Data Pack

3Q 2022

The financial information on which this supplement is based is unaudited and has been prepared in accordance with HSBC's significant accounting policies as described in the *Annual Report and Accounts 2021*. The financial information does not constitute financial statements prepared in accordance with International Financial Reporting Standards ('IFRSs'), is not complete and should be read in conjunction with the *Annual Report and Accounts 2021*, the *Interim Report 2022*, and other reports and financial information published by HSBC.

Unless stated otherwise, all information is on a reported basis. Where disclosed, adjusted performance information is computed by adjusting reported results for the effects of foreign currency translation differences and significant items, which both distort period-on-period comparisons. We consider adjusted performance provides useful information for investors by aligning internal and external reporting, identifying and quantifying items management believes to be significant, and providing insight into how management assesses period-on-period performance. Definitions and calculations of other alternative performance measures are included in our 'Reconciliation of alternative performance measures' on page 56 of our *Interim Report 2022*. All alternative performance measures are reconciled to the closest reported financial measure.

'Significant items' refers collectively to the items that management and investors would ordinarily identify and consider separately to improve the understanding of the underlying trends in the business.

The quarterly comparatives are translated at average 3Q22 exchange rates for the income statement or at the prevailing rates of exchange on 30 September 2022 for the balance sheet. The yearly comparatives are translated at average FY21 exchange rates for the income statement or at the prevailing rates of exchange on 31 December 2021 for the balance sheet. The income statement for the nine months to 30 September 2021 is translated at the average rate of exchange for the nine months to 30 September 2022.

1 Staff expenses are presented net of software capitalisation costs. During 4Q21, the allocation of internally capitalised software costs between staff expenses and general administrative expenses was updated to better reflect the allocation of the underlying costs being capitalised. The YTD impact recognised in 4Q was an increase of \$733m in staff expenses, offset by a corresponding decrease in general administrative expenses. There is no impact on total operating expenses and comparatives have not been re-presented.
