the CET1 ratio cannot be discounted.

Further specific measures may also be taken by our regulators to address potential capital and liquidity stress, which could limit our flexibility to manage our business and our capital position, including in the event of restrictions on distributions and capital allocation. For example, on March 31, 2020 the PRA wrote to the CEOs of the large UK high street lenders (including Nationwide) to outline, among other things, its expectations with respect to payments of dividends on equity and cash bonuses to senior staff, including all material risk takers. While the PRA in its letter to Nationwide confirmed that (in contrast to its expectations with respect to the declaration or payment of dividends by banks in the near-term) it was not requesting that we halt payments on our core capital deferred shares ("CCDS") at that time, there can be no assurance that further measures or expectations may not be implemented or outlined by our regulators over time, which could affect our capital position, our ability to raise further capital or the costs of new capital, and/or our business operations.

We are required to pay levies under the FSCS and are exposed to future increases in such levies, which might impact our profits.

The FSMA established the FSCS, which pays compensation to eligible customers of authorized financial services firms which are unable, or are likely to be unable, to pay claims against them. For further information, please refer to the section entitled "*Supervision and Regulation—UK Regulation—Financial Services Compensation Scheme.*" Based on our share of protected deposits, Nationwide paid levies to the FSCS to enable the scheme to meet claims against it.

In common with other financial institutions which are subject to the FSCS, we also have a potential exposure to future levies resulting from the failure of other financial institutions and consequential claims which arise against the FSCS as a result of such failure.

There can be no assurance that there will be no further actions taken under the Banking Act that may lead to further claims against the FSCS, and concomitant increased FSCS levies payable by us. Any such increases in our costs and liabilities related to the levy may have a material adverse effect on our results of operations. Further costs and risks may also arise from discussions at governmental levels around the future design of financial services compensation schemes, such as increasing the scope and level of protection and moving to pre-funding of compensation schemes.

The EU Directive on deposit guarantee schemes (the “**DGSD**”) requires EU Member States (including, at the time the DGSD was required to be transposed, the UK) to ensure that by July 3, 2024 the available financial means of the deposit guarantee schemes regulated by it reach a minimum target level of 0.8% of the covered deposits of credit institutions. The schemes are to be funded through regular contributions before the event (ex-ante) to the deposit guarantee schemes (the UK has previously operated an ex-post financing where fees are required after a payment to depositors has occurred). In case of insufficient ex-ante funds, the deposit guarantee scheme will collect immediately after the event (ex-post) contributions from the banking sector and, as a last resort, it will have access to alternative funding arrangements such as loans from public or private third parties. The UK requirements implementing DGSD provide, among other things, that the ex-ante contributions are met by funds already collected under the UK bank levy (with the ability, in the case of insufficient funds, to collect immediate ex-post contributions) and changes to the FSCS including the introduction of temporary high balance deposit protection, up to £1 million, for up to twelve months (protection temporarily extended from six to twelve months in response to the impact of Covid-19) from when the amount was deposited for certain limited types of deposits and changes to the types of depositors that are eligible for compensation. It is possible, as a result of the DGSD as implemented in the UK, that future FSCS levies on us may differ from those it has incurred historically, and that such reforms could result in us incurring additional costs and liabilities, which may adversely affect our business, financial conditions and/or results of operations. The DGSD requirements were implemented in the UK before the UK’s exit from the EU and the regime was subsequently amended to reflect the UK’s exit from the EU. We refer to the “*Supervision and Regulation – European Union Legislation – Impact of Brexit*” section for a description of the changes implemented to retained EU legislation so that it works effectively after the end of the transition period on December 31, 2020.

Our principal business is providing residential mortgages in the UK. As such, we are susceptible to changes in UK mortgage rules and regulation which could impact our ability to retain current mortgage customers and/or attract new mortgage customers.

The FCA published its Mortgages Market Study Final Report (MS16/2) in March 2019. While it found that the mortgage market is working well in many respects, the report illustrated a number of areas for improvement relating to customer choice and the ability of customers to switch mortgage providers. On March 26, 2019, the FCA published Consultation Paper CP19/14 entitled “*Mortgage customers: proposed changes to responsible lending rules and guidance*” setting out detailed proposals to remove regulatory barriers to changing mortgages for “mortgage prisoners” (the definition of which has been recently updated per the below). The changes to the FCA’s Mortgages and Home Finance: Conduct of Business sourcebook (the “**MCOB**”) proposed by CP19/14 and implemented through the FCA Policy Statement entitled “*Changes to mortgage responsible lending rules and guidance – feedback on CP19/14 and final rules*” (PS19/27) which came into force on October 28, 2019, are intended to make it easier for a customer who is a mortgage prisoner to switch to a new lender. The rules, based on pre-Covid-19 conditions, require firms to write to those who may be eligible letting them know they may be able to switch their mortgage. However, the FCA decided that given lenders’ inability to offer new switching options to mortgage prisoners in view of Covid-19, it would be wrong to require letters to be sent to consumers at this time. The FCA therefore extended the window during which it expected firms to contact consumers about switching options by 3 months to December 1, 2020.

On January 31, 2020 the FCA published Policy Statement “*Mortgage advice and selling standards: feedback to CP 19/17 and final rules*” (“**PS20/01**”) the final rules on mortgage advice and selling standards are aimed at giving consumer more choice in how they buy a mortgage. The changes include expanding the perimeter on what is mortgage advice and requiring advisors to explain why they have not recommended a cheaper mortgage (where other products meet the customer needs). The changes came into force on January 31, 2020, although under certain transitional provisions firms had until July 30, 2020 to comply. In response to the Covid-19 pandemic, the FCA has also introduced a number of temporary changes to mortgage regulation in the UK, including through guidance on payment deferrals (FS20/17) and repossessions (FS21/2) (collectively the “**Guidance**”), with updated guidance on payment deferrals and guidance on tailored support for customers published in January 2021 and again in June 2021. The Guidance allowed eligible customers to defer up to six monthly payments until July 31, 2021. The payment deferrals and support under the Guidance came to an end on July 31, 2021.

In July 2021, the FCA announced its ‘*Mortgage Prisoners review: terms of reference*’ with the mandate to report to HM Treasury on the outcome of the review and subsequently published the Mortgage Market Review on November 29, 2021 (the “**Review**”). The purpose of the review was to assist the FCA, Government and industry in finding practical ways to help as many mortgage prisoners switch to an active lender where such borrowers wish to do so. The Review focused on the mainstream first charge residential mortgage market and highlighted a change in the FCA’s definition of a mortgage prisoner to “a borrower who is up to date with payments and is unable to switch to a new mortgage deal (with a new lender or with their existing lender) and could potentially benefit from switching depending on their loan and borrower risk characteristics.” The findings provided that there were approximately 47,000 borrowers who were, in the FCA’s view, mortgage prisoners. The Review suggested that the primary barrier to switching was the lack of lender risk appetite. The FCA has, therefore, published its data to enable lenders to consider whether they can adapt their lending criteria (or use the flexibility in the existing FCA rules) to lend to closed book borrowers who are close to meeting their standard lending criteria at a lower rate or at a rate that enables them to fix their payments if they want to. The Review concluded that solutions are required for mortgage prisoners that either encourage lenders to see if they can help those who are close to their criteria or that help borrowers improve their chances of switching. The FCA therefore welcomed practical and proportionate initiatives from industry or others to provide these borrowers with tools or materials to help them do this. The FCA indicated that it will continue to focus on those areas where the FCA considers the greatest harm could affect mortgage prisoners and other borrowers. In particular, the FCA will continue to monitor firms to make sure they provide all borrowers with the support they need when they get into financial difficulty and will take action, as necessary, to address any harms identified. The FCA will also carry out further work to understand the issues facing borrowers who have interest-only, or part repayment mortgages, and who do not have a credible strategy to repay the capital borrowed at the end of the mortgage term and will also supervise and enforce its guidance on the fair treatment of vulnerable customers. Borrowers switching to new lenders could lead to an increase in redemptions of mortgages sooner than anticipated, thereby reducing the interest payable on those loans.

It is possible that further changes may be made to the MCOB as a result of current and future reviews, studies and regulatory reforms which could have a material adverse effect on our business, finances or operations. Any failure to comply with these rules may entitle a borrower to claim damages for loss suffered or set-off the amount of the claim against monies owing under a regulated mortgage contract and the new rules may also negatively affect mortgage supply and demand.

Risks Related to the Notes

The UK Banking Act 2009 confers substantial powers on a number of UK authorities designed to enable them to take a range of actions in relation to UK deposit-taking institutions which are considered to be at risk of failing. The exercise of any of these actions in relation to us or any notes could materially adversely affect the value of any notes and/or the rights of noteholders.

Under the Banking Act, substantial powers are granted to HM Treasury, the PRA, the FCA and the Bank of England (together, the “**Authorities**”) as part of the SRR. These powers enable the relevant Authority, being the Bank of England as UK resolution authority, to deal with, among other entities, a UK bank or building society (each a “**relevant entity**”) in circumstances in which that Authority considers that the resolution conditions are satisfied, through a series of stabilization options. For further information in relation to our regulatory environment and capital requirements see “*Risks Related to Regulations/the Regulatory Environment – We are subject to wide-ranging regulatory action in the event that we are considered likely to fail and our failure poses a threat to the public interest*” and “*Risks Related to Regulations/the Regulatory Environment – We are subject to regulatory capital and liquidity requirements which may change*”.

Various actions may be taken under the SRR in relation to the notes without the express consent of the noteholders, and by acquiring the notes each noteholder agrees to be bound by such actions

If we were made subject to the SRR, HM Treasury or the Bank of England may exercise extensive share transfer powers (applying to a wide range of securities) and property transfer powers (including powers for partial transfers of property, rights and liabilities) over us and/or our securities (subject to certain protections).

Exercise of these powers could involve taking various actions in relation to any securities issued by us (including any notes issued under the program) without the express consent of the noteholders, including (among other things):

- transferring the notes out of the hands of the noteholders;
- delisting the notes;
- writing down (which may be to nil) the notes or converting the notes into another form or class of securities; and/or
- modifying or disapplying certain terms of the notes, which could include modifications to (without limitation) the maturity date (which may be to extend the maturity date), the interest provisions (including reducing the amount of interest payable, the manner in which interest is calculated and/or the scheduled interest payment dates, including by suspending payment for a temporary period), and/or the redemption provisions (including the timing of any redemption options and/or the amount payable upon redemption), and may result in the disapplication of acceleration rights or events of default under the terms of the notes or the effect thereof.

By acquiring the notes, each noteholder (including each beneficial owner) acknowledges, agrees to be bound by and consents to the exercise of any UK Bail-in Power by the Resolution Authority. Each noteholder (including each beneficial owner) also acknowledges, agrees to be bound by and consents to any amendment to the terms of the Indenture and any notes made in order to ensure the effectiveness and enforceability of such contractual acceptance of the exercise of any UK Bail-in Powers.

The Relevant Authorities may exercise the bail-in tool under the Banking Act to recapitalize a relevant entity in resolution by allocating losses to (among others) its capital providers and unsecured creditors (which would include noteholders) in a manner that (i) ought to respect the hierarchy of claims in an ordinary insolvency and (ii) is consistent with shareholders and creditors not receiving a less favorable treatment than they would have received in ordinary insolvency proceedings of the relevant entity (known as the “no creditor worse off” principle, although this may not apply in relation to an application of the write-down and conversion power in circumstances where a stabilization power is not also used; holders of debt instruments which are subject to the power may, however, have ordinary shares transferred to or issued to them by way of compensation). Accordingly, the ranking of notes in insolvency can be expected to have a direct impact on the relative losses imposed on noteholders in a resolution. For further information with respect to the ranking of notes, see “*The notes rank junior to most of our liabilities*” below.

The bail-in tool includes the power to cancel a liability or modify the terms of contracts for the purposes of reducing or deferring the liabilities of the relevant entity under resolution and the power to convert a liability from one form or class to another. There is also the power to convert a building society into a company in connection with a bail-in. The exercise of such powers may result in the cancellation of all, or a portion, of the principal amount of, interest on, or any other amounts payable on, the notes and/or the conversion of all or a portion of the principal amount of, interest on, or any other amounts payable on, the notes into equity securities (which, in our case, could be CCDS) or other securities or other obligations of ours or another person, including by means of a variation to the terms of the notes.

The taking of any such actions could materially adversely affect the rights of noteholders, the price or value of their investment in the notes, the liquidity and/or volatility of any market in the notes and/or our ability to satisfy our obligations under the notes. In such circumstances, noteholders may have a claim for compensation under one of the compensation schemes existing under, or contemplated by, the Banking Act. However, such compensation will be limited to the return the noteholder might otherwise have received in an insolvency (less the value already received through resolution), and there can be no assurance that noteholders will have such a claim or, if they do, that they would thereby recover compensation promptly or equal to any loss actually incurred.

In addition, if the market perceives or anticipates that any action may be taken under the Banking Act in respect of us or any of our securities (including any notes issued under the program), this may have a significant adverse effect on the market price of the notes and/or the liquidity and/or volatility of any market in the notes, whether or not such powers are ultimately exercised. In such case, investors may experience difficulty in selling their notes, or may only be able to sell their notes at a loss.

Mandatory write-down and conversion of capital instruments and relevant internal liabilities may affect the subordinated notes, including outside of formal resolution proceedings

As noted above, in addition to the stabilization options which may be used in a resolution of an institution, the Banking Act contains a write-down and conversion tool which enables (and, if the institution enters into resolution, requires) the relevant Authority to permanently write-down, or convert into CET1 instruments (which, in our case, could be CCDS), any Tier 1 capital instruments, Tier 2 capital instruments (including subordinated notes issued under the program) and certain relevant internal liabilities at the point of non-viability of the relevant entity independently of (or in conjunction with) the exercise of any stabilization power.

For the purposes of the application of such mandatory write-down and conversion power, the point of non-viability is the point at which (i) the relevant Authority determines that the relevant entity meets the conditions for resolution (but no resolution action has yet been taken), (ii) the relevant Authority determines that the relevant entity or its group will no longer be viable unless the relevant capital instruments and relevant internal liabilities are written-down or converted or (iii) extraordinary public financial support is required by the relevant entity other than, where the entity is an institution, for the purposes of remedying a serious disturbance in the UK economy and to preserve financial stability.

Subordinated notes issued under the program may therefore be subject to write-down or conversion into equity on application of such powers (without requiring the consent of the holders thereof) independently of whether we are in, or subsequently enter into, resolution. This may result in the holders losing some or all of their investment even if we are not put into resolution. The “no creditor worse off” safeguard would not apply in relation to an application of such powers in circumstances where resolution powers are not also exercised.

The exercise of such mandatory write-down and conversion power under the Banking Act could, therefore, materially adversely affect the rights of holders of subordinated notes, and such exercise (or the perception that such exercise may occur) could materially adversely affect the price or value of their investment in subordinated notes and/or our ability to satisfy our obligations under the notes, and/or may adversely affect liquidity and/or volatility in any market for such subordinated notes.

The circumstances under which the relevant Authorities would exercise resolution powers are uncertain, which may affect the value of the notes

There is considerable uncertainty regarding the specific factors beyond the goals of addressing banking crises pre-emptively and minimizing taxpayers' exposure to losses (for example, by writing down relevant capital instruments before the injection of public funds into a financial institution) which the relevant Authorities would consider in deciding whether to exercise the Banking Act resolution powers with respect to the relevant financial institution and/or securities, such as the notes, issued by that institution. While the Banking Act provides guidance as to how and when the resolution powers may be utilized by the relevant Authorities, it allows for a considerable amount of discretion and there is no certainty as to how the relevant Authorities will exercise any resolution powers with respect to a given financial institution and/or securities issued by that institution. As there may be many factors, including factors outside of our control or not directly related to us, which could result in such a determination, holders of the notes may not be able to refer to publicly available criteria in order to anticipate a potential exercise of any such resolution powers.

Accordingly, the threat of resolution powers being used may affect trading behavior, including prices and volatility, and, as a result, the notes are not necessarily expected to follow the trading behavior associated with other types of securities.

The conditions of the notes contain provisions that may permit their modification without the consent of investors.

Where we encounter, or are likely to encounter, financial difficulties that are affecting, or will or may affect, our ability to carry on business as a going concern, we may propose a restructuring plan (a “**Plan**”) with our creditors under Part 26A of the Companies Act 2006 (introduced by the Corporate Insolvency and Governance Act 2020) to eliminate, reduce, prevent or mitigate the effect of any of those financial difficulties. Should this happen, creditors whose rights are affected are organized into creditor classes and can vote on any such Plan (subject to any classes being excluded from the vote by the English courts for having no genuine economic interest in Nationwide). Provided that one class of creditors (who would receive a payment, or have a genuine economic interest in Nationwide) has approved the Plan, and in the view of the English courts any dissenting class(es) who did not approve the Plan are no worse off under the Plan than they would be in the event of the “relevant alternative” (such as, broadly, liquidation or administration), then the English court can sanction the Plan where it would be a proper exercise of its discretion. A sanctioned Plan is binding on all creditors and members, regardless of whether they approved it. Any such sanctioned Plan in relation to us may, therefore, adversely affect the rights of noteholders and the price or value of their investment in the notes, as it may have the effect of modifying or disapplying certain terms of the notes (by, for example, writing down the principal amount of the Notes, modifying the interest payable on the Notes, the maturity date or dates on which any payments are due or substituting the Issuer). The Secretary of State has the power, by secondary legislation, to exclude certain companies providing financial services from the scope of Part 26A and it may well be that, in practice, the special resolution regime under the Banking Act is more likely to be used to resolve our finance difficulties rather than the Plan.

Further issuances may negatively affect the market value of the original notes if they are treated as a separate series for U.S. federal income tax purposes.

We may, without the consent of the holders of outstanding notes, issue additional notes with identical terms. These additional notes, even if they are treated for non-tax purposes as part of the same series as the original notes, in some cases may be treated as a separate series for U.S. federal income tax purposes. In such a case, the additional notes may be considered to have been issued with original issue discount (“**OID**”) even if the original notes had no OID, or the additional notes may have a greater amount of OID than the original notes. These differences may negatively affect the market value of the original notes if the additional notes are not otherwise distinguishable from the original notes.

The notes may not be freely transferred.

We have not registered, and will not register, the notes under the Securities Act or any other applicable securities laws. Accordingly, the notes are subject to certain restrictions on resale and other transfer thereof as set forth in the section entitled “*Transfer Restrictions*.” As a result of these restrictions, we cannot be certain of the existence of a secondary market for the notes or the liquidity of such a market if one develops. Consequently, a holder of notes and an owner of beneficial interests in those notes must be able to bear the economic risk of their investment in the notes for the term of the notes.

The notes rank junior to most of our liabilities.

The notes rank behind liabilities which are preferred by law

A substantial portion of claims against us in the event of a winding up or dissolution will rank ahead of claims in respect of the notes. Holders of notes and other unsubordinated creditors will, in an insolvency, rank junior to member share accounts, which are given preferential status under law.

The English insolvency regime applicable to us at the date of this Base Prospectus provides for:

- (i) a first-ranking preference to those deposits and share accounts (or a relevant part thereof) of natural persons and micro, small and medium enterprises, which are actually protected by the

Financial Services Compensation Scheme (the “FSCS”) (i.e. are eligible for protection and do not exceed the FSCS coverage limit (being, as at the date of this Base Prospectus, £85,000)); and

- (ii) a second-ranking preference to deposits and share accounts (or a relevant part thereof) of natural persons and micro, small and medium enterprises, which would be eligible for FSCS protection but for the fact that they either (a) exceed the coverage limit of the FSCS or (b) were made through a branch outside the EU. Such deposits and share accounts (or the relevant part thereof) will rank after the preferential debts referred to in paragraph (i) above but in priority to the claims of ordinary unsecured creditors that are not afforded preferential status in the event of an insolvency.

In a winding-up or dissolution, a substantial portion of the claims against us would be claims of our retail members, whose claims will rank ahead of claims in respect of the notes.

Relative ranking of notes issued under the program

On a winding-up or dissolution, claims in respect of senior preferred notes issued under the program will rank ahead of claims in respect of senior non-preferred notes (notwithstanding that senior preferred notes and senior non-preferred notes both share the ‘senior’ designation under the program, investors should note that the latter ranks behind the former), which in turn will rank ahead of claims in respect of subordinated notes.

Therefore, in a winding-up or dissolution, our assets available for distribution would be expected to be distributed:

1. firstly, in satisfaction of all claims which are preferred by law to claims in respect of senior preferred notes;
2. secondly, only if and to the extent any assets remain after the distributions above, in satisfaction of all claims in respect of senior preferred notes and any other ordinary non-preferential debts (as that term is defined in Section 387A of the Insolvency Act) on a *pro rata* basis;
3. thirdly, only if and to the extent any assets remain after the distributions above, in satisfaction of all claims in respect of senior non-preferred notes and any other secondary non-preferential debts (as that term is defined in Section 387A of the Insolvency Act) on a *pro rata* basis; and
4. fourthly, only if and to the extent any assets remain after the distributions above (and, if applicable, after distributions in respect of our subordinated liabilities which rank ahead of subordinated notes, if any), in satisfaction of all claims in respect of subordinated notes and any other tertiary non-preferential debts (as that term is defined in Section 387A of the Insolvency Act) which rank *pari passu* with subordinated notes, on a *pro rata* basis.

Accordingly, we may not have enough assets remaining after paying higher-priority creditors to pay amounts due under the relevant notes, and in such circumstances noteholders could lose some or all of their investment in the notes.

Relevance of ranking to recovery and resolution under the Banking Act

The ranking of notes in a winding up or dissolution can also be expected to have a direct impact on the relative losses imposed on noteholders in a resolution of the Society or upon use of the write-down and conversion powers under the Banking Act, as such resolution and write-down and conversion powers ought to be used in a manner that respects the hierarchy of claims in an ordinary insolvency. See “*The UK Banking Act 2009 confers substantial powers on a number of UK authorities designed to enable them to take a range of actions in relation to UK deposit-taking institutions which are considered to be at risk of failing. The exercise of any of these actions in relation to us or any notes could materially adversely affect the value of any notes and/or the rights of noteholders*” above.

In addition, the senior non-preferred notes and subordinated notes are intended to contribute towards the our MREL meaning that they are specifically intended to be available to resolution authorities for write-down, write-off or conversion to equity under the Banking Act in order to absorb losses and recapitalize us if we are failing, and before more senior-ranking creditors suffer losses. Accordingly, investors in our senior non-preferred notes and subordinated notes may lose all or substantially all of their investment while investors in our senior preferred notes suffer lower (or no) losses (although there can be no assurance that investors in senior preferred notes will not also suffer substantial losses). The market value of our senior non-preferred notes and subordinated notes may therefore be more severely adversely affected and/or more volatile if our financial condition deteriorates than the market value of our senior preferred notes. Accordingly, holders of our senior non-preferred notes may bear significantly more risk than holders of our senior preferred notes (notwithstanding that both share the 'senior' designation under the program), and holders of our subordinated notes may bear significantly greater risk than holders of our senior non-preferred notes.

In the event of insolvency, winding up or resolution, there is a real risk that investors in our senior preferred notes, senior non-preferred notes and/or subordinated notes would lose some or the entire amount of their investment. Furthermore, the market price of senior preferred notes, senior non-preferred notes and subordinated notes can be expected to be materially adversely affected if our financial condition deteriorates such that the market anticipates our insolvency, winding-up or resolution.

Noteholders agree to be bound by the exercise of any UK Bail-in Power by the Resolution Authority

In recognition of the resolution powers granted by law to the Resolution Authority, by acquiring any notes, each noteholder will acknowledge and accept that the Amounts Due (as defined in "*Terms and Conditions of the Notes*") arising under the notes may be subject to the exercise of the UK Bail-in Power (as defined in "*Terms and Conditions of the Notes*") and will acknowledge, accept, consent and agree to be bound by the effect of the exercise of any UK Bail-in Power by the Resolution Authority, that may result in (i) the reduction of all, or a portion, of the Amounts Due; (ii) the conversion of all, or a portion, of the Amounts Due on the notes into shares, deferred shares (including core capital deferred shares) or other securities or other of our obligations or another person (and the issue to or conferral on the noteholder of such shares, deferred shares or other securities or obligations), including by means of an amendment, modification or variation of the terms of the notes; (iii) the cancellation of the notes; (iv) the amendment or alteration of the maturity of the notes or amendment of the amount of interest payable on the notes, or the dates on which interest becomes payable, including by suspending payment for a temporary period. Each noteholder will further acknowledge, accept, consent and agree to be bound by the variation of the terms of the notes and Indenture, if necessary, to give effect to the exercise of the UK Bail-in Power by the Resolution Authority.

Accordingly, the UK Bail-in Power may be exercised in such a manner as to result in noteholders losing all or a part of the value of their investment in the notes, having payment on the notes suspended for a period of time or receiving a different security from the notes, which may be worth significantly less than the notes and which may have significantly fewer protections than those typically afforded to debt securities. Moreover, the Resolution Authority may exercise the UK Bail-in Power without providing any advance notice to, or requiring the consent of, the noteholders. In addition, the exercise of the UK Bail-in Power by the Resolution Authority with respect to the Notes is not an Event of Default under the notes or the Indenture or a breach or default thereunder, or an event of default or default for any other purpose.

The credit ratings may not be reliable, and changes to the credit ratings could affect the value of the notes.

The credit ratings of our medium-term note program may not reflect the potential impact of all risks relating to the value of the notes. In addition, real or anticipated changes in our credit ratings or the credit ratings of the notes will generally affect the market value of the notes. These credit ratings could change due to a wide range of factors, including but not limited to those discussed under "*Risks Related to Our Business—Rating downgrade and/or market sentiment with respect to us, our sector, the UK and/or other sovereign issuers may have an adverse effect on our performance and/or the marketability and liquidity of the notes.*" In general, EU regulated investors are restricted from using a rating for regulatory purposes in the EEA if such rating is not issued by a credit rating agency established in the EEA and registered under the CRA Regulation unless the rating is

provided by a credit rating agency operating in the EU or in the UK before June 7, 2010 which has submitted an application for registration in accordance with the EU CRA Regulation and such registration has not been refused. Such general restriction will also apply in the case of credit ratings issued by third country non-EEA credit rating agencies, unless the relevant credit ratings are endorsed by an EEA-registered credit rating agency or the relevant third country rating agency is certified in accordance with the EU CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances).

Investors regulated in the UK are subject to similar restrictions under the UK CRA Regulation. As such, UK regulated investors are required to use for UK regulatory purposes ratings issued by a credit rating agency established in the UK and registered under the UK CRA Regulation. In the case of ratings issued by third country non-UK credit rating agencies, third country credit ratings can either be: (a) endorsed by a UK registered credit rating agency; or (b) issued by a third country credit rating agency that is certified in accordance with the UK CRA Regulation. Note this is subject, in each case, to (a) the relevant UK registration, certification or endorsement, as the case may be, not having been withdrawn or suspended, and (b) transitional provisions that apply in certain circumstances. In the case of third country ratings, for a certain limited period of time, transitional relief accommodates continued use for regulatory purposes in the UK, of existing pre-2021 ratings, provided the relevant conditions are satisfied.

If the status of the rating agency rating the notes changes for the purposes of the CRA Regulation or the UK CRA Regulation, relevant regulated investors may no longer be able to use the rating for regulatory purposes in the EEA or the UK, as applicable, and the notes may have a different regulatory treatment, which may impact the value of the notes and their liquidity in the secondary market.

A credit rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency. Any credit rating downgrade, suspension or withdrawal could negatively impact the value of the notes.

Because the Global Notes will be held by DTC or its nominee and/or another clearing system in book-entry form, you will have to rely on their and/or such other clearing system's procedures for transfer, payment and communication with us.

These notes will be represented by one or more Global Notes. These notes will be deposited with a custodian on behalf of DTC or its nominee and/or in another clearing system. Except in limited circumstances, holders will not be entitled to receive certificated notes. DTC and/or any other relevant clearing system will maintain records of the beneficial interests in the Global Notes. Holders will be able to trade their beneficial interests only through DTC or such other clearing system, as applicable, or a participant of DTC such as Euroclear or Clearstream, or such other clearing system, as applicable. The laws of some jurisdictions, including some states in the United States, may require that certain purchasers of securities take physical delivery of such securities in certificated form. The foregoing limitations may impair a holder's ability to own, transfer or pledge its beneficial interests. A holder of beneficial interests in the Global Notes in one of these jurisdictions will not be considered the owner or "holder" of the notes.

We will discharge our payment obligations under the notes by making payments to the custodian for distribution to the holders of beneficial interests at DTC and/or any other relevant clearing system or a participant of DTC and/or any such other clearing system with respect to interests of indirect participants. We and the initial purchasers of the notes will not have any responsibility or liability for the records relating to, or payments made in respect of, beneficial interests in the Global Notes. A holder of beneficial interests must rely on the procedures of DTC and/or any other relevant clearing system or their participants, through which holders hold their interests, to receive payments under the notes. We cannot assure holders that the procedures of DTC or DTC's nominees, participants or indirect participants will be adequate to ensure that holders receive payments in a timely manner.

A holder of beneficial interests in the Global Notes will not have a direct right under the Indenture governing these notes to act upon solicitations we may request. Instead, holders will be permitted to act only to the extent they receive appropriate proxies to do so from DTC or, if applicable, DTC's participants or indirect

participants or, in the case of any other relevant clearing system, in accordance with the relevant procedures of such clearing system. Similarly, if we default on our obligations under the notes, as a holder of beneficial interests in the Global Notes, holders will be restricted to acting through DTC and/or any other relevant clearing system or, if applicable, their participants or indirect participants. We cannot assure holders that the procedures of DTC and/or any other relevant clearing system or their nominees, participants or indirect participants will be adequate to allow them to exercise their rights under the notes in a timely manner.

If we have the right to redeem any notes at our option, this may limit the market value of the notes concerned.

An optional redemption feature is likely to limit the market value of notes. During any period when we may elect to redeem notes or there is a perception that we are able to redeem notes, the market value of those notes generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.

If we redeem any notes at our option, or are required to redeem any notes, an investor may not be able to reinvest the redemption proceeds in a manner which achieves a similar effective return.

We may be expected to redeem notes with an optional redemption feature (including any optional redemption right at our discretion on specified dates or in specified periods, any optional redemption right following certain changes in the taxation of any notes, any optional redemption right in respect of subordinated notes following the occurrence of a Regulatory Event, any optional redemption right in respect of senior non-preferred notes following the occurrence of a Loss Absorption Disqualification Event, or otherwise) when our cost of borrowing is lower than the interest rate on the notes. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the notes being redeemed and may only be able to do so at a significantly lower rate. Additionally, we may redeem the notes at times when prevailing interest rates are relatively low, and accordingly investors may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the notes. During any period when we may elect to redeem notes or there is a perception that we are able to redeem notes, the market value of such notes will generally not rise substantially above the price at which they may be redeemed. That may also be true prior to any redemption period. Potential investors should consider reinvestment risk in light of other investments available at that time.

Redemption of subordinated notes for regulatory reasons

In certain circumstances where we are unable to achieve the Tier 2 capital recognition of the subordinated notes including as a result of a change in the regulatory classification of the subordinated notes that was not reasonably foreseeable as at the issue date of the subordinated notes, the relevant subordinated notes may be redeemed prior to the stated Maturity Date. Our exercise of these rights may have an adverse effect on the position of holders of the subordinated notes. If such subordinated notes are to be so redeemed or there is a perception that such may be so redeemed, this may impact the market price of such notes.

Redemption of senior non-preferred notes following a Loss Absorption Disqualification Event

If so specified in the applicable Final Terms, we may redeem our senior non-preferred notes upon the occurrence of a Loss Absorption Disqualification Event. If such senior non-preferred notes are to be so redeemed or there is a perception that such may be so redeemed, this may impact the market price of such notes.

A Loss Absorption Disqualification Event shall be deemed to have occurred in respect of senior non-preferred notes if, as a result of any amendment to, or change in, any Loss Absorption Regulations, or any change in the application or official interpretation of any Loss Absorption Regulations, in any such case becoming effective on or after the issue date of such senior non-preferred notes, such senior non-preferred notes are or (in our opinion or the relevant Supervisory Authority) are likely to become fully or (if so specified in the applicable Final Terms) partially excluded from our minimum requirements (whether on an individual or consolidated basis) for (A) own funds and eligible liabilities and/or (B) loss absorbing capacity instruments, in each case as such minimum requirements are applicable to us (whether on an individual or consolidated basis) and determined in

accordance with, and pursuant to, the relevant Loss Absorption Regulations; provided that a Loss Absorption Disqualification Event shall not occur where the exclusion of the senior non-preferred notes from our minimum requirement(s) is due to the remaining maturity of such senior non-preferred notes being less than any period prescribed by any applicable eligibility criteria for such minimum requirements under the relevant Loss Absorption Regulations effective with respect to us on the issue date of such senior non-preferred notes.

As the implementation of the MREL regime and the requisite features of eligible liabilities instruments under that regime continue to evolve, it may not be possible to predict accurately if and when any of our senior non-preferred notes may be fully or partially excluded from our MREL requirements in the future. If any of our senior non-preferred notes are to be redeemed as a result of a Loss Absorption Disqualification Event or there is a perception that such notes may be so redeemed, this may impact the market price of such notes. In addition, there can be no assurance that noteholders will be able to reinvest the amounts received upon redemption at a rate that will provide the same rate of return as their investment in our senior non-preferred notes.

Substitution and variation of senior non-preferred notes following a Loss Absorption Disqualification Event

If so specified in the applicable Final Terms, we may, following a Loss Absorption Disqualification Event in respect of any senior non-preferred notes, without the need for any consent of the noteholders, substitute all (but not some only) of such senior non-preferred notes for, or vary the terms of such notes so that they remain or become, Loss Absorption Compliant Notes. The Loss Absorption Compliant Notes are required to have terms such that they rank as part of the class of Secondary Non-Preferential Debts; this is the case whether or not the senior non-preferred notes had become a part of the class of Ordinary Non-Preferential Debts as a result of the relevant Loss Absorption Disqualification Event. While (subject to such ranking requirement) Loss Absorption Compliant Notes are otherwise required to have terms which are not materially less favorable to noteholders than the terms of the relevant senior non-preferred notes (as we reasonably determine in consultation with an independent advisor of recognized standing), no assurance can be given that any such substitution or variation will not adversely affect any particular holder. In addition, the tax and stamp duty consequences of holding such substituted or varied notes could be different for some categories of noteholders from the tax and stamp duty consequences for them of holding the senior non-preferred notes prior to such substitution or variation.

Limitation on gross-up obligation under the subordinated notes and senior non-preferred notes.

Our obligation to pay additional amounts in respect of any withholding or deduction in respect of United Kingdom taxes under the terms of each series of subordinated notes and senior non-preferred notes applies only to payments of interest due and payable under such notes and not to payments of principal (which term, for these purposes, includes any premium or final redemption amount, early redemption amount, if any, or other amount payable in respect thereof). As such, we would not be required to pay any additional amounts under the terms of the subordinated notes or senior non-preferred notes to the extent any withholding or deduction for or on account of United Kingdom tax applied to payments of principal. Accordingly, if any such withholding or deduction were to apply to any payments of principal under any subordinated notes or any senior non-preferred notes, holders of such notes would, upon repayment or redemption of such notes, be entitled to receive only the net amount of such redemption or repayment proceeds after deduction of the amount required to be withheld. Therefore, holders may receive less than the full amount due under such notes, and the market value of such notes may be adversely affected.

U.S. tax consequences of substitution or variation in terms pursuant to a Loss Absorption Disqualification Event

If upon the occurrence of a Loss Absorption Disqualification Event we substitute all of the relevant series of senior non-preferred notes for, or varies the terms of such senior non-preferred notes so that they remain or, as appropriate, become, Loss Absorption Compliant Notes, such substitution or variation in terms might be treated for U.S. federal income tax purposes as a deemed disposition of such senior non-preferred notes by a U.S. Holder (as defined below under “*Taxation—US Federal Income Taxation*”) in exchange for new notes. As a result of this deemed disposition, a U.S. Holder could be required to recognize capital gain or loss for U.S. federal income tax

purposes equal to the difference, if any, between the issue price of the new notes (as determined for U.S. federal income tax purposes) and the U.S. Holder's tax basis in the relevant senior non-preferred notes.

The regulation and reform of "benchmarks" may adversely affect the value of notes linked to or referencing such benchmarks.

Benchmarks Regulation and Reform

Interest rates and indices which are deemed to be "benchmarks" (including the euro interbank offered rate ("EURIBOR")), are the subject of recent and ongoing reform. Some of these reforms are already effective while others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any notes linked to such a benchmark.

Regulation (EU) 2016/1011 (the "**EU Benchmarks Regulation**") was published in the Official Journal of the EU on June 29, 2016 and has mostly applied, subject to certain transitional provisions, since January 1, 2018. The EU Benchmarks Regulation applies to the provision of benchmarks, the contribution of input data to a benchmark and the use of a benchmark within the EU. Among other things, it (i) requires benchmark administrators to be authorized or registered (or, if non-EU-based, to be subject to an equivalent regime or otherwise recognized or endorsed) and (ii) prevents certain uses by EU supervised entities (such as us) of benchmarks of administrators that are not authorized or registered (or, if non-EU based, not deemed equivalent or recognized or endorsed). The UK Benchmarks Regulation (Regulation (EU) No.2016/1011 as it forms part of domestic law by virtue of the EUWA), among other things, applies to the provision of benchmarks and the use of a benchmark in the UK. Similarly, it prohibits the use in the UK by UK supervised entities of benchmarks of administrators that are not authorized by the FCA or registered on the FCA register (or, if non-UK based, not deemed equivalent or recognized or endorsed).

The EU Benchmarks Regulation and/or the UK Benchmarks Regulation, as applicable, could have a material impact on any notes linked to or referencing a benchmark, in particular, if the methodology or other terms of the benchmark are changed in order to comply with the requirements of the EU Benchmarks Regulation and/or the UK Benchmarks Regulation, as applicable. Such changes could, among other things, have the effect of reducing, increasing or otherwise affecting the volatility of the published rate or level of the relevant benchmark.

IBOR replacement

There is significant regulatory scrutiny of continued use of inter-bank offered rates ("**IBORs**") and increasing pressure and momentum for banks and other financial institutions to transition relevant products to replacement rates.

Different currency IBORs are being transitioned to different rates which, in contrast to IBOR rates (which include an interbank lending risk margin) may be (or may be derived from) risk-free rates, which may perform very differently from the relevant IBOR rate.

For example, in the case of floating rate notes:

- bonds which would traditionally have referenced GBP-LIBOR are increasingly referencing the Sterling Overnight Index Average ("**SONIA**");
- bonds which would traditionally have referenced USD-LIBOR are increasingly referencing the Secured Overnight Financing Rate ("**SOFR**"); and
- bonds which would traditionally have referenced EURIBOR are expected to move towards referencing the new Euro Short-term Rate ("**€STR**") (although a reformed EURIBOR rate will continue to be published).

The replacement risk-free rates referenced above operate on a backward-looking basis (predominantly on the basis of a daily compounding calculation, although weighted average alternatives have been seen in certain rates), rather than forward-looking term rates. While forward-looking term rates based on certain of these risk-free rates have been or are being developed, it is uncertain whether the capital markets will move to referencing those term rates for public bond issues, or whether regulators would be content to allow such adoption.

More broadly, any of the international or national reforms, or the general increased regulatory scrutiny of benchmarks, could increase the costs and risks of administering or otherwise participating in the setting of a benchmark and complying with any such regulations or requirements. Specifically, the euro risk free-rate working group for the euro area has published a set of guiding principles and high level recommendations for fallback provisions in, amongst other things, new euro denominated cash products (including bonds) referencing EURIBOR. The guiding principles indicate, amongst other things, that continuing to reference EURIBOR in relevant contracts (without robust fallback provisions) may increase the risk to the euro area financial system. On November 25, 2020, the euro risk-free rate working group published consultations on EURIBOR fallback trigger events and fallback rates. The final recommendations were published on May 11, 2021. The recommended fallback triggers include both cessation and pre-cessation triggers, including, *inter alios*, permanent cessation, non-representativeness and (potentially) unlawfulness triggers (the working group recommended against a material change in the EURIBOR methodology as defined by the European Money Markets Institute (EMMI) being an automatic trigger). For debt securities, based on support for the proposals from the public consultation and issuances already observed in the capital markets, the working group recommended the replacement rate to be €STR with a backward-looking lookback period methodology (with an observation shift methodology, although use of the lag approach was considered a robust alternative) and applying an adjustment spread based on a five-year historical median methodology.

Separately, the FCA has indicated through a series of announcements that the continuation of LIBOR on the current basis cannot and will not be guaranteed after 2021. On 5 March 2021, ICE Benchmark Administration Limited (“**IBA**”), the administrator of LIBOR, published a statement confirming its intention to cease publication of all LIBOR settings, together with the dates on which this will occur, subject to the FCA exercising its powers to require IBA to continue publishing such LIBOR settings using a changed methodology (the “**IBA announcement**”). Concurrently, the FCA published a statement on the future cessation and loss of representativeness of all LIBOR currencies and tenors, following the dates on which IBA has indicated it will cease publication (the “**FCA announcement**”). Permanent cessation will occur immediately after December 31, 2021 for all Euro and Swiss Franc LIBOR tenors and certain Sterling, Japanese Yen and US Dollar LIBOR settings and immediately after June 30, 2023 for certain other USD LIBOR settings. In relation to the remaining LIBOR settings (1-month, 3-month and 6-month Sterling, US Dollar and Japanese Yen LIBOR settings), the FCA will consult on, or continue to consider the case for, using its powers to require IBA to continue their publication under a changed methodology for a further period after end-2021 (end-June 2023 in the case of US Dollar LIBOR). The FCA announcement states that consequently, these LIBOR settings will no longer be representative of the underlying market that such settings are intended to measure immediately after December 31, 2021, in the case of the Sterling and Japanese Yen LIBOR settings and immediately after June 30, 2023, in the case of the USD LIBOR settings. Any continued publication of the Japanese Yen LIBOR settings will also cease permanently at the end of 2022.

The potential transition from EURIBOR to €STR, or any other currency IBOR to a new rate, or the elimination of EURIBOR or any other benchmark, or changes in the manner of administration of any benchmark, could require an adjustment to the Terms and Conditions of the Notes, or result in other consequences, in respect of any notes referencing such benchmark. Such factors may have (without limitation) the following effects on certain benchmarks: (i) discouraging market participants from continuing to administer or contribute to a benchmark; (ii) triggering changes in the rules or methodologies used in the benchmark and/or (iii) leading to the disappearance of the benchmark. Any of the above changes or any other consequential changes as a result of international or national reforms or other initiatives or investigations, could have a material adverse effect on the value of and return on any notes linked to, referencing, or otherwise dependent (in whole or in part) upon, a benchmark.

Benchmark replacement under the Terms and Conditions of the Notes

If “*Benchmark Replacement*” is specified to be “Applicable” in the applicable Final Terms, the Terms and Conditions of the Notes provide for certain fallback arrangements in the event that a Benchmark Event or, as the case may be, a Benchmark Transition Event, occurs in respect of the Original Reference Rate for the relevant series of notes, including (without limitation) if an inter-bank offered rate (such as EURIBOR, SONIA, SOFR or €STR) or other relevant reference rate (which could include, without limitation, any mid-swap rate), and/or any page on which such benchmark may be published, becomes unavailable, is the subject of a public announcement by the supervisor of the relevant administrator as no longer being representative of the market it is supposed to represent, or if we, or any other relevant party, are no longer permitted lawfully to calculate interest on any notes by reference to such benchmark under the UK Benchmarks Regulation and/or the EU Benchmarks Regulation, as applicable, or otherwise.

Such fallback arrangements include the possibility that the rate of interest could be set by reference to a Successor Rate, or an Alternative Rate or, as the case may be, a Benchmark Replacement (in each case as defined in the Terms and Conditions), with (in either case) application of an Adjustment Spread or, as applicable, a Benchmark Replacement Adjustment (which could be positive, negative or zero), and may include amendments to the Terms and Conditions of the Notes to ensure the proper operation of the Successor Rate or Alternative Rate, Benchmark Replacement, Adjustment Spread and/or Benchmark Replacement Adjustment, as applicable, all as determined by us (acting in good faith and in consultation with an Independent Advisor). However, we will not determine or implement a Successor Rate, an Alternative Rate, Benchmark Replacement, Adjustment Spread, Benchmark Replacement Adjustment, or any Benchmark Amendments or any Benchmark Conforming Changes (as the case may be) if and to the extent that, in our determination, the same could reasonably be expected to impact adversely the treatment of the notes under the prudential or loss-absorption regulations in certain respects, as more fully described under “*Terms and Conditions of the Notes*”. It is possible that the adoption of a Successor Rate, Alternative Rate or Benchmark Replacement and (in either case) the applicable Adjustment Spread or Benchmark Replacement Adjustment may result in a rate of interest less favorable to holders than the Original Reference Rate.

There is also a risk that the relevant fallback provisions may not operate as expected or as intended at the relevant time, which could increase uncertainty and negatively impact the market value of the notes.

Floating Rate Notes issued under the Program could effectively become Fixed Rate Notes

Furthermore, in certain circumstances, the ultimate fallback for the purposes of calculation of the Rate of Interest for a particular Interest Period may result in the Rate of Interest for the last preceding Interest Period being used. This may result in the effective application of a fixed rate for Floating Rate Notes based on the rate which was last observed on the Relevant Screen Page or, in the case of Reset Notes, the application of the previous reset Rate of Interest for a preceding Reset Period, or for the First Reset Rate of Interest, the application of the Initial Rate of Interest applicable to such notes on the Interest Commencement Date or a rate based on the Mid-Swap Fallback Rate, which could adversely affect the market value of an investment in the notes.

Investors should consult their own independent advisors and make their own assessment about the potential risks imposed by the UK Benchmarks Regulation and/or the EU Benchmarks Regulation, as applicable, reforms and the possible application of the benchmark replacement provisions of the notes in making any investment decision with respect to any notes referencing a benchmark.

The market continues to develop in relation to SOFR and SONIA as reference rates

Where the applicable Final Terms for a Series of Floating Rate Notes identifies that the Rate of Interest for such notes will be determined by reference to SOFR or SONIA, the Rate of Interest will be determined on the basis of the relevant reference rate as described in the terms and conditions of the notes. SOFR and SONIA differ from LIBOR in a number of material respects, including (without limitation) that SOFR and SONIA are backwards-looking, risk-free overnight rates, whereas LIBOR is expressed on the basis of a forward-looking term and includes a risk-element based on inter-bank lending. As such, investors should be aware that SOFR or SONIA

may behave materially differently than LIBOR rates historically used in issues of floating rate notes under this Program. The use of SOFR or SONIA as reference rates for Eurobonds is subject to continued change and development, both in terms of the substance of the calculation and in the development and adoption of market infrastructure for the issuance and trading of bonds referencing SOFR or SONIA.

Accordingly, prospective investors in any notes referencing SOFR or SONIA should be aware that the market continues to develop in relation to SOFR and SONIA as reference rates in the capital markets and their adoption as alternatives to USD LIBOR and Sterling LIBOR, respectively. For example, in the context of backwards-looking SOFR and SONIA rates, market participants and relevant working groups have explored different methodologies, such as daily compounding rates and weighted average rates, and forward-looking ‘term’ SOFR and SONIA reference rates (which seek to measure the market’s forward expectation of an average SOFR or SONIA rate over a designated term) have also been, or are being, developed. The adoption of SOFR or SONIA may also see component inputs into swap rates or other composite rates transferring from LIBOR or another reference rate to SOFR or SONIA, as applicable.

The market or a significant part thereof may adopt an application of SOFR or SONIA that differs significantly from that set out in “*Terms and Conditions of the Notes*” as applicable to notes referencing a SOFR or SONIA rate that are issued under this Base Prospectus. In addition, the methodology for determining any overnight rate index by reference to which the Rate of Interest in respect of certain Notes may be calculated could change during the life of any Notes. Furthermore, we may in future issue notes referencing SOFR or SONIA that differ materially in terms of interest determination when compared with any previous SOFR or SONIA-referenced notes that we issue under the medium-term note program described in this Base Prospectus. The nascent development of SOFR and SONIA as interest reference rates for the Eurobond markets, as well as continued development of SOFR and SONIA-based rates for such market and the market infrastructure for adopting such rates, could result in reduced liquidity or increased volatility or could otherwise affect the market price of any SOFR or SONIA-referenced notes issued under the medium term note program described in this Base Prospectus.

Furthermore, the Rate of Interest on notes which reference SOFR or SONIA is only capable of being determined at the end of the relevant Observation Period and immediately prior to the relevant Interest Payment Date. It may be difficult for investors in notes which reference SOFR or SONIA to estimate reliably the amount of interest which will be payable on such notes, and some investors may be unable or unwilling to trade such notes without changes to their IT systems, both of which factors could adversely impact the liquidity of such notes. Further, in contrast to LIBOR-based notes, if notes referencing SOFR or SONIA become due and payable as a result of an Event of Default under “*Terms and Conditions of the Notes—Events of Default—Senior Preferred Notes*” and “*Terms and Conditions of the Notes—Events of Default—Subordinated Notes and Senior Non-Preferred Notes*” (as applicable), or are otherwise redeemed early on a date which is not an Interest Payment Date, the final Rate of Interest payable in respect of such notes shall only be determined immediately prior to the date on which the notes become due and payable.

In addition, the manner of adoption or application of SOFR or SONIA reference rates in the bond markets may differ materially compared with the application and adoption of SOFR or SONIA in other markets, such as the derivatives and loan markets. Investors should carefully consider how any mismatch between the adoption of SOFR or SONIA reference rates across these markets may impact any hedging or other financial arrangements which they may put in place in connection with any acquisition, holding or disposal of notes referencing SOFR or SONIA.

Investors should carefully consider these matters when making their investment decision with respect to any such notes.

SOFR may be discontinued or fundamentally altered in a manner that is materially adverse to the interests of investors in the notes.

SOFR is published by the Federal Reserve Bank of New York and is intended to be a broad measure of the cost of borrowing cash overnight collateralized by Treasury securities. The Federal Reserve Bank of New York reports that the Secured Overnight Financing Rate includes all trades in the Broad General Collateral Rate,

plus bilateral Treasury repurchase agreement transactions cleared through the delivery-versus-payment service offered by the Fixed Income Clearing Corporation (the “FICC”), a subsidiary of the Depository Trust and Clearing Corporation (“DTCC”). The Secured Overnight Financing Rate is filtered by the Federal Reserve Bank of New York to remove a portion of the foregoing transactions considered to be “specials”.

The Federal Reserve Bank of New York reports that the Secured Overnight Financing Rate is calculated as a volume-weighted median of transaction-level tri-party repurchase agreement data collected from The Bank of New York Mellon as well as General Collateral Finance repurchase agreement transaction data and data on bilateral Treasury repurchase transactions cleared through the FICC’s delivery-versus-payment service. The Federal Reserve Bank of New York notes that it obtains information from DTCC Solutions LLC, an affiliate of DTCC. The Federal Reserve Bank of New York notes on its publication page for the Secured Overnight Financing Rate that use of the Secured Overnight Financing Rate is subject to important limitations and disclaimers, including that the Federal Reserve Bank of New York may alter the methods of calculation, publication schedule, rate revision practices or availability of the Secured Overnight Financing Rate at any time without notice.

Because the Secured Overnight Financing Rate is published by the Federal Reserve Bank of New York based on data received from other sources, we have no control over its determination, calculation or publication. There can be no guarantee that the Secured Overnight Financing Rate will not be discontinued or fundamentally altered in a manner that is materially adverse to the interests of investors in notes linked to SOFR. If the manner in which the Secured Overnight Financing Rate is calculated is changed, that change may result in a reduction of the amount of interest payable on the notes linked to SOFR and the trading prices of such notes. If the rate at which interest on the notes linked to SOFR accrues on any day declines to zero or becomes negative, no interest will be payable on such notes in respect of that day.

The Federal Reserve Bank of New York began to publish the Secured Overnight Financing Rate in April 2018. The Federal Reserve Bank of New York has also begun publishing historical indicative Secured Overnight Financing Rates going back to 2014. Investors should not rely on any historical changes or trends in the Secured Overnight Financing Rate as an indicator of future changes in the Secured Overnight Financing Rate. Also, since the Secured Overnight Financing Rate is a relatively new market index, notes linked to SOFR will likely have no established trading market when issued, and an established trading market may never develop or may not be very liquid. Market terms for debt securities indexed to the Secured Overnight Financing Rate, such as the spread over the index reflected in interest rate provisions, may evolve over time, and trading prices of notes linked to SOFR may be lower than those of later-issued indexed debt securities as a result. Similarly, if the Secured Overnight Financing Rate does not prove to be widely used in securities like the notes linked to SOFR, the trading price of such notes may be lower than those of bonds linked to indices that are more widely used. Investors in notes linked to SOFR may not be able to sell such notes at all or may not be able to sell such notes at prices that will provide them with a yield comparable to similar investments that have a developed secondary market, and may consequently suffer from increased pricing volatility and market risk.

If the notes include a feature to convert the interest basis from a fixed rate to a floating rate, or vice versa, or are Reset Notes, this may affect the secondary market and the market value of the notes concerned.

Floating Rate/fixed rate notes may bear interest at a rate that may convert from a fixed rate to a floating rate, or from a floating rate to a fixed rate. Such a feature to convert the interest basis, and any conversion of the interest basis, may affect the secondary market and the market value of such notes as the change of interest basis may result in a lower interest return for noteholders. Where the notes convert from a fixed rate to a floating rate, the spread on the floating rate/fixed rate notes may be less favorable than then prevailing spreads on comparable floating rate notes tied to the same reference rate. In addition, the new floating rate at any time may be lower than the rates on other notes. Where the notes convert from a floating rate to a fixed rate, the fixed rate may be lower than then prevailing rates on our notes and could affect the market value of an investment in such notes.

In the case of any series of Reset Notes, the rate of interest on such Reset Notes will be reset by reference to the Reset Reference Rate, as adjusted for any applicable margin, on the reset dates specified in the relevant Final Terms. This is more particularly described in “*Terms and Conditions of the Notes—Interest—Interest on Reset Notes*”. The reset of the rate of interest in accordance with such provisions may affect the secondary market

for and the market value of such Reset Notes. Following any such reset of the rate of interest applicable to the notes, the First Reset Rate of Interest or the Subsequent Reset Rate of Interest on the relevant Reset Notes may be lower than the Initial Rate of Interest, the First Reset Rate of Interest and/or any previous Subsequent Reset Rate of Interest, which could affect the market value of an investment in such notes.

Notes which are issued at a substantial discount or premium may experience price volatility in response to changes in market interest rates.

The market values of notes issued at a substantial discount or premium to their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing notes. Generally, the longer the remaining term of the notes, the greater the price volatility as compared to conventional interest-bearing notes with comparable maturities. This price volatility could adversely affect the market value of an investment in the notes.

The value of the notes could be adversely affected by a change in the laws of the State of New York, English law or administrative practice.

The conditions of the notes are based on the laws of the State of New York in effect as at the date of this Base Prospectus, except that the subordination and ranking provisions in each of the Indenture, the subordinated notes and the senior non-preferred notes are based on the laws of England in effect as at the relevant issue date. No assurance can be given as to the impact of any possible judicial decision or change to law or administrative practice after the date of this Base Prospectus and any such change could materially adversely impact the value of any notes affected by it.

The value of fixed rate notes may be adversely affected by movements in market interest rates.

Investment in fixed rate notes involves the risk that if market interest rates subsequently increase above the rate paid on the fixed rate notes, this will adversely affect the value of the fixed rate notes.

An active secondary market in respect of the notes may never be established or may be illiquid and this would adversely affect the value at which investors could sell their notes.

The notes are new securities which may not be widely distributed and for which there is currently no active trading market. If the notes are traded after their initial issuance, they may trade at a discount to their initial offering price, depending upon prevailing interest rates, the market for similar securities, general economic conditions and our financial condition. Although we have applied to admit the notes issued from time to time to listing on the Official List and to admit them to trading on the London Stock Exchange's main market, we cannot guarantee that the notes will be accepted for listing or admitted to trading or that an active trading market will develop. Accordingly, we cannot guarantee the development or liquidity of any trading market for the notes. If a market for the notes does develop, it may not be very liquid and may be sensitive to changes in financial markets. Therefore, investors may not be able to sell their notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. This may in particular be the case should we be in financial distress, which may result in any sale of the notes having to be at a substantial discount to their principal amount.

Potential investors should note that, in view of prevailing and widely reported global credit market conditions (which continue at the date hereof), the secondary market for the notes and for instruments of this kind may be illiquid. We cannot predict when and how these circumstances will change. Liquidity in the notes may also be disrupted by the recent market disruptions referred to above.

If investors hold notes which are not denominated in the investors' home currency, they will be exposed to movements in exchange rates adversely affecting the value of their holding. In addition, the imposition of exchange controls in relation to any notes could result in an investor not receiving payments on those notes.

We will pay principal and interest on the notes in the Specified Currency (as defined below). This presents certain risks relating to currency conversions if an investor's financial activities are denominated

principally in a currency or currency unit (the “**Investor's Currency**”) other than the Specified Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Specified Currency or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the Specified Currency would decrease (1) the Investor's Currency-equivalent yield on the notes, (2) the Investor's Currency equivalent value of the principal payable on the notes and (3) the Investor's Currency equivalent market value of the notes.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate or our ability to make payments in respect of the notes. As a result, investors may receive less interest or principal than expected, or no interest or principal.

USE OF PROCEEDS

We will use the net proceeds of each issue of notes for general corporate purposes and, with regard to subordinated notes, to strengthen our capital base or as otherwise specified in the applicable Final Terms in respect of any notes. We may also use a portion of the net proceeds from any note issuance to acquire companies or assets that are complementary to our business, although we do not currently have any acquisitions planned. See the section entitled “*Description of Business*” for a detailed description of our funding needs.

CAPITALIZATION AND INDEBTEDNESS

The following is a summary of our consolidated capitalization and indebtedness extracted from our unaudited consolidated financial statements as at September 30, 2021:

	September 30, 2021
	<i>(£ million)</i>
Consolidated Indebtedness⁽¹⁾	
Deposits from banks	36,435
Amounts due to customers and other deposits	7,823
Debt securities in issue	38,031
Total Senior Debt	82,289
Subordinated Debt⁽¹⁾⁽²⁾⁽⁶⁾	7,710
Total Subordinated Debt	7,710
Permanent Interest Bearing Shares⁽¹⁾⁽³⁾⁽⁴⁾	232
Total Permanent Interest Bearing Shares	232
Members' Funds	
CCDS ⁽¹⁾	1,334
Other equity instruments ⁽¹⁾	1,336
General reserve	11,928
Revaluation reserve	43
Cash flow hedge reserve	201
Fair value through other comprehensive income reserve	103
Other hedging reserve	(44)
UK retail member deposits ⁽¹⁾⁽⁴⁾	177,431
Total members' funds	192,332
Total capitalization	282,563

Notes:

- (1) If we were to go into liquidation, the claims in respect of senior preferred notes and other unsubordinated creditors would rank junior to obligations required to be preferred by law (which includes certain member share accounts which are given preferential status by law), but would rank before those of senior non-preferred and subordinated debt holders. The claims of holders of permanent interest bearing shares ("PIBS") rank behind those of all other creditors, including subordinated debt holders. The claims of the holders in respect of our AT1 instruments would rank behind those in respect of our PIBS, and the claims in respect of our CCDS would rank behind claims in respect of our AT1 instruments.
- (2) For consistency with other indebtedness, accrued interest of £63 million is included.
- (3) For consistency with other indebtedness, accrued interest of £3 million is included.
- (4) The fixed rate PIBS are repayable, at the option of the Society, in whole on the initial call date or every fifth anniversary thereafter. If not repaid on a call date then the interest rate is reset at a margin to the yield on the then prevailing five year benchmark gilt rate. Initial call dates are in December 2021, October 2024, February 2026 and March 2030, respectively. The floating rate PIBS payable at 4.2% above SONIA is callable on September 2030.
- (5) Our rules provide that members may withdraw all or any of their investments by giving appropriate notice specifying the amount to be withdrawn. Members may also make an immediate withdrawal of their investments subject to a possible loss of interest. Our board of directors (the "Board") has the power to suspend or limit the payment of withdrawals when, in its discretion, it considers it necessary.
- (6) Subordinated debt comprises of one issue maturing in 2023, three issues maturing 2024, four issues maturing 2026, two issues maturing 2028, three issues maturing 2029, two issues maturing 2030, and one issue maturing in 2031, a number of which are callable ahead of maturity.

Except as otherwise disclosed in this Base Prospectus, there has been no material change in our consolidated capitalization, indebtedness, guarantees or contingent liabilities since September 30, 2021.

SELECTED CONSOLIDATED FINANCIAL AND OPERATING INFORMATION

The following tables present selected consolidated information which has been extracted from our unaudited consolidated financial statements as at and for the six months ended September 30, 2021, with comparatives for the six months ended September 30, 2020 and audited consolidated financial statements as at and for the years ended April 4, 2021, 2020 and 2019.

The following data should be read in conjunction with our audited consolidated financial statements and the notes thereto incorporated by reference herein as well as the section entitled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*”:

	For the six months ended			For the year ended			
	September 30,			April 4,

Notes:

- (1) Return on average total assets represents annualised profit on ordinary activities after tax as a percentage of average total assets. Average balances are based on the balance as at the end of each month during the financial year.
- (2) These ratios, which are APMs, are measures of efficiency and present administrative expenses as a proportion of total income.
- (3) This ratio represents administrative expenses as a percentage of the average of total assets at the start and end of each period.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion is based on, and should be read in conjunction with, our selected consolidated financial and operating information and our audited consolidated financial statements incorporated by reference herein. We prepared our financial statements in accordance with IFRS, which differs in certain significant respects from generally accepted accounting principles in the United States.

Overview

We are a building society, regulated by the FCA in relation to conduct of business matters and by the PRA in relation to prudential requirements. Our core business is providing personal financial services, primarily residential mortgage lending funded largely through retail savings. As a mutual organization, other than in respect of a relatively small amount of funding provided by investors in our deferred shares (including our PIBS, AT1 instruments and CCDS), we are not funded by shareholders, which means that we are managed for the benefit of our members, who are our current account, retail savings and residential mortgage customers (as well as the holders of our deferred shares), rather than for equity shareholders. We return value to our members by offering typically higher interest rates on savings and lower interest rates on loans than those offered by our main competitors. As a result, we generally earn lower pre-tax profits than our main competitors, which are primarily banks or other non-mutual organizations. As a mutual organization, we pay no dividends (although we pay periodic investment returns on our CCDS at our discretion and interest on our AT1 and tier 2 capital securities), and our net earnings are put into reserves and constitute CET1 capital for our capital adequacy requirements. For information regarding UK capital adequacy requirements, see the subsection entitled “—*Financial Condition of Nationwide—Capital Resources*” below.

Financial Performance

Underlying profit for the half year to September 30, 2021 has increased to £850 million (September 30, 2020: £305 million). This reflects income growth, together with a release of credit impairment provisions as the macroeconomic outlook improved. We adopted a conservative approach to managing our financial position at the start of the pandemic, which in part, contributed to our strong half-year performance

Total income increased by £391 million, as net interest margin increased to 1.24% (September 30, 2020: 1.15%). Mortgage income was higher as a result of stronger new business margins across the market during 2020, alongside robust levels of lending during the period. For the half year to September 30, 2021 net interest margin is broadly stable compared with the half year to April 4, 2021; this is expected to moderate going forward.

Member financial benefit has remained broadly stable at £145 million for the half-year (September 30, 2020: £140 million), which was below the target level of at least £400 million per annum due to the continued low interest rate environment. However, we have continued to offer competitive products such as our Member Exclusive Fixed Rate ISA and Triple Access Online Saver which, along with growth in current account balances, has led to net deposit growth of £7.1 billion (September 30, 2020: £1.3 billion). Our deposit stock market share has increased to 9.6% (April 4, 2021: 9.4%).

An increase in other income to £188 million (September 30, 2020: £55 million) reflects the higher income across banking products and gains from investments, and the prior period loss on the buyback of covered bond funding.

Over the past two financial years, we have recognised an elevated credit impairment charge compared to pre-pandemic levels, reflecting the period of economic uncertainty, although arrears rates have remained low. Recent improvements in the macroeconomic outlook have led to a net credit impairment release of £34 million for the half year to September 30, 2021 (September 30, 2020: charge of £139 million).

Total administrative expenses have remained broadly flat at £1,025 million (September 30, 2020: £1,033 million), despite higher investment and business growth, as we continued to drive efficiencies in business-as-usual costs.

The CET1 and UK leverage ratios increased to 37.7% and 5.5% (April 4, 2021: 36.4% and 5.4%) respectively, although this includes the impact of a regulatory change in the treatment of intangible assets which the PRA is proposing to reverse. Excluding this benefit, the CET1 and UK leverage ratios were 36.9% and 5.3% (April 4, 2021: 35.4% and 5.2%), respectively.

Impact of Economic Conditions in the UK Generally and Outlook

The UK economy has been relatively resilient in the face of the pandemic, thanks in large part to its level of flexibility and to substantial government support.

Unemployment has trended down in recent months and wages are growing faster than they were before Covid-19. Combined with record low mortgage rates, this has contributed to a buoyant mortgage market, despite the phased withdrawal of stamp duty reliefs since June 2021. Pandemic-related shifts in housing preferences have continued to spur people to move home, creating strong demand. Meanwhile, the limited supply of homes coming onto the market has meant house price growth has been robust, with prices rising at an annual rate of 9.9% in October 2021 following five months of double-digit increases.

Following staged easing of national lockdown restrictions from March 2021, the UK economy has seen a period of recovery as social distancing controls relaxed, and businesses reopened. A number of schemes available to support borrowers facing financial difficulty during the pandemic, including payment deferrals and furlough, have come to an end. Residential mortgage and consumer banking payment deferrals, offered to affected borrowers to temporarily suspend their contractual payments in accordance with regulatory guidance, were closed to new applications in March 2021, with all payment deferrals ending in July 2021. At September 30, 2021 there were therefore no outstanding balances subject to a payment deferral (April 4, 2021: £1,385 million), with 94% of borrowers with expired payment deferrals having resumed full payments. The 6% who have entered arrears or alternative forbearance arrangements include some borrowers who were in financial difficulty prior to the pandemic.

The outlook remains uncertain. It is unclear how the economy will respond to the winding down of government support, and how long it will take for bottlenecks in global supply chains and domestic capacity constraints to ease. Moreover, any emerging variants of the Covid-19 pandemic (including the Omicron variant identified in November 2021) that are vaccine resistant and/or highly transmissible may also create a further risk. If the jobs market weakens post-furlough, it is likely to have a knock-on effect on the housing market, especially as inflation is likely to remain high in the coming quarters, eating into households' disposable income.

If the recovery remains resilient, higher interest rates are likely to exert a moderating influence on the housing market, as well as dampening price pressures across the economy more generally. Households appear well-placed to withstand an increase in interest rates, given the significant proportion of borrowing on fixed rates, and the relatively low number of borrowers who spend a high proportion of their income on debt repayments.

While the outlook remains challenging, and net interest margins are unlikely to be sustained at current levels, we continue to demonstrate our resilience. Nationwide's financial strength and strong social purpose mean we can continue to support members, colleagues and communities.

Net Interest Income

Net interest income ("NII") increased by £258 million, or 17.8% in the six months ended September 30, 2021 to £1,706 million compared to £1,448 million in the six months ended September 30, 2020. The macroeconomic outlook has been particularly uncertain during the six months ended September 30, 2021, with impairment losses across the past two years being higher than pre-pandemic levels. In response to the increased

credit risk, mortgage margins have increased across the market. This has generated higher net interest income in the year, which provides some protection against the elevated risk of further impairment losses. The increase in net interest income was further supported by our reduction in savings interest rates, following the fall in bank base rate to 0.1% and in recognition of the highly uncertain future.

The table below shows the calculation of net interest margin for the six months ended September 30, 2021 and 2020 and the years ended April 4, 2021, 2020 and 2019.

	For the six months ended September 30,		For the year ended April 4,		
	2021	2020	2021	2020	2019
	<i>(£ million, except percentages)</i>				
Net interest income.....	1,706	1,448	3,146	2,810	2,915
Weighted average total assets.	280,651	256,845	260,500	248,569	238,368
Net interest margin¹	1.24%	1.15%	1.21%	1.13%	1.22%

1 Net interest margin is calculated using annualised Net interest income earned on weighted average total assets.

As part of the UK's response to Covid-19 the bank base rate has remained at a historic low of 0.10%. There is a risk that the bank base rate could be cut to zero or even negative in response to further possible economic deterioration as a result of global market conditions and Covid-19. A rate cut would have an impact on Nationwide's Net Interest Income. As an illustration, a simple measure of income sensitivity over 12 months using a static balance sheet shows that a 0.25% policy rate cut could lead to a reduction of approximately £100 million in NII. This is mainly due to deposits that are assumed to have a floor of 0% so the full extent of a rate cut cannot be passed through to the savings members. This NII sensitivity is before management actions.

Globally, economies continued to report low levels of growth through the last year, including the UK and Eurozone, with significant economic uncertainty ahead from the Covid-19 pandemic. As at September 30, 2021, the global response to Covid-19 has led to central bank rate cuts, the introduction of further monetary easing, and the announcement of significant support for the broader UK economy from the Government.

The competitive environment remains intense as ring-fenced banks with cheaper funding and excess liquidity have continued to focus on our core markets and new market entrants, seeking to exploit new technologies, look to grow market share. Our strategic response is to diversify our product range in response to specific customer needs, including initiatives such as later life lending. We are leveraging our branch presence; having introduced a new branch design three years ago, we have now upgraded 200 branches, which account for nearly a third of our network. We are also trialing a new format branch without a counter in Meadowhall, an out of town shopping center near the city of Sheffield and in the market town of Lichfield. The new design enables a branch presence based on a smaller footprint than the usual design resulting in lower fit out and running costs. Since opening both branches have been delivering well against objectives.

Interest Rate Management

Because the majority of our assets and liabilities are either floating rate instruments or synthetically converted to floating rate instruments using derivatives, variations in market interest rates have a direct impact on our interest income and interest expense. Fluctuations in market interest rates, however, give us the opportunity to manage our interest rate margins and, for most of our assets and liabilities, we can re-price the interest rate that we offer, subject to market and competitive pressures.

The table below shows the daily average three-month sterling LIBOR rates (11:00 a.m. British Bankers' Association fixing) and average Bank of England base rates for the six months ended September 30, 2021 and 2020 and the years ended April 4, 2021, 2020 and 2019.

	For the six months ended September 30,		For the year ended April 4,		
	2021	2020	2021	2020	2019
			(%)		
Daily average three-month sterling LIBOR	0.08	0.21	0.13	0.76	0.80
Average Bank of England base rate ..	0.1	0.10	0.10	0.71	0.66

Interest rate risk arises from the mortgage, savings and other financial services products that we offer. The varying interest rate features and maturities of retail products and wholesale funding create exposures to interest risks. This is due to the imperfect matching of variable interest rates, in particular Bank of England base rate and LIBOR, and timing differences on the re-pricing of assets and liabilities. The risk is managed through the use of derivatives and other appropriate financial instruments and through product design.

Interest rates have started to rise as global economic growth picks up. Market conditions in the UK continue to be characterized by low interest rates, with uncertainty around the impact of future arrangements between the UK and EU on the economic landscape leading to volatility in these rates. As at April 4, 2017 the Bank of England base rate stood at 0.25%. The Bank of England announced a base rate increase from 0.25% to 0.50% in November 2017 and a further increase to 0.75% in August 2018, however two emergency cuts in March 2020, first to 0.25% and then to 0.10%, were part of a monetary response to the Covid-19 pandemic. As at September 30, 2021, the rate was 0.10%.

The BMR is guaranteed to be no more than 2% above the Bank of England base rate. This rate is significantly lower than the equivalent standard variable rate charged by our peers and the SMR onto which our mortgages advanced since April 2009 revert. This has the effect of compressing our mortgage margins and reducing the flexibility with which these margins can be managed. However, the BMR portfolio is well seasoned, has low arrears rates and low possession rates, which partly compensates for the low margin it yields.

Results of Operations for the Six Months Ended September 30, 2021 Compared with the Six Months Ended September 30, 2020

Introduction

Unprecedented economic conditions have persisted through this financial period, with the Bank of England's base rate at a historically low level and ongoing uncertainty surrounding the future economic impacts that may arise from the Covid-19 pandemic. Notwithstanding this, we have managed our financial performance so that we continue to maintain sufficient profitability to ensure a stable leverage ratio. Our leverage ratio has been further supported by the issuance of £750 million of Additional Tier 1 capital, helping us to retain a robust capital position whilst continuing to lend to support members in buying a home.

Underlying profit for the six months ended September 30, 2021 was £850 million (September 30, 2020: £305 million), with statutory profit for the six months ended September 30, 2021 increasing to £853 million (September 30, 2020: £361 million). This profitability has supported us in maintaining a capital position materially above regulatory requirements, with our CET1 and UK leverage ratios at 37.7% and 5.5% respectively (April 4, 2021: 36.4% and 5.4% respectively), helping to ensure we remain a safe place for our members' money.

Our net interest margin (NIM) has improved to 1.24% (September 30, 2020: 1.15%) largely due to mortgage margins improving, having declined for the past four years. Mortgage income increased as the macroeconomic uncertainty resulted in stronger new business margins across the market. Following the bank base rate reductions in March 2020 we took the decision to reduce interest rates across our savings range.

The total impairment release increased to £34 million (September 30, 2020: charge of £139 million) but remains elevated due to the continued uncertainty over the economic impacts of the pandemic. The underlying arrears performance of our portfolios has remained broadly stable, with the impacts of Covid-19 on borrowers

offset by government support schemes and the use of payment deferrals. During the six months ended September 30, 2021, additional payment deferrals have been granted and, while the majority have now expired, the outlook for borrowers remains uncertain.

Administrative expenses reduced by £8 million to £1,025 million (September 30, 2020: £1,033 million). Reductions from reprioritisation of investment spend over the medium term, and lower business as usual run costs, have been partly offset by restructuring costs as we took action to reduce our future cost base.

We have seen significant net deposit growth of £7.1 billion during the period (September 30, 2020: £1.3 billion), due to strong current account inflows as consumer spending was subdued by Covid-19 restrictions. Our market share of all deposit balances increased to 9.6% (September 30, 2020: 9.4%). We have remained open for business, with total residential mortgage lending of £18.2 billion (September 30, 2020: £12.7 billion). Our market share of gross lending (flow) was 11.4% (September 30, 2020: 12.0%).

We maintain a strong liquidity position, with a Liquidity Coverage Ratio (LCR) of 173% (April 4, 2021: 159%). This has been supported by the drawdown of £21.7 billion of funding from the Bank of England's Tem Funding Scheme with additional incentives for SMEs (TFSME).

Profit before tax on a reported basis and underlying basis are set out below. Certain aspects of our results are presented to reflect management's view of the underlying results and to provide a clearer representation of our performance.

	For the six months ended September 30, 2021			
	Underlying profit	FSCS and bank levy	Gain from derivatives and hedge accounting	Statutory profit
	<i>(£ million)</i>			
Net interest income	1,706	-	-	1,706
Other income	188	-	-	188
Movements on derivatives and hedge accounting ⁽¹⁾	-	-	3	3
Total income	1,894	-	3	1,897
Administrative expenses	(1,025)	-	-	(1,025)
Pre-provision underlying profit	869	-	3	872
Impairment losses	34	-	-	34
Provisions for liabilities and charges ...	(53)	-	-	(53)
Profit before tax ⁽²⁾	850	-	3	853

Notes:

- (1) Although derivatives are only used to hedge market risks, income statement volatility can still arise due to hedge accounting ineffectiveness or because hedge accounting volatility is largely attributable accounting rules which do not fully reflect the economic reality of the hedging strategy.
- (2) Underlying profit represents management's view of underlying performance. The following items are excluded from statutory profit to arrive at underlying profit:
 - Although we only use derivatives to manage risks, their impact can be volatile. This volatility is largely due to accounting rules that do not fully reflect the economic reality of our approach to hedging financial risks.
 - FSCS credits, which are excluded from statutory profit, are from FSCS recoveries related to failures provided for in previous years. Ongoing FSCS management expenses are included within underlying profit.

The following discussion considers our results for the six months ended September 30, 2021 compared to our results for the six months ended September 30, 2020:

Total income

Our total income increased to £1,897 million in the six months ended September 30, 2021 compared to £1,559 million in the six months ended September 30, 2020. The following table sets forth the components of income for the six months ended September 30, 2021 and 2020, respectively:

	For the six months ended September 30,	
	2021	2020
	(<i>£ million</i>)	
Net interest income.....	1,706	1,448
Net fees and commissions	119	67
Other operating income	69	(12)
Gains/(losses) from derivatives and hedge accounting.....	3	56
Total	1,897	1,559

Net interest income

Net interest income increased by 17.8% to £1,706 million for the six months ended September 30, 2021 compared with £1,448 million for the six months ended September 30, 2020. The macroeconomic outlook has been particularly uncertain during the period, with impairment losses across the past two years being higher than pre-pandemic levels. In response to the increased credit risk, mortgage margins have increased across the market. This has generated higher net interest income in the period, which provides some protection against the elevated risk of further impairment losses. The increase in net interest income was further supported by our reduction in savings interest rates, following the fall in bank base rate to 0.1% and in recognition of the highly uncertain future.

The following table sets forth the components of net interest income for the six months ended September 30, 2021 and 2020, respectively:

	For the six months ended September 30,	
	2021	2020
	<i>(£ million)</i>

Interest on net defined benefit pension liability	-	-
Total interest expense and similar charges	414	558
Net interest income	1,706	1,448

On investment securities

Interest and other income from investment securities comprises interest income earned on the corporate and government investment securities that we purchase for our own account to manage our liquidity portfolios and net realized gains and losses on our sales of these instruments.

Interest and other income from investment securities decreased by 15% to £67 million for the six months ended September 30, 2021, compared with £79 million for the six months ended September 30, 2020.

Net expense on financial instruments hedging assets in a qualifying hedge accounting relationship

Derivative instruments are used to synthetically convert fixed rate assets to floating rate assets. If derivatives are subject to hedge accounting, the floating rate income and fixed rate expense on these derivatives are included as “net expense on financial instruments hedging assets in a qualifying hedge accounting relationship.” In the six months ended September 30, 2021, we incurred a net expense of £342 million on these instruments, compared with a net expense of £443 million in the six months ended September 30, 2020.

Interest expense and similar charges

The average interest rate that we paid to UK retail member depositors decreased to 0.12% for the six months ended September 30, 2021 compared with 0.19% for the six months ended September 30, 2020. There was also an increase of 9% in the average balance of UK retail member deposits held to £175,654 million in the six months ended September 30, 2021 from £160,838 million in the six months ended September 30, 2020.

On deposits and other borrowings

Interest expense on deposits and other borrowings includes interest that we pay on subordinated debt instruments and other deposits and borrowings. In the six months ended September 30, 2021, interest on subordinated liabilities decreased to £124 million from £149 million in the six months ended September 30, 2020. Average balances decreased by £1,162 million to £7,621 million in the six months ended September 30, 2021 from £8,783 million in the six months ended September 30, 2020.

Other interest expense on deposits and other borrowings includes the interest that we pay on retail deposits by non-members, deposits from other banks and other money market deposits. In the six months ended September 30, 2021, other interest expense on deposits and other borrowings increased by 7.4% to £29 million from £27 million in the six months ended September 30, 2020.

Debt securities in issue

Debt securities in issue include interest that we pay on certificates of deposit, time deposits, commercial paper, covered bonds, medium-term notes and securitizations. In the six months ended September 30, 2021, interest expense on debt securities in issue decreased by 20.8% to £221 million from £279 million in the six months ended September 30, 2020. The decrease was due to a number of factors, including lower covered bond book due to a liability management exercise in September 2020.

Net income/expense on financial instruments hedging liabilities

We use derivative instruments to synthetically convert fixed rate liabilities to floating rate liabilities. The floating rate expense and fixed rate income on these derivatives are included as “net income/expense on financial instruments hedging liabilities.” In the six months ended September 30, 2021, net income on financial instruments used to hedge our fixed rate liabilities was £185 million, compared with a net income of £205 million in the six months ended September 30, 2020.

Net fees and commissions

Income from net fees and commissions consists of income that we earn from lending, banking and savings fees and insurance sales commissions less lending fees and commission expense.

In the six months ended September 30, 2021, net fees and commissions increased by 77.6% to £119 million compared with £67 million in the six months ended September 30, 2020.

Other operating income

In the six months ended September 30, 2021, other operating income increased by £81 million to a £69 million gain (September 30, 2020: £12 million loss). Other income/(expense) in the six months ended September 30, 2020 includes losses of £35 million realised from the repurchase of £2.0 billion of covered bonds that were issued under the Nationwide Covered Bond Programme. Other income/(expense) also includes fair value movements on balances relating to previous investment disposals, the net amount of rental income, profits or losses on the sale of property, plant and equipment and increases or decreases in the valuations of branches and non-specialised buildings which are not recognised in other comprehensive income.

Gains/losses on derivatives and hedge accounting

All derivatives we enter into are recorded on the balance sheet at fair value with any fair value movements accounted for in the income statement. Derivatives, our use of which is regulated by the UK Building Societies Act, are only used to limit the extent to which we could be affected by changes in interest rates, exchange rates or other factors specified in building society legislation. These derivatives are therefore used exclusively to hedge risk exposures and are not used for speculative purposes.

Where effective hedge accounting relationships can be established, the movement in the fair value of the derivative instrument is offset in full or in part by opposite movements in the fair value of the underlying asset or liability being hedged. Any ineffectiveness arising from different movements in fair value will likely trend to nil over time.

In addition, we enter into certain derivative contracts which, although efficient economically, cannot be included in effective hedge accounting relationships. Consequently, although the implicit interest cost of the underlying instrument and associated derivatives are included in “Net interest income” in the income statement, fair value movements on such derivatives are included in “Gains from derivatives and hedge accounting.”

Gains from derivatives and hedge accounting were £3 million in the six months ended September 30, 2021 compared to gains of £56 million in the six months ended September 30, 2020. Income statement volatility arises due to accounting ineffectiveness of designated hedges, or because hedge accounting has not been adopted or is not achievable.

	For the six months ended September 30,	
	2021	2020
	<i>(£ million)</i>	
(Losses)/gains from fair value hedge accounting	(5)	6
Gains from cash flow hedge accounting	1	-
Fair value gains from other derivatives	5	50

Total	3	56

Operating expenses and similar charges

Operating expenses and similar charges decreased in the six months ended September 30, 2021 to £1,044 million compared to £1,198 million in the six months ended September 30, 2020. The following table sets forth the components of operating expenses and similar charges for the six months ended September 30, 2021 and 2020, respectively:

	For the six months ended September 30,	
	2021	2020
	<i>(£ million)</i>	
Administrative expenses	773	757
Depreciation and amortization	252	276
Total Administrative expenses	1,025	1,033
Impairment losses/(reversals) on loans and advances to customers	(34)	139
Provisions for liabilities and charges	53	26
Total	1,044	1,198

Administrative expenses

Administrative expenses have remained broadly flat at £1,025 million (September 30, 2020: £1,033 million) despite higher investment and business growth, as we continued to drive efficiencies in business-as-usual costs

The following table sets forth the components of administrative expenses for the six months ended September 30, 2021 and 2020, respectively:

	For the six months ended September 30,	
	2021	2020
	<i>(£ million)</i>	
Employee costs:		
Salaries, bonuses and social security costs	325	335
Pension costs.....	70	86
Other administrative expenses	378	336
Total	773	757

Employee costs are made up of salaries, bonuses social security costs (which consist entirely of mandatory UK national insurance contributions) and pension costs.

In the six months ended September 30, 2021, salaries, bonuses and social security costs decreased to £325 million from £335 million in the six months ended September 30, 2020.

In the six months ended September 30, 2021, pension costs decreased to £70 million from £86 million in the six months ended September 30, 2020 due to lower headcount and closure of the final salary scheme, which had a higher service cost, from April 2021.

The Group operates two defined contribution pension schemes in the UK – the Nationwide Group Personal Pension Plan (“GPP”) and the Nationwide Temporary Workers Pension Scheme. New employees are automatically enrolled into one of these schemes, with both schemes being administered by Aviva. Outside of the UK, there are defined contribution pension schemes for a small number of employees in the Isle of Man.

The Group also has funding obligations to several defined benefit pension schemes, which are administered by boards of trustees. Pension trustees are required by law to act in the interests of all relevant beneficiaries and are responsible for the investment policy of fund assets, as well as the day to day administration. The Group’s largest pension scheme is the Nationwide Pension Fund (the “Fund”). This is a contributory defined benefit pension scheme, with both final salary and career average revalued earnings (“CARE”) sections. The Fund was closed to new entrants in 2007 and since that date employees have been able to join the GPP. In line with UK pensions legislation, a formal actuarial valuation (“Triennial Valuation”) of the assets and liabilities of the Fund is carried out at least every three years by independent actuaries.

The Fund was closed to future accrual on March 31, 2021, with affected employees being moved to the GPP for future pension savings. From April 1, 2021, members moved from active to deferred status, with future indexation of deferred pensions before retirement measured by reference to the Consumer Price Index (“CPI”). In the six months ended September 30, 2020, a gain of £164 million was recognised as a past service credit relating to the closure, and £60 million was accrued within other administrative expenses for the cost of one-off payments to be made to affected members in the form of cash or as contributions to their pensions.

In November 2020, Nationwide and the Trustee of the Fund entered into an arrangement whereby Nationwide has agreed to provide £1.7 billion of collateral (a contingent asset) in the form of self-issued Silverstone notes to provide additional security to the Fund. The Fund would have access to these notes in the case of certain events such as insolvency of Nationwide.

Other administrative costs increased by 12.5% to £378 million for the six months ended September 30, 2021 from £336 million for the six months ended September 30, 2020.

The cost income ratio has worsened on an underlying basis to 54.1% (September 30, 2020: 68.7%) as a result of items above.

Depreciation and amortization

For the six months ended September 30, 2021 depreciation and amortization expenses decreased by 8.7% to £252 million from £276 million for the six months ended September 30, 2020.

Impairment losses on loans and advances to customers

We assess at each balance sheet date whether, as a result of one or more events that occurred after initial recognition, there is objective evidence that a financial asset or group of assets is impaired. Evidence of impairment may include indications that a borrower or group of borrowers is experiencing significant financial difficulty or default or delinquency in interest or principal payments.

Impairment release/(losses) on loans and advances to customers for the six months ended September 30, 2021 decreased to £34 million from a loss of £139 million for the six months ended September 30, 2020.

The net impairment release for the six months ended September 30, 2021 of £34 million (September 30, 2020: charge of £139 million) is primarily due to house price growth and improvements in the economic outlook, which are reflected in the economic scenarios and associated weightings used to model expected credit losses. The underlying arrears performance of our portfolios has improved during the period, although this may be temporary, having benefited from government support schemes.

The following table analyzes the impairment losses on loans and advances to customers for the six months ended September 30, 2021 and 2020, respectively:

	For the six months ended September 30,	
	2021	2020
	(<i>£ million</i>)	
Residential lending.....	(44)	53
Consumer banking.....	18	84

Provisions for liabilities and charges

	For the six months ended September 30,	
	2021	2020
	(<i>£ million</i>)	
FSCS.....	-	-
Customer redress provision.....	(53)	(26)
Total	(53)	(26)

The income statement charge for provisions for liabilities and charges for the six months ended September 30, 2021 increased by 103.8% to £53 million (2020: £26 million).

We hold provisions for customer redress to cover the costs of remediation and redress in relation to past sales of financial products and ongoing administration, including non-compliance with consumer credit legislation and other regulatory requirements. The customer redress charge has increased to £53 million (2020: £26 million) primarily as a result of a £29 million charge relating to historical quality control procedures. The remainder of the charge relates to remediation costs for other redress issues, including the processing of remaining PPI complaints.

Taxes

The tax charge for the period of £168 million (2020: £80 million) represents an effective tax rate of 19.7% (2020: 22.2%) which is higher than the statutory UK corporation tax rate of 19% (2020: 19%). The effective tax rate is higher due to the 8% banking surcharge of £38 million (2020: £14 million). This is largely offset by adjustments in respect of prior years of £22 million (September 30, 2020: £nil), the tax credit on the distribution to the holders of Additional Tier 1 capital instruments of £8 million (September 30, 2020: £9 million), and the reinstatement of deferred tax assets previously written off of £5 million (September 30, 2020: £nil)

Balance Sheet Review

Total assets grew by 12% from £254.9 billion as of April 4, 2021 to £285.4 billion as of September 30, 2021, predominantly due to higher holdings of cash and liquid assets, driven largely by an increase in short-term funding, an increase in member deposits and the drawdown of funds from the Bank of England's Term Funding Scheme with additional incentives for SMEs (TFSME).

Loans and advances to customers

Lending remains predominantly concentrated on high quality secured products, with residential mortgages accounting for 95% of our total loans and advances to customers at September 30, 2021 (April 4, 2021: 94%).

	As at September 30,	As at April 4,			
	2021	2021		2020	
	<i>(£ million, except percentages)</i>

Residential mortgage portfolio

Gross mortgage lending in the period was £18.2 billion (September 30, 2020: £12.7 billion), representing a market share of 11.4% (September 30, 2020: 12.0%). Lower than normal demand during the periods of lockdown was offset by a time of greater demand as members re-evaluated their housing needs as a result of Covid-19, and were supported by the Government's Stamp Duty holiday.

Total mortgage balances increased to £194.0 billion as at September 30, 2021 (April 4, 2021: £190.7 billion). Prime mortgage balances grown to £151.6 billion (April 4, 2021: £149.7 billion). Strong buy to let mortgage lending resulted in our buy to let mortgage balances growing to £42.7 billion (April 4, 2021: £41.2 billion). The housing market was both very buoyant and highly competitive during the six months ended September 30, 2021 due to pent-up demand and the Government's Stamp Duty holiday.

The average LTV of new lending in the six months ended September 30, 2021, weighted by value was 70% (September 30, 2020: 70%). The average LTV of prime new business completed in the period has remained the same at 71% (September 30, 2020: 71%), reflecting the withdrawal from higher LTV lending at the start of the pandemic. In the BTL portfolio, the average LTV of new business increased from 66% to 67% following a shift towards business on longer terms at higher LTVs. With house price increase during the period, the average indexed LTV of total loan stock has reduced to 53% (April 4, 2021: 56%).

Arrears decreased during the six months and remained low, with cases more than three months in arrears at 0.37% of the total portfolio (April 4, 2021: 0.43%). Arrears have been suppressed by payment deferrals and other government support measures, and in view of UK economic conditions, an increase in arrears from current levels is expected over the medium term. Impairment provision balances have decreased to £273 million (April 4, 2021: £317 million) due to an improvement in the economic outlook reflected in the economic scenarios and changes to weightings used to model expected credit losses.

The analysis of the new business profile and the average LTV for new business excludes further advances.

Total residential balance sheet provisions at September 30, 2021 were £273 million, compared with £317 million at April 4, 2021 due to the deterioration in the economic outlook reflected in the economic scenarios used to model expected credit losses.

	<u>As at September 30, 2021</u>	<u>As at April 4 2021</u>
	<i>(percentages)</i>	
Cases three months or more in arrears as (%) of total book of residential mortgages		
Prime.....	0.32	0.35
Specialist.....	0.57	0.72
Total Group residential mortgages	0.37	0.43
UK Finance (UKF) industry average ⁽¹⁾	0.78	0.85

Note:

- (1) The methodology for calculating mortgage arrears is based on the UKF definition of arrears, where months in arrears is determined by dividing the arrears balance outstanding by the latest monthly contractual payment.

In accordance with regulatory guidance payment deferrals ended in July 2021. Despite this the proportion of cases more than 3 months in arrears has decreased over the period to 0.37% (April 4, 2021: 0.43%).

When legacy portfolios are excluded, the proportion of buy to let cases which are more than 3 months in arrears has decreased to 0.19% (April 4, 2021: 0.27%). Arrears levels are anticipated to increase following the end of the furlough scheme but to remain low relative to the industry average.

The table below shows possessions as a percentage of our total residential mortgages as at September 30, 2021 and April 4, 2021:

	<u>As at September 30, 2021</u>	<u>As at April 4 2021</u>
	<i>(percentages)</i>	
Possessions as (%) of total residential mortgages (number of properties)		
Prime.....	0.00	0.00
BTL and legacy	0.00	0.01
Total Group residential mortgages	0.01	0.01

Our approach to dealing with customers in financial difficulties combined with our historically cautious approach to lending, means that we only take possession of properties as a last resort. There was a relatively small increase in possessions to £20 million (April 4, 2021: £13 million) as activity put on hold following the introduction of the home support package recommenced.

The table below provides further information on the residential mortgage portfolio by payment due status as at September 30, 2021 and April 4, 2021:

For residential mortgage loans

Nationwide is committed to supporting borrowers facing financial difficulty by working with them to find a solution through proactive arrears management and forbearance. The Group applies the European Banking Authority (EBA) definition of forbearance. Residential mortgages subject to forbearance at September 30, 2021 were £1,347 million compared to £1,140 million at April 4, 2021. Loans where more than one concession event has occurred are reported under the latest event.

Balances subject to forbearance September 30, 2021

For commercial loans

Forbearance in the commercial portfolios is recorded and reported at borrower level and applies to all commercial lending including impaired exposures and customers subject to enforcement and recovery action. Impairment provisions on forborne loans are calculated on an individual borrower basis.

The table below provides details of the commercial loans which are subject to forbearance as at September 30, 2021 and April 4, 2021. Loans where more than one concession event has occurred are reported under the latest event.

	<u>As at September 30,</u>	<u>As at April 4,</u>
	<u>2021</u>	<u>2021</u>
	<i>(£ million)</i>	
Refinance.....	8	8
Modifications:		
Payment concession.....	142	100
Security amendment	10	6
Extension at maturity	19	7
Breach of covenant	49	123
Total	228	244
Impairment provision on forborne loans	23	29

Consistent with the European Banking Authority reporting definitions, loans that meet the forbearance exit criteria are not reported as forborne.

Nationwide continues to support commercial borrowers where income has been disrupted through the impacts of Covid-19. Commercial balances subject to Covid-19 temporary concessions have reduced to £24 million (4 April 2021: £179 million), with exposures subject to forbearance included in the above table. The reduction is driven by borrowers returning to agreed repayment schedules and no further specific Covid-19 related maturity extensions being granted.

Total forborne balances have remained broadly stable, with migration between modification type.

The decrease in the total impairment provision on forborne loans to £23 million (4 April 2021: £29 million) reflects an improved asset valuation for an impaired loan, prior to anticipated sale.

In addition to the amortized cost balances included in the table above, there are £52 million (April 4, 2021: £52 million) of FVTPL commercial lending balances, £36 million (April 4, 2021: £nil) of which are forborne.

For consumer loans

The table below provides details of the consumer banking exposures which are subject to forbearance as at September 30, 2021 and April 4, 2021. Where more than one concession event has occurred, exposures are reported under the latest event.

	Overdrawn current accounts	Personal loans	Credit cards	Total

Total forbearance	13	43	16	72
Impairment provision on forborne loans	8	31	11	50

Commercial loan portfolio

The commercial portfolio comprises loans which have been provided to meet the funding requirements of registered social landlords, commercial real estate investors and project finance initiatives. The commercial real estate and project finance portfolios are closed to new business.

Nationwide continues to support commercial borrowers where income has been disrupted through the impacts of Covid-19. Credit quality is stable, although portfolio performance has benefited from the impact of government support schemes, payment deferrals and the low interest rate environment.

Commercial balances

	As at September 30, 2021	As at April 4, 2021
	<i>(£ million)</i>	
Registered social landlords ⁽¹⁾	4,588	4,828
Commercial real estate (CRE)	686	769
Project finance ⁽²⁾	637	670
Other lending	-	
Commercial balances at amortized cost	5,911	6,267
Fair value adjustment for micro hedged risk ⁽³⁾	593	653
Commercial lending balances	52	52
Total	6,556	6,972

Notes:

- (1) Loans to registered landlords are secured on residential property.
- (2) Loans advanced in relation to project finance are secured on cash flows from government or local authority backed contracts under the Private Finance Initiative.
- (3) Micro hedged risk relates to loans hedged on an individual basis.

During the six months, commercial balances have decreased to £6.6 billion (April 4, 2021: £7.0 billion). The reduction has been most significant in the registered social landlords portfolio where loan amortisation and repayments exceeded drawdowns on new lending to this sector. The reduction in commercial real estate balances is driven by amortisation and early repayments, reflecting the closed book strategy.

Impairment (reversals)/losses for the period for commercial and other lending

	For the six months ended September 30,	
	2021	2020
	<i>(£ million)</i>	<i>(£ million)</i>
Total	(8)	2

Note: Impairment losses represent the total amount charged through the profit and loss account, rather than amounts written off during the six months.

The reduction in impairment is driven by improvements to the collateral value or anticipated cashflows for a small number of individually assessed exposures.

The following table shows commercial balances carried at amortized cost on the balance sheet, with the stage allocation of the exposures, impairment provisions and resulting provision coverage ratio:

Commercial product and staging analysis

	September 30,				April 4, 2021			
	2021				2020			
	Stage 1	Stage 2	Stage 3	Total	Stage 1	Stage 2	Stage 3	Total
	<i>(£ million)</i>

Project finance.....	0.02	3.06	61.45	0.90	0.02	2.97	21.86	0.97
Total	0.03	1.34	22.50	0.43	0.03	1.78	28.01	0.52

Note: At April 3, 2021, all provisions have been attributed to underlying loans and stages.

Over the period, the performance of the commercial portfolio has remained stable, with 95% (April 4, 2021: 95%) of balances remaining in stage 1. Of the £204 million stage 2 loans (April 4, 2021: £219 million), which represent 3.5% (April 4, 2021: 3.5%) of total balances, £0.5 million (April 4, 2021: £6 million) were in arrears by 30 days or more, with the remainder in stage 2 due to a deterioration in risk profile.

A number of loans have been impacted by a disruption to rental income as a result of the impact of Covid-19; some of this disruption is considered temporary in nature, and short-term concessions have been applied. A small number of loans which are considered to have been adversely impacted in the longer term have contributed to an increase in stage 3 (credit-impaired) CRE loans to £87 million (April 4, 2021: £75 million), equating to 13% (April 4, 2021: 10%) of the total CRE exposure.

Within the registered social landlord portfolio, there are no stage 3 assets, and only 1% (April 4, 2021: 1%) of the exposure is in stage 2.

Credit quality

We adopt robust credit management policies and processes to recognize and manage the risks arising from the portfolio,

The following table shows the CRE portfolio by risk grade and the provision coverage for each category. The table includes balances held at amortized cost only.

CRE gross balances by risk grade and provision coverage

	September 30, 2021					April 4, 2021				
	2021				Provision Coverage	2021				Provision Coverage
	Stage 1	Stage 2	Stage 3	Total		Stage 1	Stage 2	Stage 3	Total	
	(£ million)				(percentages)	(£ million)				(percentages)
Strong.....	296	9	-	305	0.1	343	4	-	347	0.1
Good.....	156	28	-	184	0.2	192	37	-	229	0.2
Satisfactory.....	42	38	-	80	0.8	39	24	-	63	1.4
Weak.....	-	30	1	31	2.7	-	55	-	55	3.1
Impaired.....	-	-	86	86	19.8	-	-	75	75	31.1
Total.....	494	105	87	686	2.8	574	120	75	769	3.3

The risk grades in the table above are based upon supervisory slotting criteria, under which exposures are classified into categories depending on the underlying credit risk, with assessment based upon financial strength, asset characteristics, the strength of the sponsor and the security. The credit quality of the CRE portfolio has remained stable with 83% (April 4, 2021: 83%) of the portfolio rated as satisfactory or better.

Risk grades for the project finance portfolio are also based upon supervisory slotting criteria with 92% of the exposure rated strong or good.

The registered social landlord portfolio is risk rated using an internal PD rating model with major drivers being financial strength, evaluation of the borrower's oversight and management, and the type and size of registered social landlord. The distribution of exposures is weighted towards the stronger risk ratings and against a backdrop of zero defaults in the portfolio, the credit quality remains high, with an average 12-month PD of 0.04% across the portfolio.

In addition to the above, £52 million (April 4, 2021: £52 million) of commercial lending balances were classified as FVTPL.

CRE Balances by LTV and region

CRE balances by LTV and region The regional distribution of the portfolio remains unchanged, with 55% (April 4, 2021: 55%) of the CRE exposure now being secured against assets located in London.

The LTV distribution of CRE balances has remained stable with 87% (April 4, 2021: 87%) of the portfolio having an LTV of 75% or less, and 55% (April 4, 2021: 57%) of the portfolio having an LTV of 50% or less.

Credit risk concentration by industry sector

Credit risk exposure by industry sector is broadly unchanged from the prior year. Where a CRE loan is secured on assets crossing different sectors, the sector allocation is based upon the value of the underlying assets in each sector. For CRE exposures, excluding FVTPL balances, the largest exposure is to the residential sector, which represents 42% (April 4, 2021: 43%) of the total CRE portfolio balance. The exposure to retail assets has reduced to £146 million (April 4, 2021: £166 million), with a weighted average LTV of 57% (April 4, 2021: 63%). Exposure to the leisure and hotel sector has reduced to £66 million (April 4, 2021: £66 million), with a weighted average LTV of 50% (April 4, 2021: 57%).

In addition to the amortized cost balances, there are £49 million (April 4, 2021: £49 million) of FVTPL CRE commercial lending balances, of which £36 million (April 4, 2021: £36 million) relates to the office sector and £13 million (April 4, 2021: £13 million) relates to the retail sector.

CRE balances by payment due status

Of the £735 million (April 4, 2021: £818 million) CRE exposure, including FVTPL balances, £66 million (April 4, 2021: £61 million) relates to balances with arrears, of which £57 million (April 4, 2021: £32 million)

have arrears greater than 3 months. The increase in arrears balances is driven principally by a small number of loans that are being actively managed.

Gross balances subject to forbearance⁽¹⁾

	<i>(£ million)</i>	
Refinance.....	8	8
Modifications:		
Payment concession.....	142	100
Security amendment	10	6
Extension at maturity	19	7
Breach of covenant	49	123
Total	228	244
Total impairment provision on forborne loans	23	29

Note:

(1) Loans where more than one concession event has occurred are reported under the latest event.

Possession balances represent loans against which we have taken ownership of properties pending their sale. Assets over which possession has been taken are realized in an orderly manner via open market or auction sales to derive the maximum benefit for all interested parties, and any surplus proceeds are distributed in accordance with the relevant insolvency regulations. We do not normally occupy repossessed properties for our business use or use assets obtained in our operations.

Although collateral can be an important mitigant of credit risk, it is our practice to lend on the basis of the customer's ability to meet their obligations out of cash flow resources rather than rely on the value of the security offered. In the event of default, we may use the collateral as a source of repayment.

Primary collateral is a fixed charge over freehold or long leasehold properties, but may be supported by other liens, floating charges over company assets and, occasionally, unsupported guarantees. The collateral will have a significant effect in mitigating our exposure to credit risk.

Our valuation policy stipulates the maximum period between formal valuations, relative to the risk profile of the lending. Particular attention is paid to the status of the facilities, for instance whether it is, or is likely to require an impairment review where our assessment of potential loss would benefit from updated valuations, or there are factors affecting the property that might alter the case assessment and the most appropriate action to take.

Collateral held in relation to secured loans that are either past due or impaired is capped at the amount outstanding on an individual loan basis.

Consumer banking

Credit risk in the consumer banking portfolios is primarily monitored and reported based on arrears status which is set out below:

Consumer banking gross balances by payment due status

	As at September 30, 2021				As at April 4, 2021					
	Overdrawn current accounts	Personal loans	Credit cards	Total	Overdrawn current account	Personal loans	Credit cards	Total

Total.....	229	2,917	1,514	4,660	100	233	2,797	1,374	4,404	100

Note:

- (1) Charged off balances related to accounts which are closed to future transactions and are held on the balance sheet for an extended period (up to 36 months, depending on the product) while recovery procedures take place.

The consumer banking portfolio comprises balances on unsecured retail banking products: overdrawn current accounts, personal loans and credit cards. Over the period, total balances across these portfolios have increased by £256 million to £4,660 million (April 4, 2021: £4,404 million), equating to a 6% increase. The reduction in balances primarily reflects lower customer spending during the Covid-19 pandemic, as well as reduced customer demand for new borrowing and the implementation of controls that reduce new lending in response to the increased risk arising from Covid-19.

To date arrears remain low and credit quality is stable; however, this performance has benefited from the impact of government support schemes, payment deferrals and the low base rate environment.

Consumer banking gross balances

Total	1.33	21.61	89.94	10.44	1.51	21.04	89.97	11.39

The consumer banking portfolio comprises balances on unsecured retail banking products: overdrawn current accounts, personal loans and credit cards. Over the period, total balances across these portfolios have increased by 6% to £4,660 million (April 4, 2021: £4,404 million) as the easing of Covid-19 restrictions drove higher demand for personal loans and increased spending on credit cards. To date arrears remain low and credit quality is stable; however, this performance continues to benefit from the impact of government support schemes and payment deferrals, and reduced discretionary spending earlier in the pandemic. At September 30, 2021, 75% (April 4, 2021: 71%) of the consumer banking portfolio is in stage 1. This increase has been driven by high quality lending during the period combined with the movement of up to date accounts from stage 2 to stage 1. The reduction in stage 2 balances to £881 million (April 4, 2021: £990 million) is largely the result of updating macroeconomic assumptions and scenario weightings to reflect the improvement in economic outlook since April 4, 2021. This improvement has reduced provisions to £486 million (April 4, 2021: £502 million). The proportion of total balances in stage 3 is unchanged at 6% (April 4, 2021: 6%), reflecting broadly stable underlying credit performance. Consumer banking stage 3 gross balances and provisions include charged off balances. These are accounts which are closed to future transactions and are held on the balance sheet for an extended period (up to 36 months) whilst recovery activities take place. Excluding these charged off balances and related provisions, provisions amount to 6.3% (April 4, 2021: 7.2%) of gross balances.

Results of Operations for the Year Ended April 4, 2021 Compared with the Year Ended April 4, 2020

Introduction

Unprecedented economic conditions have persisted through this financial period, with the Bank of England's base rate at a historically low level and ongoing uncertainty surrounding the future economic impacts that may arise from the Covid-19 pandemic. Notwithstanding this, we have managed our financial performance so that we continue to maintain sufficient profitability to ensure a stable leverage ratio. Our leverage ratio has been further supported by the issuance of £750 million of Additional Tier 1 capital, helping us to retain a robust capital position whilst continuing to lend to support members in buying a home.

Underlying profit for the year ended April 4, 2021 was £790 million (April 4, 2020: £469 million), with statutory profit before tax for the half year increasing to £823 million (April 4, 2020: £466 million). This profitability has supported us in maintaining a capital position materially above regulatory requirements, with our

CET1 and UK leverage ratios at 36.4% and 5.4% respectively (April 4, 2020: 31.9% and 4.7% respectively), helping to ensure we remain a safe place for our members' money.

Our net interest margin (NIM) has improved to 1.21% (April 4, 2020: 1.13%) largely due to mortgage margins improving, having declined for the past four years. Mortgage income increased as the macroeconomic uncertainty resulted in stronger new business margins across the market. Following the bank base rate reductions in March 2020 we took the decision to reduce interest rates across our savings range.

The total impairment charge decreased to £190 million (April 4, 2020: £209 million) but remains elevated due to the continued uncertainty over the economic impacts of the pandemic. The underlying arrears performance of our portfolios has remained broadly stable, with the impacts of Covid-19 on borrowers offset by government support schemes and the use of payment deferrals. During the year additional payment deferrals have been granted and, while the majority have now expired, the outlook for borrowers remains uncertain.

Administrative expenses reduced by £94 million to £2,218 million (April 4, 2020: £2,312 million). Reductions from reprioritisation of investment spend over the medium term, and lower business as usual run costs, have been partly offset by restructuring costs as we took action to reduce our future cost base.

We saw significant net deposit growth of £10.6 billion during the year (April 4, 2020: £5.7 billion), due to strong current account inflows as consumer spending was subdued by Covid-19 restrictions. Our market share of all deposit balances reduced to 9.4% (April 4, 2020: 9.9%), reflecting our lower proportion of current account balances, and therefore lower inflows, relative to the market. We have remained open for business, with total residential mortgage lending of £29.6 billion (April 4, 2020: £30.9 billion). Our market share of mortgage balances was 12.5% (April 4, 2020: 12.9%).

In the year ended April 4, 2021, we had a strong liquidity position, with a Liquidity Coverage Ratio (LCR) of 165% (April 4, 2020: 163%). This has been supported by the drawdown of £16.4 billion of funding from the Bank of England's Term Funding Scheme with additional incentives for SMEs (TFSME).

Profit before tax on a reported basis and underlying basis are set out below. Certain aspects of our results are presented to reflect management's view of the underlying results and to provide a clearer representation of our performance.

	For the year ended April 4, 2021			
	Underlying profit	FSCS and bank levy	Gain from derivatives and hedge accounting	Statutory profit
	<i>(£ million)</i>			
Net interest income	3,146			3,146
Other income.....	139			139

Profit before tax⁽²⁾.....	790	(1)	34	823

Notes:

- (1) Although derivatives are only used to hedge market risks, income statement volatility can still arise due to hedge accounting ineffectiveness or because hedge accounting volatility is largely attributable accounting rules which do not fully reflect the economic reality of the hedging strategy.

(2) Underlying profit represents management's view of underlying performance. The following items are excluded from statutory profit to arrive at underlying profit:

- Although we only use derivatives to manage risks, their impact can be volatile. This volatility is largely due to accounting rules that do not fully reflect the economic reality of our approach to hedging financial risks.
- FSCS credits, which are excluded from statutory profit, are from FSCS recoveries related to failures provided for in previous years. Ongoing FSCS management expenses are included within underlying profit.

For the year ended April 4, 2020

The following discussion considers our results for the year ended April 4, 2021 compared to our results for the year ended April 4, 2020:

Total income

Our total income increased to £3,319 million in the year ended April 4, 2021 compared to £3,039 million in the year ended April 4, 2020. The following table sets forth the components of income for the years ended April 4, 2021 and 2020, respectively:

	For the year ended April 4,	
	2021	2020
	<i>(£ million)</i>	
Net interest income.....	3,146	2,810
Net fees and commissions	148	169
Other operating income	(9)	67
Gains/(losses) from derivatives and hedge accounting.....	34	(7)
Total.....	3,319	3,039

Net interest income

Net interest income increased by 12% to £3,146 million for the year ended April 4, 2021 compared with £2,810 million for the year ended April 4, 2020. The macroeconomic outlook has been particularly uncertain during the year, with impairment losses across the past two years being higher than pre-pandemic levels. In response to the increased credit risk, mortgage margins have increased across the market. This has generated higher net interest income in the year, which provides some protection against the elevated risk of further impairment losses. The increase in net interest income was further supported by our reduction in savings interest rates, following the fall in bank base rate to 0.1% and in recognition of the highly uncertain future.

The following table sets forth the components of net interest income for the years ended April 4, 2021 and 2020, respectively:

	For the year ended April 4,	
	2021	2020
	<i>(£ million)</i>	
Interest and similar income:		
On residential mortgages	4,246	4,553
On other loans	557	655
On investment securities	16	27

On investment securities

Interest and other income from investment securities comprises interest income earned on the corporate and government investment securities that we purchase for our own account to manage our liquidity portfolios and net realized gains and losses on our sales of these instruments.

Interest and other income from investment securities decreased by 23% to £153 million for the year ended April 4, 2021, compared with £199 million for the year ended April 4, 2020.

Net expense on financial instruments hedging assets in a qualifying hedge accounting relationship

Derivative instruments are used to synthetically convert fixed rate assets to floating rate assets. If derivatives are subject to hedge accounting, the floating rate income and fixed rate expense on these derivatives are included as “net expense on financial instruments hedging assets in a qualifying hedge accounting relationship.” In the year ended April 4, 2021, we incurred a net expense of £869 million on these instruments, compared with a net expense of £402 million in the year ended April 4, 2020.

Interest expense and similar charges

The average interest rate that we paid to UK retail member depositors decreased to 0.3% for the year ended April 4, 2021 compared with 0.86% for the year ended April 4, 2020. There was also an increase of 4% in the average balance of UK retail member deposits held to £163,201 million in the year ended April 4, 2021 from £157,140 million in the year ended April 4, 2020. We maintained our market share of current accounts at 10% after reaching our target last year.

In the year ended April 4, 2021, net fees and commissions decreased by 12% to £148 million compared with £169 million in the year ended April 4, 2020.

Other operating income

In the year ended April 4, 2021, other operating income decreased by £76 million to a £9 million loss (April 4, 2020: £67 million gain). Other (expense)/income in the year ended April 4, 2021 includes losses of £37 million realised from the repurchase of £2.1 billion of covered bonds that were issued under the Nationwide Covered Bond Programme. Other (expense)/income also includes fair value movements on balances relating to previous investment disposals, the net amount of rental income, profits or losses on the sale of property, plant and equipment and increases or decreases in the valuations of branches and non-specialised buildings which are not recognised in other comprehensive income.

Gains/losses on derivatives and hedge accounting

All derivatives we enter into are recorded on the balance sheet at fair value with any fair value movements accounted for in the income statement. Derivatives, our use of which is regulated by the UK Building Societies Act, are only used to limit the extent to which we could be affected by changes in interest rates, exchange rates or other factors specified in building society legislation. These derivatives are therefore used exclusively to hedge risk exposures and are not used for speculative purposes.

Where effective hedge accounting relationships can be established, the movement in the fair value of the derivative instrument is offset in full or in part by opposite movements in the fair value of the underlying asset or liability being hedged. Any ineffectiveness arising from different movements in fair value will likely trend to nil over time.

In addition, we enter into certain derivative contracts which, although efficient economically, cannot be included in effective hedge accounting relationships. Consequently, although the implicit interest cost of the underlying instrument and associated derivatives are included in “Net interest income” in the income statement, fair value movements on such derivatives are included in “Gains from derivatives and hedge accounting.”

Gains from derivatives and hedge accounting were £34 million in the year ended April 4, 2021 compared to losses of £7 million in the year ended April 4, 2020. Income statement volatility arises due to accounting ineffectiveness of designated hedges, or because hedge accounting has not been adopted or is not achievable.

Gains from fair value hedge accounting include gains of £50 million (April 4, 2020: £53 million) from macro hedges, due to hedge ineffectiveness and the amortisation of existing balance sheet amounts, and losses of £50 million (April 4, 2020: gains of £8 million) relating to micro hedges which arise due to a combination of hedge ineffectiveness, disposals and restructuring, and the amortisation of existing balance sheet amounts. Fair value gains from other derivatives include gains of £49 million (April 4, 2020: losses of £51 million) caused by a narrowing of bid-offer spreads. These gains are largely a reversal of bid-offer spread losses reported in the Annual Report and Accounts 2020, which were caused by spreads widening at the end of the financial year as financial markets reacted to Covid-19

Operating expenses and similar charges

Operating expenses and similar charges decreased in the year ended April 4, 2021 to £2,496 million compared to £2,573 million in the year ended April 4, 2020. The following table sets forth the components of operating expenses and similar charges for the years ended April 4, 2021 and 2020, respectively:

	For the year ended April 4,	
	2021	2020
	<i>(£ million)</i>	
Administrative expenses	1,621	1,646
Depreciation and amortization.....	597	666

Total Administrative expenses	2,218	2,312
Impairment losses on loans and advances to customers	190	209
Provisions for liabilities and charges	88	52
Total	2,496	2,573

Administrative expenses

Administrative expenses have decreased by £94 million to £2,218 million (April 4, 2020: £2,312 million).

The following table sets forth the components of administrative expenses for the years ended April 4, 2021 and 2020, respectively:

	For the year ended April 4,	
	2021	2020
	<i>(£ million)</i>	
Employee costs:		
Salaries, bonuses and social security costs	672	647
Pension costs.....	180	15
Other administrative expenses	769	984
Total	1,621	1,646

Employee costs are made up of salaries, bonuses social security costs (which consist entirely of mandatory UK national insurance contributions) and pension costs.

In the year ended April 4, 2021, salaries, bonuses and social security costs increased slightly to £672 million from £647 million in the year ended April 4, 2020.

The £165 million increase in pension costs in the year is due to the year ended April 4, 2020, including a net gain of £164 million relating to the closure of the Nationwide Pension Fund to future accrual. The Group operates two defined contribution pension schemes in the UK – the Nationwide Group Personal Pension Plan (“GPP”) and the Nationwide Temporary Workers Pension Scheme. New employees are automatically enrolled into one of these schemes, with both schemes being administered by Aviva. Outside of the UK, there are defined contribution pension schemes for a small number of employees in the Isle of Man.

The Group also has funding obligations to several defined benefit pension schemes, which are administered by boards of trustees. Pension trustees are required by law to act in the interests of all relevant beneficiaries and are responsible for the investment policy of fund assets, as well as the day to day administration. The Group’s largest pension scheme is the Nationwide Pension Fund (the “Fund”). This is a contributory defined benefit pension scheme, with both final salary and career average revalued earnings (“CARE”) sections. The Fund was closed to new entrants in 2007 and since that date employees have been able to join the GPP. In line with UK pensions legislation, a formal actuarial valuation (“Triennial Valuation”) of the assets and liabilities of the Fund is carried out at least every three years by independent actuaries.

The Fund was closed to future accrual on March 31, 2021, with affected employees being moved to the GPP for future pension savings. From April 1, 2021, members moved from active to deferred status, with future indexation of deferred pensions before retirement measured by reference to the Consumer Price Index (“CPI”). In the year ended April 4, 2020, a gain of £164 million was recognised as a past service credit relating to the closure, and £60 million was accrued within other administrative expenses for the cost of one-off payments to be made to affected members in the form of cash or as contributions to their pensions.

In November 2020, Nationwide and the Trustee of the Fund entered into an arrangement whereby Nationwide has agreed to provide £1.7 billion of collateral (a contingent asset) in the form of self-issued

Silverstone notes to provide additional security to the Fund. The Fund would have access to these notes in the case of certain events such as insolvency of Nationwide.

Other administrative costs decreased by 22% to £769 million for the year ended April 4, 2021 from £984 million for the year ended April 4, 2020. The year ended April 4, 2020 included £60 million of expenses relating to the above closure of the Nationwide Pension Fund to future accrual. In the year ended April 4, 2021 there have also been decreases in IT and communications costs and legal, professional and consultancy costs.

The cost income ratio has improved on an underlying basis to 67.5% (April 4, 2020: 75.9%) as a result of items above.

Depreciation and amortization

For the year ended April 4, 2021 depreciation and amortization expenses decreased by 10% to £597 million from £666 million for the year ended April 4, 2020.

Impairment losses on loans and advances to customers

We assess at each balance sheet date whether, as a result of one or more events that occurred after initial recognition, there is objective evidence that a financial asset or group of assets is impaired. Evidence of impairment may include indications that a borrower or group of borrowers is experiencing significant financial difficulty or default or delinquency in interest or principal payments.

Impairment losses on loans and advances to customers for the year ended April 4, 2021 decreased by 9% to £190 million from £209 million for the year ended April 4, 2020.

Impairment losses have decreased year-on-year but remain elevated due to the continued uncertainty over the economic impacts of the pandemic. The underlying arrears performance of our portfolios has remained broadly stable, with the impacts of Covid-19 on borrowers offset by government support schemes and the use of payment deferrals. During the year additional payment deferrals have been granted and, while the majority have now expired, the outlook for borrowers remains uncertain.

The following table analyzes the impairment losses on loans and advances to customers for the years ended April 4, 2021 and 2020, respectively:

	For the year ended April 4,	
	2021	2020
	<i>(£ million)</i>	
Residential lending.....	71	53
Consumer banking.....	125	159
Retail lending	196	212
Commercial and other lending.....	(6)	(3)
Impairment losses on loans and advances	190	209

Provisions for liabilities and charges

	For the year ended April 4,	
	2021	2020
	<i>(£ million)</i>	
Total	87	56

The underlying income statement charge for provisions for liabilities and charges for the year ended April 4, 2021 increased by 55% to £87 million (2020: £56 million).

We hold provisions for customer redress to cover the costs of remediation and redress in relation to past sales of financial products and ongoing administration, including non-compliance with consumer credit legislation and other regulatory requirements. The customer redress charge has increased to £87 million (2020: £56 million) primarily as a result of a £42 million charge relating to historical quality control procedures and a £36 million charge in relation to past administration of customer accounts. The remainder of the charge relates to remediation costs for other redress issues, including the processing of remaining PPI complaints.

Taxes

The tax charge for the year of £205 million (2020: £101 million) represents an effective tax rate of 24.9% (2020: 21.7%) which is higher than the statutory UK corporation tax rate of 19% (2020: 19%). The effective tax rate is higher due to the 8% banking surcharge of £38 million (2020: £24 million), the tax effect of disallowable bank levy and customer redress costs of £5 million and £8 million (2020: £11 million and £4 million), respectively, and unrecognised deferred tax assets of £10 million (2020: £nil) primarily in respect of expected future capital losses on revalued properties. This is partially offset by the tax credit on the distribution to the holders of Additional Tier 1 capital instruments of £12 million (2020: £9 million) and the tax impact of deferred tax provided at different rates of £5 million (2020: £17 million).

Balance Sheet Review

Total assets grew by 3% from £248.0 billion as of April 4, 2020 to £254.9 billion as of April 4, 2021, predominantly due to higher holdings of cash and investment securities following an increase in retail deposits.

Loans and advances to customers

Lending remains predominantly concentrated on high quality secured products, with residential mortgages accounting for 95% of our total loans and advances to customers at April 4, 2021 (April 4, 2020: 94%).

	As at April 4,

Residential mortgage portfolio

Gross mortgage lending in the period was £29.6 billion (April 4, 2020: £30.9 billion), representing a market share of 11.1% (April 4, 2020: 11.4%). Lower than normal demand during the periods of lockdown was offset by a time of greater demand as members re-evaluated their housing needs as a result of Covid-19, and were supported by the Government's Stamp Duty holiday.

Total mortgage balances increased to £190.7 billion in the year ended April 4, 2021 (April 4, 2020: £188.6 billion). Strong buy to let mortgage lending resulted in our buy to let and legacy mortgage balances growing to £41.0 billion (April 4, 2020: £37.5 billion). Prime mortgage balances declined to £149.7 billion (April 4, 2020: £151.1 billion) as we tightened our lending criteria.

The average LTV of new lending in the year ended April 4, 2021, weighted by value was 70% (April 4, 2020: 72%). The average LTV of prime new business completed in the period has reduced to 71% (April 4, 2020: 74%), reflecting the withdrawal from higher LTV lending at the start of the pandemic. In the BTL portfolio, the average LTV of new business increased from 65% to 67% following a shift towards business on longer terms at higher LTVs. With house price increase during the period, the average indexed LTV of total loan stock as reduced to 56% (April 4, 2020: 58%).

Arrears increased slightly during the year but remained low, with cases more than three months in arrears at 0.43% of the total portfolio (April 4, 2020: 0.41%). Arrears have been suppressed by payment deferrals and other government support measures, and in view of UK economic conditions, an increase in arrears from current levels is expected over the medium term. Impairment provision balances have increased to £317 million (April 4, 2020: £252 million) due to the deterioration in the economic outlook reflected in the economic scenarios used to model expected credit losses.

New business by borrower type remains diversified. During the period, as a result of market dislocation due to the pandemic, there has been a movement in the distribution of new business towards remortgages and BTL lending. Prime house purchase sectors have seen the greatest impact to date.

Total residential balance sheet provisions at April 4, 2021 were £317 million, compared with £252 million at April 4, 2020 due to the deterioration in the economic outlook reflected in the economic scenarios used to model expected credit losses

	As at April 4,	
	2021	2020
	<i>(percentages)</i>	
Cases three months or more in arrears as (%) of total book of residential mortgages		
Prime	0.35	0.33
BTL and legacy	0.72	0.74
Total Group residential mortgages	0.43	0.41
UK Finance (UKF) industry average ⁽¹⁾	0.85	0.74

Note:

- (1) The methodology for calculating mortgage arrears is based on the UKF definition of arrears, where months in arrears is determined by dividing the arrears balance outstanding by the latest monthly contractual payment.

Reflecting our low risk profile, performance of the mortgage books has remained strong, although the proportion of cases more than 3 months in arrears has increased to 0.43% (2020: 0.41%). While payment deferrals have helped suppress the flow of cases into arrears, the ability of some borrowers to recover from arrears has slowed the pressures on income. In addition, cases have remained in arrears as a result of the suspended flow of cases from arrears to possessions following the introduction of Nationwide's Home Support Package, which included flexibility for mortgage repayments and a pledge for no repossessions before May 31, 2021. Our overall arrears percentage of 0.43% compares favorably with the UK Finance (UKF) industry average of 0.85% (April 4, 2020: 0.74%) as reported by UKF.

The table below shows possessions as a percentage of our total residential mortgages as at April 4, 2021 and April 4, 2020:

	As at April 4,	
	2021	2020
	<i>(percentages)</i>	
Possessions as (%) of total residential mortgages (number of properties)		
Prime	0.00	0.01
BTL and legacy	0.01	0.05
Total Group residential mortgages	0.00	0.02

Our approach to dealing with customers in financial difficulties combined with our historically cautious approach to lending, means that we only take possession of properties as a last resort. This is illustrated by the number of properties taken into possession compared with the total for the industry. During the year ended April 4, 2021, the properties taken into possession decreased to 84, representing 0.00% of our book compared to the industry average of 0.01%.²

The table below provides further information on the residential mortgage portfolio by payment due status as at April 4, 2021 and April 4, 2020:

	As at April 4,							
	2021				2020			
	Prime	BTL and legacy	Total	(%)	Prime	BTL and legacy	Total	(%)
	<i>(£ billion, except percentages)</i>							
Not impaired:

Past due 12 months	0.1	0.1	0.2	0.1	0.1	0.1	0.2	0.1
Possession	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0
Total	149.8	41.2	191.0	100	151.1	37.7	188.8	100

The balance of cases past due by up to 3 months has decreased to £1,538 million (2020: £2,036 million). Management has judged this to be a temporary position due to the availability of government support and payment deferrals schemes and an adjustment has therefore been made to recognise the underlying risk, retaining provisions of £21 million which would have otherwise been released.

The balance of cases past due by more than 12 months has increased to £236 million (2020: £163 million); this is principally due to the possession moratorium. The moratorium will remain in place until the end of May 2021 and has reduced possession balances to £13 million (2020: £29 million).

For residential mortgage loans

Nationwide is committed to supporting borrowers facing financial difficulty by working with them to find a solution through proactive arrears management and forbearance. In addition, we are supporting borrowers financially affected by the Covid-19 pandemic. The Group applies the European Banking Authority (EBA) definition of forbearance. Residential mortgages subject to forbearance at April 4, 2021 were £1,410 million compared to £1,245 million at April 4, 2020. Loans where more than one concession event has occurred are reported under the latest event.

Balances subject to forbearance 2021	Prime	BTL and legacy	Total
	<i>(£ million)</i>		
Past term interest only	126	123	249
Interest only concessions	725	41	766

For commercial loans

Forbearance in the commercial portfolios is recorded and reported at borrower level and applies to all commercial lending including impaired exposures and customers subject to enforcement and recovery action. Impairment provisions on forborne loans are calculated on an individual borrower basis.

The table below provides details of the commercial loans which are subject to forbearance as at April 4, 2021 and 2020. Loans where more than one concession event has occurred are reported under the latest event.

	As at April 4,	
	2021	2020
	<i>(£ million)</i>	
Refinance	8	43

	As at April 4,	
	2021	2020
	(<i>£ million</i>)	
Modifications:		
Payment concession	100	31
Security amendment	6	8
Extension at maturity	7	19
Breach of covenant	123	126
Total	244	227
Impairment provision on forborne loans	29	14

Consistent with the European Banking Authority reporting definitions, loans that meet the forbearance exit criteria are not reported as forborne.

The increase in payment concessions during the period reflects the measures put in place to support borrowers financially affected by the Covid-19 pandemic. The increase in the total impairment provision on forborne loans to £29 million (April 4, 2020: £14 million) is reflective of a reduction in asset values and apportionment of the £7 million Covid-19 provision overlay at April 4, 2020 to individual borrower's loss assessment where appropriate at April 4, 2021.

In addition to the amortized cost balances included in the table above, there are £52 million (April 4, 2020: £57 million) of FVTPL commercial lending balances, none (April 4, 2020: none) of which are forborne.

For consumer loans

The table below provides details of the consumer banking exposures which are subject to forbearance as at April 4, 2021 and April 4, 2020. Where more than one concession event has occurred, exposures are reported under the latest event.

	Overdrawn current accounts	Personal loans	Credit cards	Total
	(<i>£ million</i>)

Balances re-aged/re-written	—	1	3	4
Total forbearance	21	40	19	80
Impairment provision on forborne loans	12	27	13	52

Commercial loan portfolio

The commercial portfolio comprises loans which have been provided to meet the funding requirements of registered social landlords, commercial real estate investors and project finance initiatives. The commercial real estate and project finance portfolios are closed to new business.

Nationwide continues to support commercial borrowers where income has been disrupted through the impacts of Covid-19. Credit quality is stable, although portfolio performance has benefited from the impact of government support schemes, payment deferrals and the low interest rate environment.

Notes:

- (1) Loans to registered landlords are secured on residential property.
- (2) Loans advanced in relation to project finance are secured on cash flows from government or local authority backed contracts under the Private Finance Initiative.
- (3) Micro hedged risk relates to loans hedged on an individual basis.

During the year, commercial balances have decreased to £7 billion (April 4, 2020: £7.9 billion). The reduction has been most significant in the registered social landlords portfolio where loan amortisation and repayments exceeded drawdowns on new lending to this sector. The reduction in commercial real estate balances is driven by amortisation and early repayments, reflecting the closed book strategy.

Impairment (reversals)/losses for the year for commercial

	For the year ended April 4,	
	2021	2020
	<i>(£ million)</i>	<i>(£ million)</i>
Total	(6)	(3)

Note:

- (1) Impairment losses represent the total amount charged through the profit and loss account, rather than amounts written off during the year.

The reduction in impairment is driven by improvements to the collateral value or anticipated cashflows for a small number of individually assessed exposures.

The following table shows commercial balances carried at amortized cost on the balance sheet, with the stage allocation of the exposures, impairment provisions and resulting provision coverage ratio:

Commercial product and staging analysis

Total.....	0.03	1.78	28.01	0.52	0.04	1.12	36.99	—	0.56

Note: In recognition of the financial impact that Covid-19 may have on our borrowers, an additional provision of £7 million was included in the impairment provisions for the CRE portfolio at April 4, 2020. This additional provision was not allocated to underlying loans and therefore was not attributed to stages. At April 3, 2021, all provisions have been attributed to underlying loans and stages.

Over the year, the performance of the commercial portfolio has remained stable, with 95% (April 4, 2020: 95%) of balances remaining in stage 1. Of the £219 million stage 2 loans (April 4, 2020: £268 million), which represent 3.5% (April 4, 2020: 3.8%) of total balances, £6 million (April 4, 2020: £1 million) were in arrears by 30 days or more, with the remainder in stage 2 due to a deterioration in risk profile.

A number of loans have been impacted by a disruption to rental income as a result of the impact of Covid-19; some of this disruption is considered temporary in nature, and short-term concessions have been applied. A small number of loans which are considered to have been adversely impacted in the longer term have contributed to an increase in stage 3 (credit-impaired) CRE loans to £75 million (2020: £50 million), equating to 10% (2020: 5%) of the total CRE exposure.

Within the registered social landlord portfolio, there are no stage 3 assets, and only 1% (2020: 1%) of the exposure is in stage 2.

Credit quality

We adopt robust credit management policies and processes to recognize and manage the risks arising from the portfolio,

The following table shows the CRE portfolio by risk grade and the provision coverage for each category. The table includes balances held at amortized cost only.

CRE gross balances by risk grade and provision coverage

	For the year ended April 4,									
	2021					2020				
	Stage 1	Stage 2	Stage 3	Total	Provision Coverage	Stage 1	Stage 2	Stage 3	Total	Provision Coverage
	<i>(£ million)</i>				<i>(percentages)</i>	<i>(£ million)</i>				<i>(percentages)</i>
Strong.....	343	4	—	347	0.1	433	18	—	451	0.1
Good.....	192	37	—	229	0.2	289	67	—	356	0.6
Satisfactory.....	39	24	—	63	1.4	69	10	—	79	1.7

Total.....	574	120	75	769	3.3	791	155	50	996	2.3

Notes:

The risk grades in the table above are based upon supervisory slotting criteria, under which exposures are classified into categories depending on the underlying credit risk, with assessment based upon financial strength, asset characteristics, the strength of the sponsor and the security. The credit quality of the CRE portfolio has declined slightly with 83% (2020: 89%) of the portfolio rated as satisfactory or better. This reflects the run-off of the portfolio combined with limited migration to the weaker grades driven by cashflow volatility and reduced asset values.

Risk grades for the project finance portfolio are also based upon supervisory slotting criteria with 90% of the exposure rated strong or good.

The registered social landlord portfolio is risk rated using an internal PD rating model with major drivers being financial strength, evaluation of the borrower's oversight and management, and the type and size of registered social landlord. The distribution of exposures is weighted towards the stronger risk ratings and against a backdrop of zero defaults in the portfolio, the credit quality remains high, with an average 12-month PD of 0.04% across the portfolio.

In addition to the above, £52 million (April 4, 2020: £57 million) of commercial lending balances were classified as FVTPL.

CRE Balances by LTV and region

The following table includes both amortized cost and FVTPL CRE balances:

CRE Lending gross balances by LTV and region⁽¹⁾

	As at April 4,

Geographical concentration	55%	45%	100%	52%	48%	100%
---	------------	------------	-------------	------------	------------	-------------

Notes:

- (1) A CRE loan may be secured on assets located in different regions, with the allocation being based upon the value of the underlying assets in each region.
- (2) The approach to revaluing assets charged as security is determined by the industry sector, the loan balance outstanding and the indexed value of the most recent independent external collateral valuation, with higher risk loans subject to more frequent revaluations to determine provision requirements. The LTV ratio is calculated using the on-balance sheet carrying amount of the loan divided by the indexed value. The Investment Property (IPD) monthly index is used.

Changes to the regional distribution of the CRE portfolio reflect the managed reduction of the portfolio, with 55% (April 4, 2020: 52%) of the CRE exposure now being secured against assets located in London.

The LTV distribution of CRE balances has also changed as a result of reduced CRE property values, with 87% (April 4, 2020: 93%) of the portfolio now having an LTV of 75% or less, and 57% (April 4, 2020: 66%) of the portfolio having an LTV of 50% or less.

Credit risk concentration by industry sector

Credit risk exposure by industry sector is broadly unchanged from the prior year. Where a CRE loan is secured on assets crossing different sectors, the sector allocation is based upon the value of the underlying assets in each sector. For CRE exposures, excluding FVTPL balances, the largest exposure is to the residential sector, which represents 43% (2020: 42%) of the total CRE portfolio balance. The exposure to retail assets has reduced to £166 million (2020: £202 million), with a weighted average LTV of 63% (2020: 53%). Exposure to the leisure and hotel sector has reduced to £66 million (2020: £84 million), with a weighted average LTV of 55% (2020: 46%).

In addition to the amortized cost balances included in the table above, there are £49 million (2020: £54 million) of FVTPL CRE commercial lending balances, of which £36 million (2020: £42 million) relates to the office sector and £13 million (2020: £12 million) relates to the retail sector.

CRE balances by payment due status

Of the £818 million (April 4, 2020: £1,050 million) CRE exposure, including FVTPL balances, £61 million (April 4, 2020: £14 million) relates to balances with arrears, of which £32 million (April 4, 2020: £6 million) have arrears greater than 3 months. The increase in arrears balances is driven principally by a small number of loans that are being actively managed.

Gross balances subject to forbearance⁽¹⁾

	As at April 4,	
	2021	2020
	<i>(£ million)</i>

Payment concession.....	100	31
Security amendment	6	8
Extension at maturity	7	19
Breach of covenant.....	123	126
Total	244	227
Total impairment provision on forborne loans	29	14

Note:

- (1) Loans where more than one concession event has occurred are reported under the latest event.

Possession balances represent loans against which we have taken ownership of properties pending their sale. Assets over which possession has been taken are realized in an orderly manner via open market or auction sales to derive the maximum benefit for all interested parties, and any surplus proceeds are distributed in accordance with the relevant insolvency regulations. We do not normally occupy repossessed properties for our business use or use assets obtained in our operations.

Although collateral can be an important mitigant of credit risk, it is our practice to lend on the basis of the customer's ability to meet their obligations out of cash flow resources rather than rely on the value of the security offered. In the event of default, we may use the collateral as a source of repayment.

Primary collateral is a fixed charge over freehold or long leasehold properties, but may be supported by other liens, floating charges over company assets and, occasionally, unsupported guarantees. The collateral will have a significant effect in mitigating our exposure to credit risk.

Our valuation policy stipulates the maximum period between formal valuations, relative to the risk profile of the lending. Particular attention is paid to the status of the facilities, for instance whether it is, or is likely to require an impairment review where our assessment of potential loss would benefit from updated valuations, or there are factors affecting the property that might alter the case assessment and the most appropriate action to take.

Collateral held in relation to secured loans that are either past due or impaired is capped at the amount outstanding on an individual loan basis. The table below represents a breakdown of CRE lending balances by LTV and their share in the total CRE loans as at April 4, 2021 and 2020.

	As at April 4,			
	2021	2020		
	<i>(£ million, except percentages)</i>			
	<i>(unaudited)</i>			
Fully collateralized				
LTV ratio:				
less than 25%	101	12%	121	12%
25% to 50%	368	45%	569	54%
51% to 75%	245	30%	282	27%
76 to 90%	35	4%	46	4%
91% to 100%	31	4%	—	
Total	780	95%	1,018	97%

Total.....	233	2,797	1,374	4,404	100	280	3,030	1,684	4,994	100

Note:

- (1) Charged off balances related to accounts which are closed to future transactions and are held on the balance sheet for an extended period (up to 36 months, depending on the product) while recovery procedures take place.

The consumer banking portfolio comprises balances on unsecured retail banking products: overdrawn current accounts, personal loans and credit cards. Over the year, total balances across these portfolios have decreased by £0.6 billion to £4.4 billion (April 4, 2020: £5.0 billion), equating to 12% reduction. The reduction in balances primarily reflects lower customer spending during the Covid-19 pandemic, as well as reduced customer demand for new borrowing and the implementation of controls that reduce new lending in response to the increased risk arising from Covid-19.

To date arrears remain low and credit quality is stable; however, this performance has benefited from the impact of government support schemes, payment deferrals and the low base rate environment.

Consumer banking gross balances

	As at April 4,			
	2021		2020	
(Audited)	<i>(£ million)</i>	(%)	<i>(£ million)</i>	(%)

Total	1.51	21.04	89.97	11.39	0.82	17.09	89.39	—	9.9

Note:

- (1) In recognition of the financial impact that Covid-19 may have on our borrowers, an additional provision of £43 million was included in the impairment provisions for consumer banking at April 4, 2020. This additional provision was not allocated to underlying loans and therefore was not attributed to stages. During the reporting period this provision has been assigned across the stages and is reflected in the allocations for April 4, 2021.

At April 1, 2021, 71% (2020: 77%) of the consumer banking portfolio is in stage 1. This reduction is largely the result of a change to our staging criteria from a multiple of 4 times origination PD to a multiple of 2, thus making the models more sensitive to relative PD changes over time. This change resulted in an increase in the proportion of stage 2 balances to 23% (2020: 17%), with no significant impact on provisions given the strong quality of the loans affected. The proportion of total balances in stage 3 is unchanged at 6% (2020: 6%), reflecting broadly stable underlying credit performance. The increase in provisions to £502 million (2020: £494 million) is due to the uncertain economic outlook and how the impact of the Covid-19 pandemic is reflected in the economic scenarios used to model expected credit losses.

Results of Operations for the Year Ended April 4, 2020 Compared with the Year Ended April 4, 2019

Introduction

We believe that our results indicate a strong performance for the year ended April 4, 2020 with an underlying profit before tax of £469 million, and a statutory profit before tax of £466 million.

Underlying profit before tax for the year ended April 4, 2020 is down 40.5% at £469 million from £788 million for the year ended April 4, 2019. Total underlying income decreased by 3.9% to £3,046 million in the year ended April 4, 2020, as compared to £3,170 million in the year ended April 4, 2019.

Our financial performance for the year ended April 4, 2020 has statutory profit before tax down 44.1% year on year, although net interest income decreased by 3.6%. The decrease in net interest income was largely offset by a decrease in mortgage income, reflecting sustained competition in retail lending markets.

We experienced low cost growth in the year ended April 4, 2020, as a result of conscious decisions to focus on efficiency. Underlying administrative expenses increased by 2.6% to £2,312 million from £2,254 million. The underlying cost income ratio has increased to 75.9% (April 4, 2019: 71.1%). Our cost trajectory reflects significant business growth and investment over recent years. Mortgage balances have grown 1.5% over the last year and one in six switchers came to us for new current accounts.

During the year ended April 4, 2020 employee costs decreased by £164 million, mainly due to pensions costs including a gain of £164 million and other staff related costs include an expense of £60 million relating to the closure of the Nationwide Pension Fund to future accrual from March 31, 2021. Average employee numbers remained broadly in line with prior year at 18,574 (April 4, 2019: 18,285).

Total costs increased primarily as a result of a £111 million increase in investment spend and £88 million of costs in the year associated with our business banking proposition, including the impacts of our decision to halt this activity. These were partly offset by a one-off gain of £104 million from the decision to close our final salary pension scheme to future accrual on March 31, 2021.

We continued our digital transformation, investing £360 million in 2019/20 in delivering the services and platforms that members will want and need in the future. We are simplifying our technology, replacing our legacy digital estate with a simpler set of applications to create a modular, data-powered digital platform. We are strengthening our operational resilience, building greater capacity in our payments platform and preparing to move to a modern, cloud-hosted payments hub. This will enable us to deal with our higher membership and transaction volumes, while also protecting our members' money, personal information and privacy.

Profit before tax on a reported basis and underlying basis are set out below. Certain aspects of our results are presented to reflect management's view of the underlying results and to provide a clearer representation of our performance.

The following discussion considers our results for the year ended April 4, 2020 compared to our results for the year ended April 4, 2019:

Total income

Our total income decreased to £3,039 million in the year ended April 4, 2020 compared to £3,206 million in the year ended April 4, 2019. The following table sets forth the components of income for the years ended April 4, 2020 and 2019, respectively:

	For the year ended April 4,	
	2020	2019
	<i>(£ million)</i>	
Net interest income.....	2,810	2,915
Net fees and commissions	169	201
Other operating income	67	54
Gains/(losses) from derivatives and hedge accounting.....	(7)	36
Total	3,039	3,206

Net interest income

Net interest income decreased by 3.6% to £2,810 million for the year ended April 4, 2020 compared with £2,915 million for the year ended April 4, 2019 due to bank base rate cuts and competitive pressures in our core mortgage market over recent years.

The following table sets forth the components of net interest income for the years ended April 4, 2020 and 2019, respectively:

	For the year ended April 4,	
	2020	2019
	<i>(£ million)</i>	
Interest and similar income:		
On residential mortgages	4,553	4,469
On other loans	655	656

Other	(240)	(207)
Debt securities in issue	(745)	(673)
Net income on financial instruments hedging liabilities	349	270
Interest on net defined benefit pension liability	—	(6)
Total interest expense and similar charges	(2,320)	(2,203)
Net interest income	2,810	2,915

On investment securities

Interest and other income from investment securities comprises interest income earned on the corporate and government investment securities that we purchase for our own account to manage our liquidity portfolios and net realized gains and losses on our sales of these instruments.

Interest and other income from investment securities increased by 2.6% to £199 million for the year ended April 4, 2020, compared with £194 million for the year ended April 4, 2019.

Net expense on financial instruments hedging assets

Derivative instruments are used to synthetically convert fixed rate assets to floating rate assets. The floating rate income and fixed rate expense on these derivatives are included as “net expense on financial instruments hedging assets.” In the year ended April 4, 2020, we incurred a net expense of £402 million on financial instruments used to hedge our fixed rate assets, compared with a net expense of £315 million in the year ended April 4, 2019.

Interest expense and similar charges

The average interest rate that we paid to depositors increased to 0.87% for the year ended April 4, 2020 compared with 0.87% for the year ended April 4, 2019. There was also an increase of 2.8% in the average balance of UK retail member deposits held to £157,140 million in the year ended April 4, 2020 from £152,926 million in the year ended April 4, 2019.

We continue to attract more current account members, with 759,000 (2019: 794,000) new accounts opened in the year, taking us to our long term target of achieving a 10% share of all current accounts.³ Our share

³ CACI (Feb 2020)

of main current accounts rose to 8.1% (2019: 8.0%).⁴ We are the number one net gainer of current accounts using the current account switching service in the nine months to December 2019.⁵

On deposits and other borrowings

Interest expense on deposits and other borrowings includes interest that we pay on subordinated debt instruments and other deposits and borrowings. In the year ended April 4, 2020, interest on subordinated liabilities increased to £309 million from £238 million in the year ended April 4, 2019. Average balances increased by £2,132 million to £8,601 million in the year ended April 4, 2020 from £6,469 million in the year ended April 4, 2019.

Other interest expense on deposits and other borrowings includes the interest that we pay on retail deposits by non-members, deposits from other banks and other money market deposits. In the year ended April 4, 2020, other interest expense on deposits and other borrowings increased by 15.9% to £240 million from £207 million in the year ended April 4, 2019. The increase was mainly due to higher balances on business savings (non-member deposits) and deposits from financial institutions.

Debt securities in issue

Debt securities in issue include interest that we pay on certificates of deposit, time deposits, commercial paper, covered bonds, medium-term notes and securitizations. In the year ended April 4, 2020, interest expense on debt securities in issue increased by 10.7% to £745 million from £673 million in the year ended April 4, 2019. The increase was due to a number of factors, including higher covered bond and securitization book, in addition to high spreads due to market volatility.

Net income/expense on financial instruments hedging liabilities

We use derivative instruments to synthetically convert fixed rate liabilities to floating rate liabilities. The floating rate expense and fixed rate income on these derivatives are included as “net income/expense on financial instruments hedging liabilities.” In the year ended April 4, 2020, net income on financial instruments used to hedge our fixed rate liabilities was £349 million, compared with a net income of £270 million in the year ended April 4, 2019.

Net fees and commissions

The following table sets forth the components of net fees and commissions for the years ended April 4, 2020 and 2019 respectively:

	For the year ended April 4,					
	2020			2019		
	Income	Expense	Net	Income	Expense	Net
	<i>(£ million)</i>					
Current account and savings	266	(217)	49	261	(202)	59
General insurance	50	—	50	65	—	65
Protection and investments	59	—	59	63	—	63
Mortgage	15	(6)	9	13	(1)	12
Credit card	44	(43)	1	43	(39)	4
Other fees and commissions	5	(4)	1	4	(6)	(2)
Fee and commission.....	439	(270)	169	449	(248)	201

Income from net fees and commissions consists of income that we earn from lending, banking and savings fees and insurance sales commissions less lending fees and commission expense.

⁴ CACI (Feb 2020) and internal calculations. ‘Main current accounts’ includes main standard and packaged accounts

⁵; Pay.UK monthly CASS data, 9 months to December 2019.

In the year ended April 4, 2020, net fees and commissions decreased by 15.9% to £169 million compared with £201 million in the year ended April 4, 2019, principally reflecting movements in General Insurance fees and commissions (£15 million lower in the year ended April 4, 2020) and Current Account and Savings (£10 million lower in the year ended April 4, 2020).

Other operating income

In the year ended April 4, 2020, other operating income was £67 million, an increase of 24% compared with £54 million expense in the year ended April 4, 2019. The majority of the income increase relates to the disposal gains on the investment securities portfolio.

Gains/losses on derivatives and hedge accounting

All derivatives we enter into are recorded on the balance sheet at fair value with any fair value movements accounted for in the income statement. Derivatives, our use of which is regulated by the UK Building Societies Act, are only used to limit the extent to which we could be affected by changes in interest rates, exchange rates or other factors specified in building society legislation. These derivatives are therefore used exclusively to hedge risk exposures and are not used for speculative purposes.

Where effective hedge accounting relationships can be established, the movement in the fair value of the derivative instrument is offset in full or in part by opposite movements in the fair value of the underlying asset or liability being hedged. Any ineffectiveness arising from different movements in fair value will likely trend to nil over time.

In addition, we enter into certain derivative contracts which, although efficient economically, cannot be included in effective hedge accounting relationships. Consequently, although the implicit interest cost of the underlying instrument and associated derivatives are included in “Net interest income” in the income statement, fair value movements on such derivatives are included in “Gains from derivatives and hedge accounting.”

Losses from derivatives and hedge accounting were £7 million in the year ended April 4, 2020 compared to gains of £36 million in the year ended April 4, 2019. Income statement volatility arises due to accounting ineffectiveness of designated hedges, or because hedge accounting has not been adopted or is not achievable.

Included within the losses of £7 million (April 4, 2019: gains of £36 million) was the impact of the following:

Gains of £61 million (2019: £24 million) from fair value hedge accounting include gains of £53 million (2019: losses of £9 million) from macro hedges, due to hedge ineffectiveness and the amortization of existing balance sheet amounts, and gains of £8 million (2019: £33 million) relating to micro hedges which arise due to a combination of hedge ineffectiveness, disposals and restructuring, and the amortization of existing balance sheet amounts. Losses of £74 million (2019: £18 million) from other derivatives include a loss of £51 million (2019: £3 million) from adverse movements in bid-offer spreads, the majority of which occurred in the more volatile financial markets observed at the end of the financial year. There were also losses of £18 million (2019: £8 million) on swaps economically hedging the pipeline of new mortgage business.

Operating expenses and similar charges

Operating expenses and similar charges decreased in the year ended April 4, 2020 to £2,573 million compared to £2,373 million in the year ended April 4, 2019. The following table sets forth the components of operating expenses and similar charges for the years ended April 4, 2020 and 2019, respectively:

	For the year ended April 4,	
	2020	2019
	<i>(£ million)</i>	
Administrative expenses	1,646	1,705

Depreciation and amortization.....	666	549
Total Administrative expenses	2,312	2,254
Impairment losses on loans and advances to customers	209	113
Provisions for liabilities and charges	52	6
Total	2,573	2,373

Administrative expenses

Administrative expenses have increased by £58 million to £2,312 million (2019: £2,254 million). The year-on-year growth is attributable to the impact of current and previous strategic investment of £111 million, along with costs relating to the in-year development and subsequent cessation of our business banking proposition, which in aggregate total £88 million (2019: £13 million).

The following table sets forth the components of administrative expenses for the years ended April 4, 2020 and 2019, respectively:

	For the year ended April 4,	
	2020	2019
	<i>(£ million)</i>	
Employee costs:		
Salaries, bonuses and social security costs	647	645
Pension costs.....	15	181
Other administrative expenses	984	879
Total	1,646	1,705

Employee costs are made up of salaries, bonuses social security costs (which consist entirely of mandatory UK national insurance contributions) and pension costs.

In the year ended April 4, 2020, salaries, bonuses and social security costs increased slightly from £647 million from £645 million in the year ended April 4, 2019.

The Group operates two defined contribution pension schemes in the UK – the Nationwide Group Personal Pension Plan (“GPP”) and the Nationwide Temporary Workers Pension Scheme. New employees are automatically enrolled into one of these schemes, with both schemes being administered by Aviva. Outside of the UK, there are defined contribution pension schemes for a small number of employees in the Isle of Man.

The Group also has funding obligations to several defined benefit pension schemes, which are administered by boards of trustees. Pension trustees are required by law to act in the interests of all relevant beneficiaries and are responsible for the investment policy of fund assets, as well as the day to day administration. The Group’s largest pension scheme is the Nationwide Pension Fund (the “Fund”). This is a contributory defined benefit pension scheme, with both final salary and career average revalued earnings (“CARE”) sections. The Fund was closed to new entrants in 2007 and since that date employees have been able to join the GPP. In line with UK pensions legislation, a formal actuarial valuation (“Triennial Valuation”) of the assets and liabilities of the Fund is carried out at least every three years by independent actuaries.

On February 17, 2020, we announced that we would be closing the Fund to future accrual on March 31, 2021, with affected employees being moved to the GPP for future pension savings. From April 1, 2021, members are expected to move from active to deferred status, with future indexation of deferred pensions before retirement measured by reference to the Consumer Price Index (“CPI”). As CPI is lower than the previous assumptions which were based on the retail price index (“RPI”) and pay growth, a gain of £164 million has been recognized as a past service credit within administrative expenses in the year ended April 4, 2020. All affected employees who are active members of the Fund on March 31, 2021, or those who were active members at the point they were made redundant on or after September 18, 2019, will receive a one-off payment which may be taken in cash or as

a contribution to their pensions. The cost of accruing for these payments of £60 million has been recognized within ‘administrative expenses – other staff related costs’ in the year ended April 4, 2020.

Other administrative costs increased by 11.9% to £984 million for the year ended April 4, 2020 from £879 million for the year ended April 4, 2019.

The cost income ratio has deteriorated on an underlying basis to 75.9% (April 4, 2019: 71.1%) as a result of the growth in administrative expenses described above, which reflects our focus on improving product propositions and services for members while remaining strong, safe and secure.

Depreciation and amortization

For the year ended April 4, 2020 depreciation and amortization expenses increased by 21.3% to £666 million from £549 million for the year ended April 4, 2019.

Impairment losses on loans and advances to customers

We assess at each balance sheet date whether, as a result of one or more events that occurred after initial recognition, there is objective evidence that a financial asset or group of assets is impaired. Evidence of impairment may include indications that a borrower or group of borrowers is experiencing significant financial difficulty or default or delinquency in interest or principal payments.

Impairment losses on loans and advances to customers for the year ended April 4, 2020 increased by 85% to £209 million from £113 million for the year ended April 4, 2019. The increase includes an additional provision to reflect the estimated impact of the Covid-19 pandemic on expected credit losses (ECLs).

The following table analyzes the impairment losses on loans and advances to customers for the years ended April 4, 2020 and 2019, respectively:

	For the year ended April 4,	
	2020	2019
	<i>(£ million)</i>	
Residential lending.....	53	(17)
Consumer banking.....	159	114
Retail lending	212	97
Commercial and other lending.....	(3)	16
Impairment losses on loans and advances	209	113

Impairment losses have increased by £96 million to £209 million (2019: £113 million), largely due to the introduction of a £101 million additional provision to reflect the increased credit risk associated with the Covid-19 pandemic. The underlying performance of our portfolios has remained broadly stable during the year.

Provisions for liabilities and charges

	For the year ended April 4,	
	2020	2019
	<i>(£ million)</i>	
FSCS.....	—	(9)
Customer redress provision.....	56	15
Total	56	6

The income statement charge for provisions for liabilities and charges of £56 million (2019: £6 million) includes the customer redress net income statement charge of £56 million (2019: £15 million).

We hold provisions for customer redress to cover the costs of remediation and redress in relation to past sales of financial products and post sales administration, including compliance with consumer credit legislation and other regulatory requirements. The charge for the year primarily relates to customer redress provisions recognized in respect of PPI and Plevin, including the cost of administering these claims. When assessing the adequacy of our PPI provision we have considered the implications of the guidance published by the FCA in its March 2017 policy statement (PS17/03), including the expected impact of the Plevin case.

In addition to amounts in the table above, provisions for liabilities and charges in the income statement includes a £4 million credit recognized in respect of additional FSCS recoveries relating to failures provided for in previous years.

The FSCS has confirmed that there will be no further interest costs following the sale of Bradford & Bingley plc asset portfolios and subsequent repayment of the loan to HM Treasury. In common with other financial institutions subject to the FSCS, the Group continues to have a potential exposure to future levies resulting from the failure of other financial institutions and consequential claims which arise against the FSCS as a result of such failure.

Taxes

The statutory reported tax charge for the year of £101 million in the year ended April 4, 2020 (April 4, 2019: £197 million charge) represents an effective tax rate of 21.7% which is higher than the statutory rate in the UK of 19.0%. The higher effective rate is due principally to the banking surcharge of 8.0% effective from January 1, 2016, equivalent to £24 million (April 4, 2019: £32 million charge), together with the tax effect of disallowable bank levy and customer redress costs of £11 million and £4 million (April 4, 2019: £8 million and £8 million) respectively.

This resulted in an overall statutory tax charge for the year ended April 4, 2020 of £101 million (April 4, 2019: £197 million) as set out in the table below:

	For the year ended April 4,	
	2020	2019⁽¹⁾
	<i>(£ million)</i>	
Current tax:		
UK corporation tax.....	168	126
Adjustments in respect of prior years.....	(4)	(12)
Total current tax.....	164	114
Deferred tax:		
Current year charge/(credit).....	(48)	50
Adjustments in respect of prior years.....	2	9
Effect of deferred tax provided at different tax rates	(17)	24
Total deferred taxation.....	(63)	83
Statutory tax charge	101	197

Note:

- (1) Certain adjustments were made to reflect an amendment to IAS12 "Income Taxes", and such financial information for the year ended April 4, 2019 has restated to reduce the tax charge for the effects of distributions to the holders of Additional Tier 1 capital, as detailed in note 1 to the audited consolidated financial statements for the year ended April 4, 2020 and "Presentation of Financial Information". In addition, £65 million has been reclassified between current and deferred taxation for the Group, related to cash flow hedging, with no impact on the total tax charge previously reported.

Balance Sheet Review

Total assets grew by 4%, from £238.3 billion as of April 4, 2019 to £248.0 billion as of April 4, 2020, with growth in retail lending and treasury balances of £2.8 billion and £4.7 billion respectively, offset by a small reduction in commercial lending balances.

Loans and advances to customers

Lending remains predominantly concentrated on high quality secured products, with residential mortgages accounting for 94.2% of our total loans and advances to customers at April 4, 2020. This is an increase from 93.8% as at April 4, 2019, reflecting our strategy of exiting non-core commercial lending:

	As at April 4,			
	2020		2019	
	<i>(£ million, except percentages)</i>			
Prime residential mortgages.....	151,084	75.5%	151,473	76.4%
BTL and legacy residential mortgages.....	37,503	18.7%	34,333	17.3%
Total residential mortgages	188,587	94.2%	185,806	93.8%

Consumer banking	4,500	2.2%	4,168	2.1%
Gross balances	200,237	100%	198,168	100.0%
Fair value adjustments for micro hedged risk.....	741	—	883	—
Total	200,978	—	199,051	—

Residential mortgage portfolio

Residential mortgages include prime, BTL and legacy loans, with new lending in the BTL and legacy portfolio comprised entirely of BTL lending. Gross mortgage lending in the period was £30.9 billion (April 4, 2019: £36.4 billion), representing a market share of 11.4% (April 4, 2019: 13.4%).

Mortgage balances grew by £2.8 billion in the year ended April 4, 2020, most of which was related to BTL lending.

The average LTV of new lending in the year ended April 4, 2020, weighted by value was 72% (April 4, 2019: 71%) primarily due to our strategy to continue supporting the first time buyer market as we recognise the importance of helping people take their initial steps onto the housing ladder. Modest house price growth has resulted in the average LTV of our portfolio remaining at 58% (April 4, 2019: 58%). Residential mortgage arrears have remained constant at 0.4% (April 4, 2019: 0.4%).

The impairment provision balance has increased to £252 million (April 4, 2019: £206 million), which includes an additional provision of £51 million in relation to Covid-19.

With the number of renters increasing, we continue to support landlords with buy to let mortgages through our subsidiary The Mortgage Works; this business also diversifies our income streams and supports better savings rates for our members. After improving our range of mortgages last year, our buy to let lending grew rapidly.

The analysis of the new business profile and the average LTV for new business excludes further advances.

Total residential balance sheet provisions at April 4, 2020 were £252 million, compared with £206 million at April 4, 2019.

	As at April 4,	
	2020	2019
	<i>(percentages)</i>	
Cases three months or more in arrears as (%) of total book of residential mortgages		
Prime.....	0.33	0.35
Specialist	0.74	0.82
Total Group residential mortgages	0.41	0.43
UK Finance (UKF) industry average ⁽¹⁾	0.74	0.78

Note:

- (1) The methodology for calculating mortgage arrears is based on the UKF definition of arrears, where months in arrears is determined by dividing the arrears balance outstanding by the latest monthly contractual payment.

Reflecting our low risk profile, performance of the mortgage books has remained strong with the total group residential mortgages more than three months in arrears staying constant. Our overall arrears percentage of 0.41% compares favorably with the UK Finance (UKF) industry average of 0.74% (April 4, 2019: 0.78%) as reported by UKF.

The table below shows possessions as a percentage of our total residential mortgages as at April 4, 2020 and April 4, 2019:

	As at April 4,	
	2020	2019
	<i>(percentages)</i>	
Possessions as (%) of total residential mortgages (number of properties)		
Prime.....	0.01	0.01
Specialist	0.05	0.05
Total Group residential mortgages	0.02	0.01

Our approach to dealing with customers in financial difficulties combined with our historically cautious approach to lending, means that we only take possession of properties as a last resort. This is illustrated by the

number of properties taken into possession compared with the total for the industry. During the year ended April 4, 2020, the properties taken into possession increased to 248, representing only 0.02% of our book compared to the industry average of 0.03% (source: UKF).

The table below provides further information on the residential mortgage portfolio by payment due status as at April 4, 2020 and April 4, 2019:

	As at April 4,							
	2020				2019			
	Prime lending	Specialist lending	Total	(%)	Prime lending	Specialist lending	Total	(%)
	<i>(£ billion, except percentages)</i>							
Not impaired:								
Neither past due nor impaired.....	149.4	36.7	186.1	98.5	149.8	33.5	183.3	98.5
Past due up to 3 months but not impaired....	1.3	0.7	2.0	1.1	1.3	0.6	1.9	1.1
Impaired.....	0.4	0.3	0.7	0.4	0.4	0.4	0.8	0.4
Total.....	151.1	37.7	188.8	100	151.5	34.5	186.0	100.0

The status “past due up to 3 months but not impaired” includes any asset where a payment due is received late or missed. The amount included is the entire financial asset balance rather than just the payment overdue. Loans on interest only or payment holiday concessions are initially categorized according to their payment status as at the date of concession, with subsequent revisions to this category assessed against the terms of the concession.

Loans which are not in possession have collective impairment provisions set aside to cover credit losses.

Loans in the analysis above which are less than three months past due have collective impairment allowances set aside to cover credit losses on loans which are in the early stages of arrears. Loans acquired from the Derbyshire, Cheshire and Dunfermline building societies were fair valued on a basis which made credit loss adjustments for anticipated losses over the remaining life of the loans. Impaired retail loans are broken down further in the following table:

	As at April 4,							
	2020				2019			
	Prime lending	Specialist lending	Total	(%)	Prime lending	Specialist lending	Total	(%)
	<i>(£ million, except percentages)</i>

For commercial loans

Forbearance in the commercial portfolios is recorded and reported at borrower level and applies to all commercial lending including impaired exposures and customers subject to enforcement and recovery action. Impairment provisions on forborne loans are calculated on an individual borrower basis.

The table below provides details of the commercial loans which are subject to forbearance as at April 4, 2020 and 2019. Loans where more than one concession event has occurred are reported under the latest event.

	As at April 4,	
	2020	2019
	<i>(£ million)</i>	
Refinance.....	43	44
Modifications:		
Payment concession.....	31	2
Security amendment.....	8	6
Extension at maturity.....	19	12
Breach of covenant.....	126	122
Total.....	227	186
Impairment provision on forborne loans.....	14	23

Consistent with the European Banking Authority reporting definitions, loans that meet the forbearance exit criteria are not reported as forborne.

Overall, the exposures currently subject to forbearance have increased to £227 million as at April 4, 2020, from £186 million as at April 4, 2019. During the year, amortized cost balances subject to forbearance have increased, principally reflecting the support measures put in place as we manage the runoff of the portfolio. The reduction in the total impairment provision on forborne loans to £14 million (2019: £23 million) principally reflects an improved outlook for one impaired case.

For consumer loans

The table below provides details of the consumer banking exposures which are subject to forbearance as at April 4, 2020 and April 4, 2019. Where more than one concession event has occurred, exposures are reported under the latest event.

Impairment provision on forborne loans.....	12	29	14	55

Commercial loan portfolio

During the year, commercial balances have decreased to £7.9 billion (2019: £9.1 billion). Continuing the deleveraging activity in previous financial years, the overall portfolio is increasingly weighted towards registered social landlords, with balances of £5.4 billion (2019: £6.0 billion), and project finance with balances of £0.7 billion

(2019: £0.8 billion). With a smaller book, and fewer active borrowers requiring further lending, our commercial real estate balances decreased during the year to £1.0 billion (2019: £1.4 billion).

Commercial gross balances

	As at April 4,	
	2020	2019
	<i>(£ million)</i>	
Registered social landlords ⁽¹⁾	5,425	5,980
Commercial real estate (CRE)	996	1,383
Project finance ⁽²⁾	712	807
Other lending	—	8
Commercial balances at amortized cost	7,133	8,178
Fair value adjustment for micro hedged risk ⁽³⁾	741	883
Commercial lending balances	57	57
Total	7,931	9,118

Notes:

- (1) Loans to registered landlords are secured on residential property.
- (2) Loans advanced in relation to project finance are secured on cash flows from government or local authority backed contracts under the Private Finance Initiative.
- (3) Micro hedged risk relates to loans hedged on an individual basis.

Impairment losses/(reversals) for the year for commercial

	For the year ended April 4,	
	2020	2019
	(IFRS 9 basis)	(IAS 39 basis)
	<i>(£ million)</i>	
Total	(3)	16

Note:

- (1) Impairment losses represent the total amount charged through the profit and loss account, rather than amounts written off during the year.

The £3 million impairment reversal for the year ended April 4, 2020 primarily relates to a single credit exposure, where an improved outlook has driven a positive reassessment of potential future losses, offset by a £7 million additional provision to reflect the expected impact of Covid-19 on credit losses. The level of this additional provision reflects the estimated impact based upon a revised central economic scenario and the extent of concessions granted in response to Covid-19.

Our commercial lending portfolio of £7.1 billion as at April 4, 2020 (April 4, 2019: £8.2 billion) comprises £1.0 billion secured on CRE (April 4, 2019: £1.4 billion), £5.4 billion advanced to registered social landlords (“**RSL**”) (April 4, 2019: £6.0 billion) and £0.7 billion advanced under Project Finance, principally via the private finance initiative (“**PFI**”) (April 4, 2019: £0.9 billion). Our CRE portfolio is diverse both in terms of sectors and geographic spread.

The portfolio is actively monitored for evidence of impairment by reference to a range of factors, which include significant financial difficulty of the borrower, payment default, granting of a concession in accordance with our forbearance policies or other circumstances indicating the likelihood of a material change in cash flow expectations. Impaired CRE loans amounted to £50 million as at April 4, 2020 (April 4, 2019: £48 million) and

provisions held against the portfolio amounted to £29 million (April 4, 2019: £22 million) representing a coverage ratio of 58% (April 4, 2019: 46%).

The following table shows commercial and other lending balances carried at amortized cost on the balance sheet, with the stage allocation of the exposures, impairment provisions and resulting provision coverage ratio:

Commercial product and staging analysis

Note:

- (1) In recognition of the financial impact that Covid-19 may have on our borrowers, an additional provision of £7 million has been added to the impairment provisions for commercial lending. This additional provision has not been allocated to underlying loans and therefore has not been attributed to stages. Further detail on the calculation of the additional provision is given in note 10 to the financial statements.

Over the year, the performance of the commercial portfolio has remained stable, with 95% (April 4, 2019: 95%) of balances remaining in stage 1. Of the £268 million stage 2 loans (April 4, 2019: £299 million), less than £1 million (April 4, 2019: £1 million) is in arrears by 30 days or more, with the remainder in stage 2 due to non-arrears factors such as a deterioration in risk rating or placement on a watchlist.

The increase in CRE stage 2 and 3 balances is in respect of a small number of loans that are subject to increased loan maturity risk, with stage 3 (credit-impaired) loans, at £50 million (April 4, 2019: £48 million), equating to 5% (April 4, 2019: 3%) of the total CRE exposure.

Loans in the project finance portfolio benefit from long-term cash flows, which typically emanate from the provision of assets such as schools, hospitals, police stations, government buildings and roads, procured under the Private Finance Initiative. 97% of balances are in respect of fully developed assets.

There is no significant exposure to credit risk on the other lending balances.

Credit quality

We adopt robust credit management policies and processes to recognize and manage the risks arising from the portfolio,

The following table shows the CRE portfolio by risk grade and the provision coverage for each category. The table includes balances held at amortized cost only.

CRE gross balances by risk grade and provision coverage

	For the year ended April 4,									
	2020					2019				
	Stage 1	Stage 2	Stage 3	Total	Provision Coverage	Stage 1	Stage 2	Stage 3	Total	Provision Coverage
	<i>(£ million)</i>				<i>(percentages)</i>	<i>(£ million)</i>				<i>(percentages)</i>
Strong.....	433	18	—	451	0.1	676	57	—	733	0.3

Total.....	791	155	50	996	2.3	1,122	213	48	1,383	1.6

Notes:

The risk grades in the table above are based upon supervisory slotting criteria, under which exposures are classified into categories depending on the underlying credit risk, with assessment based upon financial strength, asset characteristics, the strength of the sponsor and the security. As CRE balances reduce, the credit quality of the portfolio remains strong, with 89% (April 4, 2019: 91%) of the portfolio rated as satisfactory or better, as at April 4, 2020.

Risk grades for the project finance portfolio are also based upon supervisory slotting criteria with 90% of the exposure rated strong or good.

The registered social landlord portfolio is risk rated using an internal PD rating model with major drivers being financial strength, independent visibility assessment ratings provided by the UK Regulator of Social Housing, and the type and size of registered social landlord. The distribution of exposures is weighted towards the stronger risk ratings and against a backdrop of zero defaults, the credit quality remains high, with an average 12-month PD of 0.04% across the portfolio.

In addition to the above, £57 million (April 4, 2019: £57 million) of commercial lending balances were classified as FVTPL, of which £54 million (April 4, 2019: £53 million) related to CRE loans with a risk grade of satisfactory.

CRE Balances by LTV and region

The following table includes both amortized cost and FVTPL CRE balances:

CRE Lending gross balances by LTV and region⁽¹⁾

	As at April 4,						
	2020			2019			
	London	Rest of UK	Total	London	Rest of UK	Total	
	<i>(£ million)</i>

Not fully collateralized							
Over 100% LTV.....		—	32	32	—	36	36
Collateral value.....		—	19	19	—	19	19
Negative equity.....		—	13	13	—	17	17
Total CRE Loans.....	547	503	1,050	831	605	1,436	

Geographical concentration	52%	48%	100%	58%	42%	100%
---	------------	------------	-------------	------------	------------	-------------

Notes:

- (1) A CRE loan may be secured on assets located in different regions. The calculation for regional allocation has been changed in the year to reflect a more refined approach, with comparatives presented on a consistent basis.
- (2) The LTV ratio is calculated on the on-balance sheet carrying amount of the loan divided by the indexed value of the most recent independent external collateral valuation. The Investment Property (IPD) monthly index is used.

Changes to the regional distribution of the CRE portfolio reflect the managed reduction of the portfolio, with 52% (April 4, 2019: 58%) of the CRE exposure now being secured against assets located in London. Over the year, the LTV distribution of the CRE portfolio remained stable, with 93% (April 4, 2019: 96%) of the portfolio having an LTV of 66% or less, and 66% (April 4, 2019: 71%) of the portfolio having an LTV of 50% or less.

Credit risk concentration by industry sector

Credit risk exposure by industry sector is broadly unchanged from the prior year, continuing to be spread across the retail, office, residential investment, industrial and leisure sectors. Where a CRE loan is secured on assets crossing different sectors, the sector allocation is based upon the value of the underlying assets in each sector. For CRE exposures, excluding FVTPL balances, the largest exposure is to the residential sector, which represents 42% (2019: 45%) of the total CRE portfolio balance. Over the year, our exposure to retail assets has reduced to £202 million (2019: £274 million), with a weighted average LTV of 53% (2019: 46%). Exposure to the leisure and hotel sector has also reduced to £84 million (2019: £110 million), with a weighted average LTV of 46% (2019: 49%).

In addition to the amortized cost balances included in the table above, there are £54 million (2019: £53 million) of FVTPL commercial lending balances, of which £42 million (2019: £42 million) relates to the office sector and £12 million (2019: £12 million) relates to the retail sector.

CRE balances by payment due status

Of the £1,050 million (April 4, 2019: £1,436 million) CRE exposure, including FVTPL balances, £14 million (April 4, 2019: £24 million) relates to balances with arrears, of which £6 million (April 4, 2019: £24 million) have arrears greater than 3 months.

Gross balances subject to forbearance⁽¹⁾

	As at April 4,	
	2020	2019
	<i>(£ million)</i>	
Refinance.....	43	44
Modifications:		
Payment concession.....	31	2
Security amendment	8	6
Extension at maturity	19	12
Breach of covenant	126	122
Total	227	186
Total impairment provision on forborne loans	14	23

Note:

- (1) Loans where more than one concession event has occurred are reported under the latest event.

Possession balances represent loans against which we have taken ownership of properties pending their sale. Assets over which possession has been taken are realized in an orderly manner via open market or auction sales to derive the maximum benefit for all interested parties, and any surplus proceeds are distributed in

accordance with the relevant insolvency regulations. We do not normally occupy repossessed properties for our business use or use assets obtained in our operations.

Although collateral can be an important mitigant of credit risk, it is our practice to lend on the basis of the customer's ability to meet their obligations out of cash flow resources rather than rely on the value of the security offered. In the event of default, we may use the collateral as a source of repayment.

Primary collateral is a fixed charge over freehold or long leasehold properties, but may be supported by other liens, floating charges over company assets and, occasionally, unsupported guarantees. The collateral will have a significant effect in mitigating our exposure to credit risk.

Our valuation policy stipulates the maximum period between formal valuations, relative to the risk profile of the lending. Particular attention is paid to the status of the facilities, for instance whether it is, or is likely to require an impairment review where our assessment of potential loss would benefit from updated valuations, or there are factors affecting the property that might alter the case assessment and the most appropriate action to take.

Collateral held in relation to secured loans that are either past due or impaired is capped at the amount outstanding on an individual loan basis. The table below represents a breakdown of CRE lending balances by LTV and their share in the total CRE loans as at April 4, 2020 and 2019.

	As at April 4,			
	2020		2019	
	<i>(£ million, except percentages)</i>			
	<i>(unaudited)</i>			
Fully collateralized				
LTV ratio:				
less than 25%	121	12%	159	11%
25% to 50%	569	54%	857	60%
51% to 75%	282	27%	356	25%
76 to 90%	46	4%	21	1%
91% to 100%	—		7	0%
Total	1,018	97%	1,400	97%

Charged off ⁽¹⁾	28	98	109	235	4.7	24	82	103	209	4.6
Total	280	3,030	1,684	4,994	100	324	2,449	1,813	4,586	100

Note:

- (1) Charged off balances related to accounts which are closed to future transactions and are held on the balance sheet for an extended period (up to 36 months, depending on the product) while recovery procedures take place.

The consumer banking portfolio comprises balances on unsecured retail banking products: current accounts overdrafts of £0.3 billion (April 4, 2019, £0.3 billion), personal loans of £3.0 billion (April 4, 2019: £2.4 billion), and credit cards of £1.7 billion (April 4, 2019: £1.8 billion). Over the year total balances across these portfolios have grown by £0.4 billion to £5.0 billion (April 4, 2019: £4.6 billion), equating to 8.9% growth, and credit quality has remained stable.

Consumer banking gross balances

	As at April 4,			
	2020		2019	
(Audited)	(£ million)	(%)	(£ million)	(%)
Overdrawn current accounts	280	5	324	7
Personal loans	3,030	61	2,449	53
Credit cards	1,684	34	1,813	40
Total consumer banking	4,994	100	4,586	100

Following the transition to IFRS 9, all consumer banking loans continue to be classified and measured at amortized cost.

Impairment losses for the year

	2020	2019
(Audited)	(£ million)	
Overdrawn current accounts	21	9
Personal loans	82	38
Credit cards	56	67
Total	159	114

Note: Impairment losses represent the net amount charged through the profit and loss account rather than amounts written off during the year.

The impairment losses for the year include an additional provision of £43 million, which has been included to reflect the expected impact of Covid-19. The level of this provision reflects the estimated impact on expected credit losses based upon a revised central economic scenario and the credit risk associated with concessions granted in response to Covid-19. The losses also include the impact of continued personal loan book growth.

The following table shows consumer banking balances by stage, with the corresponding impairment provisions and resulting provision coverage ratios:

**Consumer banking product
and staging analysis**

Personal loans	0.56	11.15	86.78	—	6.27	0.53	12.11	86.58	5.74
Credit cards	1.33	20.67	92.86	—	14.55	1.12	19.33	93.61	12.38
Total	0.82	17.09	89.39	—	9.9	0.77	17.32	90.12	9.11

Note:

(1) . In recognition of the financial impact that Covid-19 may have on our borrowers, an additional provision of £43 million has been added to the impairment provisions for consumer banking. This additional provision has not been allocated to underlying loans and therefore has not been attributed to stages. Further detail on the calculation of the additional provision is given in note 10 to the financial statements.

Total gross balances increased to £4,994 million, primarily due to book growth in personal loans. The decreases in overdrawn current account and credit card balances are due to reduced transaction volumes at year end. As at April 4, 2020, 77% (2019: 77%) of the consumer banking portfolio is in stage 1. Over the year, consumer banking balances in stages 2 and 3 have increased in absolute terms, reflecting the growth of the portfolio. The combined stage 2 and 3 proportion of total balances has, however, remained stable at 23% (2019: 23%), reflecting stable underlying credit performance. The majority of the portfolio growth has been in the personal loan portfolio, where the proportion of balances by stage and provisions as a percentage of total balances have remained broadly stable. The increase in the overdrawn current account and credit card provisions as a percentage of balances is a result of additional provisions to reflect the estimated impact of the Covid19 pandemic

on expected credit losses, combined with lower overall gross balances as transaction volumes reduced towards the end of the year.

Consumer banking stage 3 gross balances and provisions include charged off balances. These are accounts which are closed to future transactions and are held on the balance sheet for an extended period (up to 36 months) whilst recovery activities take place. Excluding these charged off balances and related provisions, the provisions as a percentage of total balances is 5.7% (2019: 5.0%).

Funding and Liquidity

Funding strategy

Our funding strategy is to remain predominantly retail funded; retail customer loans and advances are therefore largely funded by customer deposits. Non-retail lending, including treasury assets and commercial customer loans, are largely funded by wholesale debt, as set out below.

	As at September 30,	As at April 4,		
	2021	2021	2020	2019
	(£ billion)			
Liabilities:

Treasury (including liquidity portfolio)	74	46	37	33
Consumer lending	4	4	4	4
Commercial lending	6	7	8	9
Other assets	7	7	10	6
Total	285	255	248	238

Managing liquidity and funding risk

We manage liquidity and funding risk within a comprehensive risk framework which includes policies, strategy, limit setting and monitoring, stress testing and robust governance controls. See “*Risk Factors—Risks Related to Our Business*” for additional information on funding and liquidity risk.

Our management of liquidity and funding risk aims to ensure that at all times there are sufficient liquid assets, both as to amount and quality, to cover cash flow mismatches and fluctuations in funding, to retain public confidence and to enable us to meet financial obligations as they fall due, even during episodes of stress. This is achieved through the management and stress testing of business cash flows and through translation of Board risk appetite into appropriate risk limits. This ensures a prudent funding mix and maturity profile, sufficient levels of high quality liquid assets and appropriate encumbrance levels are maintained.

We continue to maintain sufficient liquid assets, in terms of both amount and quality, to meet daily cash flow needs as well as stressed requirements driven by internal and regulatory liquidity assessments. The composition of the liquid asset buffer (which includes both the on-balance sheet liquidity and investments and excludes encumbered assets) is subject to limits, set by the Board and the ALCO, in relation to issuer, currency and asset type. The liquid asset buffer predominately comprises:

- reserves held at central banks; and
- highly rated debt securities issued by a restricted range of governments, central banks and supranationals.

We also hold a portfolio of other high quality, central bank eligible, covered bonds, RMBS and asset backed securities. Other securities are held that are not eligible for central bank operations but can be monetized through repurchase agreements with third parties or through sale.

For contingent purposes, unencumbered mortgage assets are pre-positioned at the Bank of England which can be used in the Bank of England’s liquidity operations if market liquidity is severely disrupted.

At its special meeting ending March 10, 2020, the Monetary Policy Committee voted unanimously for the Bank of England to introduce a new Term Funding Scheme with additional incentives for Small and Medium-sized Enterprises (“**TFSME**”). The scheme is designed to incentivize eligible participants to provide credit to businesses and households to bridge through the current period of economic disruption caused by the outbreak of Covid-19. The scheme includes additional incentives to provide credit to SMEs. The TFSME opened for drawings on April 15, 2020, and as at September 30, 2021, we had TFSME drawings of £21.7 billion.

The CET1 ratio increased to 37.7% (April 4, 2021: 36.4%) as a result of an increase in CET1 capital of £0.4 billion, while RWAs remained stable. The CET1 capital increase was driven by £0.6 billion profit after tax, net of distributions, partially offset by a £0.2 billion movement in deductible intangible assets, IFRS 9 transitional arrangements and prudent valuation adjustments.

Liquidity

We monitor our liquidity position relative to internal risk appetite and the regulatory short-term liquidity stress metric, the Liquidity Coverage Ratio (“**LCR**”). Our average LCR for the 12-months ending September 30, 2021 was 173% (average for the 12 months ending April 4, 2021: 159%), which is above the regulatory minimum of 100%.

We also monitor our position against the future longer-term funding metric, the Net Stable Funding Ratio (“**NSFR**”). Based on current interpretations of expected regulatory requirements and guidance, our average NSFR for the four quarters ending September 30, 2021 was 143% (average for the four quarters ending April 4, 2021: 137%), which exceeds the expected 100% minimum future requirement.

Wholesale funding

An analysis of our wholesale funding is set out in the table below:

	As at September 30, 2021		As at April 4, 2021

To mitigate cross-currency refinancing risk, we prudently manage the currency mix of our liquid assets to ensure there is no undue reliance on currencies not consistent with the profile of stressed outflows.

At September 30, 2021, cash, government bonds and supranational bonds included in the liquid asset buffer represented 143% (April 4, 2021: 157%) of wholesale funding maturing in less than one year, assuming no rollovers.

The tables below set out the residual maturity of the wholesale funding book as at September 30, 2021 and April 4, 2021 respectively:

	As at September 30, 2021		As at April 4, 2021

External Credit Ratings

Our long-term and short-term credit ratings from the major rating agencies as at the date of this Base Prospectus are as set out below. The long-term rating for both Standard & Poor's (S&P) and Moody's is the senior preferred rating. The long-term rating for Fitch is the senior non-preferred rating:

	<u>Senior Preferred</u>	<u>Short-Term</u>	<u>Senior Non-Preferred</u>	<u>Tier 2</u>	<u>Date of last rating action /confirmation</u>	<u>Outlook</u>
S&P	A+	A-1	BBB+	BBB	November 2021	Stable
Moody's	A1	P-1	Baa1	Baa2	July 2021	Stable
Fitch	A+	F1	A	BBB+	July 2021	Stable

In October 2021, S&P upgraded our long term issuer credit rating and senior preferred rating to A+ and changed the outlook to stable; all other ratings were unchanged. This followed a change to a positive outlook in June 2021. S&P stated that the upgrade was due to our performance in the last 12 months in reducing costs, writing profitable new business and maintaining strong asset quality.

In July 2021, Moody's upgraded our senior non-preferred debt rating to Baa1 from Baa2 following the introduction of Moody's revised Advanced Loss Given Failure framework. All other ratings were affirmed.

In July 2021, Fitch revised the outlook on us to stable from negative and affirmed all ratings. The revision of the outlook primarily reflected the revision of Fitch's outlook on the UK's AA- rating to stable.

Treasury Assets

Our liquidity and investment portfolio held on the balance sheet at September 30, 2021 of £73.7 billion (September 30, 2020: £48.6 billion) is held in two separate portfolios: liquid assets and other securities.

The liquid assets portfolio comprises cash held at central banks, highly rated debt securities issued by a limited range of governments, multi-lateral development banks (referred to as "supranationals"), and government guaranteed agencies. In addition, cash is invested in highly rated liquid assets (covered bonds, residential mortgage backed securities and asset-backed securities) that are eligible for accessing central bank funding operations. The other securities portfolio comprises available for sale investment securities, with movements reflecting legacy asset disposals, market prices and the Group's operational and strategic liquidity requirements.

Our Treasury Credit Policy ensures all credit risk exposures align to the Board's risk appetite with investments restricted to low risk assets and proven market counterparties; an analysis of our on-balance sheet portfolios by credit rating and geographical location of the issuers is set out below.

Liquidity and investment portfolio by credit rating:	As at September 30, 2021									
	£ million (£ million)	Credit Rating				Geography

Other securities total	1,441	81	10	3	6	99	-	1	-	-
Loans and advances to banks.....	3,275	-	66	25	9	90	3	6	-	1
Total	73,656	13	81	5	1	80	5	8	3	4

Ratings used are obtained from Standard & Poor's (S&P) and from Moody's or Fitch if no S&P rating is available. For loans and advances to banks and similar institutions, internal ratings are used. A monthly review of the current and expected future performance of all treasury assets is undertaken, with regular independent review, underpinned by robust risk reporting and performance metrics, to measure, mitigate and manage credit risk. In accordance with accounting standards, assets are impaired where there is objective evidence that current events or performance will result in a loss. In assessing impairment we evaluate, among other factors, normal volatility in valuation, evidence of deterioration in the financial health of the obligor, industry and sector performance and underlying cash flows.

Collateral held as security for treasury assets is determined by the nature of the instrument. Treasury liquidity and portfolios are generally unsecured with the exception of reverse repos, asset-backed securities ("ABS") and similar instruments, which are secured by pools of financial assets.

Fair value through other comprehensive income reserve

Of the total £73,656 million (April 4, 2021: £45,826 million) liquidity and investment portfolio at September 30, 2021, £22,970 million (April 4, 2021: £24,230 million) is held as fair value. These assets are marked to market, with fair value movements recognized in reserves or through profit and loss.

Of these assets, £93 million (April 4, 2021: £32 million) are classified as Level 3 (valuation not based on observable market data) for the purposes of IFRS 13. Further detail on the Level 3 portfolio is provided in note 13 in our unaudited condensed consolidated financial statements for the six months ended September 30, 2021.

As at September 30, 2021, the balance on the FVOCI reserve was a £103 million profit, net of tax (April 4, 2021 £110 million profit). The movements in the FVOCI reserve reflect general market movements and the realization of gains through disposal of investment assets. The fair value movement of FVOCI assets that are not impaired has no effect on our profit. As at September 30, 2021 investment securities classified as FVTPL totaled £37 million (April 4, 2021: £12 million).

The following table provides an analysis of financial assets and liabilities held on our balance sheet at fair value, grouped in levels 1 to 3 based on the degree to which the fair value is observable:

Our Level 1 portfolio comprises government and other highly rated securities for which traded prices are readily available.

Asset valuations for Level 2 investment securities are sourced from consensus pricing or other observable market prices. None of the Level 2 investment securities are valued from models. Level 2 derivative assets and liabilities are valued using observable market data for all significant valuation inputs.

The main constituents of the Level 3 portfolio are as follows:

- Loans and advances to customers
 - Certain loans and advances to customers have been classified as FVTPL. Level 3 assets in this category include a closed portfolio of residential mortgages and a small number of commercial loans.
- Investment securities primarily include investments made in FinTech companies held at FVOCI and FVTPL.
- Derivative financial instruments (inflation swaps)

Inflation swaps are used to hedge the Group's investments in index-linked government debt. Adjustments to the inflation curve to reflect seasonality in inflation index publications is required to determine a valuation; however, unlike most derivative valuation inputs, this market data is not available and therefore the input is internally derived rather than observable. The Group transacts Euro and US Dollar inflation swaps, for which seasonality is a more significant input than for equivalent sterling swaps.

Financial Condition of Nationwide

Capital Resources

Capital is held by us to protect our depositors, cover our inherent risks, provide a cushion for stress events and support our business strategy. In assessing the adequacy of our capital resources, we consider our risk appetite in the context of the material risks to which we are exposed and the appropriate strategies required to manage those risks. We manage our capital structure to ensure we continue to meet minimum regulatory requirements, as well as meeting the expectations of other key stakeholders. As part of the risk appetite framework, we target strong capital ratios relative to both regulatory requirements and major banking peers. Any planned changes to the balance sheet, potential regulatory developments and other factors (such as trading outlook, movements in the fair

value other comprehensive income reserve and pension deficit) are all considered. Our strategic leverage ratio target is 4.5%.

The capital strategy is to manage capital ratios through retained earnings, supplemented by external capital where appropriate. In recent years, we have demonstrated our ability to supplement retained earnings through the issuance of CET1, AT1 and Tier 2 capital instruments and have delivered significant deleveraging of our non-core CRE portfolio and out of policy treasury assets. The capital disclosures included below are reported on a CRD IV end point basis unless otherwise stated. This assumes that all CRD IV requirements are in force during the period, with no transitional provisions permitted. In addition, the disclosures are on a Group (consolidated) basis, including all subsidiary entities, unless otherwise stated.

The table below reconciles the general reserves to total regulatory capital.

	As at September 30,	As at April 4,

Tier 2 capital	2,878	2,833	3,320	2,976
Total regulatory capital	16,642	16,176	14,578	14,485

Notes:

- (1) Foreseeable distributions in respect of CCDS and AT1 securities are deducted from CET1 capital under CRD IV.
- (2) A prudent valuation adjustment (PVA) is applied in respect of fair valued instruments as required under regulatory capital rules.
- (3) Own credit and debit valuation adjustments are applied to remove balance sheet gains or losses of fair valued liabilities and derivatives that result from changes in our own credit standing and risk, in accordance with CRD IV rules.
- (4) Intangible assets, goodwill and defined benefit pension fund assets are deducted from capital resources after netting associated deferred tax liabilities.
- (5) Where capital expected loss exceeds accounting impairment provisions, the excess balance is removed from CET1 capital, gross of tax. In contrast, where impairment provisions exceed capital expected loss, the excess balance is added back to Tier 2 capital, gross of tax. This calculation is not performed for equity exposures, in line with Article 159 of CRR. The expected loss amounts for equity exposures are deducted from CET1 capital, gross of tax.
- (6) The transitional adjustments to capital resources apply scaled relief for the impact of IFRS 9, over a 5-year transition period. Further detail regarding these adjustments is provided in the Interim Pillar 3 disclosures at nationwide.co.uk.
- (7) On April 24, 2019 we announced the redemption of the AT1 instrument in full at the first call date of June 20, 2019, therefore making it ineligible as regulatory capital from the date of this announcement.
- (8) Subordinated debt includes fair value adjustments related to changes in market interest rates, adjustments for unamortized premiums and discounts that are included in the consolidated balance sheet, and any amortization of the capital value of Tier 2 instruments required by regulatory rules for instruments with fewer than five years to maturity.
- (9) Includes temporary relief to mitigate the impact of volatility in central government debt on capital ratios, in line with the Covid-19 banking package.

Our key capital measures are summarized in the table below:

	As at September 30,	As at April 4,		
	2021	2021	2020	2019 ⁽¹⁾
		<i>(£ million, except percentages)</i>		
Solvency ratios				
CET1 ratio	37.7%	36.4%	31.9%	32.2% ⁽⁴⁾
Total Tier 1 ratio	41.7%	40.5%	33.7%	35.2%
Total regulatory capital ratio	50.5%	49.1%	43.6%	44.3%
Leverage				
UK leverage Exposure ⁽²⁾	£251,197	£248,402	£240,707	£235,317
CRR leverage Exposure ⁽³⁾	£297,821	£265,079	£254,388	£247,757

	As at September 30,	As at April 4,		
	2021	2021	2020	2019 ⁽¹⁾
Total Tier 1 capital	£13,764	£13,343	£11,258	£11,509
UK leverage ratio	5.5%	5.4%	4.7%	4.9%
CRR leverage ratio	4.6%	5.0%	4.4%	4.6%

Notes:

- (1) The figures for April 4, 2019 have been restated in respect of counterparty credit risk exposures; this increased total RWAs by 0.5%, leading to a reduction of 0.2% in the CET1 ratio. There is no change to the UK or CRR leverage ratio to 1 decimal place.
- (2) The UK leverage ratio is calculated using the Capital Requirements Regulation (CRR) definition of Tier 1 for the capital amount and the Delegated Act definition of the exposure measure, excluding eligible central bank reserves.
- (3) The Capital Requirements Regulation (CRR) leverage ratio is calculated using the CRR definition of Tier 1 for the capital amount and the Delegated Act definition of the exposure measure.

Risk-based capital ratios remain in excess of regulatory requirements with the CET1 ratio of 37.7% (April 4, 2021: 36.4%) above Nationwide's regulatory CET1 capital requirement of 12.7%. This includes a minimum CET1 capital requirement of 9.2% (Pillar 1 and Pillar 2A) and the CRD IV combined buffer requirements of 3.5% of RWAs.

The increase in the CET1 ratio results from an increase in CET1 capital of £0.4 billion, while RWAs remained stable. The CET1 capital increase was driven by £0.6 billion profit after tax, net of distributions, partially offset by a £0.2 billion movement in deductible intangible assets, IFRS 9 transitional arrangements and prudent valuation adjustments.

On December 23, 2020, EU Regulation 2020/2176 also came into force providing an amendment to the deduction of intangible assets from CET1 items for 'prudently valued software assets, the value of which is not negatively affected by resolution, insolvency or liquidation of the institution', and instead calculate a risk weighted asset value of 100% to those assets not deducted. The PRA confirmed as part of CP5/21 'Implementation of Basel standards' that they found no credible evidence that software assets would absorb losses effectively in a stress. Subsequently, as part of PS17/21, they have confirmed the reversal of this amendment from January 1, 2022. If the revised rules had not been applied, Nationwide's CET1 ratio and UK Leverage ratio at September 30, 2021 would have been 36.9% and 5.3% respectively.

UK CRD V requires firms to calculate a leverage ratio, which is non-risk based, to supplement risk-based capital requirements. The UK leverage ratio increased to 5.5% (April 4, 2021: 5.4%), with Tier 1 capital increasing by £0.4 billion as a result of the CET1 capital movements outlined above. Partially offsetting the impact of this, there was an increase in UK leverage exposure of £2.8 billion, primarily as a result of net retail lending in the period. This position remains in excess of Nationwide's leverage capital requirement of 3.6%, which comprises a minimum Tier 1 capital requirement of 3.25% and buffer requirements of 0.35%. The buffer requirement reflects a 0% countercyclical leverage ratio buffer announced on March 11, 2020 as part of the Bank of England responses to the impacts of Covid-19.

The CRR leverage ratio decreased by 0.4%, closing at 4.6% (April 4, 2021: 5.0%) due to an increase in central bank reserves. The difference between the Capital Requirements Regulation (CRR) leverage ratio and the UK leverage ratio is driven by the exclusion of qualifying central bank claims from the UK leverage exposure measure as per the PRA Rulebook.

UK leverage requirements continue to be Nationwide's binding capital constraint, as they are in excess of risk-based requirements, and it is expected that this will continue despite the impact of IRB mortgage model

changes and Basel III reforms on risk-based capital requirements in 2023. Our internal assessment, however, is still subject to PRA IRB mortgage model approval and the forthcoming PRA consultation on the Basel III reforms. The expected impact of the reforms on Nationwide's UK leverage ratio is negligible. The risk of excessive leverage is managed through regular monitoring and reporting of the leverage ratio, which forms part of risk appetite.

	As at September 30,	As at April 4,		
	2021	2021	2020	2019
Credit risk ⁽¹⁾		<i>(£ million)</i>		
Retail mortgages	14,444	14,523	14,498	14,072
Retail unsecured lending	5,498	5,503	6,029	5,581
Commercial loans	2,428	2,671	3,183	3,604
Treasury	1,992	1,588	1,541	779
Counterparty credit risk ⁽³⁾⁽⁴⁾	1,504	1,491	1,619	1,708
Other ⁽⁵⁾	2,287	2,365	1,783	2,095
Total credit risk	28,153	28,141	28,653	27,839
Operational risk ⁽²⁾	4,829	4,829	4,746	4,843
Total risk weighted assets (RWAs)	32,982	32,970	33,399	32,682

Notes:

- (1). This column includes credit risk exposures, securitizations, counterparty credit risk exposures and exposures below the thresholds for deduction that are subject to a 250% risk weight.
- (2). RWAs have been allocated according to the business lines within the standardized approach to operational risk, as per article 317 of CRR.
- (3). Counterparty credit risk relates to derivative financial instruments, securities financing transactions and exposures to central counterparties.
- (4). The figures for April 4, 2019 have been restated in respect of counterparty credit risk exposures, increasing total RWAs by 0.5%.
- (5). Other relates to equity, fixed and other assets.

For further information and analysis of our capital resources, see "Capitalization and Indebtedness."

Short-Term Borrowings

Our short-term borrowings fluctuate considerably depending on our current operating needs. The terms of our short-term borrowings are less than one year.

Investments

Our principal investments are targeted at three distinct areas: meeting regulatory and mandatory requirements; ensuring that technology and property infrastructure is resilient and secure; and, providing strategic

investment. The strength of our business means we are well placed to invest confidently in our future. We will develop new propositions, further enhance our service, simplify our operations and build new skills for the future.

The key drivers for recent strategic activity are to ensure that the customer product offerings remain relevant and efficient across all distribution channels with a particular focus on digital technologies. Significant investment has been made on our mobile and tablet applications and the underlying infrastructure to support these as well as enabling real time online opening of savings products. Looking forward, there is a commitment to the roll out of an innovative new branch design, the digitization and simplification of customer journeys across main product lines of banking, savings and mortgages and investment in data and analytics. We are also developing our response to Open Banking regulation and the opportunities this creates.

FSCS

In common with other financial institutions subject to the FSCS, we continue to have a potential exposure to future levies resulting from the failure of other financial institutions and consequential claims which arise against the FSCS as a result of such failure.

Bank Levy

Bank levy requirements were introduced in the UK in July 2011. The levy applies to UK banking groups, building societies and the operations of non-UK banks in the UK and is based on the chargeable equity and liabilities at the balance sheet date. An allowance is given against the first £20 billion of chargeable equity and liabilities, meaning that smaller institutions are effectively exempted from the levy. Non-chargeable equity and liabilities include Tier 1 capital, insured retail deposits, repos secured on sovereign debt, retirement benefit obligations and tax liabilities. Additionally, certain high quality liquid assets on the balance sheet are eligible to reduce the amount of equity and liabilities subject to the levy. From January 1, 2016, the Government implemented a gradual reduction in bank levy rates combined with the introduction of an 8% surcharge on the taxable profits of banking companies and building societies within the charge to corporation tax. It was announced in the Autumn Budget on 27 October 2021 that the banking surcharge will reduce to 3% with effect from 1 April 2023 combined with a 6% increase in the main rate of corporation tax. The bank levy charge for the year ended April 4, 2021 was £27 million (year ended April 4, 2020: £55 million).

Contractual Commitments

For details of the amounts of certain of our financial and other contractual liabilities and when payments are due, without taking into account customer deposits, deposits by other financial institutions and debt securities in issue and derivative financial instruments, please see notes 28 and 29 to our audited consolidated financial statements as at and for the year ended April 4, 2021 incorporated by reference herein.

Off-Balance Sheet Arrangements

For a description of off-balance sheet commitment items under IFRS, please see note 29 to our audited consolidated financial statements as at and for the year ended April 4, 2021 incorporated by reference herein.

Critical Accounting Policies

For details on our critical accounting policies under IFRS, please see note 2 to our audited consolidated financial statements as at and for the year ended April 4, 2021 incorporated by reference herein.

Adoption of new and revised IFRS standards

With effect from 5 April 2020 we have adopted the Interest Rate Benchmark Reform – Phase 2 amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16. Further information on the impacts of adopting these amendments is set out in note 1 of our audited consolidated financial statements for the year ended April 4, 2021.

DESCRIPTION OF BUSINESS

OVERVIEW

We are the largest building society in the United Kingdom in terms of total assets, with £285.4 billion of assets as at September 30, 2021. We have approximately 629 branches and over 16 million customers. Our core business is providing personal financial services, primarily residential mortgage loans, retail savings and personal current accounts. In addition, we maintain a portfolio of debt securities for our own account for liquidity management purposes.

We are currently the fifth largest deposit taker and the second largest provider of residential mortgages in the United Kingdom, with estimated market shares of approximately 9.6% (as calculated by us based on Bank of England data) and 12.4% based overall mortgage balances (stock) share (according to Bank of England data), respectively, as at September 30, 2021.

As a mutual organization, we are managed for the benefit of our members, who are primarily our current account, retail savings and residential mortgage customers. Our main focus is serving our members' interests, while retaining sufficient profit to increase and further develop our business and meet regulatory requirements. We return value to our members by offering typically higher interest rates on savings and lower interest rates on loans than those offered by our main competitors. As a result of returning value to our members, we typically earn lower pre-tax profits than our main competitors, which are banks or other non-mutual organizations.

We benchmark our products and performance against a group of leading retail banks operating in the UK (Barclays, Halifax, HSBC, Lloyds Bank, NatWest, Santander UK and TSB) and seek to offer more consistent long-term good value on savings and prime mortgages than is offered by this peer group. In addition to returning value to members through our competitive products, we believe that we provide better service to our customers than that offered by most of our competitors and this is a key component of our strategy.

STRATEGY

As a mutual, owned by our members, we were founded to help people save and buy homes of their own. We continue to be driven by this same social purpose today 'building society, nationwide' - and are committed to doing business in a way that positively impacts our members, employees, communities and the environment.

Our focus on mortgages and savings remains as relevant today as it was when we were founded in the 19th century. Additionally, our current account proposition supports our members' day-to-day financial needs and strengthens our mutual relationship. We intend to continue to offer a broad range of financial services that complement our core products of mortgages, savings and current accounts.

Our strategy remains underpinned by our five cornerstones which are defined below. We aim to provide outstanding service and long-term value to our members while being financially strong and secure. We seek to support our employees and create a fulfilling work environment that enables them to best serve our members, while being better for society too. These cornerstones are supported by our strategic targets and key performance indicators that help us to deliver our strategy.

Built to last

Built to Last is about remaining resilient and secure, and keeping our members' money safe. Our members need to know we are dependable, and they can trust us with their money. We do this by:

- generating a level of profit sufficient to maintain our financial strength and invest for the future;
- continued investment in the resilience and strength of our control processes, operations and technology;
- maintaining a prudent approach to risk management, measuring performance against Board risk appetite; and
- focusing on delivering our strategy in an efficient way, in areas that provide most value to our members and the Society.

As a member-owned mutual organization, we aim to achieve the right balance between retaining a sufficient level of profit to maintain our financial strength, delivering value to our members through better rates, incentives and propositions, and investing to meet the needs and expectations of members in the future.

Our capital base remains strong, with a Common Equity Tier 1 (CET1) ratio of 37.7% (April 4, 2021: 36.4%) and a UK leverage ratio of 5.5% (April 4, 2021: 5.4%).

Member financial benefit remained broadly stable at £145 million for the half year, although tracking below our annual target of £400 million. Over the last five years, we have rewarded members with around £29 billion in additional value, demonstrating our commitment to delivering real, long-term financial value to members as a result of our mutuality. In the last six months, we have introduced new benefits for members such as the monthly prize draw.

Our financial performance is supported by our continued focus on efficiency. We intend to continue to put our members and their money first by making careful choices on how best to allocate our resources. Cost efficiency remains an important area of focus, and our costs remained flat even as we continued to invest in and grow our business.

Building PRIDE

PRIDE is our shared set of values, beliefs and behaviors that define who we are and the way we conduct our business. It is about creating the right culture where all our colleagues feel supported and can thrive, and building skills and talent for the future, so we can do the best for our members. The guiding principles of PRIDE are:

- **Putting our members and their money first.**
- **Rising to the challenge.**
- **Inspiring trust.**
- **Doing the right thing in the right way.**
- **Empowering each other.**

In delivering on these values, we enable our people by:

- providing them with the capabilities and skills they need to best serve our members;
- trusting them with accountable freedom, giving them the space to be innovative and flexibility to work remotely;

- developing our leaders and high potential talent to enable a more empowered and agile workforce;
- accessing key skills, talent and new thinking by creating new roles and evolving our workspaces based on our needs for the future;
- simplifying reward and recognition structures to ensure our people feel valued for their contribution; and
- continuing to embed inclusion and diversity in our culture and ways of working, including in our people processes, such as recruitment, talent leadership, reward, flexible working and progression.

We believe we are, and intend to remain, one of the UK's best places to work. We aim to create a distinctive experience for our colleagues that supports their performance, learning, growth and wellbeing. We also believe it is important to build an inclusive culture and want our Society to reflect the diversity of the wider communities we serve.

Building legendary service

Our ambition is for members to experience our service as heartfelt, easy, lifelong and personal. We aim to be a leading brand for customer service, both among our peer group and across all sectors in the UK, as we:

- continue to develop a multi-skilled, flexible workforce to support the parts of the Society where member demand for our services is highest;
- invest in growing our digital capabilities and expertise, as we reshape ourselves for an increasingly digital world, which has been accelerated by the Covid-19 pandemic;
- provide easy and seamless access to our people and technology, improving our members' digital experiences, and being there for our members when they need us;
- continue to support UK high streets and communities through the extension of our Branch Promise to remain in every town or city we are in today, until at least 2023; and
- deliver on our members' expectations by getting it right first time.

We believe that delivering leading levels of member satisfaction is a key point of differentiation for us, and an important driver in helping to grow our membership. We measure our service satisfaction performance among our peer group (defined as competitors with main current account market share greater than 3.5% as of April 2021), using an independent survey conducted by market research expert, Ipsos MORI. We are pleased to have remained number one for customer satisfaction among our peer group for over nine years. Our latest customer satisfaction lead of 3.3 percentage points is significantly above our 2 percentage point target.⁶ We also have a strategic target to be among the top 5 organizations across all sectors for customer service, as measured by

⁶ © Ipsos MORI 2021, Financial Research Survey (FRS), for the 12 months ending March 31, 2013 to the 12 months ending September 30, 2021. Results based on a sample of around 46,000 adults (aged 16+). The survey contacts around 53,000 adults (aged 16+) a year in total across Great Britain. Interviews were face to face, over the phone and online, taking into account (and weighted to) the overall profile of the adult population. The results reflect the percentage of extremely satisfied and very satisfied customers minus the percentage of customers who were extremely or very or fairly dissatisfied across those customers with a main current account, mortgage or savings. Those in our peer group are providers with more than 3.5% of the main current account market as of April 2021 - Barclays, Halifax, HSBC, Lloyds Bank, NatWest, Santander and TSB. Prior to April 2017, those in our peer group were providers with more than 6% of the main current account market – Barclays, Halifax, HSBC, Lloyds Bank (Lloyds TSB prior to April 2015), NatWest and Santander.

the Institute of Customer Service's UK Customer Satisfaction Index (UK CSI), and in the latest survey in July 2021, we ranked joint nineteenth.⁷

Building thriving membership

We can support our members in achieving their financial goals, wherever they are in life, whether home ownership, saving for the future, or helping with their day-to-day finances. As we deepen our relationships with our members, we can help them make more of their money and improve their financial wellbeing. We will deliver real value to our membership by:

- innovating our savings proposition, in a low Bank base rate environment, to find new ways to reward members and encourage saving, such as with our prize draw savings accounts;
- delivering a membership proposition that recognizes loyalty by rewarding members;
- building relationships through enhanced products and services; and
- building depth in our core products of mortgages, savings and current accounts.

Growing our base of committed members allows us to bring the benefits of mutuality to a wider population. We measure our performance through our number of committed members. A committed member is one who holds a mortgage or savings account with us (with a balance greater than £5,000 or £1,000 respectively) or who hold their main personal current account with us, plus at least one other product. As at September 30, 2021 we had 3.6 million committed members, with 3.6 million as at April 4, 2021.

Building a national treasure

Our ambition is to be considered a 'national treasure' in British society, by making a difference in our communities and society, and being recognized as a responsible, sustainable and caring provider of financial services. We will continue to leverage the mutual difference that sets our brand apart by:

- leading by example, being an influencer and acknowledged expert in our field;
- leveraging data to provide personalized member insight and propositions; and
- aligning our social investment agenda with our purpose of 'building society, nationwide', through a focus on housing initiatives.

Our brand is the sum of how our members and others perceive us. A strong brand, effective both in digital and traditional media, is essential to attract new members. Our mutual difference and ethic of care has never been more relevant and we are committed to progressing bold initiatives that support our ambition of building society, nationwide. Aligned to this, in 2020, we announced our five Mutual Good Commitments, centred around:

- helping to achieve safe and secure homes for all
- leading the greening of UK homes
- supporting our members' financial wellbeing
- championing thriving communities
- internally reflecting the diversity of our society.

⁷ Institute of Customer Service UK Customer Satisfaction Index (UKCSI) as at July 2021.

Climate change

We realize the impact climate change could have on our members, their homes and wider society, and since 2019, in working towards meeting the requirements of the PRA's Supervisory Statement 3/19 (*Enhancing banks' and insurers' approaches to managing the financial risks from climate change*), we have been enhancing and embedding our capabilities to monitor and manage the impact of climate change. We consider climate change risk to manifest across two main causes, physical and transition risk:

- **Physical risk** – the risk arising from the risks arising from the increasing severity and frequency of climate and weather-related events such as flooding.
- **Transition risk** – the risks which could result from the process of adjustment towards a lower carbon economy such as through developments in policy and regulation, emergence of disruptive technology or business models, shifting societal preferences, or evolving legal interpretations.

We conduct physical risk assessments on properties we lend on at the point of mortgage origination, in line with our lending criteria. This allows different methods of valuation (the automated valuation model, desktop full physical) to be mandated, and informs whether the property is fit for mortgageable purposes and the property's current value.

We use energy performance certificate (**EPC**) data to inform our transition risk assessment and the application of lending policy. An EPC is required every time a property is built, sold or rented and is valid for 10 years; therefore, only around half of our mortgage properties have a current EPC. We have developed an internal model to forecast the EPC ratings of properties within our mortgage portfolio, based on a property's unique characteristics and that of similar properties, for those properties which do not have a valid EPC.

Our purpose of "building society, nationwide" aligns with the need to transition to a net zero economy – to achieve an overall balance between greenhouse gas emissions produced and taken out of the atmosphere. UK homes and the energy they consume account for 21%⁸ of the UK's carbon emissions and many of the homes being built today are still not energy efficient enough to meet the requirements for a net zero economy.

In 2020, we launched our Mutual Good Commitments, which included the ambition to lead the greening of UK homes. To support this, we have the ambition that at least 50% of our mortgage portfolio will have an EPC rating of C or above by 2030. As at December 30, 2020 around 36% of our mortgage portfolio was rated EPC C or above.

In June 2021, we pledged to a Net Zero future by joining the UN-backed Net-Zero Banking Alliance and becoming part of the Glasgow Financial Alliance for Net Zero, helping transition the economy to net zero emissions by 2050. In support of this commitment, we have signed up to the Science-based Target Initiative's (**SBTi**) 1.5-degree Business Ambition. The SBTi set the industry standards for the setting of science-based targets. We have begun the process of exploring setting these science-based targets and developing a transition plan to detail how we intend to achieve them.

We have been carbon neutral for our scope 1 (direct emissions from owned sources such as emissions from our car fleet) and scope 2 (indirect emissions from the generation and consumption of purchased electricity and heating such as the electricity bought by us to power our branches) emissions since April 2020. We have also disclosed our scope 3 (all other indirect emissions that occur in our value chain such as emissions from our mortgage properties) emissions in line with the Partnership for Carbon Accounting Financials' methodology.

Our emissions are detailed in our climate-related financial disclosures, issued alongside our 2020/21 annual report and accounts, and aligned to the recommendations of the Financial Stability Board's Taskforce on Climate-related Financial Disclosures (**TCFD**) and its objective to improve and increase the reporting of climate-related financial information. We have been, and remain, an official supporter of the TCFD since 2019.

⁸ Department for Business, Energy & Industrial Strategy – 2020 UK greenhouse gas emissions, provisional figures – published March 25, 2021

We have made available a £1 billion loan fund for preferential rate mortgages and additional borrowing for new energy efficient properties and green home improvements and have launched:

- a Green Additional Borrowing mortgage product for our members, and a Green Further Advance Mortgage for our TMW customers, to help make energy efficient home improvements; and
- a Green Reward Mortgage product, offering cashback to members who purchase properties with an EPC of A or B.

In support of our Net Zero aims, we continue to develop new and innovative propositions to help combat climate change and have recently launched an end-to-end retrofit pilot scheme, focused on solar, to support members who wish to improve their environment credentials.

In 2021, we further enhanced our internal climate change scenario analysis capabilities and understanding of both the physical and transition climate risks within our balance sheet, through our participation in the PRA's inaugural Climate Biennial Exploratory Scenario. We recognize that we alone cannot improve the energy efficiency of UK homes, which is why we are also working with government and industry to make the greening of UK homes a reality.

HISTORY AND DEVELOPMENT OF THE SOCIETY

Building societies have existed in the United Kingdom for over 200 years. From the outset, they were community-based, cooperative organizations created to help people purchase homes. The main characteristic of building societies is their mutual status, meaning that they are owned by their members, who are primarily retail savings and residential mortgage customers. Our origins date back to the Southern Co-operative Permanent Building Society (1884). Over time, this entity merged with similar organizations to create Nationwide Building Society.

Over the past 30 years, many building societies have merged with other building societies or demutualized and transferred their businesses to existing or specially formed banks. As a result, the number of building societies in the United Kingdom has fallen dramatically over the same period. One consequence of this decrease is that the majority of our competitors are banks. We believe that our mutual status allows us to compete successfully with banks, and it is our strategy to remain a building society.

In 1997, when many of our competitors that were building societies demutualized, we experienced a sharp increase in the number of new UK member retail savings accounts. We believe that many of these accounts were opened because customers expected the Society to demutualize and wanted to receive any associated windfall distributions. At our annual general meeting in 1998, our members voted against a proposal to demutualize and no subsequent motion to demutualize has since been proposed at a general meeting of the Society. In order to prevent the disruption caused by speculative account opening, we have generally required all new members opening accounts since November 1997 to assign to charity any windfall benefits which they might otherwise have received as a result of a future demutualization. As such, a majority of members would not benefit personally from either a demutualization or takeover of Nationwide, significantly lessening the incentive to vote for demutualization or any proposed takeover of the Society by a competitor which is incorporated as a limited liability company.

We have been involved in a number of mergers and acquisitions in recent years. We merged with Portman Building Society in August 2007 and with Cheshire Building Society and Derbyshire Building Society in December 2008. In March and June 2009, we also acquired selected assets and liabilities of Dunfermline Building Society. We believe these developments have added value, improved our distribution footprint, helped to grow the membership and are a testament to our strength and our ability to provide support to other building societies.

During the year ended April 4, 2017 and in line with our core purpose of "building society, nationwide", we decided to exit our offshore deposit taking business in the Isle of Man and also announced the closure of our

Republic of Ireland branch operations. In addition, we have ceased to advance new commercial loans as we have determined that the commercial lending business is no longer a good fit with our core purpose.

GROUP STRUCTURE AND PRINCIPAL SUBSIDIARIES

We are the principal holding entity of the Group and the main business of the Group is conducted by the Society. Our interests in our principal subsidiary undertakings, all of which are consolidated, as at September 30, 2021 are set out below:

<u>100% held subsidiary undertakings</u>	<u>Nature of business</u>
Nationwide Syndications Limited	Syndicated lending
The Mortgage Works (UK) plc	Centralized mortgage lender
Derbyshire Home Loans Limited	Centralized mortgage lender
E-Mex Home Funding Limited	Centralized mortgage lender
UCB Home Loans Corporation Limited	Centralized mortgage lender

All the above subsidiary undertakings are limited liability companies which are registered in England and Wales and operate in the UK and, with the exception of Nationwide Syndications Limited, they are all regulated entities.

Nationwide Syndications Limited is a wholly owned mortgage lender specializing in syndicated commercial loans to RSL. Nationwide Syndications Limited has ceased to offer new lending.

TMW is a wholly owned centralized mortgage lending subsidiary, specializing mainly in residential BTL lending to individuals.

Each of Derbyshire Home Loans Limited, E-Mex Home Funding Limited (“**E-Mex**”) and UCB Home Loans Corporation Limited (“**UCB**”) is a wholly owned subsidiary that has ceased to offer new lending.

We also have interests in structured entities. A structured entity is an entity in which voting or similar rights are not the dominant factor in deciding control. Structured entities are consolidated when the substance of the relationship indicates control.

The table below provides details of these entities as at September 30, 2021.

<u>Group undertaking</u>	<u>Nature of business</u>	<u>Country of registration</u>	<u>Country of operation</u>
Nationwide Covered Bonds LLP	Mortgage acquisition and guarantor of covered bonds	England and Wales	UK
Silverstone Master Issuer plc	Funding vehicle	England and Wales	UK
Silverstone Funding No. 1 Limited	Funding vehicle	England and Wales	UK

BUSINESS OF THE SOCIETY

Retail business

Our retail business aims to offer its customers a full range of personal financial services products comprising residential mortgage lending, a range of savings products as well as investments and general insurance solutions, both directly and through intermediary sales channels.

Residential mortgage lending

The vast majority of our lending portfolio consists of UK residential mortgage loans to individuals. These loans are secured on the residential property of the borrower on terms which allow for repossession and sale of the property if the borrower breaks the terms and conditions of the loan. This lending can take the form of either

prime residential lending (where the borrower is the owner and occupier of the mortgaged property and meets our credit requirements for prime lending) or BTL and legacy residential lending (which are loans advanced to borrowers who intend to let the mortgaged property). Our policy is for all residential mortgage loans to individuals to be fully secured first priority loans on the mortgaged property, to ensure that our claim to the property, in the event of default, is senior to those of other potential creditors. As a result, our residential mortgage lending to individuals carries lower risk than many other types of lending.

As at September 30, 2021, we were the second largest mortgage lender in the United Kingdom (as measured by total loans outstanding and calculated by us based on Bank of England data and publicly available financial information). Our residential mortgages are generally for terms of 20 to 30 years. While many customers remain with us for much or all of this term, some customers redeem their mortgage earlier than this in order to remortgage to another lender or for other reasons. The minimum life of a mortgage is usually between two and five years, depending on the terms of the customer's initial product, although we generally retain approximately 70 to 80% of customers when they reach the end of a product.

The table below shows a breakdown of our prime, BTL and legacy residential mortgage lending outstanding balances as at September 30, 2021.

	As at September 30, 2021
	<i>(£ billions)</i>
Prime.....	151.6
BTL and legacy ⁽¹⁾	42.7
Total.....	194.3

Note:

(1) This category of lending was previously referred to as specialist lending.

Source: Nationwide Building Society – unaudited financial statements for the six months ended September 30, 2021.

We offer BTL UK residential mortgage lending to individuals, comprising lending to private landlords (BTL) and have smaller legacy mortgage portfolios in run-off. As at September 30, 2021, our outstanding BTL and legacy UK residential mortgage lending to individuals was £42.7 billion. The BTL and legacy residential mortgage balance is made up of advances made through our specialist lending brands, including TMW. Our outstanding legacy lending loans were advanced primarily in the BTL and self-certification markets. New lending in this category is restricted to BTL through TMW with us having withdrawn from the self-certified lending market in 2009.

Arrears performance has improved during the period, with cases more than three months in arrears at 0.37% of the total portfolio (April 4, 2021: 0.43%). This improvement is expected to be temporary, with levels likely to have been suppressed by government support measures. An increase in arrears from current levels is expected over the medium term. Impairment provision balances have decreased to £273 million (April 4, 2021: £317 million) due to an improvement in the economic outlook reflected in the economic scenarios and changes to weightings used to model expected credit losses.

We have a national franchise within the United Kingdom, with a regional distribution of UK residential mortgage lending to individuals generally matching the regional gross domestic product distribution in the United Kingdom.

The table below shows the geographical distribution of our UK residential mortgage loans as at September 30, 2021.

	UK residential mortgage lending to individuals as at September 30, 2021

We offer fixed rate and tracker rate mortgages. These products establish a set rate or set methodology for determining a variable rate for a set term, after which the rate reverts to one of our two general variable rates. Our fixed-rate products currently offer a term of two, three, four, five or ten years, but we have from time to time offered longer fixed terms, including 25 years. Our tracker rate products bear interest during the set term (currently two or three years) at a variable rate that is a fixed percentage above the Bank of England base rate. After the end of the set fixed rate or tracker period, the interest rate reverts to either our BMR (if the mortgage was originated on or before April 29, 2009) or our SMR (if the mortgage was originated on or after April 30, 2009). Both the BMR and the SMR are variable rates set at our discretion, except that the BMR is guaranteed not to be more than 2% above the Bank of England base rate.

To reduce the costs associated with early repayment of mortgages and to recover a portion of the costs of mortgage incentives, we impose early repayment charges on some products. The early repayment charges generally apply to repayment made prior to the expiration of the fixed or tracker rate for the particular product.

Total gross mortgage lending in the period was £18.2 billion (September 30, 2020: £12.7 billion) as the housing market was both incredibly buoyant and highly competitive during the last six months, due to pent-up demand and the stamp duty holiday. Our market share of gross lending (flow) was 11.4% (September 30, 2020: 12.0%). Total mortgage net lending was £3.2 billion (September 30, 2020: £1.6 billion). We supported over 30,000 (September 30, 2020: 21,000) first time buyers, offering high loan to value (“LTV”) mortgages and introducing our Helping Hand mortgage, to help more people onto the housing ladder. We became the largest mortgage provider to reintroduce 95% LTV lending without government support, and in October 2021 we were the first major lender to sign up to Deposit Unlock, a proposition to help buyers with small deposits access higher LTV mortgages on new build homes.

Total gross mortgage balances grew to £194.3 billion (April 4, 2021: £191.0 billion). Strong buy to let mortgage lending resulted in our buy to let and legacy mortgage balances growing to £42.7 billion (April 4, 2021: £41.2 billion). Prime mortgage balances increased to £151.6 billion (April 4, 2021: £149.8 billion).

The average LTV of prime new business completed in the period has stayed stable at 71% (September 30, 2020: 71%). The average LTV of new business for buy to let stayed broadly stable at 67% (September 30, 2020: 66%). Nationwide withdrew from 95% LTV lending in the wake of the pandemic whilst tighter controls were also employed at 85% to 90% LTV due to uncertainty regarding the immediate economic outlook, particularly with respect to house prices and levels of unemployment. This reduced the proportion of lending at 85% LTV and above to 12% (September 30, 2020: 18%). However, the average has remained stable due to a higher concentration of lending at 75% to 85% LTV which increased to 27% (September 30, 2020: 19%).

We believe that asset quality has remained strong as a result of our continued prudent approach to lending. The proportion of mortgage accounts three months or more in arrears has decreased slightly to 0.37% as at September 30, 2021, which compares favorably with the UK Finance average of 0.78% as at the same date.

The table below shows our residential mortgage loans which are three months or more in arrears as a percentage of our total residential mortgage loans as at each of September 30, 2021 and as at April 4, 2021, 2020 and 2019 and the UK Finance average .

	As at September 30,	As at April 4,		
	2021	2021	2020	2019
<i>(percentages)</i>				
Prime	0.32	0.35	0.33	0.35
BTL and legacy	0.57	0.72	0.74	0.82
Total	0.37	0.43	0.41	0.43
UK Finance average	0.78	0.85	0.74	0.79

Source: Audited financial statements for the years ended April 4, 2021, 2020 and 2019 and unaudited financial statements for the six months ended September 30, 2021.

In line with regulatory guidance, the arrears figures above do not take into account payment holidays that we afforded to our borrowing members in the context of the Covid-19 pandemic. This approach has suppressed the impact of the pandemic on arrears data, and will continue to do so in the short term. We continue to monitor developments and updated regulatory guidance on the assessment of payment holidays and other forbearance measures in this context.

We utilize an automated credit scoring system to assist in minimizing credit risk on residential mortgage lending. Our credit procedures for residential mortgage lending take into account the applicant’s credit history, loan-to-value criteria, income multiples and an affordability calculation, or shock test, that tests the applicant’s ability to service the loan at higher interest rates. For additional information regarding how we manage credit risk in connection with new lending, see “*Financial Risk Management—Credit risk.*”

We focus our residential mortgage sales efforts on first-time buyers, subsequent purchasers moving home and the remortgage market. We are particularly keen to support our existing members and have introduced products to support first-time buyers. First-time buyers offer a significant potential for additional sources of income through the distribution of insurance and personal investment products. The proportion of new lending to first time buyers increased to 29% during the six months ended September 30, 2021 (six months ended September 30, 2020: 27%). We supported over 30,000 (six months ended September 30, 2020: 21,000) first time buyers, offering high loan to value (LTV) mortgages and introducing our Helping Hand mortgage, to help more people onto the housing ladder.

In addition to residential mortgage loans, we offer further secured advances on existing mortgaged property to customers consistent with our lending criteria for new residential mortgage loans.

Unsecured retail banking products consists of loans that we make to individuals that are not secured on real or personal property. We offer three different forms of unsecured consumer retail banking products: personal unsecured loans, credit card lending and current accounts with overdraft facilities.

There is a greater risk of loss on unsecured consumer lending than there is on residential mortgage lending because we have no security if the borrower defaults on the loan. Accordingly, unsecured consumer lending products bear higher interest rates than our residential mortgage products. To manage this risk, we use an

automated credit scoring system that is designed to evaluate a borrower's ability to repay the loan. In addition, we assess all unsecured consumer loans to ensure they remain affordable alongside any mortgage.

Savings and Current accounts

Member deposit balance growth of £7.1 billion (six months ended September 30, 2020: £1.3 billion) to £177.4 billion (April 4, 2021: £170.3 billion) represents growth in retail savings balances of £4.2 billion and current account credit balances of £2.9 billion. Balance growth has been supported by competitive products such as the Member Exclusive Fixed Rate ISA and Triple Access Online Saver and forced saving balances built up during the start of the period before pandemic related restrictions were eased. This has contributed to a strengthening of our deposit stock market share to 9.6% (April 4, 2021: 9.4%).

UK retail member deposits represented 62% of our total liabilities and reserves as at September 30, 2021.

We provide a wide range of retail savings products that may be repayable on demand or on notice and which may pay a variable or fixed rate of interest. On most retail savings products, we determine variable interest rates at our discretion according to market conditions. Generally, the more restrictions on withdrawal of retail savings, the higher the rate of interest. Balances on all of our notice deposit accounts are, by their terms, withdrawable on demand but, in some cases, subject to loss of interest.

We believe that the primary determinant for attracting retail savings is the interest rate offered to savers. As a mutual organization, we typically set higher interest rates on our retail savings products than those set by our main competitors. We gather UK retail member deposits from a number of sources, chiefly from our branch network but also by mail and internet-based deposit accounts.

The UK retail savings market is highly competitive among building societies and banks, including those banks owned by insurance companies and retailers. This competition has increased the relative cost of retail funds, especially new retail funds.

Our retail business also manages a range of business savings accounts that are offered to UK-domiciled small- and medium-sized enterprises, including companies, housing associations, charities and educational organizations. We provide a wide range of savings products that may be repayable on demand or on notice and which may pay a variable or fixed rate of interest. On all business savings products, we determine variable interest rates at our discretion according to market conditions. Generally, the more restrictions on withdrawal of business savings, the higher the rate of interest.

Switching incentives helped grow the number of current accounts to 8.7 million (April 4, 2021: 8.5 million), increasing our market share to 10.3% (February 2021: 10.2%).

Consumer Banking

Consumer banking balances have increased to £4.7 billion (April 4, 2021: £4.4 billion). Consumer banking comprises personal loan balances of £3.0 billion (April 4, 2021: £2.8 billion), credit card balances of £1.5 billion (April 4, 2021: £1.4 billion) and overdrawn current account balances of £0.2 billion (April 4, 2021: £0.2 billion). The increase in balances has been driven by the gradual lifting of pandemic restrictions across the period increasing the market demand for consumer credit.

Other retail services

Our other retail services principally comprise insurance business and investment business.

Insurance

In conjunction with our core business of providing residential mortgage loans and retail savings, we develop and market insurance products branded with our name that are underwritten by third-party insurers and distribute insurance products of other companies.

The insurance products that we market are:

- buildings and contents insurance, which we market to our residential mortgage customers and non-mortgage customers;
- landlord insurance;
- term income protection insurance, replacing up to 60% of gross income in case of unemployment; and
- personal accident insurance.

We typically use leading insurers as third-party underwriters for these insurance products. We receive a commission and, in some cases, participate in the profits, but not the losses, from third-party underwritten insurance products that we market. We generally market our insurance products to new and existing customers, and it is our policy to offer insurance products at competitive prices and with more comprehensive coverage than those products generally offered by our main competitors.

Distribution network

Our integrated and diversified distribution network allows our customers to choose how and when to undertake their transactions with us and has enabled us to expand our business while controlling costs. The distribution network helps us to achieve volume growth principally in residential mortgage lending and supports our retail funding activities. Developments in the network have focused on cost efficiency and meeting the needs of customers who are increasingly prepared to transact business by the internet, telephone and mail.

We distribute our products primarily through:

- branches;
- call centers;
- mail;
- internet and mobile banking; and
- intermediaries.

We also maintain a network of ATMs.

Branches

Our branch network continues to be a major source of our mortgage lending and retail funding. As at September 30, 2021, we had approximately 629 branches of Nationwide Building Society in the United Kingdom

Our goal is to utilize our branch network efficiently. All of our branches market our residential mortgage, retail savings, personal lending, personal investment and insurance products. We continue to make significant investment in transforming our products and delivery channels through the implementation of new systems and organizational structures and to meet consumer expectations of digital banking.

Call centers

Our telephone call centers are open 24 hours a day to service customers and receive calls from potential customers that are interested in our products. In addition, we use telemarketing to supplement our mortgage, insurance and personal loan marketing.

Internet and mobile banking

We first launched an internet banking service in 1997 and have continued to update the service in line with technological advances and increasing customer expectations. Our website allows customers to transact on their accounts and apply for a broad range of our products online. We also allow customers to access and carry out transactions on their accounts using our mobile and tablet applications.

Intermediaries

A substantial amount of our mortgage sales are introduced to us by third-party intermediaries. Intermediaries range from large UK insurance companies to small independent mortgage advisors. We remunerate intermediaries for introducing mortgage business.

ATMs

Our customers have access to our own network of ATMs, as well as access to ATMs in the United Kingdom through the LINK network and world-wide through the Visa network.

Commercial business

Our commercial portfolio comprises loans which have been provided to meet the funding requirements of registered social landlords, commercial real estate investors and project finance initiatives. As at September 30, 2021, this portfolio accounted for 3% of total loans and advances to customers. Following a strategic review of the commercial lending business, we concluded that the CRE and PFI lending is no longer a good fit with our core purpose. The strategy for CRE and PFI lending is now to hold and actively manage the portfolios to maturity in line with contractual terms.

The table below shows the amount and types of loans in the commercial lending portfolio as at September 30, 2021.

	As at September 30, 2021	
	<i>(£ billions)</i>	<i>(percentage of total commercial loans)</i>
Registered social landlords	4.6	77.6
Commercial real estate.....	0.7	11.6
Project finance	0.6	10.8
Total	5.9	100

RSL loans are made to UK registered social landlords, are secured on residential property and differ significantly from other loans secured on real property. UK registered social landlords provide affordable housing supported by Government grants. This portfolio historically has carried a lower risk than our other commercial lending activities, and there are currently no arrears of three months or more in the RSL portfolio. To date, we have not needed to raise any loss provisions against this portfolio.

CRE portfolio is well diversified by industry type and by borrower, with no significant exposure to development finance.

PFI loans are secured on cash flows from Government-backed contracts such as schools, hospitals and roads under the UK private finance initiative legislation. We have not suffered any losses on this lending and there are currently no arrears of three months or more.

Head office functions

Our head office functions comprise the executive management and the treasury function together with a range of support functions such as legal and secretariat services, human resources, strategic planning and external relations, finance, risk management, property services and internal audit.

The treasury division centrally manages liquid asset portfolios as well as most of financial risk exposures and is responsible for wholesale funding activities. See the sections entitled “*Financial Risk Management*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*”.

Recent developments

Support for our members

We are seeking to support our members with a range of measures in light of Covid-19, including offering mortgage payment holidays (which, in accordance with regulatory guidance, have not been included within the forbearance population and do not automatically have an impact on the reported staging balances). In addition to an initial offer of three-month mortgage payment holidays in the early stages of the outbreak, we have announced our Home Support Package, which includes:

- for members with a Nationwide mortgage, a choice of either flexibility in mortgage payments (such as making reduced payments for a time) or the option to take a new mortgage payment break of up to a further three months;
- for members who have fallen into arrears because of the financial impact of Covid-19 and who continue to work with us to help get their mortgage back on track, a commitment not to take any action to repossess their home before May 31, 2021;
- to support those who rent, encouraging landlords who have a buy to let mortgage with us to pass on payment breaks to tenants; and
- increased provision of housing advice and support, as well as providing extra funding to Shelter (with which we have a longstanding partnership) to help pay for more people to take calls on their helplines, and supporting the introduction of new Shelter community engagement officers to provide community outreach for those people who struggle to access support.

Furthermore and in light of the Covid-19 pandemic, we are conscious there is the potential for a great deal of anxiety for our employees about health and livelihoods. To reduce anxiety, and in line with our values, we introduced a number of promises to our employees including, notably, a commitment not to make any compulsory redundancies during 2020.

SELECTED STATISTICAL INFORMATION

The following information has been extracted from our management information systems. This information is unaudited. The information contained in this section should be read in conjunction with our consolidated financial statements as well as the section entitled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations.*”

Average Balance Sheets and Interest Rates

The tables below present, in accordance with IFRS, the average balances for our interest-earning assets and interest-bearing liabilities together with the related interest income and expense amounts, resulting in the presentation of the average yields and rates for the years ended April 4, 2021, 2020 and 2019, respectively:

	For the year ended April 4, 2021		
	Average balance⁽¹⁾	Interest⁽²⁾	Average yield/ rate
	<i>(£ million, except percentages)</i>		
Interest-earning assets:

Average Net Interest Margin and Spread

The following tables show our average interest-earning assets, average interest-bearing liabilities and net interest income and illustrate the comparative net interest margin and net interest spread for the years ended April 4, 2021, 2020 and 2019, respectively:

	As at April 4, 2021
	<i>(£ million, except percentages)</i>
Net average interest-earning assets	255,698
Net average interest-bearing liabilities	245,254
Net interest income ⁽¹⁾	3,146
Average yield on average interest-earning assets	1.61%
Average rate on average interest-bearing liabilities	0.40%
Net interest spread ⁽²⁾	1.21%
Net interest margin ⁽³⁾	1.23%

Notes:

- (1) Defined as total interest income less total interest expense.

- (2) Defined as the difference between the average yield on interest-earning assets and the average rate on interest-bearing liabilities.
(3) Defined as net interest income divided by weighted average interest-earning assets.

As at April 4, 2020	
<i>(£ million, except percentages)</i>	
Net average interest-earning assets	244,026
Net average interest-bearing liabilities	233,978
Net interest income ⁽¹⁾	2,810
Average yield on average interest-earning assets	2.10%
Average rate on average interest-bearing liabilities	0.99%
Net interest spread ⁽²⁾	1.11%
Net interest margin ⁽³⁾	1.15%

Notes:

- (1) Defined as total interest income less total interest expense.
(2) Defined as the difference between the average yield on interest-earning assets and the average rate on interest-bearing liabilities.
(3) Defined as net interest income divided by weighted average interest-earning assets.

As at April 4, 2019	
<i>(£ million, except percentages)</i>	
Net average interest-earning assets	235,413
Net average interest-bearing liabilities	224,109
Net interest income ⁽¹⁾	2,915
Average yield on average interest-earning assets	2.17%
Average rate on average interest-bearing liabilities	0.98%
Net interest spread ⁽²⁾	1.19%
Net interest margin ⁽³⁾	1.24%

Notes:

- (1) Defined as total interest income less total interest expense.
(2) Defined as the difference between the average yield on interest-earning assets and the average rate on interest-bearing liabilities.
(3) Defined as net interest income divided by weighted average interest-earning assets.

Changes in Interest Income and Expenses – Volume and Rate Analysis

The following table allocates the changes in our interest income and expense between changes in average volume and changes in the average rates for the year ended April 4, 2021 compared to the year ended April 4, 2020. We calculated volume and yield/rate variances based on movements of average balances over the period and changes in average interest yields/rates on interest-earning assets and interest-bearing liabilities. The net change attributable to changes in both volume and rate has been allocated in line with the amounts derived for pure rate and volume variances. Pension interest income and expense has been excluded from the table as the assets and liabilities to which they relate are held net on the balance sheet. More information on the net pension liability can be found in our audited consolidated financial statements incorporated by reference herein:

Year ended April 4, 2021 compared to year ended April 4, 2020

Note:

- (1) Interest income and expense amounts are stated after allocation of interest on financial instruments entered into for hedging purposes.

The following table allocates the changes in our interest income and expense between changes in average volume and changes in the average rates for the year ended April 4, 2019 compared to the year ended April 4, 2018. We calculated volume and yield/rate variances based on movements of average balances over the period and changes in average interest yields/rates on interest-earning assets and interest-bearing liabilities. The net change attributable to changes in both volume and rate has been allocated in line with the amounts derived for pure rate and volume variances. Pension interest income and expense has been excluded from the table as the assets and liabilities to which they relate are held net on the balance sheet. More information on the net pension liability can be found in our audited consolidated financial statements incorporated by reference herein:

Total	25,473	20,004	16,234

Loan Portfolio

As at April 4, 2021 total loans to customers excluding fair value adjustments for hedge accounting, including accrued interest, were £200,894 million, representing 78.8% of our total assets. Our loan portfolio net of allowances has increased by 0.3% during the last year from £204,614 million as at April 4, 2020 to £205,207 million as at April 4, 2021.

The following table summarizes our loan portfolio, net of allowances, as at April 4, 2021, 2020 and 2019, respectively:

	As at April 4,		
	2021	2020	2019 ⁽¹⁾
	(£ million)		
Residential mortgage loans	149,681	151,084	151,473
Buy to let and legacy residential mortgages	41,025	37,503	34,333
Consumer banking.....	3,902	4,500	4,168
Commercial Lending	6,286	7,150	8,194
Total loans to customers	200,894	200,237	198,168
Fair value adjustment for micro hedged risk ⁽²⁾	653	741	883
Loans and advances to banks.....	3,660	3,636	4,009
Total	205,207	204,614	203,060

Notes:

- (1) Figures have been adjusted to reflect the impact of applying IFRS 9: "Financial Instruments" from April 5, 2018. Further information is provided in note 1 to our audited consolidated financial statements as of and for the year ended April 4, 2019.

(2) Under IFRS the carrying value of the hedged item is adjusted for the change in value of the hedged risk.

The following table presents the contractual maturity distribution for repayment for the loan portfolio held by us as at April 4, 2021:

	As at April 4, 2021					Total ⁽¹⁾
	Due in less than 1 month	Due in 1 month to 3 Months	Due in 3 months to 1 year	Due in 1 year to 5 years	Due after 5 years	
	(<i>£ million</i>)					
Loans and advances to customers.....	2,616	1,515	6,520	31,821	159,075	201,547
Loans and advances to banks...	2,815	—	—	—	845	3,660
Total Loans portfolio net of impairment provisions.....	5,431	1,515	6,520	31,821	159,920	205,207

Note:

(1) The maturity analysis is produced on the basis that where a loan is repayable by installments, each installment is treated as a separate repayment.

Loans in Arrears

Loans in arrears refer to amounts that are unpaid at their contractual date. A customer is in arrears when they are behind in fulfilling their obligations such that an outstanding loan payment is overdue. Such a customer can also be said to be in a state of delinquency. When a customer is in arrears, the entire outstanding balance is said to be delinquent, meaning that delinquent balances are the total outstanding loans on which payments are overdue.

The following tables show the payment status of all residential mortgages as at April 4, 2021 and 2020:

	As at April 4, 2021				As at April 4, 2020			
	Prime	Buy to let and legacy	Total	%	Prime	Buy to let and legacy	Total	%
<i>(Audited)</i>	(<i>£ million</i>)				(<i>£ million</i>)			
Not past due.....	148,285	40,460	188,745	98.8	149,387	36,684	186,071	98.5
Past due 0 to 1 month.....	842	278	1,120	0.6	1,062	356	1,418	0.8
Past due 1 to 3 months.....	259	159	418	0.2	311	307	618	0.3
Past due 3 to 6 months.....	149	121	270	0.2	177	142	319	0.2
Past due 6 to 12 months.....	113	108	221	0.1	112	109	221	0.1
Past due over 12 months.....	123	113	236	0.1	82	81	163	0.1
Possessions.....	3	10	13	-	9	20	29	-
Total residential mortgages.....	149,774	41,249	191,023	100	151,140	37,699	188,839	100

The proportion of loans more than three months in arrears has remained stable at 0.43% (April 4, 2020: 0.41%) and arrears levels remain low across prime and specialist lending, reflecting the low interest rate environment, supported by robust credit assessment and affordability controls at the point of lending. In total, £352 million (April 4, 2020: £352 million) of buy to let and legacy balances were more than 3 months past due or in possession, which includes the impact of the change in the treatment of arrears on deceased accounts described above.

As at April 4, 2021, the mortgage portfolios include 2,151 (2020: 1,556) mortgage accounts, including those in possession, where payments were more than 12 months in arrears. The total principal outstanding in these cases was £245 million (2020: £181 million), and the total value of arrears was £29 million (April 4, 2020: £22 million) or 0.02% (April 4, 2020: 0.01%) of total mortgage balances.

We are providing support to customers who have been financially affected by Covid-19. Payment holidays granted in this respect will suppress the impact of the pandemic on arrears in the short term.

The following table shows the payment status of all residential mortgages as at April 4, 2020 and April 4, 2019:

	As at April 4, 2020			As at April 4, 2019		
	Prime	Specialist	Total	Prime	Specialist	Total

(Audited)	(£ million)		%		(£ million)		%	
Not past due	149,387	36,684	186,071	98.5	149,771	33,468	183,239	98.5
Past due up to 3 months	1,062	356	1,418	0.8	1,356	657	2,013	1.1
Past due 3 to 6 months	311	307	618	0.3	177	159	336	0.2
Past due 6 to 12 months	177	142	319	0.2	122	121	243	0.1
Past due over 12 months	112	109	221	0.1	84	69	153	0.1
Possessions	82	81	163	0.1	7	21	28	—
Total	9	20	29	—	151,517	34,495	186,012	100

The proportion of loans in arrears remained stable at 1.5% as at April 4, 2020 (April 4, 2019: 0.43%) and arrears levels remain low across prime, buy to let and legacy lending, reflecting the favorable economic conditions and low interest rate environment, supported by robust credit assessment and affordability controls at the point of lending.

Loan Loss Experience

We assess at each balance sheet date whether, as a result of one or more events that occurred after initial recognition, there is objective evidence that a financial asset or group of financial assets is impaired. Evidence of impairment may include indications that the borrower or group of borrowers are experiencing significant financial difficulty, default or delinquency in interest or principal payments or the debt being restructured to reduce the burden on the borrower.

We first assess whether objective evidence of impairment exists either individually for assets that are separately significant or individually or collectively for assets that are not separately significant. If there is no objective evidence of impairment for an individually assessed asset it is included in a group of assets with similar credit risk characteristics and collectively assessed for impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate. The resultant provisions have been deducted from the appropriate asset values in the balance sheet.

The methodology and assumptions used for estimating future cash flows are reviewed regularly by us to reduce any differences between loss estimates and actual loss experience.

The following table sets forth the movement in our allowances for loan losses for the year ended April 4, 2021:

Group	Reconciliation of movements in gross balances and impairment provisions								
	Non-credit impaired				Credit impaired ⁽¹⁾			Total	
	Subject to 12 month ECL		Subject to lifetime ECL		Subject to lifetime ECL				
	Stage 1		Stage 2		Stage 3 end POCL

April 4, 2021 ⁽⁷⁾	187,839	116	11,868	388	1,919	348	201,626	852
Net carrying amount ⁽⁷⁾		187,723		11,480		1,571		200,774

Notes:

- (1) Group gross balances of credit impaired loans include £148 million (2020: £155 million) of purchased or originated credit impaired (POCI) loans, which are presented net of lifetime ECL impairment provisions of £5 million (2020: £6 million).
- (2) At April 4, 2020, an additional provision for credit losses of £101 million was recognised to reflect the estimated impact of the Covid-19 pandemic on ECLs. At April 4, 2020, this additional provision was not allocated.
- (3) The remeasurement of provisions arising from a change in stage is reported within the stage to which the assets are transferred.
- (4) If a new asset is generated in the month, the value included is the closing gross balance and provision for the month. All new business written is included in Stage 1.
- (5) This comprises further lending and capital repayments where the asset is not derecognised. The value for gross balances is calculated as the closing gross balance for the month less the opening gross balance for the month. The value for provisions is calculated as the change in exposure at default (EAD) multiplied by opening provision coverage for the month.
- (6) This comprises changes in risk parameters, and changes to modelling inputs and methodology. The provision movement for the change in risk parameters is calculated for assets that do not move stage in the month.
- (7) For any asset that is derecognised in the month, the value disclosed is the provision at the start of that month.

The following table sets forth our impairment provisions for the years ended April 4, 2021, 2020 and 2019:

Impairment provisions

	2021	2020	2019⁽¹⁾

Deposits

The following table sets out the average balances and average interest rates for each deposit type for the year ended April 4, 2021:

	For year ended April 4, 2021	
	Average balance	Average rate paid
	<i>(£ million, except percentages)</i>	
UK retail member deposits	163,201	0.30%
Other customer deposits and amounts due to banks ⁽¹⁾	35,895	0.11%

Note:

(1) Amounts owed to other customers include time deposits, call deposits and retail deposits that do not grant “member” status.

The following table sets out the average balances and average interest rates for each deposit type for the year ended April 4, 2020:

	For year ended April 4, 2020	
	Average balance	Average rate paid
	<i>(£ million, except percentages)</i>	
UK retail member deposits	157,140	0.86%
Other customer deposits and amounts due to banks ⁽¹⁾	26,995	0.72%

Note:

- (1) Amounts owed to other customers include time deposits, call deposits and retail deposits that do not grant “member” status.

The following table sets out the average balances and average interest rates for each deposit type for the year ended April 4, 2019:

	For year ended April 4, 2019	
	Average balance	Average rate paid
	<i>(£ million, except percentages)</i>	
UK retail member deposits	152,926	0.87%
Other customer deposits and amounts due to banks ⁽¹⁾	27,153	0.62%

Note:

- (1) Amounts owed to other customers include time deposits, call deposits and retail deposits that do not grant “member” status.

Maturity of Deposits

The following table shows the maturity analysis of time deposits over \$100,000 and certificates of deposit as at April 4, 2021:

	As at April 4, 2021			
	Time deposits	Certificates of deposit	Total	(%)
	<i>(£ million, except percentages)</i>			
Less than 3 months	214	76	290	79
3 months to 6 months	59	5	64	18
6 months to 1 year.....	12	—	12	3
Over 1 year	—	—	—	—
Total	285	81	366	100

Return on Assets

The following table represents net income as a percentage of total average assets:

	For the year ended April 4,		
	2021	2020	2019
	<i>(£ million, except percentages)</i>		
Net income ⁽¹⁾	618	365	618
Total average assets ⁽²⁾	260,500	248,545	238,368
Return on total average assets.....	0.24%	0.15%	0.26%

Notes:

- (1) Net income represents profit for the financial year after tax.
(2) Total average asset is based on the total assets as of the end of each month during the financial year.

As a mutual organization, we are managed for the benefit of our members, primarily our retail savings and residential mortgage customers, rather than for equity shareholders. We return value to our members by offering generally higher interest rates on savings and lower interest rates on loans than those offered by our main competitors. As a result, we typically earn lower profits than our main competitors, which are typically banks or other non-mutual organizations. However, most of our net earnings are put into reserves and constitute Tier 1 capital for our capital adequacy requirements.

We have not presented any information regarding returns on equity because, as a mutual organization, we do not have equity.

FINANCIAL RISK MANAGEMENT

Strategy in using financial instruments

Financial instruments incorporate the vast majority of our assets and liabilities, both on a Group level and for the Society. Given the dominant position of the Society within the Group structure, the term ‘Group’ is used in the remainder of this note to cover the activities of both Group and Society.

We accept deposits from customers at fixed and variable interest rates for various periods and seek to earn an interest margin by investing these funds in high quality assets, predominantly mortgages. The principal risks which arise from this core activity, and which need to be managed by Nationwide, are interest rate risk (including basis risk), currency risk, credit risk and liquidity and funding risks.

All risks are monitored and managed within the Enterprise Risk Management Framework (“**ERMF**”). The ERMF comprises a Board-approved risk appetite, detailed risk management frameworks (including policies and supporting documentation), and independent governance and oversight functions.

We use derivative instruments to manage various aspects of risk. However, in doing so we comply with the UK Building Societies Act in relation to the use of derivatives for the mitigation of consequences arising from changes in interest rates, exchange rates or other factors defined by the Act.

Derivatives

Our risk management approach is to use interest rate and currency derivatives to economically hedge the fair value of fixed rate assets and liabilities. The market risk from fixed rate assets and liabilities may be netted down before deciding to use derivatives. The derivatives used are predominantly interest rate swaps, which convert fixed rate cash flows to a benchmark floating rate such as LIBOR, SOFR or SONIA, and cross currency swaps which convert foreign currency cash flows to GBP cash flows. In addition, bond forwards are used to reduce swap spread risk within the investment securities portfolio and inflation swaps are used to economically hedge contractual inflation risk within investment securities.

While our derivative financial instruments are held for risk mitigation purposes, not all of these derivatives are designated as hedging instruments as defined by IFRS 9.

The following table describes the significant activities we have undertaken, the risks associated with such activities and the types of derivatives which are used in managing such risks. Such risks may alternatively be managed using cash instruments as part of an integrated approach to risk management:

Activity	Risk	Type of derivative instrument used
Savings products and funding activities involving instruments which are fixed rate or which have embedded options	Sensitivity to changes in interest rates and inflation risk including differential between Base Rate and LIBOR/SOFR/SONIA or inflation risk	Interest rate swaps including basis swaps, interest rate futures, swaptions, forward rate agreements and inflation swaps
Mortgage lending and investment activities involving instruments which are fixed rate or which include explicit or embedded options	Sensitivity to changes in interest rates, including differential between Base Rate and LIBOR/SOFR/SONIA and inflation risk.	Interest rate swaps including basis swaps, interest rate futures, swaptions, caps, collars, forward rate agreements
Investment and funding in foreign currencies	Sensitivity to changes in foreign exchange rates	Cross-currency swaps, FX swaps, foreign exchange transactions

The accounting policy for derivatives and hedge accounting is described in the Statement of Accounting Policies. Where possible, we apply hedge accounting to derivatives in order to reduce accounting volatility. We currently uses two of the three types of hedge accounting permitted by IFRS 9: fair value hedge accounting and cash flow hedge accounting, but not hedging of a net investment in a foreign operation.

The Board and the ALCO are responsible for setting certain parameters respectively over our exposure to interest rates, foreign exchange rates and other indices. The Credit Committee sets our credit policy and regularly monitors and reviews credit exposures arising in all aspects of Group operations, including derivatives. All risk committees are overseen by the Executive Risk Committee, while the Board Risk Committee provides oversight of the risk framework for Nationwide including governance.

All exchange-traded instruments are subject to cash requirements under the standard margin arrangements applied by the individual exchanges. Such instruments are not subject to significant credit risk. Credit exposures arising on derivative contracts with certain counterparties are collateralized (e.g. with cash deposits), to mitigate credit exposures. To comply with EU regulatory requirements, we, as a direct member of a central counterparty (CCP), have central clearing capability which we use to clear standardized derivatives. Where derivatives are not cleared at a CCP they are transacted under the International Swaps and Derivatives Association (ISDA) Master Agreement.

Each of the principal financial risks to which we are exposed (interest rate, credit, foreign exchange, liquidity and funding risk) is considered below.

Interest rate risk

Our main market risk is interest rate risk. Market movements in interest rates affect the interest rate margin realized from lending and borrowing activities.

To reduce the impact of such movements, hedging activities are undertaken by our Treasury function. For example, interest rate risks generated by lending to and receiving deposits from customers are offset against each other internally where possible. The remaining net exposure is managed using derivatives, within parameters set by ALCO.

In addition to primary lending and borrowing activities, income volatility arising from certain rate insensitive products (including reserves and CCDS) are structurally hedged.

Our interest rate risk is measured using a combination of value-based assessments and earnings sensitivity assessments.

The VaR model incorporates risk factors based on historic interest rate and currency movements. A 10-day horizon and a 99% confidence level is typically used in day to day VaR monitoring. VaR is used to monitor interest rate, swap spread, currency and product option risks and is not used to model income. Exposures against limits are reviewed daily by management. Actual outcomes are monitored on an ongoing basis by management to test the validity of the assumptions and factors used in the VaR calculation. The values reported below are on the same basis as those used internally.

Although VaR is a valuable risk measure, it needs to be viewed in the context of the following limitations which may mean that exposures could be higher than modeled:

- The use of a 99% confidence level, by definition, does not take account of changes in value that might occur beyond this level of confidence;
- VaR models often under-predict the likelihood of extreme events and over-predict the benefits of offsetting positions in those extreme events;
- The VaR model uses historical data to predict future events. Extreme market moves outside of those used to calibrate the model will deliver exceptions. In periods where volatility is

increasing, the model is likely to under-predict market risks and in periods where volatility is decreasing it is likely to over-predict market risks;

- Historical data may not adequately predict circumstances arising from government interventions and stimulus packages, which increase the difficulty of evaluating risks.

To seek to mitigate these limitations, backtesting of the VaR model is undertaken regularly to ensure that the model is appropriate. This process compares actual performance against the estimated VaR numbers. An exception is created when a loss occurs that is greater than the VaR on any given day. The chart below shows the results of this backtesting. The loss exceptions seen were all driven by significant movements in market rates, most notably in the period leading up to year end with the unprecedented events causing three exceptions in as many weeks. The dynamic recalibration of the VaR model has increased the VaR model output following the incorporation of the period of heightened market volatility caused by Covid-19. In 2019/20, the backtesting and broader model governance did not highlight any model deficiencies.

To evaluate the potential impact of more extreme but plausible events or movements in a set of financial variables, the standard VaR metric is supported with sensitivity and stress analysis.

For example, for interest rate risk exposures, the standard PV01 sensitivity analysis is supplemented by stressed sensitivity measures. A more severe 200 basis point (2.0%) parallel shift in interest rates is calculated in a similar manner to PV01; this sensitivity analysis is known as PV200. PV200 numbers are monitored daily.

In addition, stressed VaR is used to estimate the potential loss arising from unfavorable market movements in a stressed environment. It is calculated in the same way as standard VaR, calibrated over a two year period and on a 99% 10-day basis but uses market data from a period of significant financial stress.

The table below highlights our limited exposure to interest rate risk, shown against a range of value-based assessments. These sensitivities do not include retail product behavioral changes, which are captured by other measures.

	For the year ended April 4, 2021			For the year ended April 4, 2020		
	Average	High	Low	Average	High	Low
	<i>(£ million)</i>					
VaR (99%/10-day) (<i>audited</i>)	1.3	4.5	0.4	1.3	4.2	0.4
Sensitivity analysis (PV01) (<i>audited</i>)	(0.0)	0.1	(0.1)	0.0	0.1	0.0.
Stress testing (PV200: all currencies)	16.1	40.5	(15.5)	6.1	22.6	(14.1)

Earnings sensitivity assessments are also used to measure the risk that income is adversely impacted by changes in interest rates. These techniques apply rate shocks to the rates paid on liabilities and to the rates earned on assets and the impact on earnings is calculated. The absolute levels of interest rates can influence the flexibility to manage earnings. Illustratively, if interest rates were to fall or become negative, margins may be constrained because it is unlikely that the benefit to borrowers can be fully offset through current account or savings product rate changes.

We also measure interest rate risk through net interest income (“NII”) and economic value of equity (“EVE”) sensitivity measures, under a range of shock scenarios which include behavioral assumptions for retail products as interest rates change. These measures are assessed based on the standard shocks prescribed by regulatory guidelines, as well as against internally generated shock scenarios.

- NII sensitivities assess the impact to earnings in different interest rate shocks over a one-year period. Sensitivities are calculated based on a static balance sheet, where all assets and liabilities maturing within the year are reinvested in like for like products. The sensitivity also includes the impact arising from off-balance sheet exposures.

- EVE sensitivities measure the change in value of interest rate sensitive items, both on and off-balance sheet, under a range of interest rate shocks. Sensitivities are calculated on a run-off balance sheet basis.

Both NII and EVE sensitivities are measured regularly, with risk limits set against the various shocks.

Credit risk

Credit risk is the risk of loss as a result of a member, customer or counterparty failing to meet their financial obligations. Credit risk encompasses:

- borrower/ counterparty risk – the risk of loss arising from a borrower or counterparty failing to pay, or becoming increasingly likely not to pay the interest or principal on a loan, financial product, or service on time;
- security / collateral risk – the risk of loss arising from deteriorating security / collateral quality;
- concentration risk – the risk of loss arising from insufficient diversification;
- refinance risk – the risk of loss arising when a repayment of a loan or other financial product occurs later than originally anticipated.

At Nationwide, we lend in a responsible, affordable and sustainable way to ensure we safeguard members and our financial strength throughout the credit cycle. To this end, the Board Risk Committee sets the level of risk appetite it is willing to take in pursuit of our strategy, which is articulated as Board risk appetite statements and underlying principles:

We safeguard our members by lending responsibly:

- We will only lend to members, customers or counterparties who demonstrate that they can afford to borrow.
- We will support members and customers buying mortgageable houses of wide-ranging types and qualities.
- We will work with members and customers to recover their financial position should there be a delay, or risk of delay, in meeting their financial obligations.

We safeguard our financial performance, strength and reputation:

- We will manage asset quality so that losses through an economic cycle will not undermine profitability, financial strength and our standing with internal/external stakeholders.
- We will ensure that no material segment of our lending exposes the Society to excessive loss.
- We will proactively manage credit risk and comply with regulation.

We operate with a commitment to responsible lending and a focus on championing good conduct and fair outcomes. In this respect, we formulate appropriate credit criteria and policies which are aimed at mitigating risk against individual transactions and ensuring that our credit risk exposure remains within risk appetite. The Board Risk Committee and, under a governed delegated mandate structure, the Credit Committee, the Executive Sanctioning Committee and individual Material Risk Takers make credit decisions, based on a thorough credit risk assessment, to ensure that customers are able to meet their obligations.

At a portfolio level, we measure and manage our risk profile and the performance of our credit portfolios on an ongoing basis, through a formal governance structure. Compliance with Board risk appetite is measured

against absolute limits and risk metrics and is reported to our Credit Committee monthly, with adverse trends being investigated and corrective action taken to mitigate the risk and bring performance back on track.

We are committed to helping customers who may anticipate or find themselves experiencing a period of financial difficulty, offering a range of forbearance options tailored to their individual circumstances. This is the case for residential mortgages, consumer banking and commercial lending. Accounts in financial difficulty/arrears are managed by our specialist teams to ensure an optimal outcome for our members, customers and the Society.

Credit risk within the Treasury portfolio arises primarily from the instruments held and transacted by the Treasury function for operational, liquidity and investment purposes. In addition, counterparty credit risk arises from the use of derivatives to reduce exposure to market risks; these are only transacted with highly rated organizations and collateralized under market standard documentation.

The treasury credit risk function manages all aspects of credit risk in accordance with our risk governance frameworks, under the supervision of the Credit Committee.

In accordance with IFRS 9, a monthly review of the current and expected future performance of Treasury assets is undertaken, evaluating among other factors, volatility in valuation, evidence of deterioration of an obligor's financial health, industry and sector performance, and underlying cashflows. The result of the review determines expected credit loss (ECL) provision requirements. An established governance structure identifies and reviews under-performing assets to assess the likelihood of future losses.

We have no exposure to emerging markets, hedge funds or credit default swaps.

The following table presents our maximum exposure to credit risk of on-balance sheet and off-balance sheet financial instruments, before taking into account any collateral held or other credit enhancements and after allowance for impairment where appropriate. The maximum exposure to loss for off-balance sheet financial instruments is considered to be their contractual nominal amounts:

	2021			2020		
	Carrying value	Commitments	Maximum credit risk exposure	Carrying value	Commitments ⁽¹⁾⁽²⁾	Maximum credit risk exposure
	<i>(£ million)</i>					
Cash	16,693	—	16,693	13,748	—	13,748
Loans and advances to banks...	3,660	—	3,660	3,636	—	3,636
Investment securities	25,473	—	25,473	20,004	—	20,004
Derivative financial instruments.....	3,809	—	3,809	4,771	—	4,771
Fair value adjustment for portfolio hedged risk	946	—	946	1,774	—	1,774
Loans and advances to customers.....	201,547	13,259	214,806	200,850	11,416	212,266
Total.....	252,128	13,259	265,387	244,783	11,416	256,199

Notes:

- (1) In addition to the amounts shown above, we have revocable commitments of £10,624 million (2020: £10,139 million) in respect of credit card and overdraft facilities. These commitments represent agreements to lend in the future, subject to certain considerations. Such commitments are cancelable by Nationwide, subject to notice requirements, and given their nature are not expected to be drawn down to the full level of exposure.
- (2) The fair value adjustment for portfolio hedged risk and the fair value adjustment for micro hedged risk (which relates to the commercial lending portfolio) represent hedge accounting adjustments. They are indirectly exposed to credit risk through the relationship with the underlying loans covered by Nationwide's hedging programs.

Currency risk

Currency exposure is managed through natural offsetting on the balance sheet, with derivatives used to maintain the net exposures within limits. ALCO sets and monitors limits on the net currency exposure. The table below sets out the limited extent of the residual exposure to currency risk:

	2021			2020		
	Average	High	Low	Average	High	Low
	(<i>£ million</i>)					
VaR (99%/10-day)	0.0	0.5	0.0	0.0	0.3	0.0

Liquidity and funding risk

Liquidity risk is the risk that we are unable to raise cash to settle our financial obligations as they fall due and maintain member and other stakeholder confidence. Funding risk is the risk that we are unable to maintain diverse funding sources in wholesale and retail markets and manage retail funding risk that can arise from excessive concentrations of higher risk deposits.

Our management of liquidity and funding risks aims to ensure that there are sufficient liquid assets at all times, both as to amount and quality, to:

- cover cash flow mismatches and fluctuations in funding
- retain public confidence
- meet financial obligations as they fall due, even during episodes of stress.

This is achieved through the management and stress testing of business cash flows, and through the translation of Board risk appetite into appropriate risk limits. This ensures a prudent funding mix and maturity profile, sufficient levels of high-quality liquid assets and appropriate encumbrance levels are maintained.

The liquidity and funding risk framework is reviewed by the Board as part of the annual Internal Liquidity Adequacy Assessment Process (ILAAP). ALCO is responsible for managing the balance sheet structure, including the Funding Plan, and its risks. This includes setting and monitoring more granular limits within Board limits. A consolidated cash flow forecast is maintained and reviewed weekly to support ALCO in monitoring key risk metrics.

A Liquidity Contingency Plan (LCP), which is part of the wider recovery plan framework, is maintained which describes early warning triggers for indicating an emerging liquidity or funding stress as well as escalation procedures and a range of actions that could be taken in response to ensure sufficient liquidity is maintained. The LCP is tested annually to ensure it remains robust. Our Recovery Plan describes potential actions that could be utilized in a more extreme stress.

For contingent purposes, we pre-position unencumbered mortgage assets at the Bank of England which can be used in the Bank of England's liquidity operations if market liquidity is severely disrupted.

The table below segments the carrying value of financial assets and financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for the years ended April 4, 2021 and 2020. In practice, customer behaviors mean that liabilities are often retained for longer than their contractual maturities and assets are repaid faster. This gives rise to mismatches in funding on the balance sheet. The balance sheet structure and risks are managed and monitored by ALCO. We use judgment and past behavioral performance of each asset and liability class to forecast our likely cash flow requirements.

Gross settled derivative inflows	1,101	928	1,534	6,533	5,605	15,701
Gross settled derivatives – net flows	(23)	(39)	(87)	(389)	(310)	(848)
Net settled derivative liabilities	(70)	(175)	(732)	(2,238)	(1,224)	(4,439)
Total derivative financial liabilities.....	(93)	(214)	(819)	(2,627)	(1,534)	(5,287)
Total financial liabilities	145,986	5,350	19,846	43,020	15,435	229,637
Off-balance sheet commitments ⁽³⁾	11,416	—	—	—	—	11,416
Total financial liabilities including off-balance sheet commitments	157,402	5,350	19,846	43,020	15,435	241,053

Notes:

- (1) Due less than one month includes amounts repayable on demand.
- (2) The principal amount for undated subscribed capital is included within the due more than five years column.
- (3) Off-balance sheet commitments include amounts payable on demand for undrawn loan commitments, customer overpayments on residential mortgages where the borrower is able to draw down the amount overpaid and commitments to acquire financial assets

Fair values of financial assets and liabilities

The following table summarizes the carrying amounts and fair values of those financial assets and liabilities not presented on our balance sheets at fair value:

	For the year ended April 4, 2021	
	Carrying value	Fair value
	<i>(£ million)</i>	
Financial assets		
Loans and advances to banks	3,660	3,660
Investment Securities – Amortized Cost	1,243	1,245
Loans and advances to customers:		
Residential mortgages	190,638	193,645
Consumer banking	3,902	3,866
Commercial and other lending	6,887	6,638
Total	206,330	209,054
Financial liabilities		
Shares	170,313	170,415
Deposits from banks	27,022	27,022
Other deposits	4,522	4,522
Debt securities in issue	27,923	28,633

Subordinated liabilities	7,575	7,833
Subscribed capital.....	243	233
Total	237,598	238,658

Note:

(1) The tables above exclude cash for which fair value approximates to carrying value.

	For the year ended April 4, 2020	
	Carrying value	Fair value
	<i>(£ million)</i>	
Financial assets		
Loans and advances to banks.....	3,636	3,636
Investment Securities – Amortized Cost	1,625	1,594
Loans and advances to customers:		
Residential mortgages	188,516	190,580
Consumer banking.....	4,500	4,452
Commercial and other lending.....	7,834	8,010
Total	206,111	208,272
Financial liabilities		
Shares	159,691	159,891
Deposits from banks	21,812	21,810
Other deposits	4,482	4,483
Debt securities in issue.....	35,963	36,014
Subordinated liabilities.....	9,317	8,658
Subscribed capital.....	253	230
Total	231,518	231,086

Note:

(1) The tables above exclude cash for which fair value approximates to carrying value.

Loans and advances to banks

The fair value of loans and advances to banks is estimated by discounting expected cash flows at a market discount rate.

Loans and advances to customers

The fair value of loans and advances to customers is estimated by discounting expected cash flows to reflect current rates for similar lending.

Consistent modeling techniques are used across the different loan books. The estimates take into account expected future cash flows and future lifetime expected losses, based on historic trends and discount rates appropriate to the loans, to reflect a hypothetical exit price value on an asset by asset basis. Variable rate loans are modeled on estimated future cash flows, discounted at current market interest rates. Variable rate retail mortgages are discounted at the currently available market standard variable interest rate (the “SVR”) which, for example, in the case of our residential base mortgage rate (the “BMR”) mortgage book, generates a fair value lower than the amortized cost value as those mortgages are priced below the SVR.

For fixed rate loans, discount rates have been based on the expected funding and capital cost applicable to the book. When calculating fair values on fixed rate loans, no adjustment has been made to reflect interest rate risk management through internal natural hedges or external hedging via derivatives.

Shares, deposits and borrowings

The estimated fair value of deposits with no stated maturity (including non-interest bearing deposits) is the amount repayable on demand. The estimated fair value of fixed interest rate shares, deposits and other borrowings without quoted market price represents the discounted amount of estimated future cash flows based on expectations of future interest rates, customer withdrawals and interest capitalization. For variable interest rate deposits, estimated future cash flows are discounted using current market interest rates for new debts with similar remaining maturity. For fixed rate shares and deposits, the estimated future cash flows are discounted based on market offer rates currently available for equivalent deposits.

Debt securities in issue

The estimated fair values of longer dated liabilities are calculated based on quoted market prices where available or using similar instruments as a proxy for those liabilities that are not of sufficient size or liquidity to have an active market quote. For those notes, where quoted market prices are not available, a discounted cash flow model is used based on a current yield curve appropriate for the remaining term to maturity.

Subordinated liabilities and subscribed capital

The fair value of subordinated liabilities and subscribed capital is determined by reference to quoted market prices of similar instruments.

Fair value measurement

The following table provides an analysis of financial assets and liabilities held on our balance sheet at fair value, grouped into levels 1 to 3 based on the degree to which the fair value is observable:

	For the year ended April 4, 2021			Total
	Level 1 ⁽¹⁾	Level 2 ⁽²⁾	Level 3 ⁽³⁾	
	(<i>£ million</i>)			
Financial Assets				
Investment securities	23,111	1,087	5	24,203
Investments in equity shares	—	—	27	27
Derivative financial instruments....	—	3,697	112	3,809
Loans and advances to customers	—	—	120	120
Total	23,111	4,784	264	28,159
Financial Liabilities				
Derivative financial instruments....	—	(1,570)	(52)	(1,622)
Total	—	1,570	(52)	(1,622)

Notes:

- (1) Level 1: Fair value derived from unadjusted quoted prices in active markets for identical assets or liabilities, e.g. G10 government securities.
- (2) Level 2: Fair value derived from inputs other than quoted prices that are observable for the asset or liability, either directly (i.e. a price) or indirectly (i.e. derived from prices), e.g. most investment grade and liquid bonds, ABS, certain CDOs, CLOs and OTC derivatives.
- (3) Level 3: Inputs for the asset or liability are not based on observable market data (unobservable inputs), e.g. private equity investments, derivatives including an equity element, deposits including an equity element, some CDOs and certain ABS and bonds.

	For the year ended April 4, 2020			Total
	Level 1 ⁽¹⁾	Level 2 ⁽²⁾	Level 3 ⁽³⁾	
	(<i>£ million</i>)			
Financial Assets				
Investment securities	17,480	881	5	18,366
Investments in equity shares	—	—	13	13
Derivative financial instruments....	—	4,771	—	4,771

Loans and advances to customers	—	—	128	128
Total	17,480	5,652	146	23,278
Financial Liabilities				
Derivative financial instruments....	—	(1,924)	—	(1,924)
Total	—	(1,924)	—	(1,924)

Notes:

- (1) Level 1: Fair value derived from unadjusted quoted prices in active markets for identical assets or liabilities, e.g. G10 government securities.
- (2) Level 2: Fair value derived from inputs other than quoted prices that are observable for the asset or liability, either directly (i.e. a price) or indirectly (i.e. derived from prices), e.g. most investment grade and liquid bonds, ABS, certain CDOs, CLOs and OTC derivatives.
- (3) Level 3: Inputs for the asset or liability are not based on observable market data (unobservable inputs), e.g. private equity investments, derivatives including an equity element, deposits including an equity element, some CDOs and certain ABS and bonds.

Other financial assets represent fair value movements in mortgage commitments entered into where a loan has not yet been made. We fair value a portion of the mortgage commitments on the balance sheet.

Our Level 1 portfolio comprises government and other highly rated securities for which traded prices are readily available. Asset valuations for Level 2 investment securities are sourced from consensus pricing or other observable market prices. None of the Level 2 investment securities are valued using models. Level 2 derivative assets and liabilities are valued using observable market data for all significant valuation inputs.

Instruments move between fair value hierarchies primarily due to increases or decreases in market activity or changes to the significance of unobservable inputs to valuation, and are recognized at the date of the event or change in circumstances which caused the transfer. There were no transfers between the Level 1 and Level 2 portfolios during the year.

The main constituents of our Level 3 portfolio are as follows:

Loans and advances to customers

Certain loans and advances to customers have been classified as FVTPL. Level 3 assets in this category include a closed portfolio of residential mortgages and a small number of commercial loans.

Investment securities

Investment securities primarily include investments made in FinTech companies held at FVOCI and FVTPL.

Derivative financial instruments

Inflation swaps are used to hedge the Group's investments in index-linked government debt. Adjustments to the inflation curve to reflect seasonality in inflation index publications is required to determine a valuation; however, unlike most derivative valuation inputs, this market data is not available and therefore the input is internally derived rather than observable. The Group transacts Euro and US Dollar inflation swaps, for which seasonality is a more significant input than for equivalent sterling swaps.

The tables below set out movements in the Level 3 portfolio, including transfers in and out of Level 3.

Level 3 portfolio – movements analysis

The table below analyzes movements in the Level 3 portfolio:

	For the year ended April 4, 2021			
	Investment securities	Derivative financial assets	Derivative financial liabilities	Loans and advances to customers
	<i>(£ million)</i>			
As at April 4, 2019	18	—	—	128
Gains/(losses) recognized in the income statement:

(Losses)/gains from derivatives and hedge accounting.....	—	110	81	—
Other operating income.....	—	2	1	(1)
Losses recognized in other comprehensive income:				
Fair value movement taken to members' interests and equity	4	—	—	—
Additions	10	—	—	—
Disposals	—	(2)	(1)	—
Settlements/repayments.....	—	7	—	(10)
Transfers out of Level 3 portfolio	—	51	(116)	—
As at April 4, 2020	32	112	(52)	120

	For the year ended April 4, 2020	
	Loans and advances to customers	Investment securities
	<i>(£ million)</i>	
As at April 4, 2019	129	81
Gains/(losses) recognized in the income statement:		
Net interest income/(expense)	3	—
(Losses)/gains from derivatives and hedge accounting.....	—	1
Other operating income.....	7	11
Losses recognized in other comprehensive income:		
Fair value movement taken to members' interests and equity	—	(1)
Additions	—	6
Disposals	—	(80)
Settlements/repayments.....	(11)	—
Transfers out of Level 3 portfolio	—	—
As at April 4, 2020	128	18

	For the year ended April 4, 2019	
	Investments in equity shares	Loans and advances to customers
	Net derivative financial instruments – liabilities	
	<i>(£ million)</i>	
As at April 4, 2018		

For the year ended April 4, 2019

	Investments in equity shares	Net derivative financial instruments – liabilities	Loans and advances to customers
	<i>(£ million)</i>		
(Loss)/gain recognized in the income statement:	44	(4)	—
IFRS9 Transition ⁽¹⁾	1	—	247
As at April 5, 2018.....	45	(4)	247
Net interest (expense)/income	—	—	8
Gains/(losses) from derivatives and hedge accounting.....	4	—	—
Other operating income	15	2	6
Additions	18	—	—
Settlements	(1)	2	(21)
Transfers out of Level 3	—	—	(111)
As at April 4, 2019	81	—	129

Note:

(1) Figures have been adjusted to reflect the impact of applying IFRS 9: “Financial Instruments” from April 5, 2018. Further information is provided in note 1 to our audited consolidated financial statements as of and for the year ended April 4, 2019.

Level 3 portfolio – sensitivity analysis

The table below provides sensitivity analysis of reasonably possible alternative valuation assumptions for the assets in the Level 3 portfolio:

For the year ended April 4, 2021			
	Fair value	Favorable changes	Unfavorable changes
	<i>(£ million)</i>		
Investment securities	32	13	(6)
Derivative financial instruments – assets	112	21	(21)
Derivative financial instruments – liabilities	(52)	28	(28)
Loans and advances to customers.....	120	2	(3)
Total	212	64	(58)

For the year ended April 4, 2020			
	Fair value	Favorable changes	Unfavorable changes
	<i>(£ million)</i>		
Investment securities:	18	2	(1)
Loans and advances to customers.....	128	4	(5)
Total	146	6	(6)

Reasonable alternative assumptions applied take account of the nature of valuation techniques used, as well as the availability and reliability of observable proxy and historic data. The scenarios applied are considered for each product and varied according to the quality of the data and variability of the underlying market.

MANAGEMENT

Our business is under the control of our Board of Directors. Each director is elected annually by the members. The executive directors are the Chief Executive and the Chief Financial Officer. All other directors are non-executive directors. The business address of all of the directors and officers is Nationwide House, Pipers Way, Swindon SN38 1NW, England.

Under our rules, the Board of Directors must consist of not less than eight directors of whom not less than five must be present at a Board meeting to form a quorum.

No potential conflicts of interest exist between any duties to us, as Issuer, of the persons on the Board of Directors and their private interests or other duties.

Management and Director Changes

Rita Clifton retired at the Society's Annual General Meeting held on July 22, 2021.

Tamara Rajah joined the Society as a Non-Executive Director on September 1, 2020.

Debbie Klein joined the Society as a Non-Executive Director on March 1, 2021.

In 2021, David Roberts, Nationwide's Chair since 2015, requested that the Society's Board start the process to select a new Chair ensuring an orderly succession and the continuity of Board leadership as the country emerges from the pandemic. Kevin Parry, the Society's current Senior Independent Director, was appointed as Deputy Chair and Chair Elect. It is expected that Kevin Parry will assume the role of Chair by March 2022.

On September 23, 2021, the Society announced its succession plan to support an orderly transition to new leadership. Having led the Society since 2016, Chief Executive, Joe Garner had asked the Board to commence the process of finding his successor. On December 3, 2021, the Society announced the appointment of Debbie Crosbie as its next Chief Executive and Executive Director, subject to regulatory approval. The selection process was led by Kevin Parry, the Society's Deputy Chairman and Chairman Elect. Joe will continue in the role as Chief Executive until Debbie takes over in the first half of 2022. Debbie will be Nationwide's first female Executive Director. She is currently Chief Executive of TSB, a non-executive director of SSE plc and a member of the Prudential Regulation Authority's Practitioner Panel.

Biographies

David Roberts CBE

Chairman

David joined Nationwide on September 1, 2014 and took over as Chairman in July 2015. David combines a distinctive blend of leadership experience across major listed corporations, the mutual movement, and public service, including 35 years in financial services. He is a passionate champion of Nationwide's social purpose and of the Society's commitment to help improve the financial lives of its members. David also strongly believes in the economic value of commerce and the importance of rebuilding trust in big business.

Current external positions include:

Chair, Beazley plc

Chair, Beazley Furlonge Limited

Vice Chair, NHS England

Non-executive director, Campion Wilcocks Limited

Advisor Board member, The Mentoring Foundation Advisory Council

Member, Strategy Board, Henley Business School, University of Reading

Previous positions include:

Group Deputy Chair, Lloyds Banking Group plc

Executive director, Barclays Bank plc and CEO, International Retail and Commercial Banking

Chair and CEO, Bawag PSK AG

Non-executive director, BAA plc

Non-executive director, Absa Group SA

Vice Chair, NHS England

Joe Garner

Chief Executive Officer

Joe joined Nationwide as CEO in April 2016. Joe has spent his working life in consumer-focused businesses, starting his career with consumer product companies Proctor & Gamble and Dixons Carphone. He later took on leadership roles, first as head of HSBC's UK retail and commercial businesses and then as CEO at Openreach. Joe was also previously a non-executive director of the Financial Ombudsman Service. Throughout his career, Joe has championed the interests of colleagues and customers, believing that looking after both is not only the right thing to do, but the key to commercial success. Since joining Nationwide, Joe's mission has been to inspire colleagues to remain true to the Society's social purpose, using the power of the collective to improve people's lives. Joe is passionate about Nationwide's core purpose of "building society, nationwide".

Debbie has extensive experience in corporate brand and marketing roles. She is currently Group Chief of Marketing, Corporate Affairs and People Officer at Sky, where her remit includes overall responsibility for brand and marketing development, as well as leading corporate communications, public affairs, internal communications, and human resources. She is also responsible for Sky's Corporate Social Responsibility (CSR) programme ("Bigger Picture"). Her expertise in sustainability and CSR matters will assist with building Nationwide's Environmental, Social and Corporate Governance (ESG) agenda. Debbie was previously Chief Executive Europe and Asia Pacific at The Engine Group, an integrated marketing services business where she worked closely with Sky for 12 years. She held various leadership roles in her 20 years at the firm, including Head of Strategy. Earlier in her career she worked in Strategy and Insight at Saatchi & Saatchi and Neilsen.

Current external position:

Group Chief Marketing, Corporate Affairs and People Officer, Sky

Committees of Our Board of Directors

Our **Board of Directors** operates through its meetings and through its five main committees, the Audit Committee, the Nomination and Governance Committee, the Remuneration Committee, the Board IT and Resilience Committee and the Board Risk Committee. To the extent that matters are not reserved to our Board of Directors, responsibility is delegated to the Chief Executive Officer, who is assisted by the Nationwide Leadership Team (NLT) and the Executive Risk Committee.

The **Audit Committee** provides oversight and advice to the Board in respect of among other things, financial reporting, financial crime, internal and external audit, and the adequacy and effectiveness of internal controls and risk management systems.

The purpose of the **Nomination and Governance Committee** is to assist the Chairman in keeping the composition of the Board under review, making recommendations to the Board on succession planning, executive level appointments and leading the appointments process for nominations to the Board. The Committee oversees the implementation of the Society's Inclusion and Diversity strategy and objectives. It also reviews the Board's governance arrangements and makes recommendations to the Board to ensure that the arrangements are consistent with best practice.

The **Remuneration Committee** is responsible for determining and agreeing with the Board the framework or broad policy for remuneration of the Chairman, the directors and other senior executives of the Society including employees who are identified as material risk takers under the PRA Remuneration Code. It determines, within the terms of the agreed policy, the specific remuneration packages for these roles. The Committee also reviews the ongoing appropriateness and relevance of the remuneration policy across the rest of Nationwide.

The Board IT and Resilience Committee provides oversight and advice to the Board on the Society's IT strategy, IT architecture, IT operating model effectiveness, delivery performance and resilience controls, including cyber risk, as well as overseeing the Society's data management strategy.

The purpose of the **Board Risk Committee** is to provide oversight and advice to the Board in relation to current and potential future risk exposures and future risk strategy, including determination of risk appetite. In addition, the Committee is responsible for monitoring compliance oversight, and the effectiveness of the Enterprise Risk Management Framework ("ERMF"). It also advises the Remuneration Committee on any risk adjustments to be made, including risk appetite, risk monitoring, and risk adjustments to remuneration.

Management Committees

The **Nationwide Leadership Team** is our key operational committee which oversees the day-to-day operations of our business. This Committee meets weekly, reviews all matters that are to be presented to the Board of Directors, and is composed of our Chief Executive Officer, Chief Financial Officer and the Society's senior leadership team (this includes the Chief Internal Auditor who is an attendee of the Committee).

The **Weekly Heartbeat Committee** reports to the National Leadership Team and reviews the end-to-end performance of our product and service propositions and agrees actions in order to meet the organization's strategic objectives. The Committee's membership is wide ranging and comprises of senior leaders from across the Society including the second line.

The **Executive Risk Committee**, which meets on average once a month, is responsible for ensuring a coordinated approach across all risks and oversight of the risk committees. The Committee's membership comprises the CEO, the CFO and a number of other members of the NLT. It is chaired by the Chief Risk Officer. The risk committees comprise the:

- ALCO (Assets and Liabilities Committee);
- Credit Committee
- Model Risk Oversight Committee (formerly Risk Oversight Committee); and
- Conduct and Operational Risk Committee.

ALCO determines and amends the Society's approach to financial risk and sets thresholds for endorsement by the Executive Risk Committee and approval by the Board. It manages the financial risk profile

of the Society in accordance with the Enterprise Risk Management Framework, Board Risk Appetite, Society Strategy and the Financial Plan.

ALCO comprises the Chief Financial Officer (Chair), Chief Executive Officer, Chief Products and Marketing Officer, Chief Risk Officer, Director of Treasury, Leader of Hassle Free Money Member Mission, Leader of Homes and Dreams Member Mission and the Chief Credit Officer. For more information about ALCO, see the section entitled “*Financial Risk Management*.”

The **Credit Committee** is responsible for determining and amending the Society’s attitude to lending risk and set thresholds for endorsement by the Executive Risk Committee and the Board Risk Committee. It also manages the lending risk profile of the Society in accordance with the Enterprise Risk Management Framework, Board Risk Appetite, Society Strategy and the Financial Plan.

The Committee’s membership comprises the Chief Credit Officer (Chair), Chief Risk Officer, Chief Products and Marketing Officer, Chief Financial Officer, Head of Secured Credit Risk, Head of Unsecured Portfolio Management, Head of Credit Risk Management, Director of Modelling, Head of Collections and Recoveries. For more information about the Credit Committee, see the section entitled “*Financial Risk Management—Credit risk*.”

The **Model Risk Oversight Committee** is responsible for overseeing the model risk profile of the Society, assessing whether models are fit for purpose and reviewing and challenging the Society’s 1st Line use and management of models to manage the risk.

The Committee is comprised of the Head of Model Risk Oversight: Credit, Head of Model Risk Oversight: Finance & MRM, Head of Market, Liquidity and Solvency Risk; Head of Business Risk Oversight, Head of Credit Risk Management and Head of Balance Sheet Risk Framework and Modelling.

The **Conduct and Operational Risk Committee** is responsible for monitoring the Society’s actual and future operational, regulatory and conduct risk appetite and profile to ensure alignment with strategy, business objectives, risk and corporate culture and values and approving test plans, monitor performance plans and monitoring first, second and third line identified controls through Management Risk Appetite (MRA).

The Committee’s membership comprises the Chief Controls Officer (Chair), Leader of Homes and Dreams Member Mission, Leader of Hassle Free Money Member Mission, Director of Shared Services, Director of Operations and Service Delivery, Leader of Propositions and Engagement, Leader of Moments that Matter Member Mission, Leader of Resilience & Agility, Director of Fraud and Economic Crime and Director of Nationwide Digital.

Compensation

For the year ended April 4, 2021 the aggregate amount of compensation that we paid to the Executive Directors on the Board as a group totalled £0.5 million. From April 2014 we have operated a performance pay plan for Directors which features deferral periods of up to five years on some elements and that only pays out if performance targets are met under a broad range of individual, strategic and financial corporate metrics. For performance periods commencing from April 2016 onwards, the time horizon for payments of awards has been extended in response to changing regulatory requirements, such that awards are deferred for between three and seven years. The Remuneration Committee sets the performance targets each year. For performance periods commencing April 2017, the maximum award under this scheme each year for the Chief Executive is 152% of base salary and for other executive directors is 112% of salary. Previous maximums were 160% and 120% respectively. For the financial year ending April 4, 2021, the maximum variable pay opportunities (including both the upfront and deferred elements) were reduced to: 51% of base salary for the Chief Executive and 37% of base salary for the executive directors. For these awards, 37% and 29% of base salary is payable for target performance for the Chief Executive and other executive directors respectively.

In addition, executive directors receive other benefits including a car allowance, access to shared drivers when required, healthcare, and insurance benefits.

Directors' Loans

As at April 4, 2021, we had loans to directors or persons connected to directors totaling £1.0 million. All of these loans were granted in the normal course of business and were largely made up of residential mortgage loans and balances on credit cards. While Nationwide previously offered directors and other employees' discounts on residential mortgage loans, these offers have been ceased. Some such loans originated before the offer cessation date may still be extant.

We maintain a register containing the details of all loans, transactions and other arrangements made between our directors (and persons connected with our directors) and Nationwide or its subsidiaries. This register is available for inspection at our annual general meetings and during normal business hours at our principal office during the 15 days prior to our annual general meeting.

Management Employee Pension Schemes

Executive directors (Joe Garner and Chris Rhodes) receive a cash allowance in lieu of pension.

Related-Party Transactions

For information on transactions with related parties, see note 35 to our audited condensed consolidated financial statements incorporated by reference herein.

COMPETITION

Industry Background

Our main competitors are the five largest UK banking groups. In addition we also compete with a range of other smaller banks, with other building societies and with insurance companies. In recent years, new competitors have emerged in all areas of the UK personal financial services market where evolving technology and innovation have widened the range of competitive threats. A description of the traditional types of organizations with which we continue to compete as well as a description of certain new competitors is set forth below.

Major UK Banks

The UK financial services market is dominated by the five largest banking groups, namely Lloyds Banking Group, Royal Bank of Scotland, Barclays, HSBC and Santander UK. These are our principal competitors in our core mortgages, savings and personal account markets.

In the recent past, prior to the coronavirus pandemic, mortgage competition was being driven by certain ring-fenced banks as they deployed surplus liquidity in lending markets. They had a further advantage from the lower cost of their deposits which stemmed from their significant market shares in low/zero cost transactional balances associated with personal current accounts.

In personal current accounts, and their associated non-rate-sensitive deposit balances, the scale of the existing customer bases and strategic investment programs of these banks makes them prime competitors.

Smaller UK Banks

We also compete with a series of smaller UK banks that have emerged as challengers to the industry leaders (e.g. TSB, CYBG, Co-op Bank and Metro Bank). While typically relatively small, some of these banks have sought rapid expansion via aggressive pricing, low cost operating models and by use of digital and intermediary distribution aided by the absence of legacy IT and other issues. We have been unable to offset the scale advantages of the largest banks.

Building Societies

Over the past 30 years, many building societies have merged with other building societies or, in a number of cases, transferred their businesses to the subsidiary of another mutual organization or demutualized and transferred their businesses to existing or specially formed banks. As a result, the number of building societies in the United Kingdom has fallen from 137 in 1985 to 43 as at April 4, 2021. Building societies today continue to hold an important share of the UK mortgage and savings market. For further information about the UK residential mortgage market and UK retail deposit market see below.

UK Insurance Companies

The UK insurance industry is dominated by large general and life insurance companies originating a range of products, distributed through building societies, banks, direct sales forces and independent financial advisors.

Other Competitors

A number of large retailers sell financial services to their customers, often through cooperation arrangements with existing banks and insurance companies. Retailing groups, namely Tesco and Sainsbury, have entered the market as manufacturers of financial service products in their own right. In addition, foreign banks, investment banks, insurance and life assurance companies have at various times been active in UK personal financial services, particularly the mortgage and retail savings markets, and a number of companies have expressed a desire to enter the market.

The growth of internet price comparison sites has enabled consumers to have access to information that has increased price competition particularly in certain insurance markets. Online automated advice is likely to have an increasing impact on investment and protection markets. Companies are using low cost telephone, internet and mobile distribution channels to offer competitively priced retail savings accounts, mortgages and other financial products. The internet and mobile communications technology provide opportunities for further competition from organizations from outside the traditional banking sector. This includes new banks specifically providing mobile-phone based banking (e.g. Starling, Atom and Monzo) and large technology companies either already using their core businesses as a platform for financial services, particularly in the payments arena, or being in a strong position to do so in the future should they choose to (e.g. the so-called Tech Giants). The continued development of the intermediary sector also allows new entrants to gain access to the UK mortgage market and increase price based competition on larger mortgage lenders. Competition regulation has and may eventually further assist potential entrants if it enforces the breakup of some of the larger participants or the sale of those in public ownership.

The UK Residential Mortgage Market

The table below sets out information for the last three years concerning year-end balances of UK lending secured on residential property and the proportions held by building societies, banks and us:

Year ended December 31,	Total Balances⁽¹⁾	Banks & Building Societies⁽¹⁾	Others	Our share of total UK residential mortgages⁽¹⁾
	<i>(£ billion, except percentages)</i>			
2020	1,499.3	88.7%	11.3%	12.6%
2019	1,454.0	88.8%	11.2%	13.0%
2018	1,408.8	88.6%	11.4%	13.0%

Note:

(1) *Source:* Bank of England, except for information regarding our balances which are taken from our own data. Building society figures include our own balances.

Although the overall size of the new mortgage market has shrunk considerably since 2007, the nature of competition is essentially unchanged, in that it involves defending the existing stock of balances and competing for the flow of new lending.

Competition for new lending remains fierce and is driven by first-time buyers or next-time buyers remortgaging, changing homes or extending their mortgages. During the first period of lockdown from March 2020 to June 2020, mortgage activity across the UK fell sharply as a result of the measures imposed by the UK government in response to the Covid-19 pandemic, and had since recovered strongly, particularly for house purchases. There has been a decline in the proportion of the UK population owning their own homes, from a peak of around 71% in 2003 to around 64% in 2020 (source: English Housing Survey). The aftermath of the global financial crisis is still evident in the mortgage market, with more limited credit availability at higher LTV ratios. This has been improving in recent years and though the pandemic initially led to increased caution amongst lenders, we have now seen a reintroduction of some high LTV products. For further information, see “*Risk Factors—Risks Related to Our Business—Changes to interest rates or monetary policy, whether by the UK, US or other central banking authorities, could affect the financial condition of our customers, clients and counterparties, which could in turn adversely affect us.*” Competition is driven by a combination of price, risk profile and access to funding by lenders.

Our market share of gross advances of 11.1% during the year ended April 4, 2021 was slightly below the prior year (April 4, 2020: 11.4%).

The UK Retail Deposit Market

The UK retail deposit market is dominated by banks, building societies and NS&I. Below is a table breaking down the total UK retail deposit market by type of financial institution compiled from details published by the Bank of England:

<u>Year ended December 31,</u>	<u>Total UK retail deposits⁽¹⁾</u>	<u>Banks' & Building societies' share of total UK retail deposits⁽¹⁾</u>	<u>Others⁽¹⁾</u>	<u>Our share of total UK retail deposits⁽¹⁾</u>
		<i>(£ billion, except percentages)</i>		
2020.....	1,764.5	88.2%	11.8%	9.3%
2019.....	1,587.6	88.9%	11.1%	9.9%
2018.....	1,521.4	89.1%	10.9%	10.1%

Note:

(1) Source: Bank of England, except for information regarding our balances which are taken from our own data.

The UK retail deposit market has become an increasingly commoditized market driven primarily by price, particularly for the flow of new money that generally seeks the most attractive rates available. However the bank failures of 2007 and 2008 and the limits of the FSCS appear to have led some customers to spread their savings across a number of different companies. Older deposit balances have traditionally subsidized the cost of new retail deposits, primarily reflecting customer inertia.

In the last few years, competition for UK retail deposits has increased as new participants, such as foreign banks, supermarkets, insurance/life assurance companies and direct online banking providers have entered the market by offering attractive rates of interest. These new entrants have caused the cost of attracting new retail deposits to increase for existing players in the market and have impacted the flow of new retail deposits.

We believe that increased consumer awareness driven by the press and increased competition has created potentially greater volatility of retail deposit balances both between different organizations and between different accounts within organizations. This, in turn, has resulted in a reduction in the differential between rates paid to existing and new balances as customers transfer to high rate accounts and organizations aim to retain existing balances.

Our deposit balances grew by £10.9 billion in the year ended April 4, 2021, which represents a significant increase. Sharp declines in consumer spending due to the Covid-19 restrictions resulted in “forced savings” and a strong deposit market. However, our market share reduced to 9.3%.

Competitive Outlook

Prior to the coronavirus pandemic, while some weaknesses remained, the major banks had largely completed the process of financial repair upon which they embarked following the financial crisis. The end of significant costs for PPI customer redress and the completion of costly and disruptive ring-fencing re-organization had also left this group better able to compete and in recent years the major banks had begun to compete more aggressively.

With the onset of the coronavirus pandemic, despite the availability of cheap Bank of England funding, the sharp fall in Base Rate has compressed the net interest margins of the ring-fenced banks, which, with their cost of deposits already very low, are left with less scope than other competitors to widen deposit spreads. Additionally, the ring-fenced banks, with their large corporate and consumer finance loan exposures, face the possibility of significant credit losses in the face of economic weakness in the aftermath of the pandemic. Consequently, it remains unclear whether this mortgage pricing environment will endure, influenced as it is by

the level of competitors' confidence in the economic outlook and strength of any recovery in their financial performance.

Competition for personal current accounts also looks set to remain intense as regulatory measures to allow customers to switch provider more easily are accompanied by increased appetite by providers to grow, or at least maintain, a current account base as a driver of active customer relationships. Investment in new digital capabilities will continue at high levels, as major participants look to compete digitally against their existing peers and to frustrate newer entrants and fintech innovators as they urgently seek to establish a volume base to secure their financial viability.

SUPERVISION AND REGULATION

EUROPEAN UNION LEGISLATION

The framework for supervision and regulation of banking and financial services in the UK has been heavily influenced by European Union legislation. Many aspects of the Basel III reform package (a regulatory capital and liquidity framework approved by the Basel Committee) have been implemented in the EEA through the Capital Requirements Regulation (575/2013) (“**CRR**”) and the associated directive, the Capital Requirements Directive (2013/36/EU) (the “**CRD**”) (together, the “**CRD IV**”), which were published in the Official Journal of the European Union on June 27, 2013. The CRR established a single set of harmonized prudential rules for financial institutions and certain minimum capital and liquidity standards which apply directly to all credit institutions in the EEA, with the CRD containing less prescriptive provisions which (unlike the CRR, which applies across the EEA without the need for any implementing legislation at member-state level) are required to be transposed into national law. CRD IV reinforced capital standards and established a leverage ratio “backstop.” Full implementation began from January 1, 2014, with particular elements being phased in over a period of time. The requirements largely became effective by 2019, although some minor transitional provisions provide for phase-in of certain requirements until 2028. As CRD IV permits the exercise of certain national discretion, the final rules and the timetable for its implementation in each jurisdiction may be subject to some level of national variation. The CRD requirements were implemented in the UK before the UK’s exit from the EU; the UK framework was then amended to reflect the UK’s exit from the EU. The CRR has been onshored in the UK by the Capital Requirements (Amendment) (EU Exit) Regulations 2018 (as amended). The Basel Committee has also published certain proposed revisions to the securitization framework, including changes to the approaches to calculating risk weights and new risk weight floors. For completeness, CRD IV has undergone significant revisions. For further information about these amendments see “—*Revisions to the CRD IV Package*” below.

Although credit institutions are primarily regulated in their home state by a local regulator, the CRD IV prescribes minimum criteria for regulation of the authorization of credit institutions and the prudential supervision applicable to them. Under UK laws and regulations pertaining to the authorization of credit institutions in the UK, the relevant regulators in the UK are the PRA and the FCA. For further information about regulation in the UK see “—*UK Regulation*” below.

CRD IV substantially reflects the Basel III capital and liquidity standards. Subject to prior regulatory approval, CRD IV also makes provision for (among other things) requirements to reduce reliance by credit institutions on external credit ratings, by requiring that their investment decisions are based not only on ratings but also on their own internal credit opinion, and that banks with a material number of exposures in a given portfolio develop internal ratings for that portfolio instead of relying on external ratings for the calculation of their capital requirements.

The CRR gives express recognition for CET1 capital instruments for mutuals and cooperatives and permits the use of a cap or restriction to safeguard the interests of members and reserves.

On December 7, 2017, The Basel Committee’s oversight body, the Group of Central Bank Governors and Heads of Supervision (**GHOS**), endorsed the outstanding Basel III post-crisis regulatory reforms (the final Basel III standards).

The reforms endorsed by the GHOS are intended to help reduce excessive variability in risk-weighted assets and improve the comparability and transparency of banks’ risk-based capital ratios and include the following elements:

- a revised standardised approach for credit risk, to improve the robustness and risk sensitivity of the existing approach;
- revisions to the internal ratings-based approach for credit risk, where the use of the most advanced internally modelled approaches for low-default portfolios will be limited;

- revisions to the credit valuation adjustment (CVA) framework, including the removal of the internally modelled approach and the introduction of a revised standardised approach;
- a revised standardised approach for operational risk, which will replace the existing standardised approaches and the advanced measurement approaches;
- revisions to the measurement of the leverage ratio and a leverage ratio buffer for global systemically important banks (G-SIBs), which will take the form of a Tier 1 capital buffer set at 50 per cent. of a G-SIB's risk-weighted capital buffer; and
- an aggregate output floor, which will ensure that banks' risk-weighted assets (RWAs) generated by internal models are no lower than 72.5 per cent. of RWAs as calculated by the Basel III framework's standardised approaches. Banks will also be required to disclose their RWAs based on these standardised approaches.

On November 23, 2016, the European Commission published a package of legislative proposals providing for reform of the prudential and resolution frameworks for EU banks and credit institutions, including the implementation of certain additional elements of Basel III (though not all of the final Basel III standards) and of the Financial Stability Board's proposed minimum total loss-absorbing capacity standards. These proposals covered amendments to CRR, CRD IV, the BRRD and Regulation (EU) No. 806/2014 (the "**Single Resolution Mechanism Regulation**" or "**SRMR**"). The final legislation implementing these proposals was published in the Official Journal of the European Union on June 7, 2019. The legislation consists of Regulation (EU) No. 2019/876 ("**Capital Requirements Regulation II or CRR II**"), Directive (EU) No. 2019/878 ("**Capital Requirements Directive V or CRD V**"), Directive (EU) No. 2019/879 ("**BRRD II**") and Regulation (EU) No. 2019/877 ("**SRMR II**") and came into force on June 27, 2019 (the "**Banking Reform Package**"), with certain provisions applying from June 27, 2019, one provision relating to exemptions from deductions of equity holdings applying retrospectively from January 1, 2019 and other provisions gradually being phased in and/or being subject to national implementation. Most CRR II provisions applied from 28 June 2021, which is after the transition period, and as such the CRR II provisions were not on-shored into UK law. To implement the remaining elements of the Basel Standards in to the UK, HM Treasury has revoked a number of existing CRR articles and the PRA published the policy statement 17/21 in July 2021 covering the following elements:

- revisions to the standardized approach for counterparty credit risk;
- a binding NSFR (which requires credit institutions and systemic investment firms to finance their long-term activities (assets and off-balance sheet items) with stable sources of funding (liabilities) in order to increase banks' resilience to funding constraints). This means that the amount of available stable funding will be calculated by multiplying an institution's liabilities and regulatory capital by appropriate factors that reflect their degree of reliability over a year. The NSFR will be expressed as a percentage and set at a minimum level of 100%, indicating that an institution holds sufficient stable funding to meet its funding needs during a one-year period under both normal and stressed conditions;
- amendments to regulatory returns and disclosure templates; and
- introduction of disclosures for Interest Rate Risk in the Banking book into Pillar 3. This refers to the current risk to capital and earnings from adverse movements in interest rates that impact the banking book positions. When interest rates change, the present value and timing of future cash flows also alters.

Policy statement 17/21 will be implemented in the UK by January 1, 2022.

Under the terms of the Withdrawal Agreement, the UK was required to transpose CRD V into national law, given that the application date (December 29, 2020) fell before the Brexit transition period ended – this Directive, with some exceptions (including those aspects due to enter into force after December 31, 2020), now

forms part of retained or onshored EU law in the UK. Equally, those provisions of the CRR II and BRRD II which applied before the end of the transition period also form part of retained EU law, with some exceptions. See “*Impact of Brexit*” below and “*Post-Brexit changes to the UK prudential and resolution regimes*” below for further information.

On April 29, 2021, the UK’s Financial Services Act 2021 (the **FSA 2021**) received Royal Assent. A key element of the FSA 2021 is the UK implementation of the outstanding Basel III standards. The FSA 2021 provides for the implementation of those aspects of the Basel III standards (which were finalised between 2010 and 2017) that were introduced into the EU as part of the EU Banking Reform Package but that did not apply across the EU until after the end of the Brexit transition period, and consequently were not implemented in the UK. It also provides for the implementation of the final Basel III standards agreed between 2017 and 2019 (for example, in relation to the calculation of risk-weighted assets) that have not yet been implemented by either the EU or the UK.

The Government and the PRA remain committed to the UK’s implementation of the Basel standards. A consultation on the UK implementation of the final Basel III standards is anticipated in Q4 2021 with the resulting Policy Statement anticipated in Q3 2022. The Basel implementation deadline is January 1, 2023.

HM Treasury published a consultation in February 2021 to revoke a number of the onshored CRR articles. Following the proposed revocation, the PRA was able to consult on the replacement of these rules. This was done through CP 5/21 and subsequently PS 17/21, PS 22/21 and ultimately PS 22/21 which was published on October 14, 2021, which implements the remaining elements of the Basel III Standards that were implemented in Europe through CRR2.

Revisions to the BRRD framework

The EU Banking Reform Package also included a number of significant revisions to the BRRD (known as **BRRD II**, as explained above). The BRRD II proposals were finalised in June 2019 and were due to be implemented in member states by December 28, 2020 with certain requirements relating to the implementation of the total loss absorbing capacity (“**TLAC**”) standard applying from January 1, 2022 and additional MREL (as defined below) requirements from January 2024. The UK implemented the majority of the BRRD II provisions which became applicable on December 28, 2020 (although certain of those provisions were subject to a ‘sunset’ clause which disappplied them from January 1, 2021) but not those which became applicable on or after January 1, 2021.

The effects of BRRD II (including in the form adopted in the UK) will be wide-ranging and, in particular, it will impact how institutions such as us absorb losses in certain stressed scenarios.

There remains a risk that the UK regulators and/or authorities can make an instrument or order under the Banking Act in respect of the entities referred to above and/or that related parties could be adversely affected by any such instrument or order if made.

The Society’s capital requirements

- ***RWA-based capital requirements:*** Under the current prudential framework, we are required to hold a minimum amount of regulatory capital equal to 8% of our risk-weighted assets (the “**Pillar 1 requirement**”), plus certain additional CET1 capital buffers (the “**buffer requirement**”). In addition, the PRA may impose additional individual capital requirements on the Society, which may comprise an add-on to the Pillar 1 requirement (the “**Pillar 2A requirement**”) to address risks to the Society which the PRA considers are not adequately covered by Pillar 1 requirements, and/or an add-on to the buffer requirement (the “**Pillar 2B requirement**”) to provide for additional capital buffers in a financial stress scenario. Our Pillar 2A requirements must be met with at least 56.25% CET1 capital, at least 75% Tier 1 capital and not more than 25% Tier 2 capital. Our Pillar 2B requirements must be met solely with CET1 capital. We may also decide to hold additional amounts of capital as part of our risk and growth

strategies. As at September 30, 2021, our CET1 ratio was 37.7% and our total regulatory capital ratio was 50.5%.

- *Buffers:* Our RWA-based buffer requirements from time to time will consist of a capital conservation buffer of 2.5% of RWAs plus any applicable counter-cyclical and systemic risk buffers. The counter-cyclical buffer is based on a weighted average of the counter-cyclical buffer rates applicable from time to time in the jurisdictions where we have significant exposures, predominantly the UK. As at the date of this Base Prospectus, our counter-cyclical buffer requirement is 0%). The PRA introduced a systemic risk buffer for UK ring-fenced banks and large building societies, which applied from August 1, 2019 (the “**Systemic Risk Buffer**”). The PRA set a Systemic Risk Buffer rate of 1.0% of all RWAs for the Society, which applied to all exposures on a consolidated basis. The CRD V, including as transposed and on-shored in the UK, also provides that an additional buffer requirement may be extended to EU credit institutions designated as “other systemically important institutions” (“**O-SIIs**”). We have been designated as an O-SII. In PRA Policy Statement PS26/20 (setting out PRA’s near-final policy which was subsequently confirmed in Policy Statement PS29/20 on December 28, 2020), the PRA confirmed that the O-SII buffer would take on the role previously performed by the Systemic Risk Buffer, and that while, going forwards, it has the power to use the Systemic Risk Buffer to set sectoral capital requirements for firms and approved holding companies, it did not propose to introduce such a Systemic Risk Buffer requirement at this time (but that it would consult on implementing the Systemic Risk Buffer in future if it were necessary and appropriate to apply it). The PRA confirmed in December 2020 that SRB rates would be maintained at the rates set in December 2019 until the PRA reassesses rates in December 2022, to take effect from January 2024. This decision also confirmed that the O-SII buffer would be set at the same rate as firms’ current SRB. In response to the ongoing economic shock from Covid-19, on October 8, 2021, the PRA announced the extension of O-SII buffer rates at 2019 levels for a further year. The PRA’s intention now is that rates should be maintained at 2019 levels for a further year, with no new rates set until December 2023. Our total buffer requirement, as at the date of this Base Prospectus, is equal to 3.5 percent of risk-weighted assets (comprised of a capital conservation buffer of 2.5 percent of RWAs, a counter-cyclical buffer of 0 percent of RWAs and an O-SII buffer of 1.0 percent of RWAs). In December 2022, the PRA expects to set an O-SII buffer consistent with its statement of policy (*‘The PRA’s approach to the implementation of the systemic risk buffer’*) and the FPC’s framework for the systemic risk buffer. In doing so, the PRA will take account of the evolution in firms’ balance sheets in response to Covid-19 and the extent to which they are temporarily inflated. The PRA is required to review O-SII buffer rates once a year, but barring unforeseen change in circumstances, the 2022 review is not expected to result in any changes.
- *UK leverage requirements:* Following recommendations from the Financial Policy Committee (“**FPC**”) in 2016 the PRA introduced a UK leverage ratio framework. The UK leverage ratio framework is intended to mirror aspects of the risk-weighted capital requirement. The UK leverage ratio was originally set at 3% of risk-weighted assets and in 2017 was increased to 3.25% of exposures (excluding central bank reserve exposures), to reflect the removal of central bank deposits from the leverage exposure measure. At least three-quarters of the leverage ratio requirement must be met with CET1 capital and up to one-quarter may be met with AT1 capital. In addition, the UK leverage ratio framework includes two additional buffers that are to be met using CET1 capital only: an Additional Leverage Ratio Buffer (“**ALRB**”), applying to the largest UK banks and building societies and set at 35% of the corresponding risk-weighted systemic buffer rate, and a macro-prudential Countercyclical Leverage Buffer (“**CCLB**”), which is set at 35% of the corresponding risk-weighted countercyclical buffer (and rounded to the nearest 0.1%, with 0.05% being rounded up).

Our UK leverage ratio was 5.5% at September 30, 2021. Given the nature of our balance sheet, which is underpinned by residential mortgage assets with a low risk profile (as demonstrated by a low level of arrears

compared to the industry average), our current binding capital constraint is based on leverage-based (rather than risk-based) capital requirements. Based on our current understanding of the proposed changes to risk-weights, and subject to final implementation, we currently expect that the leverage ratio will continue to be our binding capital constraint in the near-term.

Internationally, the leverage ratio is a key element of the post-crisis regulatory reform agenda. The UK's FPC remains committed to the implementation of robust prudential standards in the UK and has committed to reviewing the UK leverage ratio framework in the context of international developments.

In October 2021, together with the PRA, the FPC published Policy Statement 21/21 on changes to the UK leverage ratio framework. The PRA has approved the creation of a single leverage exposure measure that applies for all purposes, updated reporting and disclosure requirements, confirmed the maintenance of the central bank claims exclusion from UK leverage ratio measure and the application of a PRA supervisory expectation of risk of excessive leverage for firms not subject to a minimum requirement. The FPC has not made any changes to the calibration of the leverage ratio buffers and clarified that the ALRB (which is set at 35 per cent. of a firm's risk-based G-SII and O-SII buffer), remains relevant only to firms with an active G-SII or O-SII riskweighted buffer.

RWA floors and IRB modeling

The Basel Committee published their final reforms to the Basel III framework in December 2017. The amendments include changes to the standardized approaches for credit and operational risks and the introduction of a new RWA output floor. The rules are subject to a transitional period from 2023 to 2028 (deferred by 12 months in light of Covid-19). On August 2, 2019, the EBA published its draft policy advice on (among other things) the Basel III output floor. The EBA recommended that:

- the output floor, at the 72.5% level set in the Basel agreement, should be implemented by EU institutions;
- the floored RWAs should be used as the basis across RWA-based capital requirements (including the minimum capital requirement, Pillar 2 requirements and buffer requirements) and at all levels of a banking group (including group consolidated, sub-consolidated and individual level);
- the implementation of the output floor should follow the five-year transitional path from 2022 (now delayed to 2023) as set out in the Basel III agreement, including the transitional cap of a 25% increase in RWA; and
- the legislation implementing these changes to the Basel III framework should clarify that the principal loss absorption trigger in AT1 instruments should be based on floored ratios (i.e. the CET1 ratio(s) based on the floored RWAs).

On March 5, 2020, the EBA published an additional analysis regarding the output floor. The analysis is based on a sample of 221 institutions belonging to 51 banking groups. Overall, the EBA concluded that the impact of applying the output floor at the individual level does not seem to be particularly high (with the exception of cooperative banks, for which the output floor is the main driver, but for which the overall impact of the reform is the lowest).

Following the expiration of the Brexit transition period, the application of the output floor in the UK is a matter for the UK legislature and the Issuer's prudential regulators. HM Treasury and the PRA confirmed in April 2020 that they remain committed to the full, timely and consistent implementation of the Basel standards and will work together towards a UK implementation timetable that is consistent with the one year delay to the implementation of the December 2017 reforms announced by the Group of Central Bank Governors and Heads of Supervision in March 2020.

On April 29, 2021, the FSA 2021 received Royal Assent. A key element of the FSA 2021 is the UK implementation of the outstanding Basel III standards including the final Basel III standards. The FSA 2021 enables the implementation of the outstanding Basel III standards by giving HM Treasury the power to repeal the elements of UK CRR that need to be updated to reflect the latest Basel standards. Following repeal, many of the updates will be implemented through rules made by the PRA. This will primarily involve technical changes to the UK prudential framework as it relates to credit risk, market risk, counterparty credit risk, operational risk, large exposures, collective investment units, liquidity standards and reporting, among others. A consultation on the UK implementation of the final Basel III standards is anticipated in Q4 2021 with the resulting Policy Statement anticipated in Q3 2022. The Basel implementation deadline is currently expected to be January 1, 2023.

In addition, in June 2017, the PRA published a policy statement relating to residential mortgage risk-weights, including proposals to align firms' IRB modelling approaches for residential mortgage risk-weighted assets and sets out a number of modifications to the IRB modelling methodologies for residential mortgages. The PRA has set the expectation for firms to update IRB models by January 1, 2022.

On May 14, 2020, the PRA published a policy statement on probability of default and loss given default estimation for credit risk (PS11/20). The provisions in this policy will take effect on January 1, 2022.

The PRA published a Policy Statement, *'Internal Rating Based UK mortgage risk weights: Managing deficiencies in model risk capture'* on July 6, 2021 implementing an exposure weighted average risk weight of at least 10 percent for all UK residential mortgage exposures to which a firm applied an IRB approach. The policy is applicable from January 1, 2022. The PRA made a number of changes to its draft proposals in CP14/20, namely: (i) the PRA decided not to introduce the proposed 7 percent minimum risk weight expectation on individual UK mortgage exposures. Instead, the PRA stated that it would consider carefully the calibration of the incoming PD and LGD parameter floors for mortgage exposures as part of the PRA's implementation of the final Basel III standards; and (ii) mortgage exposures classified as in default will be excluded from the 10 percent average minimum risk weight expectation. The Policy Statement will be implemented on January 1, 2022. Additionally, on October 20, 2021, the PRA published Policy Statement PS23/21 *"Credit risk: The identification of the nature, severity, and duration of an economic downturn for the purposes of Internal Ratings Based (IRB) models"*. It contains the PRA's final policy including a new UK Technical Standards Instrument, an updated Supervisory Statement (SS) 11/13 *"Internal Ratings Based (IRB) approaches"*, and versions of the relevant European Banking Authority (EBA) Guidelines as they stood at the end of the transition period.

These reforms represent a re-calibration of regulatory requirements with no underlying change in the capital resources we hold or the risk profile of our assets. The final impacts are subject to uncertainty for future balance sheet size and mix, and the final detail of some elements of the regulatory changes remain at the PRA's discretion. However, the discussion of an introduction of these RWA floors and IRB calibration changes is likely to lead to a significant increase in our risk weights over time and we currently expect the consequential impact on our reported CET1 ratio ultimately to be a reduction of approximately 45-50 percent relative to our current methodology. However, organic earnings through the transitional period are expected to mitigate the impact such that our reported CET1 ratio will in practice remain well in excess of the pro forma levels imposed by these changes, and we expect that leverage requirements will remain our binding capital constraint based on our latest projections. Whilst we currently expect that the leverage ratio will continue to be our binding Tier 1 capital constraint in the near-term, it is possible that these changes will, over time, result in risk-weighted capital requirements becoming the binding constraint.

MREL and resolution strategy

MREL requirements are being introduced as part of a regime designed to make it easier to manage the failure of banks and building societies in an orderly way, without reliance on taxpayer bail-outs. These rules require all institutions to meet an individual MREL requirement by issuing own funds (capital instruments) and other 'eligible liabilities' which are available to be bailed-in (i.e. written down or converted to equity on the occurrence of certain trigger points), calculated as a percentage of total liabilities and own funds and set by the relevant resolution authorities.

The Bank of England has set the Society an indicative MREL requirement of 6.5% of its UK leverage exposure). MREL requirements are split into two elements: firstly, a loss absorption amount, to cover losses up to and in resolution, based on a firm's minimum going concern capital requirement; and secondly, a recapitalization amount, intended to enable the firm to continue as a going concern post-resolution and to access funds in the capital markets (and accordingly the recapitalization amount is likely to be at least equal to the minimum going concern capital requirement). On May 7, 2020, the Bank of England announced that 2021 MRELS will reflect the PRA's policy changes to Pillar 2A capital setting announced on the same date. The Bank of England released a discussion paper on December 18, 2020 regarding its approach to setting MREL as a first stage of its expected MREL review and indicated that the review will complete in 2021, not 2020 as initially planned. The Bank of England confirmed in this discussion paper that it considers it appropriate for mid-tier credit institutions to be given a longer timeframe within which to meet higher MRELS, confirmed its view that for G-SIBs and D-SIBs (such as the Society) a bail-in resolution strategy remains appropriate and its commitment that such firms be resolvable by 2022. The deadline for responses to the discussion paper was March 18, 2021. On December 3, 2021, the Bank of England published a Policy Statement concluding the final stage of the Bank's MREL Review and set out the Bank's changes to its MREL framework. The Paper considers the resolution strategy thresholds, the calibration of MREL, instrument eligibility, and the application of MRELS within banking groups. The revised Statement of Policy will apply from January 1, 2022.

In addition to our MREL requirement, we must also hold applicable leverage ratio buffers of 0.35% of our UK leverage exposure. Together the MREL requirement and applicable buffers represent our "loss-absorbing capacity" requirement. As at September 30, 2021, our MREL resources were equal to 8.6% of the UK leverage ratio exposure.

The preferred resolution strategy for the Society has been set by the Bank of England as "bail-in", reflecting our size and consequential risks of an insolvency process. 'Bail-in' would involve the write down or conversion to equity instruments (such as CCDS) of the liabilities of the Society, and would be expected to result in the write down or conversion of all or a large part of our own funds and other eligible liabilities (and could in addition result in the write down or conversion of our other, more senior-ranking liabilities). Notwithstanding this, the actual approach taken, should we require resolution, will depend on the circumstances at the time of a failure, and all available options would be considered by the Bank of England (as our resolution authority).

Stress Tests

Since 2014, the Bank of England has conducted annual stress tests of the UK banking system. The annual cyclical scenario includes all major UK banks and building societies with total retail deposits equal to, or greater than, £50 billion on an individual or consolidated basis, at a firm's financial year-end date. This group includes the Society. The findings from the 2019 stress test (in which the FPC modeled deep simultaneous recessions in the UK and global economies that were more severe overall than the global financial crisis, combined with large falls in asset prices and a separate stress of misconduct cost) showed that we would remain profitable, with capital levels well above regulatory requirements (CET1 capital falling to 13.1% at its lowest point — 5.2% above the hurdle rate—and UK leverage ratio falling to 4.8% at its lowest point), with full distributions continuing to be made on all Tier 1 capital instruments.

On March 20, 2020, the Bank of England cancelled the 2020 bank stress tests and instead undertook desktop analysis of the resilience of the UK banking sector to the unfolding stress, in light of the Covid-19 pandemic. In December 2020, the FPC judged that UK banks, in aggregate, have capital buffers that allow them to lend in and remain resilient to a wide range of possible outcomes for the UK and global economies. This judgement was based on analysis in a 'reverse stress test' exercise, conducted in August 2020. The 2021 bank stress tests are occurring in the usual manner to update and refine this previous assessment (although institutions will not be requested to submit baseline projections), according to the timetable set out by the Bank of England. Institution-specific results are due to be published in Q4 2021.

Resolvability Assessment Framework

On July 30, 2019, the Bank of England and PRA published final rules and policy in relation to the “Resolvability Assessment Framework” (“**RAF**”), under which the Bank of England and PRA will assess the readiness of UK banks and building societies for resolution. The framework is set out in a Bank of England Statement of Policy (“**SoP**”) and a new Resolution Assessment part of the PRA Rulebook (together with a PRA Supervisory Statement SS4/19). The Bank of England SoP only applies to UK firms with a bail-in or partial transfer resolution strategy.

The SoP specifies three “resolvability outcomes” which relevant firms must meet – (i) having adequate financial resources in the context of resolution, (ii) being able to continue to do business through resolution and restructuring, and (iii) being able to communicate and coordinate effectively within the firm and with authorities and markets so that resolution and subsequent restructuring are orderly. The new Resolution Assessment part of the PRA Rulebook applies to UK banks and building societies with £50 billion or more in retail deposits (so-called “**Major Firms**”), and requires them to assess their preparations for resolution and submit reports of their assessment to the PRA every two years. We are subject to this requirement and submitted our inaugural assessment in October 2021.

In addition, the Bank of England will make public statements regarding each Major Firm’s resolvability; these may highlight perceived shortcomings where the Bank of England considers that the firm in question has more work to do to be resolvable. The initial submission to the Bank of England was delayed due to Covid-19, and initially published a ‘modification by consent’ to give effect to this. The PRA subsequently published a consultation paper (CP19/20) on October 28, 2020 proposing to amend their rules in accordance with the changes set out in the modification by consent, thereby extending by one year the dates by which firms were first required to submit a report of their assessment of their preparations for resolution to the PRA to October 1, 2021. We have submitted our report to the Bank of England, who will publish a summary of this report by June 2022. The Bank of England published an updated Statement of Policy which focused on the Bank of England’s ‘Approach to Assessing Resolvability’, made amendments to the Operational Continuity Part of the PRA Rulebook, as well as publishing a new Supervisory Statement 4/21 on ‘Ensuring operational continuity in resolution’. Resolution continues to be a highly complex and important area for the UK regulators. All of the UK’s largest firms are required to meet the resolution outcomes by January 1, 2022, with the exception of the updated policy on Operational Continuity in Resolution, which has an implementation date of January 1, 2023.

Impact of Brexit

On January 31, 2020, the United Kingdom ceased to be a member of the EU and the EEA.

On December 24, 2020, an agreement in principle was reached in relation to the EU-UK Trade and Cooperation Agreement (the “**Trade and Cooperation Agreement**”), to govern the future relations between the EU and UK following the end of the transition period. The Trade and Cooperation Agreement does not, however, create a detailed framework to govern the cross-border provision of regulated financial services from the United Kingdom into the European Union and from the European Union into the United Kingdom.

The Trade and Cooperation Agreement is accompanied by the non-binding Joint Declaration committing the UK and the EU to cooperation in matters of financial regulation such as requirements for reporting under MiFID II, certain MAR requirements and the UK binding technical standards on strong customer authentication among others. The Joint Declaration was facilitated by a memorandum of understanding, agreed on March 26, 2021, establishing the framework for this cooperation.

Following the end of the transition period, the EUWA provided that certain existing EU legislation which had direct effect in the UK were retained in UK law as well as existing UK laws which implemented EU obligations. The UK government was given powers to amend this retained EU legislation so that it works effectively when the UK left the EU. The UK government has used this power to make numerous statutory instruments which amended retained EU financial services legislation. The UK government’s intention was that

the same rules and laws apply at the point the transition period ends, as far as possible, but with the necessary amendments to reflect the UK's position outside the EU.

The UK government has also conferred on the UK financial regulators (that is, the FCA, the Bank of England and the PRA) responsibility for amending and maintaining certain EU-binding technical standards which were retained in UK law at the end of the transition period. These technical standards specify detailed requirements for the purposes of various EU regulations and directives. In addition, the FCA and the PRA have amended their rules and regulations to ensure that these are consistent with the changes that the UK government made to retained EU law and so that it still works effectively following the end of the transition period.

Accordingly, following the end of transition period, the rules applicable to us changed. To help firms, like the Society, to adapt to the new requirements, the UK government has given the UK financial regulators the power to make transitional provisions in relation to financial services legislation for a temporary period. This is known as the "Temporary Transitional Power". The FCA and the PRA issued directions and guidance according to which the FCA and PRA are applying the Temporary Transitional Power on a broad basis from the end of the transition period until March 31, 2022. Where the Temporary Transitional Power applies, the Society will be able to continue to comply with the requirements which applied prior to the end of the transition period for a limited period and use the duration of the Temporary Transitional Power to prepare for full compliance with the new UK regulatory regime by March 31, 2022. However, there are certain areas where the Temporary Transitional Power does not apply. In these areas, the FCA and the PRA stated that they expected firms to comply with the relevant changes from December 31, 2020. These areas include (but are not limited to) requirements on transaction reporting under UK MiFIR, certain requirements under UK MAR and the UK binding technical standards on strong customer authentication, as well as contractual recognition of bail-in rules, contractual stays and changes being made to the rules on depositor and policyholder protection.

Now that the transition period has ended, our preparations have allowed us to comply with the new rules and regulations which took effect from January 1, 2021. Changes implemented within the Society as a result of Brexit were spread across several organizational areas with primary activity occurring within the Product teams.

Under the terms of the EUWA, EU legislation that was adopted but did not apply prior to the end of the transition period (such as provisions being phased in under the EU Banking Reform Package, as defined below) and legislative proposals that were in negotiation but not adopted before the end of the transition period are out of scope of the EUWA. This means these legislative measures that were not a requirement at the end of the transition period do not and will not apply in the UK unless these are separately implemented by the UK government or regulators.

The continuing effects of the UK's departure from the EU are difficult to predict and there remains both short-term and long-term political and economic uncertainty around the departure that may have a negative impact on the UK economy, affecting its growth. Accordingly, no assurance can be given that the UK's withdrawal from the EU will not adversely affect us, our financial condition and results of operations and/or the market value and/or the liquidity of the Notes.

UK REGULATION

The UK Building Societies Act

The UK Building Societies Act, as amended, governs the creation, authorization and management of building societies. We are regulated by the FCA in relation to conduct of business matters and by the PRA in relation to prudential requirements. With the introduction of the FSMA, certain sections of the UK Building Societies Act were repealed. However, a substantial part of the UK Building Societies Act, including the constitutional parts dealing with the principal purpose of building societies, nature limits and general governance, among others, still remain in force. The UK Building Societies Act has been amended and supplemented since its introduction by primary and secondary legislation.

On April 6, 2018, certain changes were made to the restrictions on building societies from trading in currencies and entering into transactions involving derivative investments. The effect of the changes is to increase the value of a permitted currency transaction which a society or a subsidiary undertaking may enter into from £100,000 to £3 million and to permit a society or a subsidiary undertaking to enter into derivative transactions (in connection with Article 37 of the EU Regulation on OTC derivatives, central counterparties and trade repositories) where required to do so by a central counterparty or a recognized clearing house and thereby permitting a society or subsidiary undertaking to be a member of a clearing house where such a requirement exists.

The UK Building Societies Act and related legislation was amended by the Building Societies Legislation (Amendment) (EU Exit) Regulations 2018, as amended, (“**Building Societies EU Exit Regulations**”), which came into effect at 23:00 GMT on December 31, 2020, to equalize the treatment of EEA countries and other third countries after the end of the Brexit transition period. The amendments have impacted our ability to diversify into lending secured on properties in EEA member states (as such loans no longer count towards the statutory lending limit) and the ability to merge with companies and mutuals in EEA member states. Neither of these restrictions has given rise to any concerns for the Society as they do not impact our current business strategy.

Nature of UK building society regulation

The following sections describe some of the concepts for a building society that is authorized under FSMA.

Mutuality

Building societies are mutual organizations that are managed for the benefit of their members, who are primarily current account, retail savings and residential mortgage customers. Each member is normally entitled to one vote at a building society’s general meeting, regardless of the size of the member’s deposit account or mortgage loan or the number of accounts the member maintains.

Purpose

Building societies are required to be engaged primarily in the business of making loans secured on residential property, which are substantially funded by members. In addition, as long as building societies comply with specific limits on lending and funding, they may engage in additional activities such as commercial lending, unsecured personal lending, insurance and personal investment product activities, subject to compliance with regulatory requirements of the FCA, the PRA and the CMA. The general restriction which used to apply to building societies from creating floating charges was removed by the Banking Reform Act with effect from March 26, 2015.

Building societies have a statutory duty to keep accounting records as well as establish and maintain systems of control. The FCA and the PRA are empowered to request *ad hoc* reports regarding a society’s compliance with these requirements.

Nature of membership

The members of a building society fall into two categories. The first category consists of investing or “shareholding” members. Shareholding members are individuals who have made a deposit (also referred to as an “**investment**”) in a share account with a building society or who hold deferred shares in the society, and bodies corporate which hold deferred shares. Deposits in these share accounts are referred to as “UK retail member deposits” and people holding UK retail member deposits are referred to as “UK retail member depositors”. “**Deferred shares**” include our CCDS, Reset Perpetual Contingent Convertible Additional Tier 1 Capital Securities and PIBS.

There are restrictions on building societies raising funds from individuals other than in the form of deposits in share accounts or by the issue of deferred shares (including PIBS and the CCDS (see further below)).

The second category of members are “borrowing” members, that is, individuals who have received a loan from the building society (or in certain cases, if the rules of the society allow, from another person who holds the benefit of the loan for the building society) which is fully or, if the rules of the society allow, substantially secured on land. Building societies may also make loans that do not confer member status, which generally consist of unsecured loans.

Limitations on funding and lending

The UK Building Societies Act imposes limits on the ability of building societies to raise funds and to make loans. Investing shares in a building society, representing UK retail member deposits made with the society, must account for not less than 50% of its total funding. In calculating this amount, a specified amount of deposits made by individuals with a building society’s subsidiaries in the Channel Islands, the Isle of Man or Gibraltar is disregarded. The specified amount in each case is up to 10% of what would have been the building society’s funding but for the exclusion. Deposits with a building society or any of its subsidiaries by small businesses are also disregarded from the calculation up to a maximum of 10% of what would have been the building society’s funding but for the exclusion.

Loans made by a building society and its subsidiaries which are fully secured on residential property must account for not less than 75% of its total trading assets (that is, the total assets of a building society and its subsidiaries, plus provisions for bad or doubtful debts, less liquid assets, fixed assets and certain long-term insurance funds).

Building Societies (Financial Assistance) Order 2010

On April 7, 2010, the Building Societies (Financial Assistance) Order 2010 (the “**Financial Assistance Order**”) came into force in exercise of certain powers under the UK Banking Act 2009 for the purpose of modifying the application of the UK Building Societies Act in specified circumstances to facilitate the provision of relevant financial assistance (including the giving of guarantees or indemnities or any other kind of financial assistance (actual or contingent)) by certain ‘qualifying institutions’. Qualifying institutions for this purpose include HM Treasury, the Bank of England, another central bank of a Member State of the EEA, the European Central Bank, or any person acting for or on behalf of any of such institution or providing financial assistance to a building society on the basis of financial assistance received from such an institution. Most significantly, the Financial Assistance Order permits any qualifying institution to provide such assistance without it counting for the purpose of the 50% limit on the building society’s non-member funding and the Financial Assistance Order also modifies the application of the purpose test and the lending limit.

Nature of capital

UK retail member deposits are classified as shares in a building society’s balance sheet. There is a fundamental distinction between a share in a building society and a share in a limited liability company. Holders of ordinary shares in a company normally do not have the right to withdraw their share capital from the company. The share capital of a company is therefore fixed. A UK retail member depositor has a right to withdraw his or her investment from a building society. The share capital of a building society therefore fluctuates each time UK retail member depositors deposit or withdraw funds from their account. As a result shares in a building society do not form a permanent capital resource.

A building society’s CET1 therefore consists primarily of its reserves (in our case, these have been built up over the years mainly from retained earnings – as we have made an annual profit for over 95 years), any deferred shares that it has issued and tier 2 subordinated debt. Prior to the development of CCDS, the deferred shares issued by the Society were mainly in the form of PIBS, which historically counted towards a society’s ‘core tier 1 capital’ (the predecessor to CET1 capital). Changes to the capital adequacy framework which were implemented in the UK at the end of 2010, toughened the requirements for tier 1 capital. PIBS, which were already in existence, retained their capital status but the extent to which such deferred shares count towards regulatory capital is being phased out over a long transitional period. CCDS meet the regulatory criteria for building society

CET1 capital, while being consistent with the values of mutuality and supporting members' interests. The CCDS are also designed to be a suitable instrument for raising new capital from external investors.

We have also issued Reset Perpetual Contingent Convertible Additional Tier 1 Capital Securities which qualify as AT1 capital under the CRR.

Hedging

The UK Building Societies Act prohibits building societies and their subsidiaries from entering into any transaction involving derivative instruments unless the transaction falls within one of the specified exceptions, including where it is entered for the purpose of limiting the extent to which the society will be affected by fluctuations in interest rates, exchange rates, any index of retail prices, any index of residential property prices, any index of the prices of securities or the ability or willingness of a borrower to repay a loan owing to the building society.

On April 6, 2018, certain changes were made to the restrictions on building societies from trading in currencies and entering into transactions involving derivative investments. The effect of the changes is to increase the value of a permitted currency transaction which a society or a subsidiary undertaking may enter into from £100,000 to £3 million and to permit a society or a subsidiary undertaking to enter into derivative transactions (in connection with Article 37 of the EU Regulation on OTC derivatives, central counterparties and trade repositories) where required to do so by a central counterparty or a recognized clearing house and thereby permitting a society or subsidiary undertaking to be a member of a clearing house where such a requirement exists.

Demutualization

The UK Building Societies Act permits a building society to demutualize by transferring the whole of its business to an existing company (referred to as a “**takeover**”) or to a specially formed company (referred to as a “**conversion**”) so long as the process meets statutory requirements. Any such demutualization must be approved by members and the PRA. The successor company will be a bank, which must be duly authorized to carry on its deposit-taking.

The member approval threshold required varies depending on the type of demutualization. In order to convert into a new bank by transferring the building society's business to a specially formed company, a minimum of 50% of shareholding members qualified to vote would have to vote on a requisite shareholders' resolution, and a minimum of 75% of those voting would have to support the resolution to convert. In addition, more than 50% of borrowing members who vote would have to vote in favor of a borrowing members' resolution to convert. On a demutualization as a result of a takeover by an existing bank or other company, the requirements would be similar except that 50% of shareholding members qualified to vote (or shareholding members representing 90% by value of the society's shares) must actually vote in favor of the requisite shareholding members' resolution. In certain circumstances, where the PRA considers it expedient to do so in order to protect the investments of shareholders or depositors, the PRA may direct that the requisite shareholders' resolution on a takeover may be effective if it is passed by a minimum of 75% of shareholding members qualified to vote and voting on the resolution.

Mutual society transfers

The UK Building Societies Act (as modified by the Mutual Societies (Transfers) Order 2009) permits a building society to transfer the whole of its business to the subsidiary of another mutual society (as defined in section 3 of the Building Societies (Funding) and Mutual Societies (Transfers) Act 2007 (the “**Funding and Mutual Societies Transfers Act**”). The successor subsidiary must be duly authorized to carry on its deposit-taking business. The terms of the transfer to the relevant subsidiary must include provision for making membership of the holding mutual (or membership of the parent undertaking of such holding mutual) available to every qualifying member of the building society and to every person who, after the transfer, becomes a customer of the company, and the membership of the holding mutual (or such parent undertaking) must be on terms no less

favorable than those enjoyed by existing members of the holding mutual (or such parent undertaking, as the case may be).

A transfer of business to a subsidiary of another mutual society requires approval by members and confirmation by the PRA. The member approval thresholds require a shareholding members' resolution to be passed by a minimum of 75% of shareholding members qualified to vote and voting on the resolution and a borrowing members' resolution to be passed by more than 50% of borrowing members qualified to vote and voting on the resolution.

Directed transfers

The UK Building Societies Act confers power on the PRA, if it considers it expedient to do so in order to protect the investments of shareholders or depositors, to direct a building society to transfer all of its engagements to one or more other building societies or to transfer its business to an existing company. The Financial Services Act 2012 also amended the UK Building Societies Act to extend this power of direction to a transfer of a building society's business to an existing or specially formed company that is a subsidiary of another mutual society (as defined in section 3 of the Funding and Mutual Societies Transfers Act). Where any such direction is made, the PRA may also, if it considers it expedient to do so in order to protect the investments of shareholders or depositors, direct that such transfer may proceed on the basis of a resolution of the board of directors of the building society, without the need for member approval.

The UK regulators

The PRA is currently the prudential regulator for building societies, banks, insurance companies and other deposit takers. The general objective of the PRA is promoting the safety and soundness of PRA-authorized persons.

The PRA supervises and regulates financial institutions, including building societies, on an ongoing basis by continually assessing their risk profile and capacity to manage and control risks. If the PRA finds that a financial institution has failed to comply with the requirements under the FSMA, the PRA has a variety of enforcement powers including:

- issuing a private warning; or
- taking disciplinary measures, such as issuing a public statement of misconduct or imposing a financial penalty.

The FCA is currently the conduct regulator for firms that are prudentially regulated by the PRA (dual-regulated firms). The FCA regulates both prudential and conduct matters for all other firms. The FCA's strategic objective is ensuring the relevant markets function well. The FCA's operational objectives are:

- the consumer protection objective;
- the integrity objective; and
- the competition objective.

The FCA also has a variety of enforcement powers under the FSMA, and from April 1, 2014, is responsible for supervision of consumer credit regulation and superintendence and enforcement of the Consumer Credit Act 1974, as amended.

As set out below, the CMA also enjoys certain enforcement powers under the UK financial services regime.

Operational Resilience

On March 29, 2021, the PRA published its Policy Statement PS 6/21 titled “*Operational resilience: Impact tolerances for important business services.*” The Policy Statement provides feedback on the responses to Consultation Paper 29/19, and sets out its policy interventions on operational resilience, effective from March 31, 2022. The regulators expect firms and Financial Market Infrastructures (“**FMI**s”) to identify their important business services that, if disrupted, could cause harm to consumers or market integrity, threaten the viability of firms or cause instability in the financial system. Impact tolerances should be set for each important business service and firms and FMIs should take actions to be able to remain within their impact tolerances through a range of severe but plausible disruption scenarios. Firms and FMIs are expected to identify and document the people, processes, technology, facilities and information that support their important business services. The policy requires boards and senior management to approve the important business services identified for the firms and the impact tolerances set. Boards are expected to ensure they have the appropriate management information, adequate knowledge, skills and experience to provide constructive challenge to senior management and informed decisions that have consequences for operational resilience.

On the same day, the FCA published its Policy Statement PS21/3 titled ‘*Building operational resilience: Feedback to CP19/32 and final rules*’. These rules and guidance will also come into force on March 31, 2022, and require that:

- by March 31, 2022, firms must have identified their important business services, set impact tolerances for the maximum tolerable disruption and carried out mapping and testing to a level of sophistication necessary to do so. Firms must also have identified any vulnerabilities in their operational resilience; and
- as soon as possible after March 31, 2022, and no later than March 31, 2025, firms must have performed mapping and testing so that they are able to remain within impact tolerances for each important business service. Firms must also have made the necessary investments to enable them to operate consistently within their impact tolerances.

The Financial Policy Committee (“**FPC**”) has also undertaken work in this area, with a particular focus on cyber risk. The FPC will ask firms to conduct cyber stress testing. This is planned to take place in 2022. At an international level, the Basel Committee on Banking Supervision (“**BCBS**”) has established the Operational Resilience Working Group and in December 2018 the BCBS published a report on cyber resilience. This report identified areas which further policy work is likely to be undertaken. In view of Covid-19, on April 16, 2020 the Basel Committee also published a brief entitled “Covid-19 and operational resilience: addressing financial institutions’ operational challenges in a pandemic”, which states that financial institutions’ cyber resilience processes should remain vigilant in order to identify and protect vulnerable systems. These processes should also be able to detect, and respond to cyber attacks, as well as assist with the relevant institution’s recovery from them. On March 31, 2021, the Basel Committee issued its “Principles for operational resilience” and made revisions to its “Principles for the sound management of operational risk.”

Market Competition

On September 28, 2018, the CMA received a super-complaint from Citizens Advice about loyalty pricing issues in the mobile, broadband, cash savings, home insurance and mortgages markets. The CMA investigated the complaint and published its response on December 19, 2018. In its response, the CMA recommended eight key reforms to address problems related to the “loyalty penalty” across all five markets together with market-specific reforms. In the case of cash savings, the CMA supports the FCA’s work around the introduction of a basic savings rate, as well as recommending that the FCA considers if collective switching can be applied. In relation to mortgages, the CMA strongly supports the FCA’s work on the mortgages market study and recommended that the FCA find out more about customers who could switch, but do not, and look at what measures can be taken to help or protect these customers where needed. The Government responded to the CMA’s recommendations on June 18, 2019 indicating that it welcomed the CMA’s recommendations for financial services and that the FCA has ongoing work in the cash savings, insurance and mortgage markets. In its 2019/2020 Business Plan, the FCA

states that it will consider what action will best address the fact that those customers who shop around often get much better rates in the cash savings and insurance market and will publish proposals to address this, including exploring whether price interventions may be relevant. On October 4, 2019, the FCA also published an interim report on its Market Study MS 18/1 “General insurance pricing practices market study”. In the report, the FCA found that the home and motor insurance markets are not working well for all consumers and considered that regulatory intervention is required.

On September 22, 2020, the FCA published the final report of its market study, proposing significant reform of these markets through measures which seek to enhance competition, ensure consumers will receive fair value, and increase trust in these markets. The reforms proposed by the FCA include that, when a customer renews their home or motor insurance policy, the relevant customer should pay no more than they would if they were new to the provider through the same sales and channels. The FCA also issued a consultation paper CP20/19 considering other new measures to further boost competition and deliver fair value to all insurance customers. These include proposed new product governance rules, additional reporting requirements and rules on making it simpler to stop automatic renewals across all general insurance products. The consultation closed on January 25, 2021. On March 23, 2021, the FCA published a statement on the consultation noting that, although it had not yet reached a final decision on what rule changes it would make, it expected firms to implement the systems and control and product governance changes by September 2021, and pricing and auto-renewal remedies by the end of 2021.

On January 9, 2020 the FCA also published a Consultation Paper CP 20/1 “Introducing a Single Easy Access Rate for cash savings”. The consultation was due to close in April 2020 and was extended until December 15, 2020 due to the impact of Covid-19. Given the continuing impact of Covid-19 and the low-interest rate environment, the FCA decided to stop this consultation altogether. The FCA stated that as interest rates for new products fall, so does the gap between rates paid to new and longstanding customers, and the size of the harm falls. Accordingly, the FCA does not consider that introducing a single easy access rate for cash savings would be proportionate to the current level of harm in this market. However, the FCA will continue to monitor the market and may revisit this decision if the FCA sees significant harm to consumers in the future. See “*CMA and FCA regulation to increase competition*” below for further information in respect of regulatory action to increase competition and to protect customers.

On November 29, 2021, it was announced that the FCA’s Mortgage Prisoner Review has been laid before Parliament. The FCA encourages lenders to consider if they can amend their lending criteria to lend to mortgage prisoners who are close to their risk appetite. The Government will use this review to consider if there are further practical and proportionate solutions for mortgage prisoners. The FCA will continue to enforce its guidance for firms on the fair treatment of vulnerable customers, to help ensure fair outcomes for customers with characteristics of vulnerability.

Authorization under the FSMA

The FSMA prohibits any person from carrying on a “regulated activity” by way of business in the UK unless that person is authorized or exempt under the FSMA. Regulated activities include amongst other things: deposit-taking, mortgage activities (such as entering into, administering, or advising or arranging in respect of, regulated mortgage contracts), consumer credit activities (such as broking, lending, administration and collection), effecting and carrying out contracts of insurance as well as insurance mediation, and investment activities (such as dealing in investments as principal or as agent, arranging deals in investments, and managing investments). We are authorized for, among other things, deposit-taking, mortgage and certain investment activities. We are also authorized for various consumer credit activities. The FSMA also prohibits financial promotions in the UK unless the promotion is issued or approved by an authorized person or is exempt from such requirements. The FSMA imposes criminal and civil sanctions for firms acting without appropriate authorization as well as in relation to the communication of financial promotions which are not otherwise approved or exempt.

The FSMA (as amended by the Financial Services Act 2012) imposes an ongoing system of regulation and control on building societies. The detailed rules and prudential standards set by the FCA and the PRA are

contained in various parts of the FCA Handbook and the PRA Rulebook together with guidance in various policy statements and supervisory statements.

The FSMA was amended in the UK by numerous statutory instruments, including but not limited to Financial Regulators' Powers (Technical Standards) (Amendment etc.) (EU Exit) Regulations 2018 and the Financial Services and Markets Act 2000 (Amendment) (EU Exit) Regulations 2019, to reflect the UK's exit from the EU.

Lending

Consumer credit

The regulatory framework in this area consists of the FSMA and secondary legislation and the Consumer Credit Association ("CCA") and secondary legislation, together with the FCA Handbook including the Consumer Credit sourcebook ("CONC"). A "regulated credit agreement" is defined as follows:

- For agreements entered into on or after April 1, 2014 article 60B of the FSMA (Regulated Activities) Order 2001 (the "RAO") provides that a regulated credit agreement is an agreement among: (i) an individual, (ii) a partnership consisting of two or three persons not all of whom are bodies corporate, or (iii) an unincorporated body of persons which does not consist entirely of bodies corporate and is not a partnership, between ("A") and any other person ("B") under which B provides A with credit of any amount, and which is not an exempt agreement within the RAO.
- For agreements entered into before April 1, 2014, a credit agreement which was a regulated credit agreement pursuant to section 8 of the CCA at the time the agreement was entered into (or became such an agreement after being varied or supplemented by another agreement before April 1, 2014), excluding those agreements which would now be regulated mortgage contracts or regulated home purchase plans under the RAO.

If requirements under the CCA as to entering into, documenting and servicing a regulated credit agreement are not or have not been met, then the agreement is unenforceable against the borrower without a court order or (for agreements entered into before April 6, 2007) is totally unenforceable, depending on the circumstances. Under sections 75 and 75A of the CCA, in certain circumstances a lender is liable to a customer in relation to misrepresentation and breach of contract by a supplier in a transaction financed by a credit agreement regulated by the CCA or treated as such, and the lender has a statutory indemnity from the supplier against liability under section 75, subject to any agreement between the lender and the supplier.

If prohibitions under FSMA as to authorization or financial promotions are contravened (by credit brokers as well as lenders like us), then the affected regulated credit agreement is unenforceable against the borrower without a validation order from the FCA.

On July 15, 2020, the draft Debt Respite Scheme (Breathing Space Moratorium and Mental Health Crisis Moratorium) (England and Wales) Regulations 2020 ("**Breathing Space Regulations**") were laid before the UK Parliament, which have implemented a new breathing space scheme from May 4, 2021. The scheme allows individuals struggling with problem debt an extra 60 days to get their finances under control, while they receive debt advice via professional debt advice providers in order to enter an appropriate debt solution. The scheme also provides for an alternative means to access the protections of a moratorium where individuals are receiving mental health crisis treatment, which will enable the protections to be in place for the duration of their crisis treatment. No interest and fees on debts can be charged and almost all enforcement action will be paused during the moratorium period. However individuals would not be protected from enforcement action on any debts arising from failure to pay ongoing household liabilities, such as rent or mortgage payments. The breathing space will include almost all personal debts. On February 26, 2021 the FCA published a policy statement (PS21/1) outlining changes to the FCA Handbook as a result of the Breathing Space Regulations. The changes amend certain parts of CONC to clarify how the rules will apply where the Breathing Space Regulations also apply. On May 4, 2021

the Government published some guidance on the Breathing Space Regulations for creditors and debt collectors giving debt advice, although the creditor service is still under development.

There are also pending legislative changes to default notices required by the CCA. On October 7, 2020 HM Treasury announced that as part of the Government's effort to support people in problem debt, it will legislate to change the language and presentation of information in debt letters (i.e. Default Notices), providing that the new rules will make debt letters less threatening by restricting the amount of information that must be made prominent and requiring the use of bold or underlined text rather than capital letters. Lenders and owners will also now be able to replace legal terms with more widely understood words and letters will clearly signpost people to the best sources of free debt advice. The Consumer Credit (Enforcement, Default and Termination Notices) (Coronavirus) (Amendment) Regulations 2020, implementing these changes, were published on November 11, 2020 and came into force on December 2, 2020. All lenders will then be required to make the changes within six months. The Society will need to ensure the relevant changes are made to its template default notices in accordance with the implementation timescale in order to ensure the default notice remains valid under section 87 and 88 CCA.

Mortgage lending

FSMA, together with the RAO regulates mortgage credit within the definition of "regulated mortgage contract" and also regulates certain other types of home finance. A credit agreement is a regulated mortgage contract if it is entered into on or after October 31, 2004 and, at the time it is entered into: (a) the credit agreement is one under which the lender provides credit to an individual or to trustees; (b) the contract provides for the repayment obligation of the borrower to be secured by a first legal mortgage on land (other than timeshare accommodation) in the UK; and (c) at least 40% of that land is used, or is intended to be used, as or in connection with a dwelling by the borrower or (in the case of credit provided to trustees) by an individual who is a beneficiary of the trust, or by a related person. From March 21, 2016, the definition of regulated mortgage contract has changed in line with the United Kingdom's implementation of the Mortgage Directive (as defined below) and again as a result of the UK's withdrawal from the European Union. Importantly, a mortgage no longer needs to be a first charge mortgage to fall within the definition of a regulated mortgage contract; mortgage contracts secured on land in the EEA no longer fall within the definition of a regulated mortgage contract (see below). This and other changes to mortgage regulation as a result of the implementation of the Mortgage Directive are described in the "*Mortgage Directive*" section below.

If prohibitions under the FSMA as to authorization or financial promotions are contravened (by credit brokers as well as lenders), then the affected regulated mortgage contract (and, in the case of financial promotions, other credit secured on land) is unenforceable against the borrower without a court order. The FCA's Mortgages and Home Finance: Conduct of Business sourcebook (the "**MCOB**") sets out rules in respect of regulated mortgage contracts and certain other types of home finance. Under MCOB rules, an authorized firm (such as the Society) is restricted from repossessing a property unless all other reasonable attempts to resolve the position have failed, which can include the extension of the term of the mortgage, product type changes and deferral of interest payments.

Any credit agreement intended to be a regulated mortgage contract or unregulated may instead be wholly or partly regulated by the CCA or treated as such. Any credit agreement intended to be regulated by the CCA or treated as such or unregulated may instead be a regulated mortgage contract. This is because of technical rules on determining whether the credit agreement or any part of it falls within the definition of a regulated mortgage contract under the RAO or within the definition of a regulated agreement under the CCA (described below) and technical rules on changes to credit agreements.

Mortgage Directive

On March 31, 2011, the European Commission published a proposal for a directive on credit agreements relating to residential immovable property for consumers. The Council of the European Union adopted the Mortgage Directive (Directive 2014/17/EU) on January 28, 2014 and it was published in the Official Journal of

the European Union on February 28, 2014 (the “**Mortgage Directive**”). It entered into force twenty days after such publication and was implemented by the United Kingdom with effect from March 21, 2016.

The Mortgage Directive applies to: (a) credit agreements secured by a mortgage or comparable security commonly used in a member state of the EU (a “**Member State**”) on residential immovable property, or secured by a right relating to residential immovable property and (b) credit agreements the purpose of which is to provide finance to purchase or retain rights in land or in an existing or proposed residential building, and also extends the Consumer Credit Directive (2008/48/EC) to unsecured credit agreements the purpose of which is to renovate residential immovable property involving a maximum total amount of credit of EUR 75,000. The Mortgage Directive does not apply to certain equity release credit agreements to be repaid from the sale proceeds of an immovable property, or to certain credit granted by an employer to its employees but does apply to BTL mortgages (among other things).

The Mortgage Directive requires (among other things): standard information in advertising; standard pre-contractual information; adequate explanations to the borrower on the proposed credit agreement and any ancillary service; calculation of the annual percentage rate of charge in accordance with a prescribed formula; assessment of creditworthiness of the borrower and a right of the borrower to make early repayment of the credit agreement. The Mortgage Directive also imposes prudential and supervisory requirements for credit intermediaries and non-bank lenders.

The Mortgage Directive was implemented in the UK prior to the UK’s exit from the EU and the UK regime was subsequently amended to reflect the UK’s exit from the EU to ensure the rules continue to operate effectively in the UK. Notably, mortgage contracts entered into following the end of the transition period only qualify as regulated mortgage contracts for the purposes of the regime to the extent they relate to land in the UK (while mortgage contracts over land in the EEA which were entered into prior to the end of the transition period continue to qualify as regulated mortgage contracts). For the most part, the Government has sought to put in place what it has described as the minimum requirements to meet its legal obligations under the Mortgage Directive in respect of BTL mortgages. The legislation provides that firms do not need to apply the Government’s appropriate framework for BTL mortgages where a borrower is acting wholly or predominantly for the purposes of a business. HM Treasury has stated that they would expect consumer BTL activity to represent a small proportion of total BTL transactions. Generally speaking, the Mortgage Directive does not apply to credit agreements existing before March 21, 2016. However, the UK’s implementation of the Mortgage Directive also operates to retrospectively regulate certain credit agreements secured on land that were in existence at March 21, 2016, including existing second charge mortgages (consumer credit back book mortgage contracts). Certain provisions of MCOB are applicable to these consumer credit back book mortgage contracts. These include the rules relating to post-sale disclosure (MCOB 7), charges (MCOB 12) and arrears, payment shortfalls and repossessions (MCOB 13). General conduct of business standards will also apply (MCOB 2). This process is subject to detailed transitional provisions that are intended to retain certain customer protections in CONC and the CCA that are not contained within MCOB.

Any further changes in the legislative or regulatory framework for mortgage regulation, including as a result of any future review carried out by the FCA, or any changes to the FCA Handbook Rules, may adversely affect our businesses and operations.

Insurance

We are also authorized for carrying out insurance distribution. The Insurance: Conduct of Business sourcebook, which is part of the FCA Handbook, sets out certain rules in respect of non-investment insurance.

Financial Services Compensation Scheme

The FSMA established the Financial Services Compensation Scheme, or FSCS, which pays compensation to eligible customers of authorized financial services firms which are unable, or are likely to be unable, to pay claims against them. The limits of compensation are, generally (i) for deposits, 100% of the first £85,000 per person per firm for claims against firms declared in default from January 30, 2017; (ii) for

investments, £50,000 per person per firm for claims against firms declared in default from January 1, 2010 and £85,000 per person per firm for claims against firms in default from April 1, 2019, (iii) for home finance such as mortgage advice and arranging, 100% of the first £50,000 per person per firm for claims against firms declared in default from January 1, 2010 and £85,000 per person per firm for claims against firms in default from April 1, 2019; and (iv) for insurance, various amounts depending on the kind of insurance that the person has and when the firm failed. The FSCS only pays compensation for financial loss.

Financial Ombudsman Service

The FSMA established the Financial Ombudsman Service (the “**FOS**”), which determines complaints by eligible complainants in relation to authorized financial services firms, consumer credit licensees and certain other businesses, in respect of activities and transactions under its jurisdiction. The FOS determines complaints on the basis of what, in its opinion, is fair and reasonable in all the circumstances of the case. In March 2019, the FCA published Policy Statement PS 19/8 entitled “*Increasing the award limit for the Financial Ombudsman Service*”. New rules have been introduced with effect from April 1, 2019 which increase the maximum level of compensation which can be awarded by the FOS to (i) £355,000 for complaints referred to us on or after April 1, 2020; (ii) £350,000 for complaints about acts or omissions by firms on or after April 1, 2019 and (iii) £160,000 for complaints about acts or omissions by firms before April 1, 2019 and which are referred to the FOS after that date. For claims brought before April 1, 2019 in respect of acts or omissions by firms which also took place before that date, the old limit of £150,000 would still apply. Additionally, the compensation limit will be automatically adjusted each year for inflation (measured by reference to the Consumer Price Index (**CPI**)) from April 1, 2020 onwards. The FCA has also published final rules in December 2018 extending access to FOS compensation to more SMEs, as well as larger charities and trusts, and a new category of personal guarantors.

Unfair Terms in Consumer Contracts Regulations 1994 and 1999 and Consumer Rights Act 2015

In the UK, the Unfair Terms in Consumer Contracts Regulations 1999 as amended (the “**1999 Regulations**”), together with (in so far as applicable) the Unfair Terms in Consumer Contracts Regulations 1994 (together with the 1999 Regulations, the “**UTCCR**”), apply to agreements made on or after July 1, 1995 and before October 1, 2015. The UTCCR provides that a consumer may challenge a standard term in an agreement on the basis that it is “unfair” within the UTCCR and therefore not binding on the consumer (although the rest of the agreement will remain enforceable if it is capable of continuing in existence without the unfair term), and the lead enforcement body, and any “qualifying body” within the UTCCR (such as the FCA), may seek to enjoin a business from relying on unfair terms.

The Consumer Rights Act (the “**CRA**”) reforms and consolidates consumer law in the UK. The CRA involves the creation of a single regime for unfair contract terms out of the Unfair Contract Terms Act 1977 (the “**UCTA**”) (which essentially deals with attempts to limit liability for breach of contract) and the UTCCR. On the CRA Commencement Date (as defined below), certain sections of the CRA revoked the UTCCR, and introduced a new regime for dealing with unfair contractual terms with respect to contracts entered into on or after the CRA Commencement Date. The UTCCR will continue to apply to contracts entered into prior to the CRA Commencement Date as described above. The CRA was amended by the Consumer Protection (Amendment etc.) (EU Exit) Regulations 2018 (as amended) to reflect the UK’s exit from the EU to ensure the legislation continues to operate effectively in the UK.

Responsibility for enforcing the UTCCR and the CRA, which came into force from an unfair contract terms perspective on October 1, 2015 (the “**CRA Commencement Date**”), is divided between the CMA and certain other regulatory bodies, with the CMA being the lead regulator. Prior to April 1, 2014, the lead regulator for enforcement of the UTCCR was the Office of Fair Trading. The FCA has powers to enforce the UTCCR and the CRA in relation to agreements concerning financial services and products, including mortgages and other consumer credit agreements. While the CMA and FCA have powers to enforce the UTCCR and the CRA, it would be for a court to determine their proper interpretation. The extremely broad and general wording of the UTCCR makes any assessment of the fairness of terms largely subjective and makes it difficult to predict whether or not a term would be held by a court to be unfair. It is therefore possible that any loans covered by the UTCCR may

contain unfair terms which may result in the possible unenforceability of those terms of the underlying loans. UCTA and UTCCR will continue to apply to contracts entered into prior to the CRA Commencement Date.

The CRA provides that, among other things, a term which specifies the main subject matter of the contract, or a price term, is exempt from being reviewed as to its fairness if the term is transparent and prominent and that, in proceedings brought by individual consumers, the court is required to consider the fairness of a term, even if the consumer has not raised the issue of unfairness, where the court has available to it the legal and factual elements necessary for that task.

Under Part 2 of the CRA an unfair term of a consumer contract (a contract between a trader and a consumer) is not binding on a consumer (a term which has been revised to mean an individual acting for purposes that are wholly or mainly outside that individual's trade, business, craft or profession). In an additional change from the old regime, from the CRA Commencement Date, an unfair consumer notice will also not be binding on a consumer, although a consumer may rely on the term or notice if the consumer chooses to do so. A term will be unfair where, contrary to the requirement of good faith, it causes significant imbalance in the parties' rights and obligations under the contract to the detriment of the consumer. In determining whether a term is fair it is necessary to: (i) take into account the nature of the subject matter of the contract; (ii) refer to all the circumstances existing when the term was agreed; and (iii) refer to all of the other terms of the contract or any other contract on which it depends. The CRA also applies substantially the same test of fairness to consumer notices and generally refers to term and notices interchangeably. However, unlike the position under the old regime, the fairness protection under the CRA applies to both non-individually negotiated contracts and those that have been individually negotiated.

Schedule 2 contains an indicative and non-exhaustive "grey list" of terms of consumer contracts that may be regarded as unfair. Three of these "grey list" terms are new, having not been covered by the UTCCR. Paragraph 11 lists "a term which has the object or effect of enabling the trader to alter the terms of the contract unilaterally without a valid reason which is specified in the contract". However, paragraph 22 of the CRA (and paragraph 2(b) of Schedule 2 to the UTCCR) provides that this does not include a term by which a supplier of financial services reserves the right to alter the rate of interest payable by or due to the consumer, or the amount of other charges for financial services without notice where there is a valid reason if the supplier is required to inform the consumer of the alteration at the earliest opportunity and the consumer is free to dissolve the contract immediately.

A consumer contract may not be assessed for fairness to the extent that (i) it specifies the main subject matter of the contract; and/or (ii) the assessment is of the appropriateness of the price payable under the contract by comparison with the goods, digital content or services supplied under it; unless it appears on the "grey list" referenced above. A trader must ensure that a written term of a consumer contract, or a consumer notice in writing, is transparent i.e. that it is expressed in plain and intelligible language and is legible. Under the CRA, a trader must also ensure that the term is sufficiently prominent. The CMA considers this to be fully consistent with an interpretation of 'the core exemption' as intended to ensure that only those 'principal obligations' or price terms which are subject to the correcting forces of competition and genuine decision-making are fully assessable for fairness.

Where a term of a consumer contract is "unfair", it will not bind the consumer. However, the remainder of the contract will, so far as practicable, continue to have effect in every other respect. Where a term in a consumer contract is susceptible of multiple different meanings, the meaning most favorable to the consumer will prevail. In a shift from the old regime, under the CRA it is the duty of the court to consider the fairness of any given term. This can be done even where neither of the parties to proceedings has explicitly raised the issue of fairness.

On December 19, 2018, the FCA published finalized guidance: "*Fairness of variation terms in financial services consumer contracts under the Consumer Rights Act 2015*" (FG18/7), outlining factors the FCA considers firms should have regard to when drafting and reviewing variation terms in consumer contracts. The finalized guidance relates to all financial services consumer contracts entered into since July 1, 1995. The FCA stated that firms should consider both this guidance and any other rules that apply when they draft and use variation terms in their consumer contracts. The FCA stated that the finalized guidance will apply to FCA authorized persons and their appointed representative in relation to any consumer contracts which contain variation terms.

In view of the Covid-19 pandemic, the CMA published a statement on April 30, 2020, setting out its general views about how the law operates in relation to cancellation and refunds, noting that ultimately the position will be determined by the courts. On August 28, 2020 the CMA updated this statement to provide that where lockdown laws mean the service which can be provided is radically different to what was agreed the consumer would normally be able to cancel and receive a full refund, but if the differences in the service provided are only minor, a consumer should be able to choose between cancelling on the trader's standard terms (provided these are fair) or going ahead and receiving a proportionate discount. Further, where compliance with Covid-19 restrictions imposed as a matter of government guidance (rather than legislation) would prevent a consumer receiving a service, the consumer would have to cancel on the trader's standard terms, provided these are fair.

This area of law is rapidly developing and new regulatory guidance and case law as a result of this new legislation can be expected. During a Commons debate on February 11, 2020, the Parliamentary Under-Secretary of State of the Department for Business, Energy & Industrial Strategy (“**BEIS**”), announced that the BEIS was to publish a consumer and competition Command Paper in Spring 2020 and carry out a five-year review of the Consumer Rights Act 2015 later in the year. A consultation on ‘Reforming competition and consumer policy’ was published on July 20, 2021, and closed on October 1, 2021. The status of the Consumer Rights Act 2015 review is unknown, although a House of Commons Briefing Paper on the ‘Consumer Rights Act 2015’ was published on March 6, 2020. In addition, the ‘Reforming competition and consumer policy’ paper seeks views on the Consumer Rights Act 2015, as part of the UK consumer protection legal framework.

CMA and FCA regulation to increase competition

Following a market investigation into competition in the personal current accounts and the small and medium-sized enterprises (“**SME**”) retail banking markets, the CMA published its final report on August 9, 2016 which identified features of the markets for the supply of personal current accounts, business current accounts and SME lending that are having an adverse effect on competition. The CMA decided on a comprehensive package of remedial measures which included, among other things, the introduction of requirements to prompt customers to review the services that they receive from their bank at certain trigger points and to promote public awareness of account switching. On February 2, 2017, the CMA made the Retail Banking Market Investigation Order 2017 to implement the remedial measures. The FCA published PS19/16 entitled “*High-Cost Credit Review: Overdrafts policy statement*” on June 7, 2019 setting out the FCA's final rules. The rules require (among other things) firms to align the prices of unarranged overdrafts so that they are no more expensive than arranged overdrafts and simplify their overdraft pricing structures to charge a single annual rate of interest for both arranged and unarranged overdrafts. The overdraft pricing rules came into force on April 6, 2020 along with the overdraft pricing rules.

The FCA published amendments to its rules in PS19/25 on October 2, 2019. The amendments require firms to publish overdraft pricing information alongside information on current accounts. The FCA noted that it will carry out a post-implementation evaluation of its overall package of overdraft remedies around 12 months after the full package of remedies is implemented; the FCA evaluation was expected to start after April 2021.

The FCA is considering introducing new duty of care requirements that could place a general obligation on firms to act in the best interests of consumers. It is possible that changes may be made to the FCA's rules and guidance, in particular its Principles for Businesses, as a result of requirements for further consultation under the Financial Services Act 2021. On May 14, 2021, the FCA published a Consultation Paper (‘CP21/13: A new Consumer Duty’) to consider the possibility of introducing a new duty of care for financial services firms. The proposed Consumer Duty would impose on firms an obligation to adhere to higher standards of consumer protection in retail financial markets and represents a ‘paradigm shift’ in consumer finance regulation. The consultation closed on July 31, 2021, with a second consultation due by December 31, 2021. The FCA will make any new rules by July 31, 2022.

The aim of Open Banking is to create more transparency and fairness in the UK banking and financial services market through greater competition and innovation. Open Banking requires financial institutions such as the Issuer to provide registered third party organisations with transactional information where the consent of the customer or member is provided, and also to make public and openly share their product information, as well as

customer satisfaction scores and other service level indicators. This makes it possible for consumers to share their financial transactional data more easily with third parties online, allows third parties to initiate payments directly from a person's account as a bank transfer as an alternative to credit or debit card payments, and enables customers or such third party providers to more easily compare products offered by different institutions. This offers the prospect of an enhanced banking experience for the customer – for example, providers could offer comparison and switching services to help customers identify the best financial products for them and, over time, potentially enable customers to automate management of their finances to some degree, such as authorising service providers to transfer their finances to more competitive products on a regular and ongoing basis.

Open finance would extend Open Banking principles to give consumers and businesses more control over a wider range of their financial data, such as savings, insurance, mortgages, investments, pensions and consumer credit. It has the potential to increase competition among financial service providers and is aimed at delivering benefits for consumers and open finance participants alike.

In view of the COVID-19 pandemic, the CMA published a statement on April 30, 2020, setting out its general views about how the law operates in relation to cancellation and refunds, noting that ultimately the position will be determined by the courts. This is mainly relevant to unregulated consumer credit or hire agreements. The guidance clarifies consumers' rights and could result in greater number of cancelled agreements. On July 22, 2019, the European Commission issued guidance notice on the interpretation of the Unfair Contract Terms Directive 93/13/EEC (**UCTD**) (implemented in the UK through the Consumer Rights Act 2015). This guidance aims to present, in a structured way, the case law of the Court of Justice of the EU, in order to facilitate effective application of the UCTD in the EU and EEA member states. This guidance may be taken into account by the UK courts when determining if a term is unfair.

This area of law is rapidly developing and new regulatory guidance and case law as a result of this new legislation can be expected. During a House of Commons debate on February 11, 2020, the Parliamentary Under-Secretary of State of the Department for Business, Energy & Industrial Strategy ("**BEIS**"), announced that the BEIS was to publish a consumer and competition Command Paper in Spring 2020 and carry out a five-year review of the Consumer Rights Act 2015 later in the year. A consultation on 'Reforming competition and consumer policy' was published on July 20, 2021, and closed on October 1, 2021. The status of the Consumer Rights Act 2015 review is unknown, although a House of Commons Briefing Paper on the 'Consumer Rights Act 2015' was published on March 6, 2020. In addition, the 'Reforming competition and consumer policy' paper seeks views on the Consumer Rights Act 2015, as part of the UK consumer protection legal framework.

Distance marketing

In the UK, the Financial Services (Distance Marketing) Regulations 2004 apply to, inter alia, credit agreements entered into on or after October 31, 2004 by means of distance communication (i.e. without any substantive simultaneous physical presence of the originator and the borrower). A regulated mortgage contract under the FSMA, if originated by a UK lender from an establishment in the UK, will not be cancelable under these regulations but will be subject to related pre-contract disclosure requirements in MCOB. Certain other credit agreements will be cancelable under these regulations if the borrower does not receive the prescribed information at the prescribed time, or in any event for certain unsecured lending. Where the credit agreement is cancelable under these regulations, the borrower may send notice of cancellation at any time before the end of the 14th day after the day on which the cancelable agreement is made, where all the prescribed information has been received or, if later, the borrower receives the last of the prescribed information. The Financial Services (Distance Marketing) Regulations 2004 was amended by the Financial Services (Distance Marketing) (Amendment) (EU Exit) Regulation 2019 and Collective Investment Schemes (Amendment etc.) (EU Exit) Regulations 2019 to reflect the UK's exit from the EU.

If the borrower cancels the credit agreement under these regulations, then:

- (a) the borrower is liable to repay the principal, and any other sums paid by the originator to the borrower under or in relation to the canceled agreement, within 30 days beginning with the day

of the borrower sending the notice of cancellation or, if later, the originator receiving notice of cancellation;

- (b) the borrower is liable to pay interest, or any early repayment charge or other charge for credit under the canceled agreement, only if the borrower received certain prescribed information at the prescribed time and if other conditions are met; and
- (c) any security is treated as never having had effect for the canceled agreement.

If a significant portion of the loans are characterized as being cancelable under these regulations, then there could be an adverse effect on its receipts in respect of those loans.

Consumer Protection from Unfair Trading Regulations 2008

On May 11, 2005, the European Parliament and the Council of the EU adopted a Directive (2005/29/EC) regarding unfair business-to-consumer commercial practices (the “**Unfair Practices Directive**”). Generally, this directive applies full harmonization, which means that EU member states may not impose more stringent provisions in the fields to which full harmonization applies. By way of exception, the Unfair Practices Directive permits member states to impose more stringent provisions in the fields of financial services and immovable property, such as mortgage loans. The Unfair Practices Directive provides that enforcement bodies may take administrative action or legal proceedings against a commercial practice on the basis that it is “unfair” within the Unfair Practices Directive.

The Unfair Practices Directive is implemented into UK law by the Consumer Protection from Unfair Trading Regulations 2008 (the “**CPUTR**”), which came into force on May 26, 2008. The CPUTR was amended by the Consumer Protection (Amendment etc.) (EU Exit) Regulations 2018 to reflect the UK’s exit from the EU. The CPUTR prohibit certain practices which are deemed “unfair” within the terms of the CPUTR. Breach of the CPUTR does not (of itself) render an agreement void or unenforceable, but is a criminal offense punishable by a fine and/or imprisonment. The possible liabilities for misrepresentation or breach of contract in relation to the underlying credit agreements may result in irrecoverable losses on amounts to which such agreements apply. The CPUTR did not initially provide consumers with a private act of redress. Instead, consumers had to rely on existing private law remedies based on the law of misrepresentation and duress. However, amendments to the CPUTR which entered into force on October 1, 2014 have given consumers a right to redress for certain prohibited practices, including a right to unwind agreements.

In addition, the CPUTR is taken into account in reviewing rules under the FSMA. For example, MCOB rules for regulated mortgage contracts from June 25, 2010 prevent the lender from (a) repossessing the mortgaged property unless all other reasonable attempts to resolve the position have failed, which include considering whether it is appropriate to offer an extension of term, or conversion to interest-only for a period, or an alternative product, and (b) automatically capitalizing a payment shortfall.

Covid-19 relevant legislation and regulation

We must also comply with FCA guidance introduced to support customers with other products including personal loans, credit cards and overdrafts. Amongst other matters, the personal loans and credit card guidance requires that where a customer with a personal loan or credit card is experiencing or reasonably expects to experience temporary payment difficulties as a result of circumstances relating to Covid-19, wishes to receive a full payment deferral and has not received such a deferral previously, we should grant the customer a three monthly payments deferral, unless we determine (acting reasonably) that it is obviously not in the customer’s interests to do so. If the customer is unable to resume payments at the end of that payment deferral then we should consider whether it is appropriate to grant a further full or partial payment deferral for up to a further three months, or where that is not appropriate, to offer the customer alternative forbearance in accordance with the FCA rules. Where at the end of any further payment deferral period the customer is not able to resume payments, we should provide such appropriate forbearance in accordance with FCA rules and are also expected to waive the additional interest accrued during the payment deferral period as soon as reasonably practicable at the end of the deferral

period. The effect of this is to ensure that a customer would not, in respect of the deferred payments, be in a worse position in terms of interest, than if they had paid those amounts in full in accordance with the agreement. Where credit card customers have been granted a payment deferral under the FCA Covid-19 guidance they should not have the use of their credit card or their credit facility suspended except where the firm is acting in accordance with section 98A of the CCA. Where a notice is given to the customer under section 98A of the CCA we should, at the same time, ask customers to contact them urgently if their need to use their card for essential living expenses or to purchase essential items. If they do, we must consider lifting or delaying the suspension. We should not report a worsening status on any customer's credit file during any payment deferral period.

On November 19, 2020, the FCA updated the FCA Covid-19 guidance for personal loans and credit cards and published additional guidance to enhance support to consumer credit borrowers who face payment difficulties due to Covid-19 (“**Credit Tailored Support Guidance**”). The updated FCA Covid-19 guidance and the Credit Tailored Support Guidance came into force on November 25, 2020 and are expected to remain in force until July 31, 2021. The effect of the changes to the FCA Covid-19 guidance is that customers have until March 31, 2021 to request an initial or further payment deferral. Those who have not yet had a payment deferral will be eligible for two payment deferrals of up to six months in total. Those who currently have an initial payment deferral will be eligible for a further payment deferral of up to three months. No payment deferral offered under the updated FCA Covid-19 guidance can extend beyond July 31, 2021. Those customers who are not receiving a payment deferral under that guidance (including where they are not or are no longer eligible for such payment deferral) but who are experiencing payment difficulties as a result of Covid-19 should be offered tailored support under the Credit Tailored Support Guidance. The Credit Tailored Support Guidance was updated again on January 27, 2021 to specify that firms could only seek to repossess goods and vehicle from January 31, 2021 and then only as a last resort and in accordance with all relevant government public health guidelines, including on social distancing and shielding.

In the insurance sector, the FCA published “Coronavirus and customers in temporary financial difficulty: guidance for insurance and premium finance firms” on May 14, 2020. It sets out the FCA's expectations for firms when considering the fair treatment of existing customers, and in particular those customers experiencing or reasonably expecting to experience temporary financial difficulties due to Covid-19. Actions which we may need to take include re-assessing the risk profile of the customer, considering whether there are other products the firm can offer which would better meet the customer's needs and revising the cover accordingly, working with customers to avoid the need for cancellation (but if cancellation does take place, considering waiving cancellation fees) of necessary cover such as by considering payment deferrals and waiving any fees associated with adjusting a customer's policy in line with these assessments. On October 30, 2020, the FCA published additional guidance setting out its expectations of how firms should continue to seek to help customers who hold insurance and premium finance products and may be facing financial difficulty, due to the COVID-19 pandemic, after October 31, 2020. The guidance outlines the tailored support firms should provide to consumers who have already had a payment deferral and those newly in financial difficulty due to changed circumstances relating to Covid-19. In addition, in June 2020, the FCA published guidance setting out its expectations for insurers and insurance intermediaries to consider the value of their products. On October 30, 2020, the FCA published a statement reminding insurance firms to review the value of their products in the light of the impact of the Covid-19 pandemic. Firms should complete their Covid-19 related review of product lines and decide what action to take by December 3, 2020.

Further, on May 1, 2020 the FCA published a letter to mortgage lenders and administrators asking them, if they have customers who took out mortgages with higher risk characteristics before the financial crisis, to review the interest rates charged to such customers and consider if they are consistent with the obligation to treat customers fairly in the light of Covid-19. The FCA also published temporary mortgage guidance in March 2020 which was updated in June 2020 and which was due to expire on October 31, 2020 (the **Payment Deferral Guidance**). The FCA published additional mortgage guidance in September 2020 and on November 2, 2020 published further draft guidance updating the Payment Deferral Guidance and additional tailored support guidance (the **Tailored Support Guidance**). On November 17, 2020, the FCA confirmed the updated Payment Deferral Guidance and Tailored Support Guidance came into force from November 20, 2020. The updated Payment Deferral Guidance requires firms to extend the availability of payment deferrals until July 31, 2021. The FCA

expects firms to allow customers impacted by Covid-19 to defer up to six monthly payments in total, but firms should not provide deferrals under the guidance for payments extending beyond July 31, 2021. The Tailored Support Guidance is intended to support firms to treat consumers affected by Covid-19 fairly and to help consumers to bridge the crisis to get back to a more stable financial position. Under the Tailored Support Guidance firms are required to offer tailored support to customers facing payment difficulties due to circumstances related to Covid-19 who are not receiving payment deferrals (including where there are not or are no longer eligible for such payment deferral under the Payment Deferral Guidance). Tailored support could include the provision of further payment deferrals where appropriate, where firms agree to accept reduced or no payments for further periods without changing the contractual terms. The Tailored Support Guidance was updated on January 27, 2021 and again on March 25, 2021 to set out the FCA's expectations in respect of repossessions from April 1, 2021. The further updated Tailored Support Guidance specifies that, subject to any relevant government rules which prevent enforced repossessions for public health reasons, firms taking steps to enforce repossession of properties should only do so as a last resort in accordance with FCA rules, the FCA's updated guidance and normal legal processes.

The FCA has also provided guidance in relation to overdrafts. This requires arranged overdrafts of up to £500 to be interest-free for a period of three months and those with a limit of £500 or below having an interest-free balance for the same period. For those in excess of this amount, the first £500 will be interest-free and the remaining balance will be subject to standard pricing. Customers are entitled to request and/or receive assistance under the overdrafts guidance at any point until October 31, 2020. Where a customer has not previously had support, the assistance should last for an initial three months but a customer may be entitled to receive a further three months of support where they request it. This means that the support provided to customers under this guidance can extend beyond October 31, 2020. We offered 3 month interest holidays from April 20, 2020 on the whole arranged balance (without limit) and those holidays were automatically extended until October 31, 2020. Customers can apply for new interest holidays until the October 31, 2020 and the holiday will last for 3 months from the date the holiday is applied. We must also ensure that during this period our customers are not paying more than they would have paid for their overdraft compared to the prices charged before the FCA's new rules on overdraft pricing came into force. On September 30, 2020, the FCA published further overdraft guidance setting out how firms should provide tailored support to: (i) users of arranged overdrafts who have benefited from support under its prior guidance and who continue to face financial difficulties; and (ii) those who face financial difficulties due to coronavirus after October 31, 2020. That tailored support guidance supplements the FCA guidance published on overdrafts and coronavirus in July 2020 and came into force on October 2, 2020. It remains in force until varied or revoked. In draft guidance published by the FCA on November 4, 2020 the FCA confirmed that overdrafts will continue to be subject to the tailored support for overdrafts published on September 30, 2020. Tailored support could include reducing or waiving interest, agreeing a program of staged reductions in the overdraft limit or transferring the overdraft balance to an alternative credit product on more favorable terms.

The FCA continues to review its Covid-19 related guidance and may decide to update or amend it as the pandemic and its impact on the UK develops.

Other relevant legislation and regulation

The EU anti-money laundering regime consists of: (i) a directive on the prevention of the use of the financial system for the purpose of money laundering and terrorist financing (i.e. the “**EU Fourth Money Laundering Directive**”); and (ii) a regulation on information accompanying transfers of funds to secure “due traceability” of these transfers (the “**Fund Transfer Regulation**”). The EU Fourth Money Laundering Directive entered into force on June 25, 2015 and was implemented in the UK on June 26, 2017 by the Money Laundering, Terrorist Financing and Transfer of Funds (Information on the Payer) Regulations 2017. The EU Fourth Money Laundering Directive aims to give effect to the updated Financial Action Task Force standards. The EU Fifth Money Laundering Directive entered into force in July 2018 and aims to enhance processes to counter money laundering and terrorist financing. The EU Fifth Money Laundering Directive was transposed into UK law in January 2020 through amendments to the Money Laundering, Terrorist Financing and the Transfer of Funds (Information on the Payer) Regulations 2017. The Money Laundering, Terrorist Financing and the Transfer of Funds (Information on the Payer) Regulations 2017 was again amended by the Money Laundering and Transfer

of Funds (Information) (Amendment) (EU Exit) Regulations 2019 (as amended) to reflect the UK's exit from the EU. The UK Proceeds of Crime Act 2002 also acts as a crucial pillar in the UK's anti-money laundering regime. The EU's Sixth Anti-Money Laundering Directive, which establishes minimum rules on the definition of criminal offences and penalties relating to money laundering throughout the EU, came into effect for EU Member States on December 3, 2020. The UK opted out of transposing it on the basis that UK legislation was largely compliant with it already and went further in some instances. Although unlikely, there remains a risk that the UK regime may diverge from the EU regime in the medium term.

The Fund Transfer Regulation updates the rules regarding information on payers and payees accompanying transfers of funds, in any currency, for the purposes of preventing, detecting and investigating money laundering and terrorist financing (the "ML/TF"), where at least one of the payment service providers involved in the transfer of funds is established in the EU. The overall objective of transposition is to ensure that the UK's anti-money laundering and counter terrorist financing (the "AML/CTF") regime is kept up to date, is effective and is proportionate. This will enable the UK to have a comprehensive AML/CTF regime and ensure that the UK's financial system is an increasingly hostile environment for ML/TF.

The General Data Protection Regulation ("GDPR") came into force on May 25, 2018 and applies to personal data that is processed by automated means or as part of a filing system. Personal data is broadly defined to mean any information relating to an identified or identifiable natural living person. The GDPR has been supplemented in the UK by the Data Protection Act 2018. The GDPR was onshored in the UK through EUWA, with adjustments as provided in the Data Protection, Privacy and Electronic Communications (Amendments etc.) (EU Exit) Regulations 2019.

Investment services regulation, Directive 2004/39/EC ("MiFID"), and its various implementing measures were recast as a revised directive (Directive 2014/65/EU) ("MiFID II") and a regulation (Regulation 600/2014/EU, the Markets in Financial Instruments Regulation or MiFIR), which together regulate the provision of investment services and activities in relation to a range of customer-related areas, including customer classification, conflicts of interest, client order handling, investment research and financial analysis, suitability and appropriateness, transparency obligations and transaction reporting. The changes to MiFID include expanded supervisory powers that include the ability to ban specific products, services or practices. The MiFID requirements were implemented in the UK before the UK's exit from the EU and then amended to reflect the UK's exit from the EU. MiFIR was onshored in the UK by the Markets in Financial Instruments (Amendment) (EU Exit) Regulation 2018 (as amended).

We participate in the unclaimed assets scheme established under the Dormant Bank and Building Society Accounts Act 2008. The purpose of this scheme is to enable money in dormant bank and building society accounts (i.e. balances in accounts that have been inactive or dormant for 15 years or more) to be distributed for the benefit of the community, while protecting the rights of customers to reclaim their money.

On November 1, 2009, the FSA introduced its Banking Conduct Regime for retail banking. The main constituents of this regime are: (i) extending the FCA's Principles for Businesses as they apply to deposit-taking, from prudential matters only, to conduct of business matters in addition; (ii) conduct of business requirements in the Payment Services Regulations 2017 ("PSRs 2017"), which apply to certain payment services made in euro or sterling; and (iii) the FCA's Banking: Conduct of Business Sourcebook, which applies to deposit-taking in respects not covered by the PSRs 2017. The revised directive on payment services ("PSD2") came into force on January 12, 2016. PSD 2 was transposed into UK law with the PSRs 2017 repealing and replacing Payment Services Regulations 2009. The PSRs 2017 came into force on January 13, 2018 and were amended by the Electronic Money, Payment Services and Payment Systems (Amendment and Transitional Provisions) (EU Exit) Regulations 2018 (as amended) to reflect the UK's exit from the EU.

Key changes from PSD2 include the requirement for account information services and payment initiation services to be regulated, new security requirements, increased reporting obligations and increased focus on consumer protection. There are also changes to the scope of the conduct of business rules and the list of exemptions. In December 2018, the FCA published a policy statement ("PS 18/24") on its approach to final regulatory technical standards for strong customer authentication and common and secure open standards of

communication (“**SCA RTS**”) and other related EBA guidelines. The requirements on strong customer authentication (“**SCA**”) were due to come into force in September 2019 but UK and European authorities have agreed to establish a period of non-enforcement for payment service providers to implement SCA. For online banking, SCA obligations had to be implemented in the UK by March 2020. PS 18/24 sets out the FCA’s approach to the SCA RTS and considers whether bank and other online account providers are properly set up to enable Open Banking. The SCA requirements were due to come into force in September 2019, but the UK and European authorities have agreed to establish a period of non-enforcement for payment services providers to implement SCA. For online and mobile banking, SCA obligations had to be implemented in the UK by March 2020. For e-commerce, the FCA has given firms until March 14, 2022 to implement SCA (this deadline having been extended due to the Covid-19 crisis. Amended fraud reporting requirements also applied from January 1, 2019. PS 18/24 introduces new rules on reporting complaints about authorized push payment fraud, which came into force on July 1, 2019. The Payment Services (Amendment) Instrument 2018 contains corresponding changes to the FCA Handbook. On January 28, 2021, the FCA opened a consultation on proposals to amend aspects of the SCA RTS, amongst other changes, proposing to add a new exemption from SCA for when customers access their account information through an account information service provider and proposals to mandate the use of dedicated interfaces (such as application programming interfaces) by account servicing payment service providers to facilitate third-party provider access to retail and SME customers’ payment accounts.

The FCA’s consultation closed on April 30, 2021. On November 29, 2021, the FCA published a policy statement setting out the final rules for SCA-RTS. The changes to the SCA-RTS include: (i) creating a new SCA exemption in Article 10A. This would mean customers do not need to re-authenticate with their account servicing payment service provider (“**ASPSP**”) every 90 days when accessing their account information through a third-party provider (“**TPP**”); (ii) requiring certain ASPSPs to provide dedicated interfaces to enable TPP access to customer account information for retail and SME payment accounts; (iii) amending requirements on providing interface technical specifications, testing interfaces and fall-back interfaces by ASPSPs intended to let ASPSPs innovate and launch products and services more quickly; and (iv) allowing ASPSPs with a deemed authorisation under the Temporary Permissions Regime to rely in the UK on an exemption from setting up a fallback interface granted by a home state competent authority located in the EU.

On November 1, 2009, the British Bankers’ Association, the Building Societies Association and The UK Cards Association launched The Lending Code (“**Lending Code**”), a voluntary code on unsecured lending to personal and small business customers, which is monitored and enforced by the Lending Standards Board. The voluntary Banking Code and the Business Banking Code then ceased to have effect. The Lending Code has been revised a number of times since its introduction, most recently in September 2015. While the sections of the Lending Code applicable to micro-businesses remain unchanged, in respect of personal customers the Lending Code was replaced by the Standards of Lending Practice (the “**SLP**”) in July 2016. The SLP has applied to business customers from July 1, 2017. The SLP are voluntary and set the benchmark for good lending practice in the UK.

Supervisory Statement SS20/15 on supervising building societies’ treasury and lending activities sets out the PRA’s expectations in respect of building societies’ compliance with applicable law and regulation in these areas of activity. The Supervisory Statement was updated on February 24, 2020 and describes the key lending and treasury risks to which societies are exposed, and sets out a framework describing different potential models for managing and controlling these risks and a procedure for building societies proposing business model diversification on this basis.

In September 2016, following a consultation by the PRA earlier that year, the PRA published Policy Statement PS 28/16 and a final Supervisory Statement SS 13/16 both entitled “*Underwriting standards for BTL mortgage contracts*”. The Policy Statement applies to all PRA regulated firms that undertake buy-to-let lending that are not already subject to FCA regulation. The Supervisory Statement does not apply to regulated mortgage contracts, consumer BTL mortgages, BTL mortgages with corporates or which has a term of 12 months or less or to an application from an existing customer for consent to let. The Supervisory Statement contains the PRA’s minimum standards that firms should follow when underwriting BTL mortgages (affordability testing) (including when dealing with portfolio landlords who have four or more BTL properties), clarifies the PRA’s expectation

regarding the application of the small and medium sized (SME) supporting factor on BTL mortgages and details the PRA's expectations regarding adequate risk management and controls. The PRA expects that regulated firms ensure that the standards are followed by other firms undertaking buy-to-let within their group. The standards have been implemented by September 30, 2017.

Another area of change which impacts on the UK regulatory landscape relates to banking reform. The Banking Reform Act introduced amendments to FSMA which provide for, inter alia, the ring-fencing of vital banking services from international and investment banking services, measures on loss absorbency and depositor preference and proposals for enhancing competition in the banking sector. Certain aspects of such measures entered into force on January 1, 2015 and the full ring-fencing regime applied in January 2019. Further, the Government has carved building societies out of the proposed ring-fencing legislation and, instead, reserves the power to amend the UK Building Societies Act to bring building societies legislation into line with the proposed ring-fencing requirements. The PRA published its policy statement PS21/16 on Operational Continuity in July 2016. The rules applied from January 1, 2019 and support the resolvability and resilience of building societies and banks in seeking to ensure critical shared services are organized to facilitate continuity in the event of failure. In May 2021, the PRA revised its operational continuity in resolution policy. The new rules, published in PS9/21 require firms, inter alia, to consider the operational arrangements supporting the viability of the firm, and its key drivers of revenue and profit, in addition to those supporting its critical functions and come into force on January 1, 2023. The revisions also include an amended definition of critical services.

Sustainable finance

The UK regulators have recently focused on sustainable finance. The PRA, together with the FCA, has established a Climate Financial Risk Forum ("CFRF") to build intellectual capacity and share best practice. The CFRF brings together senior representatives from across the financial sector, including banks, insurers, and asset managers. It established a number of working groups to develop a guide on best practice and recommendations for industry, which was published in June 2020 ("CFRF Guide"). The "Disclosures" chapter of the CFRF Guide sets out guidance on different approaches for banks, asset managers and insurers, as well as gaps and barriers. It recommends that firms aim to complete high level, mainly qualitative, disclosures by mid-2021 and add quantitative disclosures by the end of 2022. The CFRF is expected to develop further recommendations on climate-related data, methodologies and metrics in the next 12-18 months.

In its 2019 supervisory statement on climate financial risk, the PRA made it clear that it expects firms to integrate climate related financial risk into their existing risk management frameworks, including requirements to identify, measure, monitor, manage and report on their exposures to such risks. Firms are expected to use both short-term and long-term time horizons to assess climate financial risks and to use scenario analysis where proportionate to inform their response to exposures. Firms will also need to include all material exposures relating to climate financial risk in their Internal Capital Adequacy Assessment Process (ICAAP). As a complement to the new expectations, the CFRF published chapters on risk management and scenario analysis setting out practical guidance on the topics for financial institutions.

The Bank of England is utilizing its stress testing framework to assess the impact of climate-related risks on the UK financial system. The Bank of England announced plans to test the UK financial system's resilience to the financial risks from climate change as part of the 2021 Biennial Exploratory Scenario ("BES"). In December 2019, the Bank of England published a discussion paper setting out the proposal for the 2021 BES on climate-related risks. The objective of the BES is to test the resilience of the largest banks, insurers and the financial system to different possible climate pathways and provide a comprehensive assessment of the UK financial system's exposure to climate-related risks. The deadline for responses was March 18, 2020. In June 2020, the Network for Greening the Financial System ("NGFS") published a set of climate scenarios that will serve as the basis for the scenarios in the 2021 BES.

On December 21, 2020 the FCA also published a policy statement on proposals intended to enhance climate-related disclosures by listed issuers and clarify existing disclosure obligations. The changes will broadly require companies to include a statement in their annual financial reports setting out whether their disclosures are

consistent with the international Financial Stability Board recommendations and explain if they have not done so. The changes apply in relation to accounting periods beginning on or after January 1, 2021.

On April 29, 2021, the Financial Services Act 2021 passed into law. The Act makes extensive amendments to the legislative and regulatory framework for financial services following the end of the transition period. The Act sets out reforms relating to, among other things:

- prudential rules, establishing the framework for the Investment Firms Prudential Regime, the UK implementation of the final pieces of CRR2 that were not onshored, and Basel III;
- the establishment of the Gibraltar Authorisation Regime;
- the establishment of the Overseas Fund Regime, which consists of a single regime for retail collective schemes and a separate regime for money market funds;
- amendments to the third country equivalence regime under UK MiFIR, including giving the FCA the power to specify certain reporting requirements, amending the equivalence assessment criteria to reflect changes to the UK's prudential rules (as set out elsewhere in the Act), imposing temporary restrictions or prohibitions on firms that register under the regime, and clarifying aspects of the scope of the 'reverse solicitation' exception;
- amending UK PRIIPs to enable the FCA to clarify the scope of PRIIPs through its rules, replacing the term performance scenario with "appropriate information on performance", and giving the UK Treasury the power to extend the UCITS exemption by up to 5 years;
- amending UK EMIR to require firms that offer clearing services to do so in accordance with FRANDT terms, and to require trade repositories to put in place procedures to improve data quality;
- amending UK MAR to provide clarity on who is required to maintain an insider list, adjusting the timetable within which issuers are required to disclose transactions by their senior managers, extending the maximum criminal sentence for market abuse, and removing the Article 28 restriction which prevented the FCA from holding personal data collected for the purposes of UK MAR for more than five years; and
- ensuring that various powers and functions under FSMA apply to subordinate legislation and rules made by the UK Treasury and regulators in relation to retained EU law.

EXCHANGE CONTROLS AND OTHER LIMITATIONS AFFECTING HOLDERS OF NOTES

Subject to the withholding tax requirements set out under the subsection entitled “*Taxation–UK Taxation*,” there are currently no UK laws, decrees or regulations that would reduce the payment by the issuer of interest or other payments to holders of notes who are neither residents of, nor trading in, the United Kingdom. For further discussion, see the subsection entitled “*Taxation–UK Taxation*.” There are also no restrictions under our memorandum and rules or under current UK laws that limit the right of non-resident or foreign owners to hold the notes or to vote, when entitled to do so.

TERMS AND CONDITIONS OF THE NOTES

This section describes the material terms and provisions of the notes to which any Final Terms may relate. We will describe in each Final Terms the particular terms of the notes that we offer by that Final Terms and the extent, if any, to which the general provisions described below may apply to those notes. Capitalized terms used but not defined in this section have the meanings given to them in the senior preferred notes, senior non-preferred notes, subordinated notes, or indenture, as the case may be.

General

We will offer the notes under an indenture, dated as at December 19, 2017 and as supplemented and amended from time to time (the “**Indenture**”), between us (the “**Issuer**”) and The Bank of New York Mellon, London Branch as trustee (the “**Trustee**”). The notes are limited to an aggregate principal amount of up to \$20,000,000,000 outstanding at any time, including, in the case of notes denominated in one or more other currencies or composite currencies, the equivalent thereof at the Market Exchange Rate in the one or more other currencies on the date on which such note will be issued (the “**Original Issue Date**”), subject to reduction by or pursuant to action of our Board of Directors, provided that a reduction will not affect any note already issued or as to which we have already accepted an offer to purchase. We may, however, increase these limits without the consent of the holders of the notes if in the future we determine that we wish to sell additional notes.

The notes will mature twelve months or more from the date of issue and may be subject to redemption or early repayment at our option or the holder’s option as further described in the subsection entitled “—*Redemption, Repurchase, Substitution and Variation*.” Each note will be denominated in U.S. dollars or in another currency as we specify in the applicable Final Terms. For a further discussion, see “—*Payment of Principal, Premium, if any, and Interest, if any*.” Each note will be either:

- a Fixed Rate Note; or
- a Reset Note, which will bear interest at a fixed rate for an initial period, after which the interest rate will be reset by reference to the interest basis plus or minus the relevant Margin (if any) at specified intervals, in each case as specified in the applicable Final Terms; or
- a Floating Rate Note, which will bear interest at a rate determined by reference to the interest rate basis or combination of interest rate bases plus or minus the Margin (if any), in each case as specified in the applicable Final Terms; or
- a Zero Coupon Note, in which case references to interest in these terms and conditions are not applicable; or
- any appropriate combination thereof, depending upon the Interest Basis shown in the applicable Final Terms.

Status of senior preferred notes

The senior preferred notes are direct, unconditional, unsubordinated and (subject to the provisions of “—*Negative Pledge*”) unsecured obligations of the Issuer and rank (subject to the provisions of “—*Negative Pledge*”) equally among themselves, junior to obligations required to be preferred by law (which includes certain member share accounts which are given preferential status by law) and at least equally with all other Ordinary Non-Preferential Debts of the Issuer.

Accordingly, subject to the Insolvency Act (and any other Ranking Legislation), for so long as they are not secured pursuant to the provisions of “—*Negative Pledge*”, the senior preferred notes form part of the class of Ordinary Non-Preferential Debts of the Issuer under the Insolvency Act (and any other Ranking Legislation).

Status and ranking of senior non-preferred notes

Status and ranking

The senior non-preferred notes may only be issued on terms such that they (A) have an original contractual maturity of at least one year and (B) are not derivatives and contain no embedded derivatives for the purposes of Section 387A(3)(b)(ii) of the Insolvency Act (and the relevant section of any other Ranking Legislation).

The senior non-preferred notes are direct and unsecured obligations of the Issuer and, subject to the Insolvency Act (and any other Ranking Legislation), constitute Secondary Non-Preferential Debts under the Insolvency Act (and any other Ranking Legislation), ranking *pari passu* and without any preference among themselves.

Accordingly, subject to the Insolvency Act (and any other Ranking Legislation), claims in respect of principal, interest and any other amount (including, without limitation, any damages awarded for breach of the Issuer's obligations) in respect of the senior non-preferred notes will, in the event of the winding up or dissolution of the Issuer (subject as otherwise provided in an Excluded Dissolution), rank as provided for Secondary Non-Preferential Debts in the Insolvency Act (and any other Ranking Legislation), and therefore:

- (a) junior in right of payment to all Senior Claims;
- (b) *pari passu* with all other Senior Non-Preferred Claims; and
- (c) in priority to all Subordinated Claims.

Waiver of set-off

Subject to applicable law, no holder of senior non-preferred notes may exercise, claim or plead any right of set-off, compensation or retention in respect of any amount owed to it by the Issuer arising under or in connection with the senior non-preferred notes and each holder shall, by virtue of being the holder of any such senior non-preferred note (or the holder of any interest therein), be deemed to have waived all such rights of set-off, compensation or retention. Notwithstanding the provision of the foregoing sentence, if any of the said rights and claims of any holder of senior non-preferred notes against the Issuer is discharged by set-off, such holder of senior non-preferred notes will immediately pay an amount equal to the amount of such discharge to the Issuer or, in the event of winding up or dissolution of the Issuer, the liquidator or other insolvency official of the Issuer and accordingly such discharge will be deemed not to have taken place.

The senior non-preferred notes do not have the benefit of the negative pledge covenant described below under the subsection entitled “—Negative Pledge” and, as Secondary Non-Preferential Debts, rank junior to most of our liabilities, including senior preferred notes. For a further discussion of risks relating to junior ranking see the section entitled “*Risk Factors—Risks Related to the Notes—The notes rank junior to most of our liabilities.*”

Status and subordination of subordinated notes

Status and subordination

The subordinated notes are direct and unsecured obligations of the Issuer, subordinated as described below, and rank *pari passu* and without any preference among themselves.

Accordingly, subject to the Insolvency Act (and any other Ranking Legislation), the subordinated notes form part of the class of Tertiary Non-Preferential Debts under the Insolvency Act (and any other Ranking Legislation), and claims in respect of principal, interest and any other amount (including, without limitation, any damages awarded for breach of the Issuer's obligations) in respect of the subordinated notes will, in the event of the winding up or dissolution of the Issuer (subject as otherwise provided in an Excluded Dissolution):

- (a) be subordinated in right of payment in the manner provided in the Insolvency Act (and any other Ranking Legislation) and the Indenture to (x) all Senior Claims, (y) all Senior Non-Preferred Claims, and (z) any Subordinated Claims (if any) which rank, or are expressed to rank, in priority to claims in respect of the subordinated notes;
- (b) rank at least *pari passu* with claims in respect of the Issuer's obligations which constitute, or would but for any applicable limitation on the amount of such capital constitute, Tier 2 Capital; and
- (c) rank in priority to claims in respect of obligations of the Issuer which constitute, or would but for any applicable limitation on the amount of such capital constitute, Additional Tier 1 Capital or CET1 Capital (including the Issuer's core capital deferred shares) and in priority to any other claims (including, without limitation, the Issuer's PIBS) which rank, or are expressed to rank, junior to the claims in respect of subordinated notes.

Waiver of set-off

Subject to applicable law, no holder of subordinated notes may exercise, claim or plead any right of set-off, compensation or retention in respect of any amount owed to it by the Issuer arising under or in connection with the subordinated notes and each holder shall, by virtue of being the holder of any such subordinated note (or the holder of any interest therein), be deemed to have waived all such rights of set-off, compensation or retention. Notwithstanding the provision of the foregoing sentence, if any of the said rights and claims of any holder of subordinated notes against the Issuer is discharged by set-off, such holder of subordinated notes will immediately pay an amount equal to the amount of such discharge to the Issuer or, in the event of winding up or dissolution of the Issuer, the liquidator or other insolvency official of the Issuer and accordingly such discharge will be deemed not to have taken place.

The subordinated notes do not have the benefit of the negative pledge covenant described below under the subsection entitled "*Negative Pledge*" and are subordinated to most of our liabilities (including senior preferred notes and senior non-preferred notes). For a further discussion of risks relating to subordination see the section entitled "*Risk Factors—Risks Related to the Notes—The notes rank junior to most of our liabilities.*"

Recovery currency

To the extent that holders of any notes are entitled to any recovery with respect to the notes in any winding up or liquidation, it is unclear whether such holders would be entitled in such proceedings to recovery in U.S. dollars (or, if different, the relevant Specified Currency) and they may be entitled only to a recovery in pounds sterling and, as a general matter, the right to claim for any amounts payable on notes may be limited by applicable insolvency law.

Certain definitions

"**Business Day**" means any day, other than a Saturday or Sunday, that is neither a legal holiday nor a day on which commercial banks are authorized or required by law, regulation or executive order to close in New York City and each Additional Business Center specified in the applicable Final Terms; provided, however, that, with respect to notes denominated in a Specified Currency other than U.S. dollars, it is also not a day on which commercial banks are authorized or required by law, regulation or executive order to close in the Principal Financial Center, as defined below, of the country issuing the Specified Currency (or, if the Specified Currency is euro or EURIBOR is an applicable Interest Rate Basis, such day is also a day on which the euro payments settlement system known as TARGET2 (or any successor thereto) is open for settlement of payments in euro, a "**TARGET Settlement Date**"); provided, further, that, with respect to notes as to which SOFR or SONIA is an applicable Interest Rate Basis, it is also a London Business Day. "**London Business Day**" means a day on which commercial banks are open for business in London.

“**Day Count Fraction**” means, in respect of the calculation of an amount for any period of time in accordance with the applicable Final Terms for any Fixed Rate Note, Reset Note, or Floating Rate Note, as applicable:

- (A) if **Actual/Actual (ICMA)** is specified in the applicable Final Terms:
 - (i) in the case of notes where the number of days in the relevant period from (and including) the most recent Interest Payment Date (or, if none, the Interest Commencement Date) to (but excluding) the relevant payment date (the “**Accrual Period**”) is equal to or shorter than the Determination Period during which the Accrual Period ends, the number of days in such Accrual Period divided by the product of (A) the number of days in such Determination Period and (B) the number of Determination Dates (as so specified in the applicable Final Terms) that would occur in one calendar year; or
 - (ii) in the case of notes where the Accrual Period is longer than the Determination Period commencing on the last Interest Payment Date on which interest was paid (or, if none, the Interest Commencement Date), the sum of:
 - (A) the number of days in such Accrual Period falling in the Determination Period in which the Accrual Period begins divided by the product of (I) the number of days in such Determination Period and (II) the number of Determination Dates that would occur in one calendar year; and
 - (B) the number of days in such Accrual Period falling in the next Determination Period divided by the product of (I) the number of days in such Determination Period and (II) the number of Determination Dates that would occur in one calendar year;
- (B) if **30/360** is specified in the applicable Final Terms, the number of days in the period from (and including) the most recent Interest Payment Date (or, if none, the Interest Commencement Date) to (but excluding) the relevant payment date (such number of days being calculated on the basis of twelve 30 day months) divided by 360;
- (C) if **Actual/Actual (ISDA)** or **Actual/Actual** is specified in the applicable Final Terms, the actual number of days in the Interest Period divided by 365 (or, if any portion of the Interest Period falls in a leap year, the sum of (I) the actual number of days in that portion of the Interest Period falling in a leap year divided by 366 and (II) the actual number of days in that portion of the Interest Period falling in a non-leap year divided by 365);
- (D) if **Actual/365 (Fixed)** is specified in the applicable Final Terms, the actual number of days in the Interest Period divided by 365;
- (E) if **Actual/365 (Sterling)** is specified in the applicable Final Terms, the actual number of days in the Interest Period divided by 365 or, in the case of an Interest Payment Date falling in a leap year, 366;
- (F) if **Actual/360** is specified in the applicable Final Terms, the actual number of days in the Interest Period divided by 360;
- (G) if **30/360, 360/360** or **Bond Basis** is specified in the applicable Final Terms, the number of days in the Interest Period divided by 360, calculated on a formula basis as follows:

$$\text{Day Count Fraction} = \frac{[360 \times (Y_2 - Y_1)] + [30 \times (M_2 - M_1)] + (D_2 - D_1)}{360}$$

where:

“Y₁” is the year, expressed as a number, in which the first day of the Interest Period falls;

“Y₂” is the year, expressed as a number, in which the day immediately following the last day of the Interest Period falls;

“M₁” is the calendar month, expressed as a number, in which the first day of the Interest Period falls;

“M₂” is the calendar month, expressed as a number, in which the day immediately following the last day of the Interest Period falls;

“D₁” is the first calendar day, expressed as a number, of the Interest Period, unless such number is 31, in which case D₁ will be 30; and

“D₂” is the calendar day, expressed as a number, immediately following the last day included in the Interest Period, unless such number would be 31 and D₁ is greater than 29, in which case D₂ will be 30;

- (H) if **30E/360** or **Eurobond Basis** is specified in the applicable Final Terms, the number of days in the Interest Period divided by 360, calculated on a formula basis as follows:

$$\text{Day Count Fraction} = \frac{[360 \times (Y_2 - Y_1)] + [30 \times (M_2 - M_1)] + (D_2 - D_1)}{360}$$

where:

“Y₁” is the year, expressed as a number, in which the first day of the Interest Period falls;

“Y₂” is the year, expressed as a number, in which the day immediately following the last day of the Interest Period falls;

“M₁” is the calendar month, expressed as a number, in which the first day of the Interest Period falls;

“M₂” is the calendar month, expressed as a number, in which the day immediately following the last day of the Interest Period falls;

“D₁” is the first calendar day, expressed as a number, of the Interest Period, unless such number would be 31, in which case D₁ will be 30; and

“D₂” is the calendar day, expressed as a number, immediately following the last day included in the Interest Period, unless such number would be 31, in which case D₂ will be 30; and

- (I) if **30E/360 (ISDA)** is specified in the applicable Final Terms, the number of days in the Interest Period divided by 360, calculated on a formula basis as follows:

$$\text{Day Count Fraction} = \frac{[360 \times (Y_2 - Y_1)] + [30 \times (M_2 - M_1)] + (D_2 - D_1)}{360}$$

where:

“Y₁” is the year, expressed as a number, in which the first day of the Interest Period falls;

“Y₂” is the year, expressed as a number, in which the day immediately following the last day of the Interest Period falls;

“M₁” is the calendar month, expressed as a number, in which the first day of the Interest Period falls;

“M₂” is the calendar month, expressed as a number, in which the day immediately following the last day of the Interest Period falls;

“D₁” is the first calendar day, expressed as a number, of the Interest Period, unless (i) that day is the last day of February or (ii) such number would be 31, in which case D₁ will be 30; and

“D₂” is the calendar day, expressed as a number, immediately following the last day included in the Interest Period, unless (i) that day is the last day of February but not the Maturity Date or (ii) such number would be 31, in which case D₂ will be 30.

If no Day Count Fraction for Fixed Rate Notes is specified in the applicable Final Terms then the Day Count Fraction for such notes shall be **Actual/Actual (ICMA)** for notes other than those denominated or payable in U.S. Dollars and **30/360** for notes denominated or payable in U.S. Dollars.

“**deferred share investments**” has the meaning ascribed thereto in the rules of the Issuer (and includes the Issuer’s PIBS and core capital deferred shares).

“**Determination Period**” means the period from (and including) a Determination Date in any year to (but excluding) the next Determination Date.

“**EEA regulated market**” means a market as defined by Article 4.1(21) of Directive 2014/65/EU of the European Parliament and of the Council on markets in financial instruments, as amended.

“**Excluded Dissolution**” means each of (i) a winding up or dissolution of the Issuer for the purpose of a reconstruction, union, transfer, merger or amalgamation or the substitution in place of the Issuer of a successor in business the terms of which have previously been approved by the Trustee and (ii) a dissolution of the Issuer by virtue of the amalgamation and transfer provisions set out in sections 93, 94 and 97 of the Building Societies Act 1986, as amended (the “**Act**”), or by virtue of a transfer pursuant to an order made under section 3 of the Building Societies (Funding) and Mutual Societies (Transfers) Act 2007, as amended (or any successor provisions thereto).

“**Hierarchy Order**” means The Banks and Building Societies (Priorities on Insolvency) Order 2018, as amended or superseded from time to time.

“**Independent Adviser**” means an independent financial institution of international repute or an independent adviser of recognized standing and with appropriate expertise (which may include the Calculation Agent) appointed by the Issuer at its own expense with notice in writing to the Trustee.

“**Insolvency Act**” means the Insolvency Act 1986, as amended or superseded from time to time (including by the Hierarchy Order).

“**investing members**” has the meaning ascribed thereto in the rules of the Issuer.

“**Loss Absorption Compliant Notes**” means securities that comply with the following (which compliance has been certified to the Trustee in a certificate signed by two authorized signatories of the Issuer and delivered to the Trustee prior to the relevant substitution or variation):

- (a) such securities are issued by the Issuer or any wholly-owned direct or indirect subsidiary of the Issuer with a guarantee of such obligations by the Issuer;
- (b) such securities rank (or, if guaranteed by the Issuer, benefit from a guarantee that ranks) as part of the class of Secondary Non-Preferential Debts;

- (c) (subject to (b) above) such securities have terms not materially less favorable to noteholders than the terms of the relevant senior non-preferred notes (as reasonably determined by the Issuer in consultation with an independent adviser of recognized standing);
- (d) (without prejudice to (c) above) such securities (1) contain terms such that they comply with the then applicable Loss Absorption Regulations in order to be eligible to qualify in full towards the Issuer's minimum requirements (on an individual or consolidated basis) for own funds and eligible liabilities and/or loss absorbing capacity instruments; (2) bear the same rate of interest from time to time applying to the relevant senior non-preferred notes and preserve the same interest payment dates; (3) do not contain terms providing for deferral of payments of interest and/or principal; (4) preserve the obligations (including the obligations arising from the exercise of any right) of the Issuer as to redemption of the relevant senior non-preferred notes, including (without limitation) as to timing of, and amounts payable upon, such redemption; (5) do not contain terms providing for loss absorption through principal write-down or conversion to common equity tier 1 instruments (but without prejudice to any acknowledgement of statutory resolution powers similar to "*—Agreement with Respect to the Exercise of UK Bail-in Power*"); and (6) preserve any existing rights to any accrued and unpaid interest and any other amounts payable under the relevant senior non-preferred notes which has accrued to noteholders and not been paid;
- (e) such securities are listed on the same stock exchange or market as the relevant senior non-preferred notes or the London Stock Exchange or any EEA regulated market or any market in an OECD member state selected by the Issuer; and
- (f) where the relevant senior non-preferred notes which have been substituted or varied had a published rating solicited by the Issuer from one or more Rating Agencies immediately prior to their substitution or variation, such securities benefit from (or will, as announced, or otherwise confirmed in writing, by each such relevant Rating Agency, benefit from) an equal or higher published rating from each such Rating Agency as that which applied to the relevant senior non-preferred notes (unless any downgrade is solely attributable to the ranking of the notes under (b) above).

a "**Loss Absorption Disqualification Event**" shall be deemed to have occurred in respect of a series of senior non-preferred notes if, as a result of any amendment to, or change in, any Loss Absorption Regulations, or any change in the application or official interpretation of any Loss Absorption Regulations, in any such case becoming effective after the Issue Date of such series of senior non-preferred notes, either:

- (i) if "*Loss Absorption Disqualification Event: Full Exclusion*" is specified in the applicable Final Terms, the entire principal amount of such series of senior non-preferred notes; or
- (ii) if "*Loss Absorption Disqualification Event: Full or Partial Exclusion*" is specified in the applicable Final Terms, the entire principal amount of such series of senior non-preferred notes or any part thereof,

is or (in the opinion of the Issuer or the relevant Supervisory Authority) is likely to be excluded from the Issuer's minimum requirements (whether on an individual or consolidated basis) for (A) own funds and eligible liabilities and/or (B) loss absorbing capacity instruments, in each case as such minimum requirements are applicable to the Issuer (whether on an individual or consolidated basis) and determined in accordance with, and pursuant to, the relevant Loss Absorption Regulations; provided that a Loss Absorption Disqualification Event shall not occur where the exclusion of the senior non-preferred notes from the relevant minimum requirement(s) is due to the remaining maturity of such senior non-preferred notes being less than any period prescribed by any applicable eligibility criteria for such minimum requirements under the relevant Loss Absorption Regulations effective with respect to the Issuer on the Issue Date of such series of senior non-preferred notes.

“Loss Absorption Regulations” means, at any time, the laws, regulations, requirements, guidelines, rules, standards and policies relating to minimum requirements for own funds and eligible liabilities and/or loss absorbing capacity instruments of the United Kingdom (including, without limitation, any provision of the Insolvency Act or any other Ranking Legislation which relates to the requisite features of Secondary Non-Preferential Debts), any relevant Supervisory Authority and/or any other relevant authority then in effect in the United Kingdom and applicable to the Issuer (whether on an individual or consolidated basis) including, without limitation to the generality of the foregoing, any regulations, requirements, guidelines, rules, standards and policies relating to minimum requirements for own funds and eligible liabilities and/or loss absorbing capacity instruments adopted by any relevant Supervisory Authority from time to time (whether such regulations, requirements, guidelines, rules, standards or policies are applied generally or specifically to the Issuer).

“New York City Banking Day” means any day on which commercial banks are open for general business (including dealings in foreign exchange and foreign currency deposits) in the city of New York.

“Ordinary Non-Preferential Debts” means ‘ordinary non-preferential debts’ as defined in Section 387A(3)(a) of the Insolvency Act (or, as the case may be, in the relevant section of any other Ranking Legislation).

“Principal Financial Center” means the capital city of the country issuing the Specified Currency except, that with respect to U.S. dollars, Canadian dollars, and Swiss francs, the **“Principal Financial Center”** shall be New York City, Toronto, and Zurich, respectively.

“Ranking Legislation” means the Insolvency Act, the Hierarchy Order and, if and to the extent applicable to the Issuer, any other law or regulation which is amended by the Hierarchy Order.

“Rating Agency” means any of S&P Global Ratings UK Limited, Moody’s Investors Service Limited and Fitch Ratings Limited and each of their respective affiliates or successors.

“Regulatory Capital Requirements” means, at any time, any requirement contained in the law, regulations, requirements, guidelines and policies then in effect relating to capital adequacy and prudential supervision and applicable to the Issuer, including (without limitation to the generality of the foregoing), those applicable laws, regulations, requirements, guidelines and policies relating to capital adequacy and prudential supervision then in effect of the United Kingdom or the relevant Supervisory Authority and/or any other relevant authority.

A **“Regulatory Event”** is deemed to have occurred in respect of a series of subordinated notes if there is a change (which has occurred or which the relevant Supervisory Authority considers to be sufficiently certain) in the regulatory classification of such series of subordinated notes which becomes effective after the Issue Date of such series of subordinated notes and that results, or would be likely to result, in:

- (i) if *“Regulatory Event (subordinated notes only): Full Exclusion”* is specified in the applicable Final Terms, the entire principal amount of such series of subordinated notes being excluded from the Tier 2 Capital of the Issuer (whether on an individual or consolidated basis); or
- (ii) if *“Regulatory Event (subordinated notes only): Full or Partial Exclusion”* is specified in the applicable Final Terms, the entire principal amount of such series of subordinated notes or any part thereof being excluded from the Tier 2 Capital of the Issuer (whether on an individual or consolidated basis).

“Relevant Supervisory Consent” means, in relation to any action, such permission or waiver of the relevant Supervisory Authority as is then required for such action under prevailing Regulatory Capital Requirements and/or Loss Absorption Regulations, as the case may be.

“Secondary Non-Preferential Debts” means ‘secondary non-preferential debts’ as defined in Section 387A(3)(b) of the Insolvency Act (or, as the case may be, in the relevant section of any other Ranking Legislation).

“**Senior Claims**” means the aggregate amount of all claims admitted in the winding up or dissolution of the Issuer which are:

- (i) claims of depositors of the Issuer;
- (ii) claims of investing members of the Issuer as regards the principal and interest due on share investments other than deferred share investments; and
- (iii) claims of creditors in respect of Ordinary Non-Preferential Debts of the Issuer and all other obligations of the Issuer which are preferred by law to Secondary Non-Preferential Debts.

“**Senior Non-Preferred Claims**” means the aggregate amount of all claims admitted in the winding up or dissolution of the Issuer which are claims of creditors in respect of Secondary Non-Preferential Debts of the Issuer.

“**Specified Currency**” means a currency issued and actively maintained as a country’s or countries’ recognized unit of domestic exchange by the government of any country and such terms shall also include the euro.

“**Subordinated Claims**” means the aggregate amount of all claims admitted in the winding up or dissolution of the Issuer which are claims in respect of Tertiary Non-Preferential Debts of the Issuer, including (without limitation) claims of creditors in respect of obligations of the Issuer which constitute, or would but for any applicable limitation on the amount of such capital constitute, Tier 2 Capital, Additional Tier 1 Capital or CET1 Capital (including the Issuer’s core capital deferred shares) and claims in respect of the Issuer’s PIBS.

“**Supervisory Authority**” means, from time to time, the Prudential Regulation Authority, the Bank of England and/or such other authority having for the time being primary supervisory authority and/or responsibility with respect to prudential or resolution matters concerning the Issuer and/or its group, as may be relevant in the context.

“**TARGET2**” means the Trans-European Automated Real-time Gross Settlement Express Transfer payment system which utilizes a single shared platform and which was launched on November 19, 2007 or any successor thereto.

“**Tertiary Non-Preferential Debts**” means ‘tertiary non-preferential debts’ as defined in Section 387A(3)(c) of the Insolvency Act (or, as the case may be, in the relevant section of any other Ranking Legislation).

“**Tier 1 Capital**”, “**CET1 Capital**”, “**Additional Tier 1 Capital**” and “**Tier 2 Capital**” have the respective meanings given thereto (or to a successor or equivalent term) in the Regulatory Capital Requirements.

Form, Transfer, Exchange and Denomination

Notes of a series will initially be represented by a global note or global notes in fully registered form (“**Global Notes**”). Notes offered in the United States to qualified institutional buyers in reliance on Rule 144A will be represented by one or more U.S. global notes (“**U.S. Global Notes**”). Notes offered outside the United States to non-U.S. persons in reliance on Regulation S will be represented by one or more international global notes (“**International Global Notes**”).

Notes will bear a legend setting forth transfer restrictions and may not be transferred except in compliance with these transfer restrictions and subject to certification requirements. In no event will notes in bearer form be issued.

Unless otherwise specified in the Final Terms relating to a particular series of notes, the Global Note or Global Notes representing a series of notes will be issued to and deposited with, or on behalf of, DTC in New York City and registered in the name of Cede & Co. (“**Cede**”), as DTC’s nominee. Interests in a Global Note or Global Notes representing notes of a series will be shown in, and transfers thereof will be effected only through, records maintained by DTC and its participants until such time, if any, as physical registered certificates

(“**Certificated Notes**”) in respect of such notes are issued, as set forth in the section entitled “*Description of the Global Notes—Book-Entry System.*”

The Global Note or Global Notes representing a series of notes may be transferred only to a successor of DTC or another nominee of DTC. For additional information, see the section entitled “*Description of the Global Notes—Book-Entry System.*”

Under the following circumstances, Global Notes of a series may be exchanged for certificated registered notes of such series:

- if at any time DTC notifies us that it is unwilling or unable to continue as the depository for the notes, or DTC ceases to be a clearing agency registered under the Exchange Act, and we are unable to appoint a successor to DTC registered as a clearing agency under the Exchange Act within 90 days of such notification or of our becoming aware of such ineligibility;
- upon the occurrence of any Event of Default under the Indenture; and
- if we determine in our sole discretion (subject to DTC’s procedures) that the notes of any series should no longer be represented by such Global Note or notes.

Certificated Notes representing a series of notes, if any, will be exchangeable for other Certificated Notes representing notes of such series of any authorized denominations and of a like aggregate principal amount and tenor. Certificated Notes will be serially numbered.

Certificated Notes may be presented to the Trustee for registration of transfer of exchange at its office in New York, which, at the date hereof, is located at 101 Barclay Street, New York, New York 10286. Certificated Notes may be presented for exchange and transfer in the manner, at the places and subject to the restrictions set forth in the Indenture and the notes. We have not registered the notes under the Securities Act or with any securities regulatory authority of any jurisdiction, and accordingly, transfers of the notes will be subject to the restrictions set forth in the sections entitled “*Notice to Investors*” and “*Transfer Restrictions.*”

Certificated Notes and interests in the U.S. Global Notes may be transferred to a person who takes delivery in the form of interests in an International Global Note only upon receipt by the Trustee of written certifications, in the form provided in the Indenture, to the effect that the transfer is being made in accordance with Regulation S or Rule 144 under the Securities Act and that, if this transfer occurs prior to 40 days after the commencement of the offering of such notes, the interest transferred will be held immediately thereafter through Euroclear Bank SA/NV (“**Euroclear**”) or Clearstream Banking, S.A. (“**Clearstream**”), each of which is a participant in DTC.

Until 40 days after the closing date for the offering of a series of notes, interests in an International Global Note may be held only through Euroclear or Clearstream, which are participants in DTC. Certificated Notes and interests in International Global Notes may be transferred to a person who takes delivery in the form of interests in a U.S. Global Note only upon receipt by the Trustee of written certifications, in the form provided in the Indenture, to the effect that such transfer is being made in accordance with Rule 144A to a person whom the transferor reasonably believes is purchasing for its own account or for an account as to which it exercises sole investment discretion and that such person and such account or accounts are “qualified institutional buyers” within the meaning of Rule 144A and agree to comply with the restrictions on transfer set forth in the sections entitled “*Notice to Investors*” and “*Transfer Restrictions.*”

In the event of any redemption of notes, we will not be required to (i) register the transfer of or exchange the notes during a period of 15 calendar days immediately preceding the date of redemption; (ii) register the transfer of or exchange the notes, or any portion thereof called for redemption, except the unredeemed portion of any of the notes being redeemed in part; or (iii) with respect to notes represented by a Global Note or Global Notes, exchange any such note or notes called for redemption, except to exchange such note or notes for another

Global Note or Global Notes of that series and like tenor representing the aggregate principal amount of notes of that series that have not been redeemed.

Unless otherwise specified in the Final Terms relating to a particular series of notes, The Bank of New York Mellon, London Branch is the paying agent (the “**Paying Agent**”) for the notes pursuant to the Indenture. We may at any time designate additional paying agents or rescind the designation of any paying agent provided that if and for so long as the notes are listed on any stock exchange which requires the appointment of a paying agent in any particular place, we shall maintain a paying agent with an office in the place required by such stock exchange or relevant authority.

We will issue senior preferred notes and senior non-preferred notes in minimum denominations of \$200,000 and subordinated notes in minimum denominations of \$250,000, and in each case in integral multiples of \$1,000 in excess thereof, in the case of notes denominated in U.S. dollars. We will issue notes denominated in a Specified Currency other than U.S. dollars in minimum denominations that are the equivalent of these amounts in any other Specified Currency, and in any other denominations in excess of the minimum denominations as specified in the applicable Final Terms. The notes will be issued in integral multiples of 1,000 units of any such Specified Currency in excess of their minimum denominations. If the principal, premium, if any, and interest, if any, on any of the notes not denominated in U.S. dollars, euro or sterling are to be payable at our or the holder’s option in U.S. dollars, such payment will be made on the basis of the Market Exchange Rate, computed by the Currency Determination Agent in respect of the relevant series of notes and as specified in the applicable Final Terms, on the second Business Day prior to such payment or, if such Market Exchange Rate is not then available, on the basis of the most recently available Market Exchange Rate.

Payment of Principal, Premium, if any, and Interest, if any

Payments of principal, premium, if any, and interest, if any, to owners of beneficial interests in the Global Notes are expected to be made in accordance with those procedures of DTC and its participants in effect from time to time as described in the subsection entitled “*Description of the Global Notes—Book-Entry System*” and, in the case of any note denominated in a Specified Currency other than U.S. dollars, as provided below.

Payments will be subject in all cases to any withholding or deduction required pursuant to an agreement described in Section 1471(b) of the U.S. Internal Revenue Code of 1986, as amended (the “**Code**”) or otherwise imposed pursuant to Sections 1471 through 1474 of the Code, any regulations or agreements thereunder, any official interpretations thereof, or any law implementing an intergovernmental approach thereto.

Except as described below, with respect to any Certificated Note, payments of interest, if any, will be made by mailing a check to the holder at the address of such holder appearing on the register for the notes on the regular record date (the “**Regular Record Date**”). Notwithstanding the foregoing, at our option, all payments of interest on the notes may be made by wire transfer of immediately available funds to an account at a bank located within the United States as designated by each holder not less than 15 calendar days prior to the relevant Interest Payment Date. A holder of \$10,000,000 (or, if the Specified Currency is other than U.S. dollars, the equivalent thereof in that Specified Currency) or more in aggregate principal amount of notes of like tenor and terms with the same Interest Payment Date may demand payment by wire transfer but only if appropriate payment instructions have been received in writing by any paying agent with respect to such note appointed by us, not less than 15 calendar days prior to the Interest Payment Date. In the event that payment is so made in accordance with instructions of the holder, such wire transfer shall be deemed to constitute full and complete payment of such principal, premium and/or interest on the notes. Payment of the principal, premium, if any, and interest, if any, due with respect to any Certificated Note at Maturity will be made in immediately available funds upon surrender of such note at the principal office of any paying agent appointed by us with respect to that note and accompanied by wire transfer instructions, provided that the Certificated Note is presented to such paying agent in time for such paying agent to make such payments in such funds in accordance with its normal procedures.

Payments of principal, premium, if any, and interest, if any, with respect to any note to be made in a Specified Currency other than U.S. dollars will be made by check mailed to the address of the person entitled thereto as its address appears in the register for the notes or by wire transfer to such account with a bank located

in a jurisdiction acceptable to us and the Trustee as shall have been designated at least 15 calendar days prior to the Interest Payment Date or Maturity, as the case may be, by the holder of such note on the relevant Regular Record Date or at Maturity, provided that, in the case of payment of principal of, and premium, if any, and interest, if any, due at Maturity, the note is presented to any paying agent appointed by us with respect to such note in time for such paying agent to make such payments in such funds in accordance with its normal procedures. Such designation shall be made by filing the appropriate information with the Trustee at its Corporate Trust Office, and, unless revoked, any such designation made with respect to any note by a holder will remain in effect with respect to any further payments with respect to such note payable to such holder. If a payment with respect to any such note cannot be made by wire transfer because the required designation has not been received by the Trustee on or before the requisite date or for any other reason, a notice will be mailed to the holder at its registered address requesting a designation pursuant to which such wire transfer can be made and, upon such Trustee's receipt of such a designation, such payment will be made within 15 calendar days of such receipt. We will pay any administrative costs imposed by banks in connection with making payments by wire transfer, but any tax, assessment or governmental charge imposed upon payments will be borne by the holders of such notes in respect of which such payments are made.

Except as provided below, payments of principal, premium, if any, and interest, if any, with respect to any note represented by Global Notes that is denominated in a Specified Currency other than U.S. dollars will be made in U.S. dollars, as set forth below. If the holder of such note on the relevant Regular Record Date or at Maturity, as the case may be, requests payments in a currency other than U.S. dollars, the holder shall transmit a written request for such payment to any paying agent appointed by us with respect to such note at its principal office on or prior to such Regular Record Date or the date 15 calendar days prior to Maturity, as the case may be. Such request may be delivered by mail, by hand, by cable or by telex or any other form of facsimile transmission. Any such request made with respect to any note by a holder will remain in effect with respect to any further payments of principal, and premium, if any, and interest, if any, with respect to such note payable to such holder, unless such request is revoked by written notice received by such paying agent on or prior to the relevant Regular Record Date or the date 15 calendar days prior to Maturity, as the case may be (but no such revocation may be made with respect to payments made on any such note if an Event of Default has occurred with respect thereto or upon the giving of a notice of redemption). Holders of notes denominated in a currency other than U.S. dollars whose notes are registered in the name of a broker or nominee should contact such broker or nominee to determine whether and how an election to receive payments in a currency other than U.S. dollars may be made.

The U.S. dollar amount to be received by a holder of a note denominated in other than U.S. dollars who elects to receive payments in U.S. dollars will be based on the highest indicated bid quotation for the purchase of U.S. dollars in exchange for the Specified Currency obtained by the Currency Determination Agent at approximately 11:00 a.m., New York City time, on the second Business Day immediately preceding the applicable payment date from the bank composite or multicontributor pages of the Quoting Source for three (or two if three are not available) major banks in New York City. The first three (or two) such banks selected by the Currency Determination Agent which are offering quotes on the Quoting Source will be used. If fewer than two such bid quotations are available at 11:00 a.m., New York City time, on the second Business Day immediately preceding the applicable payment date, such payment will be based on the Market Exchange Rate as of the second Business Day immediately preceding the applicable payment date. If the Market Exchange Rate for such date is not then available, such payment will be made in the Specified Currency. As used herein, the "**Quoting Source**" means Reuters Monitor Foreign Exchange Service, or if the Currency Determination Agent determines that such service is not available, such comparable display or other comparable manner of obtaining quotations as shall be agreed between us and the Currency Determination Agent. All currency exchange costs associated with any payment in U.S. dollars on any such notes will be borne by the holder thereof by deductions from such payment.

If the Specified Currency for a note denominated in a currency other than U.S. dollars is not available for the required payment of principal, premium, if any, and/or interest, if any, in respect thereof due to the imposition of exchange controls or other circumstances beyond our control, we will be entitled to satisfy our obligations to the holder of such note by making such payment in U.S. dollars on the basis of the Market Exchange Rate, computed by the Currency Determination Agent, on the second Business Day prior to such payment or, if such Market Exchange Rate is not then available, on the basis of the most recently available Market Exchange

Rate. Any payment made in U.S. dollars under such circumstances where the required payment was to be in a Specified Currency other than U.S. dollars will not constitute an Event of Default under the Indenture with respect to the notes.

All determinations referred to above made by the Currency Determination Agent shall be at its sole discretion in accordance with its normal operating procedures and shall, in the absence of manifest error, be conclusive for all purposes and binding on all holders and beneficial owners of notes.

Interest

Interest on Fixed Rate Notes

Each Fixed Rate Note bears interest on its outstanding principal amount from (and including) the Interest Commencement Date at the rate(s) per annum equal to the Fixed Rate(s) of Interest payable in arrear on the Interest Payment Date(s) in each year specified in the applicable Final Terms and on the Maturity Date specified in the applicable Final Terms if that does not fall on an Interest Payment Date. The first payment of interest will be made on the Interest Payment Date next following the Interest Commencement Date.

Interest shall be calculated in respect of any period by applying the Rate of Interest to the aggregate outstanding nominal amount of the Fixed Rate Notes and multiplying such sum by the applicable Day Count Fraction, and rounding the resultant figure to the nearest subunit of the relevant Specified Currency, half of any such subunit being rounded upwards or otherwise in accordance with applicable market convention.

If “*Business Day Convention—Adjusted*” is specified to be applicable in the applicable Final Terms, then:

- (a) any Interest Payment Date or the Maturity Date which would otherwise fall on a day which is not a Business Day will be postponed or brought forward (as applicable) in accordance with the relevant business day convention (as described under “*Interest on Floating Rate Notes - Interest Payment Dates*” below) specified in the applicable Final Terms (which, for the avoidance of doubt, shall not be the Floating Rate Convention);
- (b) the amount of interest payable on any Interest Payment Date or the Maturity Date will be the amount accrued during the Fixed Interest Period ending immediately prior to (as the case may be) such Interest Payment Date or the Maturity Date. As used herein, “**Fixed Interest Period**” means the period from (and including) the Interest Commencement Date to (but excluding) the first Interest Payment Date and each successive period from (and including) an Interest Payment Date to (but excluding) the next succeeding Interest Payment Date (or, if applicable, the Maturity Date); and
- (c) the Calculation Agent will calculate the amount of interest for each Fixed Interest Period and will cause such amount and the relative Interest Payment Date to be notified to us, to the Trustee and to any listing authority, stock exchange and/or quotation system to which the Fixed Rate Notes have then been admitted to listing, trading and/or quotation and to be published as soon as possible after such determination but in no event later than the fourth Business Day thereafter. Each amount of interest and the relative Interest Payment Date so notified may subsequently be amended (or appropriate alternative arrangements made by way of adjustment) without prior notice in the event of an extension or shortening of the relevant Fixed Interest Period. Any such amendment or alternative arrangements will promptly be notified to each listing authority, stock exchange and/or quotation system to which the Fixed Rate Notes have then been admitted to listing, trading and/or quotation and to the holders in accordance with the Indenture.

If “*Business Day Convention—Non-Adjusted*” is specified to be applicable in the applicable Final Terms, then:

- (a) any Interest Payment Date or the Maturity Date which would otherwise fall on a day which is not a Business Day will be postponed or brought forward (as applicable) in accordance with the

relevant business day convention (as described under “*Interest on Floating Rate Notes - Interest Payment Dates*” below) specified in the applicable Final Terms (which, for the avoidance of doubt, shall not be the Floating Rate Convention); and

- (b) there will be no corresponding adjustment of the amount of interest payable on any Interest Payment Date or (as the case may be) the Maturity Date.

Interest on Reset Notes

Rates of Interest and Interest Payment Dates

Each Reset Note bears interest on its outstanding principal amount:

- (a) from (and including) the Interest Commencement Date specified in the applicable Final Terms to (but excluding) the First Reset Date at the rate per annum equal to the Initial Rate of Interest;
- (b) from (and including) the First Reset Date to (but excluding) the Second Reset Date or, if no such Second Reset Date is specified in the applicable Final Terms, the Maturity Date at the rate per annum equal to the First Reset Rate of Interest; and
- (c) if applicable, from (and including) the Second Reset Date to (but excluding) the first Subsequent Reset Date (if any, or otherwise the Maturity Date), and each successive period from (and including) any Subsequent Reset Date to (but excluding) the next succeeding Subsequent Reset Date (if any, or otherwise the Maturity Date) (each a “**Subsequent Reset Period**”) at the rate per annum equal to the relevant Subsequent Reset Rate of Interest,

(in each case rounded if necessary to the fifth decimal place, with 0.000005 being rounded upwards) payable, in each case, in arrear on the Interest Payment Date(s) in each year and on the Maturity Date so specified if that does not fall on an Interest Payment Date.

The Rate of Interest and the amount of interest (the “**Interest Amount**”) payable shall be determined by the Calculation Agent, (A) in the case of the Rate of Interest, at or as soon as practicable after each time at which the Rate of Interest is to be determined, and (B) in the case of the Interest Amount in accordance with the provisions for calculating amounts of interest in “*Interest—Interest on Fixed Rate Notes*” and, for such purposes, references therein to “Fixed Rate Notes” shall be deemed to be to “Reset Notes” and “*Interest—Interest on Fixed Rate Notes*” shall be construed accordingly.

In this section “—*Interest on Reset Notes*”:

“**Calculation Agent**” means the calculation agent specified in the applicable Final Terms;

“**First Margin**” means the margin specified as such in the applicable Final Terms;

“**First Reset Date**” means the date specified as such in the applicable Final Terms;

“**First Reset Period**” means the period from (and including) the First Reset Date until (but excluding) the Second Reset Date or, if no such Second Reset Date is specified in the applicable Final Terms, the Maturity Date;

“**First Reset Rate of Interest**” means, in respect of the First Reset Period and subject to “*Interest—Interest on Reset Notes—Fallbacks*” and (if applicable) “—*Benchmark discontinuation*” the rate of interest determined by the Calculation Agent on the relevant Reset Determination Date as the sum, converted, if the Reset Reference Rate is either Mid-Swaps or the Reference Bond Yield (if not already on the same basis), from a basis equivalent to the Fixed Leg Swap Duration or the Reference Bond Yield, as the case may be, to a basis equivalent to the frequency with which scheduled interest payments are payable on the notes during the relevant Reset Period (such calculation to be determined by the Issuer in conjunction with a leading financial institution selected by it), of (A) the relevant Reset Reference Rate and (B) the First Margin;

“**Fixed Leg Swap Duration**” has the meaning specified in the applicable Final Terms;

“**Floating Leg Swap Duration**” has the meanings specified in the applicable Final Terms;

“**Initial Rate of Interest**” has the meaning specified in the applicable Final Terms;

“**Mid-Market Swap Rate**” means, subject to “*Interest – Interest on Reset Notes – Fallbacks*” and (if applicable) “*–Benchmark discontinuation,*” for any Reset Period the mean of the bid and offered rates for the fixed leg payable with a frequency equivalent to the Fixed Leg Swap Duration (calculated on the basis of the Day Count Fraction as specified in the applicable Final Terms as determined by the Calculation Agent) of a fixed-for-floating interest rate swap transaction in the Specified Currency which transaction (i) has a term equal to the relevant Reset Period and commencing on the relevant Reset Date, (ii) is in an amount that is representative for a single transaction in the relevant market at the relevant time with an acknowledged dealer of good credit in the swap market and (iii) has a floating leg based on the Mid-Swap Floating Leg Benchmark Rate for the Floating Leg Swap Duration (calculated on the day count basis specified for such Mid-Swap Floating Leg Benchmark Rate as determined by the Calculation Agent);

“**Mid-Market Swap Rate Quotation**” means a quotation (expressed as a percentage rate per annum) for the relevant Mid-Market Swap Rate;

“**Mid-Swap Floating Leg Benchmark Rate**” means (subject to “*–Benchmark discontinuation,*” if applicable) the reference rate specified as such in the applicable Final Terms or, if no such reference rate is so specified:

- (i) if the Specified Currency is euro, the EURIBOR rate for the Floating Leg Swap Duration (calculated on an Actual/360 day count basis);
- (ii) if the Specified Currency is pounds sterling, the overnight SONIA rate compounded for the Floating Leg Swap Duration (calculated on an Actual/365 day count basis); or
- (iii) if the Specified Currency is U.S. dollars, the overnight SOFR rate compounded for the Floating Leg Swap Duration (calculated on an Actual/360 day count basis);

“**Mid-Swap Rate**” means, in relation to a Reset Determination Date and subject to “*Interest—Interest on Reset Notes—Fallbacks*” and (if applicable) “*–Benchmark discontinuation*” either:

- (i) if Single Mid-Swap Rate is specified in the applicable Final Terms, the rate for swaps in the Specified Currency:
 - (A) with a term equal to the relevant Reset Period; and
 - (B) commencing on the relevant Reset Date,which appears on the Relevant Screen Page or such replacement page on that service which displays the information; or
- (ii) if Mean Mid-Swap Rate is specified in the applicable Final Terms, the arithmetic mean (expressed as a percentage rate per annum and rounded, if necessary, to the nearest 0.001% (0.0005% being rounded upwards)) of the bid and offered swap rate quotations for swaps in the Specified Currency:
 - (A) with a term equal to the relevant Reset Period; and
 - (B) commencing on the relevant Reset Date,

which appear on the Relevant Screen Page or such replacement page on that service which displays the information,

in either case, as at approximately 11.00 a.m. in the Principal Financial Center of the Specified Currency on such Reset Determination Date, all as determined by the Calculation Agent provided, however, that if there is no such rate appearing on the Relevant Screen Page for a term equal to the relevant Reset Period, then the Mid-Swap Rate shall be determined through the use of straight-line interpolation by reference to two rates, one of which shall be determined in accordance with the above provisions, but as if the relevant Reset Period were the period of time for which rates are available next shorter than the length of the actual Reset Period and the other of which shall be determined in accordance with the above provisions, but as if the relevant Reset Period were the period of time for which rates are available next longer than the length of the actual Reset Period;

“Mid-Swap Reference Banks” means the principal office in the Relevant Financial Centre of four major banks in the swap, money, securities or other market most closely connected with the Subsequent Reset Reference Rate as selected by the Issuer on the advice of an investment bank of international repute;

“Rate of Interest” means the Initial Rate of Interest, the First Reset Rate of Interest or the Subsequent Reset Rate of Interest, as applicable;

“Reference Bond” means for any Reset Period a government security or securities issued by the state responsible for issuing the Specified Currency (which, if the Specified Currency is euro, shall be Germany) selected by the Issuer on the advice of an investment bank of international repute as having an actual or interpolated maturity comparable with the relevant Reset Period that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities denominated in the same currency as the notes and of a comparable maturity to the relevant Reset Period.

“Reference Bond Reset Rate Time” means the time specified in the applicable Final Terms;

“Reference Bond Yield” means the annual yield to maturity or interpolated yield to maturity (on the relevant day count basis) of the relevant Reference Bond, expressed as a percentage, as determined by the Calculation Agent as follows on the basis of the Reference Government Bond Dealer Quotations provided to the Calculation Agent (upon request by or on behalf of the Issuer) by the Reference Government Bond Dealers at or around the relevant Reference Bond Reset Rate Time on the relevant Reset Determination Date. If four or more Reference Government Bond Dealer Quotations are so provided, the Reset Reference Rate shall be the arithmetic average of such Reference Government Bond Dealer Quotations after excluding the highest (or, in the event of equality, one of the highest) and lowest (or, in the event of equality, one of the lowest) such Reference Government Bond Dealer Quotations. If only two or three Reference Government Bond Dealer Quotations are so provided, the Reset Reference Rate shall be the arithmetic average of all such quotations. If only one Reference Government Bond Dealer Quotation is so provided, the Reset Reference Rate shall be the quotation provided. If no Reference Government Bond Dealer Quotations are so provided, the Reset Reference Rate will be (i) in the case of each Reset Period other than the First Reset Period, the Reset Reference Rate in respect of the immediately preceding Reset Period or (ii) in the case of the First Reset Period, the “Reference Bond Fallback Rate” set out in the applicable Final Terms;

“Reference Government Bond Dealer” means each of five banks (selected by the Issuer on the advice of an investment bank of international repute), or their affiliates, which are (A) primary government securities dealers, and their respective successors, or (B) market makers in pricing corporate bond issues;

“Reference Government Bond Dealer Quotations” means, with respect to each Reference Government Bond Dealer and the relevant Reset Determination Date, the arithmetic mean average, as determined by the Calculation Agent, of the bid and offered yields to maturity or interpolated yields to maturity (on the relevant day count basis) for the relevant Reference Bond (expressed in each case as a percentage) at or around the Reference Bond Reset Rate Time on the relevant Reset Determination Date quoted in writing to the Calculation Agent by such Reference Government Bond Dealer;

“Relevant Screen Page” means the screen page specified in the applicable Final Terms (or any successor or replacement screen displaying the relevant information);

“**Reset Business Day**” means a day on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealing in foreign exchange and foreign currency deposits) in any Business Centre specified in the applicable Final Terms;

“**Reset Date**” means the First Reset Date, the Second Reset Date and each Subsequent Reset Date (as applicable);

“**Reset Determination Date**” means, in respect of any Reset Period, the second Reset Business Day prior to the first day of such Reset Period;

“**Reset Period**” means the First Reset Period or a Subsequent Reset Period, as the case may be;

“**Reset Reference Rate**” means either (i) any of the CMT Rate, EURIBOR, the Federal Funds Rate, Compounded Daily SONIA, SOFR, the Prime Rate, or the Treasury Rate, each as described in “*Interest—Interest on Floating Rate Notes*” and, for such purposes, references therein to “Floating Rate Notes” shall be deemed to be to “Reset Notes” and “*Interest—Interest on Floating Rate Notes*” shall be construed accordingly, or (ii) if Mid-Swaps is specified in the applicable Final Terms the Mid-Swap Rate, or (iii) if Reference Bond is specified in the applicable Final Terms, the Reference Bond Yield;

“**Second Reset Date**” means the date specified in the applicable Final Terms;

“**Subsequent Margin**” means the margin specified as such in the applicable Final Terms;

“**Subsequent Reset Date**” means the date or dates specified in the applicable Final Terms; and

“**Subsequent Reset Rate of Interest**” means, in respect of any Subsequent Reset Period and subject to “*Interest—Interest on Reset Notes—Fallbacks*” and (if applicable) “*Interest – Benchmark discontinuation*”, the rate of interest determined by the Calculation Agent on the relevant Reset Determination Date as the sum, converted, if the Reset Reference Rate is either Mid-Swaps or the Reference Bond Yield (if not already on the same basis), from a basis equivalent to the Fixed Leg Swap Duration specified in the applicable Final Terms or the Reference Bond Yield, as the case may be, to a basis equivalent to the frequency with which scheduled interest payments are payable on the notes during the relevant Reset Period (such calculation to be determined by the Issuer in conjunction with a leading financial institution selected by it), of (A) the relevant Reset Reference Rate and (B) the relevant Subsequent Margin.

Fallbacks for Mid-Swap Rate

If on any Reset Determination Date the Relevant Screen Page is not available or the Mid-Swap Rate does not appear on the Relevant Screen Page, the Calculation Agent shall request each of the Mid-Swap Reference Banks to provide the Calculation Agent with its Mid-Market Swap Rate Quotation as at approximately 11.00 a.m. in the Principal Financial Center of the Specified Currency on the Reset Determination Date in question.

If two or more of the Mid-Swap Reference Banks provide the Calculation Agent with Mid-Market Swap Rate Quotations, the First Reset Rate of Interest or the Subsequent Reset Rate of Interest (as applicable) for the relevant Reset Period shall be the sum (converted as set out in the definition of such term above) of the arithmetic mean (rounded, if necessary, to the nearest 0.001% (0.0005% being rounded upwards)) of the relevant Mid-Market Swap Rate Quotations and the First Margin or Subsequent Margin (as applicable), all as determined by the Calculation Agent.

If on any Reset Determination Date only one of the Mid-Swap Reference Banks provides the Calculation Agent with a Mid-Market Swap Rate Quotation as provided in the foregoing provisions of this paragraph, the First Reset Rate of Interest or the Subsequent Reset Rate of Interest (as applicable) shall be the sum (converted as set out in the definition of such term above) of (rounded, if necessary, to the nearest 0.001% (0.0005% being rounded upwards)) of the relevant Mid-Market Swap Rate Quotation and the First Margin or Subsequent Margin (as applicable), all as determined by the Calculation Agent.

If on any Reset Determination Date none of the Mid-Swap Reference Banks provides the Calculation Agent with a Mid-Market Swap Rate Quotation as provided in the foregoing provisions of “*Interest—Interest on Reset Notes—Fallbacks*”, the First Reset Rate of Interest or the Subsequent Reset Rate of Interest (as applicable) shall be determined by the Calculation Agent as if, and on the assumption that, the relevant Reset Reference Rate were equal to:

- (a) the Mid-Swap Rate as if determined as at the latest date (the **Latest Publication Date**) on which the relevant swap rate (if “*Single Mid-Swap Rate*” is specified in the applicable Final Terms) or swap rate quotations (if “*Mean Mid-Swap Rate*” is specified in the applicable Final Terms) for a swap in the Specified Currency with a term equal to the relevant Reset Period was/were published on the Relevant Screen Page (deeming such latest rate or rates, as applicable, to apply to a swap commencing on the relevant Reset Date, whether or not this is the case); or
- (b) if this is more recent than the Latest Publication Date, or if for any reason the relevant Reset Reference Rate cannot otherwise be determined accordance with paragraph (a) above, the Mid-Swap Rate determined as at the last preceding Reset Date (or, for the purpose of determining the First Reset Rate of Interest on the first Reset Determination Date, the Mid-Swap Fallback Rate specified in the applicable Final Terms).

Notification of First Reset Rate of Interest, Subsequent Reset Rate of Interest and Interest Amount

The Calculation Agent will cause the First Reset Rate of Interest, any Subsequent Reset Rate of Interest and, in respect of a Reset Period, the Interest Amount payable on each Interest Payment Date falling in such Reset Period to be notified to the Issuer, the Paying Agent, the Trustee and any competent authority or stock exchange by or on which the relevant Reset Notes are for the time being listed and notice thereof to be published in accordance with “—*Notices*”) as soon as possible after their determination but in no event later than the fourth London Business Day (as defined in “*Interest—Interest on Floating Rate Notes—Determination of Rate of Interest and calculation of Interest Amount; Percentages*”) thereafter.

Determination or Calculation by an agent appointed by the Issuer

If for any reason the Calculation Agent defaults in its obligation to determine the Rate of Interest or calculate any Interest Amount in accordance with “*Interest—Interest on Reset Notes—Rates of Interest and Interest Payment Dates*”), the Issuer may appoint an agent to do so and such determination shall be deemed to have been made by the Calculation Agent. In doing so, such agent shall apply the foregoing provisions of this section “*Interest—Interest on Reset Notes*”) with any necessary consequential amendments, to the extent that, in its opinion, it can do so, and in all other respects it shall do so in such manner as it shall deem fair and reasonable in all the circumstances.

Certificates to be final

All certificates, communications, opinions, determinations, calculations, quotations and decisions given, expressed, made or obtained for the purposes of the provisions of this section “*Interest—Interest on Reset Notes*”) by the Calculation Agent or any agent appointed by the Trustees shall (in the absence of manifest error) be binding on the Issuer, the Trustee, the Calculation Agent, the other paying agents and all noteholders and (in the absence of wilful default, bad faith or manifest error) no liability to the Issuer or the noteholders shall attach to the Calculation Agent or the Trustee or any agent appointed by the Trustee in connection with the exercise or non-exercise by it of its powers, duties and discretions pursuant to such provisions.

Interest on Floating Rate Notes

Interest Payment Dates

Each Floating Rate Note bears interest on its outstanding principal amount from (and including) the Interest Commencement Date at the rate equal to the Rate of Interest payable in arrear on either:

- (i) the Interest Payment Date(s) in each year specified in the applicable Final Terms (the period from (and including) the Interest Commencement Date to (but excluding) the first Interest Payment Date and each successive period from (and including) an Interest Payment Date to (but excluding) the next Interest Payment Date, each an “**Interest Period**”); or
- (ii) if no express Interest Payment Date(s) is/are specified in the applicable Final Terms, each date which falls the number of months or other period specified as the Interest Period in the applicable Final Terms after the preceding Interest Payment Date or, in the case of the first Interest Payment Date, after the Interest Commencement Date, each such date being an Interest Payment Date.

If any Interest Payment Date which is specified in the applicable Final Terms to be subject to adjustment in accordance with a business day convention would otherwise fall on a day which is not a Business Day, then, if the business day convention specified is:

- (A) in any case where Interest Periods are specified in accordance with (ii) above, the “Floating Rate” Convention, such Interest Payment Date shall be postponed to the next day which is a Business Day unless it would thereby fall into the next calendar month, in which event (I) such Interest Payment Date shall be brought forward to the immediately preceding Business Day and (II) each subsequent Interest Payment Date shall be the last Business Day in the month which falls the number of months or other period specified as the Interest Period in the applicable Final Terms after the preceding applicable Interest Payment Date occurred; or
- (B) the “Following Business Day” Convention, such Interest Payment Date shall be postponed to the next day which is a Business Day; or
- (C) the “Modified Following Business Day” Convention, such Interest Payment Date shall be postponed to the next day which is a Business Day unless it would thereby fall into the next calendar month, in which event such Interest Payment Date shall be brought forward to the immediately preceding Business Day; or
- (D) the “Preceding Business Day” Convention, such Interest Payment Dates shall be brought forward to the immediately preceding Business Day.

Rate of Interest

The Rate of Interest payable from time to time in respect of Floating Rate Notes will be determined in the manner specified in the applicable Final Terms. For the avoidance of doubt, the provisions in this section in respect of Floating Rate Notes shall also apply to Reset Notes when the Reset Reference Rate includes one of the Interest Rate Basis described in this section.

Interest on Floating Rate Notes will be determined by reference to the applicable Interest Rate Basis or Bases, which may, as described below, include:

- the one-year Constant Maturity Treasury Rate (“**CMT Rate**”);
- EURIBOR;
- the Federal Funds Rate;
- Compounded Daily SONIA;
- SOFR;
- the Prime Rate; or
- the Treasury Rate.

The applicable Final Terms will specify whether any Margin, expressed as a percentage amount, is to be added or subtracted from the related Interest Rate Basis or Bases applicable to such Floating Rate Note.

The applicable Final Terms will specify whether the rate of interest on the related Floating Rate Note will be reset daily, weekly, monthly, quarterly, semi-annually or annually or at such other specified intervals as specified in the applicable Final Terms (each, an “**Interest Reset Period**”) and the dates on which such rate of interest will be reset (each, an “**Interest Reset Date**”). If any Interest Reset Date for any Floating Rate Note would otherwise be a day that is not a Business Day, such Interest Reset Date will be postponed to the next succeeding Business Day except that in the case of a Floating Rate Note as to which EURIBOR, SOFR or SONIA is an applicable Interest Rate Basis and such Business Day falls in the next succeeding calendar month, such Interest Reset Date will be the immediately preceding Business Day.

The interest rate applicable to each Interest Period (or other Interest Accrual Period) will be the rate determined by the Calculation Agent (as specified in the applicable Final Terms) as of the applicable Interest Determination Date (“**Interest Determination Date**”).

The interest rate applicable to each Interest Reset Period commencing on the related Interest Reset Date will be the rate determined by the Calculation Agent (as specified in the applicable Final Terms) as of the applicable Interest Determination Date and calculated on or prior to the Calculation Date (as defined below), except with respect to EURIBOR, SOFR and Compounded Daily SONIA, which will be calculated on such Interest Determination Date, except with respect to the Prime Rate, which will be calculated on or prior to the day that is one New York City Banking Day following the Interest Reset Date pertaining to such Interest Determination Date, and except with respect to the CMT, which will be calculated on the dates specified below under “—*CMT Rate*.” Unless otherwise specified in the applicable Final Terms, the “Interest Determination Date” with respect to:

- the Federal Funds Rate will be the Business Day immediately preceding the applicable Interest Reset Date;
- the CMT Rate will be the second US Government Securities Business Day preceding the applicable Interest Reset Date;
- the Prime Rate will be the applicable Interest Reset Date;
- EURIBOR will be the second TARGET Settlement Date immediately preceding the applicable Interest Reset Date;
- SOFR will be the first US Government Securities Business Day falling after the last day of the relevant Observation Period;
- Compounded Daily SONIA will be the first London Banking Day falling after the last day of the relevant Observation Period; and
- the Treasury Rate will be the day in the week in which the applicable Interest Reset Date falls on which the day Treasury Bills, as defined below, are normally auctioned (Treasury Bills are normally sold at an auction held on Monday of each week, unless such Monday is a legal holiday, in which case the auction is normally held on the immediately succeeding Tuesday although such auction may be held on the preceding Friday); provided, however, that if an auction is held on the Friday of the week preceding the applicable Interest Reset Date, the “Interest Determination Date” will be such preceding Friday; provided, further, that if the Interest Determination Date would otherwise fall on an Interest Reset Date, then such Interest Reset Date will be postponed to the next succeeding Business Day.

The “**Interest Determination Date**” pertaining to a Floating Rate Note the interest rate of which is determined by reference to two or more Interest Rate Bases will be the most recent Business Day which is at least two Business Days prior to the applicable Interest Reset Date for such Floating Rate Note on which each Interest

Rate Basis is determinable. Each Interest Rate Basis will be determined as of such date, and the applicable interest rate will take effect on the applicable Interest Reset Date.

The “**Calculation Date**,” if applicable, pertaining to any Interest Determination Date will be the earlier of (i) the tenth calendar day after such Interest Determination Date or, if such day is not a Business Day, the next succeeding Business Day or (ii) the Business Day immediately preceding the applicable Interest Payment Date or the Maturity Date, as the case may be.

The Calculation Agent shall determine each Interest Rate Basis in accordance with the following provisions:

“**H.15**” means the weekly statistical release designated as such, or any successor publication, published by the Board of Governors of the Federal Reserve System (the “**Board of Governors**”), or its successor, available through the website of the Board of Governors at <http://www.federalreserve.gov/releases/h15/update/h15upd.htm>

“**H.15 Daily Update**” means the daily update of H.15 available at the Board of Governors of the Federal Reserve System’s website located at <http://www.federalreserve.gov/releases/h15/update/h15upd.htm>, or any successor site or publication.

CMT Rate

“**CMT Rate**” means, with respect to any Interest Determination Date relating to a Floating Rate Note or Reset Note for which the interest rate is determined with reference to the CMT Rate (and subject to “—*Benchmark discontinuation*” if applicable):

- (1) if the Reuters 7051 Page is specified in the applicable Final Terms as the Designated CMT Reuters Page:
 - (a) the percentage equal to the yield for United States Treasury securities at “constant maturity” having the Designated CMT Maturity Index specified in the applicable Final Terms as published in H.15 under the caption “Treasury Constant Maturities,” as the yield is displayed on Reuters (or any successor service) on page FRBCMT (or any other page as may replace the specified page on that service) (“**T7051 Page**”), on such Interest Determination Date, or
 - (b) if the rate referred to in clause (a) does not so appear on the T7051 Page, the percentage equal to the yield for United States Treasury securities at “constant maturity” having the particular Designated CMT Maturity Index and for such Interest Determination Date as published in H.15 under the caption “Treasury Constant Maturities,” or
 - (c) if the rate referred to in clause (b) does not so appear in H.15, the rate on such Interest Determination Date for the period of the particular Designated CMT Maturity Index as may then be published by either the Board of Governors or the United States Department of the Treasury that the Calculation Agent determines to be comparable to the rate which would otherwise have been published in H.15, or
 - (d) if the rate referred to in clause (c) is not so published, the rate on such Interest Determination Date calculated by the Calculation Agent as a yield to maturity based on the arithmetic mean of the secondary market bid prices at approximately 5:00 P.M., New York City time, on that Interest Determination Date of three leading primary United States government securities dealers in The City of New York (which may include the agents or their affiliates) (each, a “**Reference Dealer**”), selected by the Calculation Agent (after consultation with us) from five Reference Dealers so selected by the Calculation Agent and eliminating the highest quotation, or, in the event of equality, one of the highest, and the lowest quotation or, in the event of equality, one of the lowest, for United States Treasury securities with an original maturity equal to

the particular Designated CMT Maturity Index, a remaining term to maturity no more than one year shorter than that Designated CMT Maturity Index and in a principal amount that is representative for a single transaction in the securities in that market at that time, or

- (e) if fewer than five but more than two of the prices referred to in clause (d) are provided as requested, the rate on such Interest Determination Date calculated by the Calculation Agent based on the arithmetic mean of the bid prices obtained and neither the highest nor the lowest of the quotations shall be eliminated, or
 - (f) if fewer than three prices referred to in clause (d) are provided as requested, the rate on such Interest Determination Date calculated by the Calculation Agent as a yield to maturity based on the arithmetic mean of the secondary market bid prices as of approximately 5:00 P.M., New York City time, on that Interest Determination Date of three Reference Dealers selected by the Calculation Agent (after consultation with us) from five Reference Dealers so selected by the Calculation Agent and eliminating the highest quotation or, in the event of equality, one of the highest and the lowest quotation or, in the event of equality, one of the lowest, for United States Treasury securities with an original maturity greater than the particular Designated CMT Maturity Index, a remaining term to maturity closest to that Designated CMT Maturity Index and in a principal amount that is representative for a single transaction in the securities in that market at that time, or
 - (g) if fewer than five but more than two prices referred to in clause (f) are provided as requested, the rate on such Interest Determination Date calculated by the Calculation Agent based on the arithmetic mean of the bid prices obtained and neither the highest nor the lowest of the quotations will be eliminated, or
 - (h) if fewer than three prices referred to in clause (f) are provided as requested, the CMT Rate in effect on such Interest Determination Date, provided that if no CMT Rate was in effect on such Interest Determination Date, the rate on such Floating Rate Note or Reset Note for the following Interest Reset Period shall be the Initial Interest Rate specified in the applicable Final Terms.
- (2) if the Reuters Page T7052 is specified in the applicable Final Terms as the Designated CMT Reuters Page:
- (a) the percentage equal to the one-week average yield for United States Treasury securities at “constant maturity” having the Designated CMT Maturity Index specified in the applicable Final Terms as published in H.15 under the caption “Week Ending” and opposite the caption “Treasury Constant Maturities,” as the yield is displayed on Reuters (or any successor service) (on page 7052 or any other page as may replace the specified page on that service) on page FEDCMT (or any other page as may replace the specified page on that service) (“**T7052 Page**”), for the week preceding the week in which such Interest Determination Date falls, or
 - (b) if the rate referred to in clause (a) does not so appear on the T7052 Page, the percentage equal to the one-week average yield for United States Treasury securities at “constant maturity” having the particular Designated CMT Maturity Index and for the week preceding such Interest Determination Date as published in H.15 under the caption “Week Ending” and opposite the caption “Treasury Constant Maturities,” or
 - (c) if the rate referred to in clause (b) does not so appear in H.15, the one-week average yield for United States Treasury securities at “constant maturity” having the particular Designated CMT Maturity Index as otherwise announced by the Federal Reserve Bank

of New York for the week preceding the week in which such Interest Determination Date falls, or

- (d) if the rate referred to in clause (c) is not so published, the rate on such Interest Determination Date calculated by the Calculation Agent as a yield to maturity based on the arithmetic mean of the secondary market bid prices at approximately 5:00 P.M., New York City time, on that Interest Determination Date of three Reference Dealers selected by the Calculation Agent (after consultation with us) from five Reference Dealers so selected by the Calculation Agent and eliminating the highest quotation, or, in the event of equality, one of the highest, and the lowest quotation or, in the event of equality, one of the lowest, for United States Treasury securities with an original maturity equal to the particular Designated CMT Maturity Index, a remaining term to maturity no more than one year shorter than that Designated CMT Maturity Index and in a principal amount that is representative for a single transaction in the securities in that market at that time, or
- (e) if fewer than five but more than two of the prices referred to in clause (d) are provided as requested, the rate on such Interest Determination Date calculated by the Calculation Agent based on the arithmetic mean of the bid prices obtained and neither the highest nor the lowest of the quotations shall be eliminated, or
- (f) if fewer than three prices referred to in clause (d) are provided as requested, the rate on such Interest Determination Date calculated by the Calculation Agent as a yield to maturity based on the arithmetic mean of the secondary market bid prices as of approximately 5:00 P.M., New York City time, on that Interest Determination Date of three Reference Dealers selected by the Calculation Agent (after consultation with us) from five Reference Dealers so selected by the Calculation Agent and eliminating the highest quotation or, in the event of equality, one of the highest and the lowest quotation or, in the event of equality, one of the lowest, for United States Treasury securities with an original maturity greater than the particular Designated CMT Maturity Index, a remaining term to maturity closest to that Designated CMT Maturity Index and in a principal amount that is representative for a single transaction in the securities in that market at the time, or
- (g) if fewer than five but more than two prices referred to in clause (f) are provided as requested, the rate on such Interest Determination Date calculated by the Calculation Agent based on the arithmetic mean of the bid prices obtained and neither the highest or the lowest of the quotations will be eliminated, or
- (h) if fewer than three prices referred to in clause (f) are provided as requested, the CMT Rate in effect on that Interest Determination Date, provided that if no CMT Rate was in effect on such Interest Determination Date, the rate on such Floating Rate Note or Reset Note for the following Interest Reset Period shall be the Initial Interest Rate specified in the applicable Final Terms.

If two United States Treasury securities with an original maturity greater than the Designated CMT Maturity Index specified in the applicable Final Terms have remaining terms to maturity equally close to the particular Designated CMT Maturity Index, the quotes for the United States Treasury security with the shorter original remaining term to maturity will be used.

“Designated CMT Maturity Index” means the original period to maturity of the U.S. Treasury securities (either 1, 2, 3, 5, 7, 10, 20 or 30 years) specified in the applicable Final Terms with respect to which the CMT Rate will be calculated.

Compounded Daily SONIA – Non-Index Determination

With respect to any Interest Determination Date relating to a Floating Rate Note or Reset Note for which the interest rate is determined on the basis of Compounded Daily SONIA and for which the applicable Final Terms specify “Index Determination” to be “Not Applicable”, the rate of interest for an Interest Accrual Period will, subject to “—Benchmark discontinuation”, if applicable, and as provided below, be Compounded Daily SONIA with respect to such Interest Accrual Period plus or minus (as indicated in the applicable Final Terms) the applicable Margin (if any), all as determined by the Calculation Agent.

“**Compounded Daily SONIA**” means with respect to an Interest Accrual Period, the rate of return of a daily compounded interest investment (with the daily Sterling overnight reference rate as reference rate for the calculation of interest) as calculated by the Calculation Agent as at the relevant Interest Determination Date in accordance with the following formula (and the resulting percentage will be rounded if necessary to the nearest fifth decimal place, with 0.000005 being rounded upwards):

$$\left[\prod_{i=1}^{d_o} \left(1 + \frac{SONIA_i \times n_i}{365} \right) - 1 \right] \times \frac{365}{d}$$

where:

“**d**” is the number of calendar days in:

- (i) where “Lag” is specified as the Observation Method in the applicable Final Terms, the relevant Interest Accrual Period; or
- (ii) where “Shift” is specified as the Observation Method in the applicable Final Terms, the relevant Observation Period;

“**d_o**” means:

- (i) where “Lag” is specified as the Observation Method in the applicable Final Terms, the number of London Banking Days in the relevant Interest Accrual Period; or
- (ii) where “Shift” is specified as the Observation Method in the applicable Final Terms, the number of London Banking Days in the relevant Observation Period;

“**i**” is a series of whole numbers from one to “**d_o**”, each representing the relevant London Banking Day in chronological order from, and including, the first London Banking Day in:

- (i) where “Lag” is specified as the Observation Method in the applicable Final Terms, the relevant Interest Accrual Period; or
- (ii) where “Shift” is specified as the Observation Method in the applicable Final Terms, the relevant Observation Period;

“**London Banking Day**” means any day on which commercial banks are open for general business (including dealing in foreign exchange and foreign currency deposits) in London;

“**n_i**”, for any London Banking Day “**i**”, means the number of calendar days from (and including) such London Banking Day “**i**” up to (but excluding) the following London Banking Day;

“**Observation Period**” means the period from (and including) the date falling “**p**” London Banking Days prior to the first day of the relevant Interest Accrual Period to (but excluding) the date falling “**p**” London Banking Days prior to (A) (in the case of an Interest Period) the Interest Payment Date for

such Interest Period or (B) (in the case of any other Interest Accrual Period) the date on which the relevant payment of interest falls due;

“*p*” means:

- (i) where “Lag” is specified as the Observation Method in the applicable Final Terms, the number of London Banking Days specified as the “Lag Period” in the applicable Final Terms (or, if no such number is so specified, five London Banking Days); or
- (ii) where “Shift” is specified as the Observation Method in the applicable Final Terms, the number of London Banking Days specified as the “Shift Period” in the applicable Final Terms (or, if no such number is specified, five London Banking Days);

the “**SONIA reference rate**”, in respect of any London Banking Day (“**LBD_x**”), is a reference rate equal to the daily Sterling Overnight Index Average (“**SONIA**”) rate for such **LBD_x** as provided by the administrator of SONIA to authorized distributors and as then published on the Relevant Screen Page (or, if the Relevant Screen Page is unavailable, as otherwise published by such authorized distributors) on the London Banking Day immediately following **LBD_x**; and

“**SONIA_i**” means the SONIA reference rate for:

- (i) where “Lag” is specified as the Observation Method in the applicable Final Terms, the London Banking Day falling “*p*” London Banking Days prior to the relevant London Banking Day “*i*”; or
- (ii) where “Shift” is specified as the Observation Method in the applicable Final Terms, the relevant London Banking Day “*i*”.

Subject to “– *Benchmark discontinuation*”, if, where any interest rate is to be calculated pursuant to the section “*Compounded Daily SONIA – Non-Index Determination*” above, in respect of any London Banking Day on which an applicable SONIA reference rate is required to be determined, such SONIA reference rate is not made available on the Relevant Screen Page or has not otherwise been published by the relevant authorized distributors, then the SONIA reference rate in respect of such London Banking Day shall be the rate determined by the Calculation Agent as:

- (1) the sum of (i) the Bank of England’s Bank Rate (the “**Bank Rate**”) prevailing at 5.00 p.m. (London time) (or, if earlier, close of business) on such London Banking Day; and (ii) the mean of the spread of the SONIA reference rate to the Bank Rate over the previous five London Banking Days in respect of which a SONIA reference rate has been published, excluding the highest spread (or, if there is more than one highest spread, one only of those highest spreads) and lowest spread (or, if there is more than one lowest spread, one only of those lowest spreads); or
- (2) if the Bank Rate under (1)(i) above is not available at the relevant time, either (A) the SONIA reference rate published on the Relevant Screen Page (or otherwise published by the relevant authorized distributors) for the first preceding London Banking Day in respect of which the SONIA reference rate was published on the Relevant Screen Page (or otherwise published by the relevant authorized distributors) or (B) if this is more recent, the latest rate determined under (1) above,

and, in each case, references to “SONIA reference rate” in the section “*Compounded Daily SONIA – Non-Index Determination*” above shall be construed accordingly.

In the event that the rate of interest cannot be determined in accordance with the foregoing provisions, and without prejudice to “– *Benchmark discontinuation*”, the rate of interest shall be:

- A. that determined as at the last preceding Interest Determination Date on which the interest rate was so determined (though substituting, where a different Margin, Maximum Rate of Interest and/or Minimum Rate of Interest is to be applied to the relevant Interest Accrual Period from that which applied to the last preceding Interest Accrual Period, the Margin, Maximum Rate of Interest and/or Minimum Rate of Interest (as the case may be) relating to the relevant Interest Accrual Period, in place of the Margin, Maximum Rate of Interest and/or Minimum Rate of Interest (as applicable) relating to that last preceding Interest Accrual Period); or
- B. if there is no such preceding Interest Determination Date, the initial rate of interest which would have been applicable to such Floating Rate Notes or Reset Notes for the first scheduled Interest Period had the Floating Rate Notes or Reset Notes been in issue for a period equal in duration to the first scheduled Interest Period but ending on (and excluding) the Interest Commencement Date (applying the Margin and, if applicable, any Maximum Rate of Interest and/or Minimum Rate of Interest, applicable to the first scheduled Interest Period),

in each case as determined by the Calculation Agent.

Compounded Daily SONIA – Index Determination

With respect to any Interest Determination Date relating to a Floating Rate Note or Reset Note for which the interest rate is determined on the basis of Compounded Daily SONIA and for which the applicable Final Terms specify “Index Determination” to be “Applicable”, the interest rate for each Interest Accrual Period, subject to “– *Benchmark discontinuation*”, if applicable, and as provided below, will be the Compounded Daily SONIA Rate with respect to such Interest Accrual Period plus or minus (as indicated in the applicable Final Terms) the applicable Margin (if any), all as determined by the Calculation Agent.

“**Compounded Daily SONIA Rate**” means, with respect to an Interest Accrual Period, the rate of return of a daily compound interest investment (with the daily Sterling overnight reference rate as reference rate for the calculation of interest) (expressed as a percentage and rounded if necessary to the fifth decimal place, with 0.000005 being rounded upwards) determined by the Calculation Agent by reference to the screen rate or index for compounded daily SONIA rates administered by the administrator of the SONIA reference rate that is published or displayed on the Relevant Screen Page specified in the applicable Final Terms or, if no such page is so specified, or if such page (or the relevant rate to be published thereon) is unavailable at 10.00 a.m. (London time) (or, if later, one hour after the time at which the relevant rate is customarily published on such page), as otherwise published or displayed by such administrator or other information service from time to time on the relevant Interest Determination Date, (the “**SONIA Compounded Index**”) and in accordance with the following formula:

$$\text{Compounded Daily SONIA Rate} = \left(\frac{\text{SONIA Compounded Index}_{\text{End}}}{\text{SONIA Compounded Index}_{\text{Start}}} - 1 \right) \times \frac{365}{d}$$

where:

“**d**” is the number of calendar days from (and including) the day in relation to which SONIA Compounded Index_{Start} is determined to (but excluding) the day in relation to which SONIA Compounded Index_{End} is determined;

“**London Banking Day**” means any day on which commercial banks are open for general business (including dealing in foreign exchange and foreign currency deposits) in London;

“**Relevant Number**” is the number specified as such in the applicable Final Terms (or, if no such number is specified, five);

“**SONIA Compounded Index_{Start}**” means, with respect to an Interest Accrual Period, the SONIA Compounded Index determined in relation to the day falling the Relevant Number of London Banking Days prior to the first day of such Interest Accrual Period; and

“**SONIA Compounded Index_{End}**” means, with respect to an Interest Accrual Period, the SONIA Compounded Index determined in relation to the day falling the Relevant Number of London Banking Days prior to (A) the Interest Payment Date for such Interest Accrual Period, or (B) such other date on which the relevant payment of interest falls due (but which by its definition or the operation of the relevant provisions is excluded from such Interest Accrual Period).

If the relevant SONIA Compounded Index is not published or displayed by the administrator of the SONIA reference rate or other information service by 5.00 p.m. (London time) (or, if later, by the time falling one hour after the customary or scheduled time for publication thereof in accordance with the then-prevailing operational procedures of the administrator of the SONIA reference rate or of such other information service, as the case may be) on the relevant Interest Determination Date, the Compounded Daily SONIA Rate for the applicable Interest Accrual Period for which the SONIA Compounded Index is not available shall be “Compounded Daily SONIA” determined in accordance with “*Compounded Daily SONIA – Non-Index Determination*” above as if “Index Determination” were specified in the applicable Final Terms as being ‘Not Applicable’, and for these purposes: (i) the “Observation Method” shall be deemed to be “Shift” and (ii) the “Shift Period” shall be deemed to be equal to the Relevant Number of London Banking Days, as if those alternative elections had been made in the applicable Final Terms.

As used herein, an “**Interest Accrual Period**” means (i) each Interest Period and (ii) any other period (if any) in respect of which interest is to be calculated, being the period from (and including) the first day of such period to (but excluding) the day on which the relevant payment of interest falls due (which, if the relevant Floating Rate Notes or Reset Notes becomes due and payable in accordance with “*Terms and Conditions of the Notes – Events of Default—Senior Preferred Notes*” or “*Terms and Conditions of the Notes – Events of Default—Subordinated Notes and Senior Non-Preferred Notes*” (as applicable), shall be the date on which such Floating Rate Notes become due and payable).

If the Floating Rate Notes or Reset Notes become due and payable in accordance with “*Terms and Conditions of the Notes – Events of Default—Senior Preferred Notes*” or “*Terms and Conditions of the Notes – Events of Default—Subordinated Notes and Senior Non-Preferred Notes*” (as applicable), the final rate of interest shall be calculated for the Interest Accrual Period to (but excluding) the date on which the Floating Rate Notes or Reset Notes become so due and payable, and such rate of interest shall continue to apply to the Floating Rate Notes or Reset Notes for so long as interest continues to accrue thereon as provided in the Indenture.

SOFR

Definitions

“**Business Day**” has the meaning set forth in “—*Certain definitions*” and, if (i) the relevant Final Terms specify that the Interest Rate Basis is “Compounded Daily SOFR” and (ii) a SOFR Index Cessation Date has not occurred, a US Government Securities Business Day.

“**OBFR**” means, on an Interest Payment Date, the Overnight Bank Funding Rate that appears on the Federal Reserve’s website at 5:00 p.m. (New York time) for trades made on the related Interest Determination Date;

“**OBFR Index Cessation Date**” means, following the occurrence of an OBFR Index Cessation Event, the date on which the Federal Reserve Bank of New York (or any successor administrator of the Overnight Bank

Funding Rate), ceases to publish the Overnight Bank Funding Rate, or the date as of which the Overnight Bank Funding Rate may no longer be used, in each case as certified in writing by the Issuer to the Calculation Agent.

“**OBFR Index Cessation Event**” means the occurrence of one or more of the following events:

- (i) a public statement by the Federal Reserve Bank of New York (or a successor administrator of the Overnight Bank Funding Rate) announcing that it has ceased or will cease to publish or provide the Overnight Bank Funding Rate permanently or indefinitely, provided that, at that time, there is no successor administrator that will continue to publish or provide the Overnight Bank Funding Rate;
- (ii) the publication of information which reasonably confirms that the Federal Reserve Bank of New York (or a successor administrator of the Overnight Bank Funding Rate) has ceased or will cease to provide the Overnight Bank Funding Rate permanently or indefinitely, provided that, at that time, there is no successor administrator that will continue to publish or provide the Overnight Bank Funding Rate; or
- (iii) a public statement by a regulator or other official sector entity prohibiting the use of the Overnight Bank Funding Rate that applies to, but need not be limited to, fixed income securities and derivatives, to the extent that such public statement has been acknowledged in writing by ISDA as an "OBFR index cessation event" under the 2006 ISDA Definitions as published by ISDA.

“**SOFR**” means, with respect to any US Government Securities Business Day (and subject to “–*Benchmark discontinuation – II. Benchmark discontinuation provisions for SOFR notes*” if applicable), the rate determined in accordance with the following provisions:

- (i) the Secured Overnight Financing Rate that appears on the Federal Reserve's website at 3:00 p.m. (New York time) on the immediately following US Government Securities Business Day;
- (ii) if the rate specified in paragraph (i) above does not so appear, and a SOFR Index Cessation Event has not occurred, then the Calculation Agent shall use the Secured Overnight Financing Rate published on the Federal Reserve's website for the first preceding US Government Securities Business Day on which the Secured Overnight Financing Rate was published on the Federal Reserve's website;
- (iii) if a SOFR Index Cessation Date has occurred, the Calculation Agent shall calculate SOFR as if references to SOFR were references to the rate that was recommended as (and notified by the Issuer to the Calculation Agent being the replacement for the Secured Overnight Financing Rate by the Federal Reserve Board and/or the Federal Reserve Bank of New York or a committee officially endorsed or convened by the Federal Reserve Board and/or the Federal Reserve Bank of New York for the purpose of recommending a replacement for the Secured Overnight Financing Rate (which rate may be produced by a Federal Reserve Bank or other designated administrator, and which rate may include any adjustments or spreads). If no such rate has been recommended within one US Government Securities Business Day of the SOFR Index Cessation Date, then the Calculation Agent shall use OBFR published on the Federal Reserve's website for any Interest Payment Date after the SOFR Index Cessation Date; and
- (iv) if the Calculation Agent is required to use OBFR in paragraph (iii) above and an OBFR Index Cessation Date has occurred, then for any Interest Payment Date after such OBFR Index Cessation Date, the Calculation Agent shall use the short-term interest rate target set by the Federal Open Market Committee and published on the Federal Reserve's website, or if the Federal Open Market Committee does not target a single rate, the mid-point of the short-term interest rate target range set by the Federal Open Market Committee and published on the

Federal Reserve's website (calculated as the arithmetic average of the upper bound of the target range and the lower bound of the target range).

“**SOFR Index Cessation Date**” means, following the occurrence of a SOFR Index Cessation Event, the date on which the Federal Reserve Bank of New York (or any successor administrator of the Secured Overnight Financing Rate), ceases to publish the Secured Overnight Financing Rate, or the date as of which the Secured Overnight Financing Rate may no longer be used, in each case as certified in writing by the Issuer to the Calculation Agent.

“**SOFR Index Cessation Event**” means the occurrence of one or more of the following events:

- (i) a public statement by the Federal Reserve Bank of New York (or a successor administrator of the Secured Overnight Financing Rate) announcing that it has ceased or will cease to publish or provide the Secured Overnight Financing Rate permanently or indefinitely, provided that, at that time, there is no successor administrator that will continue to publish or provide the Secured Overnight Financing Rate;
- (ii) the publication of information which reasonably confirms that the Federal Reserve Bank of New York (or a successor administrator of the Secured Overnight Financing Rate) has ceased or will cease to provide the Secured Overnight Financing Rate permanently or indefinitely, provided that, at that time, there is no successor administrator that will continue to publish or provide the Secured Overnight Financing Rate; or
- (iii) a public statement by a regulator or other official sector entity prohibiting the use of the Secured Overnight Financing Rate that applies to, but need not be limited to, fixed income securities and derivatives, to the extent that such public statement has been acknowledged in writing by ISDA as a "SOFR index cessation event" under the 2006 ISDA Definitions as published by ISDA.

“**SOFR Reset Date**” means each US Government Securities Business Day in the relevant Interest Accrual Period, other than any US Government Securities Business Day in the Lock-out Period

“**US Government Securities Business Day**” means any day except for a Saturday, Sunday or a day on which the Securities Industry and Financial Markets Association (or any successor thereto) recommends that the fixed income departments of its members be closed for the entire day for purposes of trading in US government securities.

Compounded Daily SOFR – Non-Index Determination

With respect to any Interest Determination Date relating to a Floating Rate Note or Reset Note for which the interest rate is determined on the basis of Compounded Daily SOFR and for which the applicable Final Terms specify “*Index Determination*” to be “*Not Applicable*”, the Rate of Interest for each Interest Accrual Period, subject as provided below, will be Compounded Daily SOFR plus or minus (as indicated in the applicable Final Terms) the applicable Margin (if any), all as determined by the Calculation Agent.

“**Compounded Daily SOFR**” means, with respect to an Interest Accrual Period, the rate of return of a daily compound interest investment (with the Secured Overnight Financing Rate as the interest rate basis for the calculation of interest) as calculated by the Calculation Agent as at the relevant Interest Determination Date as follows, and the resulting percentage will be rounded if necessary to the fifth decimal place, with 0.000005 being rounded upwards:

$$\left[\prod_{i=1}^{d_o} \left(1 + \frac{SOFR_i \times n_i}{360} \right) - 1 \right] \times \frac{360}{d}$$

where:

“**d**” is the number of calendar days in:

- (i) (where in the applicable Final Terms “Lag” or “Lock-out” is specified as the Observation Method) the relevant Interest Accrual Period; or
- (ii) (where in the applicable Final Terms “Shift” is specified as the Observation Method) the relevant SOFR Observation Period;

“**d₀**” means:

- (i) (where in the applicable Final Terms “Lag” or “Lock-out” is specified as the Observation Method) for any Interest Accrual Period, the number of US Government Securities Business Days in the relevant Interest Accrual Period; or
- (ii) (where in the applicable Final Terms “Shift” is specified as the Observation Method) for any SOFR Observation Period, the number of US Government Securities Business Days in the relevant SOFR Observation Period;

“**i**” is a series of whole numbers from 1 to ‘d₀’, each representing the relevant US Government Securities Business Day in chronological order from, and including, the first US Government Securities Business Day in:

- (i) (where in the applicable Final Terms “Lag” or “Lock-out” is specified as the Observation Method) the relevant Interest Accrual Period; or
- (ii) (where in the applicable Final Terms “Shift” is specified as the Observation Method) the relevant SOFR Observation Period;

“**Lock-out Period**” means the period from (and including) the day following the Interest Determination Date to (but excluding) the corresponding Interest Payment Date;

“**New York Fed’s Website**” means the website of the Federal Reserve Bank of New York (or a successor administrator of SOFR) or any successor source;

“**n_i**” for any US Government Securities Business Day ‘i’, means the number of calendar days from (and including) such US Government Securities Business Day ‘i’ up to (but excluding) the following US Government Securities Business Day;

“**p**” means:

- (i) where in the applicable Final Terms “Lag” is specified as the Observation Method, the number of US Government Securities Business Days specified as the “Lag Period” in the applicable Final Terms (or, if no such number is so specified, five US Government Securities Business Days and, if less than five US Government Securities Business Days is so specified, then only with prior agreement of the Calculation Agent); or
- (ii) where in the applicable Final Terms “Lock-out” is specified as the Observation Method, zero US Government Securities Business Days; or
- (iii) where in the applicable Final Terms “Shift” is specified as the Observation Method, the number of US Government Securities Business Days specified as the “Shift Period” in the applicable Final Terms (or, if no such number is specified, five US Government Securities Business Days and, if less than five US Government Securities Business Days is so specified, then only with prior agreement of the Calculation Agent);

“**SOFR_i**” means the SOFR for:

- (i) where in the applicable Final Terms “Lag” is specified as the Observation Method, the US Government Securities Business Day falling *p* US Government Securities Business Days prior to the relevant US Government Securities Business Day ‘*i*’;
- (ii) where in the applicable Final Terms “Lock-out” is specified as the Observation Method:
 - (A) in respect of each US Government Securities Business Day ‘*i*’ that is a SOFR Reset Date, the SOFR for the US Government Securities Business Day immediately preceding such SOFR Reset Date; and
 - (B) in respect of each US Government Securities Business Day ‘*i*’ that is not a SOFR Reset Date (being a US Government Securities Business Day in the Lock-out Period), the SOFR for the US Government Securities Business Day immediately preceding the last SOFR Reset Date in the relevant Interest Accrual Period (such last SOFR Reset Date coinciding with the Interest Determination Date); or
- (iii) where in the applicable Final Terms “Shift” is specified as the Observation Method, the relevant US Government Securities Business Day ‘*i*’; and

“**SOFR Observation Period**” means the period from (and including) the date falling ‘*p*’ US Government Securities Business Days prior to the first day of the relevant Interest Accrual Period to (but excluding) the date falling ‘*p*’ US Government Securities Business Days prior to (A) (in the case of an Interest Period) the Interest Payment Date for such Interest Period or (B) (in the case of any other Interest Accrual Period) the date on which the relevant payment of interest falls due.

Average SOFR

With respect to any Interest Determination Date relating to a Floating Rate Note or Reset Note for which the interest rate is determined on the basis of Average SOFR, the Rate of Interest for each Interest Accrual Period will be Average SOFR plus or minus (as indicated in the applicable Final Terms) the applicable Margin (if any), all as determined by the Calculation Agent as at the relevant Interest Determination Date (and rounded, if necessary, to the fifth decimal place, with 0.000005 being rounded upwards).

“**Average SOFR**”, in relation to any Interest Accrual Period, means:

- (b) where in the applicable Final Terms “Lag” is specified as the Observation Method, the arithmetic mean of the SOFR in effect for each calendar day during the relevant SOFR Observation Period, calculated by multiplying each relevant SOFR by the number of calendar days such rate is in effect, determining the sum of such products and dividing such sum by the number of calendar days in the relevant SOFR Observation Period. For these purposes, the SOFR in effect for any calendar day which is not a US Government Securities Business Day shall be deemed to be the SOFR in effect for the US Government Securities Business Day immediately preceding such calendar day; and
- (c) where in the applicable Final Terms “Lock-out” is specified as the Observation Method, the arithmetic mean of the SOFR in effect for each calendar day during the relevant Interest Accrual Period, calculated by multiplying each relevant SOFR by the number of days such rate is in effect, determining the sum of such products and dividing such sum by the number of calendar days in the relevant Interest Accrual Period, provided however that for any calendar day of such Interest Accrual Period falling in the Lock-out Period, the relevant SOFR for each day during that Lock-out Period will be deemed to be the SOFR in effect for the SOFR Reset Date immediately preceding the first day of such Lock-out Period. For these purposes, the SOFR in effect for any calendar day which is not a US Government Securities Business Day shall, subject

to the proviso above, be deemed to be the SOFR in effect for the US Government Securities Business Day immediately preceding such calendar day.

Defined terms used in this section “*Average SOFR*” and not otherwise defined herein have the meanings set out under the section entitled “*Compounded Daily SOFR*” above.

SOFR Unavailable

Subject to “*–Benchmark discontinuation*” below, if, where any rate of interest is to be calculated pursuant to the sections “*Compounded Daily SOFR– Non-Index Determination*” or “*Average SOFR*” above, in respect of any US Government Securities Business Day in respect of which an applicable SOFR is required to be determined, such SOFR is not available, such SOFR shall be the SOFR for the first preceding US Government Securities Business Day in respect of which the SOFR was published on the New York Fed’s Website.

In the event that the rate of interest cannot be determined in accordance with the foregoing provisions of the sections “*Compounded Daily SOFR– Non-Index Determination*” or “*Average SOFR*” above, but without prejudice to “*–Benchmark discontinuation*” below, the rate of interest shall be calculated in accordance, *mutatis mutandis*, with the fallback provisions of paragraphs A. and B. of the section “*Compounded Daily SONIA – Non-Index Determination*” above.

Compounded Daily SOFR–Index Determination

With respect to any Interest Determination Date relating to a Floating Rate Note or Reset Note for which the interest rate is determined on the basis of Compounded Daily SOFR and for which the applicable Final Terms specify “*Index Determination*” to be “Applicable”, the Rate of Interest for each Interest Accrual Period, subject as provided below, will be Compounded SOFR plus or minus (as indicated in the applicable Final Terms) the applicable Margin (if any), all as determined by the Calculation Agent.

“**Compounded SOFR**” means, with respect to an Interest Accrual Period, the rate determined by the Calculation Agent in accordance with the following formula (and the resulting percentage will be rounded if necessary to the fifth decimal place, with 0.000005 being rounded upwards):

$$\left(\frac{SOFRIndex_{End}}{SOFRIndex_{Start}} - 1 \right) \times \frac{360}{d_c}$$

where:

“**d_c**” is the number of calendar days from (and including) the day in relation to which SOFR Index_{Start} is determined to (but excluding) the day in relation to which SOFR Index_{End} is determined;

“**Relevant Number**” is the number specified as such in the applicable Final Terms (or, if no such number is specified, five and, if less than five is so specified, then only with prior agreement of the Calculation Agent);

“**SOFR**” means the daily secured overnight financing rate as provided by the SOFR Administrator on the SOFR Administrator’s Website;

“**SOFR Administrator**” means the Federal Reserve Bank of New York (or a successor administrator of SOFR);

“**SOFR Administrator’s Website**” means the website of the SOFR Administrator, or any successor source;

“**SOFR Index**”, with respect to any US Government Securities Business Day, means the SOFR index value as published by the SOFR Administrator as such index appears on the SOFR Administrator’s Website at or around 3.00 p.m. (New York time) on such US Government Securities Business Day (the “**SOFR Determination Time**”);

“**SOFR Index_{Start}**”, with respect to an Interest Accrual Period, is the SOFR Index value for the day which is the Relevant Number of US Government Securities Business Days preceding the first day of such Interest Accrual Period; and

“**SOFR Index_{End}**”, with respect to an Interest Accrual Period, is the SOFR Index value for the day which is the Relevant Number of US Government Securities Business Days preceding (A) the Interest Payment Date for such Interest Accrual Period, or (B) such other date on which the relevant payment of interest falls due (but which by its definition or the operation of the relevant provisions is excluded from such Interest Accrual Period).

If, as at any relevant SOFR Determination Time, the relevant SOFR Index is not published or displayed on the SOFR Administrator’s Website by the SOFR Administrator, the Compounded SOFR for the applicable Interest Accrual Period for which the relevant SOFR Index is not available shall be “Compounded Daily SOFR” determined in accordance the section entitled “*Compounded Daily SOFR – Non-Index Determination*” above as if “*Index Determination*” were specified in the applicable Final Terms as being ‘*Not Applicable*’, and for these purposes: (i) the “*Observation Method*” shall be deemed to be “*Shift*” and (ii) the “*Shift Period*” shall be deemed to be equal to the Relevant Number of US Government Securities Business Days, as if such alternative elections had been made in the applicable Final Terms.

EURIBOR

“**EURIBOR**” means (subject to “—*Benchmark discontinuation*” if applicable) the rate determined in accordance with the following provisions:

- (1) With respect to any Interest Determination Date relating to a Floating Rate Note or Reset Note for which the interest rate is determined with reference to EURIBOR, EURIBOR will be the rate for deposits in euro for a period of the Index Maturity as specified in such Final Terms commencing on the applicable Interest Reset Date, that appears on the Designated EURIBOR Page as of 11:00 A.M., Brussels time, on such Interest Determination Date; or if no such rate so appears, EURIBOR on such Interest Determination Date will be determined in accordance with the provisions described in clause (2) below.
- (2) With respect to an Interest Determination Date on which no rate appears on the Designated EURIBOR Page as specified in clause (1) above, the Calculation Agent will request the principal Eurozone office of each of four major reference banks (which may include affiliates of the Placement Agents) in the Eurozone interbank market, as selected by the Calculation Agent (after consultation with us), to provide the Calculation Agent with its offered quotation for deposits in euro for the period of the Index Maturity specified in the applicable Final Terms commencing on the applicable Interest Reset Date, to prime banks in the Eurozone interbank market at approximately 11:00 A.M., Brussels time, on such EURIBOR Interest Determination Date and in a principal amount that is representative for a single transaction in euro in such market at such time. If at least two such quotations are so provided, then EURIBOR on such Interest Determination Date will be the arithmetic mean of such quotations. If fewer than two such quotations are so provided, then EURIBOR on such Interest Determination Date will be the arithmetic mean of the rates quoted at approximately 11:00 A.M., Brussels time, on such Interest Determination Date by three major banks (which may include affiliates of the Placement Agents) in the Eurozone selected by the Calculation Agent (after consultation with us) for loans in euro to leading European banks, having the Index Maturity specified in the applicable Final Terms commencing on that Interest Reset Date and in a principal amount that is representative for a single transaction in euro in such market at such time; provided, however, that if the banks so selected by the Calculation Agent are not quoting as mentioned in this sentence, EURIBOR determined as of such Interest Determination Date will be EURIBOR in effect on such Interest Determination Date, or, if no EURIBOR was in effect on such Interest Determination Date, the rate on such Floating Rate Note or Reset Note for the following Interest Reset Period shall be the Initial Interest Rate specified in the applicable Final Terms or, in the case of notes with an

Interest Basis that converts from a fixed rate to a floating rate, the fixed rate applicable to such notes immediately prior to the conversion of the Interest Basis.

“**Designated EURIBOR Page**” means the display on the page specified in the applicable Final Terms for the purpose of displaying the Eurozone interbank rates of major banks for the euro; provided, however, if no such page is specified in the applicable Final Terms, the display on Reuters (or any successor service) on the EURIBOR 01 page (or any other page as may replace such page on such service) shall be used.

“**Eurozone**” means the region comprised of member states of the European Union that have adopted the single currency in accordance with the Treaty on European Union signed at Maastricht on February 7, 1992.

Federal Funds Rate

“**Federal Funds Rate**” means, with respect to any Interest Determination Date relating to a Floating Rate Note or Reset Note for which the interest rate is determined with reference to the Federal Funds Rate (and subject to “—*Benchmark discontinuation*” if applicable), the rate on such date for U.S. dollar federal funds as published in H.15 opposite the heading “Federal Funds (Effective),” as such rate is displayed on Reuters (or any successor service) on page FEDFUNDS 1 (or any other page as may replace such page) (“**Reuters Page FEDFUNDS 1**”), or, if such rate does not appear on Reuters Page FEDFUNDS 1 or is not so published by 5:00 p.m., New York City time, on the related Calculation Date, the rate on such Interest Determination Date for U.S. dollar federal funds as published in H.15 Daily Update, or such other recognized electronic source used for the purpose of displaying such rate, under the caption “Federal Funds (Effective).” If such rate does not appear on Reuters Page FEDFUNDS 1 or is not yet published in H.15, H.15 Daily Update or another recognized electronic source by 5:00 p.m. New York City time on the related Calculation Date, then the Federal Funds Rate on such Interest Determination Date will be calculated by the Calculation Agent and will be the arithmetic mean of the rates for the last transaction in overnight U.S. dollar federal funds arranged by three leading brokers of U.S. dollar federal funds transactions in New York City (which may include the Placement Agents or their affiliates) selected by the Calculation Agent (after consultation with us) prior to 9:00 a.m., New York City time, on such Interest Determination Date; provided, however, that if the brokers so selected by the Calculation Agent are not quoting as mentioned in this sentence, the Federal Funds Rate determined as of such Interest Determination Date will be the Federal Funds Rate in effect on such Interest Determination Date, or, if no Federal Funds Rate was in effect on such Interest Determination Date, the rate on such Floating Rate Note or Reset Note for the following Interest Reset Period shall be the Initial Interest Rate specified in the applicable Final Terms.

Prime Rate

“**Prime Rate**” means, with respect to any Interest Determination Date relating to a Floating Rate Note or Reset Note for which the interest rate is determined with reference to the Prime Rate (and subject to “—*Benchmark discontinuation*” if applicable), the rate on such date as such rate is published in H.15 opposite the caption “Bank Prime Loan” or, if not published by 5:00 p.m., New York City time, on the day that is one New York City Banking Day following the Interest Reset Date pertaining to such Interest Determination Date, the rate on such Interest Determination Date as published in H.15 Daily Update, or such other recognized electronic source used for the purpose of displaying such rate, opposite the caption “Bank Prime Loan.” If such rate is not yet published in H.15, H.15 Daily Update or another recognized electronic source by 5:00 p.m. New York City time on the day that is one New York City Banking Day following the Interest Reset Date pertaining to such Interest Determination Date, then the Prime Rate shall be the arithmetic mean, as determined by the Calculation Agent, of the rates of interest publicly announced by three major banks (which may include affiliates of the Placement Agents) in New York City selected by the Calculation Agent (after consultation with us) as the U.S. dollar prime rate or base lending rate in effect for such Interest Determination Date. (Each change in the prime rate or base lending rate of any bank so announced by such bank will be effective as of the effective date of the announcement or, if no effective date is specified, as of the date of the announcement.) If fewer than three major banks (which may include affiliates of the Placement Agents) so selected in New York City have publicly announced a U.S. dollar prime rate or base lending rate for such Interest Determination Date, the Prime Rate with respect to such Interest Determination Date shall be the rate in effect on such Interest Determination Date, or, if no Prime Rate

was in effect on such Interest Determination Date, the rate on such Floating Rate Note or Reset Note for the following Interest Reset Period shall be the Initial Interest Rate specified in the applicable Final Terms.

Treasury Rate

“**Treasury Rate**” means, with respect to any Interest Determination Date relating to a Floating Rate Note or Reset Note for which the interest rate is determined by reference to the Treasury Rate (and subject to “—*Benchmark discontinuation*” if applicable), the rate from the auction held on such Interest Determination Date (the “**Auction**”) of direct obligations of the United States (“**Treasury Bills**”) having the Index Maturity specified in the applicable Final Terms under the caption “INVEST RATE” on the display on Reuters (or any successor service) on page USAUCTION 10 (or any other page as may replace such page) (“**USAUCTION 10**”) or page USAUCTION 11 (or any other page as may replace such page) (“**USAUCTION 11**”) or, if not so published by 3:00 p.m., New York City time, on the related Calculation Date, the Bond Equivalent Yield (as defined below) of the rate for such Treasury Bills as published in H.15 Daily Update, or such other recognized electronic source used for the purpose of displaying such rate, under the caption “U.S. Government Securities/Treasury Bills/Auction High” or, if not so published by 3:00 p.m., New York City time, on the related Calculation Date, the Bond Equivalent Yield of the auction rate of such Treasury Bills as announced by the U.S. Department of the Treasury. In the event that the auction rate of Treasury Bills having the Index Maturity specified in the applicable Final Terms is not so announced by the U.S. Department of the Treasury, or if no such Auction is held, then the Treasury Rate will be the Bond Equivalent Yield of the rate on such Interest Determination Date of Treasury Bills having the Index Maturity specified in the applicable Final Terms as published in H.15 under the caption “U.S. Government Securities/Treasury Bills/Secondary Market” or, if not yet published by 3:00 p.m., New York City time, on the related Calculation Date, the rate on such Interest Determination Date of such Treasury Bills as published in H.15 Daily Update, or such other recognized electronic source used for the purpose of displaying such rate, under the caption “U.S. Government Securities/Treasury Bills/Secondary Market.” If such rate is not yet published in H.15, H.15 Daily Update or another recognized electronic source, then the Treasury Rate will be calculated by the Calculation Agent and will be the Bond Equivalent Yield of the arithmetic mean of the secondary market bid rates, as of approximately 3:30 p.m., New York City time, on such Interest Determination Date, of three primary U.S. government securities dealers (which may include the Placement Agents or their affiliates) selected by the Calculation Agent (after consultation with us), for the issue of Treasury Bills with a remaining maturity closest to the Index Maturity specified in the applicable Final Terms; provided, however, that if the dealers so selected by the Calculation Agent are not quoting as mentioned in this sentence, the Treasury Rate determined as of such Interest Determination Date will be the Treasury Rate in effect on such Interest Determination Date, or, if no Treasury Rate was in effect on such Interest Determination Date, the rate on such Floating Rate Note Reset Note for the following Interest Reset Period shall be the Initial Interest Rate specified in the applicable Final Terms.

“**Bond Equivalent Yield**” means a yield (expressed as a percentage) calculated in accordance with the following formula:

$$\text{Bond Equivalent Yield} = \frac{D \times N \times 100}{360 - (D \times M)}$$

where “**D**” refers to the applicable per annum rate for Treasury Bills quoted on a bank discount basis, “**N**” refers to 365 or 366, as the case may be, and “**M**” refers to the actual number of days in the applicable Interest Reset Period.

Minimum and/or Maximum Rate of Interest

If the applicable Final Terms specifies a Minimum Rate of Interest for any Interest Period, then the Rate of Interest for such Interest Period shall in no event be less than such Minimum Rate of Interest and/or if it specifies a Maximum Rate of Interest for any Interest Period, then the Rate of Interest for such Interest Period shall in no event be greater than such Maximum Rate of Interest.

The interest rate on Floating Rate Notes or Reset Notes will in no event be higher than the maximum rate permitted by New York law, as the same may be modified, or other applicable law.

Determination of Rate of Interest and calculation of Interest Amount; Percentages

The Calculation Agent will, at or as soon as practicable after each time at which the Rate of Interest is to be determined, determine the Rate of Interest for the relevant Interest Period (or other Interest Accrual Period).

The Calculation Agent will calculate the amount of interest (each an “**Interest Amount**”) for the relevant Interest Period (or other Interest Accrual Period). Each Interest Amount shall be calculated by applying the Rate of Interest to the aggregate outstanding nominal amount of the notes and multiplying such sum by the Day Count Fraction specified in the applicable Final Terms. The resultant figure will be rounded as follows (or otherwise in accordance with applicable market convention):

- (i) all United States Dollar amounts used in or resulting from such calculations will be rounded to the nearest cent (with one half cent being rounded up);
- (ii) all Japanese Yen amounts used in or resulting from such calculations will be rounded downwards to the next lower whole Japanese Yen; and
- (iii) all amounts denominated in any other currency used in or resulting from such calculations will be rounded to the nearest two decimal places in such currency, with 0.005 being rounded upwards.

All percentages resulting from any calculation on Floating Rate Notes or Reset Notes will be rounded, if necessary, to the nearest one hundred thousandth of a percentage point, with five or more one millionths of a percentage point rounded upwards (e.g., 9.876545% (or 0.09876545) would be rounded to 9.87655% (or 0.0987655)).

Notification of Rate of Interest and Interest Amounts

Except where the Interest Rate Basis in respect of the Floating Rate Notes or Reset Notes is specified in the applicable Final Terms as being “*Compounded Daily SONIA – Non-Index Determination*”, “*Compounded Daily SONIA – Index Determination*”, “*Compounded Daily SOFR – Non-Index Determination*”, “*Average SOFR*” or “*Compounded Daily SOFR – Index Determination*”, the Calculation Agent will cause the Rate of Interest and each Interest Amount for each Interest Period and the relevant Interest Payment Date to be notified to us, to the Trustee and to any listing authority, stock exchange and/or quotation system to which the Floating Rate Notes or Reset Notes have then been admitted to listing, trading and/or quotation and to be published as soon as possible after their determination but in no event later than the fourth Business Day thereafter. Each Interest Amount and Interest Payment Date so notified may subsequently be amended (or appropriate alternative arrangements made by way of adjustment) without prior notice in the event of an extension or shortening of the Interest Period. Any such amendment or alternative arrangements will promptly be notified to each listing authority, stock exchange and/or quotation system to which the Floating Rate Notes or Reset Notes have then been admitted to listing, trading and/or quotation and to the holders in accordance with the Indenture.

Where the Interest Rate Basis in respect of the relevant Floating Rate Notes or Reset Notes is specified in the applicable Final Terms as being “*Compounded Daily SONIA – Non-Index Determination*”, “*Compounded Daily SONIA – Index Determination*”, “*Compounded Daily SOFR – Non-Index Determination*”, “*Average SOFR*” or “*Compounded Daily SOFR – Index Determination*”, the Calculation Agent will cause the Rate of Interest and each Interest Amount for each Interest Accrual Period and the relevant Interest Payment Date to be notified to the Issuer and the Trustee and to any listing authority, stock exchange and/or quotation system to which the Floating Rate Notes or Reset Notes have then been admitted to listing, trading and/or quotation and to be published as soon as possible after their determination but in no event later than the second Business Day thereafter. Each Rate of Interest, Interest Amount and Interest Payment Date so notified may subsequently be amended (or appropriate alternative arrangements made by way of adjustment) without notice in the event of an

extension or shortening of the relevant Interest Accrual Period. Any such amendment or alternative arrangements will promptly be notified to each listing authority, stock exchange and/or quotation system to which the Floating Rate Notes or Reset Notes have then been admitted to listing, trading and/or quotation and to the holders in accordance with the Indenture.

Certificates to be final

All certificates, communications, opinions, determinations, calculations, quotations and decisions given, expressed, made or obtained for the purposes of the provisions of this subsection, whether by the Paying Agent or the Calculation Agent or the Trustee, shall (in the absence of manifest error) be binding on us, the Paying Agent, the Calculation Agent, the Trustee, any other paying agents and all holders and (in the absence of wilful default, bad faith or manifest error) no liability to us or the holders shall attach to the Paying Agent, the Calculation Agent or the Trustee in connection with the exercise or non-exercise by them of their powers, duties and discretions pursuant to such provisions.

Benchmark discontinuation

I. Benchmark discontinuation provisions for all notes other than SOFR notes

The provisions contained in this subsection "*Benchmark discontinuation – I. Benchmark discontinuation provisions for all notes other than SOFR notes*" are applicable to all notes other than Floating Rate Notes or Reset Notes (other than Reset Notes which reset only once) whose interest basis is SOFR. These provisions "*Benchmark discontinuation*" apply only if "*Benchmark Replacement*" is specified to be applicable in the applicable Final Terms.

If a Benchmark Event occurs in relation to an Original Reference Rate (other than in relation to a Benchmark Event occurring in relation to SOFR, in which case the terms set forth in "*Benchmark discontinuation – II. Benchmark discontinuation provisions for SOFR notes*" shall apply) at any time when any rate of interest (or any component part thereof) remains to be determined by reference to such Original Reference Rate, then the following provisions shall apply.

Independent Adviser

We shall use reasonable endeavors to appoint and consult with an Independent Adviser, as soon as reasonably practicable, with a view to our determining a Successor Rate, failing which an Alternative Rate and, in either case, the applicable Adjustment Spread and any Benchmark Amendments.

If, notwithstanding our reasonable endeavors, we are unable to appoint and consult with an Independent Adviser in accordance with the foregoing paragraph, we shall nevertheless be entitled, acting in good faith and in a commercially reasonable manner, to make any and all determinations expressed to be made by us pursuant to this provision "*Benchmark discontinuation*", notwithstanding that such determinations are not made following consultation with an Independent Adviser. If, however, we are unable to determine a Successor Rate or an Alternative Rate and (in either case) the applicable Adjustment Spread and any Benchmark Amendments in accordance with this provision "*Benchmark discontinuation*", the provisions of "*Benchmark discontinuation – Fallbacks*" below shall apply.

An Independent Adviser appointed pursuant to this provision "*Benchmark discontinuation*" shall act in good faith. In the absence of bad faith or fraud, neither we nor any Independent Adviser shall have any liability whatsoever to the Trustee, the Paying Agents, any calculation agent or the noteholders for any determination made by us or any Independent Adviser or (in the case of the Independent Adviser) for any advice given to us in connection with any determination made by us.

Successor Rate or Alternative Rate

If we, following consultation with such Independent Adviser (if appointed), determine in good faith that:

- (A) there is a Successor Rate, then such Successor Rate, as adjusted by the applicable Adjustment Spread determined as provided below under “Adjustment Spread”, shall subsequently be used in place of the Original Reference Rate to determine the relevant rate(s) of interest (or the relevant component part(s) thereof) for all relevant future payments of interest on the notes (subject to the further operation of this provision “—*Benchmark discontinuation*”); or
- (B) there is no Successor Rate but that there is an Alternative Rate, then such Alternative Rate as adjusted by the applicable Adjustment Spread determined as provided below under “Adjustment Spread”, shall subsequently be used in place of the Original Reference Rate to determine the relevant rate(s) of interest (or the relevant component part(s) thereof) for all relevant future payments of interest on the notes (subject to the further operation of this provision “—*Benchmark discontinuation*”).

Adjustment Spread

If a Successor Rate or Alternative Rate is determined in accordance with the foregoing provisions, we, following consultation with the Independent Adviser (if appointed) will determine in good faith the Adjustment Spread to be applied to such Successor Rate or Alternative Rate (as the case may be) for each subsequent determination of a relevant Rate of Interest (or a relevant component part thereof) by reference to such Successor Rate or Alternative Rate (as applicable).

Benchmark Amendments

If any Successor Rate or Alternative Rate and (in either case) the applicable Adjustment Spread is determined in accordance with this provision “—*Benchmark discontinuation*” and we, following consultation with the Independent Adviser (if appointed) determine in good faith (A) that amendments to these terms and conditions and/or the Indenture (including, without limitation, amendments to the definitions of Day Count Fraction, Business Days, Reset Determination Date, or Relevant Screen Page) are necessary to ensure the proper operation (having regard to prevailing market practice, if any) of such Successor Rate or Alternative Rate and (in either case) the applicable Adjustment Spread (such amendments, the “**Benchmark Amendments**”) and (B) the terms of the Benchmark Amendments, then (subject to “—*Regulatory capital / eligible liabilities*” below) we shall, subject to giving notice thereof in the manner specified below, without any requirement for the consent or approval of noteholders, vary these terms and conditions and/or the Indenture to give effect to such Benchmark Amendments with effect from the date specified in such notice.

At our request, but subject to receipt by the Trustee of a certificate signed by two of our authorized signatories pursuant to the provisions below, the Trustee shall (at our expense), without any requirement for the consent or approval of the noteholders, be obliged to concur with us in effecting any Benchmark Amendments (including, *inter alia*, by the execution of a deed supplemental to or amending the Indenture) and the Trustee shall not be liable to any party for any consequences thereof, provided that the Trustee shall not be obliged so to concur if in the sole opinion of the Trustee doing so would (i) expose the Trustee, the Calculation Agent or the Paying Agent, as applicable, to any liability against which the relevant entity has not been indemnified or secured or pre-funded to its satisfaction or (ii) impose more onerous obligations upon it or expose it to any additional duties, responsibilities or liabilities or reduce or amend rights and/or the protective provisions afforded to the Trustee in these terms and conditions or the Indenture (including, for the avoidance of doubt, any supplemental indenture) in any way.

In connection with any such variation in accordance with this provision “—*Benchmark discontinuation*”, we shall comply with the rules of any stock exchange on which the notes are for the time being listed or admitted to trading.

Notices, etc.

We shall notify the Trustee, the Calculation Agent, the Paying Agents and, in accordance with this subsection “-*Notices, etc.*”, the noteholders, promptly of any Successor Rate, Alternative Rate, Adjustment Spread and the specific terms of any Benchmark Amendments, determined under this section “—*Benchmark discontinuation*”. Such notice shall be irrevocable and shall specify the effective date of the Benchmark Amendments, if any.

No later than notifying the Trustee of the same, we shall deliver to the Trustee a certificate signed by two authorized signatories:

- (A) confirming (i) that a Benchmark Event has occurred, (ii) the Successor Rate or, as the case may be, the Alternative Rate, (iii) the applicable Adjustment Spread and (iv) the specific terms of the Benchmark Amendments (if any), in each case as determined in accordance with the provisions of this section “—*Benchmark discontinuation*”;
- (B) certifying that the Benchmark Amendments are necessary to ensure the proper operation of such Successor Rate or Alternative Rate and (in either case) the applicable Adjustment Spread; and
- (C) certifying that (i) we have duly consulted with an Independent Adviser with respect to each of the matters above or, if that is not the case, (ii) explaining, in reasonable detail, why we have not done so.
- (D) The Trustee shall be entitled to rely on such certificate (without inquiry or liability to any person) as sufficient evidence thereof. The Successor Rate or Alternative Rate and (in either case) the applicable Adjustment Spread and Benchmark Amendments (if any) specified in such certificate will (in the absence of manifest error in the determination of the Successor Rate or Alternative Rate and (in either case) the applicable Adjustment Spread and the Benchmark Amendments (if any) and without prejudice to the Trustee’s ability to rely on such certificate as aforesaid) be binding on us, the Trustee, the Calculation Agent, the Paying Agents and the noteholders.

Survival of Original Reference Rate

Without prejudice to our obligations under the provisions of this section “—*Benchmark discontinuation*”, the Original Reference Rate and the fallback provisions provided for in “*Interest—Interest on Floating Rate Notes*” and “*Interest—Interest on Reset Notes*”, as applicable, will continue to apply unless and until the Calculation Agent has been notified of the Successor Rate or the Alternative Rate (as the case may be) and (in either case) of the applicable Adjustment Spread and the relevant Benchmark Amendments (if any).

Regulatory capital / eligible liabilities

Notwithstanding any other provision of this section “—*Benchmark discontinuation*”, no Successor Rate, Alternative Rate or Adjustment Spread will be adopted, nor will any Benchmark Amendments be effected, if and to the extent that, in our determination, the same could reasonably be expected either (i) to prejudice the qualification of the relevant series of notes as Tier 2 Capital and/or as eligible liabilities or loss absorbing capacity instruments for the purposes of any Loss Absorption Regulations or (ii) (in the case of Senior Non-Preferred Notes only) to result in the relevant Supervisory Authority treating the Interest Payment Date or the Reset Date, as the case may be, as the effective maturity date of the notes, rather than the relevant maturity date.

Fallbacks

If, following the occurrence of a Benchmark Event and in relation to the determination of the Rate of Interest on the immediately following Interest Determination Date or Reset Determination Date (as applicable), no Successor Rate or Alternative Rate (as applicable) is determined pursuant to this provision or (as the case may be) a Successor Rate or Alternative Rate (as applicable) is determined, but no Adjustment Spread is determined

pursuant to this provision, the original benchmark or screen rate (as applicable) will continue to apply for the purposes of determining such Rate of Interest on such Interest Determination Date or Reset Determination Date (as the case may be), with the effect that the fallback provisions provided in “*Interest—Interest on Floating Rate Notes*” or “*Interest—Interest on Reset Notes*”, as applicable, will continue to apply to such determination.

In such circumstances, we will be entitled (but not obliged), at any time thereafter, to elect to re-apply the provisions of “—*Benchmark discontinuation*”, *mutatis mutandis*, on one or more occasions until a Successor Rate or Alternative Rate and (in either case) the applicable Adjustment Spread and any Benchmark Amendments have been determined and notified in accordance with this provision “—*Benchmark discontinuation*” (and, until such determination and notification (if any), the fallback provisions provided in “*Interest—Interest on Floating Rate Notes*” or “*Interest—Interest on Reset Notes*”, as applicable, will continue to apply).

Our intention is that, in circumstances where we have been unable to determine a Successor Rate or Alternative Rate (as applicable) and (in either case) Adjustment Spread pursuant the provision “—*Benchmark discontinuation*”, we will elect to re-apply such provisions if and when, in our sole determination, there have been such subsequent developments (whether in applicable law, market practice or otherwise) as would enable us successfully to apply such provisions and determine a Successor Rate or Alternative Rate (as applicable) and (in either case) the applicable Adjustment Spread and the applicable Benchmark Amendments (if any).

Preparation in anticipation of a Benchmark Event

If we anticipate that a Benchmark Event will or may occur, nothing in these provisions shall prevent us (in our sole discretion) from taking, prior to the occurrence of such Benchmark Event, such actions as we consider expedient in order to prepare for applying the provisions of “—*Benchmark discontinuation*” (including, without limitation, appointing and consulting with an Independent Adviser, and seeking to identify any Successor Rate, Alternative Rate, Adjustment Spread and/or Benchmark Amendments), provided that no Successor Rate, Alternative Rate, Adjustment Spread and/or Benchmark Amendments will take effect until the relevant Benchmark Event has occurred.

Definitions

In this subsection “—*I. Benchmark discontinuation provisions for all notes other than SOFR notes*”:

“**Adjustment Spread**” means either a spread (which may be positive, negative or zero), or the formula or methodology for calculating a spread, in either case which is to be applied to the Successor Rate or the Alternative Rate (as the case may be), being the spread, formula or methodology which:

- (A) in the case of a Successor Rate, is formally recommended, or formally provided as an option for parties to adopt, in relation to the replacement of the Original Reference Rate with the Successor Rate by any Relevant Nominating Body; or
- (B) in the case of an Alternative Rate (or in the case of a Successor Rate where (A) above does not apply), we, following consultation with the Independent Adviser (if appointed) and acting in good faith, determine is in customary market usage (or reflects an industry-accepted rate, formula or methodology) in the international debt capital market for transactions which reference the Original Reference Rate, where such rate has been replaced by the Alternative Rate (or, as the case may be, the Successor Rate); or
- (C) if no such recommendation or option has been made (or made available) under (A) above and if we, following consultation with the Independent Adviser (if appointed), determine there is no such spread, formula or methodology in customary market usage or which is industry-accepted under (B) above, we, in our discretion, following consultation with the Independent Adviser (if appointed) and acting in good faith and in a commercially reasonable manner, determine to be appropriate having regard to the objective, so far as is reasonably practicable in the

circumstances, of reducing or eliminating any economic prejudice or benefit (as the case may be) to the noteholders;

“**Alternative Rate**” means an alternative benchmark or screen rate which we, following consultation with the Independent Adviser (if appointed), determine in accordance with this section “—*Benchmark discontinuation*” has replaced the Original Reference Rate in customary market usage, or is an industry-accepted rate, in the international debt capital markets for the purposes of determining rates of interest (or the relevant component part thereof) for a commensurate interest period and in the same Specified Currency as the notes;

“**Benchmark Event**” means, with respect to an Original Reference Rate, any one or more of the following:

- (A) the Original Reference Rate ceasing to exist or to be published or administered on a permanent or indefinite basis;
- (B) the making of a public statement by the administrator of the Original Reference Rate that it has ceased or will cease to publish the Original Reference Rate permanently or indefinitely (in circumstances where no successor administrator has been appointed that will continue publication of the Original Reference Rate);
- (C) the making of a public statement by the supervisor or the administrator of the Original Reference Rate that the Original Reference Rate has been or will be permanently or indefinitely discontinued;
- (D) the making of a public statement by the supervisor or the administrator of the Original Reference Rate that the Original Reference Rate will be prohibited from being used, is no longer (or will no longer be) representative of its underlying market or that its use will be subject to restrictions or adverse consequences, in each case in circumstances where the same shall be applicable to the notes; or
- (E) it has or will prior to the next Interest Determination Date or Reset Determination Date, as applicable, become unlawful for us, the Calculation Agent, or any Paying Agent to calculate any payments due to be made to any noteholder using the Original Reference Rate (including, without limitation, under Regulation (EU) 2016/1011 as that Regulation applies in the European Union and/or as it applies in the United Kingdom in the form retained as domestic law in the United Kingdom under the European Union (Withdrawal) Act 2018 as amended, if applicable),

provided that in the case of paragraphs (B) to (D) above, the Benchmark Event shall occur on:

- (i) in the case of (B) above, the date of the cessation of the publication of the Original Reference Rate;
- (ii) in the case of (C) above, the discontinuation of the Original Reference Rate; or
- (iii) in the case of (D) above, the date on which the Original Reference Rate is prohibited from use, is deemed no longer to be representative or becomes subject to restrictions or adverse consequences (as applicable),

and not (in any such case) the date of the relevant public statement (unless the date of the relevant public statement coincides with the relevant date in (i), (ii) or (iii) above, as applicable).

“Original Reference Rate” means the benchmark or screen rate (as applicable) originally specified for the purpose of determining the relevant rate of interest (or any relevant component part(s) thereof) on the notes (provided that if, following one or more Benchmark Events, such originally specified Reference Rate (or any Successor Rate or Alternative Rate which has replaced it) has been replaced by a (or a further) Successor Rate or Alternative Rate and a Benchmark Event subsequently occurs in respect of such Successor Rate or Alternative Rate, the term “Original Reference Rate” shall be deemed to include any such Successor Rate or Alternative Rate);

“Relevant Nominating Body” means, in respect of a benchmark or screen rate (as applicable):

- (A) the central bank for the currency to which the benchmark or screen rate (as applicable) relates, or any central bank or other supervisory authority which is responsible for supervising the administrator of the benchmark or screen rate (as applicable); or
- (B) any working group or committee sponsored by, chaired or co-chaired by or constituted at the request of (i) the central bank for the currency to which the benchmark or screen rate (as applicable) relates, (ii) any central bank or other supervisory authority which is responsible for supervising the administrator of the benchmark or screen rate (as applicable), (iii) a group of the aforementioned central banks or other supervisory authorities or (iv) the Financial Stability Board or any part thereof; and

“Successor Rate” means a successor to or replacement of the Original Reference Rate which is formally recommended by any Relevant Nominating Body.

II. Benchmark discontinuation provisions for SOFR notes

The provisions contained in this subsection “*Benchmark discontinuation – II. Benchmark discontinuation provisions for SOFR notes*” are applicable to all notes Floating Rate Notes or Reset Notes (other than Reset Notes which reset only once) whose interest basis are SOFR. These provisions “*Benchmark discontinuation*” apply only if “*Benchmark Replacement*” is specified to be applicable in the applicable Final Terms.

Notwithstanding the provisions of “*Benchmark discontinuation—I. Benchmark discontinuation provisions for all notes other than SOFR notes*” above, if the Issuer determines on or prior to the relevant Interest Determination Date that a Benchmark Transition Event has occurred with respect to SOFR, then the following provisions shall apply.

- (a) If the Issuer determines that a Benchmark Transition Event and its related Benchmark Replacement Date have occurred prior to the Reference Time in respect of any determination of the Benchmark on any date applicable to any SOFR notes, the Benchmark Replacement will replace the then-current Benchmark for all purposes relating to any SOFR notes in respect of such determination on such date and all determinations on all subsequent dates.
- (b) In connection with the implementation of a Benchmark Replacement with respect to any SOFR notes, the Issuer will have the right to make Benchmark Replacement Conforming Changes with respect to any SOFR notes from time to time.
- (c) At our request, but subject to receipt by the Trustee of a certificate signed by two of our authorized signatories pursuant to the provisions below, the Trustee shall (at our expense), without any requirement for the consent or approval of the noteholders, be obliged to concur with us in effecting any Benchmark Replacement Conforming Changes (including, inter alia, by the execution of a deed supplemental to or amending the Indenture) and the Trustee shall not be liable to any party for any consequences thereof, provided that the Trustee shall not be obliged so to concur if in the sole opinion of the Trustee doing so would (i) expose the Trustee, the Calculation Agent or the Paying Agent, as applicable, to any liability against which the relevant entity has not been indemnified or secured or pre-funded to its satisfaction or (ii)

impose more onerous obligations upon it or expose it to any additional duties, responsibilities or liabilities or reduce or amend rights and/or the protective provisions afforded to the Trustee in these terms and conditions or the Indenture (including, for the avoidance of doubt, any supplemental indenture) in any way.

- (d) In connection with any such variation in accordance with the provisions in this subsection, we shall comply with the rules of any stock exchange on which the notes are for the time being listed or admitted to trading.
- (e) We shall notify the Trustee, the Calculation Agent, the Paying Agents and, in accordance with the sub-section “-Notices, etc.”, the noteholders, promptly of any Benchmark Replacement and Benchmark Replacement Adjustment as well the specific terms of any Benchmark Replacement Conforming Changes, determined pursuant to the provisions of this subsection. Such notice shall be irrevocable and shall specify the effective date of the Benchmark Replacement Conforming Changes, if any.
- (f) No later than notifying the Trustee of the same, we shall deliver to the Trustee a certificate signed by two authorized signatories:
 - (1) confirming (i) that a Benchmark Transition Event has occurred, (ii) the Benchmark Replacement, (iii) the applicable Benchmark Replacement Adjustment and (iv) the specific terms of the Benchmark Replacement Conforming Changes (if any), in each case as determined in accordance with the provisions of this sub section; and
 - (2) certifying that the Benchmark Replacement Conforming Changes are necessary to ensure the proper operation of such Benchmark Replacement and the applicable Benchmark Replacement Adjustment.
- (g) The Trustee shall be entitled to rely on such certificate (without inquiry or liability to any person) as sufficient evidence thereof. The Benchmark Replacement and the applicable Benchmark Replacement Adjustment and Benchmark Replacement Conforming Changes (if any) specified in such certificate will (in the absence of manifest error in the determination of the Benchmark Replacement and the applicable Benchmark Replacement Adjustment and the Benchmark Replacement Conforming Changes (if any) and without prejudice to the Trustee’s ability to rely on such certificate as aforesaid) be binding on us, the Trustee, the Calculation Agent, the Paying Agents and the noteholders.
- (h) Notwithstanding the definitions of business day, OBFR, OBFR Index Cessation Date, OBFR index cessation event, SOFR, SOFR Index Cessation Date, SOFR Index Cessation Event, and US Government Securities Business Day set out above, the following definitions shall apply with respect to this section titled “-II. Benchmark discontinuation provisions for SOFR notes”:

“**Benchmark**” means, initially, SOFR; provided that if a Benchmark Transition Event and its related Benchmark Replacement Date have occurred with respect to SOFR or the then-current Benchmark, then “Benchmark” means the applicable Benchmark Replacement.

“**Benchmark Replacement**” means the first alternative set forth in the order below that can be determined by the Issuer as of the Benchmark Replacement Date:

- (1) the sum of: (a) the alternate rate of interest that has been selected or recommended by the Relevant Governmental Body as the replacement for the then-current Benchmark for the applicable Corresponding Tenor and (b) the Benchmark Replacement Adjustment;
- (2) the sum of: (a) the ISDA Fallback Rate and (b) the Benchmark Replacement Adjustment;

- (3) the sum of: (a) the alternate rate of interest that has been selected by the Issuer as the replacement for the then-current Benchmark for the applicable Corresponding Tenor giving due consideration to any industry-accepted rate of interest as a replacement for the then-current Benchmark for any SOFR notes, as applicable, at such time and (b) the Benchmark Replacement Adjustment.

“**Benchmark Replacement Adjustment**” means the first alternative set forth in the order below that can be determined by the Issuer as of the Benchmark Replacement Date:

- (1) the spread adjustment, or method for calculating or determining such spread adjustment, (which may be a positive or negative value or zero) that has been selected, endorsed or recommended by the Relevant Governmental Body for the applicable Unadjusted Benchmark Replacement;
- (2) if the applicable Unadjusted Benchmark Replacement is equivalent to the ISDA Fallback Rate, then the ISDA Fallback Adjustment;
- (3) the spread adjustment (which may be a positive or negative value or zero) that has been selected by the Issuer giving due consideration to any industry-accepted spread adjustment, or method for calculating or determining such spread adjustment, for the replacement of the then-current Benchmark with the applicable Unadjusted Benchmark Replacement for any SOFR notes at such time.

“**Benchmark Replacement Conforming Changes**” means, with respect to any Benchmark Replacement, any technical, administrative or operational changes with respect to any SOFR notes (including changes to the definition of “interest period”, timing and frequency of determining rates and making payments of interest, changes to the definition of “Corresponding Tenor” solely when such tenor is longer than the interest period and other administrative matters) that the Issuer decides may be appropriate to reflect the adoption of such Benchmark Replacement with respect to any SOFR notes in a manner substantially consistent with market practice (or, if the Issuer decides that adoption of any portion of such market practice is not administratively feasible or if the Issuer determines that no market practice for use of the Benchmark Replacement exists, in such other manner as the Issuer determines is reasonably necessary).

“**Benchmark Replacement Date**” means:

- (1) in the case of paragraph (1) or (2) of the definition of “Benchmark Transition Event” below, the later of (a) the date of the public statement or publication of information referenced therein and (b) the date on which the administrator of the relevant Benchmark permanently or indefinitely ceases to provide such Benchmark, or
- (2) in the case of paragraph (3) of the definition of “Benchmark Transition Event” below, the date of the public statement or publication of information;

provided, however, that on or after the 60th day preceding the date on which such Benchmark Replacement Date would otherwise occur (if applicable), the Issuer may give written notice to holders of any SOFR notes in which the Issuer designates an earlier date (but not earlier than the 30th day following such notice) and represents that such earlier date will facilitate an orderly transition of any SOFR notes to the Benchmark Replacement, in which case such earlier date shall be the Benchmark Replacement Date.

For the avoidance of doubt, if the event giving rise to the Benchmark Replacement Date occurs on the same day as, but earlier than, the Reference Time in respect of any determination, the Benchmark Replacement Date will be deemed to have occurred prior to the Reference Time for such determination.

“**Benchmark Transition Event**” means the occurrence of one or more of the following events with respect to the then-current Benchmark:

- (1) a public statement or publication of information by or on behalf of the administrator of the Benchmark announcing that the administrator has ceased or will cease to provide the Benchmark permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the Benchmark;
- (2) a public statement or publication of information by the regulatory supervisor for the administrator of the Benchmark, the central bank for the currency of the Benchmark, an insolvency official with jurisdiction over the administrator for the Benchmark, a resolution authority with jurisdiction over the administrator for the Benchmark or a court or an entity with similar insolvency or resolution authority over the administrator for the Benchmark, which states that the administrator of the Benchmark has ceased or will cease to provide the Benchmark permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the Benchmark; or
- (3) a public statement or publication of information by the regulatory supervisor for the administrator of the Benchmark announcing that the Benchmark is no longer representative.

“**Corresponding Tenor**” with respect to a Benchmark Replacement means a tenor (including overnight) having approximately the same length (disregarding business day adjustment) as the applicable tenor for the then-current Benchmark.

“**Federal Reserve Bank of New York's website**” means the website of the Federal Reserve Bank of New York at <http://www.newyorkfed.org>, or any successor source (for the avoidance of doubt, this website (and/or any successor source) and the contents thereof do not form part of this base prospectus).

“**ISDA Definitions**” means the 2006 ISDA Definitions published by the International Swaps and Derivatives Association, Inc. or any successor thereto, as amended or supplemented from time to time, or any successor definitional booklet for interest rate derivatives published from time to time.

“**ISDA Fallback Adjustment**” means the spread adjustment, (which may be a positive or negative value or zero) that would apply for derivatives transactions referencing the ISDA Definitions to be determined upon the occurrence of an index cessation event with respect to the Benchmark for the applicable tenor.

“**ISDA Fallback Rate**” means the rate that would apply for derivatives transactions referencing the ISDA Definitions to be effective upon the occurrence of an index cessation date with respect to the Benchmark for the applicable tenor excluding the applicable ISDA Fallback Adjustment.

“**Reference Time**” with respect to any determination of the Benchmark means (1) if the Benchmark is SOFR, 2:00 p.m. (London time) on the day that is two London Banking Days preceding the date of such determination and (2) if the Benchmark is not SOFR, the time determined by the Issuer in accordance with the Benchmark Replacement Conforming Changes.

“**Relevant Governmental Body**” means the Federal Reserve Board and/or the Federal Reserve Bank of New York, or a committee officially endorsed or convened by the Federal Reserve Board and/or the Federal Reserve Bank of New York or any successor thereto.

“**Unadjusted Benchmark Replacement**” means the Benchmark Replacement excluding the applicable Benchmark Replacement Adjustment.

- (a) To the extent that there is any inconsistency between the conditions set out in this subsection titled “– II. Benchmark discontinuation provisions for SOFR notes” and any provisions in this section “– Terms and Conditions of the Notes”, the statements in this subsection shall prevail with respect to any SOFR notes.
- (b) Nothing in this subsection titled “– II. Benchmark discontinuation provisions for SOFR notes” affects the rights of the noteholders other than any SOFR notes.

- (c) For the avoidance of doubt, the Issuer may propose that a Benchmark Replacement replace the then-current Benchmark and any Benchmark Replacement Conforming Changes on more than one occasion provided that the conditions set out in this subsection titled "*II. Benchmark discontinuation provisions for SOFR notes*" are satisfied.

Additional Notes

We may issue additional notes of a series having identical terms to that of a prior series of notes of the same series but for the Original Issue Date, the first interest payment date, initial interest accrual date and the offering price ("**Additional Notes**"). The Final Terms relating to any Additional Notes will set forth matters related to such issuance, including identifying the prior series of notes, their Original Issue Date and the aggregate principal amount of notes then comprising such series.

Payment of additional amounts

In the event of any deduction or other withholding for or on account of any present or future tax, assessment, duty or other governmental charge of any nature whatsoever imposed, levied or collected by or on behalf of the United Kingdom, or any political subdivision thereof or authority therein having power to tax, in respect of any payments in respect of any note:

- (i) in the case of all senior preferred notes, we will (subject as follows) pay to the holder of such note such additional amounts as may be necessary in order that every net payment of the principal of (including premium or final redemption amount or early redemption amount, if any, or other amount payable in respect thereof) and interest, if any, on such note, will not be less than the amount provided for in such note as then due and payable; and
- (ii) in the case of all subordinated notes and senior non-preferred notes, we will (subject as follows) pay to the holder of such note such additional amounts as may be necessary in order that every net payment of interest, if any, on such note, will not be less than the amount provided for in such note as then due and payable. However, we will not pay any such additional amounts in respect of any principal of (including premium or final redemption amount or early redemption amount, if any, or other amount payable in respect thereof) any such note.

Furthermore, and without prejudice to the foregoing, no such additional amounts shall, however, be payable on any note for or on account of any tax, assessment, duty or other governmental charge which is payable:

- (1) otherwise than by deduction or withholding from any payments of (in the case of senior preferred notes) principal (including premium or final redemption amount or early redemption amount, if any, or other amount payable in respect thereof) or (in the case of any notes) interest, if any, on such note;
- (2) by reason of the holder or beneficial owner who is liable for such taxes having some connection with the United Kingdom (including being a citizen or resident or national of, or carrying on a business or maintaining a permanent establishment in the United Kingdom) other than by the mere holding of such note or enforcement of rights thereunder or the receipt of payments in respect thereof;
- (3) by reason of a change in law or official practice of any relevant taxing authority that becomes effective more than 30 days after the Relevant Date (as defined below) for payment of (in the case of senior preferred notes) principal (including premium or final redemption amount or early redemption amount, if any, or other amount payable in respect thereof) or (in the case of any notes) interest, if any, in respect of such note;
- (4) by reason of any estate, excise, inheritance, gift, sales, transfer, wealth, personal property tax or any similar assessment or governmental charge;

- (5) as a result of the failure of a holder to satisfy any statutory requirements or make a declaration of non-residence or other similar claim for exemption to the relevant tax authority;
- (6) owing to a combination of clauses (1) through (4) above; or
- (7) pursuant to an agreement described in Section 1471(b) of the U.S. Internal Revenue Code of 1986 as amended (the “Code”) or otherwise imposed pursuant to Sections 1471 through 1474 of the Code, any regulations or agreements thereunder, any official interpretations thereof, or any law implementing an intergovernmental approach thereto.

“**Relevant Date**” means the date on which the payment of principal (including premium or final redemption amount or early redemption amount, if any, or other amount payable in respect thereof) or interest, if any, on a note first becomes due and payable but, if the full amount of the monies payable on such date has not been received by the relevant paying agent or as it shall have directed on or prior to such date, the “**Relevant Date**” means the date on which such monies shall have been so received. No additional amounts will be paid as provided above with respect to any payment of principal (including premium or final redemption amount or early redemption amount, if any, or other amount payable in respect thereof) or interest, if any, on such note to any holder who is a fiduciary or partnership or other than the sole beneficial owner of any such payment, to the extent that a beneficiary or settlor with respect to such fiduciary, a member of such partnership or the beneficial owner of such payment would not have been entitled to the additional amounts had such beneficiary, settlor, member or beneficial owner been the holder of any such note.

Redemption, Repurchase, Substitution and Variation

Final Redemption

Unless previously redeemed or purchased and canceled as provided below, each note will be redeemed at 100% of its nominal amount in the relevant Specified Currency on the Maturity Date specified in the applicable Final Terms.

Redemption for Tax Reasons

If the Issuer at any time satisfies the Trustee immediately prior to the giving of the notice referred to below that:

- (1) (in the case of senior preferred notes) on the occasion of the next payment due in respect of the notes, the Issuer will or would be required to pay additional amounts as described under “—*Payment of additional amounts*” or to account to any taxing authority in the United Kingdom for any amount (other than any tax withheld or deducted from interest payable in respect of the notes) calculated by reference to any amount payable in respect of the notes; or
- (2) (in the case of subordinated notes and senior non-preferred notes) a Tax Event has occurred;

and, in any such case, the Issuer cannot avoid the same by taking reasonable measures available to it, then the Issuer may in its sole discretion (and, in the case of subordinated notes, in accordance with “—*Preconditions to Redemption and Purchase of Subordinated Notes*” or, in the case of senior non-preferred notes, in accordance with “—*Preconditions to Redemption, Purchase, Substitution or Variation of Senior Non-Preferred Notes*”), having given notice of not more than 30 days nor less than 15 days prior to the date of redemption to the Trustee and, in accordance with “—*Notices*”, the noteholders (which notice shall be irrevocable), redeem at any time (if such notes are not Floating Rate Notes or Reset Notes (other than Reset Notes which reset only once)) or on any Interest Payment Date (if such notes are Floating Rate Notes or Reset Notes (other than Reset Notes which reset only once)) all (but not some only) of the notes at their early redemption amount as provided under “—*Early Redemption Amounts*” together, if applicable, with interest accrued to (but excluding) the date fixed for redemption. Upon the expiry of such notice the Issuer shall be bound to redeem the notes accordingly.

Prior to the publication of any notice of early redemption pursuant to the provisions set forth above, the Issuer shall deliver to the Trustee a certificate signed by any two authorized signatories of the Issuer confirming that the relevant circumstances in (1) above (in the case of senior preferred notes) or (2) above (in the case of subordinated notes and senior non-preferred notes) have occurred and are continuing. The Trustee shall be entitled, without liability to any person, to accept such certificate without any further inquiry as sufficient evidence of the satisfaction of the relevant conditions precedent, in which event it shall be conclusive and binding on the Trustee and the noteholders.

A “**Tax Event**” will be deemed to have occurred if, as a result of a Tax Law Change:

- (i) in making any payments on the subordinated notes or the senior non-preferred notes, the Issuer has paid or will or would on the next payment date be required to pay additional amounts as described under “—*Payment of additional amounts*”;
- (ii) the Issuer is no longer, or will no longer be, entitled to claim a deduction in respect of any payments in respect of the subordinated notes or the senior non-preferred notes in computing its taxation liabilities or the amount of such deduction is or will be materially reduced;
- (iii) the subordinated notes or the senior non-preferred notes are, or will be, prevented from being treated as loan relationships for United Kingdom tax purposes; or
- (iv) the Issuer is not, or will not be, able to have losses or deductions set against any profits or gains, or profits or gains offset by any losses or deductions, of companies with which it is or would otherwise be so grouped for applicable United Kingdom tax purposes (whether under the group relief system current as at the date of issue of the latest tranche of subordinated notes or senior non-preferred notes or any similar system or systems having like effect as may from time to time exist).

As used herein, “**Tax Law Change**” means any change in, or amendment to, the laws or regulations of the United Kingdom (including any treaty to which it is a party) or any political subdivision or any authority thereof or therein having power to tax, or any change in the official interpretation thereof by the relevant tax authority or in the application of such laws or regulations by a decision of any court or tribunal that provides for a position with respect to such laws or regulations that differs from the previously generally accepted position in relation to similar transactions or any pronouncement of a tax authority in the United Kingdom, which change or amendment becomes effective or, in the case of a change in law, if such change is enacted by a UK Act of Parliament or by Statutory Instrument, on or after the Issue Date.

Redemption at Our Option

If so specified in the applicable Final Terms, the notes of a series will be redeemable at our option (but subject, in the case of subordinated notes, to compliance with “—*Preconditions to Redemption and Purchase of Subordinated Notes*” or, in the case of senior non-preferred notes, to compliance with “—*Preconditions to Redemption, Purchase, Substitution or Variation of Senior Non-Preferred Notes*”) prior to the stated Maturity Date.

If so specified, and subject to the terms set forth in the applicable Final Terms, the notes will be subject to redemption at our option on the applicable Early Redemption Date(s) specified in the applicable Final Terms, in whole or from time to time in part in minimum increments of \$200,000 for senior preferred notes and senior non-preferred notes and \$250,000 for subordinated notes, or the minimum denomination specified in such Final Terms (provided that, in the case of any redemption in part, any remaining principal amount thereof shall be at least \$200,000 for senior preferred notes and senior non-preferred notes and \$250,000 for subordinated notes, or such minimum denomination), at the Redemption Price specified in the applicable Final Terms. Any such redemption will be subject to notice being given not more than the maximum period specified in the applicable Final Terms (or, if no maximum period is specified in the applicable Final Terms, 60 days, if the notes are being redeemed in whole, or 45 days, if the notes are being redeemed in part), nor less than the minimum period specified

in the applicable Final Terms (or, if no minimum period is specified in the applicable Final Terms, 30 days), prior to the relevant date of redemption and in accordance with the provisions of the Indenture.

The notes will not be subject to any sinking fund.

Regulatory Event Redemption of Subordinated Notes

This provision “—*Regulatory Event Redemption of Subordinated Notes*” applies only to subordinated notes.

Subject to compliance with “—*Preconditions to Redemption and Purchase of Subordinated Notes*”, the Issuer may, in its sole discretion, if a Regulatory Event has occurred, having given notice of not more than 30 days nor less than 15 days prior to the date of redemption to the Trustee and, in accordance with “—*Notices*”, the noteholders (which notice shall be irrevocable and shall specify the date fixed for redemption), redeem at any time (if such notes are not Floating Rate Notes or Reset Notes (other than Reset Notes which reset only once)) or on any Interest Payment Date (if such notes are Floating Rate Notes or Reset Notes (other than Reset Notes which reset only once)) all (but not some only) of the subordinated notes at their early redemption amount as provided under “—*Early Redemption Amounts*” together, if applicable, with interest accrued to (but excluding) the date fixed for redemption.

Prior to the publication of any notice of early redemption pursuant to the paragraph above, the Issuer shall deliver to the Trustee a certificate signed by any two authorized signatories of the Issuer confirming that a Regulatory Event has occurred. The Trustee shall be entitled, without liability to any person, to accept such certificate without any further inquiry as sufficient evidence of the satisfaction of the relevant conditions precedent, in which event it shall be conclusive and binding on the Trustee and the noteholders. Upon the expiry of such notice the Issuer shall be bound to redeem the subordinated notes accordingly.

Loss Absorption Disqualification Event Redemption of Senior Non-Preferred Notes

This provision “—*Loss Absorption Disqualification Event Redemption of Senior Non-Preferred Notes*” applies to all senior non-preferred notes except for any series where “*Senior Non-Preferred Notes: Loss Absorption Disqualification Event Redemption*” is expressly specified to be not applicable in the applicable Final Terms.

Subject to compliance with “—*Preconditions to Redemption, Purchase, Substitution or Variation of Senior Non-Preferred Notes*”, the Issuer may, in its sole discretion, if a Loss Absorption Disqualification Event has occurred, having given notice of not more than 30 days nor less than 15 days prior to the date of redemption to the Trustee and, in accordance with “—*Notices*”, the noteholders (which notice shall be irrevocable and shall specify the date fixed for redemption), redeem at any time (if such notes are not Floating Rate Notes or Reset Notes (other than Reset Notes which reset only once)) or on any Interest Payment Date (if such notes are Floating Rate Notes or Reset Notes (other than Reset Notes which reset only once)) all (but not some only) of the senior non-preferred notes at their early redemption amount as provided under “—*Early Redemption Amounts*” together, if applicable, with interest accrued to (but excluding) the date fixed for redemption.

Prior to the publication of any notice of early redemption pursuant to the paragraph above, the Issuer shall deliver to the Trustee a certificate signed by any two authorized signatories of the Issuer confirming that a Loss Absorption Disqualification Event has occurred. The Trustee shall be entitled, without liability to any person, to accept such certificate without any further inquiry as sufficient evidence of the satisfaction of the relevant conditions precedent, in which event it shall be conclusive and binding on the Trustee and the noteholders. Upon the expiry of such notice the Issuer shall be bound to redeem the senior non-preferred notes accordingly.

Repayment at the Option of the Holders

This provision “—*Repayment at the Option of the Holders*” does not apply to subordinated notes.

If so specified in the applicable Final Terms, the notes will be repayable by the Issuer in whole or in part at the option of the holders thereof on their respective optional repayment dates (“**Optional Repayment Dates**”) specified in such Final Terms, upon not more than the maximum period specified in the applicable Final Terms (or, if no maximum period is specified in the applicable Final Terms, 30 days), nor less than the minimum period specified in the applicable Final Terms (or, if no minimum period is specified in the applicable Final Terms, 15 days), notice prior to such Optional Repayment Dates. If no Optional Repayment Date is specified with respect to a note, such note will not be repayable at the option of the holder thereof prior to the stated Maturity Date. Any repayment in part will be in increments of \$200,000, or the minimum denomination specified in the applicable Final Terms (provided that any remaining principal amount thereof shall be at least \$200,000 or such minimum denomination). Unless otherwise specified in the applicable Final Terms, the repayment price for any note to be repaid means an amount equal to the sum of the unpaid principal amount thereof or the portion thereof plus accrued interest to the date of repayment. Exercise of the repayment option is irrevocable.

Late Payment on Zero Coupon Notes

If the amount payable in respect of any Zero Coupon Note upon redemption of such Zero Coupon Note pursuant to this subsection or upon its becoming due and repayable as provided upon the occurrence of any Event of Default under the Indenture is improperly withheld or refused, the amount due and repayable in respect of such Zero Coupon Note shall be the amount calculated as provided under “—*Early Redemption Amounts*” below as though the references therein to the date fixed for redemption or the date upon which such Zero Coupon Note becomes due and repayable were replaced by references to the date which is the earlier of:

- (a) the date on which all amounts due in respect of the Zero Coupon Note have been paid; and
- (b) the date on which the full amount of the moneys payable has been received by the Paying Agent or the Trustee and notice to that effect has been given to the holders.

Early Redemption Amounts

For the purposes of redemption for tax reasons or following (in respect of subordinated notes) a Regulatory Event or (in respect of senior non-preferred notes) a Loss Absorption Disqualification Event and, in any case, redemption upon the occurrence of any Event of Default under the Indenture, each note will be redeemed at an amount calculated as follows, together with interest, if any, to the date fixed for redemption (the amount in (a) or, as the case may be, (b) below being the “**early redemption amount**”):

- (a) (in the case of notes other than Zero Coupon Notes) at 100% of the principal amount (and premium, if any, thereon); or
- (b) in the case of Zero Coupon Notes, at an amount equal to the sum of:
 - A. the Reference Price; and
 - B. the product of the Accrual Yield (compounded annually) being applied to the Reference Price from (and including) the Original Issue Date of the notes to (but excluding) the date fixed for redemption or (as the case may be) the date upon which such note becomes due and repayable.

Where such calculation is to be made for a period which is not a whole number of years, it shall be made (i) in the case of a Zero Coupon Note other than a Zero Coupon Note payable in euro, on the basis of a 360 day year consisting of 12 months of 30 days each or (ii) in the case of a Zero Coupon Note payable in euro, on the basis of the actual number of days elapsed divided by 365 (or, if any of the days elapsed falls in a leap year, the sum of (A) the number of those days falling in a leap year divided by 366 and (B) the number of those days falling in a non-leap year divided by 365).

Selection of Notes for Partial Redemption

In the case of any partial redemption of notes, and subject to the terms specified in the applicable Final Terms, the notes to be redeemed shall be selected by the Trustee individually by lot not more than 60 days prior to the Redemption Date from the outstanding notes not previously called for redemption, provided that partial redemption of Global Notes shall be effected in accordance with DTC's procedures.

Repurchase

We may (subject, in the case of subordinated notes, to compliance with “—*Preconditions to Redemption and Purchase of Subordinated Notes*” and prevailing Regulatory Capital Requirements or, in the case of senior non-preferred notes, to compliance with “—*Preconditions to Redemption, Purchase, Substitution or Variation of Senior Non-Preferred Notes*” and prevailing Loss Absorption Regulations) at any time purchase notes at any price or prices in the open market or otherwise. Notes so purchased may be held or resold or, at our discretion, notes may be surrendered to the Trustee for cancellation.

Preconditions to Redemption and Purchase of Subordinated Notes

Any redemption or purchase of subordinated notes prior to the Maturity Date in accordance with any applicable subsection of this section “—*Redemption, Repurchase, Substitution and Variation*” is subject to:

- (a) the Issuer having obtained Relevant Supervisory Consent therefor;
- (b) the Issuer having demonstrated to the satisfaction of the Supervisory Authority that either: (A) the Issuer has (or before or at the same time as the relevant redemption or purchase will have) replaced the subordinated notes with own funds instruments of equal or higher quality at terms that are sustainable for the income capacity of the Issuer; or (B) the own funds and eligible liabilities of the Issuer would, following such redemption or purchase, exceed its minimum requirements (including any buffer requirements) by a margin that the Supervisory Authority considers necessary at such time; and
- (c) in the case of any redemption or purchase prior to the fifth anniversary of the Issue Date:
 - (A) in the case of redemption upon a Tax Event, the Issuer having demonstrated to the satisfaction of the Supervisory Authority that the change in tax treatment is material and was not reasonably foreseeable as at the Issue Date;
 - (B) in the case of redemption upon the occurrence of a Regulatory Event, the Issuer having demonstrated to the satisfaction of the Supervisory Authority that the relevant change in the regulatory classification of the subordinated notes is sufficiently certain and was not reasonably foreseeable as at the Issue Date;
 - (C) in the case of a repurchase, the Issuer having demonstrated to the satisfaction of the relevant Supervisory Authority that the Issuer has (or, before or at the same time as the relevant purchase, will have) replaced the subordinated notes with own funds instruments of equal or higher quality at terms that are sustainable for the income capacity of the Issuer, and the relevant Supervisory Authority having permitted such action on the basis of the determination that it would be beneficial from a prudential point of view and justified by exceptional circumstances; or
 - (D) the subordinated notes being purchased for market-making purposes in accordance with the prevailing Regulatory Capital Requirements.

Notwithstanding the foregoing, if, at the time of any redemption or purchase, the prevailing Regulatory Capital Requirements permit a repayment or purchase only after compliance with one or more additional or

alternative preconditions to those set out above in this subsection, the Issuer shall comply (in addition or in the alternative, as the case may be) with such additional and/or alternative precondition(s).

Preconditions to Redemption, Purchase, Substitution or Variation of Senior Non-Preferred Notes

Any redemption or purchase prior to the Maturity Date, or any substitution or variation of senior non-preferred notes in accordance with any applicable subsection of this section “—*Redemption, Repurchase, Substitution and Variation*” is subject to:

- (a) the Issuer having obtained Relevant Supervisory Consent therefor; and
- (b) compliance with any other pre-conditions to, or requirements applicable to, such redemption, purchase, substitution or variation as may be required by the relevant Supervisory Authority or the Loss Absorption Regulations at such time, including, in the case of a redemption or purchase and to the extent then so required, the Issuer having demonstrated to the satisfaction of the relevant Supervisory Authority that (A) it has (or, before or at the same time as the relevant redemption or purchase, will have) replaced the senior non-preferred notes with own funds or eligible liabilities instruments of equal or higher quality at terms that are sustainable for the income capacity of the Issuer; or (B) the own funds and eligible liabilities of the Issuer would, following such redemption or purchase, exceed its minimum requirements for own funds and eligible liabilities by a margin that the relevant Supervisory Authority considers necessary at such time; or (C) the partial or full replacement of the senior non-preferred notes with own funds instruments is necessary to ensure compliance with the own funds requirements laid down in the prevailing Regulatory Capital Requirements for continuing authorization.

Substitution and Variation in Respect of Senior Non-Preferred Notes

This provision “*Substitution and variation in respect of senior non-preferred notes*” applies to each series of senior non-preferred notes unless “*Senior Non-Preferred Notes: Substitution and Variation*” is expressly specified to be not applicable in the applicable Final Terms.

Upon the occurrence of a Loss Absorption Disqualification Event, the Issuer (in its sole discretion but subject to “—*Preconditions to Redemption, Purchase, Substitution or Variation of Senior Non-Preferred Notes*”), having given notice of not more than 30 days nor less than 15 days prior to the date of substitution or variation (as the case may be) to the Trustee and, in accordance with “—*Notices*”, the noteholders (which notice shall be irrevocable and shall specify the date fixed for substitution or variation, as applicable) may, without any requirement for the consent or approval of the noteholders, either substitute all (but not some only) of the senior non-preferred notes for, or vary the terms of the senior non-preferred notes so that they remain or, as appropriate, become, Loss Absorption Compliant Notes. Upon the expiry of the notice referred to above, the Issuer shall either substitute or, as the case may be, vary the terms of the senior non-preferred notes.

In connection with any substitution or variation in accordance with this provision “*Substitution and Variation in Respect of Senior Non-Preferred Notes*”, the Issuer shall comply with the rules of any stock exchange on which the relevant senior non-preferred notes are for the time being listed or admitted to trading.

Any substitution or variation in accordance with this provision is subject to the following conditions:

- (A) the Issuer complying with “—*Preconditions to Redemption, Purchase, Substitution or Variation of Senior Non-Preferred Notes*” above;
- (B) such substitution or variation not resulting in any event or circumstance which at or around that time gives the Issuer a redemption right in respect of the resulting notes; and
- (C) prior to the publication of any notice of substitution or variation, the Issuer having delivered to the Trustee a certificate signed by two authorized signatories of the Issuer stating that the Loss Absorption Disqualification Event giving rise to the right to substitute or vary the senior non-

preferred notes has occurred as at the date of the certificate and that the conditions set out (A) and (B) immediately above have been satisfied and the Trustee shall be entitled to accept such certificate as sufficient evidence thereof, and such certificate shall be conclusive and binding on the Trustee and all noteholders.

The Trustee shall, subject to the Issuer's compliance with the foregoing conditions and the provision of the certificate signed by two authorized signatories of the Issuer as referred to in the definition of 'Loss Absorption Compliant Notes' and at the expense and cost of the Issuer, use reasonable endeavors to assist the Issuer in any substitution or variation of the relevant senior non-preferred notes in accordance with this provision, except that the Trustee shall not be obliged to assist in any such substitution or variation if either such substitution or variation itself or the terms of the proposed Loss Absorption Compliant Notes would impose, in the Trustee's sole determination, more onerous obligations upon it or require the Trustee to incur any liability for which it is not indemnified and/or secured and/or pre-funded to its sole satisfaction.

Agreement with Respect to the Exercise of UK Bail-in Power

Notwithstanding, and to the exclusion of, any other term of any notes or any other agreements, arrangements or understandings between the Issuer and any noteholder (or the Trustee on behalf of any noteholder), by its acquisition of any note (or any interest therein), each noteholder acknowledges and accepts that the Amounts Due arising under the notes may be subject to the exercise of the UK Bail-in Power by the Resolution Authority, and acknowledges, accepts, consents, and agrees to be bound by:

- (a) the effect of the exercise of the UK Bail-in Power by the Resolution Authority, that may include and result in (without limitation) any of the following, or some combination thereof:
 - A. the reduction of all, or a portion, of the Amounts Due;
 - B. the conversion of all, or a portion, of the Amounts Due on the notes into shares, deferred shares (including core capital deferred shares), other securities or other obligations of the Issuer or another person (and the issue to or conferral on the noteholder of such shares, deferred shares (including core capital deferred shares), securities or obligations), including by means of an amendment, modification or variation of the terms of the notes;
 - C. the cancellation of the notes; and/or
 - D. the amendment or alteration of the maturity of the notes or amendment of the amount of interest payable on the notes, and/or the date on which the interest becomes payable, including by suspending payment for a temporary period; and
- (b) the variation of the terms of the notes and the Indenture, if necessary, to give effect to the exercise of the UK Bail-in Power by the Resolution Authority.

No repayment or payment of Amounts Due on the notes, will become due and payable or be paid after the exercise of any UK Bail-in Power by the Resolution Authority if and to the extent such amounts have been reduced, converted, cancelled, suspended (for so long as such suspension or moratorium is outstanding), amended or altered as a result of such exercise.

Neither a reduction or cancellation, in part or in full, of the Amounts Due or the conversion thereof into another security or obligation of the Issuer or another person, as a result of the exercise of the UK Bail-in Power by the Resolution Authority with respect to the Issuer, nor the exercise of the UK Bail-in Power by the Resolution Authority with respect to the notes, will be an Event of Default or otherwise constitute a breach of or default under the terms of the notes or the Indenture nor a default or event of default for any other purpose.

Upon the exercise of the UK Bail-in Power by the Resolution Authority with respect to any notes, the Issuer shall promptly give notice to the noteholders in accordance with "*—Notices*" and to the Trustee and the Paying Agents. Any delay or failure by the Issuer in delivering any notice referred to in this section "*—Agreement*

with Respect to the Exercise of UK Bail-in Power” shall not affect the validity or enforceability of the UK Bail-in Power.

For the purposes of this section “—Agreement with Respect to the Exercise of UK Bail-in Power”:

- (a) “**Amounts Due**” means the principal amount of, any premium on, and any accrued but unpaid interest on, the notes. References to such amounts will include (but will not be limited to) amounts that have become due and payable, but which have not been paid, prior to the exercise of the UK Bail-in Power by the Resolution Authority;
- (b) “**Resolution Authority**” means the Bank of England or any successor or replacement thereto and/or such other authority in the United Kingdom with the ability to exercise the UK Bail-in Power; and
- (c) “**UK Bail-in Power**” means any write-down, conversion, transfer, modification, moratorium and/or suspension power (including, without limitation, any write-down or conversion powers which may be exercised by the Resolution Authority independently of resolution proceedings) existing from time to time under any laws, regulations, rules or requirements relating to the resolution of banks, building societies, financial holding companies, mixed financial holding companies, credit institutions and/or investment firms (and/or any group company of any of the foregoing) incorporated in the United Kingdom in effect and applicable in the United Kingdom to the Issuer or other members of its group, including but not limited to any such laws, regulations, rules or requirements that are implemented, adopted or enacted within the context of a resolution regime in the United Kingdom under the Banking Act 2009 and/or the Loss Absorption Regulations, in each case as amended from time to time.

By its acquisition of the notes, each holder of the notes waives any and all claims against the Trustee for, agrees not to initiate a suit against the Trustee in respect of, and agrees that the Trustee will not be liable for, any action that the Trustee takes, or abstains from taking, in either case in accordance with the exercise of the UK Bail-in Power by the relevant Resolution Authority with respect to the notes.

Upon the exercise of the UK Bail-in Power by the Resolution Authority with respect to the notes, we will provide a written notice to DTC as soon as practicable regarding such exercise of the UK Bail-in Power for purposes of notifying holders of the notes of such occurrence. We will also deliver a copy of such notice to the Trustee for information purposes.

Our obligations to indemnify the Trustee shall survive the exercise of the UK Bail-in Power by the Resolution Authority with respect to any notes.

By its acquisition of the notes, each noteholder acknowledges and agrees that, upon the exercise of any UK Bail-in Power by the relevant Resolution Authority with respect to such notes, (a) the Trustee shall not be required to take any further directions from noteholders of the affected notes and (b) the Indenture shall impose no duties upon the Trustee whatsoever with respect to the exercise of any UK Bail-in Power by the relevant Resolution Authority. Notwithstanding the foregoing, if, following the completion of the exercise of the UK Bail-in Power by the Resolution Authority, any notes remain outstanding (for example, if the exercise of the UK Bail-in Power results in only a partial write-down of the principal of the notes), then the Trustee's duties under the Indenture shall remain applicable with respect to any notes following such completion to the extent that the issuer and the Trustee shall agree pursuant to another supplemental indenture or an amendment to the Indenture; provided, however, that notwithstanding the exercise of the UK Bail-in Power by the Resolution Authority, there shall at all times be a Trustee for the notes in accordance with the Indenture, and the resignation and/or removal of the Trustee and the appointment of a successor trustee will continue to be governed by the Indenture, including to the extent no additional supplemental indenture or amendment is agreed upon in the event the notes remain outstanding following the completion of the exercise of the UK Bail-in Power.

By its acquisition of the notes, each noteholder (a) acknowledges and agrees to be bound by and consents to the exercise of any UK Bail-in Power as it may be imposed without any prior notice by the Resolution Authority of its decision to exercise such power with respect to such notes and (b) shall be deemed to have authorized, directed and requested DTC and any direct participant in DTC or other intermediary through which it holds such notes to take any and all necessary action, if required, to implement the exercise of any UK Bail-in Power with respect to such notes as it may be imposed, without any further action or direction on the part of such holder or the Trustee.

For a discussion of certain risk factors relating to the UK bail-in power, see “*Risk Factors—Risks Related to the Notes.*”

Negative Pledge

The negative pledge applies to the senior preferred notes only.

So long as any of the senior preferred notes remain outstanding, we will not, and will not suffer or permit any of our subsidiaries to, create or have outstanding any mortgage, lien (other than a lien arising by operation of law), pledge or other charge or security interest upon the whole or any part of our or its business or assets, present or future (for the purposes of this subsection, a “**Security Interest**”), to secure any of our Loan Stock or the Loan Stock of any of our subsidiaries or any of our or our subsidiaries’ obligations under any guarantee of or indemnity in respect of the Loan Stock of any other person, without at the same time or prior thereto securing the senior preferred notes equally and ratably therewith to the satisfaction of the Trustee or providing such other security for the senior preferred notes which the Trustee in its absolute discretion shall deem to be not materially less beneficial to the holders of senior preferred notes or which shall be approved by a majority of the holders of senior preferred notes then outstanding provided that we or any of our subsidiaries may create or have outstanding Security Interests with respect to Loan Stock (without the obligation to secure the senior preferred notes as aforesaid) if at the date of the creation thereof we or any of our subsidiaries have and thereafter maintain free and clear of Security Interests assets the fair market value of which (calculated on a consolidated basis) is at least equal to the aggregate principal amount of all Loan Stock which is not secured by any such Security Interest. As used in this subsection, “**Loan Stock**” means indebtedness for the time being outstanding which is in the form of or represented or evidenced by bonds, notes, debentures, loan stock or other similar securities.

Events of Default—Senior Preferred Notes

The following shall constitute “**Events of Default**” with respect to each series of senior preferred notes and references to “notes” shall be construed accordingly:

- (1) we fail to pay any principal within three days of the due date or interest within seven days of the due date in respect of the notes of such series; or
- (2) we default in performance or observance of or compliance with any of our other obligations set out in the notes of such series or the Indenture which default is incapable of remedy or which, if capable of remedy, is not, in the opinion of the Trustee, remedied within 30 days (or such longer period as the Trustee may permit) after notice requiring remedy of such default shall have been given to us by the Trustee; or
- (3)
 - (a) any other present or future indebtedness in respect of moneys borrowed or raised in an amount of £40,000,000 or more (or its equivalent in any other currency) of us or any Material Subsidiary becomes due and payable prior to its stated maturity pursuant to a default; or
 - (b) any such indebtedness is not paid when due or (as the case may be) within any applicable grace period therefor; or
 - (c) we fail or any Material Subsidiary fails to pay when due or (as the case may be) within any applicable grace period therefor any amount payable by us or it under any present

or future guarantee in an amount of £40,000,000 or more (or its equivalent in any other currency) (other than any guarantee given in the ordinary course of our or its business) for any indebtedness in respect of moneys borrowed or raised; or

- (d) any mortgage, charge, pledge, lien or other encumbrance present or future securing an amount of £40,000,000 or more (or its equivalent in any other currency) and created or assumed by us or any Material Subsidiary becomes enforceable and the holder thereof takes any steps to enforce the same; or
- (4) a distress or execution or other similar legal process in respect of a claim for £20,000,000 or more is levied or enforced or sued out upon or against any part of our property, assets or revenues or the property, assets or revenues of any Material Subsidiary and is not discharged or stayed within 30 days of having been so levied, enforced or sued out; or
- (5) we become, or any Material Subsidiary becomes, insolvent or unable to pay our or its debts as they mature; or we apply, or any Material Subsidiary applies, for or consents to or suffers the appointment of a liquidator or receiver or administrator or similar officer of ourselves or itself or the whole or any substantial part of our or its undertaking, property, assets or revenues; or we take, or any Material Subsidiary takes, any proceeding under any law for a readjustment or deferment of our or its obligations or any part thereof, or we make or enter, or any Material Subsidiary makes or enters, into a general assignment or an arrangement or composition with or for the benefit of our or its creditors, except in any case in connection with a substitution pursuant to the Consolidation, Merger and Sale or Lease of Assets provisions of the Indenture (see the subsection entitled “—*Consolidation, Merger and Sale or Lease of Assets*”) or for the purpose of a reconstruction, union, transfer, merger or amalgamation effected with the prior written consent of the Trustee, or in the case of a Material Subsidiary in connection with the transfer of all or the major part of its business, undertaking and assets; or
- (6) an order is made or an effective resolution is passed to wind up or dissolve us or any Material Subsidiary or our authorization or registration is, or is proposed to be canceled, suspended or revoked or anything analogous or similar to any of the foregoing occurs (except in any case for the purposes of a substitution pursuant to the Consolidation, Merger and Sale or Lease of Assets provisions of the Indenture (see the subsection entitled “—*Consolidation, Merger and Sale or Lease of Assets*”), a reconstruction, union, transfer, merger or amalgamation effected with the consent of the Trustee or in the case of a voluntary solvent winding up of a wholly-owned Material Subsidiary).

“**Material Subsidiary**” means a Subsidiary of ours who’s total assets (attributable to us) represent 10% or more of our and our subsidiaries’ consolidated total assets (all as more particularly described in the Indenture).

If an Event of Default (other than an Event of Default specified in sections (5) or (6) above) with respect to notes of any series of senior preferred notes at the time outstanding occurs and is continuing, then in every such case the Trustee or the holders of not less than 25% in principal amount of the outstanding notes of such series may declare all of the notes of that series to be due and payable immediately at their early redemption amount together with accrued interest by a notice in writing to us. If an Event of Default specified in section (5) or (6) above with respect to notes of any series of senior preferred notes at the time outstanding occurs, then all of the notes of that series shall, without any act by the Trustee or the holders, become immediately due and payable without presentment, demand, protest or other notice of any kind at their early redemption amount together with accrued interest.

At any time after such an acceleration or declaration of acceleration with respect to any series of senior preferred notes has been made and before a judgment or decree for payment of the money due has been obtained by the Trustee, the holders of a majority in principal amount of the outstanding notes of that series, by written notice to us and the Trustee, may rescind and annul such acceleration or declaration of acceleration and its consequences if:

- (a) we have paid or deposited with the Trustee a sum sufficient to pay:
 - A. all overdue interest, if any, on all notes of that series;
 - B. the principal of and premium, if any, on any notes of that series which have become due otherwise than by such acceleration or declaration of acceleration and interest thereon at the rate or rates prescribed therefor in such notes;
 - C. to the extent that payment of such interest is lawful, interest upon any overdue interest at the rate or rates prescribed therefor in such notes; and
 - D. all sums paid or advanced by the Trustee under the Indenture and the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and counsel; and
- (b) all Events of Default with respect to notes of that series, other than the non-payment of the principal of and accrued interest on notes of that series which have become due solely by such acceleration, have been cured or waived.

No such rescission shall affect any subsequent default or impair any right consequent thereon.

If any series of Zero Coupon Notes shall have been accelerated and become due and payable, then, from and after such acceleration, unless such acceleration has been rescinded and annulled, the principal amount of such Zero Coupon Notes shall be deemed to be such portion of the principal thereof as shall be due and payable as a result of such acceleration, and payment of such portion of the principal thereof as shall be due and payable as a result of such acceleration, together with interest, if any, thereon and all other amounts owing thereunder, shall constitute payment in full of such Zero Coupon Notes.

Events of Default—Subordinated Notes and Senior Non-Preferred Notes

The following shall apply with respect to:

- (i) each series of subordinated notes; and
- (ii) each series of senior non-preferred notes

and references to “notes” shall be construed accordingly:

- (a) *Non-payment when due*: If default is made for a period of seven days or more in the payment of any principal due on the notes or any of them or for a period of 14 days or more in the payment of any interest due on the notes or any of them, the Trustee at its discretion may, and if so requested in writing by the holders of at least one-quarter of the nominal amount of notes then outstanding shall (subject to being indemnified and/or secured and/or prefunded to its satisfaction), institute proceedings for the winding up of the Issuer in England (but not elsewhere) to enforce the obligations of the Issuer in respect of the notes and the Indenture in so far as it relates to the notes, but may take no other action in respect of such default (except as provided in paragraph (b) below).
- (b) *Winding up or dissolution*: In the event of a winding up or dissolution of the Issuer (subject as otherwise provided in an Excluded Dissolution), whether or not instituted by the Trustee pursuant to paragraph (a) above, the Trustee at its discretion may, and if so requested in writing by the holders of at least one-quarter of the nominal amount of notes then outstanding shall (subject to being indemnified and/or secured and/or prefunded to its satisfaction), give notice to the Issuer (or the relevant official presiding over such winding up or dissolution) that the notes are, and they shall accordingly immediately become, due and repayable at their early redemption amount together with accrued interest as provided in the Indenture, and shall claim and/or prove in such winding up or dissolution in respect of the notes (such claim ranking as provided in “—

Status and ranking of senior non-preferred notes” or “—Status and subordination of subordinated notes”, as applicable).

- (c) *Enforcement:* Without prejudice to paragraphs (a) and (b) above, the Trustee may at its discretion and without notice institute such steps, actions or proceedings against the Issuer as it may think fit to enforce any term or condition binding on the Issuer under the Indenture or the notes (other than any payment obligation of the Issuer under or arising from the notes or the Indenture, including, without limitation, payment of any principal or interest in respect of the notes, including any damages awarded for breach of any obligations) and in no event shall the Issuer, by virtue of the institution of any such steps, actions or proceedings, be obliged to pay any sum or sums, in cash or otherwise, sooner than the same would otherwise have been payable by it pursuant to the Indenture, nor will the Trustee accept the same, otherwise than during or after a winding up or dissolution of the Issuer.
- (d) *Rights of holders:* No noteholder shall be entitled to proceed directly against the Issuer unless the Trustee, having become bound so to proceed, (i) fails to do so, or (ii) is unable for any reason to do so, in which case any such holder shall have only such rights against the Issuer as those which the Trustee is entitled to exercise. No such holder shall be entitled to institute proceedings for the winding up of the Issuer, or to prove in any winding up or dissolution of the Issuer, except that if the Trustee, having become bound to proceed against the Issuer as aforesaid, fails to do so or is unable for any reason to do so, or being able to prove in any winding up or dissolution of the Issuer, fails to do so, then any such holder may, on giving an indemnity satisfactory to the Trustee, in the name of the Trustee (but not otherwise) itself institute proceedings for the winding up in England (but not elsewhere) of the Issuer and/or prove in any winding up or dissolution of the Issuer to the same extent (but not further or otherwise) that the Trustee would have been entitled so to do in respect of such notes held by him.
- (e) *Extent of remedy:* No remedy against the Issuer, other than the institution of proceedings for the winding up in England of the Issuer and/or the proving or claiming in any winding up or dissolution of the Issuer, shall be available to the Trustee or the noteholders for the recovery of amounts owing in respect of such notes or under the Indenture in so far as it relates to the notes.
- (f) *Rights of the Trustee:* The Trustee may at its discretion institute such proceedings as are contemplated by this subsection against the Issuer to enforce the obligations of the Issuer under the Indenture in so far as it relates to the notes, but it shall not be bound to institute any such proceedings unless (a) it shall have been so requested in writing by noteholders holding at least one-quarter in nominal amount of the notes then outstanding and (b) it shall have been indemnified and/or secured and/or prefunded to its satisfaction.

Collection of Indebtedness and Suits for Enforcement by the Trustee

If any Event of Default has occurred and is continuing with regard to senior preferred notes of any series, the Trustee may, at its discretion and without further notice, take such proceedings against us as it may think fit to enforce payment on such notes. However, the Trustee will not be bound to take any action with respect to such series of senior preferred notes unless:

- (1) it shall have been so requested in writing by holders of at least 25% of the nominal amount of the Outstanding Notes of such series of senior preferred notes; and
- (2) it shall have been indemnified to its satisfaction.

If any Event of Default (which, for these purposes, shall mean that default is made for a period of seven days or more in the payment of any principal due on the notes or any of them or for a period of 14 days or more in the payment of any interest due on the notes or any of them) has occurred and is continuing with regard to subordinated notes or Senior Non-Preferred Notes of any series, the Trustee may at its discretion institute

proceedings for our winding up in England (but not elsewhere) to enforce our obligations in respect of such notes and the Indenture insofar as it relates to such notes. However, we may not make any payment of principal in respect of subordinated notes or Senior Non-Preferred Notes, nor will the Trustee accept any such payment of principal from us, other than during or after our winding up or dissolution, unless a Relevant Supervisory Consent has been granted. For the purposes of the foregoing, a payment shall be deemed to be due even if we are not solvent.

Judgments

Under current New York law, a state court in the State of New York rendering a judgment in respect of a note denominated in other than U.S. dollars would be required to render such judgment in the Specified Currency, and such judgment would be converted into U.S. dollars at the Market Exchange Rate prevailing on the date of entry of such judgment. Accordingly, the holder of such note denominated in other than U.S. dollars would be subject to exchange rate fluctuations between the date of entry of a judgment in a currency other than U.S. dollars and the time the amount of such judgment is paid to such holder in U.S. dollars and converted by such holder into the Specified Currency. It is not certain, however, whether a non-New York state court would follow the same rules and procedures with respect to conversions of judgments in currency other than U.S. dollars.

We will indemnify the holder of any note against any loss incurred by such holder as a result of any judgment or order being given or made for any amount due under such note and such judgment or order requiring payment in a currency (the “**Judgment Currency**”) other than the Specified Currency, and as a result of any variation between (i) the rate of exchange at which the Specified Currency amount is converted into the Judgment Currency for the purpose of such judgment or order, and (ii) the rate of exchange at which the holder of such note, on the date of payment of such judgment or order, is able to purchase the Specified Currency with the amount of the Judgment Currency actually received by such holder, as the case may be.

Consolidation, Merger and Sale or Lease of Assets

So long as any note of a series remains outstanding, we will not consolidate or amalgamate with or merge into any other Person or convey, transfer or lease our properties and assets substantially as an entirety to any Person unless:

- (1) the Person formed by such consolidation or amalgamation or into which we are merged or the Person which acquired by conveyance or transfer, or which leases, our properties and assets substantially as an entirety shall be a Person organized and validly existing under the laws of the United Kingdom which shall expressly assume, by an amendment to the Indenture that is executed and delivered to the Trustee and is in form reasonably satisfactory to the Trustee, the due and punctual payment of the principal of (and premium, if any, on) and interest, if any, on all of the notes of such a series and the performance of every covenant of the Indenture (other than a covenant included in the Indenture solely for the benefit of notes of another series) and of such notes to be performed, and such assumption shall provide that such Person shall pay to the holder of any such notes such additional amounts as may be necessary in order that every net payment of the principal of (and premium, if any, on) and interest, if any, on such notes will not be less than the amounts provided for in such notes to be then due and payable and such obligations shall extend to any deduction or withholding for or on account of any present or future tax, assessment or governmental charge imposed upon such payment (it being understood that, except as aforesaid, no such Person shall be obligated to make any indemnification or payment in respect of any tax consequences to any holder as a result of such assumption of rights and obligations if such Person would not be obligated to pay an additional amount pursuant to the Indenture if such corporation or Person were us);
- (2) immediately after giving effect to such transaction, no Event of Default with respect to notes of such series, and no event which, after notice or lapse of time, or both, would become an Event of Default with respect to such notes, shall have occurred and be continuing; and

- (3) we have delivered to the Trustee a certificate signed by two duly authorized officers and an opinion of counsel each stating that such consolidation, amalgamation, merger, conveyance, transfer or lease and such amendment to the Indenture evidencing the assumption by such Person comply with the Indenture and that all conditions precedent provided for in the Indenture relating to such transaction have been complied with.

Upon any such consolidation, amalgamation or merger, or any such conveyance, transfer or lease, the successor Person will succeed to, and be substituted for, and may exercise every right and power of ours, under the Indenture with the same effect as if such successor Person has been named as the issuer thereunder, and thereafter, except in the case of a lease, the predecessor corporation shall be relieved of all obligations and covenants under the Indenture and such notes.

Satisfaction and Discharge

The satisfaction and discharge provisions described below do not apply to subordinated notes or senior non-preferred notes unless the Issuer has obtained Relevant Supervisory Consent therefor.

The Indenture provides that we will be discharged from our obligations under the notes of a series (with certain exceptions) at any time prior to the stated Maturity Date, or redemption of such notes when (i) we have irrevocably deposited with or to the order of the Trustee, in trust, (a) sufficient funds in the currency, currencies, currency unit or units in which such notes are payable (without consideration of any reinvestment thereof) to pay the principal of (and premium, if any, on) and interest, if any, on such notes to the stated Maturity Date (or Redemption Date), or (b) such amount of U.S. Government Obligations (as defined below) as will, together with the predetermined and certain income to accrue thereon (without consideration of any reinvestment thereof), be sufficient to pay when due the principal of (and premium, if any, on) and interest, if any, to the stated Maturity Date (or Redemption Date), on such notes, or, (c) such amount equal to the amount referred to in clause (a) or (b) in any combination of currency or currency unit of U.S. Government Obligations; (ii) we have paid all other sums payable with respect to such notes; (iii) we have delivered to the Trustee an opinion of counsel to the effect that (a) we have received from, or there has been published by, the U.S. Internal Revenue Service a ruling, or (b) since the date of the Indenture there has been a change in applicable U.S. federal income tax law, in either case to the effect that, and based upon which such opinion of counsel shall confirm that, the holders of such notes will not recognize income, gain or loss for U.S. federal income tax purposes as a result of such discharge and will be subject to U.S. federal income tax on the same amount and in the same manner and at the same time as would have been the case if such discharge had not occurred; and (iv) certain other conditions are met. Upon such discharge, the holders of the notes of such a series shall no longer be entitled to the benefits of the terms and conditions of the Indenture and notes, except for certain provisions including registration of transfer and exchange of such notes and replacement of mutilated, destroyed, lost or stolen notes of such series, and shall look for payment only to such deposited funds or obligations.

“**U.S. Government Obligations**” means non-callable (i) direct obligations (or certificates representing an ownership interest in such obligations) of the United States for which its full faith and credit are pledged or (ii) obligations of a Person controlled or supervised by, and acting as an agency or instrumentality of, the United States, the timely payment of which is unconditionally guaranteed as a full faith and credit obligation of the United States.

Supplemental Indentures

The Indenture contains provisions permitting us and the Trustee (i) without the consent of the holders of any notes issued under the Indenture, to execute supplemental indentures for certain enumerated purposes, such as to cure any ambiguity or inconsistency or to make any change that does not have a materially adverse effect on the rights of any holder of such notes, and (ii) with the consent of the holders of not less than a majority in aggregate principal amount of the Outstanding Notes of each series of notes issued under the Indenture and affected thereby, to execute supplemental indentures for the purpose of adding any provisions to or changing in any manner or eliminating any of the provisions of the Indenture or of modifying in any manner the rights of holders of any such note under the Indenture; provided, that no such supplemental indenture may, without the

consent of the holder of each such Outstanding Note affected thereby (a) change the stated Maturity Date or the principal of or interest on any such note, or reduce the principal amount of any such note or the rate of interest thereon, if any, or any premium or principal payable upon redemption thereof, or change any obligation of ours to pay additional amounts thereon, or change any Place of Payment where, or change the currency in which, any such note or the interest, if any, thereon is payable, or impair the right to institute suit for the enforcement of any such payment on or after the stated Maturity Date, if any, thereof or the date any such payment is otherwise due and payable (or, in the case of redemption, on or after the redemption date); or (b) reduce the percentage in aggregate principal amount of such Outstanding Notes of any particular series, the consent of whose holders is required for any such supplemental indenture, or the consent of whose holders is required for any waiver (of compliance with certain provisions of the Indenture or certain defaults thereunder and their consequences) provided for in the Indenture; or (c) change any obligation we have to maintain an office or agency in the places and for the purposes specified in the Indenture; or (d) modify certain of the provisions of the Indenture pertaining to the waiver by holders of such notes of past defaults, supplemental indentures with the consent of holders of such notes and the waiver by holders of such notes of certain covenants, except to increase any specified percentage in aggregate principal amount required for any actions by holders of notes or to provide that certain other provisions of the Indenture cannot be modified or waived without the consent of the holder of each such note affected thereby; or (e) in the case of any subordinated notes or any senior non-preferred notes, change in any manner adverse to the interests of the holders of such Outstanding Notes the subordination or ranking provisions of such notes.

The foregoing paragraph is without prejudice to our rights and the rights of the Trustee, without any requirement for the consent or approval of any holders of any notes, to make any other amendments to the Indenture and/or the terms of any notes as may be expressly provided for in the Indenture and under this section “*Terms and Conditions of the Notes*” (including, without limitation, as provided under “*-Benchmark Amendments Discontinuation*”, “*-Substitution and Variation in Respect of Senior Non-Preferred Notes*” and “*Agreement with Respect to the Exercise of UK Bail-in Power*”).

In addition, variations in the terms and conditions of the subordinated notes or senior non-preferred notes of any series, which may include modifications relating to the status, subordination, ranking, redemption, repurchase or Events of Default with respect to such notes, may require Relevant Supervisory Consent.

Waivers

The holders of not less than a majority in aggregate principal amount of the Outstanding Notes of a series of notes affected thereby, may on behalf of the holders of all notes of such series waive compliance by us with certain restrictive provisions of the Indenture as pertain to the corporate existence of us, the maintenance of certain agencies by us or, solely with respect to senior preferred notes, as pertain to the negative pledge covenant as described under the subsection entitled “*-Negative Pledge*.”

The holders of a majority in aggregate principal amount of the Outstanding Notes of a series of notes may waive on behalf of the holders of all notes of such series, any past default and its consequences under the Indenture, except a default in the payment of the principal of (or premium, if any, on) or interest, if any, on any such note of that series or a default in respect of a covenant or a provision which under the Indenture cannot be modified or amended without the consent of the holder of each Outstanding Note of such series.

In addition to our and the Trustee's rights to modify and amend the Indenture as described above, modifications of and amendments to the terms of the Indenture or the notes may be made by us and the Trustee, without the further consent of the noteholders, to the extent necessary to give effect to the exercise by the relevant UK resolution authority of the UK bail-in power.

Notices

Notices to holders of notes will be given by mail to addresses of such holders as they appear in the notes' register.

Governing Law

The Indenture and the notes shall be governed by and construed in accordance with the laws of the State of New York; except that Section 11.1 of the Indenture (which contains the subordination provisions in respect of the subordinated notes) and Section 12.1 of the Indenture (which explains the priority of the senior non-preferred notes under the Insolvency Act and any other Ranking Legislation) and the corresponding subordination and ranking provisions, respectively, of each series of such notes pursuant to Section 3.1 of the Indenture and in the terms of such notes will be governed by and construed in accordance with the laws of England, with the intention that such provisions be given full effect in any insolvency proceeding relating to us in England.

Consent to Service

We have designated and appointed CT Corporation System at 111 Eighth Avenue, in the Borough of Manhattan, New York City, New York 10011 as our authorized agent upon which process may be served in any suit or proceeding arising out of or relating to the notes or the Indenture which may be instituted in any State or Federal court located in the Borough of Manhattan, City of New York, State of New York, and have submitted (for the purposes of any such suit or proceeding) to the jurisdiction of any such court in which any such suit or proceeding is so instituted. We have agreed, to the fullest extent that we lawfully may do so, that final judgment in any such suit, action or proceeding brought in such a court shall be conclusive and binding upon us and may be enforced in the courts of England (or any other courts to the jurisdiction of which it is subject).

Notwithstanding the foregoing, any actions arising out of or relating to the notes or the Indenture may be instituted by us, the Trustee or the holder of any note in any competent court in England or such other competent jurisdiction, as the case may be.

Concerning the Trustee

The Indenture provides that, except during the continuance of an Event of Default for a series of notes, the Trustee will have no obligations other than the performance of such duties and only such duties as are specifically set forth in the Indenture and no implied covenants or obligations shall be read into the Indenture against the Trustee. If an event of default has occurred and is continuing, the Trustee shall exercise such of the rights and powers vested in it by the Indenture, and use the same degree of care and skill in their exercise as a prudent person would exercise or use under the circumstances in the conduct of such person's own affairs.

Prescription

Claims for payment of principal in respect of the notes shall become void upon the expiry of ten years, and claims for payment of interest (if any) in respect of the notes shall become void upon the expiry of five years, in each case from the Relevant Date therefor, subject to the terms and conditions described under the subsection entitled "*—Payment of Principal, Premium, if any, and Interest, if any.*"

DESCRIPTION OF THE GLOBAL NOTES

Unless otherwise specified in the Final Terms for a particular series of notes, DTC will act as securities depository for the notes. The following discussion relates solely to DTC and notes for which it is the securities depository.

Global Notes

So long as DTC or its nominee is the holder of the Global Notes, any owner of a beneficial interest in the notes of a series must rely upon the procedures of DTC and institutions having accounts with DTC to exercise or be entitled to any rights of a holder of such Global Notes. See the subsection entitled “—*Book-Entry System*” for a further description of DTC’s procedures.

Book-Entry System

The Global Notes will be issued as fully-registered securities registered in the name of Cede (DTC’s partnership nominee), unless otherwise specified. No Global Note may be transferred except by DTC to a nominee of DTC or by a nominee of DTC to DTC or another nominee of DTC or any successor thereof.

We have been advised by DTC that upon the deposit of a Global Note with DTC, DTC will immediately credit, on its book-entry registration and transfer system, the respective principal amounts of such beneficial interests in that Global Note to the accounts of the DTC Participants. The accounts to be credited shall be designated by the soliciting Placement Agent or, to the extent that the notes are offered and sold directly, by us.

We understand that DTC is a limited-purpose trust company organized under the laws of the State of New York, a “**Banking Organization**” within the meaning of the New York Banking Law, a member of the Federal Reserve System, a “clearing corporation” within the meaning of the New York Uniform Commercial Code, and a “clearing agency” registered pursuant to the provisions of Section 17A of the Exchange Act. DTC holds securities that its participants (“**Participants**”) deposit with DTC. DTC also facilitates the clearance and settlement among Participants of transactions in such securities through electronic book-entry changes in Participants’ accounts, thereby eliminating the need for physical movement of securities certificates. Direct participants (“**Direct Participants**”) include securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is owned by a number of its Direct Participants and by the New York Stock Exchange, Inc., the American Stock Exchange, Inc., and the National Association of Securities Dealers, Inc. Access to DTC’s system is also available to others such as securities brokers and dealers, banks and trust companies that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly (“**Indirect Participants**”). The rules applicable to DTC and its Participants are on file with the Securities and Exchange Commission.

Ownership of beneficial interests in a Global Note in respect of a series of notes will be limited to DTC Participants, including Clearstream and Euroclear, or persons who hold interests through DTC Participants. In addition, ownership of beneficial interests will be evidenced only by, and the transfer of that ownership interest will be effected only through, records maintained by DTC or its nominee and DTC Participants until such time, if any, as Certificated Notes are issued, as set forth above under the subsection entitled “*Terms and Conditions of the Notes—Form, Transfer, Exchange and Denomination.*” The laws of some states require that certain purchasers of notes take physical delivery of such notes in certificated form. Such laws may impair the ability to transfer beneficial interests in a Global Note.

Interests held through Clearstream and Euroclear will be recorded on DTC’s books as being held by the U.S. depository for each of Clearstream and Euroclear, which U.S. depositories will in turn hold interests on behalf of their participants’ customers’ securities accounts.

To facilitate subsequent transfers, all Global Notes deposited with DTC are registered in the name of DTC’s partnership nominee, Cede. DTC has no knowledge of the actual owners of beneficial interests in the Global Notes; DTC’s records reflect only the identity of the Direct Participants to whose accounts such beneficial

interests in Global Notes are credited, which may or may not be the beneficial owners. The Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to beneficial owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Redemption notices shall be sent to Cede and any subsequent nominee of DTC. If less than all of the notes within a series are being redeemed, DTC's current practice is to determine *pro rata* or by lot the amount of the beneficial interest of each Direct Participant in such issue to be redeemed.

Principal and interest payments on the Global Notes will be made to DTC as the registered holder of the Global Notes. DTC's practice is to credit Direct Participants' accounts on the payable date in accordance with their respective holdings shown on DTC's records unless DTC has reason to believe that it will not receive payment on the payable date. Payments by Participants to beneficial owners will be governed by standing instructions and customary practices, as in the case of securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC, or us, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal and interest to DTC is our responsibility, disbursement of such payments to Direct Participants shall be the responsibility of DTC, and disbursement of such payments to the beneficial owners shall be the responsibility of Direct Participants and Indirect Participants.

A beneficial owner shall give notice to elect to have its beneficial interests in the Global Notes purchased or tendered, through its Participant, to the Trustee for a series of notes, and shall effect delivery of such beneficial interests in the Global Notes by causing the Direct Participant to transfer the Participant's beneficial interest in the Global Notes, on DTC's records, to the Trustee.

DTC may discontinue providing its services as securities depository with respect to the Global Notes at any time by giving reasonable notice to us and the Placement Agents. Under such circumstances, in the event that a successor securities depository is not obtained, certificated notes in registered form will be printed and delivered in exchange for beneficial interests in the Global Notes as described under the subsection entitled "*Terms and Conditions of the Notes—Form, Transfer, Exchange and Denomination.*"

We may decide to discontinue use of the system of book-entry transfers through DTC (or a successor securities depository). In that event, certificated notes in registered form will be printed and delivered in exchange for beneficial interests in the Global Notes as described under the subsection entitled "*Terms and Conditions of the Notes—Form, Transfer, Exchange and Denomination.*"

The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that we believe to be reliable, but we take no responsibility for the accuracy thereof.

In no event will definitive notes in bearer form representing any series of notes be issued.

None of us, any Trustee, any paying agent, any registrar for the notes or any Placement Agent will have any responsibility or liability for any aspect of DTC's records or any DTC Participant's records relating to or payments made on account of beneficial ownership interests in a Global Note or for maintaining, supervising or reviewing any of DTC's records or any DTC Participant's records relating to such beneficial ownership interests.

The Indenture and the notes require that payments in respect of the notes be made in immediately available funds. Interests in the notes are expected to trade in DTC's Same-Day Funds Settlement System, and any permitted secondary market trading activity in the notes will be required to be settled in immediately available funds. We do not know the effect, if any, of such settlement arrangements on trading activity in the notes or interests in the notes.

Issuance of Certificated Notes

If (i) DTC notifies us and the Trustee that it is unwilling or unable to continue as holder of the Global Notes or if at any time it ceases to be a clearing agency registered under the Exchange Act and, in either case, a successor holder is not appointed by us within 90 days of such notification or of our becoming aware of such ineligibility, (ii) an Event of Default occurs with respect to one or more series of notes, or (iii) we determine in our sole discretion (subject to DTC's procedures) that certificated notes of such series will be issued in registered form, then in any such case, upon the written request of the holder of the Global Note, the Trustee will issue certificated registered notes in the names and in the amounts as specified by the holder of the Global Note. The request for certificated notes may be made by the holder in the circumstances and subject to the conditions described under the subsection entitled "*Terms and Conditions of the Notes—Form, Transfer, Exchange and Denomination.*"

The exchange of interests in the Global Note for certificated notes of a particular series shall be made free of any fees of the Trustee to the holder, provided, however, that such person receiving notes in certificated form will be obligated to pay or otherwise bear the cost of any tax or other governmental charge as required by the Indenture and any cost of insurance, postage, transportation and the like.

Repayment

If a note becomes repayable at the option of the holder on a date or dates specified prior to its maturity date, if any, and the Trustee is so notified, the Trustee will promptly notify the holder of the Global Note that such note has become repayable. In order for the repayment option on any note to be exercised, the owners of beneficial interests in the Global Note must instruct the broker or other DTC Participant through which it holds an interest in the Global Note to notify the Trustee of its desire to exercise that right to repayment. Different firms have different cut-off times for accepting instructions from their customers and, accordingly, each beneficial owner should consult the broker or other DTC Participant through which it holds its beneficial interest in a Global Note in order to ascertain the cut-off time by which such an instruction must be given in order for timely notice to be delivered to the depository.

Record Date

Unless we otherwise instruct the Trustee in writing, the record date for the determination of the holder of Global Notes entitled to receive payment in respect of a Global Note will be the date which is 15 calendar days prior to the applicable payment date on such Global Note in respect of such Global Note, provided that interest payable at Maturity will be payable to the person to whom principal shall be payable. If such 15th day is not a Business Day, the record date for determination will be the next succeeding Business Day. Whenever we or the Trustee deem it appropriate to fix a record date for the determination of the holder of Global Notes who should be entitled to receive payment or take any action in respect of Global Notes, the Trustee, with our consent, will set such record date at least 15 days prior to the date on which such payment is to be made or such action is to be taken.

Reports

The Trustee will send promptly to the applicable holders of the Global Notes any notices, reports and other communications from us that are received by the custodian as holder of the Global Notes and that we make generally available to holders of the notes.

FORM OF FINAL TERMS

Set out below is the form of Final Terms which will be completed for each tranche of notes issued under the medium-term note program described in this Base Prospectus.

[MiFID II product governance / Professional investors and ECPs only target market – Solely for the purposes of [the/each] manufacturer’s product approval process, the target market assessment in respect of the notes has led to the conclusion that: (i) the target market for the notes is eligible counterparties and professional clients only, each as defined in Directive 2014/65/EU (as amended, “**MiFID II**”); and (ii) all channels for distribution of the notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the notes (a “**distributor**”) should take into consideration the manufacturer[’s/s’] target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the notes (by either adopting or refining the manufacturer[’s/s’] target market assessment) and determining appropriate distribution channels.]⁹

UK MiFIR product governance / Professional investors and ECPs only target market – Solely for the purposes of [the/each] manufacturer’s product approval process, the target market assessment in respect of the notes has led to the conclusion that: (i) the target market for the notes is only eligible counterparties, as defined in the FCA Handbook Conduct of Business Sourcebook (“**COBS**”), and professional clients, as defined in Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (“**UK MiFIR**”); and (ii) all channels for distribution of the notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the notes (a “**distributor**”) should take into consideration the manufacturer[’s/s’] target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the “**UK MiFIR Product Governance Rules**”) is responsible for undertaking its own target market assessment in respect of the notes (by either adopting or refining the manufacturer[’s/s’] target market assessment) and determining appropriate distribution channels.

[Prohibition of sales to EEA retail investors – The notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (the “**EEA**”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of [Directive 2014/65/EU (as amended, “**MiFID II**”)]/MiFID II; or (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended or superseded), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “**EU PRIIPs Regulation**”) for offering or selling the notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the notes or otherwise making them available to any retail investor in the EEA may be unlawful under the EU PRIIPs Regulation.]

[Prohibition of sales to UK retail investors – The notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom (“**UK**”). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (“**EUWA**”); (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently, no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the “**UK PRIIPs Regulation**”) for offering or selling the notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.]

⁹ This legend to be included only where it accurately reflects the determination of the manufacturer(s) for the relevant series of notes.

[Singapore Securities and Futures Act Product Classification – In connection with Section 309B of the Securities and Futures Act (Chapter 289) of Singapore (the “SFA”) and the Securities and Futures (Capital Markets Products) Regulations 2018 of Singapore (the “CMP Regulations 2018”), the Issuer has determined, and hereby notifies all relevant persons (as defined in Section 309A(1) of the SFA), the classification of the notes as [prescribed capital markets products (as defined in the CMP Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products)] [].

[For a Qualified Reopening of notes issued in compliance with Rule 144A:] [Qualified Reopening. The issuance of the notes should be treated as a “qualified reopening” of the notes issued on] within the meaning of the Treasury regulations governing original issue discount on debt instruments (the “**OID Regulations**”). Therefore, for purposes of the OID Regulations, the notes issued in this offering should be treated as having the same issue date and the same issue price as the notes issued on] and should [not] be considered to have been issued with original issue discount for U.S. federal income tax purposes.]

TAXATION

US Federal Income Taxation

The following summary describes certain U.S. federal income tax consequences of the purchase, ownership and disposition of notes. Except where noted, this discussion deals only with holders that acquire the notes at their original issuance and that will hold the notes as capital assets and does not deal with investors subject to special tax rules, such as dealers in securities or currencies, financial institutions, regulated investment companies, real estate investment trusts, tax-exempt entities, individual retirement accounts and other tax-deferred accounts, insurance companies, persons holding notes as a part of a hedging, integrated, conversion or constructive sale transaction or a straddle, entities or arrangements treated as partnerships for U.S. federal income tax purposes, traders in securities that elect to use mark-to-market method of accounting for their securities holdings, persons that have ceased to be U.S. citizens or lawful permanent residents of the United States, or U.S. Holders (as defined below) of notes whose “functional currency” is not the U.S. dollar. The discussion below is based upon the provisions of the U.S. Internal Revenue Code of 1986, as amended (the “Code”), its legislative history, final, temporary and proposed U.S. Treasury regulations promulgated thereunder, published rulings and judicial decisions as of the date hereof, all of which are subject to change possibly with retroactive effect or possible differing interpretations so as to result in U.S. federal income tax consequences different from those discussed below. This summary assumes that there will be no substitution of another entity in the place of the Issuer as principal debtor in respect of the notes.

The discussion set forth below only covers notes issued pursuant to the medium-term note program that will constitute debt for U.S. federal income tax purposes. If any note did not constitute debt for U.S. federal income tax purposes, the tax consequences of the ownership of such note could differ materially from the tax consequences described herein. This summary does not address the U.S. federal income tax consequences of every type of note which may be issued under the program, such as notes with an original maturity of more than 30 years or with certain contingent payment features (except to the limited extent discussed below), and additional or modified disclosure concerning certain U.S. federal income tax consequences relevant to such types of notes will be provided as appropriate. Moreover, this summary does not address U.S. federal estate, gift, or alternative minimum tax considerations, the Medicare tax on net investment income, non-U.S., state or local tax considerations or special tax accounting rules as a result of any item of gross income with respect to the notes being taken into account on an applicable financial statement.

As used herein, a “**U.S. Holder**” of a note means a beneficial owner that is, for U.S. federal income tax purposes, (i) a citizen or individual resident of the United States, (ii) a corporation created or organized in or under the laws of the United States or any political subdivision thereof (including the District of Columbia), (iii) an estate the income of which is subject to U.S. federal income taxation regardless of its source, or (iv) a trust (X) that is subject to the supervision of a court within the United States and one or more United States persons (as defined in the Code) have the authority to control all substantial decisions of the trust or (Y) that has a valid election in effect under applicable U.S. Treasury regulations to be treated as a United States person. A “**Non-US. Holder**” is a beneficial owner of notes that is neither a U.S. Holder nor a partnership.

If an entity or arrangement treated as a partnership for U.S. federal income tax purposes holds notes, the tax treatment of a partner in such entity or arrangement will generally depend upon the status of the partner and the activities of the partnership. An entity or arrangement treated as a partnership for U.S. federal income tax purposes considering holding notes should consult its tax advisors concerning the U.S. federal income tax consequences to it and its partners of the acquisition, ownership and disposition of the notes by the partnership.

THE SUMMARY OF U.S. FEDERAL INCOME TAX CONSEQUENCES SET OUT BELOW IS FOR GENERAL INFORMATION ONLY AND DOES NOT ADDRESS EVERY TYPE OF NOTE THAT CAN BE ISSUED UNDER THE PROGRAM. PROSPECTIVE PURCHASERS SHOULD CONSULT THEIR TAX ADVISORS AS TO THE PARTICULAR TAX CONSEQUENCES TO THEM OF OWNING THE NOTES, INCLUDING THE APPLICABILITY AND EFFECT OF U.S. FEDERAL, STATE, LOCAL, NON-U.S. AND OTHER TAX LAWS AND POSSIBLE CHANGES IN TAX LAW.

Payments of Interest

Except as set forth below, interest (including the amount of any taxes withheld and the payment of any additional amounts) on a note, other than interest on an “Original Issue Discount Note” that is not “qualified stated interest” (each as defined below), generally will be taxable to a U.S. Holder as ordinary income at the time it is paid or accrued in accordance with the U.S. Holder’s method of tax accounting, reduced by the allocable amount of amortizable bond premium, if any (discussed below). Interest income (including original issue discount (“OID”), if any, as discussed below) on the notes will generally be treated as foreign source income. Prospective purchasers should consult their tax advisors concerning the applicability of the foreign tax credit and source of income rules to income attributable to the notes.

Original Issue Discount

U.S. Holders of notes issued with OID will be subject to special tax accounting rules, as described in greater detail below. U.S. Holders of such notes should be aware that they generally must include OID in gross income as ordinary income in advance of the receipt of cash attributable to that income. However, U.S. Holders of such notes generally will not be required to include separately in income cash payments received on the notes, even if denominated as interest, to the extent such payments do not constitute “qualified stated interest” (as defined below) and were previously included in income as OID. Notes issued with OID will be referred to as “**Original Issue Discount Notes**.” The pricing termsheet that is provided to investors in connection with the confirmation of the purchase of their securities and the applicable Final Terms will specify if a series of notes should be treated as Original Issue Discount Notes.

Additional rules applicable to Original Issue Discount Notes that are denominated in or determined by reference to a currency other than the U.S. dollar are described under “—*Foreign Currency Notes*” below.

For U.S. federal income tax purposes, a note, other than a note with a term of one year or less (a “**Short-Term Note**”), with an “issue price” (as defined below) that is less than its stated redemption price at maturity (the sum of all payments to be made on the note other than payments of qualified stated interest) will be issued with OID unless such difference is *deminimis* (i.e., less than 0.25% of the stated redemption price at maturity multiplied by the number of complete years to maturity or, in the case of a note that provides for the payment of amounts other than qualified stated interest before maturity, the weighted average maturity). A note’s weighted average maturity is the sum of the following amounts determined for each payment on a note (other than a payment of “qualified stated interest”): (i) the number of complete years from the issue date until the payment is made multiplied by (ii) a fraction, the numerator of which is the amount of the payment and the denominator of which is the note’s stated redemption price at maturity. The “**issue price**” of each note in a particular offering will be the first price at which a substantial amount of that particular offering is sold to persons other than bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters, placement agents, or wholesalers. The term “**qualified stated interest**” means stated interest that is unconditionally payable over the entire term of the note in cash or in property (other than debt instruments of the Issuer) at least annually at a single fixed rate or, subject to certain conditions, based on one or more interest indices. Interest is payable at a single fixed rate only if the rate appropriately takes into account the length of the interval between payments.

In the case of a note issued with *deminimis* OID, the U.S. Holder generally must include such *de minimis* OID in income at the time principal payments on the note are made in proportion to the amount paid for the note. Any amount of *de minimis* OID includable in income will be treated as capital gain.

Certain notes may be redeemed prior to their maturity at the option of the Issuer and/or at the option of the holder. Original Issue Discount Notes containing such features may be subject to rules that differ from the general rules discussed herein. In the case of notes that provide for alternative payment schedules, OID is calculated by assuming that (i) the holder will exercise or not exercise options in a manner that maximizes the holder’s yield and (ii) the Issuer will exercise or not exercise options in a manner that minimizes the holder’s yield.

U.S. Holders of Original Issue Discount Notes with a maturity upon issuance of more than one year must, in general, include OID in income in advance of the receipt of some or all of the related cash payments. The amount of OID includible in income by the initial U.S. Holder of an Original Issue Discount Note is the sum of the “daily portions” of OID with respect to the Original Issue Discount Note for each day during the taxable year or portion of the taxable year in which such U.S. Holder held such Original Issue Discount Note (“**accrued OID**”). The daily portion is determined by allocating to each day in any “accrual period” a *pro rata* portion of the OID allocable to that accrual period. The “accrual period” for an Original Issue Discount Note may be of any length and may vary in length over the term of the Original Issue Discount Note, provided that each accrual period is no longer than one year and each scheduled payment of principal or interest occurs on either the first day or the final day of an accrual period. The amount of OID allocable to any accrual period is an amount equal to the excess, if any, of (a) the product of the Original Issue Discount Note’s “adjusted issue price” at the beginning of such accrual period and its yield to maturity (determined on the basis of compounding at the close of each accrual period and properly adjusted for the length of the accrual period) over (b) the sum of any qualified stated interest allocable to the accrual period. OID allocable to a final accrual period is the difference between the amount payable at maturity (other than a payment of qualified stated interest) and the adjusted issue price at the beginning of the final accrual period. Special rules will apply for calculating OID for an initial short accrual period. The “**adjusted issue price**” of an Original Issue Discount Note at the beginning of any accrual period is equal to its issue price increased by the amount of accrued OID for each prior accrual period (determined without regard to the amortization of any acquisition or bond premium, as described below) and reduced by any payments made on such note (other than qualified stated interest) on or before the first day of the accrual period. Under these rules, a U.S. Holder will generally have to include in income increasingly greater amounts of OID in successive accrual periods.

In the case of an Original Issue Discount Note that is treated as a “variable rate debt instrument” under U.S. Treasury regulations (a “**Floating Rate Note**”), both the “yield to maturity” and “qualified stated interest” generally will be determined solely for purposes of calculating the accrual of OID as though the Floating Rate Note will bear interest in all periods at a fixed rate generally equal to the value of the rate that would be applicable to interest payments on the note on its date of issue or, in the case of certain Floating Rate Notes, the rate that reflects the yield to maturity that is reasonably expected for the note. Additional rules may apply if interest on a Floating Rate Note is based on more than one interest index or if the principal amount of the Floating Rate Note is indexed in any manner. Different rules may apply if a Floating Rate Note is treated as a contingent payment debt instrument under U.S. Treasury regulations.

Certain notes may be treated as contingent payment debt instruments for U.S. federal income tax purposes. The pricing termsheet that is provided to investors in connection with the confirmation of the purchase of their securities and the applicable Final Terms will specify if a series of notes should be treated as contingent payment debt instruments for U.S. federal income tax purposes. Under applicable U.S. Treasury regulations, interest on contingent payment debt instruments is treated as OID and must be accrued on a constant-yield basis based on a yield to maturity that reflects the rate at which the Issuer would issue a comparable fixed-rate instrument with no contingent payments but with terms and conditions otherwise similar to the contingent payment debt instruments (the “**comparable yield**”), based on a projected payment schedule determined by the Issuer (the “**projected payment schedule**”). This projected payment schedule must include each non-contingent payment on the note and an estimated amount for each contingent payment, and must produce the comparable yield.

The Issuer will be required to provide to holders, solely for U.S. federal income tax purposes, a schedule of the projected amounts of payments on such notes that are treated as contingent payment debt instruments for U.S. federal income tax purposes. The applicable Final Terms will either contain the comparable yield and projected payment schedule, or will provide an address to which a U.S. Holder of a contingent payment debt instrument can submit a written request for this information. A U.S. Holder generally will be bound by the comparable yield and the projected payment schedule determined by the Issuer unless the U.S. Holder determines its own comparable yield and projected payment schedule and explicitly and timely justifies and discloses such schedule to the U.S. Internal Revenue Service (“**IRS**”). The Issuer’s determination, however, is not binding on

the IRS, and it is possible that the IRS could conclude that some other comparable yield or projected payment schedule should be used instead.

THE COMPARABLE YIELD AND PROJECTED PAYMENT SCHEDULE WILL NOT BE DETERMINED FOR ANY PURPOSE OTHER THAN FOR THE DETERMINATION OF INTEREST ACCRUALS AND ADJUSTMENTS THEREOF IN RESPECT OF CONTINGENT NOTES FOR U.S. FEDERAL INCOME TAX PURPOSES AND WILL NOT CONSTITUTE A PROJECTION OR REPRESENTATION REGARDING THE ACTUAL AMOUNTS PAYABLE TO THE HOLDERS OF THE NOTES.

Gain from the sale, exchange, retirement or other disposition of a contingent payment debt instrument will be treated as interest income taxable at ordinary income (rather than capital gains) rates. Any loss will be ordinary loss to the extent that the U.S. Holder's total interest inclusions to the date of sale, exchange or retirement exceed the total net negative adjustments that the U.S. Holder took into account as ordinary loss, and any further loss will be capital loss. Gain or loss realized by a U.S. Holder on the sale, exchange, retirement or other disposition of a note that is treated as a contingent payment debt instrument generally will be treated as foreign source gain or loss. Prospective purchasers should consult their tax advisors as to the U.S. federal income tax consequences of purchasing contingent payment debt instruments.

U.S. Holders may elect to treat all interest on any note as OID and calculate the amount includible in gross income under the constant yield method described above with certain modifications. For the purposes of this election, interest includes stated interest, OID, *de minimis* OID, market discount, *de minimis* market discount and unstated interest, as adjusted by any amortizable bond premium or acquisition premium. The election is to be made for the taxable year in which the U.S. Holder acquired the note, and may not be revoked without the consent of the IRS.

Notes Subject to Redemption

Certain of the notes: (i) may be redeemable at the option of the Issuer prior to their maturity, (ii) may be repayable at the option of the holder prior to their stated maturity, or (iii) may be otherwise subject to mandatory redemption. Notes containing such features may be subject to rules that are different from the general rules discussed above, which will depend, in part, on the particular terms and features of such notes.

Short-Term Notes

In general, an individual or other cash basis U.S. Holder of a Short-Term Note is not required to accrue OID (calculated as set forth below for the purposes of this paragraph) for U.S. federal income tax purposes unless it elects to do so (but may be required to include any stated interest in income as the interest is received). Accrual basis U.S. Holders and certain other U.S. Holders are required to accrue OID on Short-Term Notes on a straight-line basis or, if the U.S. Holder so elects, under the constant-yield method (based on daily compounding). In the case of a U.S. Holder not required and not electing to include OID in income currently, any gain realized on the sale, exchange, retirement or other disposition of the Short-Term Note will be ordinary income to the extent of the OID accrued on a straight-line basis (unless an election is made to accrue the OID under the constant-yield method) through the date of sale, exchange, retirement or other disposition. U.S. Holders who are not required and do not elect to accrue OID on Short-Term Notes will be required to defer deductions for interest on borrowings allocable to Short-Term Notes in an amount not exceeding the deferred income until the deferred income is realized.

For purposes of determining the amount of OID subject to these rules, all interest payments on a Short-Term Note are included in the Short-Term Note's stated redemption price at maturity. A U.S. Holder may elect to determine OID on a Short-Term Note as if the Short-Term Note had been originally issued to the U.S. Holder at the U.S. Holder's purchase price for the Short-Term Note. This election shall apply to all obligations with a maturity of one year or less acquired by the U.S. Holder on or after the first day of the first taxable year to which the election applies, and may not be revoked without the consent of the IRS.

Market Discount

If a U.S. Holder purchases a note (other than a Short-Term Note) for an amount that is less than its stated redemption price at maturity or, in the case of an Original Issue Discount Note, its revised issue price, the amount of the difference will be treated as “market discount” for U.S. federal income tax purposes, unless such difference is less than a specified *de minimis* amount. Under the market discount rules, a U.S. Holder will be required to treat any principal payment on, or any gain on the sale, exchange, retirement or other disposition of, a note as ordinary income to the extent of the market discount which has not previously been included in income and is treated as having accrued on such note at the time of such payment or disposition. In addition, the U.S. Holder generally will be required to defer, until the maturity of the note or its earlier disposition in a taxable transaction, the deduction of all or a portion of the interest expense on any indebtedness incurred or continued to purchase or carry such note. Such interest is deductible when paid or incurred to the extent of income from the note for the year. If the interest expense exceeds such income, such excess is currently deductible only to the extent that such excess exceeds the portion of the market discount allocable to the days during the taxable year on which such note was held by the U.S. Holder.

Any market discount will be considered to accrue ratably during the period from the date of acquisition to the maturity date of the note on a straight-line basis, unless the U.S. Holder elects to accrue on a constant yield method. This election to accrue market discount on a constant yield method is to be made for the taxable year in which the U.S. Holder acquired the note, applies only to that note, and may not be revoked without the consent of the IRS. A U.S. Holder may elect to include market discount in income currently as it accrues (on either a ratable or constant-yield method), in which case the rule described above regarding deferral of interest deductions will not apply. This election to include market discount in income currently, once made, applies to all market discount obligations acquired on or after the first day of the first taxable year to which the election applies and may not be revoked without the consent of the IRS.

Acquisition Premium; Amortizable Bond Premium

A U.S. Holder that purchases an Original Issue Discount Note for an amount that is greater than its adjusted issue price but equal to or less than the sum of all amounts payable on the note after the purchase date other than payments of qualified stated interest will be considered to have purchased such note at an “acquisition premium.” Under the acquisition premium rules, if the U.S. Holder does not make the election to treat all interest as OID (as described above) then the amount of OID which such U.S. Holder must include in its gross income with respect to such note for any taxable year will be reduced by the portion of such acquisition premium properly allocable to such year.

A U.S. Holder that purchases a note (including an Original Issue Discount Note), for an amount in excess of the sum of all amounts payable on the note after the purchase date other than qualified stated interest will be considered to have purchased the note at a “bond premium.” A U.S. Holder generally may elect to amortize bond premium over the remaining term of the note on a constant yield method as an offset to interest when includible in income under the U.S. Holder’s regular tax accounting method. In the case of instruments that provide for alternative payment schedules, bond premium is calculated by assuming that (i) the holder will exercise or not exercise options in a manner that maximizes the holder’s yield and (ii) the Issuer will exercise or not exercise options in a manner that minimizes the holder’s yield. Bond premium on a note held by a U.S. Holder that does not make such an election will decrease the gain or increase the loss otherwise recognized on disposition of the note. The election to amortize premium on a constant yield method once made applies to all debt obligations held or subsequently acquired by the electing U.S. Holder on or after the first day of the first taxable year to which the election applies and may not be revoked without the consent of the IRS.

Sale, Exchange and Retirement or Other Disposition of Notes

Upon the sale, exchange, retirement or other disposition of a note, a U.S. Holder generally will recognize gain or loss equal to the difference between the amount realized upon the sale, exchange, retirement or other disposition (less an amount equal to any accrued but unpaid qualified stated interest, which will be treated as a payment of interest for U.S. federal income tax purposes) and the adjusted tax basis of the note. A U.S. Holder’s

adjusted tax basis in a note will, in general, be the U.S. Holder's cost therefor, increased by the amount of any OID, market discount or any income attributable to *de minimis* OID or *de minimis* market discount previously included in income by the U.S. Holder and reduced by any amortizable bond premium applied to reduce interest on the note and any payments on the note other than qualified stated interest. Except as with respect to certain Short-Term Notes or notes with market discount as described above, with respect to gain or loss attributable to changes in exchange rates, with respect to certain Foreign Currency Notes as described below, and with respect to contingent payment debt instruments as described above, such gain or loss will be capital gain or loss. Except with respect to notes that are treated as contingent payment debt instruments as described above, gain or loss realized by a U.S. Holder on the sale, exchange, retirement or other disposition of a note generally will be treated as U.S. source gain or loss. Capital gains of individuals derived from capital assets held for more than one year may be eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations.

Foreign Currency Notes

The following is a summary of the principal U.S. federal income tax consequences to a U.S. Holder of the ownership of a note denominated in a currency other than the U.S. dollar (a "**Foreign Currency Note**").

Qualified Stated Interest Payments

Cash basis U.S. Holders are required to include in income the U.S. dollar value of the amount of interest received, based on the "spot rate" for such foreign currency in effect on the date of receipt, regardless of whether the payment is in fact converted into U.S. dollars. No exchange gain or loss is recognized with respect to the receipt of such payment.

Accrual basis U.S. Holders may determine the amount of income recognized with respect to such interest payment in accordance with either of two methods. Under the first method, the U.S. Holder will be required to include in income for each taxable year the U.S. dollar value of the interest that has accrued during such year, determined by translating such interest at the average rate of exchange for the period or periods during which such interest accrued (or, in the case of an accrual period that spans two taxable years of a U.S. Holder, the part within each taxable year). Under the second method, an accrual basis holder may elect to translate interest income at the spot rate on the last day of the accrual period (or last day of the taxable year in the case of a portion of an accrual period that straddles the holder's taxable year) or on the date the interest payment is received if such date is within five days of the end of the accrual period. Any such election will apply to all debt instruments held by the U.S. Holder at the beginning of the first taxable year to which the election applies or thereafter acquired by such holder and will be irrevocable without the consent of the IRS. Upon receipt of an interest payment on such Foreign Currency Note (including, upon the sale of or other disposition such Foreign Currency Note, the receipt of proceeds that include amounts attributable to accrued interest previously included in income), the accrual basis U.S. Holder will recognize U.S. source ordinary income or loss in an amount equal to the difference between the U.S. dollar value of such payment (determined by translating any foreign currency received at the spot rate for such foreign currency on the date received) and the U.S. dollar value of the interest income that such U.S. Holder has previously included in income with respect to such payment, regardless of whether the payment is in fact converted into U.S. dollars.

Original Issue Discount

OID on a Foreign Currency Note will be determined for any accrual period in the applicable foreign currency and then translated into U.S. dollars in the same manner as interest income accrued by an accrual basis holder, as described above. Additionally, a U.S. Holder will recognize exchange gain or loss (which will be treated as ordinary income or loss) when the OID is paid (including, upon the sale, exchange, retirement or other disposition of such Foreign Currency Note, the receipt of proceeds that include amounts attributable to OID previously included in income) to the extent of the difference between the U.S. dollar value of such payment (determined by translating any foreign currency received at the spot rate for such foreign currency on the date of payment) and the U.S. dollar value of the accrued OID (determined in the same manner as for accrued interest). For these purposes, all receipts on a Foreign Currency Note will be viewed: first, as the receipt of any stated interest payments called for under the terms of the Foreign Currency Note; second, as receipts of previously

accrued OID (to the extent thereof), with payments considered made for the earliest accrual periods first; and third, as the receipt of principal.

Market Discount

The amount of market discount on Foreign Currency Notes includible in income will generally be determined by translating the market discount determined in the foreign currency into U.S. dollars at the spot rate on the date the Foreign Currency Note is retired or otherwise disposed of. If the U.S. Holder has elected to accrue market discount currently, then the amount which accrues is determined in the foreign currency and then translated into U.S. dollars on the basis of the average exchange rate in effect during such accrual period (or portion thereof within the U.S. Holder's taxable year), and the U.S. Holder will recognize exchange gain or loss with respect to market discount determined using the approach applicable to the accrual of interest income described above.

Amortizable Bond Premium

Bond premium on a Foreign Currency Note will be computed in the applicable foreign currency. With respect to a U.S. Holder that elects to amortize the premium, the amortizable bond premium will reduce interest income in the applicable foreign currency. At the time bond premium is amortized, exchange gain or loss (which is generally taxable as ordinary income or loss) will be realized based on the difference between spot rates at such time and at the time of acquisition of the Foreign Currency Note. A U.S. Holder that does not elect to amortize bond premium will translate the bond premium, computed in the applicable foreign currency, into U.S. dollars at the spot rate on the maturity date and such bond premium will constitute a market loss which may be offset or eliminated by exchange gain.

Sale, Exchange and Retirement or Other Disposition of Foreign Currency Notes

Upon the sale, exchange, retirement or other disposition of a Foreign Currency Note, a U.S. Holder generally will recognize gain or loss equal to the difference between the amount realized upon the sale, exchange, retirement or other disposition (less an amount equal to any accrued and unpaid interest, which will be treated as a payment of interest for U.S. federal income tax purposes) and the U.S. Holder's adjusted tax basis in the Foreign Currency Note.

If a U.S. Holder receives foreign currency on the sale, exchange, retirement or other disposition of a Foreign Currency Note, then the amount realized generally will be based on the spot rate of the foreign currency on the date of sale. For purchases and sales of Foreign Currency Notes traded on an established securities market as defined in applicable U.S. Treasury regulations by a cash method taxpayer, however, foreign currency paid or received is translated into U.S. dollars at the spot rate on the settlement date of the purchase or sale. An accrual method taxpayer may elect the same treatment with respect to the purchase and sale of Foreign Currency Notes traded on an established securities market, provided that the election is applied consistently from year to year. This election cannot be changed without the consent of the IRS.

A U.S. Holder's adjusted tax basis in a Foreign Currency Note generally will be the U.S. Holder's cost therefore, which, in the case of a U.S. Holder that purchases a Foreign Currency Note with foreign currency, will be the U.S. dollar value of the foreign currency amount paid for such Foreign Currency Note determined at the time of such purchase. If the Foreign Currency Notes are traded on an established securities market, as defined in applicable U.S. Treasury regulations, cash method taxpayers (and electing accrual method taxpayers) will determine the U.S. dollar cost of the Foreign Currency Note on the settlement date. A U.S. Holder that purchases a Foreign Currency Note with previously owned foreign currency will recognize U.S. source exchange gain or loss at the time of purchase attributable to the difference at the time of purchase, if any, between the U.S. Holder's tax basis in such foreign currency and the fair market value of the Foreign Currency Note in U.S. dollars on the date of purchase. Such gain or loss will be treated as ordinary income or loss.

Gain or loss recognized by a U.S. Holder on the sale, exchange, retirement or other disposition of a Foreign Currency Note will generally be treated as U.S. source gain or loss. Subject to the foreign currency rules discussed below, such gain or loss will be capital gain or loss and will be long-term capital gain or loss if at the

time of sale, exchange, retirement or other disposition, the Foreign Currency Note has been held for more than one year. Capital gains of individuals derived with respect to capital assets held for more than one year are eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations.

A U.S. Holder will recognize exchange gain or loss attributable to the movement in exchange rates between the time of purchase and the time of disposition (including the sale, exchange, retirement or other disposition) of a Foreign Currency Note. Such gain or loss will be treated as ordinary income or loss (and will not be taxable as interest income or expense, except to the extent provided in U.S. Treasury regulations or administrative pronouncements of the IRS) and generally will be U.S. source gain or loss. The realization of such gain or loss (including any exchange gain or loss attributable to interest or OID realized in connection with the disposition) will be limited to the amount of overall gain or loss realized on the disposition of a Foreign Currency Note.

Exchange Gain or Loss With Respect to Foreign Currency

A U.S. Holder's tax basis in foreign currency received as interest on (or OID with respect to), or received on the sale, exchange, retirement or other disposition of, a Foreign Currency Note will be the U.S. dollar value thereof at the spot rate at the time the holder received such foreign currency. As discussed above, if the Foreign Currency Notes are traded on an established securities market, a cash basis U.S. Holder (or, upon election, an accrual basis U.S. Holder) will determine the U.S. dollar value of the foreign currency by translating the foreign currency received at the spot rate of exchange on the settlement date of the sale. Accordingly, no foreign currency gain or loss will result from currency fluctuations between the trade date and settlement date of a sale. Any gain or loss recognized by a U.S. Holder on a sale, exchange, retirement or other disposition of foreign currency will be ordinary gain or loss and generally will be U.S. source gain or loss.

Non-U.S. Holders

Subject to the discussion of backup withholding and the Foreign Account Tax Compliance Act below, Non-U.S. Holders generally should not be subject to U.S. federal income or withholding tax on any payments on the notes and gain from the sale, exchange, retirement or other disposition of the notes unless: (i) that payment and/or gain is effectively connected with the conduct by that Non-U.S. Holder of a trade or business in the United States; (ii) in the case of any gain realized on the sale, exchange, retirement or other disposition of a note by an individual Non-U.S. Holder, that holder is present in the United States for 183 days or more in the taxable year of the sale, exchange, retirement or other disposition and certain other conditions are met; or (iii) the Non-U.S. Holder is subject to tax pursuant to provisions of the Code applicable to certain persons that have ceased to be U.S. citizens or lawful permanent residents of the United States.

Non-U.S. Holders should consult their own tax advisors regarding the U.S. federal income and other tax consequences of owning notes.

Information Reporting and Backup Withholding

In general, payments of principal, interest and accrued OID on, and the proceeds of a sale, exchange, retirement or other disposition of, the notes, by a U.S. paying agent or other U.S. intermediary will be reported to the IRS and to the U.S. Holder as may be required under applicable regulations. Backup withholding will apply to these payments, including payments of accrued OID, if the U.S. Holder fails to provide an accurate taxpayer identification number or certification of exempt status or otherwise fails to comply with the applicable certification requirements. Certain U.S. Holders are not subject to backup withholding. Non-U.S. Holders may be required to comply with applicable certification procedures to establish that they are not U.S. Holders in order to avoid the application of such information reporting requirements and backup withholding.

Tax Return Disclosure Requirements

U.S. Treasury regulations requiring the reporting of certain tax shelter transactions ("**Reportable Transactions**") could be interpreted to cover and require reporting of transactions that are generally not regarded

as tax shelters, including certain foreign currency transactions. Under these regulations, certain transactions may be characterized as Reportable Transactions based upon any of several indicia, including, in certain circumstances, a sale, exchange, retirement or other disposition of a Foreign Currency Note or foreign currency received in respect of a Foreign Currency Note to the extent that such sale, exchange, retirement or other disposition results in a tax loss in excess of a threshold amount. Persons considering the purchase of Foreign Currency Notes should consult with their tax advisors to determine the tax return obligations, if any, with respect to an investment in such notes, including any requirement to file IRS Form 8886 (Reportable Transaction Disclosure Statement).

Foreign Financial Asset Reporting

Certain U.S. Holders that own “specified foreign financial assets” that meet certain U.S. dollar value thresholds generally are required to file an information report with respect to such assets with their tax returns. The notes generally will constitute specified foreign financial assets subject to these reporting requirements unless the notes are held in an account at certain financial institutions (in which case the account may be reportable if maintained by a foreign financial institution). U.S. Holders are urged to consult their tax advisors regarding the application of these disclosure requirements to their ownership of the notes.

Foreign Account Tax Compliance Act

Pursuant to certain provisions of the Code, commonly known as the Foreign Account Tax Compliance Act (“**FATCA**”), a “foreign financial institution” may be required to withhold on certain payments it makes (“**foreign passthru payments**”) to persons that fail to meet certain certification, reporting, or related requirements. The Issuer is a foreign financial institution for these purposes. A number of jurisdictions (including the United Kingdom) have entered into, or have agreed in substance to, intergovernmental agreements with the United States to implement FATCA (“**IGAs**”), which modify the way in which FATCA applies in their jurisdictions. Under the provisions of IGAs as currently in effect, a foreign financial institution in an IGA jurisdiction would generally not be required to withhold under FATCA or an IGA from payments that it makes. Certain aspects of the application of the FATCA provisions and IGAs to instruments such as the notes, including whether withholding would ever be required pursuant to FATCA or an IGA with respect to payments on instruments such as the notes, are uncertain and may be subject to change. Even if withholding would be required pursuant to FATCA or an IGA with respect to payments on instruments such as the notes, such withholding would not apply prior to the date that is two years after the date on which final regulations defining foreign passthru payments are published in the U.S. Federal Register and notes characterized as debt (or which are not otherwise characterized as equity and have a fixed term) for U.S. federal tax purposes that are issued on or prior to the date that is six months after the date on which final regulations defining “foreign passthru payments” are filed with the U.S. Federal Register generally would be “grandfathered” for purposes of FATCA withholding unless materially modified after such date. However, if additional notes (as described under “*Terms and Conditions of the Notes—Additional Notes*”) that are not distinguishable from previously issued notes are issued after the expiration of the grandfathering period and are subject to withholding under FATCA, then withholding agents may treat all notes, including the notes offered prior to the expiration of the grandfathering period, as subject to withholding under FATCA. Holders should consult their own tax advisors regarding how these rules may apply to their investment in the notes. In the event any withholding would be required pursuant to FATCA or an IGA with respect to payments on the notes, no person will be required to pay additional amounts as a result of the withholding.

UK Taxation

The following is a summary of our understanding of current United Kingdom (“**UK**”) law and HM Revenue and Customs (“**HMRC**”) published practice (which may or may not be binding on HMRC) relating to the UK withholding taxation treatment as at the date of this Base Prospectus in relation to payments of principal and interest in respect of the notes issued by Nationwide and does not deal with other UK tax aspects of acquiring, holding or disposing of the notes. This summary relates only to the position of persons who are absolute beneficial owners of the notes. Prospective holders should be aware that the particular terms of issue of any series of the notes as specified in the relevant Final Terms may affect the tax treatment of that and other series of notes. This summary is a general guide and does not purport to be a complete analysis of all tax considerations relating to the notes, and you should treat it with appropriate caution.

The comments below are of a general nature and are not intended to be exhaustive. You should seek independent professional advice should you have any doubt as to your tax position. If you may be liable to taxation in jurisdictions other than the UK in respect of your acquisition, ownership, holding and disposition of notes, you are particularly advised to consult your professional advisors as to whether you are so liable (and if so under the laws of which jurisdictions), since the following comments relate only to certain UK taxation aspects of payments in respect of the notes. In particular, you should be aware that you may be liable to taxation under the laws of other jurisdictions in relation to payments in respect of the notes, even if such payments may be made without withholding or deduction for or on account of taxation under the laws of the UK.

The references to “interest” in this UK Taxation summary mean “interest” as understood in UK tax law. The statements in this summary do not take any account of any different definitions of “interest” or “principal” which may prevail under any other law or which may be created by the Terms and Conditions of the Notes or any related documentation. This description of the UK withholding tax position assumes that there will be no substitution of the Issuer of the notes pursuant to the Terms and Conditions of the Notes and does not consider the tax consequences of any such substitution.

UK Withholding Tax on Interest

Notes which are listed on a Recognized Stock Exchange

Notes issued by Nationwide which carry a right to interest will constitute “**quoted Eurobonds**” provided they are and continue to be listed on a recognized stock exchange within the meaning of section 1005 of the Income Tax Act 2007. The main market of the London Stock Exchange is a recognized stock exchange for those purposes. Securities will be treated as listed on the main market of the London Stock Exchange if they are included in the Official List (within the meaning of and in accordance with the provisions of Part 6 of the FSMA) and admitted to trading on the main market of the London Stock Exchange. Provided that the notes are and continue to be quoted Eurobonds, payments of interest on the notes may be made without withholding or deduction for or on account of UK income tax.

Other Cases

If the notes do not qualify as quoted Eurobonds, as described in “—*Notes which are listed on a Recognized Stock Exchange*”, and are capable of being listed on a recognized stock exchange at the time the interest on the notes becomes payable, interest on the notes will generally (subject to certain other exemptions which may be available in certain circumstances) be paid under deduction of UK income tax at the rate of (currently) 20%, subject to any direction to the contrary from HMRC in respect of such relief as may be available under the provisions of any applicable double taxation treaty.

Other Rules Relating to UK Withholding Tax

Where notes are to be, or may fall to be, redeemed at a premium, as opposed to being issued at a discount for tax purposes, then any such element of premium may constitute a payment of interest. The discount element on Notes which are issued at a discount will not generally constitute a payment of interest for these purposes. Payments of interest are subject to UK withholding tax as outlined above.

In addition to the above, in relation to UK withholding tax, where interest has been paid under deduction of UK income tax, holders of notes who are not resident in the UK may be able to recover all or part of the tax deducted if there is an appropriate provision in any applicable double taxation treaty.

TRANSFER RESTRICTIONS

We have not registered the notes under the Securities Act or any other applicable securities laws, and they may not be offered or sold except pursuant to an effective registration statement or in accordance with an applicable exemption from the registration requirements of the Securities Act. Accordingly, the notes are being offered and sold only:

- in the United States, to qualified institutional buyers, commonly referred to as “QIBs,” in reliance on the exemption from the registration requirements of the Securities Act provided by Rule 144A; or
- outside of the United States, to certain persons, other than U.S. persons within the meaning of Regulation S, in offshore transactions meeting the requirements of Rule 903 of Regulation S.

Purchasers’ Representations and Restrictions on Resale

Each purchaser of notes (other than a Placement Agent in connection with the initial issuance and sale of notes) and each owner of any beneficial interest therein, will be deemed, by its acceptance or purchase thereof, to have represented and agreed as follows:

- (1) It is purchasing the notes for its own account or an account with respect to which it exercises sole investment discretion and it and any such account is either (a) a QIB, and is aware that the sale to it is being made in reliance on Rule 144A or (b) a non-U.S. person that is outside the United States within the meaning of Regulation S;
- (2) It is not an “affiliate” (as defined in Rule 144 under the Securities Act (“**Rule 144**”)) of the Issuer and is not acting on the Issuer’s behalf;
- (3) It acknowledges that the notes have not been and will not be registered under the Securities Act or with any securities regulatory authority of any jurisdiction and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except as set forth below;
- (4) It understands and agrees that notes initially offered in the United States to QIBs will be represented by U.S. Global Notes and that notes offered outside the United States to non-U.S. persons in reliance on Regulation S will be represented by International Global Notes;
- (5) If the purchaser is in the United States or is a U.S. person, it shall not resell or otherwise transfer any of such notes except (a) to Nationwide or a Placement Agent or by, through, or in a transaction approved by a Placement Agent, (b) within the United States to a QIB in a transaction complying with Rule 144A under the Securities Act, (c) outside the United States, in compliance with Rule 903 or 904 of Regulation S under the Securities Act, (d) pursuant to the exemption from registration provided by Rule 144 (if available) or (e) pursuant to an effective registration statement under the Securities Act;
- (6) If the purchaser is outside the United States and is not a U.S. person, if it should resell or otherwise transfer the notes prior to the expiration of the Distribution Compliance Period (as defined in Regulation S) applicable to such notes, it will do so only (a) outside the United States in compliance with Rule 903 or 904 of Regulation S under the Securities Act or (b) to a QIB in compliance with Rule 144A;
- (7) It agrees that it will give to each person to whom it transfers the notes notice of any restrictions on transfer of such notes;

- (8) It acknowledges that prior to any proposed transfer of notes (other than pursuant to an effective registration statement) the holder of such notes may be required to provide certifications relating to the manner of such transfer as provided in the Indenture;
- (9) It acknowledges that the Trustee for the notes will not be required to accept for registration transfer of any notes acquired by it, except upon presentation of evidence satisfactory to Nationwide and such Trustee that the restrictions set forth herein have been complied with; and
- (10) It acknowledges that Nationwide, the Placement Agents and others will rely upon the truth and accuracy of the foregoing acknowledgements, representations and agreements and agrees that if any of the acknowledgements, representations and agreements deemed to have been made by its purchase of the notes are no longer accurate, it shall promptly notify Nationwide and the Placement Agents. If it is acquiring the notes as a fiduciary or agent for one or more investor accounts, it represents that it has sole investment discretion with respect to each such account and it has full power to make the foregoing acknowledgements, representations, and agreements on behalf of each account.

A legend to the following effect will appear on the face of notes, other than International Global Notes, and which will be used to notify transferees of the foregoing restrictions on transfer. Additional copies of this notice may be obtained from the Trustee.

“THE SECURITIES EVIDENCED HEREBY (THE “**NOTES**”) HAVE NOT BEEN REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE “**U.S. SECURITIES ACT**”), OR ANY OTHER SECURITIES LAWS OF ANY STATE OR OTHER JURISDICTION. THE HOLDER HEREOF, BY PURCHASING THE NOTES, (1) REPRESENTS THAT IT IS A “QUALIFIED INSTITUTIONAL BUYER” (AS DEFINED IN RULE 144A UNDER THE U.S. SECURITIES ACT (“**RULE 144A**”)), (2) AGREES ON ITS OWN BEHALF AND ON BEHALF OF ANY INVESTOR ACCOUNT FOR WHICH IT HAS PURCHASED NOTES THAT IT WILL NOT OFFER, SELL, PLEDGE OR OTHERWISE TRANSFER THE NOTES EXCEPT (I) TO THE ISSUER OR ONE OR MORE PLACEMENT AGENTS FOR THE NOTES (EACH, A “**PLACEMENT AGENT**” AND COLLECTIVELY, THE “**PLACEMENT AGENTS**”) OR BY, THROUGH OR IN A TRANSACTION APPROVED BY A PLACEMENT AGENT, (II) SO LONG AS THE NOTES ARE ELIGIBLE FOR RESALE PURSUANT TO RULE 144A, TO A PERSON WHO THE SELLER REASONABLY BELIEVES IS A QUALIFIED INSTITUTIONAL BUYER (AS DEFINED IN RULE 144A) IN ACCORDANCE WITH RULE 144A, (III) IN AN OFFSHORE TRANSACTION IN ACCORDANCE WITH RULE 903 OR 904 OF REGULATIONS UNDER THE U.S. SECURITIES ACT, (IV) PURSUANT TO AN EXEMPTION FROM REGISTRATION UNDER THE U.S. SECURITIES ACT PROVIDED BY RULE 144 (IF AVAILABLE), (V) PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT UNDER THE U.S. SECURITIES ACT OR (VI) PURSUANT TO ANY OTHER AVAILABLE EXEMPTION FROM THE REGISTRATION REQUIREMENTS OF THE U.S. SECURITIES ACT, AND IN EACH OF SUCH CASES IN ACCORDANCE WITH ANY APPLICABLE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES OR ANY OTHER APPLICABLE JURISDICTION. THE HOLDER OF THE NOTES, BY PURCHASING THE NOTES, REPRESENTS AND AGREES FOR THE BENEFIT OF THE ISSUER THAT IT WILL NOTIFY ANY PURCHASER OF THE NOTES FROM IT OF THE RESALE RESTRICTIONS REFERRED TO ABOVE. THE ISSUER SHALL HAVE THE RIGHT PRIOR TO ANY OFFER, SALE OR TRANSFER PURSUANT TO CLAUSE (VI) ABOVE, TO REQUIRE THE DELIVERY OF AN OPINION OF COUNSEL, CERTIFICATIONS AND/OR OTHER INFORMATION SATISFACTORY TO THE ISSUER. AS USED HEREIN, THE TERMS “OFFSHORE TRANSACTION,” “UNITED STATES” AND “U.S. PERSON” HAVE THE MEANINGS GIVEN TO THEM BY REGULATIONS UNDER THE U.S. SECURITIES ACT.”

“THE FOREGOING LEGEND MAY BE REMOVED FROM THIS NOTE ON SATISFACTION OF THE CONDITIONS SPECIFIED IN THE INDENTURE REFERRED TO HEREIN.”

A legend to the following effect will appear on the face of the International Global Notes.

“THE SECURITIES EVIDENCED HEREBY (THE “**NOTES**”) HAVE NOT BEEN AND WILL NOT BE REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE “**SECURITIES ACT**”), OR ANY OTHER APPLICABLE U.S. STATE SECURITIES LAWS AND, ACCORDINGLY, MAY NOT BE OFFERED OR SOLD WITHIN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, U.S. PERSONS EXCEPT PURSUANT TO AN EXEMPTION FROM REGISTRATION UNDER THE SECURITIES ACT.”

For further discussion of the requirements (including the presentation of transfer certificates) under the Indenture to effect exchanges or transfers of interest in global notes and certificated notes, see the subsection entitled “*Terms and Conditions of the Notes—Form, Transfer, Exchange and Denomination.*”

PLAN OF DISTRIBUTION

The notes are being offered on a continuous basis for sale by us to or through Barclays Capital Inc., BofA Securities, Inc., Deutsche Bank Securities Inc., Citigroup Global Markets Inc., Credit Suisse Securities (USA) LLC, HSBC Securities (USA) Inc., J.P. Morgan Securities LLC, Morgan Stanley & Co. LLC, NatWest Markets Securities Inc., UBS Securities LLC and Wells Fargo Securities, LLC together with such other Placement Agent as may be appointed by us with respect to a particular tranche of notes. We refer collectively to these entities as the "Placement Agents." One or more Placement Agents may purchase notes, as principal, from us from time to time for resale to investors and other purchasers at varying prices relating to prevailing market prices at the time of resale as determined by any Placement Agent, or, if so specified in the applicable Final Terms, for resale at a fixed offering price. If we and a Placement Agent agree, a Placement Agent may also utilize its reasonable efforts on an agency basis to solicit offers to purchase the notes. Any Placement Agents of the notes that are not U.S. registered broker-dealers will agree that they will offer and sell the notes within the United States only through U.S. registered broker-dealers. Unless otherwise described in the applicable Final Terms, we will pay a commission to a Placement Agent depending upon its stated maturity for notes sold through such Placement Agent as agent. Commissions with respect to notes with stated maturities in excess of 30 years that are sold through a Placement Agent as an agent of ours will be negotiated between us and that Placement Agent at the time of such sale.

Unless otherwise specified in the applicable Final Terms, any notes sold to one or more Placement Agents as principal will be purchased by such Placement Agents at a price equal to 100% of the principal amount thereof less a percentage of the principal amount equal to the commission applicable to an agency sale of a note of identical maturity. A Placement Agent may sell notes it has purchased from us as principal to certain dealers less a concession equal to all or any portion of the discount received in connection with such purchase. The Placement Agent may allow, and such dealers may re-allow, a discount to certain other dealers. After the initial offering of notes, the offering price (in the case of notes to be resold at a fixed offering price), the concession and the reallocation may be changed.

We may withdraw, cancel or modify the offering contemplated hereby without notice and may reject offers to purchase notes in whole or in part. Each Placement Agent shall have the right to reject in whole or in part any offer to purchase notes received by it on an agency basis.

In connection with an offering of notes purchased by one or more Placement Agents as principal on a fixed offering price basis, such Placement Agent(s) will be permitted to engage in transactions that stabilize the price of notes. These transactions may consist of bids or purchases for the purpose of pegging, fixing or maintaining the price of notes. If the Placement Agent creates or the Placement Agents create, as the case may be, a short position in notes, that is, if it sells or they sell notes in an aggregate principal amount exceeding that set forth in the applicable Final Terms, such Placement Agent(s) may reduce that short position by purchasing notes in the open market. In general, purchase of notes for the purpose of stabilization or to reduce a short position could cause the price of notes to be higher than it might be in the absence of such purchases.

Neither we nor any of the Placement Agents makes any representation or prediction as to the direction or magnitude of any effect that the transactions described in the immediately preceding paragraph may have on the price of notes. In addition, neither we nor the Placement Agents makes any representation that the Placement Agents will engage in any such transactions or that such transactions, once commenced, will not be discontinued without notice.

We have agreed to indemnify the Placement Agents against some liabilities (including liabilities under the Securities Act) or to contribute to payments the Placement Agents may be required to make in respect thereof. We have also agreed to reimburse the Placement Agents for some other expenses.

The Placement Agents may from time to time purchase and sell notes in the secondary market, but they are not obligated to do so and may discontinue any such activities at any time and there can be no assurance that there will be a secondary market for the notes or liquidity in the secondary market if one develops. From time to time, the Placement Agents may make a market in the notes.

The Placement Agents and certain of their affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, financial and brokerage activities. Certain of the Placement Agents and/or their affiliates have, directly or indirectly, performed investment and commercial banking or financial advisory services for us, for which they have received customary fees and commissions, and they expect to provide these services to us and our affiliates in the future, for which they also expect to receive customary fees and commissions.

In the ordinary course of their various business activities, the Placement Agents and certain of their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers, and such investment and securities activities may involve securities and/or instruments of the issuer or its affiliates. If the Placement Agents or their affiliates have a lending relationship with us, certain of the Placement Agents or their affiliates may hedge their credit exposure to us consistent with their customary risk management policies. Typically, the Placement Agents and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short position in our securities or the securities of our affiliates, including potentially the notes offered hereby. Any such credit default swaps or short positions could adversely affect future trading prices of the notes offered hereby. The Placement Agents and certain of their affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

United States

Each Placement Agent subscribing for or purchasing notes will be required to represent and agree (i) that it will not offer or sell notes (a) as part of its distribution at any time or (b) otherwise until 40 days after the completion of the distribution, as determined and certified by the relevant Placement Agent or, in the case of an issue of notes on a syndicated basis, the relevant lead manager, of all notes of the tranche of which such notes are a part (such period, the “**Distribution Compliance Period**”), within the United States or to, or for the account or benefit of, U.S. persons other than in accordance with Rule 144A and (ii) that it will send to each dealer to which it sells any notes during the Distribution Compliance Period a confirmation or other notice setting forth the restrictions on offers and sales of the notes within the United States or to, or for the account or benefit of, U.S. persons. Terms used in this paragraph have the meanings given to them by Regulation S.

United Kingdom

Each Placement Agent subscribing for or purchasing notes agrees and each further placement agent appointed under the medium-term note program described in this Base Prospectus that subscribes for or purchases notes will be required to represent and agree that:

- (1) it has complied and will comply with all applicable provisions of the UK Financial Services and Markets Act 2000, as amended (the “**FSMA**”), with respect to anything done by it in relation to any notes in, from or otherwise, involving the UK; and
- (2) it has only communicated or caused to be communicated and it will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) received by it in connection with the issue or sale of the notes in circumstances in which section 21(1) of the FSMA, as amended would not, if Nationwide was not an authorized person, apply to Nationwide.

Prohibition of sales to EEA retail investors

Unless the Final Terms in respect of any notes specifies “*Prohibition of Sales to EEA Retail Investors*” as “*Not Applicable*”, each Placement Agent has represented and agreed, and each further placement agent appointed under the medium-term note program described in this Base Prospectus will be required to represent

and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any notes which are the subject of the offering contemplated by this Base Prospectus as completed by the Final Terms in relation thereto to any retail investor in the European Economic Area. For the purposes of this provision:

- (a) the expression “**retail investor**” means a person who is one (or more) of the following:
 - (1) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “**MiFID II**”); or
 - (2) a customer within the meaning of Directive (EU) 2016/97, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or
 - (3) not a qualified investor as defined in Regulation (EU) 2017/1129; and
- (b) the expression an “**offer**” includes the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe for the notes.

Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “**EU PRIIPs Regulation**”) for offering or selling the notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the notes or otherwise making them available to any retail investor in the EEA may be unlawful under the EU PRIIPs Regulation.

Prohibition of sales to UK retail investors

Unless the Final Terms in respect of any notes specifies “*Prohibition of Sales to UK Retail Investors*” as “*Not Applicable*”, each Placement Agent has represented and agreed, and each further placement agent appointed under the medium-term note program described in this Base Prospectus will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any notes which are the subject of the offering contemplated by this Base Prospectus as completed by the Final Terms in relation thereto to any retail investor in the UK. For the purposes of this provision:

- (a) the expression “**retail investor**” means a person who is one (or more) of the following:
 - (1) a retail client as defined in point (8) of Article (2) of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the EUWA;
 - (2) a customer within the meaning of the provisions of FSMA and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of EUWA; or
 - (3) not a qualified investor as defined in Article 2 of the UK Prospectus Regulation; and
- (b) the expression “**offer**” includes the communication in any form and by any means of sufficient information on the terms of the offer and the notes to be offered so as to enable an investor to decide to purchase or subscribe for the notes.

Consequently, no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the “**UK PRIIPs Regulation**”) for offering or selling the notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

Australia

This Base Prospectus and offers of notes are only made available in Australia to persons to whom a disclosure document such as a prospectus or product disclosure statement is not required to be given under either Chapter 6D or Part 7.9 of the Australian Corporations Act 2001 (Cth) (the Australian Corporations Act). This document is not a prospectus, product disclosure or any other form of formal “disclosure document” for the purposes of Australian law, and is not required to, and does not, contain all the information which would be required in a product disclosure statement or prospectus under Australian law. No prospectus or other disclosure document (as defined in the Australian Corporations Act) in relation to the medium-term note program described in this Base Prospectus or any notes has been, or will be, lodged with the Australian Securities and Investments Commission (ASIC), or the ASX Limited or any other regulatory body or agency in Australia. The persons referred to in this document may not hold Australian financial services licenses and may not be licensed to provide financial product advice in relation to the securities. No cooling off regime applies to an acquisition of the notes. In no circumstances is this document to be used by a “retail client” (for the purposes of the Australian Corporations Act) for the purposes of making a decision about a financial product.

This Base Prospectus contains general advice only and does not take into account the investment objectives, financial situations or needs of any particular person.

Each purchaser of notes (other than a Placement Agent in connection with the initial issuance and sale of notes) and each owner of any beneficial interest therein, will be deemed, by its acceptance or purchase thereof, to have represented and agreed that, unless the relevant Final Terms (or a relevant supplement to this Base Prospectus) otherwise provides, it:

(a) has not made or invited, and will not make or invite, an offer of the notes for issue or sale in Australia (including an offer or invitation which is received by a person in Australia); and

(b) has not distributed or published, and will not distribute or publish, this Base Prospectus or any other offering material or advertisement relating to the notes in Australia,

unless:

A. the aggregate consideration payable by each offeree is at least A\$500,000 (or its equivalent in an alternative currency, in either case, disregarding moneys lent by the offeror or its associates) or the offer or invitation does not otherwise require disclosure to investors under Parts 6D.2 or 7.9 of the Australian Corporations Act;

B. the offer or invitation does not constitute an offer to a “retail client” for the purposes of section 761G and 761GA of the Australian Corporations Act;

C. such action complies with any applicable laws, regulations and directives (including without limitation, the licensing requirements set out in Chapter 7 of the Australian Corporations Act) in Australia; and

D. such action does not require any document to be lodged with ASIC.

There may be restrictions on the offer for re-sale of any notes in Australia for a period of 12 months after their issue. Because of these restrictions, investors are advised to consult legal counsel prior to making any offer for re-sale of any notes in Australia.

Canada

Each purchaser of notes (other than a Placement Agent in connection with the initial issuance and sale of notes) and each owner of any beneficial interest therein, will be deemed, by its acceptance or purchase thereof, to have represented and agreed that the notes may be sold only to purchasers in Canada purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National

Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the notes must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Hong Kong

Each purchaser of notes (other than a Placement Agent in connection with the initial issuance and sale of notes) and each owner of any beneficial interest therein, will be deemed, by its acceptance or purchase thereof, to have represented and agreed that:

A. it has not offered or sold and will not offer or sell in Hong Kong, by means of any document, any Notes except for notes which are a “structured product” as defined in the Securities and Futures Ordinance (Cap. 571) of Hong Kong (the SFO) other than (a) to “professional investors” as defined in the SFO and any rules made under the SFO; or (b) in other circumstances which do not result in the document being a “prospectus” as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32) of Hong Kong (the C(WUMP)O) or which do not constitute an offer to the public within the meaning of the C(WUMP)O; and

B. it has not issued or had in its possession for the purposes of issue, and will not issue or have in its possession for the purposes of issue, whether in Hong Kong or elsewhere, any advertisement, invitation or document relating to the notes, which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to notes which are or are intended to be disposed of only to persons outside Hong Kong or only to “professional investors” as defined in the SFO and any rules made under the SFO.

Japan

The notes have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended, the FIEA). Accordingly, each purchaser of notes (other than a Placement Agent in connection with the initial issuance and sale of notes) and each owner of any beneficial interest therein, will be deemed, by its acceptance or purchase thereof, to have represented and agreed that it has not and will not offer or sell any notes, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan as defined under Item 5, Paragraph 1, Article 6 of the Foreign Exchange and Foreign Trade Act (Act No. 228 of 1949, as amended), or to others for reoffering or resale, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with the FIEA and any other applicable laws, regulations and ministerial guidelines of Japan.

Singapore

Each purchaser of notes (other than a Placement Agent in connection with the initial issuance and sale of notes) and each owner of any beneficial interest therein, will be deemed, by its acceptance or purchase thereof, to have acknowledged that this Base Prospectus has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, each purchaser of notes (other than a Placement Agent in connection with the initial issuance and sale of notes) and each owner of any beneficial interest therein, will be deemed, by its acceptance or purchase thereof, to have represented and agreed that it has not offered or sold any notes or caused the notes to be made the subject of an invitation for subscription or purchase and will not offer or sell any notes or cause the notes to be made the subject of an invitation for subscription or purchase, and has not circulated or distributed, nor will it circulate or distribute, this Base Prospectus or any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the notes, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act (Chapter 289) of Singapore, as modified or amended from time to time (the “SFA”)) pursuant to Section 274 of the SFA (ii) to a relevant person (as defined in Section 275(2) of the SFA) pursuant to Section 275(1) of the SFA, or any person pursuant to Section 275(1A) of the SFA, and in accordance with the conditions specified in Section 275 of the SFA or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where notes are subscribed or purchased under Section 275 of the SFA by a relevant person which is:

(a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or

(b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor,

securities or securities-based derivatives contracts (each term as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the notes pursuant to an offer made under Section 275 of the SFA except:

A. to an institutional investor or to a relevant person defined in Section 275(2) of the SFA, or to any person arising from an offer referred to in Section 275(1A) or Section 276(4)(i)(B) of the SFA;

B. where no consideration is or will be given for the transfer;

C. where the transfer is by operation of law;

D. as specified in Section 276(7) of the SFA; or

(v) as specified in Regulation 37A of the Securities and Futures (Offers of Investments) (Securities and Securities-based Derivatives Contracts) Regulations 2018.

In connection with Section 309B of the SFA and the CMP Regulations 2018, the Issuer has, unless otherwise specified before an offer of notes, determined the classification of all notes to be issued under the medium-term note program described in this Base Prospectus as prescribed capital markets products (as defined in the CMP Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Switzerland

Each purchaser of notes (other than a Placement Agent in connection with the initial issuance and sale of notes) and each owner of any beneficial interest therein, will be deemed, by its acceptance or purchase thereof, to have represented and agreed that, except where explicitly permitted by the relevant Final Terms:

(i) except as set out below, it will not make a public offer of the notes, directly or indirectly, in Switzerland, as such terms are defined or interpreted under the Swiss Financial Services Act ("**FinSA**");

(ii) the notes will not be admitted by it to trading on a trading venue (exchange or multilateral trading facility) in Switzerland;

(iii) it will not offer, sell, advertise or distribute the notes, directly or indirectly, in Switzerland, as such terms are defined or interpreted under the FinSA, except to professional clients as such term is defined or interpreted under the FinSA (the "**Professional Investors**"); and

(iv) no key information document pursuant to article 58(1) FinSA (or any equivalent document under the FinSA) has been or will be prepared in relation to any Notes and, therefore, any notes with a derivative character within the meaning of article 86(2) of the Swiss Financial Services Ordinance may not be offered or recommended to private clients within the meaning of the FinSA in Switzerland.

The notes may not be publicly offered, directly or indirectly, in Switzerland, except (i) to Professional Investors or (ii) in the case of notes, the Final Terms of which explicitly permit a public offer in Switzerland. Offering or marketing material relating to notes, the Final Terms of which do not explicitly permit a public offer in Switzerland, may not be distributed or otherwise made available in Switzerland, except to Professional Investors.

The notes shall not be admitted to trading on a trading venue (exchange or multilateral trading facility) in Switzerland except in the case of notes, the Final Terms of which explicitly provide for such an admission to trading in Switzerland.

The notes do not constitute participations in a collective investment scheme within the meaning of the Swiss Collective Investment Schemes Act (“**CISA**”). Therefore, the notes are not subject to the approval of, or supervision by, the Swiss Financial Market Supervisory Authority (“**FINMA**”), and investors in the notes will not benefit from protection under the CISA or supervision by FINMA.

SETTLEMENT

Unless otherwise agreed between the relevant Placement Agents and Nationwide, you must pay the purchase price of the notes in immediately available funds in the applicable specified currency in New York City five U.S. business days (as such term is used for purposes of Rule 15c6-1 of the U.S. Securities Exchange Act of 1934, as amended (the “**Exchange Act**”)) after the trade date (such settlement cycle being referred to as “T+5”). Under Rule 15c6-1 of the Exchange Act, trades in the secondary market generally are required to settle in two business days unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the securities on the date of pricing or the next two succeeding business days will be required, by virtue of the fact that the securities initially will settle in T+5 to specify an alternative settlement cycle at the time of any such trade to prevent failed settlement. Purchasers of the securities who wish to make such trades should consult their own advisors.

INDEPENDENT AUDITORS

The financial statements as at April 4, 2021 and 2020, and for the years then ended, incorporated by reference in this Base Prospectus, have been audited by Ernst & Young LLP, independent auditors, as stated in their reports incorporated by reference herein.

The financial statements as at April 4, 2019 and for the year then ended, incorporated by reference in this Base Prospectus, have been audited by PricewaterhouseCoopers LLP, independent auditors, as stated in their reports incorporated by reference herein.

LEGAL MATTERS

Certain legal matters will be passed upon for us by Allen & Overy LLP, our United States and English counsel, with respect to matters of New York law, U.S. federal law and English law and for the Placement Agents by Linklaters LLP, London, England with respect to matters of New York law, U.S. federal law and English law.

GENERAL INFORMATION

1. Our principal office is Nationwide House, Pipers Way, Swindon SN38 1NW, England.
2. The admission of the medium-term note program described in this Base Prospectus to trading on the main market of the London Stock Exchange is expected to take effect on or around July 5, 2021. The price of the notes on the price list of the London Stock Exchange will be expressed as a percentage of their principal amount (exclusive of accrued interest). Any series of notes will be admitted to trading on the main market of the London Stock Exchange upon submission to the London Stock Exchange of the relevant Final Terms and any other information required by the London Stock Exchange, subject to the issue of the relevant notes. Prior to admission to trading, dealings will be permitted by the London Stock Exchange in accordance with its rules. Transactions will normally be effected for delivery on the third working day in New York after the day of the transaction, unless otherwise agreed between the relevant Placement Agents and Nationwide.
3. The Global Notes have been accepted for clearance through DTC or its nominees. If the Global Notes are to clear through an additional or alternative clearing system the appropriate information will be specified in the relevant Final Terms.
4. Any indication of yield given in any Final Terms will be calculated at the Issue Date for the relevant notes on the basis of the issue price. It is not an indication of future yield.
5. There are no governmental, legal or arbitration proceedings (including any proceedings which are pending or threatened) of which Nationwide or its subsidiaries is aware in the 12 months preceding the date of this document which may have or have had in the recent past a significant effect on the financial position or profitability of Nationwide or its subsidiaries.
6. Since September 30, 2021, being the date to which our most recent unaudited consolidated interim financial statements have been prepared, there has been no significant change in the financial performance or financial position of Nationwide and its subsidiaries. There has been no material adverse change in our prospects since April 4, 2021.
7. For so long as the medium-term note program described in this Base Prospectus remains in effect or any notes shall be outstanding, copies and, where appropriate, the following documents may be inspected at <https://www.nationwide.co.uk/about/investor-relations/funding-programmes/us-mtn-programme>:
 - (a) our constitutive documents;
 - (b) this Base Prospectus in relation to the senior and subordinated medium-term note program together with any amendments;
 - (c) the Private Placement Agency Agreement;
 - (d) the Indenture;
 - (e) our most recent publicly available audited consolidated financial statements beginning with such financial statements as of and for the years ended April 4, 2021, 2020 and 2019;
 - (f) the audit report of EY in respect of our audited consolidated financial statements as of and for the year ended April 4, 2021; and
 - (g) any Final Terms relating to notes issued under the medium-term note program described in this Base Prospectus.
8. There are no material contracts having been entered into outside the ordinary course of our business, and which could result in any group member being under an obligation or entitlement that is material to our ability to meet our obligation to noteholders in respect of the notes being issued.

9. Issue of notes under the medium-term note program described in this Base Prospectus have been authorized by resolutions of our Board of Directors passed on March 17, 2021 and minutes of delegation of our Chief Financial Officer dated April 14, 2021.

GLOSSARY OF FINANCIAL TERMS

Certain financial terminology used by building societies in the UK differs from that used by financial institutions in the United States. The following is a summary of such differences as they relate to our consolidated financial statements. We have used some of the following U.S. terms and descriptions throughout this Base Prospectus.

UK Term used in financial statements	U.S. equivalent or brief description
Accounts	Financial statements
Allotted	Issued
Amounts written off	Amounts charged off, or written-off
Cash in hand	Cash
Debt securities in issue	Debt
Fees and commissions payable	Fees and commissions expense
Fees and commissions receivable	Fees and commissions income
Freehold	Ownership with absolute rights in perpetuity
General reserve	Retained earnings
Income and Expenditure Account	Income Statement
Interest payable	Interest expense
Interest receivable	Interest income
Life assurance	Life insurance
Loans and advances	Loans or Lendings
Loans fully secured on residential property	Residential mortgage loans
Loans in arrears	Past due loans
Loans in repossession	Acquired property, foreclosed assets or Other Real Estate Owned
Loans with interest suspended	Loans in non-accrual status
Permanent interest bearing shares and subscribed capital	No direct U.S. equivalent
Profit	Income
Provisions for bad and doubtful debts (in the balance sheet)	Allowance for loan losses
Provisions for bad and doubtful debts (in the income statement)	Provisions for loan losses
Revaluation reserve	No direct U.S. equivalent
Shares (UK retail member deposits)	No direct U.S. equivalent
Tangible fixed assets	Property, Plant & Equipment or Fixed Assets
