^{1.} For multi-component bases this is calculated based on all bases secured by the same property within the Cover Pool. If there is an additional advance against the property outside of the Cover Pool the value the Weighted Average Original LTV is recalculated at the time the new tranche is sold into the Cover Pool based on the balances of the boars at the time of the new advance.

2. For multi-component bases this is calculated based on all boars secured by the same property within the Cover Pool

3. Indused LTVs are calculated per the beforeasion Methodology based on the most record property appears at value

4. For multi-component bases this is calculated before the width or width or the most record property appears and the cover Pool

4. For multi-component bases this is calculated before within the down and value by the dates are secured by the same property including those components that outside the Cover Pool

4. For multi-component bases this is calculated before within the down and value by the dates are secured by the same property including those components that outside the Cover Pool

4. For multi-component bases this is calculated before within the down and value by the dates are secured by the same property including those components that outside the Cover Pool

4. For multi-component bases this is calculated before within the down and within the dow
