Source: the Existing Borrower

More recently, the RICS Professional Standard 'Valuation approach for properties in multi-storey, multi-occupancy residential buildings with cladding' (the RICS Professional Standard) came into effect on 6 December 2022. This latter document provides a useful summary of the current UK Government guidance on building safety in multi-storey, multi-occupancy buildings, which is set out below.

On 10 January 2022, the UK Government set out plans to protect leaseholders and ensure that those responsible are aware of their duties for remediating buildings with fire safety concerns in relation to the building remediation works crisis. The proposals included:

- opening up the next phase of the Building Safety Fund to drive forward the removal of dangerous cladding from high-rise residential buildings 18m+/7 storeys or more;
- new protections for leaseholders living in their own flats with a commitment of no or limited bills (subject to individual lease qualification) for unsafe cladding and new statutory protections for leaseholders within the Act;
- the Consolidated Advice Note (CAN) in relation to building safety advice (including fire doors), aimed at building owners, was withdrawn with immediate effect (but remains available as a historical reference document), and
- BSI PAS 9980:2022 Fire risk appraisal of external wall construction and cladding of existing blocks of flats, code of practice was published (and came into force on 31 January 2022) to help fire risk assessors take a proportionate approach to the assessment of external walls and avoid wholesale cladding replacement where safe to do so.

The PAS 9980:2022 code of practice for external walls is for building surveyors and fire engineers who need to carry out mandatory external wall fire risk assessments on buildings as part of the Fire Safety Act 2021 amendments. The Fire Risk Appraisals of External Walls ("FRAEW") must include an assessment of the external wall system by a suitably qualified practitioner. The FRAEW must also have an executive summary that the mortgage valuer can use to ascertain whether remediation works are needed or not along the lines of an EWS1 form.

In time an FRAEW will be carried out for all blocks with cladding (where appropriate), and RICS envisages the need for an EWS1 form will then reduce.

The recent RICS Practice Statement is designed to help valuers undertaking valuations for secured lending purposes on domestic residential flats, within residential blocks of 5 or more storeys or 11 metres or more tall, in line with the remediation schemes and qualifying lease protections applicable in England. For buildings 4 storeys or fewer or under 11m, RICS advised that valuers should consider any applicable supporting information, set out in the RICS' Guidance Note and confirms that the valuation approach should be agreed with the client.

In arriving at our valuation, we have relied on the EWS1 forms prepared by professionally qualified third parties. In so doing, we are not offering any advice as to the accuracy, completeness or fitness for purpose of the EWS1 Forms and neither the individuals preparing the valuation, nor this firm, shall have any liability to you, or any third party with whom you share the valuation, for any losses or potential losses arising directly and solely as a result of any inaccuracies in, or otherwise in any way related to, the EWS1 Forms. EWS1 forms have been provided as follows.

Table 5: Multi-Storey, Multi-Occupancy Buildings

Block Name and Rating	Number of Flats
Turners Court N15 5BP – B1 Rating	45
The Roundway N17 7EQ – B1 Rating	25
Omnibus House N22 6EW – B1 Rating	77
Northpoint House N1 3GH – B1 Rating	15
Hilldrop Lane N7 0HN – B1 Rating	4
Caledonian Road N7 9BA – B1 Rating	37
Atlantic Apartments E16 1BZ	87
Oceanis Apartments E16 1BY – B1 Rating	26
Blackberry Court E18 2GF – B1 Rating	24
Stepney Way E1 3EZ – B1 Rating	17
Jamaica Street E1 0PF– B1 Rating	33
Tarling Street E1 0BF – B1 Rating	5
Rosco House B24 8AA – A2 Rating	6
Brecon House E3 2HF – B1 Rating	23
Total	**424**

Source: the Existing Borrower

Having regard to the RICS Guidance Note and our limited inspection / desktop assessment carried out for valuation purposes, we confirm that the building has cladding and/or balconies containing unidentified materials. Further information has been requested but has not been supplied. It is plausible that the cost of remediation works could exceed the value of the properties and as such we have adopted a Nil Value approach to the security. That is not to say that the Property is worthless, but we do not have enough information to provide a meaningful valuation at this moment in time. We would be happy to review our valuation when the necessary information is available. A breakdown of these blocks and the number of units is set out below.

Table 6: Multi-Storey, Multi-Occupancy Buildings

Block Name	Properties
1-18 Peel Close, Waltham Forest	5
1-11 Four Seasons Close, Bow	34
Belmont House 147 Honor Oak Road, Lewisham	12
McLellan House 47 Benson Road, Forest Hill	6
53-55 Theobalds Road, Camden	6
17-34 Walmer Close, Waltham Forest	18
5 Saddle Court Cambstone Close, Barnet	6
4 Millstone Court Cambstone Close, Barnet	6
Sycamore Gardens 295 High Road, Haringey	50
1-12 Jenna House 9 Wood End Road, Erdington	7
1-12 Thomas House 11 Wood End Road, Erdington	6
Onyx Court Park Road, Haringey	8
4-24 Freedom Close, Walthamstow	20
Opal Court Park Road, Haringey	2
Zircon Court Park Road, Haringey	3
Fetherton Court Spring Bank	16

Block Name	Properties
22-23 23 Hilldrop Lane, Islington	4

3.6. Environmental Considerations

3.6.1. Ground and Soil Conditions

We have valued the Properties on the assumption that they have not suffered any land contamination in the past, nor are they likely to become so contaminated in the foreseeable future. However, should it subsequently be established that contamination exists at the Properties, or on any neighbouring land, then we may wish to review our valuation advice.

We have assumed there to be no adverse ground or soil conditions and that the load bearing qualities of the site are sufficient to support the building constructed thereon.

3.6.2. Japanese Knotweed

As far as the Existing Borrower are aware, no invasive plants are present at the properties.

3.6.3. Asbestos and Deleterious Materials

We have prepared our valuation on the assumption that in the construction or alteration of the properties no use was made of any deleterious or hazardous materials or techniques.

3.6.4. Flooding

The Existing Borrower has confirmed that none of the properties are in areas which have previously been the subject of a flood or has the potential to flood.

3.7. Sustainability and ESG

For the purposes of the report, we have made enquiries to ascertain relevant ESG and Sustainability factors which are likely to impact on value.

Investors may have diverse investment strategies to drive returns, but ESG is an increasingly critical influence on investment and management decision-making throughout the industry. ESG assessment looks at the impact of the physical building (base specification and in-use) on the environment, and investment criteria may cover everything from carbon emissions, asset-level certifications, be they environmental or health and wellbeing accreditations, energy and utility management and deployment of technology to monitor and measure compliance.

Social and community benefits and the nature of tenant operations may also be considerations, and importantly, the costs of transition to make buildings compliant are key.

Investors are also recognising that ESG is changing what tenants want, driving their current and future occupational needs, and that buildings must accommodate these needs.

3.7.1. Energy Performance Certificates (“EPC”s)

The provisions of the Energy Act 2011 make it unlawful to sell or let commercial or residential properties without an EPC rating, or with an EPC rating of F or G (the lowest 2 grades of energy efficiency).

Properties classified as low cost rental accommodation under section 69 of the Housing and Regeneration Act where the Landlord is a private registered provider of social housing, or where the landlord is a body registered as a social landlord under Chapter 1 or Part 1 of the Housing Act 1996, fall under the exemptions for the legislation.

However the properties would be required to be compliant in the event that they were in private ownership following enforcement of the security. We have valued on the assumption that the properties are compliant.

Table 7: EPC Rating – Rented Properties

EPC Rating	SAP Score	Properties	Percentage Spread
B	81 - 91	1,157	3.43%
C	69 - 80	25,787	76.54%
D	55 - 68	6,558	19.46%
E	39 - 54	176	0.52%
F	21 - 38	12	0.04%
G	1-20	2	0.01%
Total		**33,692**	**100%**

Source: the Existing Borrower

The Existing Borrower has provided us with EPC ratings for all the rented properties applicable for EPC. Approximately 80% of the stock have an EPC rating of B and C. The aim of the Existing Borrower is for all properties to have an EPC rating of D as an absolute minimum by the end of 2025 and EPC C or above by 2030. We have provided the EPC ratings on our property schedule at **Appendix 1**.

Overall the EPC ratings are in keeping with expectations of the stock given its age, type and condition. The market values and market rents applied take these characteristics into consideration and we anticipate that a reasonable to good demand for the stock could be anticipated assuming on-going maintenance and investment in the stock.

3.8. Fire Risk Assessments

The Existing Borrower confirms that, where applicable, Fire Risk Assessments ('FRAs") have been undertaken where required and are within date, and that the properties comply with all relevant standards and regulations. Our valuation is prepared on this assumption.

The Existing Borrower has reported that there are a number of actions that are part of a programme of works that is currently underway however none of these actions are categorised as urgent. UKAS accredited fire safety specialists complete these actions and the Existing Borrower has ongoing contracts to deliver FRA actions and as such all actions are in the programme for every action.

3.9. Planning Enquiries

In the context of this valuation it is not practical to make planning enquiries for all the properties. We have therefore assumed that there are no pending planning applications or other planning issues likely to adversely affect the subject properties. We have not made specific planning enquiries for each site.

We have also assumed that the relevant consent for any extensions and alterations works to the properties have been obtained and fully complied with. We advise that your solicitors confirm the properties are currently being used in line with their consented planning use and that construction fully met building regulation requirements.

3.10. Lotting

You have instructed us to value the properties as a portfolio assuming disposal as a single lot.

3.11. Rental Income

The gross annual rental income currently produced by the properties, before deductions, is shown in the following table broken down by letting category.

Table 8: Gross Rental Income (correct as at the date of the Report)

Type	Gross Rent £
General Needs – Social Rented	£187,082,040
General Needs – Affordable Rented	£28,172,888
Retirement – Social Rented	£18,572,937
Supported – Social Rented	£1,318,102
Intermediate Rented	£2,649,144
Market Rented	£5,702,132
Shared Ownership	£6,321,306
Total	**£249,818,549**

Source: the Existing Borrower

Average net rent levels, on a 52 week year basis, are shown below, as derived from the property schedule sent to us by the Existing Borrower:

Table 9: Rent Levels 24/25 £ per week net

Type	Current Rent £
General Needs Houses - Social	£137.91
General Needs Flats - Social	£128.34
Retirement Houses - Social	£112.71
Retirement Flats - Social	£120.72
Supported - Social	£116.28
Social Rented Average	**£132.73**
General Needs Houses - Affordable	£185.12
General Needs Flats - Affordable	£176.81
Affordable Rented Average	**£180.54**
Intermediate	£165.94
Market Rented	£276.91
Shared Ownership	£92.66
Total	**£137.25**

4. Market Commentary

4.1. Economy Overview

Last November Savills Research forecast that mainstream prices would fall -10% in 2023 and that transactions would struggle to rise above 900,000. This was against the backdrop of a sharp rise in mortgage costs following a calamitous mini budget, with the shortest serving prime minister in history. At that time Savills Research were forecasting a fairly hefty, though not cataclysmic, downturn in the housing market. This was on the expectation that high interest rates would heavily impact the buying power of those in the market. But significant lender forbearance was also expected and a relatively modest increase in unemployment was expected to limit the number of forced sales. These factors would mitigate the potential price falls in a low transaction market weighted towards cash buyers.

The initial impact on prices was more immediate than first thought, with mainstream prices falling by -2.6% in the last three months of 2022, as lenders struggled to price fixed rate mortgages. The initial shock of the mini budget wound out of the system during the first half of 2023 with uncertainty decreasing and mortgage lenders reducing their margin over the base rate. The levels of price falls were therefore contained, despite the Bank of England continuing to raise rates in the face of stickier-than-expected inflation.

Despite a secondary period of turbulence in the mortgage markets during the early summer, the storm clouds hanging over the UK housing market haven't proved quite as threatening as feared in 2023. According to Nationwide, mainstream prices fell by -2.8% over the course of the first 9 months of 2023. The current rate of falls means we expect that, by the end of 2023, mainstream values will be down by -4% on an annual basis and by -7% since September 2022. At the same time, TwentyCi data shows that agreed sales net of fall throughs have been -13% below the 2017-19 average so far this year. This activity continues to be facilitated by a 22% rise in price changes over the same period.

Several important trends have enabled the resilience seen in the market over the last year. Firstly, inflation has taken some of the strain, meaning relatively modest nominal price falls have not translated into a much more significant adjustment in real terms. Secondly, stronger than expected wage growth has cushioned some of the impact of higher mortgage rates.

Mortgage arrears of owner occupiers have been limited by the shift since the Global Financial Crisis to fixed-rate, capital-repayment mortgages issued under strict affordability assessments, rather than variable rate lending. Additionally, those homeowners for whom this regulatory environment has proved insufficient have been offered further shelter. Those struggling to meet a steep increase in housing costs at the point of re-mortgage have been able to extend their mortgage terms or switch to interest only repayments without affecting their credit score.

4.2. Residential Property Forecasts

- We are forecasting price falls of -3% in 2024, as the Bank of England base rate is expected to stay at its current peak well into 2024. However, if the Bank of England begins to cut rates in the second half of 2024, there will be more capacity for growth, with our UK 5 year growth figure at 17.9% (compared to last year's 2023-2027 figure of 6%).

- In the early part of our forecast period, the strongest performing regions are the North, Wales and Scotland. But by the end of the forecast period (2028), we expect that London will begin to outperform the UK again. This will be a result of improving affordability creating more capacity for growth, coupled with a stronger economic outlook for London than the rest of the UK.

- Mainstream transactional activity is expected to pick up from next year, with both mortgaged home movers and first time buyers increasing activity. By 2026, transactions will return to c.1.16 million per year, and will stay at that level until 2028, with only mortgage buy-to-let activity remaining muted.

When Savills' published its last residential property forecast in 2022, we thought that we were in the late stages of a typical housing market cycle that had been disrupted by the behavioural changes brought about by the pandemic. We still believe that is broadly the case.

During 2024, further modest price falls will be driven by stretched affordability across all regions, though slightly more so in London and the South East where buyers continue to need to accumulate much bigger deposits and borrow more relative to their income than the national average.

If the Bank of England begins to cut the base rate in the second half of 2024, we expect affordability to ease with every region seeing improving conditions compared to 2023. The more affordable markets in the North, where mortgaged buyers are under less strain, should see the most recovery initially.

House prices grew by 0.2% in November 2023, taking the national annual fall to -2.0%, according to Nationwide. Revisions to September 2023's figures mean that this was the third month in a row where prices rose.

This indicates greater stability in the market, supported by lower mortgage rates. Lenders have further squeezed their margins as they compete for business in a market with limited mortgage approvals. This has helped release some of the pent-up demand from those buyers who were holding back during the peak of mortgage rates, which has led to some modest value growth.

An improved economic backdrop has also helped. Inflation fell more than expected in October, to 4.6%, hitting a two-year low according to the ONS, and there is growing confidence among economists that the Bank of England base rate has peaked.

But the market is not out of the woods yet, with low activity and price falls still expected in the short term. The majority of surveyors continued to report both decreasing supply and demand in October 2023, according to the RICS survey. Demand is still weaker than supply, a dynamic that suggests house price falls will continue. The balance of opinion on prices is more gloomy than at any time since 2009.

The supply of homes for sale has returned to pre-pandemic levels, but mortgage approvals are low and there are more discounts to asking prices. The number of homes for sale was 34% higher in November 2023 than at the same time last year, according to Zoopla, back at pre-pandemic levels. However, demand remains subdued. Although mortgage approvals ticked up slightly in October 2023 compared to September 2023, they were still -27% below their pre-pandemic levels, according to the Bank of England. The combined effect has been an increase in discounting from asking prices, from an average of 3.4% during the first six months of 2023 to 5.5% in November 2023, according to Zoopla.

Local variation in price falls has become increasingly apparent in the more lagged Land Registry data. Just over 100 local authorities are now seeing falls, and these continue to be concentrated in London, the South East, and East of England where 66 of these authorities are located. Meanwhile, certain local markets have been more resilient as they experience continued annual price growth, including Rosendale (7.6%), Blaenau Gwent (7.1%), and Nottingham (6.6%).

Savills' latest five year forecasts for mainstream residential property are shown in the table below.

Table 10: Nominal House Price Forecasts – Mainstream Markets November 2023

Region	2024	2025	2026	2027	2028	5-Years to 2028
UK	-3.00%	3.50%	5.00%	6.50%	5.00%	17.90%
East Midlands	-2.5%	4.0%	5.5%	6.5%	5.0%	19.60%
West Midlands	-2.0%	4.0%	5.5%	6.5%	5.0%	20.20%
South East	-3.50%	3.00%	4.50%	6.50%	5.50%	16.70%
East of England	-3.50%	3.00%	4.50%	6.50%	5.50%	16.70%
London	-4.00%	2.00%	4.00%	6.00%	5.50%	13.90%

**Source Savills Research*

*** Note these forecasts apply to average prices in the second-hand market. New Build prices may not move at the same rate*

Savills analysis suggests that we have been in the late stages of the housing market cycle since 2018, where London underperforms the UK average, and more affordable markets lead the way. Over the last five years, the ratio between UK and London house prices has been falling, albeit at a more gradual pace than in previous cycles.

We expect this trend to continue over the next four years, but with UK and London performance slowly converging. The inflection point is likely to be reached in 2028, where the London versus UK ratio will have fallen as far below the long term trend as it has in previous cycles. From this point, we expect to move into the next phase of the market cycle. London will once again lead price growth across the UK, driven by underlying population pressure, and a stronger economic outlook compared to the rest of the UK.

4.3. Housing Market Summary (March 2024)

House prices grew by 0.7% in February, taking annual growth to 1.2%, according to Nationwide. This is the first time annual growth has been positive since January 2023, as an increase in demand at the start of the year has led to greater market activity. But contradictory economic indicators make the near-term outlook uncertain.

The Bank of England (BoE) continues to balance tackling inflation with low economic growth. The UK fell into a technical recession at the end of 2023 while wage growth continued to outstrip inflation, according to the ONS. These conflicting narratives have pushed back expectations for the first base rate cut, which Oxford Economics now predicts to come in June followed by two further cuts expected later in 2024.

Mortgage lenders have shown greater caution in light of the economic uncertainty and an increase in swap rates. Many have increased their rates following substantial reductions at the start of the year when they anticipated earlier base rate cuts. Further delays to these cuts will keep rates higher for longer, tempering the growth in demand and reducing upward pressure on prices.

Buyers have taken advantage of previous falls in mortgage rates, increasing market activity. Mortgage approvals in January ticked up to 55,200, according to the Bank of England, the highest number in 15 months. This supported an increase to sales agreed which were 27% higher in February compared to the same month last year and even 13% above the 2017-19 average, according to TwentyCI.

Early activity indicators are yet to translate into completed transaction numbers, with 68,090 in January, according to HMRC. This was -15% below the 2017-19 average, but will likely grow in the coming months due to the higher number of sales agreed in the first two months of 2024.

More areas saw house price falls in the lagged Land Registry data, but regional differences remained. At least half of local authorities in every region experienced annual price falls for completed sales in the year to November 2023. In the North and Midlands, 65% of local authorities saw prices decrease, as affordability pressures impacted even these more affordable markets. Affordability constraints were nevertheless still more pronounced in the South, where 92% of local authorities saw annual falls.

4.4. Market Rental Commentary (March 2024)

Annual rental growth across the UK in January was 7.8% according to Zoopla, down from 8.2% in the year to December. Scotland is now the only region with annual growth of over 10%, as rent control policies have led to a reduction in supply and put upward pressure on newly agreed rents. Other northern regions had above average growth, including the North East (9.9%) and the North West (9.8%).

London saw a decrease in rents on a monthly basis for the first time since March 2021, down -0.1% in January, suggesting the affordability ceiling for many renters has been reached. The capital remained the region with the lowest annual growth, falling to 5.1%. This is a substantial slowdown from August 2023 when growth was over 10%.

The RICS survey for the lettings market showed the number of surveyors reporting rising tenant demand increased in January after a period of falls.

The number of surveyors reporting falling supply decreased, maintaining the same gap between supply and demand.

Although the gap between supply and demand has shrunk significantly in recent months, it remained wide compared to previous years. This will continue to keep rental growth high in the short term.

Table 11: Five-year forecasts for mainstream rents

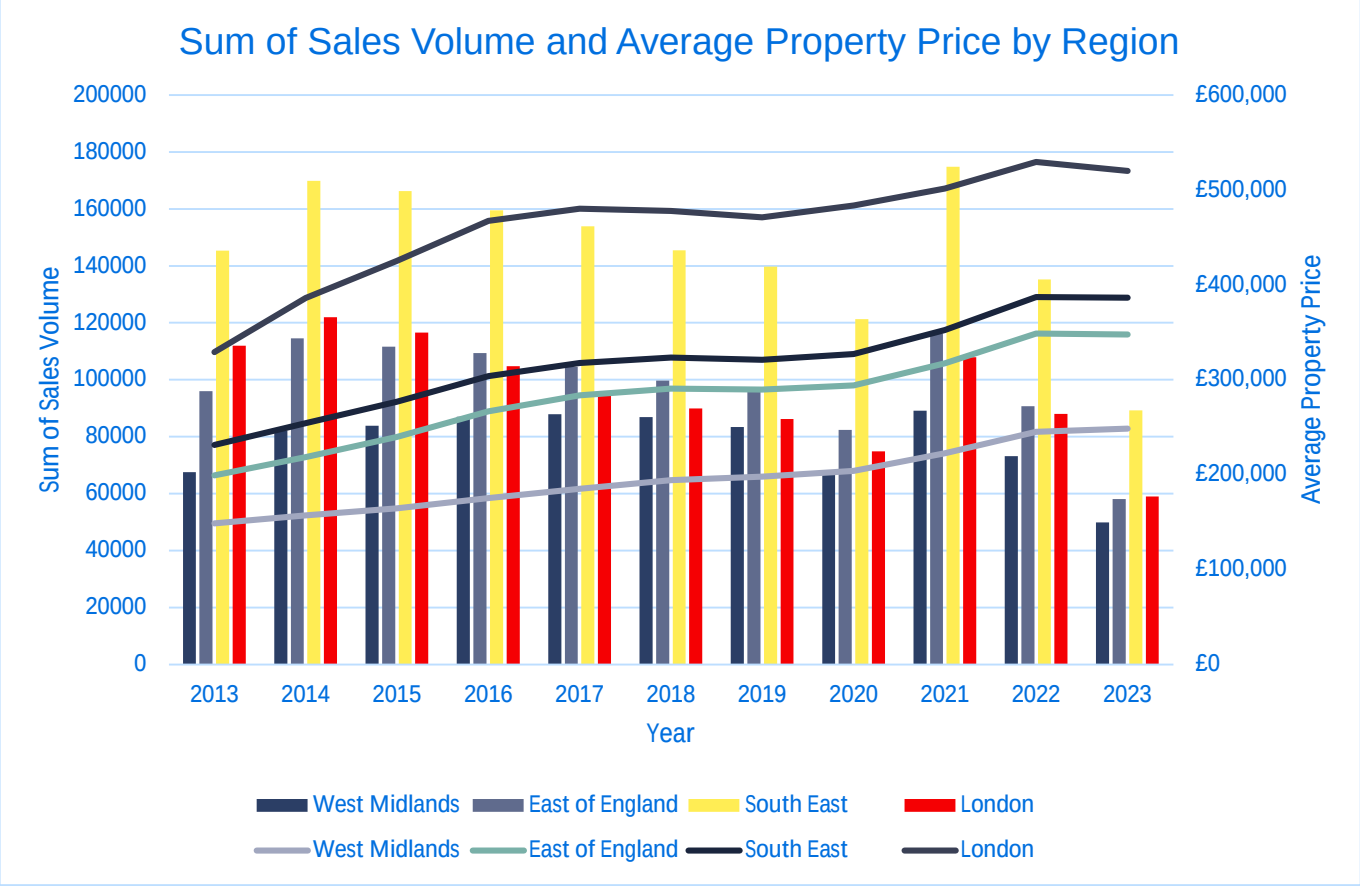
Region	2024	2025	2026	2027	2028	2024 to 2028 Compounded
UK	6.0%	3.5%	3.0%	2.5%	2.0%	**18.1%**
London	5.5%	3.5%	3.0%	2.5%	2.5%	**18.2%**
Earnings Growth	2.5%	2.7%	3.2%	3.1%	3.4%	**15.8%**

**Source Savills Research using Oxford Economics*

4.5. Local Market Conditions

The properties are predominantly situated in 4 regions in the UK, the average property price has increased in each region over the last 10 years by between 58%-74% according to Land Registry. Sales volumes have varied with 2014 and 2021 seeing the highest number of sales during this 10 year period. This is illustrated by the Land Registry data shown in the chart below.

Chart 1: Average Price Paid and Sales Volume



From our conversations with agents in the areas where the Properties are located it is apparent that market activity has picked up in early 2024 however house prices continue to fall slowly. It is anticipated that market activity will pick up further in the Spring and early Summer and prices are expected to be generally static. Most agents are expecting to see more sales in 2024 rather than faster price growth.

On the rental side demand continues to increase however at lower levels than a few months ago. There continues to be a downward trend in supply and this means rents continue to increase albeit at a slower rate than has been seen over the past 18 months. This trend is expected to continue as many smaller landlords exit the market due to rising costs and legislation.

4.6. Comparable Evidence

In order to provide market values and rental values we have used market sales and asking prices and achieved prices where available on properties in the immediate area to the subject units, including Rightmove, Rightmove plus and agents' own websites and discussions with local agents where necessary.

We undertake detailed research into comparable sales and market lettings and details of these are kept on our files for audit purposes.

All sale values were considered as open and not forced sales. To assess values for resale, research was undertaken using readily accessible sources that included:

- Determination of the area of similar properties related to market / social sector
- Land Registry information on recent completed sales for the immediate post code and where necessary those of the adjoining areas
- Review of values for similar size and type of properties being marketed in the area of the actual location

Where possible, discussion with agents and sales personnel on private sites has been completed. A comparison between the particular size, quality and condition of the property viewed was related to that of any known sales values in order to make a judgement as to what could be considered as a fair value.

4.7. Indicative Vacant Possession Values and Indicative Market Rents

The table below shows the average indicative vacant possession values and indicative market rents that we have adopted for the properties included within the valuation, summarised by type and bedroom number.

Table 12: Indicative Vacant Possession Values and Market Rents

Type	Bedrooms	Number of Properties	Average Indicative 100% Vacant Possession Value	Average Weekly Indicative Market Rent
Room	0	372	£54,000	£159
Flat	0	140	£166,000	£196
	1	8,973	£278,000	£269
	2	4,802	£346,000	£336
	3	1,027	£502,000	£461
	4	131	£687,000	£568
	5	14	£827,000	£645
	6	1	£894,000	£578

5. Valuation Advice

5.1. Existing Use Value - Social Housing

5.1.1. Approach to EUV-SH

EUV-SH for loan security assumes the property will be disposed of by a mortgagee in possession to another Registered Provider ("RP") who will continue the use of the properties for social housing. These organisations will calculate their bid according to their projected income and outgoings profile which they would estimate the properties would produce under their management. This basis assumes rents will remain affordable to those in low paid employment and that all vacant properties will be relet on the same basis.

We consider that the appropriate method of valuation is to use a discounted cash flow ("DCF"). The DCF allows us to project rental income and expenditure over the term of the cash flow to arrive at an annual surplus or deficit, which is then discounted to a net present value.

However, it is also necessary to consider comparable transactional evidence where available.

5.1.2. Principal DCF Variables

The DCF assumptions are derived from information received from the RP and our specialist sector knowledge. The table below sets out our principal assumptions. More detailed discussion on discount rate, adopted rent levels and rental growth is contained in the following sections.

Table 13: DCF Variables

EUV-SH DCF Variable	Assumption	Year	Variable Amount	Source
Current social rent	£132.73	2024/25	Average £ Per Week	the Existing Borrower
Convergence Rent	£136.16	2024/25	Average £ Per Week	Savills
Affordable Rent	£180.54	2024/25	Average £ Per Week	the Existing Borrower
Voids and bad debts	3.5%	2024/25	% Real	Savills
Turnover	2%-5%	2024/25	% Real	Savills
Management costs	£950-£1,000	2024/25	Average per unit/pa	Savills
Cyclical, Void & Responsive Maintenance	£950	2024/25	Average per unit/pa	Savills

5.1.3. Inflation Assumptions

Many of our assumptions are derived from the rate of inflation. These include house price and rental growth and building and maintenance cost inflation. It is essential for us to adopt a long-term underlying rate of inflation which will be acceptable to alternative landlords. We carry out our assessment of cashflow assumptions on a quarterly basis with reference to materials produced by numerous sources. The assumptions stated in this report and used in this cashflow are based on evidence available at the time of the valuation.

Consumer Price Index ('CPI') inflation was 6.7% in September 2023. This is the rate of CPI which determined the rent increase in April 2024. The average of new Independent Forecasts – as produced by HM Treasury in February 2024 – indicates that CPI is expected to be 2.3% on average in 2024 and 1.9% in 2025. In the medium term CPI is expected to run at around 2.00% per annum. Our long term assumption is 2.00% per annum.

BCIS Tender Price forecasts – which we use to predict changes in major works costs – currently predicts that prices will be lower than inflation in 2024/25, with marginal offset in 2025/26 and then gradually increasing in the medium to long term to price increases ahead of inflation. Our long term assumption is 0.75% real growth per annum.

BMI Maintenance Cost forecasts are showing annual real growth of around 1.33% in 2024/25 before growing further above inflation in 2025/26 and then continued marginal growth ahead of inflation from 2026/27. In the long term maintenance costs tend to run ahead of inflation mainly because the work is more labour intensive and therefore more closely linked to wage inflation. Our long term assumption is 0.50% real per annum.
Our assumptions are as follows:

Table 14: Inflation Assumptions

	CPI		Maintenance	Programmed Cost
Year	General % pa	Rental % pa	% (real) pa	% (real) pa
2024/25	3.00	2.75	-0.25	-0.75
2025/26	2.00	2.00	1.75	1.00
2026/27	2.00	2.00	1.25	0.75
2027/28	2.00	2.00	1.25	0.75
2028+	2.00	2.00	0.75	0.50

Source: Savills

CPI fell steadily over the course of 2023 to a December figure of 4%, this then plateaued at the start of 2024 with CPI holding at 4% in January 2024. There is a belief amongst economists that inflation will continue to fall over the course of 2024 with annual CPI average expected to sit around 2.3%. As such we have adopted a figure of 2.25% for our predicted September 2024 CPI level. The current rent standard permits rents to be increased by CPI + 1%, so our valuation adopts a nominal increase of 3.25% at the Year 2 mark (2025/26) and then continuing at CPI +1% for future years.

5.1.4. Social Rents – Savills "Convergence" Rents and Rental Growth

RPs are required to set their Social Rents in accordance with Rent Standard Guidance issued by the Regulator of Social Housing. The Guidance sets out a formula for calculating most social rents which reflects property values, local earnings and bedroom size. From April 2020 the Rent Policy Statement applies which allows for existing rents to rise at CPI+1%.

Some latitude is given in that rents for new lettings can be no more than 5% higher than their formula level. For sheltered and supported properties, the margin is extended to +10%. The rents produced by the formula are net of service charges. Service charges are expected to be charged over and above the rents and to reflect what is actually being provided to tenants.

Mortgagees in possession and their successors in title are not bound by the provisions of the Rent Standard. In theory, therefore, a purchaser could base a bid for the properties on rents up to open market levels as permitted under the terms of the tenancy agreements. However, any RP purchaser would need to set rents that are consistent with its objectives as a social housing provider.

We therefore believe that a purchaser in a competitive transaction is likely to set rents at a level which they consider to be the maximum affordable rent to those in low paid employment locally. We assume they would intend to charge such rents for new tenants and increase existing rents to a sustainable and affordable rent over a reasonable period.

The average rents across the General Needs Social stock are set out below, along with our assessed sustainable affordable rent or "convergence" rent. We have adopted the convergence rents in our valuation.

Table 15: Current and Convergence Rents 2024/25 (£ pw – 52 Weeks)

Type	Estimated Household Income £	Net Rent	Savills Convergence Rent (SCR)	SCR Affordability Ratio %	Market Rent
House	£606	£138.75	£142.38	23.4%	£331
Flat	£487	£128.35	£130.34	26.7%	£319
Total	**£563**	**£134.98**	**£138.02**	**24.5%**	**£327**

Source: the Existing Borrower & Savills

We have relied on the current rents supplied by the Existing Borrower in carrying out this valuation. We have not carried out any validation of or research into the rents supplied.

We have assumed all rents will converge to our convergence rent in 2 to 4 years' time. The annual rent increases to achieve convergence have been limited to a maximum of 5% per annum nominal.

In the long term, in order to maintain consistent levels of rent affordability, the maximum possible rate of rent growth will be growth in local household incomes which is currently predicted to be 3.1% pa over the next 10 years in the locations. We have therefore assumed that after they have converged rents will increase at CPI + 1% per annum.

5.1.5. Affordable Rents

In certain circumstances, RPs are able to offer new assured tenancies at intermediate rents at up to 80% of the market rent – such rents are known as 'Affordable' as opposed to 'Social' rents. The ability to charge the higher rents is dependent upon the RP having a Development Framework contract with the HCA or a Short Form Agreement where they are not in the Development Framework.

There are currently 3,001 Affordable Rent properties within the stock. The current average rent for these properties is £180.54 per week. This is about 40% higher than the target rents on the same properties. These units have been included in our valuation at their current Affordable Rent levels and we have also provided a valuation on the special assumption that social rents apply to these units.

Under the Rent Standard the rents payable for Affordable Rent tenancies increases annually by CPI plus 1% per annum. Rents are rebased to market rent upon the granting of a new tenancy. We have assumed that a purchaser from a mortgagee would increase existing Affordable Rents in line with movements in market rents over the long term.

Market rents tend to increase in line with household incomes. Income growth forecasts for the locations are currently 3.1% per annum. We have therefore assumed that rents will increase at CPI + 1% pa.

5.1.6. Sales Between RPs – Transactional Evidence

Until recently evidence of sales between RPs was extremely limited – most transactions were simple transfers of engagements. However, in recent years there has been a growing body of transactional evidence from competitive sales between RPs of tenanted stock. The evidence confirms RPs have a consistent tendency to pay a higher sums for some social housing portfolios than would be suggested by traditional, purely cashflow driven, EUV-SH valuations. We have been heavily involved in this market and have a database of transactions covering circa 50,000 properties.

Although the body of evidence is relatively small compared to the total RP stock in the UK and the market is maturing, we are able to derive a view of the prices achieved for certain kinds of stock and lot sizes. Assuming a sensible lotting of properties in smaller batches of circa 100 properties, bids between 5% to 30% above traditional EUV-SH levels are common for more modern stock in reasonable proximity to amenities.

In contrast it is apparent that for lots exceeding around 250 properties the prices achieved appear to be in line with the traditional, cashflow approach to EUV-SH.

In this case you have instructed us to value the properties assuming a sale as a single lot.

5.1.7. Discount Rate

The discount rate is probably the most important variable in the model since it determines the net present value of future predicted income and expenditure cashflows. There is no fixed rule for determining the most appropriate rate to be adopted in a discounted cash flow, but the rate will consider two elements; the cost of funds to acquire the stock and risk/reward appetite of the bidder. The market for this stock will be within the RP sector.

The discount rate is a combination of an expression of the long-term cost of borrowing for an acquiring organisation, the availability of free funds for purchase purposes and the risks implicit in the property portfolio concerned, along with the return requirements of the purchaser. The average cost of long-term borrowing in the RP sector has been relatively stable over the last ten years or so, moving from 4.50% to 4.10%, as reported in accounts and reflecting borrowing from a range of sources at various rates. The accounts of RPs give us a useful benchmark for costs of funds, but we must also acknowledge market practices, particularly for smaller and more attractive acquisitions. In such circumstances, where strategic acquisition of stock is weighed against factors such as cost of construction and the aims and objectives of the provider, implied discount rates are significantly below average costs of borrowing.

In addition to considering the cost of funds, we also need to make an allowance for the risk which attaches to our cashflow assumptions – some of which may be subject to a higher degree of risk than those generally made in the business plans. The trend in the risk profile is considered on a case-by-case basis, having regard to the attractiveness of the stock for investment purposes.

Risk is factored in two principle areas; the market and the individual cashflows. The market element will reflect the macro-economic landscape, the market for social housing stock to be traded and the availability of housing stock at the rents being charged, whereas the individual cashflow element will reflect the confidence the valuer has in the assumptions adopted.

Having regard to the above, our view is that a discount rate in the range of 4.75% - 5.75% real is generally appropriate, +/- 0.50% for particularly risky or attractive acquisitions respectively.

We have adopted a discount rate of 5%-6%% real over an assumed CPI inflation rate of 2.0% (Long Term Bank Of England Target Rate). This is the rate applied over the cashflow run in perpetuity.

5.2. Market Value Subject to Tenancy (“MV-STT”)

5.2.1. Approach to MV-STT – Large Scale Voluntary Transfer (“LSVT”) Stock

The Housing and Planning Act 2016 (‘HPA 2016’) contains provisions to deregulate the social housing sector which give much greater freedom to housing providers to dispose of and manage their property assets. The deregulation provisions came into effect on 6 April 2017. As a result s.133 of the Housing Act 1988, which required consent to be obtained prior to disposal of property previously transferred from a local authority, is no longer effective.

The HPA 2016 therefore allows valuers to consider transferred stock on the basis of Market Value rather than Existing Use Value for Social Housing – EUV-SH, removing the assumption that the stock can only be sold to another RP and will remain subject to regulatory control. Valuers can therefore now assume that the stock could be sold to a private investor and take into consideration transactions of private residential portfolios in order to inform their opinion of value.

No large scale disposals of LSVT social housing have taken place since the HPA 2016 came into force and direct transactional evidence is therefore not yet available. Nevertheless, we can consider the growing institutional interest in larger scale residential purchases in order to assess how the freedoms of the HPA 2016 will affect the Market Value of social housing stock.

The principal drivers of value for private investors in residential property are the ability to achieve sales of void properties and the scope for rental growth. The normal approach to assessing MV-STT for general non-LSVT stock involves analysing comparable evidence from similar portfolios. This includes looking at the yield achieved and the percentage of vacant value the price achieved represents. Valuations are then derived by firstly applying an appropriate discount to Market Value with Vacant Possession ("MV-VP") and secondly by applying a suitable yield to rental income. However, this is not applicable to LSVT stock and, as at the time of writing, there is no direct evidence of investor bids.

The market has had little time to respond to the new freedoms and given the lack of direct transactional evidence for an LSVT portfolio of this size and type, our approach to the Market Value is to use Discounted Cash Flow analysis to derive our opinions of value to gauge how a market investor in LSVT stock would set their bid. In order to construct the cash flows we have detailed regard to the characteristics of stock at the local "neighbourhood" (in this case sub-postcode) level. This allows consideration of the potential for sale of void units in a given locality and also the potential to increase rent in relation to household income and across a large stock.

Although this approach is relatively new, a considerable amount of LSVT stock has now been charged for loan security at MV-STT, where the valuation metrics and transfer agreements allow.

5.2.2. Approach to Establishing Potential for Rent Uplift

As the properties capable of uplift are geographically concentrated, we need to assess just how much scope an investor would have to increase rents to affordable, Local Housing Allowance ("LHA") or at or towards market levels. An investor would not wish to push all rents to market levels if it were likely to compromise his ability to collect rent and give rise to arrears that may result in bad debts. Central to this approach is the investors' ability to assess household incomes and driving rents at levels that will be sustainable across a concentrated stock group.

The Existing Borrower does not maintain details of households' incomes that would be sufficiently robust for our purposes. Therefore, in order to establish rental uplift potential we consider an investor would review census data in the public domain. We have analysed the Annual Survey of Household earnings ("ASHE") produced by the Office of National Statistics which provides details of earnings at Local Authority level and compared this to a ten year average of household incomes provided by the CORE returns for regulatory purposes. This was produced in 2013 and is the last dataset available for the analysis of household incomes in the lower deciles of the population as a whole. Using the statistical technique of equivilisation we have derived estimated current earnings per bed space. This provides a benchmark that is annually reviewed against which housing expenditure can be compared. For each group within the stock we have estimated the household income per week.

The Joseph Rowntree Foundation have established that circa 29% of household income is spent on housing costs by social housing tenants, but with the poorest fifth of social renters paying up to 33%. An investor taking possession of the stock would not be required to comply with regulatory guidance concerning affordability and we would expect rents to be escalated beyond current social rent norms wherever possible.

Beyond the potential for rental growth from existing tenancies an investor would potentially be able to let voids to a broader client group with higher incomes. We have therefore also looked at Indices of Multiple Deprivation by sub-postcode as an indicator of areas where such potential might exist. We have assumed that rents could be increased to LHA or market levels in areas where levels of deprivation are low, but in areas of more acute deprivation we have assumed that rents would remain below LHA rent levels.

5.2.3. Establishing Sales Potential

An investor will consider the potential of the stock to generate receipts from the sale of void units. The assumption being that units will be considered for sale rather than being relet. The quantum of sales receipt arising is a factor of the following.

a) the rate of turnover of stock;
b) the vacant possession values prevailing in a given geographic area;
c) the potential of a given market to absorb the turnover of units; and
d) the likely stability of a given market based on historical evidence.

An investor would also consider the strength of the broader property market, and future growth or reduction of vacant possession values through projections.

5.2.4. Other MV Assumptions

Our assumptions in respect of inflation, rates of re-letting, management and maintenance costs are taken from those used in our EUV-SH valuation. We have given regard to the voids and bad debts assumptions applied in the EUV-SH modelling and increased these as appropriate to reflect the impact of raising rents. We have also applied major works in line with the levels adopted in the EUV-SH valuation, reflecting the latest condition data available.

5.2.5. Approach to MV-STT – Non LSVT Stock

We assess the MV-STT in two ways; firstly, by applying a discount to Market Value with Vacant Possession MV-VP and secondly by applying a yield to rental income.

The valuation of properties and portfolios subject to Assured and Secure tenancies is carried out with reference to comparable evidence from the sales of similar tenanted portfolios and individual properties and sold subject to Protected Tenancies or Assured Shorthold Tenancies. There is an established body of evidence from portfolios traded on the open market to which we can refer.

Investors tend to base their bid on their ability to “trade out” individual properties at Market Value assuming vacant possession over time. In locations where there is a limited market or where a property is difficult to trade, owing to style or market conditions, investors will base their bid on rental return compared to capital cost.

The discount to MV-VP ranges from 10% for prime property to 40% where market conditions are difficult. Typical rates are around a 20% to 30% discount to MV-VP for properties subject to AST tenancies.

The yield applied to net income varies from 5% or less for prime property, to 7% or more for poorer locations. This equates to a yield on gross income (after deductions for management, maintenance & voids) of between 7% to 10% and possibly higher for Sheltered accommodation.

The discount and yield applied in our valuations has been adjusted to reflect the additional security of tenure RP tenants benefit from.

5.2.6. Principal Assumptions – MV-STT

We have considered the above in arriving at our valuation. The yield and other principal assumptions adopted are set out below.

Table 16: MV-STT Assumptions

Assumption	Variable	Year	Amount
Gross Annual Rental Income*	£	Current	£341,871,000
Voids	% of Rent Debit p.a.	All years	5%
Management	% of Rent Debit p.a.	All years	10%
Maintenance	% of Rent Debit p.a.	All Years	15%
Net Yield Applied	%	All Years	6%

*Source: Savills *Note: market rent assumed*

5.3. Shared Ownership

5.3.1. General

The portfolio contains 1,312 properties subject to Shared Ownership leases. They retain around 57% of the equity in their properties, overall. Please see **Appendix 1** for details of the properties, shares retained and rental income produced.

5.3.2. Valuation Approach

Shared Ownership property produces a rental income dependant on the percentage owned by the leaseholder and the percentage retained by the lessee. As leaseholders have a stake in the property, arrears and default are comparatively rare and landlords can retrieve management costs. Maintenance does not erode rental income as the leaseholder is responsible.

Shared Ownership property thus produces good quality, low risk rental income on the share retained. In addition, capital receipts can arise when the leaseholder decides to acquire the whole or a portion of the remaining equity, which usually happens when they decide to sell and move on, or on the occurrence of default.

We use a discounted cashflow model designed for the valuation of Shared Ownership property which projects future rent and outgoings to arrive at a net present value. This cashflow can be tested with a variety of staircasing and default scenarios.

In this case we have assumed that all service costs can be recouped through service charges and that management income, and the management charge equals the management expenditure.

We have applied a discount rate of 4%-5% real reflecting the very secure nature of Shared Ownership income.

5.3.3. Shared Ownership Valuations Principal DCF Assumptions

Our principal valuation assumptions are as follows:

Table 17: Shared Ownership Assumptions

Variable	Variable	Year	Amount
Current rent	Av £ Per Week	Current	£92.66
Indicative 100% rent	Av £ Per Week	Current	£162.57
Management costs	Average per unit/pa	All Years	£200
Retained share	%	Current	57%
Current Indicative 100% MV-VP	Average £ per unit	Current	£316,000
Discount rate for rental income	% pa Real	All Years	4%-5%

Source: Savills

5.4. Valuations

Having carefully considered the property, as described in the report, we provide the following opinions of value:

5.4.1. Valuation Summary

Valuation of Freehold and Leasehold Property that may be disposed at MV-STT (£)

Properties that may be disposed of by a mortgagee in possession at MV-STT, that is on an unfettered basis (meaning subject to existing tenancies but otherwise with vacant possession and not subject to any security interest, option or other encumbrance or to any restriction preventing its sale to, or use by, any person for residential use) as referred to in paragraph 1.2 above.

Our opinion of value, in aggregate, of the 19,139 dwellings as mentioned at **1.4** above, on the basis of

- Market Value – Subject to Tenancies (MV-STT) is **£4,229,119,000 (Four Billion, Two Hundred and Twenty Nine Million, One Hundred and Nineteen Thousand Pounds)**

Table 18: Valuation of Freehold and Leasehold Property that may be disposed at MV-STT (£)

Tenure Type	Number of Dwellings	Market Value – Subject to Tenancies (MV-STT) £	Equivalent Existing Use Value – Social Housing (EUV-SH) £
Freehold	18,577	£4,049,152,000	£1,451,074,000
Leasehold	562	£179,967,000	£51,803,000
Total	**19,139**	**£4,229,119,000**	**£1,502,877,000**

Valuation of Freehold and Leasehold Property that may be disposed at EUV-SH (£)

Our opinion of value, in aggregate, of the 15,374 rented dwellings and retained equity in shared ownership dwellings as mentioned at **1.4** above, on the basis of

- Existing Use for Social Housing is **£1,094,985,000 (One Billion and Ninety Four Million, Nine Hundred and Eighty Five Thousand Pounds)**

Table 19: Valuation of Freehold and Leasehold Property that may be disposed at EUV-SH (£)

Tenure Type	Number of Dwellings	Equivalent Existing Use Value – Social Housing (EUV-SH) £
Freehold	14,927	£1,050,280,000
Leasehold	447	£44,705,000
Total	**15,374**	**£1,094,985,000**

There are 3,970 properties which have been ascribed a nil value and 491 properties a withheld value.

A full stock schedule with apportioned values is included at **Appendix 1.**

5.5. Additional Advice

5.5.1. Lending Against MV-STT

It is essential that before lending on MV-STT your lawyers confirm that the properties are capable of being let at a Market Rent, or disposed of free from restrictions, should you take possession. If there are enforceable "Housing Restrictions" in title, planning approval, s.106 agreements or by separate Nomination agreements, that, for example, limit disposal only to RPs or contain binding contractual nominations, then the correct valuation basis is EUV-SH and not MV-STT.

We must also stress that it is up to you to assess the terms of the loan and the amount of lending based on the valuations herein. We have set out the current rental income at **Appendix 1** but make no warranty that the current income is sufficient to support lending against MV-STT either on individual valuation groups or against the whole portfolio.

4.5.1 Lotting and Value Disaggregation

We have valued the properties as a single lot. As a result **we have not assessed individual valuations for each property.** We have, however, provided a disaggregation of the overall valuation figures by reference to the appropriate rent and these figures are shown on the property schedule at **Appendix 1**.

It is very important to note that the per unit figures shown in the schedule should not be regarded as individual valuations of the properties. They are provided as indicative figures for administrative purposes only. They should not be used for any other purpose, including disposals or re-assessment of security, without our prior written approval.

6. Loan Security

6.1. Investor's Responsibility

It is usual for a valuer to be asked to express an opinion as to the suitability of a property as security for a loan, debenture or mortgage. However, it is a matter for the lender to assess the risks involved and make its own assessment in fixing the terms of the loan, such as the percentage of value to be advanced, the provision for repayment of the capital, and the interest rate.

In the report we refer to all matters that are within our knowledge and which may assist you in your assessment of the risk. in assessing the nature of the risk, we would draw your attention to the matters highlighted in the following paragraphs.

We have made subjective adjustments during our valuation approach in arriving at our opinion and whilst we consider these to be both logical and appropriate, they are not necessarily the same adjustments which would be made by a purchaser acquiring the properties.

Where we have expressed any reservations about the property, we have reflected these in the valuation figure reported. However, it may be that the purchasers in the market at the time the property is marketed might take a different view.

6.2. Property Market Risks

RPs across the UK face an extremely uncertain operating environment, after the severe and ongoing macroeconomic shocks over the past three years, including from Brexit, Covid-19, and resulting from Russia's invasion of Ukraine. Presently, high inflation, a tight labour market, and the residual impact of the pandemic on supply chains have increased costs for RPs. Borrowing costs have also increased, both from substantially rising interest rates and from widening spreads on debt. At the same time, income streams are facing greater than usual uncertainty, with significant headwinds in the housing market.

RPs are looking to undertake substantial investment in existing stock to deliver against quality, building safety, and decarbonisation commitments, as well as continuing to invest in much needed new housing supply. This planned activity has resulted in a further reduction in providers' forecast interest cover. Reduced financial headroom is likely to reduce some providers' capacity to cope with further financial shock and associations will need to maintain financial resilience while ensuring they remain compliant with the requirements set out in legislation and regulatory standard.

6.2.1. Future Economic Environment

Changes to the macro and micro economic environment directly impact on the value of investment property, particularly any movements within the money markets and/or the relative returns available from competing investments. In particular, interest rate movements have significantly increased, with the Bank of England base rate increasing from 0.1% in November 2021 to 5.25% in August 2023. This has a detrimental impact on the investment value given the resultant rising cost of finance.

Traditionally volatility in the equity markets has indirectly benefited property as an asset class where there has been a flight to quality in uncertain times, particularly to those buildings which produce strong "bond equivalent" income returns. The market property will be competing against other investment media and this may influence yield expectations, both positively and negatively.

Our valuations are made against the present economic background, which is relatively unstable at present as the UK enters a period of recession.

6.2.2. Liquidity

The Residential investment market remains strong with a wide range of purchasers active in the market. The weight of money into property has encouraged greater liquidity with pressure applied by vendors for rapid exchange and completion of sale contracts.

6.2.3. Pricing

Property as an asset class is not a homogeneous product and pricing has traditionally been linked to historic evidence from relevant comparable transactions. Such evidence can be scarce and this, coupled with liquidity issues, may affect the pricing of an asset.

6.3. Suitability as Security

In conclusion, most of the market and property specific risks in this instance are capable of identification and measurement and may be considered acceptable in the context of the property sector.

We would comment that we have considered each of the principal risks associated with the property within the context of the wider investment market and that they are reflected in our valuation calculations and reported figures as appropriate.

Overall and subject to the comments outlined above, we consider that the property provides fair security for a loan secured upon it, which reflects the nature of the property, our reported opinions of value and the risks involved.

Whilst the residential property markets continue to perform well, our valuation has been prepared against the backdrop of a very challenging economic outlook. There are concerns as to how the UK economy will perform going forward given the current inflationary pressure, the cost of living crisis and rising interest rates that are impacting on the cost of debt. Although there is strong liquidity in the market, with a significant wall of capital seeking opportunities, the ongoing geo-political headwinds, economic uncertainty and rising cost of debt finance, may impact pricing in some areas of the market such that prices fall from their current levels. We would therefore recommend that the value of the Property is kept under regular review to ensure that appropriate security for the loan is maintained.

6.4. Verification

This report contains many assumptions, some of a general and some of a specific nature. Our valuations are based upon certain information supplied to us by others. Some information we consider material may not have been provided to us. All of these matters are referred to in the relevant sections of this report.

7. General Assumptions & Conditions

Unless otherwise stated in the report, our Valuation has been carried out on the basis of the following general assumptions and conditions in relation to each property that is the subject of our report. If any of the following assumptions or conditions are not valid, this may be that it has a material impact on the figure(s) reported and in that event, we reserve the right to revisit our calculations.

7.1. General Assumptions

That we have been supplied with all information likely to have an effect on the value of the properties, and that the information supplied to us and summarised in the report is both complete and correct.

Legal

7.1.1. That the properties are not subject to any unusual or especially onerous restrictions, encumbrances or outgoings contained in the title. Should there be any mortgages or charges, we have assumed that the properties would be sold free of them. Unless provided to us by your legal advisors, we have not inspected the relevant title documents.

7.1.2. That where there are tenants, they are capable of meeting their obligations and there are no arrears of rent or undisclosed breaches of covenant.

Legislative and Statutory Compliance

7.1.3. That the buildings has/have been constructed and used in accordance with all statutory and bye-law requirements, and that there are no breaches of planning control or building regulations. Likewise, that any future construction or use will be lawful (other than those points referred to above).

7.1.4. That the properties are not adversely affected, nor is likely to become adversely affected, by any highway, town planning or other schemes or proposals, and that there are no matters adversely affecting value that might be revealed by a local search, replies to usual enquiries, or by any statutory notice (other than those points referred to above).

7.1.5. That the properties either complies/comply with the Equality Act 2010 and all other Acts relating to occupation, or if there is any such non-compliance, it is not of a substantive nature.

7.1.6. No allowance has been made for rights, obligations or liabilities arising under the Defective Premises Act 1972, and it has been assumed that all fixed plant and machinery and the installation thereof complies with the relevant UK and EU legislation.

The Property

7.1.7. That the properties have/has been measured in accordance with the Code of Measuring Practice (6th Edition) and we have valued on the basis of the floor areas stated in the report. Whilst the 6th Edition has been superseded by RICS Property Measurement (2nd Edition) which outlines the International Property Measurement Standards (IPMS) for offices and residential property, this basis of measurement has yet to be adopted by market participants. Where we have been provided with floor areas, we assume these floor areas are complete and correct, and are the net/gross internal/external floor areas measured in accordance with the Code of Measuring Practice (6th Edition).

7.1.8. That the buildings are structurally sound, and that there are no structural, latent or other material defects, including rot and inherently dangerous or unsuitable materials or techniques, whether in the parts we have inspected or not, that would cause us to make allowance by way of capital repair (other than those points referred to above). Our inspection of the properties and our report do not constitute a building survey or any warranty as to the state of repair or refurbishment of the properties. Our Valuation is on the basis that a building survey would not reveal material defects or cause us to alter our valuation materially.

7.1.9. That there is unrestricted access to the properties and that the site(s) are connected, or capable of being connected without undue expense, to the public services of gas, electricity, water, telephones and sewerage.

7.1.10. Sewers, mains services and roads giving access to the properties have been adopted, and any lease provides rights of access and egress over all communal estate roadways, pathways, corridors, stairways and the use of communal grounds, parking areas and other facilities.

7.1.11. That in the construction or alteration of the buildings no use was made of any deleterious or hazardous materials or techniques, such as high alumina cement, calcium chloride additives, woodwool slabs used as permanent shuttering and the like (other than those points referred to above). We have not carried out any investigations into these matters.

7.1.12. That either there is no asbestos present within the buildings or if there is asbestos present this is recorded and managed within an Asbestos Register in accordance with the Control of Asbestos Regulations 2012.

7.1.13. Unless stated otherwise, our valuation will be reported on the basis that the properties falls/fall outside the RICS Guidance Note on the Valuation of multi-storey, multi occupancy residential blocks of flats with cladding.

Environmental

7.1.14. That the properties has/have not suffered any land contamination in the past, nor likely to become so contaminated in the foreseeable future. We have not carried out any soil tests or made any other investigations in this respect, and we cannot assess the likelihood of any such contamination. Should it subsequently be established that contamination exists at the properties, or on any neighbouring land, then we may wish to review our valuation advice.

7.1.15. That, unless otherwise stated in the report, the properties has/have an EPC rating of 'E' or above. As part of the Minimum Energy Efficiency Standards 2015 (MEES) that were passed by law in April 2015, from 1st April 2018 it is a legal requirement for residential or commercial properties to have a minimum EPC rating of 'E' in order to be subject to a new letting. From 1st April 2023, this will apply to all lettings, including lease renewals.

7.1.16. The Scottish legislation covering EPCs is contained in the Energy Performance of Non-Domestic Buildings (Scotland) Regulations 2016 AEP Regulations. The legislation captures existing buildings (or units within a building) which are over 1,000 sq m and are either sold or leased to a new tenant. On a sale/lease of a property which is over 1,000 sq m which is not built to 2002 Building Regulation Standards, a seller is legally obliged to provide an "Action Plan" to a purchaser.

The Action Plan will identify emissions and energy improvement targets for a building and the improvement measures that the owners needs to implement to meet these targets. Owners have two options, either carry out the improvement works detailed in the recommendations report within three and half years, or, defer carrying out the works by providing annual report on the operational ratings of the property. The Action Plan will state which option has been chosen. Responsibility for complying with the AEP Regulations and completing the works and reporting on operational ratings rests with the owners of the property.

7.1.17. EPCs are required for the sale, letting, construction, or alteration of all residential buildings in Scotland. The Scottish Government recently published its Energy Efficient Route Map which brought in The Energy Efficiency (Private Rented Property) (Scotland) Regulations 2019. Pre-COVID-19 it had been legislated that at the change in a tenancy of any private rented property it would need to meet an EPC of D by April 2022, with a backstop date of existing properties by 2025, this was then rescinded due to the pandemic. As a result of the SNP/ Green Alliance, the Scottish Government's "Heat in Buildings Strategy" was published on 07 October 2021, this now removes the single goal of achieving higher energy efficiency and links it with achieving net zero emissions. The regulations are due to be introduced in 2025 requiring all properties in the private rented sector to reach a minimum standard equivalent to an EPC of C, where technically feasible and cost effective, at change of tenancy, with a backstop date of 2028 for all remaining existing let properties. It is also proposed that the same will follow in the owner occupied sector by 2033.

7.1.18. That the properties are free from environmental hazards.

7.1.19. That, unless otherwise stated within the report, the properties does/do not suffer from any ill effects of Radon Gas, high voltage electrical supply apparatus or other environmental detriment.

7.1.20. Where we have been asked to value the site under the special assumption that the properties will be developed, there are no adverse site or soil conditions, that the properties are not adversely affected by an Environmental Impact Assessment, that the ground does not contain any archaeological remains, nor that there is any other matter that would cause us to make any allowance for exceptional delay or site or construction costs in our Valuation.

7.2. Further General Assumptions applicable to residential valuations

The following general assumptions apply to residential property valuations and are in addition to the general assumptions as above.

7.2.1. Where the Property comprises flats or maisonettes, unless instructed or otherwise aware to the contrary, we will assume that:

(a) The costs of repairs and maintenance or the building and grounds are shared equitably between the flats and maisonettes.

(b) There are suitable, enforceable covenants between all leaseholds, or through the landlord or the owner.

(c) There are no onerous liabilities outstanding.

(d) There are no substantial defects, or other matters requiring expenditure (in excess of the current amount or assumed amount of service charge payable on an annual basis), expected to result in charges to the leaseholder, or owner of the Property, during the next five years, equivalent to 10% or more of the reported Market Value.

7.2.2. Where the dwelling is leasehold and it is not possible to inspect the lease or details have not been provided, the following further assumptions will be made, unless instructed to the contrary:

(a) The unexpired term of the lease is 85 years, and no action is being taken by any eligible party with a view to acquiring the freehold or to extending the lease term.

(b) That there are no exceptionally onerous covenants upon the leaseholder.

(c) The lease cannot be determined except on the grounds of a serious breach of covenant in the existing lease agreement.

(d) If there are separate freeholders, head and/or other sub-head leaseholders, the terms and conditions of all the leases are in the same form and contain the same terms and conditions.

(e) The lease terms are mutually enforceable against all parties concerned.

(f) There are no breaches of covenants or disputes between the various interests concerned.

(g) The leases of all the properties in the building/development are materially the same.

(h) The ground rent stated or assumed is not subject to unreasonable review and is payable throughout the expired lease term.

(i) In the case of blocks of flats or maisonettes of over six dwellings, the freeholder manages the Property directly or there is an appropriate management structure in place.

(j) There is a dutyholder, as defined in the Control of Asbestos Regulations 2012, and there are in place an asbestos register and effective management plan, which does not require any immediate expenditure, pose a significant risk to health or breach of the Health and Safety Executive (HSE) regulations.

(k) Where the Property forms part of a mixed residential or commercially used block or development, there will be no significant changes in the existing pattern of use.

(l) Where the Property forms part of a development containing separate blocks of dwellings, the lease terms of the Property apply only to the block. There will be no requirement to contribute towards costs relating to the other parts of the development, other than in respect of common roads, paths, communal grounds and services.

(m) Where the Property forms part of a larger development, the ownership of which has since been divided, all necessary rights and reservations have been reserved.

(n) There are no unusual restrictions on assignment or sub-letting of the Property for residential purposes.

(o) There are no outstanding claims or litigation concerning the lease of the Property or any others within the same development.

(p) Where the Property benefits from additional facilities within a development, the lease makes adequate provision for the lessee to continue to enjoy them with exceptional restriction, for the facilities to be maintained adequately, and that there are no charges over and above the service charge for such use and maintenance.

7.2.3. In respect of insurance the following assumptions will be made, unless instructed otherwise:

(a) The Property can be insured under all-risks cover for the current reinstatement cost and is available on normal terms.

(b) There are no outstanding claims or disputes.

(c) Where individuals in a block makes separate insurance arrangements, the leases make provision for mutual enforceability of insurance and repairing obligations and

(d) Any landlord responsible for insurance is required to rebuild the Property with the alterations that may be necessary to comply with current Building Regulations and planning requirements.

7.3. General Conditions

Our valuation has been carried out on the basis of the following general conditions:

7.3.1. In undertaking our valuations, we have adopted the definitions of Market Value and Market Rent as defined in the RICS Valuation – Global Standards ("the Red Book"), as detailed below:

Market Value (MV) is defined in IVS 104 paragraph 30.1 as:

"The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Market Rent (MR) is defined in IVS 104 paragraph 40.1 as:

"The estimated amount for which an interest in real property should be leased on the valuation date between a willing lessor and a willing lessee on appropriate lease terms in an arm's length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

7.3.2. Where relevant, we have adopted the definition of Fair Value as defined in the RICS Valuation – Global Standards ("the Red Book") and the definition adopted by the International Accounting Standards Board (IASB) in IFRS 13:

7.3.3. "The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date."

7.3.4. Where relevant, we have adopted the RICS definition of Gross Development Value (GDV) as defined in the RICS Guidance Note on the Valuation of Development Property 2019:

7.3.5. "The aggregate market value of the proposed development, assessed on the assumption that the development is

complete at the date of valuation in the market conditions prevailing at that date".

7.3.6. All those involved in the production of the report with AssocRICS, MRICS or FRICS qualifications are also RICS Registered Valuers. Furthermore, in accordance with VPS 3.2 of the Red Book, we confirm that the aforementioned individuals have sufficient current knowledge of the particular market and the skills and understanding to undertake the valuation competently.

7.3.7. The report is governed by and shall be construed in accordance with English law, and the English courts shall have exclusive jurisdiction over any claim or proceedings arising hereunder.

7.3.8. In accordance with the recommendations of the RICS, we would state that the report is provided solely for the purpose stated.

7.3.9. Where our valuation is provided for the purposes of secured lending, although we comment on the suitability of the properties as loan security, we do so generally and not in the context of any specific loan terms as we are not qualified to do so.

7.3.10. Where we have provided an indication for insurance purposes of the current reinstatement cost of the properties in its/their present form, it is given solely as a guide. A formal estimate for insurance purposes can only be given by a quantity surveyor or other person with sufficient current experience of replacement costs. We confirm that the properties has/have not been inspected by such a person, and therefore any cost estimate is provided without liability.

7.3.11. We have made no allowance for any Capital Gains Tax or other taxation liability that might arise upon a sale of the properties.

7.3.12. Our valuation is exclusive of VAT (if applicable).

7.3.13. No allowance has been made for any expenses of realisation.

7.3.14. Excluded from our valuation is any additional value attributable to goodwill, or to fixtures and fittings which are only of value in situ to the present occupier.

7.3.15. Unless stated to the contrary in the report, when valuing two or more properties, or a portfolio, each property will be valued individually and no allowance will be made, either positive or negative, should it form part of a larger disposal. The total stated will be the aggregate of the individual Market Values.

7.3.16. In the case of a properties where there is a distressed loan we will not take account of any possible effect that the appointment of either an Administrative Receiver or a Law of Property Act Receiver might have on the perception of the properties in the market and its/their subsequent valuation, or the ability of such a Receiver to realise the value of the properties in either of these scenarios.

7.3.17. The extent of the due diligence enquiries we have undertaken and the sources of the information we have relied upon for the purpose of our valuation are stated in the relevant sections of the report. Where reports and other information have been provided, we summarise the relevant details in the report. We do not accept responsibility for any errors or omissions in the information and documentation provided to us, nor for any consequences that may flow from such errors and omissions.

7.3.18. Our valuation will be based on market evidence which has come into our possession from numerous sources, including other agents and valuers and from time to time this information is provided verbally. Some comes from databases such as the Land Registry or computer databases to which Savills subscribes. In all cases, other than where we have had a direct involvement with the transactions being used as comparables in our report, we are unable to warrant that the information on which we have relied is correct.

7.3.19. The report contains many assumptions, some of a general and some of a specific nature. Our valuations are based upon certain information supplied to us by others. Some information we consider material may not have been provided to us. All of these matters are referred to in the relevant sections of the report. Where possible, we have sought to verify the information provided to us. However should further due diligence highlight inaccuracies in the data supplied

to us, or new material information come to light, this may have an adverse impact on the valuations herein reported. In such cases, we would reserve the right to amend our advice accordingly.
