Notes to Unaudited Consolidated Financial Statements

1. Basis of preparation:

The accompanying unaudited condensed consolidated financial statements of Toyota Motor Corporation (the "parent company") as of and for the period ended June 30, 2016, have been prepared in accordance with U.S. generally accepted accounting principles ("U.S.GAAP") and on substantially the same basis as its annual consolidated financial statements except for certain required disclosures which have been omitted. The unaudited condensed consolidated financial statements should be read in conjunction with the Annual Report on Form 20-F for the year ended March 31, 2016. The unaudited condensed consolidated financial statements reflect all adjustments, consisting of only normal recurring adjustments, necessary for a fair presentation of the result for that period and the financial condition at that date. The consolidated results for the three-month period are not necessarily indicative of results to be expected for the full year.

2. Accounting changes and recent pronouncements to be adopted in future periods:

Accounting changes -

In February 2015, the Financial Accounting Standards Board ("FASB") issued updated guidance that amends the analysis a reporting entity must perform to determine whether it should consolidate certain legal entities. The parent company and its consolidated subsidiaries ("Toyota") adopted this guidance on April 1, 2016. The adoption of this guidance did not have a material impact on Toyota's consolidated financial statements.

In April 2015, the FASB issued updated guidance that requires debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of the related debt liability instead of being presented as an asset. In August 2015, the FASB issued an additional update which clarifies that debt issuance costs for line of credit agreements may continue to be deferred and amortized. Toyota adopted this guidance on April 1, 2016. The adoption of this guidance did not have a material impact on Toyota's consolidated financial statements.

In April 2015, the FASB issued updated guidance to help entities evaluate the accounting for fees paid by a customer in a cloud computing arrangement. Toyota adopted this guidance on April 1, 2016. The adoption of this guidance did not have a material impact on Toyota's consolidated financial statements.

In May 2015, the FASB issued updated guidance on disclosures for investments in certain entities that calculate net asset value per share. This guidance removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. Toyota adopted this guidance on April 1, 2016. The adoption of this guidance did not have a material impact on Toyota's consolidated financial statements. For a further discussion of additional disclosures by adoption of this guidance, see note 8 to the consolidated financial statements.

Notes to Unaudited Consolidated Financial Statements

In November 2015, the FASB issued updated guidance to simplify the balance sheet classification of deferred taxes. This guidance will require that deferred tax assets and liabilities be classified as noncurrent on the balance sheet. Toyota early adopted this guidance on April 1, 2016. Toyota adopted this guidance on a prospective basis from April 1, 2016 and prior periods were not retrospectively adjusted.

Recent pronouncements to be adopted in future periods -

In May 2014, the FASB issued updated guidance on the recognition of revenue from contracts with customers. This guidance will supersede the current revenue recognition guidance. In August 2015, the FASB issued updated guidance on the deferral of the effective date. As a result, this guidance is effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

In July 2015, the FASB issued updated guidance to simplify the measurement of inventory. This guidance is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

In January 2016, the FASB issued updated guidance for financial instruments. This guidance addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments and will require entities to measure equity investments at fair value and recognize any changes in fair value in net income. This guidance is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

In February 2016, the FASB issued updated guidance for leases. This guidance will require lessees to recognize almost all leases on their balance sheet as a right-of-use asset and a lease liability. This guidance is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

Notes to Unaudited Consolidated Financial Statements

In March 2016, the FASB issued updated guidance for effect of derivative contract novations on existing hedge accounting relationships. This guidance clarifies that a change in the counterparty to a designated derivative hedging instrument does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria continue to be met. This guidance is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

In March 2016, the FASB issued updated guidance for contingent put and call options in debt instruments. This guidance clarifies whether embedded contingent put and call options are clearly and closely related to the debt host when bifurcating embedded derivatives. This guidance is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

In June 2016, the FASB issued updated guidance for measurement of credit losses on financial instruments. This guidance introduces an approach to estimate credit losses on certain types of financial instruments based on expected losses. It also modifies the impairment model for available-for-sale debt securities. This guidance is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Management is evaluating the impact of adopting this guidance on Toyota's consolidated financial statements.

3. Accounting procedures specific to quarterly consolidated financial statements:

Provision for income taxes -

The provision for income taxes is computed by multiplying income before income taxes and equity in earnings of affiliated companies for the first quarter by estimated annual effective tax rates. These estimated annual effective tax rates reflect anticipated investment tax credits, foreign tax credits and other items, including changes in valuation allowances, that are expected to affect estimated annual effective tax rates.

Notes to Unaudited Consolidated Financial Statements

4. Derivative financial instruments:

Toyota employs derivative financial instruments, including foreign exchange forward contracts, foreign currency options, interest rate swaps, interest rate currency swap agreements and interest rate options to manage its exposure to fluctuations in interest rates and foreign currency exchange rates. Toyota does not use derivatives for speculation or trading.

Fair value hedges -

Toyota enters into interest rate swaps and interest rate currency swap agreements mainly to convert its fixed-rate debt to variable-rate debt. Toyota uses interest rate swap agreements in managing interest rate risk exposure. Interest rate swap agreements are executed as either an integral part of specific debt transactions or on a portfolio basis. Toyota uses interest rate currency swap agreements to hedge exposure to currency exchange rate fluctuations on principal and interest payments for borrowings denominated in foreign currencies. Notes and loans payable issued in foreign currencies are hedged by concurrently executing interest rate currency swap agreements, which involve the exchange of foreign currency principal and interest obligations for each functional currency obligations at agreed-upon currency exchange and interest rates.

For the first quarter ended June 30, 2015 and 2016, the ineffective portion of Toyota's fair value hedge relationships was not material. For fair value hedging relationships, the components of each derivative's gain or loss are included in the assessment of hedge effectiveness.

Undesignated derivative financial instruments -

Toyota uses foreign exchange forward contracts, foreign currency options, interest rate swaps, interest rate currency swap agreements, and interest rate options, to manage its exposure to foreign currency exchange rate fluctuations and interest rate fluctuations from an economic perspective, and for some of which Toyota is unable to or has elected not to apply hedge accounting.

Notes to Unaudited Consolidated Financial Statements

Fair value and gains or losses on derivative financial instruments -

The following table summarizes the fair values of derivative financial instruments as of March 31, 2016 and June 30, 2016:

	Yen in millions		
	March 31, 2016	June 30, 2016

Foreign exchange gain (loss), net	(3,494)		96,435		

Notes to Unaudited Consolidated Financial Statements

Undesignated derivative financial instruments are used to manage economic risks of fluctuations in foreign currency exchange rates and interest rates of certain receivables and payables. Those economic risks are offset by changes in the fair value of undesignated derivative financial instruments.

Cash flows from transactions of derivative financial instruments are included in cash flows from operating activities in the consolidated statements of cash flows.

Credit risk related contingent features -

Toyota enters into International Swaps and Derivatives Association Master Agreements with counterparties. These Master Agreements contain a provision requiring either Toyota or the counterparty to settle the contract or to post assets to the other party in the event of a ratings downgrade below a specified threshold.

The aggregate fair value amount of derivative financial instruments that contain credit risk related contingent features that are in a net liability position after being offset by cash collateral as of June 30, 2016 is ¥3,772 million. The aggregate fair value amount of assets that are already posted as cash collateral as of June 30, 2016 is ¥85,004 million. If the ratings of Toyota decline below specified thresholds, the maximum amount of assets to be posted or for which Toyota could be required to settle the contracts is ¥3,772 million as of June 30, 2016.

Notes to Unaudited Consolidated Financial Statements

5. Contingencies:

Guarantees -

Toyota enters into contracts with Toyota dealers to guarantee customers' payments of their installment payables that arise from installment contracts between customers and Toyota dealers, as and when requested by Toyota dealers. Toyota is required to execute its guarantee primarily when customers are unable to make required payments. The maximum potential amount of future payments as of June 30, 2016 is \div 2,382,430 million. Liabilities for guarantees totaling \div 5,626 million have been provided as of June 30, 2016. Under these guarantee contracts, Toyota is entitled to recover any amount paid by Toyota from the customers whose original obligations Toyota has guaranteed.

Legal proceedings -

From time-to-time, Toyota issues vehicle recalls and takes other safety measures including safety campaigns relating to its vehicles. Since 2009, Toyota issued safety campaigns related to the risk of floor mat entrapment of accelerator pedals and vehicle recalls related to slow-to-return or sticky accelerator pedals. In March 2014, Toyota entered into a Deferred Prosecution Agreement ("DPA") to resolve an investigation by the U.S. Attorney for the Southern District of New York ("SDNY") related to unintended acceleration in certain of its vehicles. The DPA provides for an independent monitor to review and assess policies and procedures relating to Toyota's safety communications process, its process for sharing vehicle accident information internally and its process for preparing and sharing certain technical reports.

In 2010, there was a recall related to the software program that controls the antilock braking system in certain models, including the Prius, which led to putative class action lawsuits on behalf of owners of recalled vehicles and owners of vehicles which were not recalled. The United States District Court for the Central District of California denied the plaintiffs' motions for class certification and granted summary judgment in Toyota's favor denying the plaintiffs' claims related to both the recalled vehicles and the non-recalled vehicles. Proceedings involving the recalled vehicles have concluded; the appeals of the granting of summary judgment and the denial of class certification of the claims for the non-recalled vehicles are still pending.

Notes to Unaudited Consolidated Financial Statements

Personal injury and wrongful death claims involving allegations of unintended acceleration are pending in several consolidated proceedings in federal and state courts, as well as in individual cases in various other states. The judges in the consolidated federal action and the consolidated California state action have approved an Intensive Settlement Process ("ISP") for such claims in those actions. Under the ISP, all individual claims within the consolidated actions are stayed pending completion of a process to assess whether they can be resolved on terms acceptable to the parties. Cases not resolved after completion of the ISP will then proceed to discovery and toward trial. Toyota has offered the ISP process to plaintiffs in other consolidated actions and in individual cases, as well.

Toyota has been named as a defendant in 33 economic loss class action lawsuits, which, together with similar lawsuits against Takata and other automakers, have been made part of a multi-district litigation proceeding in the United States District Court for the Southern District of Florida, arising out of allegations that airbag inflators manufactured by Takata are defective. These lawsuits are at an early stage.

Toyota has received a request for information from the SDNY related to statements concerning one or more reported injuries sustained in Toyota vehicles following deployments of Takata airbags. Toyota is cooperating with the request.

Toyota self-reported a process gap in fulfilling certain emissions defect information reporting requirements with the U.S. Environmental Protection Agency ("EPA") and California Air Resources Board, including updates on its repair completion rates for recalled emissions components and certain other reports concerning emissions related defects. Toyota is involved in discussions with these agencies. The SDNY and EPA have requested certain follow-up information regarding this reporting issue, and Toyota is cooperating with the request.

Toyota also has various other pending legal actions and claims, including without limitation personal injury and wrongful death lawsuits and claims in the United States, and is subject to government investigations from-time-to-time.

Beyond the amounts accrued with respect to all aforementioned matters, Toyota is unable to estimate a range of reasonably possible loss, if any, for the pending legal matters because (i) many of the proceedings are in evidence gathering stages, (ii) significant factual issues need to be resolved, (iii) the legal theory or nature of the claims is unclear, (iv) the outcome of future motions or appeals is unknown and/or (v) the outcomes of other matters of these types vary widely and do not appear sufficiently similar to offer meaningful guidance. Based upon information currently available to Toyota, however, Toyota believes that its losses from these matters, if any, beyond the amounts accrued, would not have a material adverse effect on Toyota's financial position, results of operations or cash flows.

6. Segment data:

The operating segments reported below are the segments of Toyota for which separate financial information is available and for which operating income/loss amounts are evaluated regularly by executive management in deciding how to allocate resources and in assessing performance.

The major portions of Toyota's operations on a worldwide basis are derived from the Automotive and Financial Services business segments. The Automotive segment designs, manufactures and distributes sedans, minivans, compact cars, sport-utility vehicles, trucks and related parts and accessories. The Financial Services segment consists primarily of financing, and vehicle and equipment leasing operations to assist in the merchandising of the parent company and its affiliated companies products as well as other products. The All Other segment includes the design, manufacturing and sales of housing, telecommunications and other businesses.

The following tables present certain information regarding Toyota's industry or geographic segments and overseas revenues by destination for the first quarter ended June 30, 2015 and 2016.

Segment operating results -

For the first quarter ended June 30, 2015:

	Yen in millions					
	Automotive	Financial Services	All Other	Inter-segment Elimination	Consolidated	
Net revenues						
Sales to external customers	6,398,388	459,915	129,345	_	6,987,648

Operating income	290,367	171,440	9,010	127,448	27,300	16,665	642,230

[&]quot;Other" consists of Central and South America, Oceania, Africa and the Middle East.

Revenues are attributed to geographies based on the country location of the parent company or the subsidiary that transacted the sale with the external customer.

Transfers between industry or geographic segments are made at amounts which Toyota's management believes approximate arm's-length transactions. In measuring the reportable segments' income or losses, operating income consists of revenue less operating expenses.

Notes to Unaudited Consolidated Financial Statements

Overseas revenues by destination -

The following information shows revenues that are attributed to countries based on location of customers, excluding customers in Japan. In addition to the disclosure requirements under U.S.GAAP, Toyota discloses this information in order to provide financial statements users with valuable information.

For the first quarter ended June 30, 2015:

	Yen in millions				
	North America	Europe	Asia	Other	Total
Overseas sales	2,771,378	555,987	1,041,773	1,170,862	5,540,000
Consolidated sales	_	_	_	_	6,987,648
Ratio of overseas sales	39.7%	8.0%	14.9%	16.7%	79.3%

For the first quarter ended June 30, 2016:

	Yen in millions				
	North America	Europe	Asia	Other	Total

7. Per share amounts:

Reconciliations of the differences between basic and diluted net income attributable to Toyota Motor Corporation per common share for the first quarter ended June 30, 2015 and 2016 are as follows:

	Yen in millions	Thousands of shares	Net income attributable to Toyota Motor Corporation per common share	
	Net income attributable to Toyota Motor Corporation	Weighted-average common shares		
For the first quarter ended June 30, 2015				
Basic net income attributable to Toyota Motor Corporation per common share	646,394	3,146,894	205.41	
Effect of dilutive securities				
Assumed exercise of dilutive stock options	(10)	1,522		
Diluted net income attributable to Toyota Motor Corporation per common share	646,384	3,148,416	205.30	
For the first quarter ended June 30, 2016				
Net income attributable to Toyota Motor Corporation	552,465			
Accretion to Mezzanine equity	(1,213)			
Dividends to Toyota Motor Corporation Model AA Class Shareholders	(1,236)			
Basic net income attributable to				
Toyota Motor Corporation per common share	550,016	3,036,810	181.12	
Effect of dilutive securities				
Model AA Class Shares	2,449	47,100		
Assumed exercise of dilutive stock options	(2)	636		
Diluted net income attributable to				
Toyota Motor Corporation per common share	552,463	3,084,546	179.11	

On May 11, 2016, the Board of Directors of the parent company resolved to distribute year-end cash dividends of \(\pm\) 334,144 million, \(\pm\)110 per common share, to common shareholders effective on June 2, 2016.

Notes to Unaudited Consolidated Financial Statements

8. Fair value measurements:

In accordance with U.S.GAAP, Toyota classifies fair value into three levels of input as follows which are used to measure it.

- Level 1: Quoted prices in active markets for identical assets or liabilities
- Level 2: Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; valuation of assets or liabilities using inputs, other than quoted prices, that are observable
- Level 3: Valuation of assets or liabilities using unobservable inputs which reflect the reporting entity's assumptions

The following table summarizes the fair values of the assets and liabilities measured at fair value on a recurring basis as of March 31, 2016 and June 30, 2016. Transfers between levels of the fair value are recognized at the end of their respective reporting periods:

	Yen in millions			
	March 31, 2016			
	Level 1	Level 2	Level 3	Total
Assets				
Cash equivalents	100,841	915,684		1,016,525

Certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy.

The following is description of the assets and liabilities measured at fair value, information about the valuation techniques used to measure fair value, key inputs and significant assumptions:

Cash equivalents and time deposits -

Cash equivalents include money market funds and other investments with original maturities of three months or less. Cash equivalents classified in Level 2 include negotiable certificates of deposit with original maturities of three months or less. These are measured at fair value using primarily observable interest rates in the market. Time deposits consist of negotiable certificates of deposit with original maturities over three months. These are measured at fair value using primarily observable interest rates in the market.

Marketable securities and other securities investments -

Marketable securities and other securities investments include public and corporate bonds, common stocks and other investments. Public and corporate bonds include government bonds and represent 37% of Japanese bonds, and 63% of U.S., European and other bonds as of March 31, 2016, and 36% of Japanese bonds, and 64% of U.S., European and other bonds as of June 30, 2016. Listed stocks on the Japanese stock markets represent 90% and 90% of common stocks as of March 31, 2016 and June 30, 2016, respectively. Toyota uses primarily quoted market prices for identical assets to measure fair value of these securities. "Other" includes investment trusts. Generally, Toyota uses quoted market prices for similar assets or quoted non-active market prices for identical assets to measure fair value of these securities. These assets are classified in Level 2.

Notes to Unaudited Consolidated Financial Statements

Derivative financial instruments -

See note 4 to the consolidated financial statements about derivative financial instruments. Toyota primarily estimates the fair value of derivative financial instruments using industry-standard valuation models that require observable inputs including interest rates and foreign exchange rates, and the contractual terms. The usage of these models does not require significant judgment to be applied. These derivative financial instruments are classified in Level 2. In other certain cases when market data is not available, key inputs to the fair value measurement include quotes from counterparties, and other market data. Toyota assesses the reasonableness of changes of the quotes using observable market data. These derivative financial instruments are classified in Level 3. Toyota's derivative fair value measurements consider assumptions about counterparty and Toyota's own non-performance risk, using such as credit default probabilities.

The changes in Level 3 assets and liabilities measured at fair value on a recurring basis for the first quarter ended June 30, 2015 and 2016 were not material.

Certain assets and liabilities are measured at fair value on a nonrecurring basis. The assets and liabilities measured at fair value on a nonrecurring basis for the first quarter ended June 30, 2015 and 2016 were not material.

Notes to Unaudited Consolidated Financial Statements

9. Accumulated other comprehensive income:

Changes in accumulated other comprehensive income (loss) are as follows:

	Yen in millions			
	Foreign currency translation adjustments	Unrealized gains (losses) on securities	Pension liability adjustments	Accumulated other comprehensive income (loss)
For the first quarter ended June 30, 2015			_	
Balance at March 31, 2015	(136,090)	1,727,565	(113,930)	1,477,545
Other comprehensive income (loss) before reclassifications	85,267	81,060	567	166,894
Reclassifications	_	(3,400)	1,274	(2,126)
Other comprehensive income (loss), net of tax	85,267	77,660	1,841	164,768
Less – Other comprehensive income attributable to noncontrolling interests	(1,422)	(2,089)	680	(2,831)
Balance at June 30, 2015	(52,245)	1,803,136	(111,409)	1,639,482
For the first quarter ended June 30, 2016				
Balance at March 31, 2016	(499,055)	1,424,945	(315,122)	610,768
Other comprehensive income (loss) before reclassifications Reclassifications	(449,900)	(263,080) (2,122)	(6,257) 2,649	(719,237) 527
Other comprehensive income (loss), net of tax	(449,900)	(265,202)	(3,608)	(718,710)
Less – Other comprehensive income attributable to noncontrolling interests	27,042	3,945	46	31,033
Balance at June 30, 2016	(921,913)	1,163,688	(318,684)	(76,909)

Notes to Unaudited Consolidated Financial Statements

Reclassifications consist of the following:

	Yen in millions			
	For the first quarter ended June 30, 2015	For the first quarter ended June 30, 2016	Affected line items in the consolidated statements of income	
Unrealized gains (losses) on securities:				
	(1,329)	(1,348)	Financing operations	
	(5,439)	(2,538)	Foreign exchange gain (loss), net	
	1,849	768	Other income (loss), net	
	(4,919)	(3,118)	Income before income taxes and equity in earnings of affiliated companies	
	1,519	996	Provision for income taxes	
	0	0	Equity in earnings of affiliated companies	
	(3,400)	(2,122)	Net income	
Pension liability adjustments:				
Recognized net actuarial loss	3,123	4,971	*1	
Amortization of prior service costs	(1,075)	(963)	*1	
	2,048	4,008	Income before income taxes and equity in earnings of affiliated companies	
	(774)	(1,359)	Provision for income taxes	
	1,274	2,649	Net income	
Total reclassifications, net of tax	(2,126)	527		

Amounts of reclassifications in parentheses indicate gains in the consolidated statements of income.

^{*1:} These components are included in the computation of net periodic pension cost.
