ANNEX TO FINAL TERMS – SUMMARY OF THE NOTES

Summaries are made up of disclosure requirements known as 'Elements'. These elements are numbered in Sections A – E (A.1 – E.7).

This summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of 'not applicable'.

Section D – Risks		
D.2	Key risks that are specific to the Issuer	<p>There are a number of factors which could cause ANZNIL's actual results to differ, in some instances materially, from those anticipated. By investing in the Notes, an Investor is exposed to the risk that some or all of these factors could negatively affect ANZNIL and, in turn, negatively impact the value of the Notes.</p> <p>As a subsidiary of a bank, ANZNIL's activities are exposed to a complex and varied set of risks. If any of these risks materialise, there is the potential they could adversely impact ANZNIL's business, operations and financial condition.</p> <p>The key risks inherent in ANZNIL's operations can be broadly grouped under the main categories of:</p> <p>capital adequacy risk (being the risk of loss arising from ANZNIL failing to maintain the level of capital required by prudential regulators and other key stakeholders (shareholders, debt investors, depositors, rating agencies) to support ANZNIL's consolidated operations and risk appetite);</p> <p>credit risk (being the risk of financial loss to ANZNIL resulting from a counterparty failing to fulfil its obligations, or from a decrease in credit quality of a counterparty resulting in a loss in value);</p> <p>market risk (being the risk to ANZNIL's earnings arising from changes in interest rates, foreign exchange rates, credit spreads, volatility, correlations or from fluctuations in bond, commodity or equity prices);</p>
		<p>liquidity and funding risk (being the risk that ANZNIL is unable to meet its payment obligations as they fall due, including repaying depositors or maturing wholesale debt, or that ANZNIL has insufficient capacity to fund increases in assets);</p> <p>operational risk (being the risk of loss to ANZNIL resulting from inadequate or failed internal processes, people and systems, or from external events, including technology risk, cyber risk, legal risk and conduct risk, or damage arising from inadequate or failed internal processes, people and systems, but excluding strategic risk);</p>
		<p>compliance risk (being the probability and impact of an event that results in a failure to act in accordance with laws, regulations, industry standards and codes, internal policies and procedures and principles of good governance as applicable to ANZNIL's businesses);</p> <p>reputational risk (being the risk of loss caused by adverse perceptions of ANZNIL held by the public, shareholders, investors, regulators, or rating agencies that directly or indirectly impact earnings, capital adequacy or value);</p> <p>insurance risk (being the risk to ANZNIL of unexpected losses resulting from worse than expected claims experience (variation in timing and amount of insurance claims due to incidence or non-incidence of death, sickness, disability or general insurance claims) and includes inadequate or inappropriate underwriting, claims management, reserving, insurance concentrations, reinsurance management, product design and pricing which will expose an insurer to financial loss and the consequent inability to meet its liabilities);</p>

		<p>reinsurance risk (being the risk to ANZNIL that a reinsurer fails to meet their contractual obligations, i.e. to pay reinsurance claims when due); and</p> <p>strategic risk (being the risk that affects or is created by ANZNIL's business strategy and strategic objectives).</p> <p>ANZNIL is not directly exposed to all of the above risks. This is because ANZNIL on-lends to ANZ New Zealand on matching terms all funds raised by ANZNIL under its funding programmes and ANZ New Zealand fully guarantees all obligations under ANZNIL's funding programmes. As a result, ANZNIL is largely dependent on its parent, ANZ New Zealand and so all of the above risks indirectly impact ANZNIL.</p> <p>If any of these key risks actually occurs, ANZNIL's business, operations, financial condition or reputation could be materially adversely affected, with the result that the trading price of the Notes could decline and investors could lose all or part of their investment. Importantly, ANZNIL's risk profile at any point in time, including the probability and impact of certain risks occurring, is heavily influenced by (and invariably changes over time according to) prevailing general business, economic and market conditions in the major countries and regions in which ANZNIL operates or trades.</p>
D.3	Key risks that are specific to the Notes	<p>Investing in Notes will be subject to risks and no bank deposit protection scheme applies to the Notes. These risks include the fact that a majority of Noteholders may bind the minority, that taxes may be withheld from the Notes and that no trading market exists for the Notes, so they may be illiquid.</p>
		<p><i>Issue-specific Summary:</i></p> <p>Unlike a bank deposit, the Notes are not protected by the Banking Act 1959 of Australia or any deposit protection scheme in any other jurisdiction. As a result, no compensation will be paid to an investor in the Notes upon the failure of ANZNIL and/or the Guarantor. If ANZNIL and/or the Guarantor go out of business or become insolvent, Noteholders may lose all or part of their investment in the Notes.</p> <p>An investment in Fixed Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Fixed Rate Notes and the interest paid under Fixed Rate Notes will be less than the then applicable market interest rate.</p>
		<p>The conditions of the Notes contain provisions for calling meetings of Noteholders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all Noteholders including Noteholders who did not attend and vote at the relevant meeting and Noteholders who voted in a manner contrary to the majority.</p>
		<p>The holder may not receive payment of the full amounts due in respect of the Notes as a result of amounts being withheld by ANZNIL or the Guarantor in order to comply with applicable law.</p> <p>Notes may have no established trading market when issued, and one may never develop, or may be illiquid. In such case, investors may not be able to sell their Notes easily or at favourable prices.</p> <p>Investors are exposed to the risk of changes in law or regulation affecting the value of Notes held by them.</p>
