

TO CNMV (SPANISH SECURITIES EXCHANGE COMMISSION)

Banco Bilbao Vizcaya Argentaria, S.A. (BBVA), in compliance with the Securities Markets legislation, hereby communicates the following

RELEVANT INFORMATION

BBVA was subject to the 2016 EU-wide stress test conducted by the European Banking Authority (EBA), in cooperation with the European Central Bank (ECB), the European Commission (EC) and the European Systemic Risk Board (ESRB).

BBVA notes the announcements made today by the EBA on the EU-wide stress test and fully acknowledges the outcomes of this exercise.

The 2016 EU-wide stress test does not contain a pass fail threshold and instead is designed to be used as a crucial piece of information for the supervisory review process in 2016. The results will thus allow competent authorities to assess BBVA's ability to meet applicable minimum and additional own funds requirements under stressed scenarios based on a common methodology and assumptions.

The adverse stress test scenario was set by the ECB/ESRB and covers a three-year time horizon (2016-2018). The stress test has been carried out applying a static balance sheet assumption as at December 2015, and therefore does not take into account future business strategies and management actions. It is not a forecast of BBVA profits.

Based on the results of the exercise, that will constitute a relevant input to the 2016 supervisory review process, BBVA will work with the ECB to understand the extent to which credible management actions may offset some of the impact of the adverse scenario; to assess the impact of the results on BBVA's forward looking capital plans and its capacity to meet applicable own funds requirements; and to determine whether any additional measures or changes to the BBVA's capital plan are needed.

Further information is available on the EBA website (www.eba.europa.eu)

Madrid, July 29th 2016

Note

The stress test exercise information is provided in the accompanying disclosure tables based on the common format provided by the EBA.

Notes, definitions and regions:

(1) The exposures reported cover only exposures to central, regional and local governments on immediate borrower basis, and do not include exposures to other counterparties with full or partial government guarantees. Exposures to central banks should not be included here.

(2) For positions in HFT this should include gross exposures (less) net of cash short positions of sovereign debt to other counterparties only where there is a maturity matching

(3) The exposures reported include the positions towards counterparties (other than sovereign) on sovereign credit risk (i.e. CDS) booked in all the accounting portfolio (on-off balance sheet). Irrespective of the denomination and or accounting classification of the positions.

This ratio does not include grandfathered AT1 capital instruments meeting the conditions laid down in Article 63 of CRR and, hence, eligible as fully loaded T2 capital. Therefore, the ratio could be underestimated for banks with material instruments of such kind.
