\* This financial results release is not subject to the quarterly review.

\* Explanation of earnings forecasts and other notes:

NTT Group has applied International Financial Reporting Standards (“IFRS”) beginning with the three months ended June 30, 2018. In addition, consolidated financial statements for the nine months ended December 31, 2017 and for the fiscal year ended March 31 2018 are also presented in accordance with IFRS.

Forward-looking statements in this earnings release, such as forecasts of results of operations, are based on the information currently available to NTT and certain assumptions that we regard as reasonable and therefore actual results may differ materially from those contained in or suggested by any forward-looking statements. With regard to the assumptions and other related matters concerning forecasts for the fiscal year ending March 31, 2019, please refer to page 32.

On Thursday, February 7, 2019, NTT will hold a presentation on its financial results for institutional investors and analysts. Shortly thereafter, NTT plans to post on its website explanatory details, along with the materials used at the presentation.

For further details on the financial results forecasts, please also see “Financial Results for the Nine Months Ended December 31, 2018,” which has been disclosed on TDnet on the same day as this financial results release.

## 1. Summary Information (notes)

- (1) Change in significant consolidated subsidiaries during the nine months ended December 31, 2018, that resulted in changes in the scope of consolidation: Yes

As part of its initiatives for the future growth of NTT Group's global business, in November 2018, NTT transferred shares it held of NTT Communications, Dimension Data, NTT DATA and other companies to NTT, Inc., a wholly owned subsidiary of NTT Group, through contributions-in-kind. As a result, NTT, Inc. became a specified subsidiary of NTT and was included in the scope of NTT's consolidated subsidiaries beginning with the nine months ended December 31, 2018.

As part of its initiatives for the promotion of NTT Group's urban solutions business, in December 2018, NTT transferred shares it held of NTT Urban Development to NTT-SH Corporation, a wholly owned subsidiary of NTT Group, through contributions-in-kind. As a result, NTT-SH Corporation became a specified subsidiary of NTT and was included in the scope of NTT's consolidated subsidiaries beginning with the nine months ended December 31, 2018.

- (2) Adoption of accounting which is simplified or exceptional for quarterly consolidated financial statements: None

- (3) Changes in Accounting Policy

NTT Group has applied IFRS 9, "Financial Instruments" (as published in July 2014) beginning of the fiscal year ending March 31, 2019 (April 1, 2018).

Based on exemptions under IFRS 1, previous fiscal years have not been restated when changing accounting policies pursuant to IFRS 9. The accounting standards in use as of the date of transition to IFRS and in previous fiscal years were generally accepted accounting principles in the United States ("U.S. GAAP").

Following this change in accounting policy, equity instruments whose fair value was not easily determined under conventional U.S. GAAP (under which they were measured using the cost method) will be measured at fair value at the beginning of the current fiscal year. As of the point that IFRS 9 was applied pursuant to IFRS 1, after making the irrevocable election that all subsequent changes in fair value must also be recorded as "other comprehensive income," any changes in fair value will be recognized as "other comprehensive income" in the condensed consolidated statement of comprehensive income.

### Impact of this change on the consolidated statement of financial position:

(Millions of yen)

Accounting Item (Categories based on U.S. GAAP)	Balance at the end of previous fiscal year (March 31, 2018)	Balance at the beginning of current fiscal year based on IFRS 9 (April 1, 2018)	Correction Factor
Non-current assets			
Other financial assets (Investment using cost method)	54,364	67,258	Impact of using fair value measurements for unlisted stocks

Excluding the above-mentioned correction factor, the impact of this accounting policy change was not material.

### Cumulative impact at the beginning of the current fiscal year as a result of the application of IFRS 9

(Millions of yen)

Accounting Item	Increase (Decrease)
Investments accounted for using equity method	4,993
Other financial assets (Non-current)	20,883
Deferred tax assets	(5,912)
Deferred tax liabilities	963
Retained earnings	14,033
Other components of equity	(2,432)
Non-controlling interests	7,565

The impact on "profit" and "basic earnings per share" for the nine months ended December 31, 2018 were not material.

#### **(4) Going Concern Assumption**

None

#### **(5) Subsequent Events**

##### NTT's repurchase of its common stock

On November 6, 2018, the Board of Directors resolved that NTT may acquire up to 36 million shares of its outstanding common stock for an amount in total not exceeding ¥150 billion from November 7, 2018 through March 29, 2019. Based on this resolution, NTT repurchased 29,473,000 shares of its common stock for a total purchase price of ¥134,651 million between November 2018 and December 2018. NTT also repurchased 3,395,000 shares of its common stock for a total purchase price of ¥15,349 million in January 2019 and concluded the repurchase of its common stock authorized by Board of Directors' resolution.

## **(6) First-time Adoption of International Financial Reporting Standards (“IFRS”)**

### Transition to Financial Reporting in Accordance with IFRS

NTT Group has applied IFRS beginning with the three months ended June 30, 2018 (April 1, 2018 to June 30, 2018).

IFRS 1 requires that a company adopting IFRS for the first time applies IFRS retrospectively. However, as an exception under IFRS 1, retrospective application is prohibited for certain standards, for which application of IFRS is made from the date of transition to IFRS and thereafter. Additionally, under IFRS 1, certain exemption provisions may be voluntarily applied for certain standards required by IFRS. The effect of applying these provisions has been recognized at the date of transition to IFRS and an adjustment for the impact has been made within Retained earnings or Other components of equity.

The main voluntary exemption provisions stipulated in IFRS 1 and applied by NTT Group are described below.

#### ① Business Combinations

NTT Group has not applied IFRS 3 retrospectively to business combinations arising prior to April 1, 2002. Goodwill resulting from business combinations arising prior to April 1, 2002 has been recognized using the carrying amount based on U.S. GAAP. For goodwill generated by business combinations that occurred prior to the date of transition to IFRS, an impairment test was implemented as of the date of transition to IFRS, regardless of whether there is any indication of impairment.

#### ② Deemed Cost

NTT Group, for certain property, plant and equipment and investment property, uses the fair value as of the date of transition to IFRS that is a surrogate for cost at that date as the deemed cost.

#### ③ Operating Revenues

NTT Group has retrospectively applied IFRS 15 through the practical expedient set out in (d) under paragraph C5 of IFRS 15. In accordance with the provisions of the standard, in relation to the amount of consideration for goods or services to be provided from the next fiscal year and the explanation of when this amount is expected to be recognized as revenue, information concerning the date of transition to IFRS and the fiscal year ended March 31, 2018 is omitted.

#### ④ Exemption from Restatement of Comparative Information in the Application of IFRS 9

At the date of transition to IFRS and in the fiscal year ended March 31, 2018, items included within the scope of application of IFRS 9 have been recognized and measured in accordance with U.S. GAAP which is previous accounting standards, without restatement in accordance with IFRS 9.

### Reconciliations from U.S. GAAP to IFRS

Upon transitioning to IFRS, NTT has reconciled the amounts in the consolidated financial statements that were prepared based on U.S. GAAP. The impact on NTT Group as a result of transitioning from U.S. GAAP to IFRS in terms of financial position and results of operations is explained in the following reconciliation tables and in the notes to these tables.

In the reconciliation tables, “Reclassification” shows those items that have no impact on equity and comprehensive income, and “Recognition & Measurement Difference” shows those items that have an impact on equity and comprehensive income.

## (i) Impairment on Non-Financial Assets

As the method of implementing the goodwill impairment test differs between U.S. GAAP and IFRS, a difference emerges in the amount recognized as an impairment loss. The main difference is the implementation unit of the impairment test.

Under U.S. GAAP, goodwill impairment tests are required to be carried out for each reporting unit (business segment or the constituent unit one level lower), whereas under IFRS, impairment tests are required be carried out for an each cash-generating unit or a group of cash-generating unit. When transitioning to IFRS, NTT Group divided certain reporting units into several cash generating units.

For goodwill, an impairment test was implemented as of the date of transition to IFRS, regardless of whether there was any indication of impairment or not.

The impact of this change were as follows.

## (ii) Capitalization of Development Expenses

Certain development expenses that form part of R&D-related expenditure, which were recorded as expenses under U.S. GAAP, are recognized as assets in the consolidated statement of financial position and amortized using the straight line method over the estimated useful life as the capitalization requirements under IFRS are fulfilled.

The impact of this change were as follows.

## (iii) Deemed Cost

In the application of IFRS, NTT Group applies the exemption provisions stipulated in IFRS 1, and for certain property, plant and equipment and investment property, uses the fair value as of the date of transition to IFRS as the deemed cost.

At the date of transition to IFRS, the previous carrying amount of property, plant and equipment and investment property is ¥525,178 million, and the fair value is ¥413,281 million.

As a result of the above, at the date of transition to IFRS “Property, plant and equipment” and “Investment property” decrease by ¥66,353 million and ¥45,544 million, respectively, and the net difference of, after deducting 34,789 million as an adjustment for deferred taxes, was included in “Retained earnings” in the amount of ¥55,450 million and “Non-controlling interests” in the amount of ¥21,658 million.

(iv) Revenues

With respect to the costs pertaining to the communications services provided in the Regional Communications Business, Long Distance and International Communications Business, and Mobile Communications Business, sales commissions and other charges were previously capitalized and amortized over the estimated average period of the subscription term, up to the amount of the non-recurring upfront fees such as income from installation fees and activation fees under U.S. GAAP, but under IFRS, the full amount of these respective costs regardless of the amount of non-recurring upfront fees will be capitalized. For this reason, part of the sales commissions and other charges that were previously treated as expenses will be recognized as additional assets. In addition, under U.S. GAAP, an allowance was recognized for points earned by customers in line with service usage, but under IFRS, part of the transaction consideration is recognized as contract liabilities and revenue is recognized when the points are used.

In the Mobile Communications Business, non-recurring upfront fees - the sum of income such as activation fees are deferred, and under U.S. GAAP, were recognized as revenues by type of service over the average expected period of subscription, under IFRS, these will be recognized over the period of provision of the "Monthly Support" discount program.

For cases in which it is difficult to make a reasonable estimate on the progress of the construction work, under U.S. GAAP, revenues were recognized upon completion of the contracted services, but under IFRS, revenues are recognized within the range of the costs that arise.

The impact of these changes were as follows.

(v) Employee Benefits

Under U.S. GAAP, service cost, interest cost and expected return on plan assets associated with post-retirement benefits under the defined benefit plans were recognized as profit or loss. Of the actuarial gains (losses) and prior service cost arising from the defined benefit plans, those that were not recognized as components of current net periodic pension cost recognized as “Other components of equity”, which would be recognized later through profit or loss over a certain future period.

Under IFRS, on the other hand, current service cost and past service cost under the defined benefit plans are recognized as profit or loss, while net interest cost is recognized at an amount calculated by multiplying the net defined benefit liabilities (assets) by discount rates in as profit or loss. Remeasurement of the net defined benefit liabilities (assets) (such as actuarial gains or losses) is recognized as other comprehensive income, which, upon its occurrence, is transferred directly from other components of equity to retained earnings, without going through profit or loss.

The Special Accounting Fund for the NTT CDBP is a social welfare pension plan and is considered a multi-employer plan, and therefore contributions are recognized as expenses under U.S. GAAP. Under IFRS, on the other hand, although the scheme is a social welfare pension scheme, it is considered a defined benefit plan, therefore the defined benefit obligations are recognized at the present value in the consolidated statement of financial position as defined benefit liabilities.

The impact of these changes were as follows.

(vi) Levies

Under U.S. GAAP, expenditure of levies such as real estate tax was expensed over the relevant accounting period. Under IFRS, however, the amounts of the expenditure is recognized as an expense in full at the time when payment obligation arises.

The impact of this changes were as follows.

(vii) Business Combinations

Under U.S. GAAP, with respect to the acquisition of non-controlling interests in a subsidiary that occurred prior to March 31, 2009, the acquisition cost was allocated to identifiable assets acquired and liabilities assumed, which were measured based on estimated fair value, with the excess of the acquisition cost over the net assets acquired recognized as goodwill. With regard to individual investments acquired in stages, the accounting method described above is applied, and the cumulative amount of their acquisition cost is then reflected. Under IFRS, changes in a parent's ownership interest in a subsidiary that do not result in a loss of the parent's control over the subsidiary are accounted for as capital transactions and with regard to individual investments acquired in stages, these are remeasured at fair value on the acquisition date entailing acquisition of control.

In addition, under U.S. GAAP, the non-controlling interest in the acquired company at the time of business combination is measured at fair value. Under IFRS, on the other hand, the non-controlling interest in the acquired company at the time of business combination can be measured, for each business combination transaction, at fair value or by proportional share in the acquired company's identifiable net assets.

The impact of these changes were as follows.

(viii) Income Taxes

With respect to taxable temporary differences pertaining to investments in domestic subsidiaries, under U.S. GAAP, unless the tax law provides a means by which the reported amount of that investment can be recovered tax-free and it can be expected that the company will ultimately use that means, deferred tax liabilities are recognized. Under IFRS, on the other hand, in cases where it is probable that the temporary difference will not reverse in a foreseeable future, deferred tax liabilities for taxable temporary differences pertaining to investments in subsidiaries are not recognized.

In addition, under U.S. GAAP, deferred tax liabilities recognized for taxable temporary differences pertaining to investments in affiliates are measured based on the future reversal of the taxable temporary differences resulting from the sale of investments. Under IFRS, on the other hand, the deferred tax liabilities recognized for future taxable temporary differences pertaining to investments in affiliates are measured based on the most probable manner of future reversal, such as the distribution of dividends.

The impact of these changes were as follows. This impact on consolidated statements of income is immaterial and omitted.

(ix) Put Options Granted to Non-Controlling Interests

Under U.S. GAAP, with respect to written put options on subsidiary shares granted to the holders of certain non-controlling interests, as redemption of the non-controlling interests was not solely in the control of NTT Group, the estimated redemption amount was considered as “Redeemable non-controlling interests” and was presented in between liabilities and equity in the consolidated balance sheets. Changes in the estimated redemption amount were recognized as changes in retained earnings.

Under IFRS, on the other hand, as a general rule, the present value of the redemption amount of these options is recognized at first as other financial liabilities, and an equivalent amount is deducted from additional paid-in capital. After this initial recognition, they are measured at amortized cost based on the effective interest rate method, and their subsequent change is recognized as additional paid-in capital.

The impact of this change were as follows.

	Millions of yen		
	As of the Date of Transition to IFRS April 1, 2017	As of December 31, 2017	As of March 31, 2018

Adjustment to additional paid-in capital	(61,033)	(59,812)	(37,010)

The main adjustments to equity and comprehensive income other than (i) to (ix) above are as follows.

Under U.S. GAAP, where the fiscal year-end date of a subsidiary or affiliated company differs from that of the parent company, material events or transactions occurring within the different periods are disclosed in the notes or are adjusted directly in the consolidated financial statements.

Under IFRS, where the fiscal year-end date of a subsidiary or affiliated company and joint venture differs from that of the parent company, the fiscal year-end date is unified or additional financial statements are prepared on the parent company’s fiscal year-end date, except where doing that be impractical. If unifying the fiscal year-end date or preparing additional financial statements is impractical, an adjustment is made for the material events or transactions occurring within the different periods.

The impact of this change were as follows.

(i) Presentation of Deferred Tax Assets and Deferred Tax Liabilities

Under U.S. GAAP, deferred tax assets and deferred tax liabilities at the date of transition to IFRS (April 1, 2017) are shown as current assets and current liabilities, or as non-current assets and non-current liabilities. Under IFRS, all deferred tax assets and deferred tax liabilities are shown as non-current assets and non-current liabilities. At the end of the nine months ended December 31, 2017 and the end of the fiscal year ended March 31, 2018, there was no difference in this standard between U.S. GAAP and IFRS.

(ii) Classification of Financial Assets and Financial Liabilities

Under IFRS, other financial assets and other financial liabilities are presented separately, based on the rules of presentation.

(iii) Offsetting of Financial Assets and Financial Liabilities

Under U.S. GAAP, financial assets are presented offset against financial liabilities, under the certain requirements are met, even if the right of offset is conditional. Under IFRS, however, financial assets are not presented offset against financial liabilities, except in the situations in which an unconditional and legally enforceable right to offset exists at the end of the reporting period, and intention exists either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(iv) Presentation of Operating Expenses

Under U.S. GAAP, "Operating expenses" are presented using the function of expense method, whereby expenses are classified as cost of sales, selling expenses, or other categories of expenses based on their function. Under IFRS expenses are presented using the nature of expense method, whereby expenses are classified as personnel expenses, expenses for purchase of goods and services and other expenses, depreciation and amortization, or other categories of expenses based on their nature.

(1) The number of Telephone Subscriber Lines is the total of individual lines and central station lines (including the Subscriber Telephone Lite Plan).

(2) "INS-Net" includes "INS-Net 64" and "INS-Net 1500." In terms of the number of channels, transmission rate, and line use rate (base rate), "INS-Net 1500" is in all cases approximately ten times greater than "INS-Net 64." For this reason, one "INS-Net 1500" subscription is calculated as ten "INS-Net 64" subscriptions (including subscriptions to the "INS-Net 64 Lite Plan").

(3) The number of "FLET'S Hikari (including Hikari Collaboration Model)" subscriptions includes subscriptions to "B FLET'S," "FLET'S Hikari Next," "FLET'S Hikari Light," "FLET'S Hikari Lightplus" and "FLET'S Hikari WiFi Access" provided by NTT East, subscriptions to "B FLET'S," "FLET'S Hikari Premium," "FLET'S Hikari Mytown," "FLET'S Hikari Next," "FLET'S Hikari Mytown Next," "FLET'S Hikari Light" and "FLET'S Hikari WiFi Access" provided by NTT West and subscriptions to the "Hikari Collaboration Model," the wholesale provision of services to service providers by NTT East and NTT West.

(4) The comparative results for the nine months ended December 31, 2018 compared to the year ended March 31, 2018 for "FLET'S Hikari (including Hikari Collaboration Model)" are as follows: the numbers of new subscribers for NTT East and NTT West were 1,223 thousand lines and 902 thousand lines, respectively, for a total of 2,125 thousand lines; the numbers of new subscribers (excluding switchover lines) for the "Hikari Collaboration Model" for NTT East and NTT West were 891 thousand lines and 664 thousand lines, respectively, for a total of 1,556 thousand lines; and the numbers of switchover lines for NTT East and NTT West were 404 thousand lines and 350 thousand lines, respectively, for a total of 754 thousand lines.

(5) The comparative forecast for the year ending March 31, 2019 (Forecast) compared to the results for the year ended March 31, 2018 for "FLET'S Hikari (including Hikari Collaboration Model)" are as follows: the numbers of new subscribers for NTT East and NTT West are expected to be 1,700 thousand lines and 1,250 thousand lines, respectively, for a total of 2,950 thousand lines; the numbers of new subscribers (excluding switchover lines) for the "Hikari Collaboration Model" for NTT East and NTT West are expected to be 1,250 thousand lines and 950 thousand lines, respectively, for a total of 2,200 thousand lines; and the numbers of switchover lines for NTT East and NTT West are expected to be 650 thousand lines and 600 thousand lines, respectively, for a total of 1,250 thousand lines.

(6) The number of subscriptions for "Hikari Denwa" and "FLET'S TV Transmission Services" include wholesale services provided to service providers by NTT East and NTT West.

(7) "NTT Group Major ISPs" includes "WAKWAK" and "InfoSphere," in addition to "OCN" and "Plala."

(8) The number of Mobile Telecommunications Services (including "Telecommunications Services (LTE (Xi))" and "Telecommunications Services (FOMA (3G))") includes Communication Module Services.

(9) Forecasts for the year ending March 31, 2019 have not been changed from those announced in the financial results for the six months ended September 30, 2018.

### 3. Operating Data (ARPU)

#### Average Monthly Revenue per Unit (ARPU)

Average monthly revenue per unit, or ARPU, is used to measure average monthly operating revenues attributable to each designated service on a per user basis. In the case of NTT Group's fixed-line business, ARPU is calculated by dividing revenue items included in the operating revenues of NTT Group's regional communications business segment, that is, fixed-line (telephone subscriber lines and INS-NET) and FLET'S Hikari, by the number of active subscribers to the relevant services. In the case of NTT Group's mobile communications business, ARPU is calculated by dividing revenue items included in operating revenues from its mobile communications business segment, such as revenues from LTE ("Xi") mobile phone services, FOMA (3G) mobile phone services and "docomo Hikari" services, that are incurred consistently each month, by the number of active users to the relevant services. The calculation of these figures excludes revenues that are not representative of monthly average usage, such as telecommunications equipment sales, activation fees and universal service charges. NTT believes that its ARPU figures calculated in this way provide useful information regarding the monthly average usage of its subscribers. The revenue items included in the numerators of NTT Group's ARPU figures are based on its financial results comprising its IFRS results of operations.

- (1) We compute the following two categories of ARPU for business conducted by each of NTT East and NTT West.
- Aggregate Fixed Line ARPU (Telephone Subscriber Lines + INS-NET Subscriber Lines): Calculated based on revenues from monthly charges and call charges for Telephone Subscriber Lines and INS-NET Subscriber Lines, which are included in operating revenues from Voice Transmission Services (excluding IP Services), and revenues from "FLET'S ADSL" and "FLET'S ISDN," which are included in operating revenues from IP Services.
  - FLET'S Hikari ARPU: Calculated based on revenues from "FLET'S Hikari" (including "FLET'S Hikari" optional services), which are included in operating revenues from IP Services, revenues from monthly charges, call charges and connection device charges for "Hikari Denwa," and revenues from "FLET'S Hikari" optional services, which are included in Supplementary Business revenues.
    - "FLET'S Hikari" includes "B FLET'S," "FLET'S Hikari Next," "FLET'S Hikari Light," "FLET'S Hikari Lightplus" and "FLET'S Hikari WiFi Access" provided by NTT East, and "B FLET'S," "FLET'S Hikari Premium," "FLET'S Hikari Mytown," "FLET'S Hikari Next," "FLET'S Hikari Mytown Next," "FLET'S Hikari Light" and "FLET'S Hikari WiFi Access" provided by NTT West. In addition, "FLET'S Hikari" also includes the "Hikari Collaboration Model," the wholesale provision of services to service providers by NTT East and NTT West.
    - "FLET'S Hikari" Optional Services includes wholesale services provided to service providers by NTT East and NTT West.
- (2) Aggregate Fixed Line ARPU (Telephone Subscriber Lines + INS-NET Subscriber Lines) and FLET'S Hikari ARPU do not include interconnection charges.
- (3) Numbers of active subscribers used in the ARPU calculation of NTT East and NTT West are as below.
- Quarterly Results: Sum of number of active subscribers ((number of subscribers at end of previous month + number of subscribers at end of the current month)/2) for each month in the relevant period
  - Nine-month Results (from April to December): Sum of number of active subscribers ((number of subscribers at end of previous month + number of subscribers at end of the current month)/2) for each month from April to December
  - FY Results: Sum of number of active subscribers((number of subscribers at end of previous month + number of subscribers at end of the current month)/2) for each month from April to March
  - FY Forecast: Sum of number of active subscribers from April to September (number of subscribers at end of previous month + number of subscribers at end of the current month)/2 for each month from April to September + sum of the average forecasted number of active subscribers from October to March ((number of subscribers at September 30, 2018 + expected number of subscribers at March 31, 2019)/2) x6
- (4) For purposes of calculating Aggregate Fixed Line ARPU (Telephone Subscriber Lines + INS-NET Subscriber Lines), the number of subscribers is determined based on the number of subscriptions for fixed-line services (Telephone Subscriber Lines + INS-NET Subscriber Lines).
- (5) In terms of number of channels, transmission rate, and line use rate (base rate), INS-Net 1500 is in all cases roughly ten times greater than INS-Net 64. For this reason, for the purpose of calculating Aggregate Fixed Line ARPU (Telephone Subscriber Lines + INS-NET Subscriber Lines), one INS-Net 1500 subscription is calculated as ten INS-Net 64 subscriptions.
- (6) For purposes of calculating FLET'S Hikari ARPU, the number of subscribers is determined based on the number of FLET'S Hikari subscribers, which includes subscribers to "B FLET'S," "FLET'S Hikari Next," "FLET'S Hikari Light," "FLET'S Hikari Lightplus" and "FLET'S Hikari WiFi Access" provided by NTT East, subscribers to "B FLET'S," "FLET'S Hikari Premium," "FLET'S Hikari Mytown," "FLET'S Hikari Next," "FLET'S Hikari Mytown Next," "FLET'S Hikari Light" and "FLET'S Hikari WiFi Access" provided by NTT West, and the "Hikari Collaboration Model," the wholesale provision of services to service providers by NTT East and NTT West.
- (7) The following is the formula we use to compute ARPU for NTT DOCOMO.
- (New) Aggregate ARPU = Mobile ARPU + "docomo Hikari" ARPU
- Mobile ARPU: Mobile ARPU related revenues (voice-related revenues (basic monthly charges, voice communication charges) + packet-related revenues (basic monthly charges, packet communication charges)) / No. of active users
  - "docomo Hikari" ARPU: "docomo Hikari" ARPU Related Revenues (basic monthly charges, voice communication charges) / No. of active users
- (Old) Aggregate ARPU = Voice ARPU + Packet ARPU + "docomo Hikari" ARPU
- Voice ARPU: Voice ARPU Related Revenues (basic monthly charges, voice communication charges) / No. of active users
  - Packet ARPU: Packet ARPU Related Revenues (basic monthly charges, packet communication charges) / No. of active users
  - "docomo Hikari" ARPU: "docomo Hikari" ARPU Related Revenues (basic monthly charges, voice communication charges) / No. of active users
- Note that the sum of Packet ARPU and "docomo Hikari" ARPU is referred to as Data ARPU.
- (8) Numbers of active users used in the ARPU calculation of NTT DOCOMO are as described below.
- Sum of No. of active users for each month ((No. of users at the end of previous month + No. of users at the end of current month) / 2) during the relevant period
- (9) The number of "users" used to calculate ARPU is the total number of subscriptions, excluding the subscriptions listed below.
- Subscriptions of communication module services, "Phone Number Storage," "Mail Address Storage," "docomo Business Transceiver" and wholesale telecommunications services and interconnecting telecommunications facilities that are provided to MVNOs, and Data Plan subscriptions in the case where the customer contracting for such subscription in his/her name also has a subscription for "Xi" or "FOMA" services in his/her name.
- (New) Note that revenues from communication module services, "Phone Number Storage," "Mail Address Storage," "docomo Business Transceiver" and wholesale telecommunications services and interconnecting telecommunications facilities that are provided to MVNOs and the impact on revenues from "dPOINT" program, etc. are not included in ARPU calculations.
- (Old) Note that revenues from communication module services, "Phone Number Storage," "Mail Address Storage," "docomo Business Transceiver" and wholesale telecommunications services and interconnecting telecommunications facilities that are provided to MVNOs are not included in ARPU calculations.
- (10) Forecasts for the year ending March 31, 2019 have not been changed from those announced in the financial results for the six months ended September 30, 2018.
