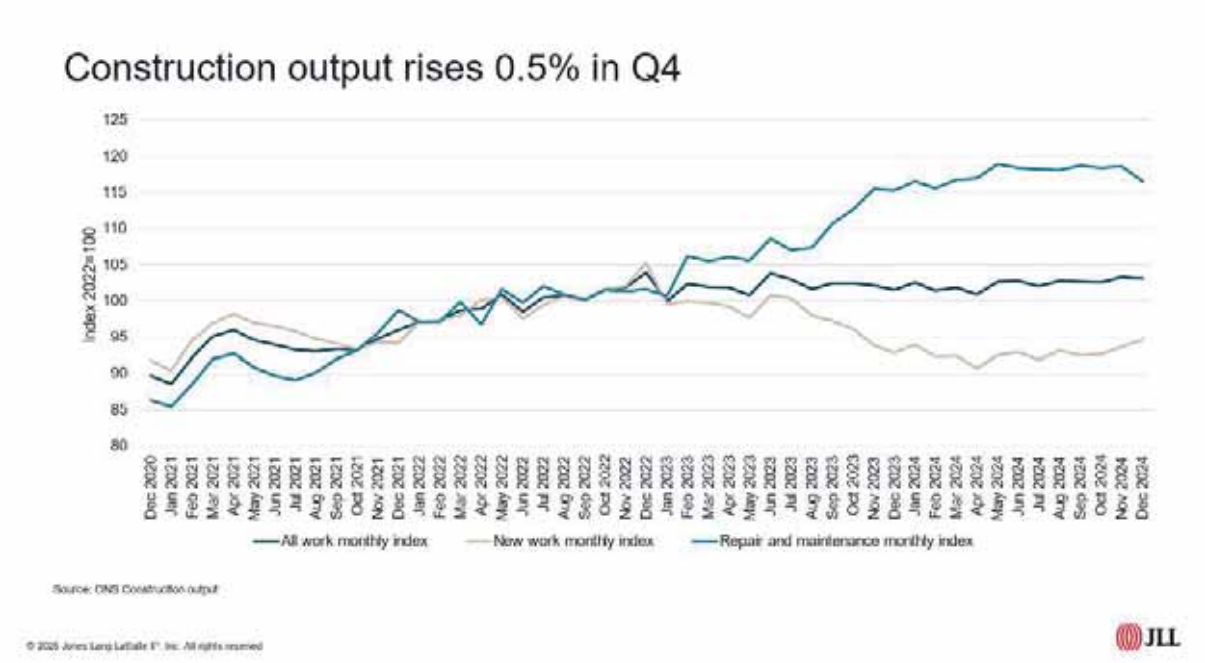
Market Commentary

JLL Residential Market Update – February 2025

Angela Rayner has committed another £350 million to address the shortfall of affordable homes. £300m has been signed off to boost the Affordable Homes Programme with a further £50m for the Local Authority Housing Fund. Every little helps for those looking to deliver affordable housing, but the scale of the problem and the years of shortfall in delivery means that further funding will be needed on top.

The £300m injection is forecast to deliver 2,800 homes (equating to roughly £107,000 per home), but recent analysis of the housing waiting list shows the number of households on the list topped 1.33 million at last count (March 2024), up 43,000 in 12 months. Meaning that to build the 43,000 homes required just to keep the list at 2023 levels would have required £4.6 billion in funding at £107,000 a home. If we look to tackle the 1.33 million households on the waiting list it would take 21 years at current affordable housing delivery rates to build enough homes, before we even consider new entrants over that period.

Fiscal headroom disappearing



The outlook for the UK economy has become more challenging in the last few weeks. The Bank of England cut the base rate (hurrah!) but were pessimistic about the UK's growth prospects. Their expectations for GDP growth in 2025 cut from 1.5% to 0.75%. Of course, the Bank are not the only forecasters, with the latest consensus forecasts remaining north of 1%, but we expect to see a more tempered short-term outlook emerge in the coming weeks.

The Office for Budget Responsibility will deliver their next forecast to parliament on 26 March. With the combined effect of weaker economic growth and higher borrowing costs expected to have significantly reduced Rachel Reeves' £10bn of fiscal headroom.

But fears of a recession in the second half of 2024 have been allayed by news that UK GDP grew by 0.4% in December, up from 0.1% in November. This means estimates for Q4 2024 have tipped (very

marginally) into positive territory at 0.1% growth, higher than the 0.1% contraction forecasters were expecting in a recent poll by Bloomberg. Annually GDP is estimated to be 1.5% higher in December 2024 than it was a year earlier, with full year estimates lower at 0.8% year-on-year.

Increased construction activity contributed to the latest growth figures. Government estimates suggest construction output rose 0.5% in the three months to December 2024 compared with the three months to September. The rise in activity was led by new work, which increased by 1.2%, with

repairs and maintenance activity falling marginally by 0.4%. Private new housing was one of the main drivers in the growth in new work, rising 1.3%. Positive news for the sector but still 20% lower than the post-pandemic peak in September 2022.

The return of the sub-4% fix

Both Santander and Barclays have announced new 3.99% fixed rates deals, signalling the return of the sub-4% mortgage which has been absent from the market for a few months now (although with a hefty fee and low loan-to-value). It's hoped that breaching the psychological sub 4% barrier will bring more home movers, who had become accustomed to record low rates, back to the market.

Fewer home movers have meant the proportion of first-time buyers in the market has risen significantly. UK Finance figures crunched by Halifax show there were more than 340,000 first-time purchases in 2024, up 19% on 2023. First-time buyers accounted for more than half (54%) of mortgaged purchases last year, a record high since the data was first collected back in 2014.

Latest from the RICS

The proliferation of lower rates will be good news for activity in the housing market, but in their absence the latest RICS Survey shows a tentative start to the year in January. Activity in the sales market remained broadly flat last month, with the same number of respondents reporting new buyer enquiries rising than falling in January. Here at JLL we're in the (marginally) more positive camp, with data from our offices showing a modest uptick in new applicants registering so far this year, up 6% on the same period in 2024.

Sellers continue to return to the market, with more respondents (a balance of +25%) reporting an increase in new instructions, higher than the +16% recorded in December. Stock per surveyor rose too, reaching 45 homes in January, up from 41 at the same point a year ago.

For lettings, tenant demand remained broadly flat, with the balance of opinion at +2% in January, meaning marginally more respondents reported a rise than a fall. Fewer landlord instructions were reported again in January (net balance of -19%), with March 2022 being the last month when we saw a positive net balance recorded. Lack of stock, through fewer landlord instructions, is still expected to underpin further rental growth this year.

New Towns

Housing Minister Matthew Pennycook has announced that more than 100 potential sites across England have been submitted to the New Towns Taskforce for consideration. The sites, the majority of which are urban extensions, aim to provide more than 10,000 homes each with the government promising spades in the ground before the end of this parliament. Initial reports suggest the government could green light around 12 schemes, or more than 120,000 homes. But few, if any, of these homes will be delivered within this parliament, meaning their (self-imposed) challenge of building 1.5 million homes remains.

JLL Research

JLL is a leading global professional services firm specialising in real estate and investment management, with $16.6bn annual revenue in 2020, operations in over 80 countries and a global workforce of over 90,000. With over 7,000 employees and 15 offices in the UK, we support our investor, developer, and occupier clients at every stage of the property lifecycle across both commercial and residential asset classes. This includes land purchase, access to capital, planning, development advisory, leasing, building management and sales.

JLL's Residential and Living team consists of over 300 professionals who provide a comprehensive end-to-end service across all residential property types, including social housing, private residential, build to rent, co-living, later living, healthcare and student housing.

UK Social Housing Market Commentary

UK Social Housing Market Commentary

Demand

There were over 1.28 million households on local authority waiting lists as at 31 March 2023[i]. This represents an increase of 73,000 households (6%) compared to 31 March 2022. This is the highest number of households on the waiting list since 2014.

Waiting list data is summarised by government office region (GOR) in the table below:

Region	Waiting list as at 31 March 2023
South West	130,604
East of England	89,461
South East	118,397
North West	199,305
North East	75,985
East Midlands	84,027
Greater London	323,637
West Midlands	112,004
Yorkshire and The Humber	149,602
England	**1,283,022**

Housing Starts

According to the government's *Affordable housing supply in England: 2022 to 2023* data published by the Department for Levelling Up, Housing and Communities (DLUHC) on 30 November 2023, there were c.63k affordable homes delivered (completions) in England in 2022-23, an increase of 7% compared to the previous year and the highest delivery since 2014-15.

64% of new affordable housing completions were for rent (including social, affordable and intermediate rent), similar to the previous 4 years.

47% of all affordable homes delivered in 2022-23 were funded through section 106 (nil grant) agreements, compared to 44% in the previous year and the same as in 2020-21.

94% of affordable homes delivered in England were new build (excluding unknowns), compared to 93% in the previous year.

58,027 of affordable homes delivered in England were new build in 2022-23, the highest value of new build affordable housing on record.

71,046 starts on site in England in 2022-23, an increase of 12% compared to the previous year and the highest value since these data started being collected in 2015-16.

The following table summarises the total additional affordable housing dwellings by GOR – Completions for the last 5 years published by DLUHC on 27 June 2024:

Region	2018/19	2019/20	2020/21	2021/22	2022/23
South West	7,012	6,677	5,084	5,875	6,326
East of England	6,831	7,774	6,617	7,205	6,951

England	**57,226**	**58,964**	**52,072**	**59,170**	**63,909**

Future Housing Supply

On 30 July 2024, Ministry of Housing, Communities and Local Government announced the following:

- An overhaul of the planning system necessary to fix the foundations and grow the economy.
- All councils in England to be given new, mandatory housing targets to pave the way to deliver 1.5 million more homes – tackling the most acute housing crisis in living memory.
- Review of the Green Belt to identify 'Grey Belt' land and meet local housing needs, with 'golden rules' driving 50% delivery of affordable homes.

The new targets will mean councils must boost housebuilding in areas most in need, helping more people buy their own homes, removing the largest barriers to economic growth, and getting Britain building again.

In terms of future Affordable Housing supply, government stated that "*the new flexibilities for councils will boost the number of social and affordable homes, and give working families a better route to a secure home*".

Furthermore, land released in the Green Belt will be subject to the government's 'golden rules', which make clear that development should deliver 50% affordable homes, increase access to green spaces and put the necessary infrastructure is in place, such as schools and GP surgeries.

Historically, the delivery of Social Rent properties has been in decline, with a far higher percentage of Affordable Rent and Shared Ownership properties delivered across new schemes. This trend has recently begun to reverse, as the graph below of new Affordable Housing supply over the last 5 years illustrates. With a slight year on year increase in the deliver of Social Rent homes the increased need for which has been exacerbated following the recent cost of living crisis.

For context, in June 2024 the JLL Residential Research Team published a paper: **Counting the cost: social housing waiting lists in England**

The key findings of the report were as follows:

- For decades, we have failed to build enough homes. Since peaking in the 1960s at around 350,000, housebuilding rates have slowed significantly. Today, there remains a long-term, systemic undersupply of affordable housing in the UK and England in particular.
- In fact, England has not built more than 200,000 homes since the 1980s. Despite this, politicians from all parties continue to set themselves targets much higher than the current rate of development (175,000 in 2022/23).

- In the meantime, the housing crisis has grown exponentially, with the need for all types of housing under immense pressure. At the sharp end of the housing crisis are those who require social housing, leaving local authorities with large housing waiting lists. Housing costs are pushing several councils across England to the financial brink, with some saying in the last 12 months that they are considering closing their social housing registers to new applicants.
- Development of new homes is being held back by the fundamental make up of England's housing market. Despite this, political parties are consistently promising unattainable housebuilding figures. The 2019 Conservative manifesto vowed to build 300,000 homes a year by the mid-2020s – a target it is yet to reach - and Labour has promised a similar volume of 1.5m homes over the course of the next parliamentary term.
- Even with substantial changes to the planning system, building more publicly funded homes and relaxing build quality and environmental standards (which is not advisable), there is still no possibility of building homes on this scale. At the same time, the country is seeing a constant stream of homes being removed from the social housing sector through the Right to Buy (RTB) scheme. The latest data shows that almost three times as many homes are being sold via RTB than are being completed through retained RTB receipts.
- Building enough homes to house those on housing waiting lists would cost £205bn. This figure assumes that national and local government could provide land at zero cost, and factors in an average build cost of £160,000 per unit.
- By comparison, "buying our way out" would cost an estimated £418bn based on current market rates. While an indicative figure, it goes some way to demonstrate the cost benefit of investing in new homes over acquiring existing homes from the private market.
- Compared to the government's 300,000 per year new homes target, there is likely to be a shortfall of 570,000 homes over the next five years.

Stock Rationalisation Market

As you will be aware, an active market exists for the sale of tenanted stock between RPs. This can be driven by strategic decisions about the type and location of accommodation that RPs wish to provide, and the viability of investing in properties to bring them up to the required standards.

Where competition is generated, a market has emerged in which RPs bid against one another on price. The resulting values, even though presented on an EUV-SH basis, tend to be in excess of base EUV-SH values that might be expected for balance sheet or loan security purposes.

Although this may appear hard to justify, the underlying rationale is as follows:

- the bidding price is still much less than the cost of development;
- the marginal cost of taking additional units into management, in an area where the acquiring RP already has stock, justifies a financial model based on relatively low costs for management, repairs and maintenance;
- the judgement of all-round risk formed by the acquiring RP, as reflected in the discount rate, is often lower (and the rate therefore keener) than would be acceptable to either a funder or an auditor in a balance sheet context;
- the price is worth paying to achieve strategic objectives around increasing a presence in a particular area or market; and/or
- the price may be supported by future void sales and/or changes of tenure (for example, from Social Rent to Affordable Rent).

Over the past six months our Portfolio Transactions team have acted on the purchase or sale of seven mixed tenure portfolios ranging in size between c.150 to over 1,000 homes, and £10m and £100m, with larger portfolios being lotted according to interest from RPs in each area. These prices represent a gross yield range between 5.0% and 8%. In all cases these portfolios have been marketed via competitive tender process and have received multiple bids. Premiums on these transactions have ranged between having no premium and trading at EUV-SH to c.135% of EUV-SH.

Executive Summary

Property Details	
Project Name	Clarion Funding plc – Note Programme Update.
Issuer	Clarion Funding plc
Description	A portfolio of 38,122 properties spread across London, East Anglia, the South East and West Midlands
Background and Proposal	Valuation of Housing Stock relating to the update of the £3,000,000,000 Secured Euro Medium Term Note Programme of Clarion Funding plc
Number of Units with Value	34,238 properties, excluding 3,884 Nil Value properties.
Suitability as Loan Security	Overall, we consider that the Properties provide satisfactory security for a loan secured upon it, which reflects the nature of the Properties, our reported opinions of value and the risks involved.

Valuation Summary - Per Valuation Basis	
MV-STT (18,890 units)	**£4.311,208,000**
EUV-SH (14,742 units)	**£1,055,485,000**
3,884 Nil Value and 606 Withheld Value	

A detailed breakdown of the categories of property concerned and their respective values is given at Section 4.4 below. A summary of the valuations split between Freehold and Leasehold property is in Section 4.4. A full property schedule with apportioned values is included at **Appendix 1**.

1. Instructions and Terms of Reference

1.1. Client

M&G Trustee Company Limited

1.2. Property

Valuation of housing stock relating to the £3,000,000,000 Secured Euro Medium Note Programme.

1.3. Issuer

Clarion Funding plc

1.4. Addressee Language

1. M&G Trustee Company Limited in its capacity as Security Trustee for itself and for and on behalf of the Finance Beneficiaries under (and terms being defined in) a Security Trust Deed dated 24 May 2007 currently between M&G Trustee Company Limited as Security Trustee (1), Clarion Housing Association Limited (the "Existing Borrower") (2) and Clarion Treasury Limited (3) as amended and supplemented by a NAB Administration Agreement dated 29 November 2016 and as the same may be further amended, novated, replaced, restated, supplemented or varied from time to time (together the "Security Trust Deed") and its successors, transferees and assignees;

2. each of the Security Beneficiaries (as defined in the Security Trust Deed) both present and future and its or their successors, transferees and assignees;

3. M&G Trustee Company Limited of 10 Fenchurch Avenue, London, EC3M 5AG (the "Note Trustee");

4. Clarion Funding plc
   5th Floor
   Greater London House
   Hampstead Road
   London NW1 7QX (the "Issuer");

5. the other entities within the Clarion Housing Group listed in **Appendix 2**;

6. each of the Dealers listed in **Appendix 2**; and

7. any receiver or other party which is appointed to realise the security; together, the "Addressees".

1.5. Instructions and Basis of Valuation

In accordance with your instructions as confirmed in our letter to you dated 20th January 2025, we have inspected the properties and made such enquiries as are sufficient to provide you with our opinion of value stated below.

The schedule of properties which are the subject of this valuation (the "Properties") with apportioned shares of value is attached at **Appendix 1** and relates to 33,632 units with value plus 3,884 nil value units and 606 units with withheld value, 38,122 units in total.

You have instructed us to provide our opinions of value on the following bases:

- The Market Value ("**MV**") of the properties subject to the tenancies /and shared ownership leases ("**Market Value**")
- Existing Use Value for Social Housing ("**EUV-SH**") of the tenanted properties

Unencumbered Properties – MV-STT

In relation to Properties which may be disposed of by a mortgagee in possession on an unfettered basis (meaning subject to tenancies but otherwise vacant possession and not subject to any security interest option or other encumbrance or to any restriction preventing its sale to, or use by, any person for residential use):

The Market Value of such properties for loan security purposes firstly reflecting the fact or (where not the case) making an assumption as to the fact that the properties are subject to existing tenancies that grant security of tenure to the occupational tenant. Our valuation will refer to this basis of value as "MV–STT" or "Market Value, Subject to Tenancies".

Encumbered Properties – EUV-SH

In relation to properties other than those specified above that have restrictions on title or in planning:

The Existing Use Value for Social Housing ("EUV-SH") of such properties for loan security purposes.

1.6. Definition of Bases of Value

In undertaking our valuations, we have adopted the definitions of Market Value and Market Rent as defined in the RICS Valuation – Global Standards ("the Red Book"), and as detailed in our General Conditions to this Report.

Existing Use Value for Social Housing is defined by the Royal Institution of Chartered Surveyors ("RICS") at UK VPGA 7 as:

"Existing use value for social housing (EUV-SH) is an opinion of the best price at which the sale of an interest in a property would have been completed unconditionally for a cash consideration on the valuation date, assuming:

a. *a willing seller*

b. *that prior to the valuation date there had been a reasonable period (having regard to the nature of the property and the state of the market) for the proper marketing of the interest for the agreement of the price in terms and for the completion of the sale.*

c. *that the state of the market, level of values and other circumstances were on any earlier assumed date of exchange of contracts, the same as on the date of valuation.*

d. *that no account is taken of any additional bid by a prospective purchaser with a special interest*

e. *that both parties to the transaction had acted knowledgeably, prudently and without compulsion.*

f. *that the property will continue to be let by a body pursuant to delivery of a service for the existing use*

g. *that the vendor would only be able to dispose of the property to organisations intending to manage their housing stock in accordance with the regulatory body's requirements*

h. *that properties temporarily vacant pending re-letting should be valued, if there is a letting demand, on the basis that the prospective purchaser intends to re-let them, rather than with vacant possession and*

i. *that any subsequent sale would be subject to all the same assumptions above"*

Market Value is defined by the Royal Institution of Chartered Surveyors at VPS 4.4 as:

> *"The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."*

1.7. Freehold & Long Leasehold Properties

We have valued the freehold and long leasehold property and listed these separately at Section 4.4 and have indicated which applies to each property at **Appendix 1**.

1.8. Background

This Report is required in connection with each series of Notes to be issued by the Issuer under the Programme where the underlying security is apportioned on "Numerical Apportionment Basis" in accordance with the Security Trust Deed.

The schedule of properties which are the subject of this valuation (the "Properties") with apportioned values is attached at Appendix 1 and relates to 38,122 units in total.

In completing this exercise, we have:

a) agreed a full set of property schedule data with the Existing Borrower;

b) discussed details as to our approach and methodology; and

c) completed our own inspections, research and analysis.

The above has enabled us to arrive at the valuation assumptions that have enabled us to carry out our valuations and final reported figures herein.

For the avoidance of doubt, we confirm that it would not be appropriate or possible to compare this valuation with any values appearing in the annual accounts of the Existing Borrower. This Report has been prepared in accordance with the RICS Red Book (as defined herein). The valuations are prepared on this basis so that we can determine the value recoverable if the charges over the Properties were enforced as at the Effective Date (as defined herein). We understand that the values given in the accounts of the Existing Borrower are prepared on an historic cost basis, which considers how much the Properties have cost and will continue to cost the Existing Borrower. This is an entirely different basis of valuation from that used for loan security purposes. Moreover, the figure in the latest published annual accounts of the Existing Borrower represents a valuation based on the going concern of the whole stock, in contrast with the valuation for each series of Notes issued under the Programme where the underlying security is apportioned on a "Numerical Apportionment Basis" pursuant to the Security Trust Deed which only represents the value to a funder in possession of a portion of the stock. As such different assumptions would be applied. Consequently, in addition to being impractical, any comparison would not be an accurate comparison.

1.9. Conflicts of Interest

We are independent valuers and are not aware of any conflict of interest, either with the Properties or the Issuer, preventing us from providing you with an independent valuation of the Properties in accordance with the RICS Red Book. We will value the Properties as External Valuers, as defined in the RICS Red Book.

We confirm that Savills Advisory Services Ltd does not have an involvement with the properties and there are no other factors that could limit our ability to provide an impartial and independent valuation. Accordingly, we are reporting on an objective and unbiased basis.

1.10. Date of Valuation

Our opinions of value are as at 31st March 2025 (the "Effective Date"). The importance of the valuation date must be stressed as property values can change over a relatively short period of time.

1.11. Purpose of Valuation

We understand that our valuation is required for loan security purposes in accordance with VPGA 2 of the RICS Valuation – Global Standards in connection with each series of Notes to be issued by the Issuer under the Programme where the underlying security is apportioned on a "Numerical Apportionment Basis" pursuant to the Security Trust Deed.

This Report is issued for the benefit of the addressees and for the inclusion in the offering circular (the "Offering Circular") for the Programme issued by the Issuer and may only be used in connection with the transactions referred to in this Report and for the purposes of the Offering Circular.

We hereby give consent to the publication of this Report within the Offering Circular and accept responsibility for the information contained in this Report. To the best of our knowledge and belief (having taken all reasonable care to ensure that such is the case) the information given in this Report is in accordance with the facts and does not omit anything likely to affect the import of such information.

1.12. Valuer Details and Inspection

The due diligence enquiries referred to below were undertaken by Matthew Sale MRICS and Andy Garratt FRICS. The valuations have also been reviewed by Catherine Wilson MRICS and Andy Smith MRICS.

As instructed a representative 20% sample of the Properties was inspected externally with sample internal inspections by Savills between 6 January 2025 and 8 February 2025. This is part of a 20% rolling programme of inspections over a 5 year period

All those above with MRICS or FRICS qualifications are also RICS Registered Valuers. Furthermore, in accordance with VPS 3.7, we confirm that the aforementioned individuals have sufficient current local and national knowledge of the particular market and the skills and understanding to undertake the valuation competently.

1.13. RICS Compliance

This Report has been prepared in accordance with the RICS Valuation – Global Standards (incorporating the IVSC International Valuation Standards) effective from 31 January 2022 together, where applicable, with the UK National Supplement effective 1 May 2024, together the "**Red Book**". We have also had specific regard to the requirements of VPGA 2 Valuation of interests for secured lending.

1.14. Verification

In completing this exercise, we have:

a) agreed a full set of property schedule data with the Existing Borrower.

b) discussed details as to our approach and methodology; and

c) completed our own review, research and analysis.

The above has enabled us to arrive at the valuation assumptions that have enabled us to carry out our valuations and final reported figures herein.

1.15. Extent of Due Diligence Enquiries and Information Sources

Where possible in the time available, we have verified, and supplemented information provided to us. However, if further information becomes available of which we are not currently aware, we reserve the right to amend our valuation accordingly to take this into account.

The extent of the due diligence enquiries we have undertaken and the sources of the information we have relied upon for the purpose of our valuation are stated in the relevant sections of the report below.

In summary the Existing Borrower has provided the following:

- Full Address if the property including Postcode
- Property Type and number of bedrooms
- Whether the property is of non-traditional construction
- Whether there are multi storey or multi occupied residential buildings within the portfolio that have either aluminium composite material ("ACM") or Non ACM external wall systems
- For the multi storey residential buildings, whether the Existing Borrower has conformed with the External Wall Fire Review process and, for any buildings with potentially combustible external wall systems, have obtained an External Wall Survey ("EWS1") by a competent chartered professional with suitable fire expertise, within the last five years or since any alterations
- Current Rent 52 Week basis (net of Service Charges)
- Tenancy Type and Letting Category
- Shared Ownership % Retained Equity
- EPC Rating

We have also reviewed the original certificates of title prepared by Trowers & Hamlins LLP, DMH Stallard LLP and Winckworth Sherwood LLP, the five certificates of title prepared by Devonshires Solicitors LLP dated 29 August 2017 and the reliance and top up letters prepared by Devonshires Solicitors LLP, DMH Stallard LLP, Trowers & Hamlins LLP and Winckworth Sherwood LLP (and any previous reliance/top up letters referred to therein) to be dated on or about 29 September 2017 and the certificate of title prepared by Devonshires Solicitors LLP dated 19 September 2018, 4 December 2020, 3 March 2022 and 25 July 2022 (together, the "Property Documents") and can confirm that our valuations fully reflect the disclosures contained therein.

1.16. Market Conditions

Ongoing political and economic developments in the UK continue to create a complex and evolving landscape. The Chancellor's strategy for economic growth faces significant headwinds, prompting the Bank of England to revise its 2025 UK GDP growth forecast downward from 1.5% to 0.75%. The Bank has continued to cut the base rate, and the markets anticipate further reductions over 2025, to stimulate economic activity. Meanwhile, the re-election of Donald Trump as US President has introduced further geopolitical uncertainty, particularly with his decision to withdraw the U.S. from the Paris Agreement and his proposed tariffs on certain imports.

Through 2023 and 2024, some confidence returned to the UK's residential markets against a backdrop of continued falls in the underlying rate of inflation which fed into more competition in the mortgage markets and more stability in the housing markets, despite continued underlying economic uncertainty. The mainstream UK property market has held up relatively well.

However, there has been a mixed reaction to some of the proposals detailed in the October 2024 Budget, particularly

those which are likely to impact the high end London residential property market. These include:

- Confirmation of the abolition of the non dom tax status from April 2025 and changes to the domicile rules to bring those resident for 10 out of the last 20 years into the IHT remit on their global assets could increase sales and reduce demand in prime central London properties.
- Significant changes to offshore trusts, excluded property and business property relief planned to take effect from April 2025 through to April 2027. These changes will bring more assets and property into the IHT regime.
- New FIG (Foreign income and Gains) regime which will bring clarification to a non-dom regime that had become very complicated, and there are significant benefits through the new four year regime. Those markets reliant on overseas buyers could be negatively impacted.
- Proposed taxing of pension pots from April 2027, and income tax to be levied on the beneficiaries of pensioners who live beyond 75, may result in downsizing by longstanding property owners.
- Additional 2% added to SDLT will curtail the buying power of BTL investors and second home owners.

Transaction levels have over the last 12 months reduced in the UK prime markets, particularly in London. The Budget together with the higher-than-expected inflation rate, mean the financial markets have revised their predictions as to how quickly the base rate will be reduced which continues to impact on transaction levels.

Our Residential Research department's mainstream house price forecasts for the UK are in the region of 3 to 4% for 2025, with a 5 year forecast of 23% for the UK and 17% for London. For the Prime Central London market we are forecasting a 5 year growth of just under 10%, albeit with a fall in prices this year of 4% (principally due to the tax changes from the October Budget). Outer prime London will perform better with a 5 year forecast of just under 15% and little movement through 2025. The outlook for the UK rental market continues to be positive, however we do not foresee the strong growth (over the last couple of years) in rents to continue, the impact of the Renters Reform Bill and the increasing environmental costs upon landlords are beginning to be felt.

It is therefore important to recognise that our valuation has been prepared against the backdrop outlined above.Moreover, investor behaviour can change quickly during such periods of volatility. As such, the conclusions set out in this report are only valid at the valuation date and we would recommend that the value of the property is kept under regular review. For the avoidance of doubt, our valuation is not reported as being subject to 'material valuation uncertainty' as defined in the RICS Valuation – Global Standards.

1.17. General Assumptions and Conditions

All valuation advice has been carried out on the basis of the General Assumptions and Conditions set out in **Section 6**.

Havering	1	Worcestershire	7
Islington	2,345		
Total			**34,238**

The spread of stock is shown in the map below:

The stock is a mixture of houses, bungalows and flats, made up of street properties, infill development, purpose built social estates and Section 106 style developments on larger residential schemes. The portfolio comprises mainly self-contained units however there are a number of schemes which contain rooms with shared facilities. There properties are made up of houses & bungalows 56%, flats & maisonettes 43% and rooms 1% as set out below.

Number of Bedroom	Flats & Maisonettes	%	Houses & Bungalows	%	Rooms	%	Total	%
Bedsit	137	0.40%		0%	345	1.00%	482	1.41%

7 bedroom			5	0.01%			5	0.01%
Total	**14,865**	**43.42%**	**19,028**	**55.58%**	**345**	**1.00%**	**34,238**	**100.00%**

The properties are situated in predominantly residential areas. Location vary, but most stock is within good proximity of reasonable transport links and amenities as are access routes to larger settlements where the full range of services and amenities can be found.

The Properties are in the main considered to be of conventional construction for their age and type. Approximately half of the properties in the portfolio were built between 1950-1980. Houses are mainly of solid brick, cavity brick or timber frame construction with roofs being mainly pitched and covered in slate or tile. Flats are mainly of cavity brick, metal or timber frame construction with roofs being pitched and covered in tile or are flat and believed to have an asphalt or metal type covering. The majority of the Properties have modern plastic gutters and downpipes.

A high proportion of the Properties have double glazed windows of timber, metal or UPVC casement type. The majority of the Properties benefit from all mains services and gas fired central heating systems supplying radiators.

A significant number of the Properties were acquired by transfer from local authorities under Section 32 and 43 of the Housing Act 1985.

The stock contains 708 valued flats situated in high rise flats of over 6 storeys. Please refer to section 2.5 'High Rise Flats' for further details.

2.2. Property Types

The Properties comprise general needs, sheltered, supported, intermediate, keyworker, market rented and shared ownership. As can be seen from the table below over 77% of the stock comprises general need properties let at social rent levels. The stock can be summarised by type and tenure as follows:

Value Group	Flats & Maisonettes	Houses & Bungalows	Rooms	Total	% of Total
General Needs - Social	9,901	16,480		26,381	77.05%
General Needs - Affordable	1,581	1,279		2,860	8.35%
Intermediate and Keyworker	84	18	188	290	0.85%
Market Rented	323	5		328	0.96%
Retirement - Social	2,347	638		2,985	8.72%
Supported - Social	21	1	157	179	0.52%
Shared Ownership	608	607		1,215	3.55%
Total	**14,865**	**19,028**	**345**	**34,238**	**100%**

Please refer to **Appendix 1** for a full stock list with details of the rental income, tenures and property types.

2.3. Title

2.3.1. Report on Title

Our valuation reflects our opinion of value in aggregate of the freehold or long-leasehold interests (in each case) of the Properties owned by the Existing Borrower and identified by the subject of this Report and scheduled at **Appendix 1**.

In respect of each Property which we have valued on the basis on MV-STT we confirm that we have reviewed the Property Documents and confirm that each such Property can be disposed of on an unfettered basis (i.e. subject only to existing tenancies disclosed in the Property Documents but not subject to any security interest, option or other encumbrance or to any restriction preventing or restricting its sale to or use by any person for residential use).

2.3.2. Tenancies

The Properties are understood from the Existing Borrower to be subject to Assured, Secure or Assured Shorthold tenancies. The Existing Borrower standard tenancy agreements are assumed to be in a typical format however they have not been seen as per of this valuation.

It is assumed that under the Assured and Assured Shorthold tenancy agreements, rents can be reviewed once a year to a market level. The tenant is also assumed to have the usual rights of appeal to the local Rent Assessment Committee.

Under typical Fair/Secure Rent tenancies the rent is reviewed every 2 years with reference to the local rent Officer.

There are a number of the Properties which are subject to management agreements with other RPs of social housing. We understand that in these instances the other RP manages the properties and pays the Existing Borrower the rent due less the agreed agent fee and a void allowance. The management agreement can be terminated on either party by giving one year's written notice.

2.3.3. Shared Ownership Leases

We have not seen the standard shared ownership lease of the Existing Borrower as part of this revaluation. We have assumed that the shared ownership leases follow a typical format of 99 or 125 years and are essentially a FRI lease making the tenant responsible for all repairs. In addition the lease will allow stair-casing by the leaseholder to buy additional blocks of equity.

The lease will detail the level of specified rent, set at the leases inception, and the rent review provisions of the lease. We understand the majority of the leases provide for annual rent review to RPI + 0.5%. We have increased rents by RPI + 0.5%. Full details of the rents payable and the equity held by the Existing Borrower are set out in **Appendix 1.**

2.4. Condition

2.4.1. General Condition

As instructed, we have not carried out a structural survey, nor have we tested any of the services. However, we would comment, without liability, that during the course of our inspection for valuation purposes, we observed that the Properties appear to be in reasonable condition throughout.

Apart from any matters specifically referred to in this Report, we have assumed that the Properties are free from structural faults or other defects and are in a good and lettable condition internally. This Report is prepared on this assumption.

2.4.2. Mould and Damp

In 2022 Registered Providers were required by the Regulator of Social Housing to submit evidence about the extent of damp and mould in tenants' homes, providing information and evidence about the process of identifying, reviewing, and responding to issues of mould and damp within their housing stock. Although the review wasn't compulsory the majority of RPs responded, and the regulator concluded that while the picture is incomplete, the estimate is that less than 0.2% of social homes have the most serious damp and mould problems, 1-2% have serious damp and mould problems.

We have made enquiries of the Existing Borrower who have confirmed that as far as they are aware there are no category 1 high risk issues that could be considered a risk to health and safety of their tenants.

2.5. Multi-Storey, Multi-Occupancy Buildings

Following the Grenfell Fire in June 2017 there has been an extensive review of building safety in multi-storey, multi-occupancy buildings. This has led to new legislation, including the Fire Safety Act which became law in June 2022, and a number of government and other professional publications and recommendations, including publications and advice from the RICS, which we have had regard to in forming our opinion of value.

In January 2022, the UK government set out plans to protect leaseholders and ensure those responsible are aware of their duties for remediating buildings with fire safety concerns in relation to the building remediation works crisis. The proposals included:

- opening up the next phase of the Building Safety Fund to drive forward the removal of dangerous cladding from high-rise residential buildings 18m+/7 storeys or more;
- new protections for leaseholders living in their own flats with a commitment of no or limited bills (subject to individual lease qualification) for unsafe cladding and new statutory protections for leaseholders within the Act;
- the Consolidated Advice Note (CAN) in relation to building safety advice (including fire doors), aimed at building owners, was withdrawn with immediate effect (but remains available as a historical reference document); and
- BSI PAS 9980:2022 Fire risk appraisal of external wall construction and cladding of existing blocks of flats, code of practice was published (and came into force on 31 January 2022) to help fire risk assessors take a proportionate approach to the assessment of external walls and avoid wholesale cladding replacement where safe to do so.

The PAS 9980:2022 code of practice for external walls is for building surveyors and fire engineers who need to carry out mandatory external wall fire risk assessments on buildings as part of the Fire Safety Act 2021 amendments. The Fire Risk Appraisals of External Walls (FRAEW) must include an assessment of the external wall system by a suitably qualified practitioner. The FRAEW must also have an executive summary that the mortgage valuer can use to ascertain whether remediation works are needed or not along the lines of an EWS1 form.

In time an FRAEW will be carried out for all blocks with cladding (where appropriate), and RICS envisages the need for an EWS1 form will then reduce.

The RICS Professional Standard, 2nd edition, December 2023 - Valuation approach for properties in multi-storey, multi-occupancy residential buildings with cladding became effective from 1 January 2024. The Professional Standard sets out the RICS' requirements in respect of undertaking valuations for secured lending purposes on domestic residential flats, within residential blocks of 5 or more storeys or 11 metres or more tall, in line with the remediation schemes and qualifying lease protections. Whilst the Professional Standard is applicable to England and Wales only, we adopt these requirements in respect of all valuations undertaken in the UK.

The RICS Professional Statement provides guidance to valuers undertaking valuations for secured lending purposes on domestic residential flats, within blocks of 5 or more storeys or 11 metres or more in height. The table below reflects this categorisation as applied to the subject portfolio.

Block Type Group	Number of Properties	% of Total
1-4 Storeys (low rise)	13,268	87.23%
5-6 Storeys (medium rise)	1,233	8.10%
>6 Storeys (high rise)	708	4.65%
Total	**15,209**	**100%**

As identified in the table above, the subject portfolio includes properties in buildings of 5 or more storeys and/or 4 storeys and fewer and we have therefore had regard to the RICS Practice Statement in arriving at our opinion of value.

In arriving at our valuation, we have relied on the EWS1 forms prepared by professionally qualified third parties. In so doing, we are not offering any advice as to the accuracy, completeness or fitness for purpose of the EWS1 Forms and neither the individuals preparing the valuation, nor this firm, shall have any liability to you, or any third party with whom you share the valuation, for any losses or potential losses arising directly and solely as a result of any inaccuracies in, or otherwise in any way related to, the EWS1 Forms. EWS1 forms have been provided as follows.

Having regard to the RICS Guidance Note and our limited inspection / desktop assessment carried out for valuation purposes further information has been requested for some blocks but this not been supplied. This includes blocks where we have been provided with reports/EWS1 forms provided by Tri Fire. This follows the expulsion of a Chartered Fire Engineer from Tri Fire from the Institute of Fire Engineers.

This event has raised concern about whether reliance can reasonably be placed on Tri Fire reports for the purposes of loan security valuations. We have inspected all of the blocks where Tri Fire reports were provided to provide additional assurance to our opinions of value. We consider that a graded approach to the Tri Fire stock should be applied as detailed below:

Our inspection and research highlighted that some buildings did not require an EWS1 report, albeit that Tri Fire did provide this. For these properties we have therefore provided a valuation on the basis that the RICS criteria for EWS1 forms does not apply and no remediation costs are anticipated.

For the remaining properties with Tri Fire reports we have reviewed the reports, inspected the stock and note that for some a low risk of A1 or A2 was provided and this apparent low risk assessment has been accepted, being consistent with our inspections.

For the other properties with Tri Fire reports we have reviewed the reports and note that a medium to high risk of A3 or B1 or B2 with remediation costs was provided. For these properties we have withheld value and await the comfort of a new report from another Chartered Fire Engineer in due course.

Where we require further information we have withheld our opinion of value as it is plausible that the cost of any remediation works could exceed the value of the properties and as such we have adopted a Nil Value approach to the security. That is not to say that the Property is worthless, but we do not have enough information to provide a meaningful valuation at this moment in time. We would be happy to review our valuation when the necessary information is available.

In total we have withheld the value of 606 properties situated in 35 blocks.

Reason For Withheld Value	Number of Blocks	Number of Properties
Further information requested	22	349
Remediation Required	8	99
Tri Fire EWS1	5	158
Total	**35**	**606**

2.6. Environmental Considerations

2.6.1. Ground and Soil Conditions

We have valued the Properties on the assumption that they have not suffered any land contamination in the past, nor are they likely to become so contaminated in the foreseeable future. However, should it subsequently be established that contamination exists at the Properties, or on any neighbouring land, then we may wish to review our valuation advice.

We have assumed there to be no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building constructed thereon.

2.6.2. Japanese Knotweed

Identifying Japanese knotweed is problematic and cannot be guaranteed. This is partly because during the early stages of its annual life cycle some of the classic visual characteristics are not distinctive and during the winter months the plant sheds its leaves and suffers die back. It is also possible that Japanese knotweed has received a herbicide-based treatment which has removed all visible above ground signs but may not have killed the below ground rhizome (root) which, in turn, may lead to new growth and the spread of the plant in time.

As far as the Existing Borrower are aware, no invasive plants are present at the properties.

2.6.3. Asbestos and Deleterious Materials

We have prepared our valuation on the assumption that in the construction or alteration of the Properties no use was made of any deleterious or hazardous materials or techniques, and we have not carried out any investigations into these matters. We have assumed further that either there is no asbestos present within the building(s) or if there is asbestos present this is recorded and managed within an Asbestos Register in accordance with the Control of Asbestos Regulations 2012.

2.6.4. Flooding

The Existing Borrower has confirmed that none of the properties are in areas which have previously been the subject of a flood or has the potential to flood.

2.7. Sustainability and ESG

For the purposes of this Report, we have made enquiries to ascertain relevant ESG and Sustainability factors which are likely to impact on value.

Investors may have diverse investment strategies to drive returns, but ESG is an increasingly critical influence on investment and management decision-making throughout the industry. ESG assessment looks at the impact of the physical building (base specification and in-use) on the environment, and investment criteria may cover everything from carbon emissions, asset-level certifications, be they environmental or health and wellbeing accreditations, energy and utility management and deployment of technology to monitor and measure compliance.

Social and community benefits and the nature of tenant operations may also be considerations, and importantly, the costs of transition to make buildings compliant are key.

Investors are also recognising that ESG is changing what tenants want, driving their current and future occupational needs, and that buildings must accommodate these needs.

2.7.1. Energy Performance Certificates (EPCs)

The UK government views the improvement in Energy Performance Certificate (EPC) ratings as key to achieving net-zero carbon by 2050. Current EPC ratings run from A to G, with buildings that are rated “A” considered the most energy efficient, and those rated “G”, the least efficient.

The provisions of the Energy Act 2011 make it unlawful to sell or let commercial or residential properties without an EPC rating, or to let them with an EPC rating of F or G (the lowest 2 grades of energy efficiency). However, Properties classified as low-cost rental accommodation under section 69 of the Housing and Regeneration Act where the Landlord is a private registered provider of social housing, or where the landlord is a body registered as a social landlord under Chapter 1 or Part 1 of the Housing Act 1996, are exempt from the legislation.

However, the Properties would be required to be compliant in the event that they were in private ownership following enforcement of the security. We have valued on the assumption that the Properties are compliant.

EPC Rating	Properties	Percentage Spread
A	47	0.14%
B	1945	5.68%
C	20676	60.39%
D	10199	29.79%
E	1152	3.36%
F	184	0.54%
G	35	0.10%
Total	**34,238**	**100%**

The Existing Borrower has provided us with EPC ratings for all the rented properties applicable for EPC. Approximately 66% of the stock have an EPC rating of B and C. The aim of the Existing Borrower is for at least 90% of the properties to have an EPC rating of C or above by 2030, and all homes EPC C or above where reasonable and practicable. We have provided the EPC ratings on our property schedule at **Appendix 1**.

Overall the EPC ratings are in keeping with expectations of the stock given its age, type and condition. The market values and market rents applied take these characteristics into consideration and we anticipate that a reasonable to good demand for the stock could be anticipated assuming on-going maintenance and investment in the stock.

2.8. Fire Risk Assessments

The Existing Borrower confirms that, where applicable, Fire Risk Assessments ('FRAs") have been undertaken where required and are within date, and that the properties comply with all relevant standards and regulations. Our valuation is prepared on this assumption.

The Existing Borrower has reported that there are a number of actions that are part of a programme of works that is currently underway however none of these actions are categorised as urgent. UKAS accredited fire safety specialists complete these actions and the Existing Borrower has ongoing contracts to deliver FRA actions and as such all actions are in the programme for every action.

2.9. Planning Enquiries

In the context of this valuation, it is not practical to make planning enquiries for all the properties. We have therefore assumed that there are no pending planning applications or other planning issues likely to adversely affect the subject Properties. We have not made specific planning enquiries for each site.

We have also assumed that the relevant consent for any extensions and alterations works to the Properties have been obtained and fully complied with. We advise that your solicitors confirm the properties are currently being used in line with their consented planning use and that construction fully met building regulation requirements.

2.10. Lotting

You have instructed us to value the properties as a portfolio assuming disposal as a single lot.

2.11. Rental Income

The Net Annual Rent and Net Average Weekly Rent for the portfolio is broken down by tenure type below:

Tenure Type	Unit Count	Net Annual Rent (£)	Net Average Weekly Rent (£)
General Needs – Social Rented	26,381	£190,462,424	£138.84
General Needs – Affordable Rented	2,860	£27,749,475	£186.59
Retirement – Social Rented	2,985	£19,088,68	£122.97
Supported – Social Rented	179	£1,105806	£118.80
Intermediate Rented	290	£2,600,721	£172.46
Market Rented	328	£5,642,028	£330.79
Shared Ownership	1,215	£6,118.935	£96.85
Total	**34,238**	**£4,860,914**	**£141.97**

3. Market Commentary

3.1. Housing Market Summary (as at March 2025)

House prices rose by 0.4% in February, according to Nationwide. This means that annual house price growth slowed to 3.9%, a deceleration from January and the strong end to 2024.

Completed transactions in January outpaced the 2017-19 average by 2%, as buyers raced to beat the Stamp Duty Land Tax (SDLT) deadline. This represents a significant jump compared to last year, 21% higher than last January according to HMRC. First Time Buyers (FTBs) in higher value markets are particularly incentivised to complete before the lowering of SDLT thresholds on 1st April. FTBs rose to 31% of new mortgages in December as a result – the highest proportion of the market they've held since the early 2000s.

There are signs of slowing demand on the horizon, as the chance of completing before the SDLT change diminishes. New enquiries from prospective buyers have suffered as a result, with January seeing the first reports of falling levels of new buyer enquiries since last summer, according the latest RICS survey. Sales agreed also dipped slightly in February, according to TwentyCI, but remained above the 2017-19 average for the month.

Supply continued to rise, with the majority of surveyors reporting rising new instructions in January. This opened up the gap between supply and demand to its widest since the summer of 2023. The fall in demand compared to supply may result in lower price growth.

As we move beyond the SDLT deadline, the market will revert to interest rate sensitivity. Mortgage rates have generally been trending downwards, with more fixed rate deals under 4% reappearing on the market in February. Typically these lower rates are still reserved for customers on lower loan-to-value mortgages with deposits of 40% or more. A wider range of mortgage products becoming available enables more buyers, and more types of buyers to become active in the market again.

The falling mortgage rates comes on the back of cuts to the Base Rate, but there are still reasons to be cautious. The Bank of England (BoE) cut the base rate last month, with three further cuts likely this year, according to Oxford Economics. This is contingent on inflation remaining under control, however. Inflation ticked up to 3% in January, coming in higher than expected. Further rises to inflation are expected, driven by an increase to energy price caps. Alongside this, there is a heightened level of geopolitical uncertainty currently, with potential trade tariffs being another inflationary risk on the horizon.

House price growth is highest in Scotland, according to HM Land Registry. West Dunbartonshire, East Renfrewshire, and Clackmannanshire had the highest growth of 8.0%, 7.9%, and 7.8% respectively, during the year to November. House price growth was more muted across much of the country. The south coast continues to see the greatest price falls, notably in Torridge (-6.4%) and Worthing (-4.7%).

Savills' latest five year forecasts for mainstream residential property are shown in the table below.

Region	2025	2026	2027	2028	2029	5 Year to 2029
UK	4.0%	5.5%	5.0%	4.0%	3.0%	23.4%
East Midlands	4.0%	5.5%	5.0%	4.0%	3.0%	24.6%
West Midlands	4.5%	6.0%	6.0%	4.5%	3.0%	26.4%
South East	3.0%	4.0%	3.5%	3.5%	2.5%	17.6%
East of England	2.5%	5.0%	4.5%	3.5%	3.0%	19.9%
London	3.0%	4.0%	3.5%	3.0%	2.5%	17.1%

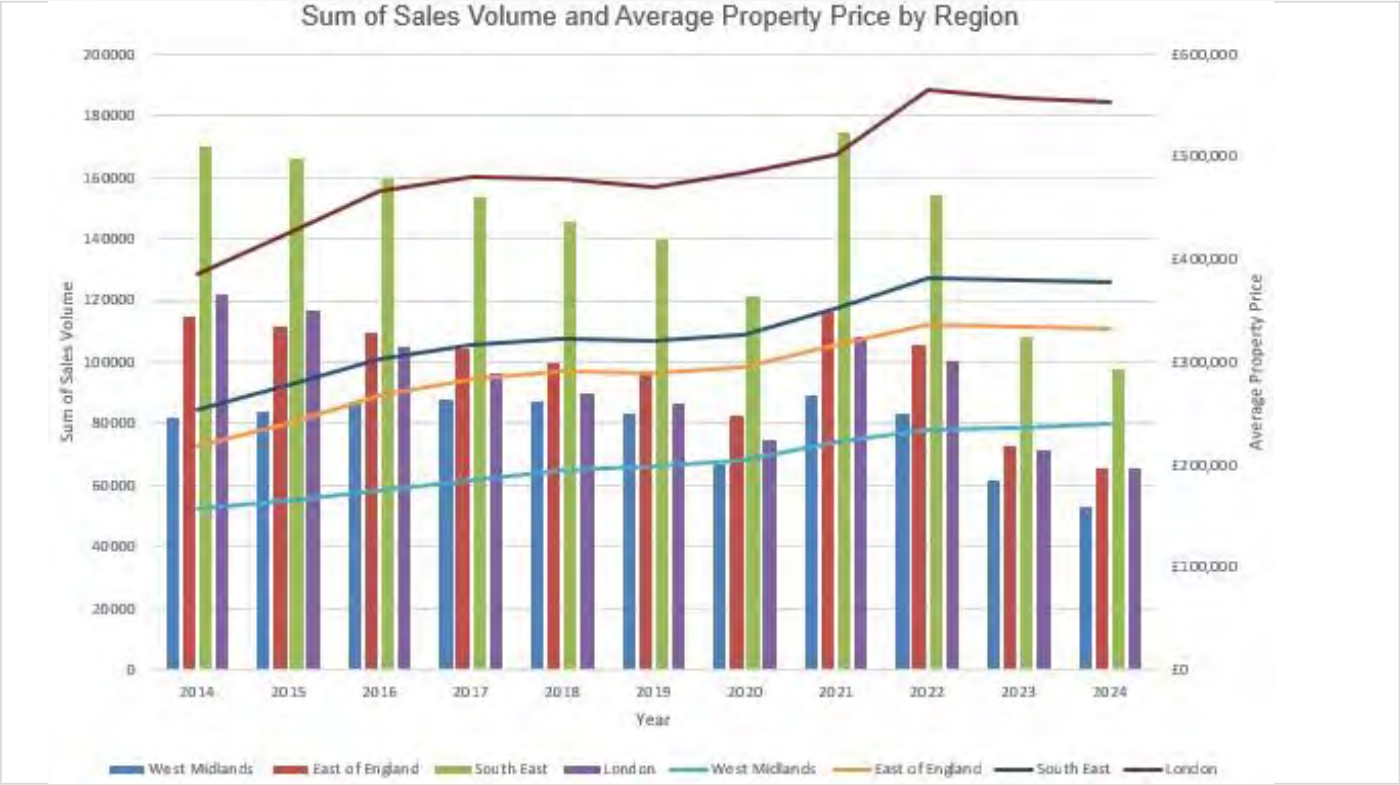
* Note these forecasts apply to average prices in the second hand market. New Build prices may not move at the same rate

3.2. Rental Market Commentary (as at March 2025)

Annual rental growth across the UK in January was 3.0% according to Zoopla, unchanged from December. Tenant demand increased slightly in January, according to the RICS survey, indicative of the change in market seasonality. The level of rental stock, however, remains low.

Rental growth is decelerating in most regions. The relatively affordable markets of the North West and Wales have continued capacity for rental growth however. Meanwhile, London, which saw rental growth slow fastest, is beginning to accelerate again. This is likely driven by the underlying lack of stock, with the NRLA landlord survey reporting record levels of landlords selling over the past 12 months.

Published in November 2024, our latest five year forecast for residential rental property is shown in the table below.



Region	2025	2026	2027	2028	2029	5 years to-2029
UK Rental Growth	4.00%	3.50%	3.00%	3.00%	3.00%	17.60%
London Rental Growth	2.50%	2.50%	2.50%	3.00%^	3.00%	14.20%

*Source Savills Research using Oxford Economics

3.3. Local Market Conditions

The properties are predominantly situated in 4 regions in the UK, the average property price has increased in each region over the last 10 years by between 43%-53% according to Land Registry. Sales volumes have varied with 2014 and 2021 seeing the highest number of sales during this 10 year period.

This is illustrated by the Land Registry data shown in the chart below:

The sales market is currently more active than it was last year with prices increasing in line with inflation. The number of properties on the market has increased and more sellers means more buyers. Early 2025 has seen first time buyers eager to beat the reduced stamp duty deadline at the end of March. The increase of properties on the market is keeping prices in check and this is expected to continue going forward. What happens to interest rates and the wider economy could however lead to unforeseen bumps in the road.

Rental inflation is expected to continue at a slower rate than last year but with rents rising above inflation. There is still strong demand for rental properties and there remains a mismatch between supply/demand however affordability pressures are keeping rentals in check. With the rental reforms and other proposed policy changes being implemented it is expected that supply will be further constrained and demand will continue to exceed supply. Rental inflation is therefore expected to continue to exceed wage inflation and it is expected that there will be more growth in more affordable markets as people look for better value.

3.4. Comparable Evidence

In order to provide market values and rental values we have used market sales and asking prices and achieved prices where available on properties in the immediate area to the subject units, including Rightmove, Rightmove plus and agents' own websites and discussions with local agents where necessary.

We undertake detailed research into comparable sales and market lettings and details of these are kept on our files for audit purposes.

All sale values were considered as open and not forced sales. To assess values for resale, research was undertaken using readily accessible sources that included:

- Determination of the area of similar properties related to market / social sector.
- Land Registry information on recent completed sales for the immediate post code and where necessary those of the adjoining areas
- Review of values for similar size and type of properties being marketed in the area of the actual location.

Where possible, discussion with agents and sales personnel on private sites has been completed. A comparison between the particular size, quality and condition of the property viewed was related to that of any known sales values in order to make a judgement as to what could be considered as a fair value.

3.5. Indicative Vacant Possession Values and Indicative Market Rents

The table below shows the average indicative Vacant Possession Values and indicative Market Rents that we have adopted for the properties included within the valuation, summarised by type and bedroom number.

Type	Bedrooms	Number of Properties	Average Indicative 100% VP	Average Weekly Indicative Market Rent
Flat	Room	344	£45,000	£169
	0	137	£175,000	£207
	1	8,866	£276,000	£282
	2	4,691	£347,000	£353
	3	1,025	£492,000	£480
	4	131	£664,000	£589
	5	14	£787,000	£669
	6	1	£837,000	£599
Flat Total		**15,209**	**£316,000**	**£320**
Houses	0	1	£240,000	£231
	1	2,231	£226,000	£218
	2	6,706	£320,000	£304
	3	9,039	£385,000	£367
	4	899	£569,000	£539
	5	132	£817,000	£771
	6	16	£938,000	£764
	7	5	£1,107,000	£948
House Total		**19,029**	**£356,000**	**£339**
Grand Total		**34,238**	**£336,000**	**£329**

4. Valuation Advice

4.1. Existing Use Value for Social Housing

4.1.1. Approach to EUV-SH

EUV-SH for loan security assumes the Properties will be disposed of by a mortgagee in possession to another RP who will continue the use of the properties for social housing. These organisations will calculate their bid according to their projected income and outgoings profile which they would estimate the properties would produce under their management. This basis assumes rents will remain affordable to those in low paid employment and that all vacant properties will be relet on the same basis.

We consider that the appropriate method of valuation is to use a discounted cash flow ("DCF"). The DCF allows us to project rental income and expenditure over the term of the cash flow to arrive at an annual surplus or deficit, which is then discounted to a net present value.

However, it is also necessary to consider comparable transactional evidence where available.

4.1.2. Principal DCF Variables

The DCF assumptions are derived from information received from the Existing Borrower and our specialist sector knowledge. The table below sets out our principal assumptions. More detailed discussion on discount rate, adopted rent levels and rental growth is contained in the following sections.

EUV-SH DCF Variable	Assumption	Year	Variable Amount	Source
Current social rent	£137.12	2025/26	Average £ Per Week	The Existing Borrower
Affordable Convergence Rent	£140.69	2025/26	Average £ Per Week	Savills
Affordable Rent	£186.59	2025/26	Average £ Per Week	The Existing Borrower
Voids and bad debts	2.5%	2025/26	% Real	Savills
Management costs	£1,000	2025/26	Average per unit/pa	Savills
Cyclical, Void & Responsive Maintenance	£1,200	2025/26	Average per unit/pa	Savills
Programmed Maintenance	£1,500-£1,800	2025/26	Average per unit/pa	Savills
Discount rate	5.0%-6.0%	All Years	% pa Real	Savills

4.1.3. Inflation Assumptions

Many of our assumptions are derived from the rate of inflation. These include house price and rental growth and building and maintenance cost inflation. It is essential for us to adopt a long-term underlying rate of inflation which will be acceptable to alternative landlords. We carry out our assessment of cashflow assumptions on a quarterly basis with reference to materials produced by numerous sources. The assumptions stated in this Report and used in this cashflow are based on evidence available at the time of the valuation.

Consumer Price Index ("CPI") inflation was 6.7% in September 2023. This is the rate of CPI which has been used to determine rent increases effective from 1 April 2024. The average of new Independent Forecasts – as produced by HM Treasury in February 2024 – indicates that CPI is expected to be 2.3% on average in 2024 and 2.10% in 2025. In the medium-term CPI is expected to run at around 2.10 – 2.40% per annum. Our long-term assumption remains at 2.00% per annum.

BCIS Tender Price forecasts – which we use to predict changes in major works costs – currently predicts that prices will be lower than inflation for the remainder of 2024/25, and then run ahead of inflation for the following three years. Our long-term assumption is 0.75% real growth per annum.

BMI Maintenance Cost forecasts are showing annual real growth of around 0.35% in 2024/25 before growing further above inflation in 2025/26 and then continued real growth ahead of inflation from 2026/27. In the long-term maintenance costs tend to run ahead of inflation mainly because the work is more labour intensive and therefore more closely linked to wage inflation. Our long-term assumption is 1.00% real per annum.

Year	CPI General % pa	CPI Rental % pa	Programmed Cost % (real) pa	Maintenance % (real) pa
2025/26	2.20%	2.10%	-0.12%	1.03%
2026/27	2.30%	2.15%	1.43%	0.80%
2027/28	2.40%	2.40%	1.48%	0.70%
2028+	2.00%	2.00%	0.75%	1.00%

CPI has continued to fall over the course of 2024 from a position of 4% at the beginning of the year. CPI has come down steadily with decreases throughout the year, with the main drop coming between March and April with CPI moving from 3.2% to 2.3%. We have then seen a slight fluctuating between 2.2% and 2% between May and August, with a decrease of 0.5% from August to September, giving us a September 2024 figure of 1.7%.

The current rent standard permits rents to be increased by CPI + 1%, so our valuation adopts a nominal increase of 2.1% at the Year 2 mark and then continuing at CPI +1% for future years.

The current Rate of CPI at the time of the Report is 2.6%.

4.1.4. Social Rents – Savills "Convergence" Rents and Rental Growth

RPs are required to set their Social Rents in accordance with Rent Standard Guidance issued by the Regulator of Social Housing. The Guidance sets out a formula for calculating most Social Rents which reflects property values, local earnings and bedroom size. From April 2020 the Rent Policy Statement applies which allows for existing rents to rise at CPI+1%.

Some latitude is given in that rents for new lettings can be no more than 5% higher than their formula level. For sheltered and supported properties, the margin is extended to +10%. The rents produced by the formula are net of service charges. Service charges are expected to be charged over and above the rents and to reflect what is actually being provided to tenants.

Mortgagees in possession and their successors in title are not bound by the provisions of the Rent Standard. In theory, therefore, a purchaser could base a bid for the properties on rents up to open market levels as permitted under the terms of the tenancy agreements. However, any RP purchaser would need to set rents that are consistent with its objectives as a social housing provider.

We therefore believe that a purchaser in a competitive transaction is likely to set rents at a level they consider to be the maximum affordable rent to those in low paid employment locally. We assume they would intend to charge such rents for new tenants and increase existing rents to a sustainable and affordable rent over a reasonable period.

The average rents across the stock are set out below, our assessed sustainable affordable rent or "convergence" rent. We have adopted the convergence rents in our valuation.

Type	Estimated Tenant Household Incomes	Net Rent	Savills Convergence Rent	Savills Convergence Rent Afford. Ratio	Market Rent	Local Housing Allowance
House	£683.51	£141.36	£145.36	21%	£341	£264
Flat	£533.39	£131.44	£133.63	25%	£318	£274
Average	**£620.83**	**£137.22**	**£140.81**	**23%**	**£332**	**£268**

We have relied on the current rents supplied by the Existing Borrower in carrying out this valuation. We have not carried out any validation of or research into the rents supplied.

In the long term, in order to maintain consistent levels of rent affordability, the maximum possible rate of rent growth will be growth in local household incomes which is currently predicted to be 3% pa over the next 10 years in these regions. We have therefore assumed that after they have converged rents will increase at CPI + 1% per annum.

4.1.5. Affordable Rents

In certain circumstances, RPs are able to offer new assured tenancies at intermediate rents at up to 80% of the market rent – such rents are known as 'Affordable' as opposed to 'Social' rents. The ability to charge the higher rents is dependent upon the RP having a Development Framework contract with the HCA or a Short Form Agreement where they are not in the Development Framework.

There are currently 2,860 Affordable Rented properties within the stock. The current average rent for these properties is £186.59 per week. This is about 30% higher than the target rents on the same properties. These properties have been included in our valuation at their current Affordable Rent levels.

Under the Rent Standard the rents payable for Affordable Rent tenancies increases annually by CPI plus 1% per annum. Rents are rebased to market rent upon the granting of a new tenancy. We have assumed that a purchaser from a mortgagee would increase existing Affordable Rents in line with movements in market rents over the long term.

Market rents tend to increase in line with household incomes. Income growth forecasts for the region are currently around 3% per annum. We have assumed that rents will increase at CPI + 1% pa.

4.1.6. Sales Between Registered Providers – Transactional Evidence

Until recently evidence of sales between RPs was extremely limited – most transactions were simple transfers of engagements. However, in recent years there has been a growing body of transactional evidence from competitive sales between RPs of tenanted stock. The evidence confirms RPs have a consistent tendency to pay a higher sum for some social housing portfolios than would be suggested by traditional, purely cashflow driven, EUV-SH valuations. We have been heavily involved in this market and have a database of transactions covering circa 50,000 units.

Although the body of evidence is relatively small compared to the total RP stock in the UK and the market is maturing, we are able to derive a view of the prices achieved for certain kinds of stock and lot sizes. Assuming a sensible lotting of units in smaller batches of circa 100 units, bids between 5% to 30% above traditional EUV-SH levels are common for more modern stock in reasonable proximity to amenities. In addition, it can be seen that gross yields are between 6% and 9%.

In contrast it is apparent that for lots exceeding around 400 properties the prices achieved appear to be in line with the traditional, cashflow approach to EUV-SH.

In this case you have instructed us to value the properties assuming a sale as a single lot and our valuations do not therefore reflect the higher bids that can be received for small portfolios.

4.1.7. Discount Rate

The discount rate is probably the most important variable in the model since it determines the net present value of future predicted income and expenditure cashflows. There is no fixed rule for determining the most appropriate rate to be adopted in a discounted cash flow, but the rate will consider two elements; the cost of funds to acquire the stock and risk/reward appetite of the bidder. The market for this stock will be within the RP sector.

The discount rate is a combination of an expression of the long-term cost of borrowing for an acquiring organisation, the availability of free funds for purchase purposes and the risks implicit in the property portfolio concerned, along with the return requirements of the purchaser. The average cost of long-term borrowing in the RP sector has been relatively stable over the last ten years or so, moving from 4.50% to 4.10%, as reported in accounts and reflecting borrowing from a range of sources at various rates. The accounts of RPs give us a useful benchmark for costs of funds, but we must also acknowledge market practices, particularly for smaller and more attractive acquisitions. In such circumstances, where strategic acquisition of stock is weighed against factors such as cost of construction and the aims and objectives of the provider, implied discount rates are significantly below average costs of borrowing.

In addition to considering the cost of funds, we also need to make an allowance for the risk which attaches to our cashflow assumptions – some of which may be subject to a higher degree of risk than those generally made in the business plans. The trend in the risk profile is considered on a case-by-case basis, having regard to the attractiveness of the stock for investment purposes.

Risk is factored in two principle areas: the market and the individual cashflows. The market element will reflect the macro-economic landscape, the market for social housing stock to be traded and the availability of housing stock at the rents being charged, whereas the individual cashflow element will reflect the confidence the valuer has in the assumptions adopted.

Having regard to the above, our view is that a discount rate in the range of 4.75% - 5.75% real is generally appropriate, +/- 0.50% for particularly risky or attractive acquisitions respectively.

We have adopted a discount rate of 5.0% - 6.0% real over an assumed CPI inflation rate of 2.0% (Long Term Bank of England Target Rate).This is the rate applied over the cashflow run in perpetuity.

4.2. Market Value Subject to Tenancy (MV-STT)

4.2.1. Approach to MV-STT - Large Scale Voluntary Transfer ("LSVT") Stock

The Housing and Planning Act 2016 ('HPA 2016') contains provisions to deregulate the social housing sector which give much greater freedom to housing providers to dispose of and manage their property assets. The deregulation provisions came into effect on 6 April 2017. As a result s.133 of the Housing Act 1988, which required consent to be obtained prior to disposal of property previously transferred from a local authority, is no longer effective.

The HPA 2016 therefore allows valuers to consider transferred stock on the basis of Market Value rather than Existing Use Value for Social Housing – EUV-SH, removing the assumption that the stock can only be sold to another RP and will remain subject to regulatory control. Valuers can therefore now assume that the stock could be sold to a private investor and take into consideration transactions of private residential portfolios in order to inform their opinion of value.

No large scale disposals of LSVT social housing have taken place since the HPA 2016 came into force and direct transactional evidence is therefore not yet available. Nevertheless, we can consider the growing institutional interest in larger scale residential purchases in order to assess how the freedoms of the HPA 2016 will affect the Market Value of social housing stock.

The principal drivers of value for private investors in residential property are the ability to achieve sales of void properties and the scope for rental growth. The normal approach to assessing MV-STT for general non-LSVT stock involves analysing comparable evidence from similar portfolios. This includes looking at the yield achieved and the percentage of vacant value the price achieved represents. Valuations are then derived by firstly applying an appropriate discount to Market Value with Vacant Possession ("MV-VP") and secondly by applying a suitable yield to rental income. However, this is not applicable to LSVT stock and, as at the time of writing, there is no direct evidence of investor bids.

The market has had little time to respond to the new freedoms and given the lack of direct transactional evidence for an LSVT portfolio of this size and type, our approach to the Market Value is to use Discounted Cash Flow analysis to derive our opinions of value to gauge how a market investor in LSVT stock would set their bid. In order to construct the cash flows we have detailed regard to the characteristics of stock at the local "neighbourhood" (in this case sub-postcode) level. This allows consideration of the potential for sale of void units in a given locality and also the potential to increase rent in relation to household income and across a large stock.

Although this approach is relatively new, a considerable amount of LSVT stock has now been charged for loan security at MV-STT, where the valuation metrics and transfer agreements allow.

4.2.2. Approach to Establishing Potential for Rent Uplift

As the properties capable of uplift are geographically concentrated, we need to assess just how much scope an investor would have to increase rents to affordable, Local Housing Allowance ("LHA") or at or towards market levels. An investor would not wish to push all rents to market levels if it were likely to compromise his ability to collect rent and give rise to arrears that may result in bad debts. Central to this approach is the investors' ability to assess household incomes and driving rents at levels that will be sustainable across a concentrated stock group.

The Existing Borrower does not maintain details of households' incomes that would be sufficiently robust for our purposes. Therefore, in order to establish rental uplift potential we consider an investor would review census data in the public domain. We have analysed the Annual Survey of Household earnings ("ASHE") produced by the Office of National Statistics which provides details of earnings at Local Authority level and compared this to a ten year average of household incomes provided by the CORE returns for regulatory purposes. This was produced in 2013 and is the last dataset available for the analysis of household incomes in the lower deciles of the population as a whole. Using the statistical technique of equivilisation we have derived estimated current earnings per bed space. This provides a benchmark that is annually reviewed against which housing expenditure can be compared. For each group within the stock we have estimated the household income per week.

The Joseph Rowntree Foundation have established that circa 29% of household income is spent on housing costs by social housing tenants, but with the poorest fifth of social renters paying up to 33%. An investor taking possession of the stock would not be required to comply with regulatory guidance concerning affordability and we would expect rents to be escalated beyond current social rent norms wherever possible.

Beyond the potential for rental growth from existing tenancies an investor would potentially be able to let voids to a broader client group with higher incomes. We have therefore also looked at Indices of Multiple Deprivation by sub-postcode as an indicator of areas where such potential might exist. We have assumed that rents could be increased to LHA or market levels in areas where levels of deprivation are low, but in areas of more acute deprivation we have assumed that rents would remain below LHA rent levels.

4.2.3. Establishing Sales Potential

An investor will consider the potential of the stock to generate receipts from the sale of void units. The assumption being that units will be considered for sale rather than being relet. The quantum of sales receipt arising is a factor of the following.

a) the rate of turnover of stock;

b) the vacant possession values prevailing in a given geographic area;

c) the potential of a given market to absorb the turnover of units; and

d) the likely stability of a given market based on historical evidence.

An investor would also consider the strength of the broader property market, and future growth or reduction of vacant possession values through projections.

4.2.4. Other MV Assumptions

Our assumptions in respect of inflation, rates of re-letting, management and maintenance costs are taken from those used in our EUV-SH valuation. We have given regard to the voids and bad debts assumptions applied in the EUV-SH modelling and increased these as appropriate to reflect the impact of raising rents. We have also applied major works in line with the levels adopted in the EUV-SH valuation, reflecting the latest condition data available.

4.2.5. Approach to MV-STT – Non LSVT Stock

We assess the MV-STT in two ways; firstly, by applying a discount to Market Value with Vacant Possession ("MV-VP") and secondly by applying a yield to rental income.

The valuation of properties and portfolios subject to Assured and Secure tenancies is carried out with reference to comparable evidence from the sales of similar tenanted portfolios and individual units and sold subject to Protected Tenancies or Assured Shorthold Tenancies. There is an established body of evidence from portfolios traded on the open market to which we can refer.

Investors tend to base their bid on their ability to "trade out" individual units at Market Value assuming vacant possession over time. In locations where there is a limited market or where a property is difficult to trade, owing to style or market conditions, investors will base their bid on rental return compared to capital cost.

The discount to MV-VP ranges from 10% for prime property to 40% where market conditions are difficult. Typical rates are around a 20% to 30% discount to MV-VP for properties subject to AST tenancies.

The yield applied to net income varies from 5% or less for prime property, to 7% or more for poorer locations. This equates to a yield on gross income (after deductions for management, maintenance & voids) of between 7% to 10% and possibly higher for Sheltered accommodation.

The discount and yield applied in our valuations has been adjusted to reflect the additional security of tenure RP tenants benefit from.

4.2.6. Principal Assumptions – MV-STT

We have considered the above in arriving at our valuation. The yield and other principal assumptions adopted are set out below.

Variable	Unit of Cost	Variable Amount
Voids	% of Rent Debit p.a.	5%
Management	% of Rent Debit p.a.	8%-10%
Maintenance	% of Rent Debit p.a.	15%-20%
Net Yield	%	4.75%-7.50%
Gross Yield	%	6.75%-10.75%

4.3. Shared Ownership

4.3.1. General

The Existing Borrower has a portfolio of 1,215 properties subject to Shared Ownership leases in charge. It retains around 57% of the equity in its properties, overall. Please see Appendix 1 for details of the Properties, shares held, and rental income produced.

4.3.2. Valuation Approach

Shared Ownership property produces a rental income dependent on the percentage owned by the leaseholder and the percentage retained by the lessee. As leaseholders have a stake in the property, arrears and default are comparatively rare and landlords can retrieve management costs. Maintenance does not erode rental income as the leaseholder is responsible.

Shared Ownership property thus produces good quality, low risk rental income on the share retained. In addition, capital receipts can arise when the leaseholder decides to acquire the whole or a portion of the remaining equity, which usually happens when they decide to sell and move on, or on the occurrence of default.

We use a discounted cashflow model designed for the valuation of Shared Ownership property which projects future rent and outgoings to arrive at a net present value. We have assumed that all service costs can be recouped through service charges and that management income, and the management charge equals the management expenditure.

We have applied a discount rate of 4%-5% real reflecting the very secure nature of Shared Ownership income.

4.3.3. Shared Ownership Valuations Principal DCF Assumptions

Our principal valuation assumptions are as follows:

Variable	Assumption	Year	Unit of Cost
Current rent	£96.85	Current	Average £ Per Week
Indicative 100% rent	£169.91	Current	Average £ Per Week
Management costs	£200	All Years	Average per unit/pa
Retained share	57%	Current	Average per unit
Current Indicative 100% MV-VP	£324,000	Current	Average £ per unit
Discount rate for rental income	4%-5%	All Years	% pa Real

4.4. Valuations

4.4.1. Valuation of Freehold and Leasehold Property that may be disposed at MV-STT

Properties that may be disposed of by a mortgagee in possession at MV-STT, that is on an unfettered basis (meaning subject to existing tenancies but otherwise with vacant possession and not subject to any security interest, option or other encumbrance or to any restriction preventing its sale to, or use by, any person for residential use) as referred to in paragraph 1.5 above.

Our opinion of value, in aggregate, of the 18,890 dwellings as mentioned at 1.5 above, on the basis of

- Market Value – Subject to Tenancies (MV-STT) is £4,311,208,000 (Four Billion, Three Hundred and Eleven Million Two Hundred and Eight Thousand Pounds)

Category of Property	Number of Dwellings	Market Value – Subject to Tenancies (MV-STT	Equivalent Existing Use Value – Social Housing (EUV-SH)
Freehold	18,409	£4,162,421,000	£1,342,604,000
Leasehold	481	£148,787,000	£40,394,000
Total	**18,890**	**£4,311,208,000**	**£1,382,998,000**

4.4.2. Valuation of Freehold and Leasehold Property that may be disposed at EUV-SH

Our opinion of value, in aggregate, of the 14,742 rented and Shared Ownership dwellings as mentioned at 1.5 above, on the basis of

- Existing Use for Social Housing (EUV-SH) is £1,055,485,000 (One Billion and Fifty Five Million Four Hundred and Eighty Five Thousand Pounds)

Category of Property	Number of Dwellings	Equivalent Existing Use Value – Social Housing (EUV-SH)
Freehold	14,345	£1,019,854,000
Leasehold	397	£35,631,000
Total	**14,742**	**£1,055,485,000**

4.4.3. Nil Value Properties

There are 3,884 properties which have been ascribed a nil value and 606 properties a withheld value.

4.5. Additional Advice

4.5.1. Lending Against MV-STT

It is essential that before lending on MV-STT your lawyers confirm that the properties are capable of being let at a Market Rent, or disposed of free from restrictions, should you take possession. If there are enforceable "Housing Restrictions" in title, planning approval, s.106 agreements or by separate Nomination agreements, that, for example, limit disposal only to RPs or contain binding contractual nominations, then the correct valuation basis is EUV-SH and not MV-STT.

We must also stress that it is up to you to assess the terms of the loan and the amount of lending based on the valuations herein. We have set out the current rental income at **Appendix 1** but make no warranty that the current income is sufficient to support lending against MV-STT either on individual valuation groups or against the whole portfolio.

4.5.2. Lotting and Value Disaggregation

We have valued the properties as a single lot. As a result, **we have not assessed individual valuations for each property.** We have, however, provided a disaggregation of the overall valuation figures by reference to the appropriate rent and these figures are shown on the property schedule at **Appendix 1**.

It is very important to note that the per unit figures shown in the schedule should not be regarded as individual valuations of the properties. They are provided as indicative figures for administrative purposes only. They should not be used for any other purpose, including disposals or re-assessment of security, without our prior written approval.

5. Loan Security

5.1. Investors' Responsibility

It is usual for a valuer to be asked to express an opinion as to the suitability of a property as security for a loan, debenture or mortgage. However, it is a matter for the investors to assess the risks involved and make their own assessment in fixing the terms of the loan, such as the percentage of value to be advanced, the provision for repayment of the capital, and the interest rate.

In this Report we refer to all matters that are within our knowledge and which may assist you in your assessment of the risk. In assessing the nature of the risk, we would draw your attention to the matters highlighted in the following paragraphs.

We have made subjective adjustments during our valuation approach in arriving at our opinion and whilst we consider these to be both logical and appropriate they are not necessarily the same adjustments which would be made by a purchaser acquiring the properties.

Where we have expressed any reservations about the Properties, we have reflected these in the valuation figure reported. However, it may be that the purchasers in the market at the time the property is marketed might take a different view.

Loan Security Assessment		
Property Market Risks	Satisfactory	Registered providers are operating in a challenging environment, facing high borrowing costs, high material and labour costs and increasing regulatory demands. There is an increased pressure on landlords to comply with the Decent Homes Standard, in particular with identifying and tackling damp and mould. Fire safety also remains a key priority. While the sector has made good progress, around a quarter of buildings with identified life-critical fire safety defects have unsatisfactory remediation plans in place. However, skilled labour shortages continue to impact repairs and maintenance programmes with demand keeping costs at a premium. While the sector continues to retain many sources of financial strength, including a strong liquidity position, the sector's interest cover performance has declined steadily since 2018. Constrained financial headroom reduces the capacity for the sector to manage downside risk from external sources. In response to weakened financial capacity the sector has been pulling back on development plans, with forecast over the next five years 12% lower than in 2023. On a more positive note, the rent settlement for the next 5 years has been confirmed at CPI+1. This offers providers some long-term certainty, enabling business planning and funding strategies as well as boosting investment in existing stock.
Suitability for Loan Security	Satisfactory	Overall and subject to the comments outlined within this Report, we consider that the property provide suitable security for a loan secured upon it, which reflects the nature of the property, our reported opinion of value and the risks involved.

6. General Assumptions & Conditions

6.1. Overview

Unless otherwise stated in this Report, our Valuation has been carried out on the basis of the following general assumptions and conditions in relation to each Property that is the subject of this Report. If any of the following assumptions or conditions are not valid, this may be that it has a material impact on the figure(s) reported and in that event we reserve the right to revisit our calculations.

6.2. General Assumptions

That we have been supplied with all information likely to have an effect on the value of the property(ies), and that the information supplied to us and summarised in this Report is both complete and correct.

Legal

1. That the property(ies) is/are not subject to any unusual or especially onerous restrictions, encumbrances or outgoings contained in the title. Should there be any mortgages or charges, we have assumed that the property(ies) would be sold free of them. Unless provided to us by your legal advisors, we have not inspected the relevant title documents.
2. That the property abuts an adopted highway maintainable at public expense. We assume that full rights of access are enjoyed, and that no third parties enjoy any rights over the property. This should be confirmed by your legal advisers prior to relying on this Report.
3. That where there are tenants, they are capable of meeting their obligations and there are no arrears of rent or undisclosed breaches of covenant.

Legislative and Statutory Compliance

4. That the buildings have been constructed and used in accordance with all statutory and bye-law requirements, and that there are no breaches of planning control or building regulations. Likewise, that any future construction or use will be lawful (other than those points referred to above).
5. That the properties are not adversely affected, nor is likely to become adversely affected, by any highway, town planning or other schemes or proposals, and that there are no matters adversely affecting value that might be revealed by a local search, replies to usual enquiries, or by any statutory notice (other than those points referred to above).
6. That the properties either complies/comply with the Equality Act 2010 and all other Acts relating to occupation, or if there is any such non-compliance, it is not of a substantive nature.
7. No allowance has been made for rights, obligations or liabilities arising under the Defective Premises Act 1972, and it has been assumed that all fixed plant and machinery and the installation thereof complies with the relevant UK and EU legislation.

The Property

8. That the properties has/have been measured in accordance with the Code of Measuring Practice (6th Edition) and we have valued on the basis of the floor areas stated in this Report. Whilst the 6th Edition has been superseded by RICS Property Measurement (2nd Edition) which outlines the International Property Measurement Standards (IPMS) for offices and residential property, this basis of measurement has yet to be adopted by market participants. Where we have been provided with floor areas, we assume these floor areas are complete and correct, and are the net/gross internal/external or net saleable floor areas measured in accordance with the Code of Measuring Practice (6th Edition).
9. That the buildings are structurally sound, and that there are no structural, latent or other material defects, including rot and inherently dangerous or unsuitable materials or techniques, whether in the parts we have inspected or not, that would cause us to make allowance by way of capital repair (other than those points referred to above). Our inspection of the properties and this Report do not constitute a building survey or any warranty as to the state of repair or refurbishment of the properties. Our Valuation is on the basis that a building survey would not reveal material defects or cause us to alter our valuation materially.
10. That there is unrestricted access to the properties and that the sites are connected, or capable of being connected without undue expense, to the public services of gas, electricity, water, telephones and sewerage.
11. Sewers, mains services and roads giving access to the properties have been adopted, and any lease provides rights of access and egress over all communal estate roadways, pathways, corridors, stairways and the use of communal grounds, parking areas and other facilities.
12. That in the construction or alteration of the buildings no use was made of any deleterious or hazardous materials or techniques, such as high alumina cement, calcium chloride additives, woodwool slabs used as permanent shuttering and the like (other than those points referred to above). We have not carried out any investigations into these matters.
13. That either there is no asbestos present within the building(s) or if there is asbestos present this is recorded and managed within an Asbestos Register in accordance with the Control of Asbestos Regulations 2012.
14. Unless stated otherwise, our valuation will be reported on the basis that the properties falls/fall outside the RICS Professional Standard on the *Valuation approach for properties in multi-storey, multi-occupancy residential buildings with cladding*.

Environmental

15. That the properties has/have not suffered any land contamination in the past, nor likely to become so contaminated in the foreseeable future. We have not carried out any soil tests or made any other investigations in this respect, and we cannot assess the likelihood of any such contamination. Should it subsequently be established that contamination exists at the properties, or on any neighbouring land, then we may wish to review our valuation advice.
16. That, unless otherwise stated in this Report, the properties has/have an EPC rating of 'E' or above. As part of the Minimum Energy Efficiency Standards 2015 (MEES) that were passed by law in April 2015, from April 2018 it is a legal requirement for residential or commercial properties to have a minimum EPC rating of 'E' in order to be subject to a new letting. From 1 April 2023, this has applied to all lettings, including lease renewals.
17. The Scottish legislation covering EPCs is contained in the Energy Performance of Non-Domestic Buildings (Scotland) Regulations 2016 AEP Regulations. The legislation captures existing buildings (or units within a building) which are over 1,000 sq m and are either sold or leased to a new tenant. On a sale/lease of a property which is over 1,000 sq m which is not built to 2002 Building Regulation Standards, a seller is legally obliged to provide an "Action Plan" to a purchaser. The Action Plan will identify emissions and energy improvement targets for a building and the improvement measures that the owners needs to implement to meet these targets. Owners have two options, either carry out the improvement works detailed in the recommendations report within three and half years, or, defer carrying out the works by providing annual report on the operational ratings of the property. The Action Plan will state which option has been chosen. Responsibility for complying with the AEP Regulations and completing the works and reporting on operational ratings rests with the owners of the property.

18. EPCs are required for the sale, letting, construction, or alteration of all residential buildings in Scotland. The Scottish government recently published its Energy Efficient Route Map which brought in The Energy Efficiency (Private Rented Property) (Scotland) Regulations 2019. Pre-COVID-19 it had been legislated that at the change in a tenancy of any private rented property it would need to meet an EPC of D by April 2022, with a backstop date of existing properties by 2025, this was then rescinded due to the pandemic. As a result of the SNP/ Green Alliance, the Scottish government's "Heat in Buildings Strategy" was published on 07 October 2021, this now removes the single goal of achieving higher energy efficiency and links it with achieving net zero emissions. The regulations are due to be introduced in 2025 requiring all properties in the private rented sector to reach a minimum standard equivalent to an EPC of C, where technically feasible and cost effective, at change of tenancy, with a backstop date of 2028 for all remaining existing let properties. It is also proposed that the same will follow in the owner occupied sector by 2033.
19. That the properties are free from environmental hazards.
20. That, unless otherwise stated within this Report, the properties do not suffer from any ill effects of Radon Gas, high voltage electrical supply apparatus or other environmental detriment.
21. We have made informal enquiries in respect of risk of flooding to the properties. The Environment Agency/Scottish Environment Protection Agency (SEPA) (as appropriate) categorise the risk of flooding to a property from rivers or sea, and the Lead Local Flood Authority (LLFA)/Scottish Environment Protection Agency (SEPA) (as appropriate) categorise the risk of flooding to a property from surface water. The risk categories are defined as very low / low / medium / high risk and represent a less than 0.1% / 0.1% - 1% / 1% - 3.3% / 3.3% chance of flooding each year.
22. Where we have been asked to value the sites under the special assumption that the properties will be developed, there are no adverse site or soil conditions, that the properties are not adversely affected an Environmental Impact Assessment, that the ground does not contain any archaeological remains, nor that there is any other matter that would cause us to make any allowance for exceptional delay or site or construction costs in our Valuation.

6.2.1. Further General Assumptions applicable to residential valuations

The following general assumptions apply to residential property valuations and are in addition to the general assumptions as above.

23. Where the property comprises flats or maisonettes, unless instructed or otherwise aware to the contrary, we will assume that:
    a. The costs of repairs and maintenance or the building and grounds are shared equitably between the flats and maisonettes.
    b. There are suitable, enforceable covenants between all leaseholds, or through the landlord or the owner.
    c. There are no onerous liabilities outstanding.
    d. There are no substantial defects, or other matters requiring expenditure (in excess of the current amount or assumed amount of service charge payable on an annual basis), expected to result in charges to the leaseholder, or owner of the property, during the next five years, equivalent to 10% or more of the reported Market Value.
24. Where the dwelling is leasehold and it is not possible to inspect the lease or details have not been provided, the following further assumptions will be made, unless instructed to the contrary:
    a. The unexpired term of the lease is 85 years, and no action is being taken by any eligible party with a view to acquiring the freehold or to extending the lease term.
    b. That there are no exceptionally onerous covenants upon the leaseholder.
    c. The lease cannot be determined except on the grounds of a serious breach of covenant in the existing lease agreement.
    d. If there are separate freeholders, head and/or other sub-head leaseholders, the terms and conditions of all the leases are in the same form and contain the same terms and conditions.
    e. The lease terms are mutually enforceable against all parties concerned.
    f. There are no breaches of covenants or disputes between the various interests concerned.
    g. The leases of all the properties in the building/development are materially the same.
    h. The ground rent stated or assumed is not subject to unreasonable review and is payable throughout the expired lease term.
    i. In the case of blocks of flats or maisonettes of over six dwellings, the freeholder manages the property directly or there is an appropriate management structure in place.
    j. There is a dutyholder, as defined in the Control of Asbestos Regulations 2012, and there are in place an asbestos register and effective management plan, which does not require any immediate expenditure, pose a significant risk to health or breach of the Health and Safety Executive (HSE) regulations.
    k. Where the property forms part of a mixed residential or commercially used block or development, there will be no significant changes in the existing pattern of use.
    l. Where the property forms part of a development containing separate blocks of dwellings, the lease terms of the property apply only to the block. There will be no requirement to contribute towards costs relating to the other parts of the development, other than in respect of common roads, paths, communal grounds and services.
    m. Where the property forms part of a larger development, the ownership of which has since been divided, all necessary rights and reservations have been reserved.
    n. There are no unusual restrictions on assignment or sub-letting of the property for residential purposes.
    o. There are no outstanding claims or litigation concerning the lease of the property or any others within the same development.
    p. Where the property benefits from additional facilities within a development, the lease makes adequate provision for the lessee to continue to enjoy them with exceptional restriction, for the facilities to be maintained adequately, and that there are no charges over and above the service charge for such use and maintenance.
25. In respect of insurance the following assumptions will be made, unless instructed otherwise:
    a. The property can be insured under all-risks cover for the current reinstatement cost and is available on normal terms.
    b. There are no outstanding claims or disputes.
    c. Where individuals in a block makes separate insurance arrangements, the leases make provision for mutual enforceability of insurance and repairing obligations and

d. Any landlord responsible for insurance is required to rebuild the property with the alterations that may be necessary to comply with current Building Regulations and planning requirements.

6.3. General Conditions

Our valuation has been carried out on the basis of the following general conditions:

1. In undertaking our valuations, we have adopted the definitions of Market Value and Market Rent as defined in the RICS Valuation – Global Standards ("the Red Book"), as detailed below:

   Market Value (MV) is defined in IVS 104 paragraph 30.1 as:

   "The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

   Market Rent (MR) is defined in IVS 104 paragraph 40.1 as:
   "The estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

2. Where relevant, we have adopted the definition of Fair Value as defined in the RICS Valuation – Global Standards ("the Red Book") and the definition adopted by the International Accounting Standards Board (IASB) in IFRS 13:*"The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date."*

3. Where relevant, we have adopted the RICS definition of Gross Development Value (GDV) as defined in the RICS Guidance Note on the Valuation of Development Property 2019:*"The aggregate market value of the proposed development, assessed on the assumption that the development is complete at the date of valuation in the market conditions prevailing at that date".*

4. The importance of the date of valuation must be stressed as property values can change over a relatively short period.

5. All those involved in the production of this valuation report with AssocRICS, MRICS or FRICS qualifications are also RICS Registered Valuers. Furthermore, in accordance with VPS 1 paragraph 3.2 of the Red Book, we confirm that the aforementioned individuals have sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.

6. Where our valuation is provided for the purposes of secured lending, although we comment on the suitability of the properties as loan security, we do so generally and not in the context of any specific loan terms as we are not qualified to do so.

7. Where we have provided an indication for insurance purposes of the current reinstatement cost of the property in its present form, it is given solely as a guide. A formal estimate for insurance purposes can only be given by a quantity surveyor or other person with sufficient current experience of replacement costs. We confirm that the property has not been inspected by such a person, and therefore any cost estimate is provided without liability.

8. We have made no allowance for any Capital Gains Tax or other taxation liability that might arise upon a sale of the property.

9. Our valuation is exclusive of VAT (if applicable).

10. No allowance has been made for any expenses of realisation.

11. Excluded from our valuation is any additional value attributable to goodwill, or to fixtures and fittings which are only of value in situ to the present occupier.

12. When valuing two or more properties, or a portfolio, each property will be valued individually and no allowance will be made, either positive or negative, should it form part of a larger disposal. The total stated will be the aggregate of the individual Market Values.

13. In the case of properties where there is a distressed loan we will not take account of any possible effect that the appointment of either an Administrative Receiver or a Law of Property Act Receiver might have on the perception of the property in the market and their subsequent valuation, or the ability of such a Receiver to realise the value of the property in either of these scenarios.

14. The extent of the due diligence enquiries we have undertaken and the sources of the information we have relied upon for the purpose of our valuation are stated in the relevant sections of this Report. Where reports and other information have been provided, we summarise the relevant details in this Report. We do not accept responsibility for any errors or omissions in the information and documentation provided to us, nor for any consequences that may flow from such errors and omissions.

15. Our Valuation will be based on market evidence which has come into our possession from numerous sources, including other agents and valuers and from time to time this information is provided verbally. Some comes from databases such as the Land Registry or computer databases to which Savills subscribes. In all cases, other than where we have had a direct involvement with the transactions being used as comparables in this Report, we are unable to warrant that the information on which we have relied is correct.

16. This Report contains many assumptions, some of a general and some of a specific nature. Our valuations are based upon certain information supplied to us by others. Some information we consider material may not have been provided to us. All of these matters are referred to in the relevant sections of this Report. Where possible, we have sought to verify the information provided to us. However, should further due diligence highlight inaccuracies in the data supplied to us, or new material information come to light, this may have an adverse impact on the valuations herein reported. In such cases, we would reserve the right to amend our advice accordingly.

17.
