

Interim report for first half of 2021

January-June 2021 compared with July-December 2020

- Lower funding costs impacted net interest income positively
- Stable net gains and losses
- Good credit quality with continued very low loss levels
- Solid capital position

Overview

About Swedbank Mortgage AB

Swedbank Mortgage AB (publ) ("Swedbank Mortgage"), corporate identification number 556003-3283, is a wholly owned subsidiary of Swedbank AB (publ) 502017-7753 ("Swedbank") and is responsible for mortgage lending in Sweden. With over one million customers, Swedbank Mortgage has a leading position on the Swedish market. Mortgages are mainly sold through Swedbank's and the Swedish savings banks' retail network, one of the largest bank-owned retail networks in Sweden, as well as through the telephone services and Internet Bank.

No lending with collateral outside of Sweden is performed.

Swedbank Mortgage finances properties and individual tenant-owned apartments up to 85 per cent of their estimated market value. The company also lends directly to municipalities or other borrowers with municipal guarantees as collateral as well as to the forestry and agricultural sector.

Swedbank Mortgage's operations are integrated in Swedbank, which creates economies of scale with the bank's other operations.

Market

The economic recovery continued in the first half of 2021. This was most notable in manufacturing, which also positively affected industrial services. The rest of the service sector strengthened as well, but at a slower rate. For activity in the service sector to truly gain momentum would probably require the lifting of more pandemic-related restrictions. Vaccinations are continuing at a high rate than, which has strengthened the prospects of a continued recovery.

The financial markets increasingly focused on the Federal Reserve's monetary policy and any signs of change in the current expansionary approach. Despite the recovery and surprisingly high inflation, a majority of voting members of the FOMC do not think the time is right to signal a tightening of monetary policy. This is because the rising inflation is largely due to temporary factors related to the reopening of the economy. US long-term yields fell slightly and the US dollar was marginally weaker against both the euro and the krona.

In Europe, the situation is different with the recovery taking longer and vaccinations starting more slowly than in the US. It will take longer therefore before restrictions can be lifted and the recovery accelerates. Inflation has also risen in Europe, but here as well it has largely been due to temporary factors. Swedbank expect the ECB to leave benchmark rates unchanged this year and next.

For the Swedish economy, Swedbank expect the recovery to continue this summer as Covid-19 cases drop and restrictions are lifted. Households are expected to consume more services again, which will be an important driver in the recovery.

Despite a major economic recovery, Swedbank do not think that medium-term inflation will reach the Riksbank's target. Although it is soon time for the Swedish central bank to signal when we could see tighter monetary policy, Swedbank expect it to keep the repo rate at 0 per cent in the coming years.

Swedish house prices have continued to rapidly rise. In May, prices were up 18 per cent compared with the same month in 2020. The increase has been driven by continued low mortgage rates and, with the increase in remote work, because households have made housing a higher priority during the pandemic. As a result, prices of single-family homes and large apartments have risen the most, and supply there is low.

Swedbank expect prices to moderate as consumer spending patterns normalise and the housing supply increases. As prices have climbed and many people have chosen to renovate or add on to their homes – and in the process increased their loans – credit growth has risen and in May was 6.2 per cent year-over-year.

Important to note

The interim report contains alternative performance measures that Swedbank Mortgage considers valuable information for the reader, since they are used by the Swedbank Mortgage executive management and the Swedbank Group executive management for internal governance and performance measurement as well as for comparisons between reporting periods. Further information on the alternative performance measures used in the interim report can be found on page 31.

The company's development

Result first half of 2021 compared with second half of 2020

Swedbank Mortgage reported profit of SEK 5 013m in the second half of 2020, compared with SEK 4 776m in the previous half-year. The increase is mainly due to higher net interest income.

Net interest income increased to SEK 6 296m (5 999). The main reason was that lower funding expenses, positively affected mortgage margins.

Net gains and losses on financial items decreased to SEK 79m (96), in part due to lower covered bond repurchases.

Expenses were unchanged at SEK 138m (138).

Credit impairments amounted to a gain of SEK 67m, compared with positive credit impairments of SEK 111m in the previous half-year, due to lower provisions within mortgage lending to the private and property management. As there is a risk that credit quality may start to deteriorate due to Covid-19 and that the quantitative risk models may not appropriately incorporate this, post-model adjustments to the credit impairment provisions were deemed necessary resulting in higher provisions in the property management and hotels and restaurants segments.

The tax expense amounted to SEK 1 301m (1 302), corresponding to an effective tax rate of 20.6 per cent (21.4).

Result first half of 2021 compared with first half of 2020

Swedbank Mortgage reported profit of SEK 5 013m for the first half of 2021, compared with SEK 4 253m in the first half of 2020. The increase is mainly due to higher net interest income.

Net interest income increased to SEK 6 296m (5 696). The main reason was that decreased funding expenses due to lower short-term market interest rates.

Net gains and losses on financial items increased to SEK 79m (-80), in part due to lower covered bond repurchases and increased prepayment fees.

Expenses were stable at SEK 138m (138).

Credit impairments amounted to a gain of SEK 67m (-79). The main reason was lower stage 1 and stage 2 provisions connected to macroeconomic scenarios had a positive impact. As there is a risk that credit quality may start to deteriorate due to Covid-19 and that the quantitative risk models may not appropriately incorporate this, post-model adjustments to the credit impairment provisions were deemed necessary resulting in higher provisions in the property management and hotels and restaurants segments.

The tax expense amounted to SEK 1 301m (1 157), corresponding to an effective tax rate of 20.6 per cent (21.4).

Lending

Total loans to the public increased by SEK 14bn in the first half of 2021, to SEK 1 068bn as of 30 June 2021 (SEK 1 054bn as of 31 December 2020). Compared with 30 June 2020, the increase was SEK 27bn, corresponding to an annual growth rate of 3 per cent.

Lending to general public, SEKbn	2021 30 Jun	2020 31 Dec	2020 30 Jun
Private customers	948	931	918
Private, mortgage	862	844	828
Tenant owner associations	86	87	90
Corporate customers	120	123	123
Agricultural, forestry, fishing	48	48	49
Property management	60	62	61
Other corporate lending	12	13	13
Total	1 068	1 054	1 041

The large part of the increase in the first half of 2021 was due to higher private mortgage volumes. Mortgage lending to the private segment increased in total by SEK 18bn compared with 31 December 2020, to SEK 862bn (844). The total market share was 23 per cent (23) as of 31 May. Lending to tenant-owner associations fell by SEK 1bn, to SEK 86bn (87).

Corporate lending of SEK 120bn (123) decreased by SEK 3bn mainly within property management.

Funding and liquidity

Swedbank Mortgage funds its lending primarily by issuing covered bonds on the Swedish and international capital markets. Remaining funding needs are met through loans from Swedbank AB.

The funding process is simplified because Swedbank Mortgage has a number of standardised borrowing programmes that are adapted to meet the legal requirements of various types of markets and investors.

Amounts owed to credit institutions and issued debt, SEKbn	2021 30 Jun	2020 31 Dec	2020 30 Jun
Amounts owed to credit institutions	625	600	521
Debt securities in issue	486	501	572
Eligible liabilities	15	15	10
Total	1 126	1 116	1 103

Demand for Swedbank Mortgage's bonds has been good at the same time that the funding need has been low given the deposit growth within the Group.

Swedbank Mortgage issued only SEK 33bn (6 second half of 2020) in covered bonds in the first half of 2021 due to the lower funding need. Maturities in the first half of 2021 were nominally SEK 33bn (50 second half of 2020)

As of 30 June, outstanding funding through covered bonds amounted to SEK 486bn (501) at the same time that funding from Swedbank AB amounted to SEK 640bn (615). Issuance plans are mainly affected by changes in available funding from Swedbank AB as well as lending growth and are adjusted over the course of the year.

As part of its liquidity planning, Swedbank Mortgage actively buys back a large portion of its issuance in the Swedish bond market starting about 1.5 years before maturity. In this way it reduces the liquidity risk when large volumes mature at the same time. In the first half of 2021, SEK 15bn (20 second half of 2020) was repurchased. The average maturity of all outstanding covered bonds was 31 months (35) at 30 June.

Capital adequacy

Swedbank Mortgage's legal capital requirement is based on the Capital Requirements Regulation (CRR). Swedbank Mortgage's total capital ratio was 16.2 per cent as of 30th of June 2021 (16.4 per cent per 31st of December 2020), to be compared with the capital requirement of 11.1 per cent.

Total own funds remained unchanged during the first half of the year and amounted to SEK 46.1bn (46.1). REA increased by SEK 2.4bn to SEK 283.6bn (281.2). The increase was due to credit risk REA including article 458. The capital adequacy is further disclosed in note 13.

The leverage ratio was 4.4 per cent (4.3) as of 30th of June 2021.

Future capital regulations

In November 2020, the Swedish FSA approved amended rules and a change in the application of banks' capital requirements. The change is based on the amendments to the capital adequacy rules resulting from the implementation of the EU's banking package.

The new application will result in changes in how the Pillar 2 requirement is determined. According to the new regulations, the Swedish FSA will set a Pillar 2 requirement and announce guidance on the additional capital that the bank should hold to cover risks and manage future financial stresses.

In the decision, the Swedish FSA also gives its view of how a leverage ratio requirement should be introduced. The minimum requirement is 3 per cent of the exposure amount for the leverage ratio. In addition, the Swedish FSA will announce another leverage ratio requirement in the form of guidance. The leverage ratio requirement will be met in parallel with the risk-based requirements.

A decision on Pillar 2 requirements and information on Pillar 2 guidance will be announced after the next evaluation and review, which in Swedbank Mortgage's case means the end of the third quarter 2021.

On 1 July 2021, an amended Resolution Act took effect. The amendments are based on the EU's Bank Recovery and Resolution Directive (BRRD II), which among other things contains provisions on the minimum requirement for own funds and eligible liabilities (MREL). Due to the amended law, the Swedish National Debt Office published a new policy on how to implement

the MREL on 1 January 2022. The phase-in will be completed by 1 January 2024. Part of the requirement will be met with own funds and subordinated eligible liabilities while the rest can be met with eligible liabilities.

In November 2018, the Swedish FSA published a memorandum explaining its view of the European Banking Authority's (EBA) updated guidelines on banks' internal risk rating based models. In the memorandum the Swedish FSA states that Swedish banks must analyse their internal rating based models to ensure that they continue to live up to the updated requirements. Implementation of the new guidelines was supposed to be completed by the end of 2021, but could be delayed according to the Swedish FSA. The implementation is expected to increase the REA.

In December 2017, the Basel Committee presented the finalised Basel III framework, usually called Basel IV. The reforms contain a number of policy and supervisory actions to strengthen the reliability and comparability of risk-weighted capital ratios and reduce unjustified differences in capital requirements between banks and countries. The actions include revisions to the standardised approaches used to estimate the banks' capital requirements for credit risk. A floor was introduced for banks that use internal models to calculate risk-weighted assets. The floor means that risk-weighted assets may not fall below 72.5 per cent of the amount calculated using the standardised approach. The proposed changes would be introduced gradually starting in 2023 and be fully implemented by 2028.

Risks

The main risks consist of credit risk, liquidity risk, market risk, operational risk, sustainability risk and compliance risk. Swedbank Mortgage has a low risk profile with a well-diversified credit portfolio as well as limited market and operational risks.

Credit and asset quality

Swedbank's credit quality remained good in the first half of 2021. The visible economic impact from Covid-19 remained small for the majority of Swedbank's lending and credit quality in the bank's large mortgage portfolio continued to be stable. Government support mainly targeted at the hardest hit sectors has dampened the effects of Covid-19 and kept the number of customers with payment problems at low levels. Despite the pandemic, Swedbank Mortgage's credit impairments and impaired loans remain at very low levels.

House prices and the number of transactions in Sweden reached new highs in the first half of 2021. The mortgage portfolio is high in quality and historical credit impairments remain very low. In the lending process, customers' long-term solvency is critical in order to ensure high quality and low risks. In addition, the measures taken by authorities have strengthened social welfare systems, such as health and unemployment insurance, mitigating the negative effects of COVID-19 at the household level.

The average loan-to-value ratio for private lending was 52 per cent (54), based on property level. For new lending in the half-year the loan-to-value ratio was 69 per cent (70).

For more information on asset quality, see the fact book for the Swedbank Group as well as Swedbank Mortgage's section in the Swedbank Group's Pillar 3 report.

Operational risks

In the first half of 2021, no incidents occurred which materially affected Swedbank Mortgage. Losses related to operational risks remained very low.

Rating

Swedbank Mortgage is one of the largest participants in the Swedish covered bond market. The bonds have the highest credit rating (Aaa/AAA) from both Moody's Investors Service and S&P Global Ratings. Due to deficiencies in Swedbank's compliance and anti-money laundering work, all the rating agencies downgraded Swedbank AB in March and April 2020. After the downgrade, all the agencies raised Swedbank's outlook to stable. Swedbank Mortgage's rating tracks Swedbank AB's, so Swedbank Mortgage was downgraded as well. The ratings for the covered bonds were not affected.

	Moody´s Rating	Moody's Outlook	S&P Rating	S&P Outlook
Covered bonds	Aaa	N/A	AAA	Stable
Long-term funding	Aa3	Stable	A+	Stable
Short-term funding	P-1	N/A	A-1	N/A

Other events

At an Extraordinary General Meeting on January 18, Johan Smedman was elected as new Chairman of the Board of Swedbank Hypotek AB. At the Annual General Meeting on March 26, Ola Laurin was elected as new Chairman of the Board.

Events after 30 June 2021

No material events have occurred after 30 June 2021.

Notes

The interim report has been prepared on a going concern basis.

On 15 July 2021, the Board of Directors and the CEO approved the interim report for publication. Swedbank Mortgage, which maintains its registered office in Stockholm, Sweden, is a wholly owned subsidiary of Swedbank (publ).

All amounts in the notes are in millions of Swedish kronor (SEKm) and at book value unless otherwise indicated.

Note 1 Accounting policies

The interim report has been prepared in accordance with IAS 34, Interim Financial Reporting. The report is also compliant with the Annual Accounts Act for Credit Institutions and Securities Companies, the directives of the Swedish Financial Supervisory Authority, and recommendation RFR 2 of the Financial Reporting Council.

The accounting policies applied in the interim report conform to those applied in the Annual Report for 2020, which was prepared in accordance with International Financial Reporting Standards as adopted by the European Union and interpretations thereof. There have been no significant changes to Swedbank Mortgage's

accounting policies set out in the 2020 Annual Report, except for the new standards and change as set out below.

Amendments for Interest Rate Benchmark Reform (phase 2)

Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 due to the Interest Rate Benchmark Reform – Phase 2 are applied from 1 January 2021.

The amendments address the accounting issues that arise when financial instruments that reference an IBOR interest rate transition to an alternative benchmark rate. The amendments include a practical expedient for modifications required by the Interest Rate Benchmark Reform (the Reform), to be treated as changes to a floating interest rate. They also permit changes required by the Reform to be implemented in hedge designations and hedge documentation without the hedging relationship being discounted. The adoption did not have any impact on Swedbank Mortgage's financial position, results, cash flows or disclosure.

Changes in Swedish regulations

The amended Swedish regulations that have been adopted from 1 January 2021 have not had a significant impact on Swedbank Mortgage's financial position, results, cash flows or disclosures.

Results and balance in the Private segment relate to consumer loans to finance residential housing. The corresponding items for Corporate relate primarily to loans to municipal housing companies and tenant-owner associations with underlying collateral in multifamily housing. The Forestry and Agricultural segment comprises loans to finance forest and agricultural properties. Items in operating profit that are not included in the segments consist of changes in the value of financial instruments, the return of legal equity and other undistributed minor items. Return on legal equity comprises interest income on assets funded by equity.

Calculation of credit impairment provisions

The measurement of expected credit losses is described in Note 4a Credit risk on pages 24-26 of the 2020 Annual Report. There have been no significant changes during the year to the methodology.

Measurement of 12-month and lifetime expected credit losses

The onset of Covid-19 in 2020 brought a deterioration of macroeconomic indicators – inter alia GDP growth, housing and property prices, unemployment, oil prices and interest rates – that would typically have contributed to increased credit risk. The downturn has, however, not resulted in the increased credit losses or default rates that one would expect from historical experience of similar economic shocks. Government and regulator support measures have been successful in suppressing the economic impacts of Covid-19 but there is a risk that credit quality may start to deteriorate as such measures end. There are also continued uncertainties which could further delay the recovery, namely relating to vaccination progress and effectiveness and to the potential for further outbreaks sparked by new variants. As the quantitative risk models do not appropriately incorporate these dynamics, post-model adjustments to increase the credit impairment provisions continue to be deemed necessary.

The post-model expert credit adjustments were decrease to SEK 42m (SEK 44m as of 31 December 2020). The post-model expert credit adjustments are allocated as: SEK 20m in Stage 1, SEK 21m in Stage 2 and SEK 1m in Stage 3. The most significant impacts are reflected in the Property management (29m SEK) and Hotels and Restaurants (7m SEK) sectors.

Determination of a significant increase in credit risk

The tables below show the quantitative thresholds used by Swedbank Mortgage for assessing a significant increase in credit risk, namely:

- changes in the 12-month PD and internal risk rating grades, which have been applied for the portfolio of loans
 originated before 1 January 2018. For instance, for exposures originated with a risk grade between 0 and 5, a
 downgrade by 1 to 2 grades from initial recognition is assessed as a significant change in credit risk. Alternatively, for
 exposures originated with a risk grade between 13 and 21, a downgrade by 3 to 8 grades from initial recognition is
 considered significant. Internal risk ratings are assigned according to the risk management framework outlined in Note 4
 Risks in the 2020 Annual Report.
- changes in the lifetime PD, which have been applied for the portfolio of loans originated on or after 1 January 2018. For
 instance, for exposures originated with a risk grade between 0 and 5, a 50 per cent increase in the lifetime PD from
 initial recognition is assessed as a significant change in credit risk. Alternatively, for exposures originated with a risk
 grade between 13 and 21, an increase of 150-300 per cent from initial recognition is considered significant.

These limits reflect a lower sensitivity to change in the low risk end of the risk scale and a higher sensitivity to change in the high-risk end of the scale. The Group has performed a sensitivity analysis on how credit impairment provisions would change if thresholds applied were increased or decreased. A lower threshold would increase the number of loans that have migrated from Stage 1 to Stage 2 and, also increase the estimated credit impairment provisions. A higher threshold would have the opposite effect.

The tables below disclose the impacts of this sensitivity analysis on the credit impairment provisions. Positive amounts represent higher credit impairment provisions that would be recognised.

Significant increase in credit risk, financial instruments with initial recognition before 1 January 2018

Impairment provision impact of

Incorporation of forward-looking macroeconomic scenarios

A new Swedbank Economic Outlook was published on 20 January which serves as the base scenario, with an assigned probability weight of 66.6 per cent. Aligned with the updated base scenario, new alternative scenarios were developed, with assigned probability weights of 16.7 per cent on both the upside and downside scenario. These new macroeconomic scenarios were included in the expected credit losses calculations according to the Group's usual monthly process.

The revised global forecast mainly reflects the more rapid vaccine rollout and massive fiscal stimulus, especially in the US. In addition, many economies showed a surprising resilience at the end of last year and beginning of this year, despite the still-serious pandemic situation. This better-than-expected development over the past few months lifts the growth rates this year. The world economy is expected to grow by 5.9% in 2021 and by 4.4% in 2022.

The recovery in the Swedish economy has continued during the beginning of 2021, although the pandemic is still weighing on parts of the services sector. Vaccination is ongoing, and Growth is expected to pick up in the second half of this year and in 2022 as society gradually reopens, with a revised growth outlook for this year to 3.5%. Growth in 2022 is estimated to be around 3.6%. Unemployment is expected to fall at a fairly rapid pace, from around 8.9% at present to 7.3% by the end of 2022. The baseline scenario assumes that seasonal effects over the summer will lead to a decline in Covid-19 cases in Europe, together with a gradual increase in vaccination rates. Further, it is assumed that a high rate of immunisation will be reached by the fall when the benign seasonal effects wane. In the US, a better vaccine outlook contributes to an earlier acceleration of the recovery than in the EU.

The table above contains financial instruments measured at fair value by valuation level. The Swedbank Mortgage uses various methods to determine the fair value for financial instruments depending on the degree of observable market data in the valuation and activity in the market. Market activity is continuously evaluated by analysing factors such as differences in bid and ask prices.

The methods are divided into three different levels:

- Level 1: Unadjusted, quoted price on an active market
- · Level 2: Adjusted, quoted price or valuation model with valuation parameters derived from an active market
- · Level 3: Valuation model where significant valuation parameters are non-observable and based on internal assumptions.

When financial assets and financial liabilities in active markets have market risks that offset each other, an average of bid and ask prices is used as a basis to determine the fair values of the risk positions that offset each other. For any open net positions, bid rates are applied for long positions and ask rates for short positions.

Swedbank Mortgage has a continuous process whereby financial instruments that indicate a high level of internal estimates or low level of observable market data are captured. The process determines the way to calculate and how the internal assumptions are expected to affect the valuation. In cases where internal assumptions have a significant impact on fair value, the financial instrument is reported in level 3. The process also includes an analysis and evaluation based on the quality of the valuation data as well as whether a type of financial instrument is to be transferred between levels.

When transfers occur between fair value hierarchy levels those are reflected as taking place at the end of each period. There were no transfers of financial instruments between valuation levels 1 and 2 during the period.

Note 13 Capital Adequacy

Capital adequacy analysis

Capital adequacy regulations determine how much capital, designated as the own funds, a credit institution must have in relation to its risk weighted assets. For Swedbank Mortgage the capital adequacy rules according to CRR mean that the minimum capital requirement for credit risks is based, with the approval of the SFSA, on an internal risk measurement using the IRB approach established by Swedbank. For a small share of the assets the capital requirement for credit risks is calculated according to the standardised approach. The capital requirement for operational risk is calculated, with the approval of the SFSA, using the standardised approach.

Swedbank Mortgage also establishes and documents its own methods and processes for evaluating the company's capital requirements. The capital requirement is evaluated systematically on the basis of the total level of risks to which Swedbank Mortgage is exposed. All risks are taken into account, including those not included in the calculation of capital adequacy.

The note contains the information made public according to SFSA Regulation FFFS 2014:12, chap. 8. Additional periodic information according to Regulation (EU) No 575/2013 of the European Parliament and the Council on supervisory requirements for credit institutions as well as Implementing Regulation (EU) No 1423/2013 of the European Commission can be found in the Swedbank group's report on Swedbank's website:

Alternative performance measures

The interim report includes several alternative performance measures, which provide more comparative information between the reporting periods. The executive management believes that inclusion of these measures provides information to the readers that enable comparability between periods. These alternative performance measures are set out below.

Measure	Definition
Credit Impairment ratio	Credit impairment on loans and other credit risk provisions, net, in relation to the opening balance of loans to credit institutions and loans to public after provisions.
Credit impairment provision ratio Stage 1 loans	Credit impairment provisions Stage 1 in relation to the gross carrying amount Stage 1 loans
Credit impairment provision ratio Stage 2 loans	Credit impairment provisions Stage 2 in relation to the gross carrying amount Stage 2 loans
Credit impairment provision ratio Stage 3 loans	Credit impairment provisions Stage 3 in relation to the gross carrying amount Stage 3 loans
Equity per share	Shareholders equity in relation to the number of shares outstanding.
Investment margin	Net interest margin is calculated as Net interest income in relation to average total assets. The average is calculated using month-end figures, including the prior year end.
Return on equity	Profit for the period allocated to shareholders in relation to average equity attributable to shareholders. The average is calculated using month-end figures.
Share of stage 1 loans, gross	Carrying amount of Stage 1 loans, gross, in relation to the carrying amount of loans to credit institutions and the public excluding provisions.
Share of stage 2 loans, gross	Carrying amount of Stage 2 loans, gross, in relation to the carrying amount of loans to credit institutions and the public excluding provisions.
Share of Stage 3 loans, gross	Carrying amount of Stage 3 loans, gross, in relation to the carrying amount of loans to credit institutions and the public excluding provisions.
Total credit impairment provision ratio	Credit impairment provisions in relation to the gross carrying amount loans

Signatures of the Board of Directors and the President

The Board of Directors and the CEO certify that the interim report for 2021 provides a fair and accurate overview of the operations, financial position and the results of the Company and that it describes the significant risks and uncertainties faced by the Company.

Auditor's report

Introduction

We have reviewed the condensed interim financial information (interim report) of Swedbank Hypotek AB for the period 1 January 2021 to 30 June 2021. The board of directors and the CEO are responsible for the preparation and presentation of the interim financial information in accordance with IAS 34 and the Swedish Annual Accounts Act for Credit Institutions and Securities Companies. Our responsibility is to express a conclusion on this interim report based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements ISRE 2410, Review of Interim Report Performed by the Independent Auditor of the Entity. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing, ISA, and other generally accepted auditing standards in Sweden. The procedures performed in a review do not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, in accordance with IAS 34 and the Swedish Annual Accounts Act for Credit Institutions and Securities Companies.
