An alternative to alternative asset management

August 2022 Issue 207

During August, the net asset value of the Company rose by 0.4%. This compared to the FTSE All-Share TR which fell by 1.7%.

August commenced with markets continuing to bask in the summer sun, as a softer than expected inflation release fed the narrative that the US economy was passing peak inflation with no signs of weakness in the labour market. This was the ‘goldilocks’ style environment many investors were longing for, but it appears incompatible with the likely path of monetary policy. We felt this rally would ultimately be self-defeating since rising equity prices (among other measures) are catalysts for looser financial conditions – the very opposite of the tightening the Federal Reserve hopes to enforce on the economy. The party pooper on this occasion was Federal Reserve Chair Jerome Powell, speaking at the annual Jackson Hole economic symposium. In contrast to recent communications, which had given some the hope the Fed was reaching for the pause button, Powell left little doubt they remain resolute in the battle to combat the current period of high inflation. One regional Fed president even noted his satisfaction with the equity market’s negative response to Powell’s speech – oh, how times have changed!

For investors, this amounted to another difficult month in an already challenging year. Developed market equities fell, whilst bond markets suffered as yields rose sharply. Yield rises were most pronounced in Europe as expectations responded to the advancing energy price crisis and the likelihood of further interest rate rises. Despite the expected rise in inflation, which some forecasters estimate will exceed 20% in the UK, longer term inflation expectations remain anchored to historic averages, creating a headwind for the fund’s long-dated, index-linked gilts. Despite this backdrop, the fund delivered a positive return led by notable contributions from interest rate payer swaptions, which benefit from rising yields, and our other less conventional protective assets. The fund’s equity exposure fared better than wider indices in part due to our tilt towards energy, with BP rising by 10% over the month.

In a world where interest rates are rising and liquidity is being drained from the financial system (the pace of quantitative tightening in the US is doubling from September), our focus is firmly on our primary investment objective of capital preservation. Following a decade where the investment mantra was best summarised by TINA (There is No Alternative) as those seeking returns were forced to absorb ever more risk, investors are now offered a genuine alternative in the form of higher short-term interest rates on cash. We are concerned this will be the catalyst for a reduction in allocations to risk assets, with few areas of safety. Therefore we now have a low weighting to equities, both in absolute terms and relative to our 27 year history, and have bolstered our unconventional protections to defend the portfolio should financial markets fall further. This should not be viewed as a low conviction portfolio, rather one that is well placed to protect from potential turbulence ahead.

Ruffer performance is shown after deduction of all fees and management charges, and on the basis of income being reinvested. Past performance is not a guide to future performance. The value of the shares and the income from them can go down as well as up and you may not get back the full amount originally invested. The value of overseas investments will be influenced by the rate of exchange.

## Investment objective

The principal objective of the Company is to achieve a positive total annual return, after all expenses, of at least twice the Bank of England Bank Rate by investing predominantly in internationally listed or quoted equities or equity related securities (including convertibles) or bonds which are issued by corporate issuers, supranationals or government organisations.

## Performance since launch on 8 July 2004

Performance %	Net Asset Value	Share price	As at 31 August 2022	p
August 2022	0.4	1.8	<b>Share price</b>	<b>302.00</b>
Year to date	3.6	3.6	<b>Net Asset Value (NAV) per share</b>	<b>296.65</b>
1 year	6.7	6.0		%
3 years	31.4	37.3	Premium/discount to NAV	1.8
