(3) Recent Developments

The sub-section entitled "Recent Developments" in the section entitled "Description of Australia and New Zealand Banking Group Limited and its Subsidiaries" on page 175 of the Base Prospectus shall be supplemented by inserting the below at the end of the above-mentioned sub-section:

"ANZ Group's 2026 Full Year Result and Proposed Final Dividend

Overview of financial performance

The ANZ Group announced on 9 November 2026:

- a Statutory Profit of $7.27 billion for the full year ended 30 September 2026 ("FY26"), an increase of 23% against its Statutory Profit for the full year ended 30 September 2025 ("FY25") (or an increase of 4% against its FY25 statutory

profit (excluding significant items)); and

- a Common Equity Tier 1 ("CET1") ratio at 30 September 2026 of 11.99%, a decrease of 4 basis points ("bps") from 30 September 2025.

Balance Sheet metrics	30 Sep 2025	30 Sep 2026	30 Sep 2026 vs 30 Sep 2025	
APRA Level 2 CET1 ratio	12.03%	11.99%	-4bps	
				Constant currency basis
Customer deposits, $b	748	815	+9%	*+12%*
Net loans and advances, $b	829	861	+4%	*+6%*

Credit quality

- The total credit impairment charge for FY26 was $582 million, comprising:
    - An Individual provision ("IP") charge of $360 million, $33 million higher than for FY25. This represents a 4bps annualised IP loss rate, unchanged from FY25. Portfolio losses remain low, reflecting continued strong overall credit quality of a well-diversified portfolio.
    - A Collective provision charge of $222 million, $108 million higher than for FY25. This reflects portfolio growth together with emerging risk under the evolving macroeconomic backdrop, with higher interest rates and costs of living conditions becoming more challenging for our customers.
- The Collective provision balance increased by $151 million to $4.53 billion, with a Collective provision balance to credit risk weighted assets ratio of 1.20%, up 2bps from 30 September 2025. The ANZBGL Group remains well covered for a range of economic scenarios, holding $2.1 billion above its base economic scenario.
- Non-performing exposures to total credit exposure was 0.57% at 30 September 2026, unchanged from 30 September 2025.

Capital, funding and liquidity

- Level 2 CET1 capital ratio was 11.99% at 30 September 2026, a decrease of 4 bps from 30 September 2025. The ANZBGL Group's capital position remains robust whilst continuing to support customers and absorbing the capital impact of an increase in term rates and the impact of the acquisition of ANZ Worldline.
- The ANZGHL Board has proposed a 2026 final dividend of 83 cents per share, with franking rising from 75% to 80% (following the increase from 70% to 75% for the 2026 interim dividend, also 83 cents per share), driven by a continued improvement in the Australian geography performance as part of the ANZ 2030 strategy.
- Given current capital levels continue to remain robust and well above regulatory minimums, no discount will apply to the dividend reinvestment plan for the 2026 final dividend, and it will be neutralised through an on-market purchase of shares.
- Liquidity ratios remained stable over the half year ended 30 September 2026 ("2H26") with an average liquidity coverage ratio of 132% and a net stable funding ratio of 116% at 30 September 2026, both remaining well above regulatory minimums.
- $25 billion of term wholesale debt was issued across the ANZBGL Group in 2H26, resulting in $40 billion in total of term wholesale debt issued across the ANZBGL Group in FY26."
