⁽¹⁾ Represents the percentage of TD Variable Interest Rate Mortgages (TD VRMs) where the customer's contractual payment is no longer sufficient to cover the interest owed. With TD VRMs, the customer's contractual payment amount will remain the same as the TD Mortgage Prime Rate changes. Any interest that is not covered by the contractual payment is then added to the customer's principal amount and the customer's amortization period will increase unless the customer takes action to make the mortgage amortizing again (e.g. makes a lump sum principal payment or increases their contractual payment amount).

TD Covered Bond (Legislative) Programme Monthly Investor Report

Calculation Date: 7/1/2024
Date of Report: 8/28/2024

(1) Current LTV is based on the quarterly indexation of the original or renewal appraised value.

Appendix - Cover Pool Indexation and Valuation Methodology

As of the date of this Investor Report, the Guarantor uses the following methodology to determine indexed valuations for Properties in the Covered Bond Portfolio for reporting as of a date on or after January 1, 2018 (the "Indexation Methodology") for purposes of the following: (a) the Asset Coverage Test; (b) the Amortization Test; (c) the Valuation Calculation and (d) for other purposes required by the CMHC Guide. Changes to the Indexation Methodology may only be made (i) upon notice to CMHC and satisfaction of any other conditions specified by CMHC in relation thereto; (ii) if such change constitutes a material change, subject to satisfaction of the Rating Agency Condition; and (iii) if such change is materially prejudicial to the Covered Bondholders, subject to the consent of the Bond Trustee. The Indexation Methodology must at all times comply with the requirements of the CMHC Guide.

To determine the current market value of a Property, the Guarantor uses The Teranet National Bank House Price IndexTM (the "NPI Index") and The Teranet - National Bank City House Price IndexTM (the "CHPI Index", and together with the NPI Index, the "Indices"). At this time, the Property value is calculated using the CHPI Index available for the following eleven Canadian metropolitan areas: Alberta-Calgary, Alberta-Edmonton, British Columbia-Vancouver, British Columbia-Vicinity, Manitoba-Winnipeg, Nova Scotia-Halifax, Ontario-Mississauga, Ontario-Toronto, Ottawa-Ottawa, Quebec-Montreal, Quebec-Quebec City and the "Composite TP" NPI Index for all other cities outside of the above listed metropolitan areas. The "Composite TP" NPI Index combines the aforementioned eleven Canadian metropolitan areas to form a national composite index.

Further details on the Indices including a description of the method used to calculate the Indices is available by subscription at <https://housepricesindex.ca/>.

A three step process is used to determine the current market value for each Property subject to the Related Security in respect of the Loan. First, a code (the Forward Sorting Area) which identifies the location of the Property is compared to corresponding codes published by Canada Post that groups properties into the areas covered by the Indices. Second, the rate of change for the applicable area is used to calculate a house price index factor (the "HPI Factor"). In order to calculate the applicable HPI Factor, if the Property is located within an area covered by the CHPI Index, the applicable CHPI Index will be used based on the city mapping assigned in parenthesis above and if the Property is located outside of the metropolitan areas covered by the CHPI Index, the "Composite TP" NPI Index is used. Finally, the current market value is then determined by adjusting the original valuation for such Property, by applying the corresponding HPI Factor from the date of the original valuation to the date on which the latest valuation is being adjusted for purposes of determining the current market value for such Property. In instances where the original valuation in respect of such property pre-dates the first available date for the relevant rate of change in the Indices, the nearest available date within two months for such rate of change is used to determine the rate of change to apply to adjust the latest valuation for purposes of determining the current market value for such Property. The process is repeated at least quarterly.

Material risks associated with using the Indexation Methodology include, but are not limited to, the accuracy and completeness of the Indices being used, the continued availability of the Indices, the risk that the Indices do not account for differences in property value changes based on property type, and, in the case of Properties located outside of the areas covered by the CHPI Index, the risk that the "Composite TP" NPI Index may not accurately capture unique factors affecting local housing markets.

The Teranet National Bank House Price IndexTM and The Teranet - National Bank City House Price IndexTM are trademarks of Teranet Enterprises Inc. and National Bank of Canada and have been licensed for internal use by The Toronto-Dominion Bank's real estate secured lending team only. The Indices are provided on an "as is" and "no warranty" basis without warranties or representations, express or implied, of any kind.

Risk Factors:

Other Factors Which Are Material for the Purpose of Assessing the Market Risks Involved in an Investment of the Covered Bonds.

The Issuer and the Guarantor have entered into an Interest Rate Swap Agreement that provides the Guarantor with a hedge against possible variances in the rates of interest payable on the Loans and related amounts in the Covered Bond Portfolio (which may, for instance, include variable rates of interest or fixed rates of interest) and the amount (if any) payable by it under the Intercompany Loan and, following the Covered Bond Swap Effective Date, the Covered Bond Swap Agreement. The interest rate swap confirmation is effective and cashflow are being exchanged pursuant thereto. The Issuer may be required to post collateral to secure its obligations under the Interest Rate Swap Agreement upon the activation of rating triggers. These rating triggers have not been activated and no collateral has been posted yet. Further details can be found in the Base Prospectus in the section entitled "Summary of the Principal Documents - Interest Rate Swap Agreements", Rating Trigger Descriptions above.

The Issuer and the Guarantor have entered into Covered Bond Swap Agreements that provide the Guarantor with a hedge against currency and/or other risks arising, following the Covered Bond Swap Effective Date, in respect of amounts received by the Guarantor under the Interest Rate Swap Agreement and amounts payable in respect of its obligations under the Covered Bond Guarantee. The parties have entered into a separate swap confirmation for each outstanding Series of Covered Bonds. The covered bond swap confirmations are contingent and will only become effective upon the Covered Bond Swap Effective Date, as more particularly described in the latest version of the prospectus. None of these confirmations are effective and cashflows are not being exchanged pursuant thereto. The Issuer may be required to post collateral to secure its obligations under the Covered Bond Swap Agreements upon activation of rating triggers. These rating triggers have not been activated and no collateral has been posted yet. Further details can be found in the [Base Prospectus](#) in the section entitled "Summary of the Principal Documents - Covered Bond Swap Agreement", Rating Trigger Descriptions above.

Terms and Conditions of the Covered Bonds - Condition 6.01 - Redemption and Purchase

Credit Structure - Reserve Fund

Appendix - Maturity Structure

Soft Bullet

All outstanding series are soft bullets. An Extended Due for Payment Date twelve months after the Final Maturity Date has been specified in the Final Terms of each Series. The Coupon Rate specified in this report in respect of each Series applies until the Final Maturity Date of that Series following which the Floating rate of interest specified in the Final Terms of each Series is payable monthly in arrears from and including the Final Maturity Date to but excluding the Extended Due for Payment Date. If the Issuer fails to pay the Final Redemption Amount of a series of Covered Bonds on the Final Maturity Date (subject to applicable grace periods) and the Guarantor has insufficient monies available in accordance with the Priorities of Payments to pay in full the Guaranteed Amounts corresponding to the Final Redemption Amount, then payment of the unpaid amount pursuant to the Covered Bond Guarantee will be deferred and will be due and payable on the Extended Due for Payment Date specified in the applicable Final Terms. To the extent it has available funds, the Guarantor will be required to make partial payment of amounts remaining unpaid on each interest Payment Date until the Extended Due for Payment Date.

If the Covered Bond is not redeemed in full on the scheduled maturity date, its legal maturity is contractually extended up to the extended maturity date pursuant to Condition 6.01 in the [Base Prospectus](#)
