Section B – Issuer:		
B.1	Legal and commercial name:	The Issuer's legal and commercial name is International Personal Finance plc.
B.2	Domicile, Legal Form, Country of Incorporation and Legislation under which the Issuer Operates:	The Issuer is a public limited company incorporated and registered in England and Wales on 5 December 2006 under the Companies Act 1985 as a company limited by shares with registered number 6018973.
B.4b	Known Trends Affecting the Issuer and its Industry:	<p>The first nine months of 2012 has seen a backdrop of low but relatively stable consumer confidence and modest economic growth in the Group's European markets, against which backdrop the Group has performed well. For the first nine months of 2012 the Group reported growth in customer numbers of 6 per cent. and credit issued of 13 per cent. alongside stable credit quality. This has resulted in underlying profit growth of £14.3M before the twin impact of weaker FX rates and higher early settlement rebates ("ESRs") (arising from the implementation of the Consumer Credit Directive). Taking these two factors into account, profit fell by £4.1M to £58.6M. The provision of credit to consumers in Europe, including consumer loans, is at present governed by national legislative provisions which implement the new consumer credit directive (Directive 200848//EC (the "CCD")). The CCD was adopted by the European Council in May 2008 and has subsequently been implemented in each of the Group's European markets. Poland was the last country to do so, in December 2011. The primary impact of the legislation on the Group's business has been to require the granting of higher ESRs to customers who choose to settle their loans before the end of the contractual term. Revenue increased at the slower rate of 9 per cent. during the first nine months of 2012, largely due to the expected impact of higher ESRs in the Czech Republic/Slovakia and Poland, which are charged against revenue. The impact of higher ESR costs was broadly in line with the Group's expectations for the first half of 2012. The Group's collections performance remained robust during the first nine months of 2012 and annualised impairment as a percentage of revenue remains at the lower end of the Group's 25 per cent. to 30 per cent. target range (September 2012: 26.5 per cent., June 2012: 26.2 per cent.; December 2011: 25.8 per cent.; June 2011: 26.8 per cent.).</p> <p>In the face of the recent global economic downturn of 2008-2009, the Group's business model has proven to be robust. The Group adopted strategies to manage the business during the 2008-2009 macro-economic downturn, namely; credit control tightening, enhanced credit control systems, changes to incentive structure and cost base reduction. The financial performance of the Group improved as 2009 progressed, including a return to normal levels of impairment by the second quarter of 2009, Impairment levels have continued to remain stable since 2009. Despite the challenging economic conditions, the business has continued to generate good margins and returns. In 2011, the Group generated a profit margin of 15.5 per cent., a return on capital employed of 22.7 per cent. and profits of £100.5M.</p>
B.5	Group Position:	The Issuer is the ultimate parent in its corporate group, which is composed of wholly owned subsidiaries of the Issuer. The Issuer's group operates six principal overseas subsidiaries in central and eastern Europe and Mexico and has certain UK subsidiaries which provide business services, financial support or debt option facilities to fellow subsidiary undertakings.

A security rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.</p> <p>The Notes to be issued are not rated.</p>
B.18	Guarantee:	<p>The Guarantors have, on a joint and several basis, unconditionally and irrevocably guaranteed the due payment of all sums expressed to be payable by the Issuer under the Trust Deed, the Notes and Coupons. Their obligations in that regard are contained in the Trust Deed.</p>

<b>Section D – Risks:</b>		
D.2	Key Information on the Key Risks Specific to the Issuer:	<ul style="list-style-type: none"> <li>• The Group is at risk from changes in political, economic, and financial market conditions, such as a global or local recession, inflation and fluctuations in interest and currency exchange rates. This is a particular risk for the Group as the countries in which the Group currently operates are emerging economies and so are likely to be subject to greater volatility. Change to the political landscape in one of the Group's geographic markets could undermine general demand for loans, lead to labour unrest, or, if capital controls are imposed, restrict the ability of a Group subsidiary to remit funds to the UK holding company. Recession could reduce demand for the Group's products and services. Rising inflation could erode Group profitability, as the rate of interest on loans made by the Group is generally fixed at the outset, whilst the Group's costs rise in line with inflation. Rising interest rates can lead to higher costs of Group borrowing, reducing profitability. The Group reports results in Sterling, but the majority of its assets are denominated in foreign currencies, so exchange rate fluctuations may adversely affect the Group's income statement account, its reserves or future cash flows.</li> <li>• The Group is at risk from regulation and litigation (including the effects of changes in law or interpretation of the law in the Group's operating markets) associated with the fact that the Group operates in a highly regulated industry. This is a particular concern for the Group as total charges for the Group's loans are higher than for loans provided by mainstream banks, which can bring calls for statutory caps. Any such change could affect the Group's profitability, solvency and capital requirements and may give rise to increased costs of compliance. Litigation on the basis that the Group's charges are unfair or usurious could, if any such actions are upheld by the relevant courts, compel a change in the Group's business model.</li> <li>• An increase in competition in any of the Group's markets could lead to a reduction in market share or an increase in the cost of customer acquisition and retention.</li> <li>• The Group is at risk of losses or liabilities incurred as a result of the business failure of a counterparty (for example, major IT suppliers, funding banks and retail banking facilities). This is a particular risk for the Group as the business model is dependent upon these operational counterparties.</li> </ul>

		<p>Failure of an IT services outsourcer could significantly disrupt the business operation, and failure of a bank with which the Group has a cash balance on account could lead to loss of the deposit or lack of sufficient cash to fund short-term business operations in the market where such bank is based.</p> <ul style="list-style-type: none"> <li>• There could be challenges to the tax treatment of arrangements amongst the companies in the Group. Although the Group is headed by a UK holding company, the Group does not have substantial operations in the UK. This exposes the Group to the UK's international tax regime. The treatment of such international groups under UK tax law is subject to significant change. Changes in accounting rules could also significantly impact the Group's tax liabilities. Changes in tax or accounting rules could damage the Group's financial position.</li> <li>• Risks arise from the implementation of the business strategy of the Group, both in respect of existing markets and new markets. In particular, the Group's focus on a single product (the provision of home credit) increases the Group's exposure to competitive and regulatory threats. The Group may misjudge its entry into a new geographic market, potentially leading to a loss on withdrawal from the market.</li> <li>• Loss may arise from the failure to ensure employee and agent safety, which could lead to agents or managers being harder to retain or being unwilling to make home visits, as well as personal injury claims and reputational damage, and the loss of key people, which could disrupt the Group's business.</li> <li>• There is a risk of damage to the Group's brands or reputation or a decline in customer confidence in the Group or its products. This is a particular risk for the Group as the success of the Group's business is dependent on the Group's brands and reputation. Adverse publicity could affect customer willingness to take Group products or make repayments, or make it more difficult for the Group to recruit. Unfavourable publicity could in turn lead to increased pressure for changes to regulation of the consumer credit industry in the relevant market.</li> </ul>
D.3	Key Information on the Key Risks which are specific to the Securities:	<ul style="list-style-type: none"> <li>• Notes may have no established trading market when issued, and one may never develop, or may develop and be illiquid. Investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market.</li> </ul> <p>Notes subject to optional redemption by the Issuer:</p> <ul style="list-style-type: none"> <li>• an optional redemption feature is likely to limit the market value of Notes. During any period when the Issuer may elect to redeem Notes, the market value of those Notes generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.</li> <li>• the Issuer may be expected to redeem Notes when its cost of borrowing is lower than the interest rate on the Notes. At those times, an investor generally would not be able to reinvest the redemption proceeds at an interest rate as high as that on the Notes being redeemed and may only be able to do so at a significantly lower rate.</li> </ul> <p>Notes issued at a substantial discount or premium:</p> <ul style="list-style-type: none"> <li>• the market values of securities issued at a substantial discount or premium to their nominal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the securities, the greater the price volatility as compared to conventional interest-bearing securities with comparable maturities.</li> </ul> <p>Investors who hold through CREST through the issuance of CDIs ("<b>CDI Holders</b>") hold or have an interest in a separate legal instrument and will have only indirect interests in the underlying Notes. This could potentially lead to the CDI Holders having different rights and returns in respect of such underlying Notes as against those investors who have a direct interest in their Notes.</p>
