APPENDIX 1

EXPLANATORY NOTES TO THE RESOLUTIONS

An explanation of each of the proposed Resolutions is set out below. Resolution 1 is proposed as ordinary resolution. This means that for the resolution to be passed, more than half of the votes cast must be in favour of the resolution.

Resolution 2 is proposed as a special resolution. This means that in order to have this resolution passed, in excess of three-fourths of the votes cast must be in favour of the resolution.

The Board would strongly encourage all members to vote on all the proposed Resolutions below.

Resolution 1: To reappoint Dr Luo Wei, who is retiring by rotation, as a director.

An ordinary resolution will be proposed to reappoint Dr Luo Wei who is retiring by rotation in accordance with the Articles and, being eligible, offers himself for reappointment as a non-executive director of the Company.

Resolution 2: To approve for the period commencing twenty four (24) months following the date of this AGM (Period), the disapplication of the pre-emption provisions set out in Regulation 1.5 of the Company's articles of association in relation to the issue of, or the grant of any right to subscribe for or convert any security into, up to a further four and half billion (4,500,000,000) ordinary shares, and to authorise the Directors of the Company to issue, or grant any right to subscribe for or convert any security into, shares in accordance with the provisions of this resolution, but so that the Company may make offers and enter into, agreements during the Period which would, or might, require shares to be allotted or rights to subscribe for, or convert other securities into shares to be granted after the Period ends.

The intended use of the dis-applied shares is as follows:

As announced on the 11 December 2023, Zulu open pit mining contractor, JR Goddard Contracting (Pvt) Ltd ("JRG") had agreed to accept payment of a limited number of future invoices until commercial shipments begin at Zulu in Q1 of 2024. The board believes that this share settlement is essential and should be maintained as such, 769,230,769 new ordinary shares of the Company at the price of 0.26 pence ("JRG Settlement Shares") will be issued to US\$2.5 million (equivalent to £2 million) in invoices once the conditional precedents have been met.

As announced on the 9 August 2023, the board entered into a Loan Facility Agreement with George Roach ("Facility"). While George Roach agreed to waive immediate settlement on the Facility to allow the Company to conclude the fund raise announced on the 15 February 2024, the Company is now in breach of the Facility, and it is imperative that 370,000,000 new ordinary shares are available to the Company to ensure that an agreement can be reached with George Roach for the default and also settlement of the Facility.

As reported in Premier Annual Financial Statements for the year ending 31 December 2022 under section 17 (Contingent Liability), China Zenith Capital Ltd were suing Premier for a 3% net debt success fee based on Premier's consultancy agreement with China Zenith Capital Limited.

In spite of Premier having two independent legal opinions supporting Premier believe that the prepayment and offtake funding by CanMax was a deferred revenue in accordance with International Financial Reporting Standards (IFRS), the Arbitration hearing held under the rules of the London Court of International LCIA Arbitration was lost following a ruling whereby the arbitrator sought fit to discount the definition of debt under IFRS and focus on a common sense interpretation of the Engagement Letter that prepayment and offtake funding was contemplated under the debt success fee.

Premier refutes the judgment in the strongest possible terms; however, the arbitration ruling is final and binding whereby Premier will settle Zenith Capital Limited award in new ordinary shares at prevailing share prices.

The remaining shares are intended to be used to bring Zulu into profitable production and general working capital of Premier. As has been previously announced, Premier have now taken over control of the Zulu operations with the departure of Stark International Project ("Stark").

Since Premier has taken over from Stark as the plant operator, we can confirm the following:

- The plant has now run and produced Spodumene concentrate at saleable grade in accordance with Premier Prepayment and Offtake Agreement.
- Aspects of the plant have not reached design throughput; however this is a ramp up process now under the control of Premier and we expect that the plant will run continuously as Premier goes through this process.
- Certain design issues will be resolved over a period, and this will see general improvements in production. These include:
 - Review and subsequent changes to the crushing and ore sorting capabilities.
 - Redesign of the comminution flow to better stabilize the Jetsizer capabilities and efficiencies of the mill.
 - Upgrade the reagent plant delivery capacities.
 - Redesign and implement a more stable supply pipeline from the thickener to the float plant.
 - Exploitation of a secondary ore source from within our claims area is delivering high grade ore with a contained spodumene content of up to 37% to the Run of Mine pad.

The significance of this secondary ore source cannot be overstated. SC6 carries approximately 75% spodumene. This ore potentially dramatically reduces the required tonnage that needs to be processed through the plant to achieve production targets, is generally free of the deleterious waste that the ore sorters have been unable to remove and provides the time to deal with the various design issues needing remedy.

Fortunately, with the possible exception of the sensor-based sorters, remedy of the design deficiencies is largely time related and will be attended to at site.

It should be noted that this secondary ore source is from one of many pegmatites identified in our EPO. None have had extensive exploration, and no formal resource estimate is available at this time. There is therefore no certainty on the continuity of either the ore body or the mineralisation currently being exploited, and this is regarded as a fortuitous intermediate opportunity whilst the full ramp up of the plant continues.

In summary, the Board would be remiss to not ensure that it has sufficient flexibility to issue equity if required to ensure that Zulu reaches Commercial production. It is on this basis that the Board has requested the disapplication of pre-emptive rights over 4.5 billion shares, which the Board believes to be the maximum that the Board would consider appropriate given the following:

1. The market capitalisation of the Company.
2. The ongoing funding requirements for the Premier group, in particular the Zulu Project.
3. The proposed authority of 4.5 billion shares represents only 16.1% of the total issued share capital of the Company.

The Board consider the approval of the Resolutions to be proposed at the AGM to be in the best interests of the Company and its Shareholders as a whole and, accordingly, unanimously recommend Shareholders to vote in favour of all the Resolutions. The Board further wishes to confirm that their preferred means of dealing with funding requirements and obligations at the Zulu Project in through the alternative debt funding. Efforts to secure such an alternative are ongoing.

Shareholders should be aware that if the Resolutions are not passed at the AGM, and Premier is unable to secure alternative funding, the Company will have no other means but to seek alternative sources of funding or seek alternative methods of realising Shareholder value, which could include a discounted open offer. Neither of these alternatives is expected to be favourable for Shareholders given the current stage of the Zulu Project including the ongoing funding requirements and the obligations.

The Board considers that it is therefore of the utmost importance that Shareholders vote in favour of the Resolutions.
