JLL SEE A BRIGHTER WAY

Appendix 3

Market Commentary

JLL SEE A BRIGHTER WAY

JLL Residential Market Update – March 2024

The rate of inflation dropped back to 3.4% in February, marginally below the 3.5% forecast. But as expected the direction of travel was not significant enough to convince the majority of MPC members to vote for a base rate cut. With rates held at 5.25% for the seventh consecutive meeting. One member voted to cut rates (the same position they held at the last meeting), but notably the two votes to increase rates to 5.5% at the previous meeting had changed to hold this time round. Economists are expecting the summer will see the first rate cut, although the pack remain split on whether this will take place at the June or August meeting.

With rate cuts now anticipated later in the year and swap rates (used to price mortgages) edging up from where they settled earlier in the year, fixed mortgage rates have risen. Best buy rates up from sub 4% earlier in the year to the early fours currently. But we expect these will start to edge down (a little) as we move through the year, and we see the first rate cut (or markets are more confident that it is coming).

Following news that the UK fell into recession in the second half of 2023, January figures were slightly more encouraging. Albeit most months seem to be oscillating at just above or just below flat (0%).

A rise in retail spending and construction activity meant UK GDP rose 0.2% month-on-month in January, up from a fall of -0.1% in December. Construction output rose 1.1% in January, the biggest monthly increase since June 2023, with private sector house building leading the way with an increase of 2.6%, following a sharp drop in activity in 2023.

The Purchasing Managers Index (PMI) reported more positive market conditions, with the services index rising further above 50 (indicating growth) and the manufacturing index looking more promising as it headed in that direction too.

Rental market

After a frenzied couple of years, the waters are a little calmer for the rental market so far this year. There is certainly some much needed heat coming out of the market, but we see this as a return to more ‘normal’ market conditions rather than anything more dramatic.

Stock levels are edging up from their recent lows but still fall short of pre-pandemic levels. Average rents are still rising, Homelet figures showing a 7.4% annual increase in achieved rents, closely mirroring the 7.8% figure quoted by Zoopla. This month saw the first in a revamped series of private rents data from the ONS. The data, which include both new and existing tenancies, show rents rose 9.0% in the year to January.

The RICS survey shows demand for rental properties still outpacing new landlord instructions. However, the ‘return-to-normality’ trend appears to be evident in their results, too. The survey, which is reported as a balance of opinion, shows a reading of +16% of agents reporting an increase in tenant demand, still rising but down from the +47% six months ago. More respondents still think rents will rise, with a net balance of +37% expecting growth over the next three months, albeit lower than the +53% who thought the same a year earlier.

Zoopla data shows a similar picture, with the number of applicants per property still averaging 15 – down from the 2021 high of more than 40, but still double pre-pandemic norms.

London is experiencing a bigger swing in annual growth, with the capital seeing the lowest annual increases in rents over the last 12 months, according to Homelet, at 4.8% (down from 13% just six months ago, though still above the long-term average).

Sales market

The most widely used indices are all showing a similar pattern in house prices. Annual changes are, at their lowest, broadly flat, the Land Registry showing prices -0.6% down annually in January 2024 (up from -2.2% in December). Nationwide and Halifax show annual increases of 1.2% and 1.7% respectively in February. Rightmove figures, based on asking prices, show prices rose 0.8% annually in March, and were 1.5% higher than the previous month.

Activity levels have risen this year, Rightmove are reporting a 13% annual increase in sales agreed, with buyer demand up 8%. JLL figures also show an increase in activity, with a 24% increase in buyers registering with our London offices so far this year compared with the same period in 2023.

Mortgage markets

Higher rates meaning less activity in the mortgage markets won't be a huge surprise. Recently published figures from the Bank of England show mortgage advances down -29% in 2023 compared with 2022. But first-time buyers remain more active than other borrowers. Overall advances to first time buyers were down -23% (despite government assistance through Help to Buy ending), whereas home mover advances fell -31% and buy-to-let saw a -55% fall. But figures for January show a more encouraging picture. The number of mortgage approvals exceeded 55,000, the highest monthly figure since October 2022.

Outlook

We are forecasting a -3% fall in UK house prices in 2024. An early election and potential post ballot bounce or an early run of rate cutting by the Bank of England could make us look pessimistic. But until we know more, we are assuming that base rates will have started to fall back by the summer, and activity will increase. If we follow that trajectory price rises are more likely in the second half of the year, but it could be 2025 before we see this feed into the indices.

JLL Research | March 2024

JLL is a leading global professional services firm specialising in real estate and investment management, with $16.6bn annual revenue in 2020, operations in over 80 countries and a global workforce of over 90,000. With over 7,000 employees and 15 offices in the UK, we support our investor, developer, and occupier clients at every stage of the property lifecycle across both commercial and residential asset classes. This includes land purchase, access to capital, planning, development advisory, leasing, building management and sales.

JLL's Residential and Living team consists of over 300 professionals who provide a comprehensive end-to-end service across all residential property types, including social housing, private residential, build to rent, co-living, later living, healthcare and student housing.

7. any receiver or other party which is appointed to realise the security;

together, the "Addressees".

1.4. Instructions and Basis of Valuation

In accordance with the instructions confirmed in our letter to you dated 10th January 2024, we have inspected the property and made such enquiries as are sufficient to provide you with our opinion of value on the bases stated below.

You have instructed us to provide our opinions of value on the following bases:

- The Market Value ("MV") of the Properties subject to the tenancies
- Existing Use Value for Social Housing ("EUV-SH") of the tenanted and shared ownership properties

Unencumbered Properties – MV-STT

In relation to Properties which may be disposed of by a mortgagee in possession on an unfettered basis (meaning subject to tenancies but otherwise vacant possession and not subject to any security interest option or other encumbrance or to any restriction preventing its sale to, or use by, any person for residential use):

The Market Value of such properties for loan security purposes firstly reflecting the fact or (where not the case) making an assumption as to the fact that the properties are subject to existing tenancies that grant security of tenure to the occupational tenant. Our valuation will refer to this basis of value as "MV–STT" or "market value, subject to tenancies".

Encumbered Properties – EUV-SH

In relation to properties other than those specified above that have restrictions on title or in planning:

The Existing Use Value for Social Housing ("EUV-SH") of such properties for loan security purposes.

1.5. Definition of Bases of Value

Existing Use Value for Social Housing is defined by the Royal Institution of Chartered Surveyors ("RICS") at UK VPGA 7 as:

"Existing use value for social housing (EUV-SH) is an opinion of the best price at which the sale of an interest in a property would have been completed unconditionally for a cash consideration on the valuation date, assuming:

a) a willing seller
b) that prior to the valuation date there had been a reasonable period (having regard to the nature of the property and the state of the market) for the proper marketing of the interest for the agreement of the price in terms and for the completion of the sale
c) that the state of the market, level of values and other circumstances were on any earlier assumed date of exchange of contracts, the same as on the date of valuation
d) that no account is taken of any additional bid by a prospective purchaser with a special interest
e) that both parties to the transaction had acted knowledgeably, prudently and without compulsion
f) that the property will continue to be let by a body pursuant to delivery of a service for the existing use
g) that the vendor would only be able to dispose of the property to organisations intending to manage their housing stock in accordance with the regulatory body's requirements
h) that properties temporarily vacant pending re-letting should be valued, if there is a letting demand, on the basis that the prospective purchaser intends to re-let them, rather than with vacant possession and
i) that any subsequent sale would be subject to all the same assumptions above"

Market Value is defined by the Royal Institution of Chartered Surveyors at VPS 4.4 as:

"The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

1.6. Freehold & Long-Leasehold Properties

We have valued the freehold and long leasehold property and listed these separately at Section 4.4 and have indicated which applies to each property at **Appendix 1**.

We confirm that there will be no material difference in the valuations between freehold and long leasehold interests (on either basis; MV-STT and EUV-SH).

1.7. Background

This Report is required in connection with each series of Notes to be issued by the Issuer under the Programme where the underlying security is apportioned on "Numerical Apportionment Basis" in accordance with the Security Trust Deed.

The schedule of properties which are the subject of this valuation (the "Properties") with apportioned values is attached at **Appendix 1** and relates to 38,974 units in total.

In completing this exercise, we have:

a) agreed a full set of property schedule data with the Existing Borrower;

b) discussed details as to our approach and methodology; and

c) completed our own inspections, research and analysis.

The above has enabled us to arrive at the valuation assumptions that have enabled us to carry out our valuations and final reported figures herein.

For the avoidance of doubt, we confirm that it would not be appropriate or possible to compare this valuation with any values appearing in the annual accounts of the Existing Borrower. This Report has been prepared in accordance with the RICS Red Book (as defined herein). The valuations are prepared on this basis so that we can determine the value recoverable if the charges over the Properties were enforced as at the Effective Date (as defined herein). We understand that the values given in the accounts of the Existing Borrower are prepared on an historic cost basis, which considers how much the Properties have cost and will continue to cost the Existing Borrower. This is an entirely different basis of valuation from that used for loan security purposes. Moreover, the figure in the latest published annual accounts of the Existing Borrower represents a valuation based on the going concern of the whole stock, in contrast with the valuation for each series of Notes issued under the Programme where the underlying security is apportioned on a "Numerical Apportionment Basis" pursuant to the Security Trust Deed which only represents the value to a funder in possession of a portion of the stock. As such different assumptions would be applied. Consequently, in addition to being impractical, any comparison would not be an accurate comparison.

1.8. Conflicts of Interest

We are independent valuers and are not aware of any conflict of interest, either with the Properties or the Issuer, preventing us from providing you with an independent valuation of the Properties in accordance with the RICS Red Book. We will value the Properties as External Valuers, as defined in the RICS Red Book.

We confirm that Savills Advisory Services Limited does not have a material connection or involvement with the subject property or any other parties and there are no other factors that could limit the valuer's ability to provide an impartial and independent valuation. Accordingly, we are reporting on an objective and unbiased basis.

1.9. Date of Valuation

Our opinions of value are as at 31 March 2024. The importance of the date of valuation must be stressed as property values can change over a relatively short period.

1.10. Purpose of Valuation

We understand that our valuation is required for loan security purposes in accordance with VPGA 2 of the RICS Valuation – Global Standards in connection with each series of Notes to be issued by the Issuer under the Programme where the underlying security is apportioned on a "Numerical Apportionment Basis" pursuant to the Security Trust Deed.

This Report is issued for the benefit of the addressees and for the inclusion in the offering circular (the "Offering Circular") for the Programme issued by the Issuer and may only be used in connection with the transactions referred to in this Report and for the purposes of the Offering Circular.

We hereby give consent to the publication of this Report within the Offering Circular and accept responsibility for the information contained in this Report. To the best of our knowledge and belief (having taken all reasonable care to ensure that such is the case) the information given in this Report is in accordance with the facts and does not omit anything likely to affect the import of such information.

1.11. Valuer Details and Inspection

The due diligence enquiries referred to below were undertaken by Matthew Sale MRICS and Andy Garratt FRICS. The valuations have also been reviewed by Catherine Wilson MRICS and Andy Smith MRICS.

As instructed a representative 20% sample of the Properties was inspected externally with sample internal inspections by Savills between 8 January 2024 and 9 February 2024. This is part of a 20% rolling programme of inspections over a 5 year period.

1.12. RICS Compliance

The report has been prepared in accordance with the RICS Valuation – Global Standards (incorporating the IVSC International Valuation Standards) effective from 31 January 2022 together, where applicable, with the UK National Supplement effective 14 January 2019, (together the "**Red Book**").

1.13. Extent of Due Diligence Enquiries and Information Sources

Where possible in the time available, we have verified, and supplemented information provided to us. However, if further information becomes available of which we are not currently aware, we reserve the right to amend our valuation accordingly to take this into account.

The extent of the due diligence enquiries we have undertaken and the sources of the information we have relied upon for the purpose of our valuation are stated in the relevant sections of the report below.

In summary the Existing Borrower has provided the following:

- Full Address if the property including Postcode
- Property Type and number of bedrooms
- Whether the property is of non-traditional construction
- Whether there are multi storey or multi occupied residential buildings within the portfolio that have either aluminium composite material ("ACM") or Non ACM external wall systems

- For the multi storey residential buildings, whether the Existing Borrower has conformed with the External Wall Fire Review process and, for any buildings with potentially combustible external wall systems, have obtained an External Wall Survey ("EWS1") by a competent chartered professional with suitable fire expertise, within the last five years or since any alterations
- Current Rent 52 Week basis (net of Service Charges)
- Tenancy Type and Letting Category
- Shared Ownership % Retained Equity
- EPC Rating

We have also reviewed the original certificates of title prepared by Trowers & Hamlins LLP, DMH Stallard LLP and Winckworth Sherwood LLP, the five certificates of title prepared by Devonshires Solicitors LLP dated 29 August 2017 and the reliance and top up letters prepared by Devonshires Solicitors LLP, DMH Stallard LLP, Trowers & Hamlins LLP and Winckworth Sherwood LLP (and any previous reliance/top up letters referred to therein) to be dated on or about 29 September 2017 and the certificate of title prepared by Devonshires Solicitors LLP dated 19 September 2018, 4 December 2020, 3 March 2022 and 25 July 2022 (together, the "Property Documents") and can confirm that our valuations fully reflect the disclosures contained therein.

1.14. Market Conditions

The UK economy continues to maintain a watch over inflationary pressures amid sluggish economic growth. In the first half of 2023, the UK witnessed a modest expansion, leading the IMF to upgrade their forecasts and dismiss the possibility of a recession in 2023, however, to combat inflation, the Bank of England consistently raised the base rate from late 2021, reaching a high of 5.25% in August 2023. These measures have contributed to the UK economy being classified as being in recession, with the economy contracting 0.3% between October and December 2023, following an initial fall of 0.1% between July and September 2023.

Accordingly, whilst further increases in interest rates cannot be ruled out, the prospect of any increase appears to have subsided given that inflation gradually reduced over the course of 2023. Nonetheless, whilst the UK inflation rate for November 2023 was at its lowest level in 2 years, at 3.9%, December 2023 recorded a small rise to 4.0%, the first rise since February 2023, and inflation for January 2024 was also recorded at 4.0%, and moreover remains stubbornly above target. The rise was unexpected and may delay rate cuts by the Bank of England, the committee responsible for interest rate setting split over whether rates should be held, reduce or even rise.

As a result of the increases in the base rate, borrowing costs have increased, surpassing prime real estate yields although the financial markets have begun to price in an anticipated reduction in interest rates, which is considered to indicate a turning point in the market.

The residential sales markets are considered to have stabilised at the end of 2023, and come at a time when confidence is returning to the UK's prime markets against a backdrop of continued falls in the underlying rate of inflation which have fed into more competition in the mortgage markets and more stability in the housing markets, despite continued underlying economic uncertainty.

Although inflation is still significantly above the Bank of England's target of 2.0%, it has nonetheless fallen significantly which has reduced the pressure to further raise interest rates, albeit a reduction is not expected before May 2024. As a consequence, mortgage lenders have begun to reduce their rates in respect of new fixed-rate loans albeit they remain at levels in excess of those which many borrowers had become accustomed to. Moreover, a further 1.2M fixed rates mortgages will come to an end in 2024.

Given the expected General Election in the second half of 2024, Savills anticipates that we will not see a return to sustained price growth until 2025. Instead, we expect 2024 to be a year of two halves: modest price falls of around 3.0 per cent in the first half of the year, and little if any movement in pricing in the second half of the year, with transactions broadly on par with 2023 and similarly weighted to equity-rich buyers.

It is therefore important to recognise that our valuation has been prepared against the backdrop outlined above. Moreover, investor behaviour can change quickly during such periods of heightened volatility. As such, the conclusions set out in this report are only valid at the valuation date and we would recommend that the value of the property is kept under regular review. For the avoidance of doubt, our valuation is not reported as being subject to 'material valuation uncertainty' as defined in the RICS Valuation – Global Standards.

1.15. General Assumptions and Conditions

All valuation advice has been carried out on the basis of the General Assumptions and Conditions set out in Section 7.

2. Executive Summary of Valuation

2.1. Valuation of All Property

Based on the schedule of Properties provided by The Existing Borrower and upon the assumptions detailed in this Report, our opinions of value on the bases indicated as at the date of this Report are as follows:

Our opinion of value, in aggregate, of the 19,139 rented dwellings as mentioned at **1.4** above, on the basis of

- Market Value – Subject to Tenancies (MV-STT) is **£4,229,119,000 (Four Billion, Two Hundred and Twenty Nine Million, One Hundred and Nineteen Thousand Pounds)**

Our opinion of value, in aggregate, of the 15,374 rented and Shared Ownership dwellings as mentioned at **1.4** above, on the basis of

- Existing Use for Social Housing (EUV-SH) is **£1,094,985,000 (One Billion and Ninety Four Million, Nine Hundred and Eighty Five Thousand Pounds)**

There are 3,970 properties which have been ascribed a nil value and 491 properties a withheld value.

A detailed breakdown of the categories of property concerned and their respective values is given at Section 5 below. A summary of the valuations split between Freehold and Leasehold property is in Section 5. A full property schedule with apportioned values is included at **Appendix 1**.

3. The Properties

3.1. Location

The Properties comprise 38,974 properties in the instruction. This total includes 3,970 nil value units leaving 35,004 units which are spread across the local authority areas detailed in Table 1 below. The Properties are situated across 72 Local Authority areas.

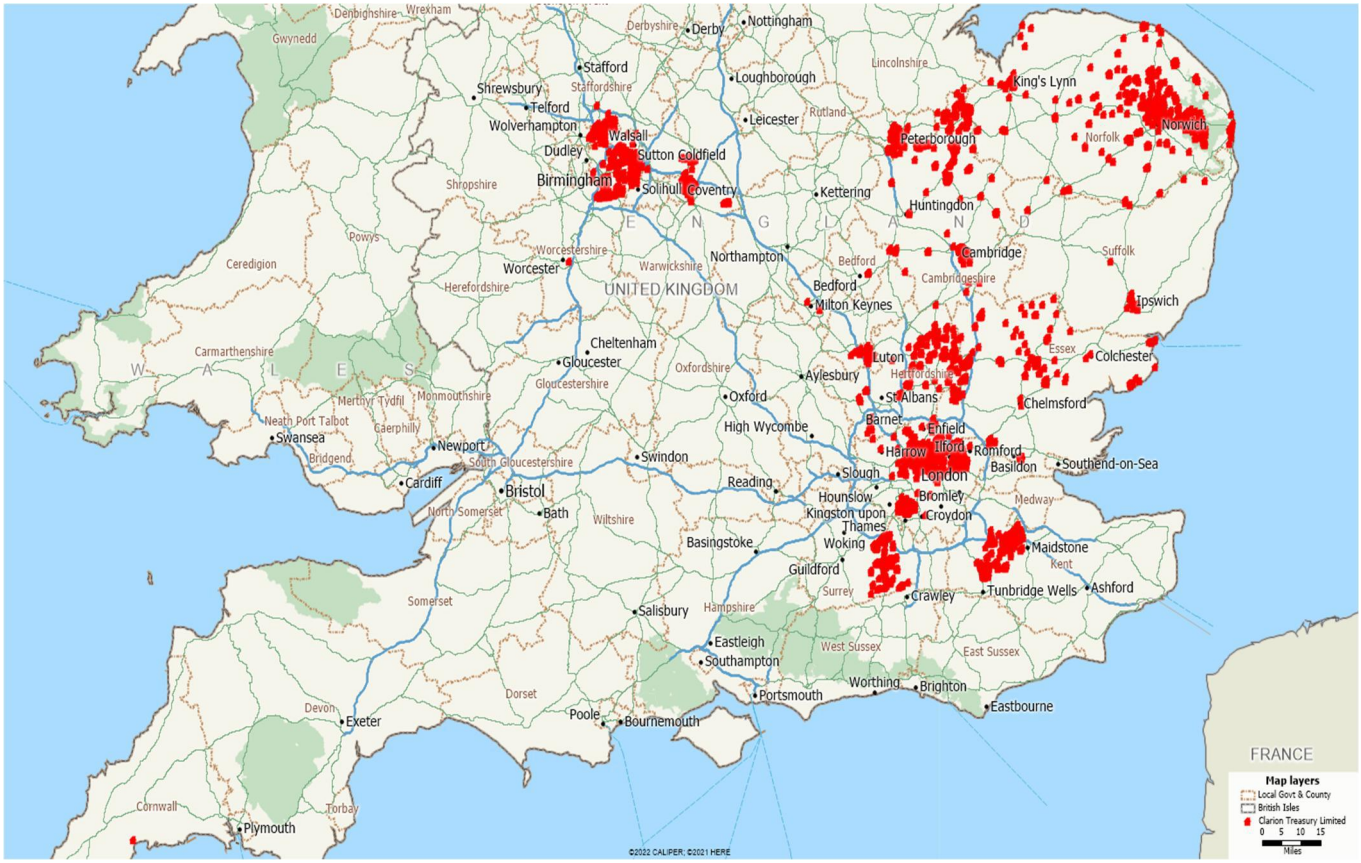
The spread of the stock is shown by the map in the following map.

Figure 1: Map of Stock:



The stock is a mixture of houses, bungalows and flats, made up of street properties, infill development, purpose built social estates and Section 106 style developments on larger residential schemes. The portfolio comprises mainly self-contained units however there are a number of schemes which contain rooms with shared facilities. There properties are made up of houses & bungalows 56%, flats & maisonettes 43% and rooms 1% as set out below.

Table 2: Property Types and Number of Bedrooms

Source: the Existing Borrower

The properties are situated in predominantly residential areas. Location vary, but most stock is within good proximity of reasonable transport links and amenities as are access routes to larger settlements where the full range of services and amenities can be found.

The Properties are in the main considered to be of conventional construction for their age and type. Houses are mainly of solid brick, cavity brick or timber frame construction with roofs being mainly pitched and covered in slate or tile. Flats are mainly of cavity brick, metal or timber frame construction with roofs being pitched and covered in tile or are flat and believed to have an asphalt or metal type covering. The majority of the Properties have modern plastic gutters and downpipes.

A high proportion of the Properties have double glazed windows of timber, metal or UPVC casement type. The majority of the Properties benefit from all mains services and gas fired central heating systems supplying radiators.

A significant number of the Properties were acquired by transfer from local authorities under Section 32 and 43 of the Housing Act 1985.

The stock contains 711 valued flats situated in high rise flats of over 6 storeys. Please refer to section 2.5 ‘High Rise Flats’ for further details.

3.2. Property Types

The Properties comprise general needs, sheltered, supported, intermediate, keyworker, market rented and shared ownership. As can be seen from the table below 76% of the stock comprises general need properties let at social rent levels. The stock can be summarised by type and tenure as follows:

Table 3: Property Types and Letting Category

Type	Flats & Maisonettes	Houses & Bungalows	Rooms	Total	% of stock
General Needs – Social	9,908	16,861		26,769	76.49%
General Needs – Affordable	1,670	1,331		3,001	8.57%
Intermediate and Keyworker	101	18	188	307	0.86%

Ignores 3,970 nil value units

Source: the Existing Borrower

Appendix 1 includes a full list of the properties.

3.3. Title

3.3.1. Report on Title

Our valuation reflects our opinion of value in aggregate of the freehold or long-leasehold interests (in each case) of the Properties owned by the Existing Borrower and identified by the subject of this Report and scheduled at **Appendix 1.**

In respect of each Property which we have valued on the basis on MV-STT we confirm that we have reviewed the Property Documents and confirm that each such Property can be disposed of on an unfettered basis (i.e. subject only to existing tenancies disclosed in the Property Documents but not subject to any security interest, option or other encumbrance or to any restriction preventing or restricting its sale to or use by any person for residential use).

3.3.2. Tenancies

The Properties are understood from the Existing Borrower to be subject to Assured, Secure or Assured Shorthold tenancies. The Existing Borrower standard tenancy agreements are assumed to be in a typical format however they have not been seen as per of this valuation.

It is assumed that under the Assured and Assured Shorthold tenancy agreements, rents can be reviewed once a year to a market level. The tenant is also assumed to have the usual rights of appeal to the local Rent Assessment Committee.

Under typical Fair/Secure Rent tenancies the rent is reviewed every 2 years with reference to the local rent Officer.

There are a number of the Properties which are subject to management agreements with other RPs of social housing. We understand that in these instances the other RP manages the properties and pays the Existing Borrower the rent due less the agreed agent fee and a void allowance. The management agreement can be terminated on either party by giving one year's written notice.

3.3.3. Shared Ownership Leases

We have not seen the standard shared ownership lease of the Existing Borrower as part of this revaluation. We have assumed that the shared ownership leases follow a typical format of 99 or 125 years and are essentially a FRI lease making the tenant responsible for all repairs. In addition the lease will allow stair-casing by the leaseholder to buy additional blocks of equity.

The lease will detail the level of specified rent, set at the leases inception, and the rent review provisions of the lease. We understand the majority of the leases provide for annual rent review to RPI + 0.5%. We have increased rents by RPI + 0.5%. Full details of the rents payable and the equity held by the Existing Borrower are set out in **Appendix 1**.

3.4. Condition

3.4.1. General Condition

As instructed, we have not carried out a structural survey, nor have we tested any of the services. However, we would comment, without liability, that during the course of our inspection for valuation purposes, we observed that the property appears to be in satisfactory condition throughout etc.

Apart from any matters specifically referred to in this report, we have assumed that the Properties are free from structural faults or other defects and are in a good and lettable condition internally. The report is prepared on this assumption.

3.4.2. Mould and Damp

In 2022 Registered Providers were required by the Regulator of Social Housing to submit evidence about the extent of damp and mould in tenants' homes, providing information and evidence about the process of identifying, reviewing, and responding to issues of Mould and Damp within their housing stock. Although the review wasn't compulsory the majority of RPs responded, and the regulator concluded that while the picture is incomplete, the estimate is that less than 0.2% of social homes have the most serious damp and mould problems, 1-2% have serious damp and mould problems.

We have made enquiries of the Borrower who have confirmed that as far as they are aware there are no category 1 high risk issues that could be considered a risk to health and safety of their tenants.

3.5. Multi-Storey, Multi-Occupancy Buildings

Following the Grenfell Fire tragedy in June 2017 there has been an extensive review of building safety in multi-storey, multi-occupancy buildings. This has led to new legislation and a number of UK Government and other professional publications and recommendations, including publications and advice from the RICS, which we have had regard to in forming our opinion of value.

In March 2021 the RICS Guidance Note 'Valuation of properties in multi-storey, multi-occupancy residential buildings with cladding' 1st edition (the RICS Guidance Note), was published and came into effect on 5 April 2021.

For the purposes of valuation approach, the RICS Guidance Note categorises multi-storey buildings by storey height, 1-4 storeys (low rise), 5-6 storeys (medium rise) and more than 6 storeys (high rise). The table below reflects this categorisation as applied to the subject portfolio.

Table 4: Multi-Storey, Multi-Occupancy Buildings

Block Type	Properties	Percentage Spread of flats
1-4 Storeys (low rise)	13,497	87.30%
5-6 storeys (medium rise)	1,252	8.10%
>6 storeys (high rise)	711	4.60%
Total	**15,460**	**100%**
