

NB Distressed Debt Investment Fund Limited – Extended Life Shares (“NBDX”)

NBDX FUND OBJECTIVE

NB Distressed Debt Investment Fund Limited’s (“NBDDIF”) primary objective is to provide investors with attractive risk-adjusted returns through long-biased, opportunistic stressed, distressed and special situation credit-related investments while seeking to limit downside risk.

NBDDIF’s holdings are diversified across distressed, stressed and special situations investments, with a focus on senior debt backed by hard assets. The portfolio is managed by the Distressed Debt team at Neuberger Berman, which sits within what we believe is one of the largest and most experienced non-investment grade credit teams in the industry.

On 31 March 2015, the investment period of the Extended Life Share Class (“NBDX”) expired and the assets of NBDDIF attributable to the Extended Life Shares were placed into the harvest period. There were no share buybacks during the quarter – inception to date, distributions stand at \$287.0 million or 80% of original capital (income by way of dividend, capital by way of redemption and share buybacks), since the realisation phase for this share class began.

The Extended Life Share Class is one of three classes of shares in NBDDIF. The others are the Ordinary Share Class and the New Global Share Class. The Ordinary Share Class was subject to an investment period which ended on 10 June 2013 and the New Global Share Class was subject to an investment period which ended on 31 March 2017. Separate factsheets are produced for those share classes.

NAV BRIDGE: 30 JUNE – 30 SEPTEMBER 2021

Source: Neuberger Berman

Beginning NAV and Closing NAV are based on published NAVs for NBDX and not on a per share basis.

Realised and Unrealised gain/loss include intraquarter adjustments that have no effect on YTD NAV.

FX Changes due to share class's exposure to foreign currencies. As detailed in its prospectus, the share class may, but is not required to, engage in currency hedging in connection with investments in assets not denominated in US dollars (the currency in which shares are denominated).

Return of Capital includes distributions and buy backs.

Figures presented are based on quarter-end published financial information and financial information provided by U.S. Bank Global Fund Services (Guernsey) Limited / U.S. Bank Global Fund Services (Ireland) Limited, as administrator to NBDDIF (the "Administrator"). This NAV bridge has not been audited and figures are subject to change.

MANAGER COMMENTARY

Momentum in public markets continued as investors and consumers remained encouraged by COVID-19 vaccination rates, decreasing hospitalisation rates, and strong global growth. However, the threat of new variants remains and may require a reassessment of the speed at which to lift restrictions. In addition, investors are monitoring supply chain disruptions, sharply rising input costs, and a tight labour market for a possible impact on market volatility, of which we saw glimpses during the quarter. Furthermore, the potential for tighter fiscal and monetary conditions exists as central banks and governments weigh their response to high inflation and strong demand. Given these circumstances, the timing and quantum of any financial impact on the portfolio remains difficult to predict. Despite the uncertainty, the investment manager remains committed to realising the investments in an orderly manner and winding down the share class as soon as practicable.

For regulatory reasons, the final 10% of the total return (NAV plus cumulative distributions) in respect of any class of participating shares in NBDDIF will be returned to shareholders with a final compulsory redemption of all the outstanding shares of that class.

While uncertainty in markets remains, we have reviewed the remaining investments to provide guidance on their realisable values. The investment manager uses economic, industry and issuer specific data to estimate the gross realisable value in downside, base case and upside scenarios for each investment in the portfolio. It currently estimates that the range of the aggregated realisable value for the investments in the portfolio is between 89% and 144% of the 30 September 2021 market values of these investments, with a base case of 118%. The range increased mainly because the value of a financial intermediary investment declined while its expected realisable value remained unchanged. Shareholders should, however, note that: (i) the realisable values of the investments are calculated on a gross basis and, in particular, do not reflect any applicable third-party expenses; and (ii) this range of aggregate realisable values is an estimate only, with no guarantee that the value actually realised will be within this range. Further details on the risks relating to "forward looking information" are set out at the end of this announcement.

Portfolio Update

NBDX ended the quarter with a NAV per share of \$0.9562 compared with \$0.9509 at the end of June 2021. NAV increased 1% during the quarter, principally driven by a shipping investment benefiting from a stronger dry bulk market, offset by a decrease in a financial intermediary investment. At quarter-end, 93% of NBDX's NAV was invested in distressed assets (including net cash held in subsidiaries), with 7% held in cash and U.S. Treasury securities.

The remaining portfolio consists of 12 issuers across 8 sectors, including surface transportation, containers and packaging, shipping, and lodging & casinos. NBDX had no exits during the quarter. The ratio of distributions, both income and capital, to original capital, is 80%. Including the current NAV, the figure rises to 101%.

There were no Notable Events² during the quarter.

Data as at 30 September 2021. Past performance is not indicative of future returns. All comments unless otherwise stated relate to NBDX.

² Notable corporate events may or may not result in an increase or decrease in the value of an NBDX investment or a change in NBDX's NAV per share. Please note that an investment may experience a change in value (positive or negative) during the quarter whether or not it was subject to a notable corporate event. Not all events involving existing investments are disclosed. In addition, certain corporate events may not have been disclosed due to confidentiality obligations.

Exits

There were no exits during the quarter. Inception to date there have been 67 exits with a total return of \$63.4 million, weighted average IRR of 5% and weighted average ROR of 10%.

Partial Realisations

There was no capital activity during the quarter. The table below has been updated with current values.

Distributions

There were no distributions in respect of the quarter. Inception to date there have been distributions (dividends, redemptions and buy-backs) equal to \$287.0 million or 80% of original capital.

The investment manager has undertaken a review of all the investments in the light of a changed market and we have updated the distribution schedule for the investments based on current expectations. The expectation is to distribute approximately all of the 30 September 2021 NAV in 2022. The main drivers for a reduction in distributions in 2021 are raw material inflation headwinds postponing our estimate of the ultimate sale date of a packaging investment and ongoing negotiations for restructuring a lodging & casino investment taking longer than expected. For regulatory reasons, the final 10% of total return in respect of any class of participating shares in NBDDIF will be returned to shareholders with the final compulsory redemption of all the outstanding shares of that class. In the harvest period, we continue to focus on restructuring and monetising our investments, balancing timely realisations with maximising proceeds to our shareholders. Changes to timing are expected based on current market conditions and investment developments, and will continue to be updated in the quarterly factsheets.

Share Buybacks

NBDDIF did not repurchase any shares in NBDX during the quarter. Inception to date, a total of 14,928,634 shares, or 4% of the original NBDX shares at a cost of \$12.1 million, has been repurchased and cancelled.

The buyback programme was intended to narrow the discount during the investment period. At this point of the harvest period, our priority, based on shareholder feedback, is the return of capital. The Board intends to make distributions from investment realisations and not hold back cash for future buyback programmes. Cash will be returned to shareholders through distributions from realisation of investments and not through buybacks.

Not all relevant events or conditions may have been considered in developing such assumptions. The success or achievement of various results and objectives is dependent on a multitude of factors, many of which are beyond the control of the Company and Neuberger Berman. Actual volatility and returns will depend on a variety of factors including overall market conditions and the ability of the Company and Neuberger Berman to implement its process, investment strategy and risk management policies. No representations are made as to the accuracy of such estimates or projections or that such projections will be realised. Actual events or conditions are unlikely to be consistent with, and may differ materially from, those assumed.

An investment in the Company involves risks, with the potential for above average risk, and is only suitable for people who are in a position to take such risks. No recommendation or advice is being given as to whether any investment or strategy is suitable for a particular investor. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of any investment, and should consult its own legal counsel and financial, actuarial, accounting, regulatory and tax advisers to evaluate any such investment. It should not be assumed that any investments in securities, companies, sectors or markets identified and described were or will be profitable. Investment in the Company should not constitute a substantial proportion of an investor’s portfolio and may not be appropriate for all investors. Diversification and asset class allocation do not guarantee profit or protect against loss.

Past performance is not a reliable indicator of current or future results. The value of investments may go down as well as up and investors may not get back any of the amount invested. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units.

The value of investments designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital.

Tax treatment depends on the individual circumstances of each investor and may be subject to change, investors are therefore recommended to seek independent tax advice.
