MANAGER'S OVERVIEW

Highlights:

- On 29 April 2016, JPEL paid down €20 million of the Lloyds Credit Facility
- NAV unchanged at \$1.25 per US\$ Equity Share

April NAV Performance

JPEL announced an unaudited net asset value ("NAV") per US\$ Equity share at 30 April 2016 of \$1.25, unchanged from the NAV per share at 31 March 2016. During the month, gains in Swania and Leeds V were offset by a decline in the public share value of FibroGen and Paratek, as well as a mark down of Almack Mezzanine I Fund.

At 30 April 2016, approximately 68% of the portfolio was valued from Sponsor reports dated 31 December 2015 or later.

The NAV of JPEL's 2017 ZDP Shares increased 0.7% to 94.79p in April.

April Share Price Performance

JPEL's US\$ Equity Share price increased 3.0% in April to \$0.945 from \$0.9175 at 31 March 2016.

JPEL's 2017 ZDP Share price increased 0.5% to 101.75p in the month of April.

Portfolio Updates

Swania – JPEL's investment in Swania, a spin-off of three French household brand companies from Reckitt-Benckiser: Baranne, O'Cédar and Maison Verte, was marked up based on its year-end valuation. The Sponsor increased the value of Swania given the progress the company made in 2015 to successfully establish the brands as a stand-alone business after the spin-off.

Leeds V – In April 2016, Leeds V completed the sale of their portfolio company Evanta Ventures, a provider of events, platforms and information offerings to train IT-security, human-resources and finance staff in collaboration and best practices. Evanta was realized at a premium to JPEL's previous holding value. In May 2016, JPEL received a distribution from Leeds of \$5.1 million, of which \$4.7 million was from the sale of Evanta (the remainder was from smaller realizations within the portfolio).

Life Sciences Holdings – Life Sciences Holdings was marked down approximately 14% in April due to a decline in the portfolio's two largest publicly traded companies: FibroGen Inc and Paratek Pharmaceuticals Inc. FibroGen's share price decreased 15.5% in April. Paratek's share price declined 10.2% during the month.

Almack Mezzanine I Fund – JPEL's investment in Almack was marked down due to a reduction in the valuation of Scandic Hotels.

Debt Repayment

On 29 April 2016, JPEL paid down €20 million of the Lloyds Credit Facility which reduced the outstanding balance of the facility to €20 million.

MANAGER’S OVERVIEW CONT.

Capital Call and Distribution Activity

In April, JPEL received distributions of \$3.7 million and funded capital calls of \$1.8 million. JPEL received distributions of \$1.3 million from Global Opportunistic Fund, \$0.6 million from Leeds Equity Partners IV from proceeds held in escrow and \$0.5 million from Alliant Group. In addition, the Company contributed \$1.7 million to Pilosio S.p.A., an Italian-based designer and builder of scaffolding and formwork products for large international construction and engineering groups. The follow-on investment was structured in the form of a three-year mezzanine loan yielding 15% PIK interest.

Disclosure

Private Equity Risks: Private Equity Funds invest exclusively or almost entirely in financial instruments issued by companies that are not listed (or take-over publicly listed companies with a view to delisting them). Investment in private equity funds is typically by way of commitment (i.e. whereby an investor agrees to commit to invest a certain amount in the fund and this amount is drawn down by the fund as and when it is needed to make private equity investments). The Company's interests in a private equity fund will consist primarily of capital commitments to, and capital contributions in various forms to, funds managed by third parties which make investments pursuant to private equity strategies which involve a high level of risk and uncertainty. Except for certain secondary funds, private equity funds will have no operating history upon which to evaluate their likely performance. Historical performance of private equity funds is not a guarantee or prediction of their future performance. Investments in private equity funds are often illiquid and investors such as the Company seeking to realise their holdings can experience significant delays, if realisation is possible at all, and fluctuations in value.

This document does not constitute an offer to sell, or a solicitation of an offer to buy, any security and may not be relied upon in connection with the purchase or sale of any security. Any such offer would only be made by means of formal offering documents.

In all cases where historical performance is presented, please note that past performance is not a reliable indicator of future results and should not be relied upon in connection with any investment decision. Unless otherwise indicated, performance figures presented herein are gross figures. Net performance figures will be lower due to the deduction of management fees and other Company expenses.

This document contains certain forward-looking statements with respect to the portfolio of investments of the Company. These statements and forecasts involve risk and uncertainty because they relate to events and depend upon circumstances that may or may not occur in the future. There are a number of factors that could cause actual results or developments to differ materially from those expressed or implied by these forward-looking statements and forecasts. Accordingly, you should not place undue reliance on any forward-looking statements contained in this document.

Any forecasts, figures, opinions, statements of financial market trends or investment techniques and strategies expressed are those of the Manager, unless otherwise stated, as of the date of issuance. They are considered to be reliable at the time of writing, but no warranty as to the accuracy, and reliability or completeness in respect of any error or omission is accepted. They may be subject to change without further notification.

The information contained in this document has not been verified. No responsibility, liability or obligation (whether in contract, tort or otherwise) is accepted by the Manager or by any of its officers, employees or agents as to or in relation to this document (including the accuracy, completeness or sufficiency thereof) or any other written or oral information or any errors contained therein or omissions therefrom, made available by the Manager and any such liability is expressly disclaimed.

Investments in Alternative Investment Funds (AIF's) involve a high degree of risks, including the possible loss of the original amount invested. The value of investments and the income from them may fluctuate in accordance with market conditions and taxation agreements. Changes in exchange rates may have an adverse effect on the value, price or income of the product(s) or underlying investment. Both past performance and yield may not be a reliable guide to future performance. There is no guarantee that any forecast will come to past.

The Company is generally a passive investor and has limited powers under the governing documents of the funds in which it holds interests. The funds concerned are, within certain broad parameters, generally authorised to follow broad investment guidelines and, subject thereto, are able to invest in geographies, industries and investment opportunities at their discretion. The Company does not review each proposed investment and is, subject to certain limited exceptions, unable to refuse to meet a call without suffering the consequences of a default. There can be no assurance that the strategies adopted by general partners or managers of the funds in which the Company holds interests will be successful or that the portfolio companies of such funds, or the Company's investments generally, will appreciate in value. The Company cannot make claims against general partners or managers of the funds in which the Company invests even in cases of poor performance except in very limited circumstances typically involving severe culpability on the part of the general partner or manager. The Company's recourse in the event of poor performance of the funds concerned is highly restricted.

The Company is dependent on certain information from third parties such as fund managers in relation to its investments. Those third parties (including fund managers) are themselves dependent on information made available by the management of relevant portfolio companies and/or investments. This information is necessarily limited, subjective and depends on the accuracy of judgments by the underlying companies, many of which are unquoted and not publicly traded and by the managers of the funds.

The Company's underlying portfolio of companies consists predominantly of unquoted companies. Market quotations are therefore not available for most of the Company's underlying portfolio companies. While the Company will make determinations in good faith as to the fair value of those investments, valuations (particularly valuations of investments for which market quotations are unavailable) are inherently uncertain, may fluctuate over short periods of time and may be based on estimates. As a consequence, determinations of fair value may differ materially from values that would have resulted if a ready market had existed. In addition, the fair value of investments reported by the Company may be higher than the values which are ultimately realised upon the disposal of the investments. The Company cannot make any assurance that the funds in which it has interests will be able to realise the unrealised investment values that are presented in this document or otherwise.

The information contained in this report is derived from the Company's books and records and is as of the date stated above. The unquoted investments in funds are valued in accordance with International Private Equity and Venture Capital Valuation Guidelines (IPEVCG) and other policies adopted by the Company.
