21 April 2022

Westpac's First Half 2022 (1H22) notable items and segment structure changes

Westpac today announced that its reported net profit and cash earnings in 1H22 is expected to have a minimal impact from notable items with a net reduction of \$6m (after tax). Of the notable items, a \$4m benefit was recognised and announced in the first quarter 2022 (1Q22) with the remainder recognised in the second quarter 2022 (2Q22). The notable items (after tax) include:

- The gain on sale of Westpac Life-NZ-Limited (NZ Life) of \$119m (NZ\$126m) following completion of the transaction in February 2022. There is no tax expense from this item in 1H22;
- Gains on sale of \$119m related to the Group's Motor vehicle dealer finance and novated leasing business following completion in the half;
- The write-down of goodwill and capitalised software associated with the Group's superannuation business of \$154m as part of preparations to exit this business;
- An increase in provisions for customer refunds, repayments, associated costs and litigation penalties of \$65m; and
- A \$25m impact from costs associated with divestments and a post-sale adjustment to earn-out payments associated with the sale of the Vendor Finance business.

In aggregate, these items have a small impact on the Group's CET1 capital ratio (adds 3 basis points). Details of notable items in First Half 2022 are in Appendix 1 and a summary of line item impacts is in Appendix 2.

Segment structure changes in Westpac's 1H22 Results

As outlined in our 1Q22 update, we are making changes to align our segment reporting to our lines of business operating structure. These changes have no impact on the Group's consolidated financial results and associated metrics in prior periods but do impact profit and loss and balance sheet items of our reporting segments. The new structure and changes are summarised in Appendix 3.

In addition, certain customers previously managed in Business are now being managed by Westpac Institutional Bank (WIB) and their contribution will be reported in that segment. In preparing the platforms business for sale we have decided to retain our share broking and margin lending businesses given the demand from consumer and private wealth clients. The share broking business will now be reported in Consumer, previously in the Specialist Businesses segment (with comparative periods restated). Margin lending will continue to be reported in Specialist Businesses and will be moved to Consumer in a subsequent period once we finalise its separation from our wealth businesses.

Appendix 4 provides prior period data under these segment changes in the same way they will be presented in 1H22.

Restatement of APRA Monthly ADI Statistics (MADIS)

Following revisions to Westpac's reporting models used to classify owner occupied and investment property housing loans under APRA's Economic Financial Statistics definitions we are changing the reporting of these loan balances.

The changes will result in a reclassification of \$14 billion¹ in the MADIS dataset, increasing owner occupied lending (~1% market share) with a corresponding decrease in investment property loans (~2% market share). Total outstanding housing lending is unchanged.

Restated data is expected to be published in APRA's MADIS data release on 29 April 2022 and will be restated back to March 2021. The changes better align our MADIS statistics with existing management and external reporting.

This restatement has no impact on Westpac's reporting of housing lending in our Investor Discussion Pack and other management reporting documents.

We are scheduled to announce our First Half 2022 results on Monday, 9 May 2022.

Appendix 1 – Details of items affecting Westpac's 1H22 Financial Results

This table details how the notable items will be described in our 1H22 Financial Results.

| Summary | 1H22 Cash earnings (after tax) | Detail (pre tax) |
|---|--------------------------------------|--|
| Write-down of goodwill and other assets | \$154m reduction | In preparation for the exit of our superannuation business, the carrying value of our superannuation intangible assets was reviewed and found to be no longer supportable. This included: \$122m of goodwill, which is all the goodwill attributable to this business; and \$45m of capitalised software. |
| Additional provisions for customer refunds payments, associated costs and litigation provisions | \$65m reduction | The ongoing review of customer remediation, litigation and regulatory investigations has led to the following changes in provisions: Revenue: \$36m decrease for additional remediation related to wealth products, partly offset by the release of some provisions in Westpac New Zealand; and Expenses: \$46m increase for additional costs related to our remediation programs and for litigation matters, including an increase to prior provisions following agreement with ASIC to settle six longstanding matters announced on 30 November 2021. |
| Asset sales and revaluations | \$213m increase | Revenue increase of \$271m from a gain on sale of \$119m from NZ Life and \$170m from the Group's Motor vehicle dealer finance and novated leasing business, partly offset by an \$18m post-sale adjustment to earn-out payments associated with the sale of the Vendor Finance business; Expenses associated with asset sales and revaluations of \$18m; and Tax expense and non-controlling interest impact of \$40m. The low effective tax rate of these collective items reflects that the tax impact for the sale of NZ Life was largely recorded in prior periods. |
