**INTERIM MANAGEMENT REPORT**

The Interim Management Report is issued by Investec Investment Trust PLC in accordance with the UK Listing Authority's Disclosure Rules and Transparency Rules. Unless otherwise stated, performance and figures highlighted below refer to the six months ended 30 September 2017 and the corresponding period in the previous year.

**PRINCIPAL ACTIVITY AND BUSINESS REVIEW**

The principal activity of Investec Investment Trust PLC (the "company") is to source funds from the financial market for Investec group activities and it will continue to operate in this capacity for the foreseeable future.

The company's ultimate parent is Investec plc. The company's immediate parent company, Investec Group Investments (UK) Limited, a wholly owned subsidiary of Investec plc, owns all of the company's ordinary shares, 266,586 shares of the company's 1,300,000 3.5 per cent cumulative preference shares and 96,612 shares of the company's 345,438 5 per cent cumulative preference shares. The company's 3.5 per cent and 5 per cent cumulative preference shares are listed on the London Stock Exchange.

The preference shares are classified as a liability and not equity (refer to note 1, Accounting Policies, Financial liabilities (preference shares)).

**PERFORMANCE OVERVIEW AND PRINCIPAL RISKS**

The results for company show a pre-tax loss of £31,386 (30 September 2016: loss of £31,386) for the period (see page 3).

At 30 September 2017 the company had net assets of £25,737,000 (31 March 2017: £25,768,000).

The directors do not recommend the payment of an interim dividend on the ordinary shares for the period (30 September 2016: £nil). Dividends payable, reported as interest payable, on the preference shares in the period amounted to £31,386 (30 September 2016: £31,386).

The company's financial risks are managed at the Investec plc group level. Surplus liquidity arising from time to time was loaned by the company during the year in which it arose on an interest free basis to its immediate parent company. The loan is repayable upon demand and the company has the right, at any time and at its sole discretion, to charge interest thereon at a commercial rate. Preference dividend payments are funded from the loan.

The company's exposure to financial risks is further discussed in note 9.

**Going concern**

On the basis of current financial projections the directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future and accordingly the going concern basis is adopted in the preparation of these financial statements.

**Corporate governance**

The directors' disclosure in relation to Corporate Governance is given in detail on the Directors' Responsibilities Statement.

**Unaudited condensed financial statements**

The unaudited condensed financial statements have not been audited or reviewed by the company's auditors pursuant to the Auditing Practices Board guidance Review of Interim Financial Information.

## NOTES TO THE FINANCIAL STATEMENTS

at 30 September 2017

### 1. ACCOUNTING POLICIES (Continued)

#### Basis of presentation (Continued)

Investec Investment Trust plc is a wholly owned subsidiary of Investec Group Investments (UK) Limited which is a wholly owned subsidiary of Investec plc and the results of Investec Investment Trust plc are included in the consolidated financial statements of Investec plc which are available from 2 Gresham Street, London, EC2V 7QP.

#### Going concern

On the basis of current financial projections the directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future and accordingly the going concern basis is adopted in the preparation of the financial statements.

#### Fair value measurement

A qualifying entity which is a financial institution is not exempt from the disclosure requirements of IFRS 7 Financial Instruments: Disclosures, IFRS 13 Fair Value Measurement to the extent that they apply to financial instruments, and paragraphs 134 to 136 of IAS 1 Presentation of Financial Statements. Investec Investment Trust plc is considered a financial institution and is therefore not exempt from the requirements of IFRS 13 and IFRS 7.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the company has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the company measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the assets or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the company uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

If an asset or liability measured at fair value has a bid price and ask price, then the company measures assets and long positions at a bid price and liabilities and short positions at an ask price.

The company classifies disclosed fair values according to hierarchy that reflects the significance of observable market inputs. A transfer is made between the hierarchy when the inputs have changed or there has been a change in the valuation method. Transfers are deemed to occur at the end of each semi-annual group reporting period.

#### Financial liabilities (preference shares)

Financial instruments issued by the group are classified as liabilities if they contain a contractual obligation to deliver cash or another financial asset.

Shares classified as debt are initially measured at fair value net of transaction costs and thereafter at amortised cost until extinguished on redemption. The corresponding dividends relating to the preference shares classified as a liability are charged as interest expense in the profit and loss account on an accrual basis.

### 1. ACCOUNTING POLICIES (Continued)

#### **Taxation**

The tax expense represents the sum of the tax currently payable and deferred tax.

#### **Current tax**

Current tax is provided on the amount expected to be payable on taxable profit at rates that are enacted or substantively enacted and applicable to the relevant period.

#### **Deferred tax**

Deferred taxation is provided using the balance sheet method on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base, except where such temporary differences arise from:

The initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction has no effect on the income statement or taxable profit.

In respect of temporary timing differences associated with the investments in subsidiaries or interests in associated undertakings, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets or liabilities are measured using the tax rates that have been enacted or substantively enacted at the balance sheet date.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the deferred tax asset can be utilised.

Items recognised directly in other comprehensive income are net of related current and deferred taxation.
