Notes

1. Accounting policies

Accounting convention and accounting standards

The Consolidated Financial Statements comply with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and with Swiss law.

They have been prepared on an accrual basis and under the historical cost convention, unless stated otherwise. All significant consolidated companies, joint arrangements and associates have a 31 December accounting year-end.

The Consolidated Financial Statements 2015 were approved for issue by the Board of Directors on 17 February 2016 and are subject to approval by the Annual General Meeting on 7 April 2016.

Accounting policies

Accounting policies are included in the relevant notes to the Consolidated Financial Statements and are presented as text highlighted with a grey background. The accounting policies below are applied throughout the financial statements.

Key accounting judgements, estimates and assumptions

The preparation of the Consolidated Financial Statements requires Group Management to exercise judgement and to make estimates and assumptions that affect the application of policies, reported amounts of revenues, expenses, assets and liabilities and disclosures. These estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods. Those areas affect mainly provisions and contingencies (see Note 12), goodwill and intangible assets with indefinite useful life impairment tests (see Note 9), employee benefits (see Note 10), allowance for doubtful receivables (see Note 7), taxes (see Note 14) and hyper-inflation (see Note 22).

Foreign currencies

The functional currency of the Group's entities is the currency of their primary economic environment.

In individual companies, transactions in foreign currencies are recorded at the rate of exchange at the date of the transaction. Monetary assets and liabilities in foreign currencies are translated at year-end rates. Any resulting exchange differences are taken to the income statement, except when deferred in other comprehensive income as qualifying cash flow hedges.

On consolidation, assets and liabilities of Group entities reported in their functional currencies are translated into Swiss Francs, the Group's presentation currency, at year-end exchange rates. Income and expense are translated into Swiss Francs at the annual weighted average rates of exchange or at the rate on the date of the transaction for significant items.

Differences arising from the retranslation of opening net assets of Group entities, together with differences arising from the restatement of the net results for the year of Group entities, are recognised in other comprehensive income.

The balance sheet and net results of Group entities operating in hyperinflationary economies are restated for the changes in the general purchasing power of the local currency, using official indices at the balance sheet date, before translation into Swiss Francs.

When there is a change of control in a foreign operation, exchange differences that were recorded in equity are recognised in the income statement as part of the gain or loss on disposal.

Valuation methods, presentation and definitions

Revenue

Sales represent amounts received and receivable from third parties for goods supplied to the customers and for services rendered. Revenue from the sales of goods is recognised in the income statement at the moment when the significant risks and rewards of ownership of the goods have been transferred to the buyer, which is mainly upon shipment. It is measured at the list price applicable to a given distribution channel after deduction of returns, sales taxes, pricing allowances, other trade discounts and couponing and price promotions to consumers. Payments made to the customers for commercial services received are expensed.

Other revenue is primarily license fees from third parties which have been earned during the period.

Expenses

Cost of goods sold is determined on the basis of the cost of production or of purchase, adjusted for the variation of inventories. All other expenses, including those in respect of advertising and promotions, are recognised when the Group receives the risks and rewards of ownership of the goods or when it receives the services. Additional details of specific expenses are provided in the respective notes.

Changes in Consolidated cash flow statement

The Group has enhanced the presentation of its cash flow statement by including additional details of some material items (e.g. depreciation and amortisation) on the face of the consolidated cash flow statement, while aggregating some immaterial items.

2014 comparatives have been restated.

Changes in presentation – Analyses by segment

The scope of the operating segments has been modified following the changes in management responsibilities as from 1 January 2015. Zone Europe has been renamed Zone Europe, Middle East and North Africa (EMENA) and now includes the Maghreb, the Middle East, the North East Africa region, Turkey and Israel, which were formerly included in Zone Asia, Oceania and Africa. Zone Asia, Oceania and Africa has been renamed Zone Asia, Oceania and sub-Saharan Africa (AOA). Nestlé Nutrition now includes Growing-Up Milks business formerly included in the geographic Zones. Finally, Other businesses now includes the Bübchen business, formerly included in Nestlé Nutrition.

The amount of segment assets is no longer disclosed. Segment assets are not included in the measures used for allocating resources and assessing segment performance. The Group discloses on a voluntary basis invested capital (as defined in Note 3) as well as goodwill and intangible assets by segment for consistency with long-standing practice. Goodwill and intangible assets are not included in invested capital since the amounts recognised are not comparable between segments due to differences in the intensity of acquisition activity and changes in accounting standards which were applicable at various points in time when the Group undertook significant acquisitions.

Information by product has been modified following the main transfer of Growing-Up Milks business in Milk products and Ice cream to Nutrition and Health Science.

Sales and non-current assets in Switzerland and countries which individually represent at least 10% of the Group sales or 10% of the Group non-current assets are disclosed separately, instead of the top ten countries and Switzerland.

In addition, intangible assets are attributed to the country of their legal owner rather than being allocated to the countries of the affiliated companies using these assets. Finally, goodwill items which were presented as part of unallocated items are attributed to the countries of the affiliated companies where the related acquired business is operated.

2014 comparative information has been restated.

Other changes in presentation

Notes to the Consolidated Financial Statements have been restructured, with the accounting policy generally being placed immediately before the respective Note. Information by geographic area has been restated following the changes described under Changes in presentation – Analyses by segment regarding countries under the geography EMEA and AOA.

For consistency with the annual accounts of Nestlé S.A., the Consolidated Financial Statements include the early adoption of the new provisions of the Swiss Law regarding accounting and financial reporting with regards of consolidated accounts (application is mandatory for the year beginning 1 January 2016). Only the Notes are impacted. The main impact is the deletion of the Note on Group risk management, which is discussed now only in the Annual Review.

Changes in accounting policies

A number of standards have been modified on miscellaneous points with effect from 1 January 2015. Such changes include Defined Benefit Plans: Employee Contributions (Amendments to IAS 19), as well as the Annual Improvements to IFRS 2010–2012 Cycle and the Annual Improvements to IFRS 2011–2013 Cycle.

None of these amendments had a material effect on the Group's Financial Statements.

Changes in IFRS that may affect the Group after 31 December 2015

The following new standards, interpretations and amendments to existing standards have been published and are mandatory for the accounting period beginning on 1 January 2016 or later. The Group has not early adopted them.

IFRS 9 – Financial Instruments

The standard addresses the accounting principles for the financial reporting of financial assets and financial liabilities, including classification, measurement, impairment,

1. Accounting policies

derecognition and hedge accounting. The standard will affect the Group's accounting for its available-for-sale financial assets, as IFRS 9 only permits the recognition of fair value gains and losses in other comprehensive income under some circumstances and gains and losses on certain instruments with specific cash flow characteristics are never reclassified to the income statement at a later date.

There is no expected impact on the Group's accounting for financial liabilities, as the new requirements only affect the accounting for financial liabilities that are designated at fair value through profit or loss, and the Group does not have any such liabilities.

The Group is currently assessing the impact of the new impairment and hedge accounting requirements. In particular it is expected that the new component hedge model may bring improved alignment between the risk management strategies and their accounting treatment.

This standard is mandatory for the accounting period beginning on 1 January 2018.

IFRS 15 – Revenue from Contract with Customers

This standard combines, enhances and replaces specific guidance on recognising revenue with a single standard.

It defines a new five-step model to recognise revenue from customer contracts. The Group is currently assessing the potential impact of this new standard.

This standard is mandatory for the accounting period beginning on 1 January 2018.

IFRS 16 – Leases

This standard will replace IAS 17 and sets out the principles for the recognition, measurement, presentation and disclosure of leases. The main effect on the Group is that IFRS 16 introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for almost all leases and will therefore result in an increase of total assets and total liabilities. All things being equal, under the new standard higher trading operating profit would be partially or entirely offset by higher interest expense. The Group is currently assessing the precise impact of this new standard.

This standard is mandatory for the accounting period beginning on 1 January 2019.

Improvements and other amendments to IFRS/IAS

A number of standards have been modified on miscellaneous points. None of these amendments are expected to have a material effect on the Group's Financial Statements.

2. Scope of consolidation, acquisitions and disposals of businesses, assets held for sale

Scope of consolidation

The Consolidated Financial Statements comprise those of Nestlé S.A. and of its affiliated companies (the Group).

Companies which the Group controls are fully consolidated from the date at which the Group obtains control, using the acquisition method. The Group controls a company when it is exposed to, or has rights to, variable returns from its involvement with the company and has the ability to affect those returns through its power over the company. Though the Group generally holds a majority of voting rights in the companies which are controlled, this applies irrespective of the percentage of interest in the share capital if control is obtained through agreements with other shareholders.

The list of the principal companies is provided in the section “Companies of the Nestlé Group, joint arrangements and associates”.

Business combinations

Business combinations are accounted for using the acquisition method. Where not all of the equity of a subsidiary is acquired the non-controlling interests are recognised at the non-controlling interest's share of the acquiree's net identifiable assets. Upon obtaining control in a business combination achieved in stages, the Group remeasures its previously held equity interest at fair value and recognises a gain or a loss to the income statement.

2.1 Modification of the scope of consolidation

Acquisitions

In 2015, among others, the acquisitions during the year include:

- Merrick Pet Care, USA, natural and organic pet food products, (PetCare) 100%, September.

None of the acquisitions of the year were significant.

In 2014, among others, the acquisitions included:

- Remaining 50% of Galderma, worldwide, dermatology pharmaceuticals products (Nutrition and Health Science), July.
- Aesthetic products business commercialisation rights from Valeant Pharmaceuticals International, USA and Canada, aesthetic dermatology products (Nutrition and Health Science), 100%, July.

None of the other acquisitions of 2014 were significant.

Disposals

In 2015, the following has been disposed of, among others:

- Davigel, France, Spain and Benelux, professional frozen prepared dishes and cooking aids (Prepared dishes and cooking aids), 100%, November.

None of the disposals of the year were significant.

In 2014, there were no significant disposals.

2. Scope of consolidation, acquisitions and disposals of businesses, assets held for sale

2.2 Acquisitions of businesses

The major classes of assets acquired and liabilities assumed at the acquisition date are:

	Total	Galderma	Aesthetic business commercial rights Valeant	Other acquisitions	Total
Fair value of consideration transferred	529	3 907	1 240	99	5 246
Non-controlling interests ^(a)	1	—	—	2	2
Fair value of pre-existing interests ^(b)	—	3 923	—	47	3 970
Subtotal	530	7 830	1 240	148	9 218
Fair value of identifiable net assets	(228)	(5 254)	(959)	(33)	(6 246)
Goodwill	302	2 576	281	115	2 972

(a) Non-controlling interests have been measured based on their proportionate interest in the recognised amounts of net assets of the entities acquired.

(b) See Note 15 for the 2014 revaluation gain on the 50% stake already held in Galderma. For 2014 other acquisitions, the remeasurement to fair value of pre-existing interests in one of the business acquisitions resulted in a gain of CHF 43 million and has been recognised under Other operating income in the income statement (see Note 4.2).

2. Scope of consolidation, acquisitions and disposals of businesses, assets held for sale

In millions of CHF

	2015				2014	
		Total	Galderma	Aesthetic business commercial rights Valeant	Other acquisitions	Total
Fair value of consideration transferred	529	3 907	1 240	99	5 246	
Cash and cash equivalents acquired	(6)	(83)	—	(16)	(99)	
Settled in L'Oréal shares ^(a)	—	(3 201)	—	—	(3 201)	
Payment of consideration payable on prior years acquisitions	7	—	—	40	40	
Cash outflow on acquisitions	530	623	1 240	123	1 986	

(a) In 2014, the Group sold part of its shares to L'Oréal for a price of CHF 7342 million (see Note 15) in exchange for the remaining 50% stake in Galderma for an equity value of CHF 3201 million and cash of CHF 4141 million.

The consideration transferred consists of payments made in cash. In 2014, for Galderma, the consideration transferred consisted of payments made in L'Oréal shares and in cash to repay the loans granted by L'Oréal to Galderma.

2014 acquisitions

Galderma

On 8 July 2014, the Group brought its ownership in Galderma to 100% by acquiring a 50% stake from L'Oréal (see Note 15.3). Galderma is a Swiss company, specialising in innovative medical solutions in dermatology pharmaceuticals products with an extensive product portfolio available in 70 countries. With this acquisition, the Group will pursue its strategic development in Nutrition, Health and Wellness, by expanding its activities to medical skin treatments.

Aesthetic dermatology products business commercialisation rights from Valeant Pharmaceuticals International

On 10 July 2014, the Group acquired a business which exploits full rights to commercialise several key aesthetic dermatology products in USA and Canada from Valeant Pharmaceuticals International. The two markets together represent more than half of the fast-growing medical aesthetic market around the world. The acquisition of these key strategic assets will extend and reinforce the Group's presence in the field of specialised medical skin treatments.

Acquisition-related costs

Acquisition-related costs have been recognised under Other operating expenses in the income statement (see Note 4.2) for an amount of CHF 11 million (2014: CHF 29 million – mostly related to the acquisitions of Galderma and the Aesthetic business commercialisation rights from Valeant).

2.3 Assets held for sale

Assets held for sale and disposal groups

Non-current assets held for sale and disposal groups are presented separately in the current section of the balance sheet when the following criteria are met: the Group is committed to selling the asset or disposal group, an active plan of sale has commenced, and the sale is expected to be completed within 12 months. Immediately before the initial classification of the assets and disposal groups as held for sale, the carrying amounts of the assets (or all the assets and liabilities in the disposal groups) are measured in accordance with the applicable accounting policy. Assets held for sale and disposal groups are subsequently measured at the lower of their carrying amount and fair value less cost to sell. Assets held for sale are no longer amortised or depreciated.

As of 31 December 2015, the main disposal group relates to the future creation of a joint venture with R&R Ice Cream, a leading European ice cream company. Nestlé would contribute to the new joint venture its ice cream business in Europe, Egypt, the Philippines, Brazil and Argentina as well as its European frozen food businesses, excluding pizza. The reclassified assets (primarily fixed assets, goodwill and inventories) and liabilities (primarily pension liabilities and accounts payables) related to the future joint venture are mainly part of the Zone EMENA and the Zone AMS operating segments. As of 31 December 2015, the related cumulative loss in other comprehensive income has been estimated at about CHF 400 million and will be recognised in the income statement at the date of the completion of the transaction. None of the other businesses classified as held for sale are individually significant.

As of 31 December 2014, assets held for sale were mainly composed of disposal groups related to frozen food and water businesses in Europe, respectively part of Other businesses and Nestlé Waters operating segments. They have been disposed during the year.

2.4 Disposals of businesses

Cash inflow on disposals of businesses relates mainly to the Davigel disposal and to several other non-significant disposals.

In 2015, the loss on disposals (see Note 4.2) is mainly composed of impairments of various disposal groups held for sale which were not individually significant and the recycling in the income statement of cumulative losses in other comprehensive income related to disposals.

In 2014, the loss on disposal (see Note 4.2) was mainly composed of a cumulative loss in other comprehensive income of CHF 322 million (mainly related to the Performance Nutrition business) that has been recycled in the income statement, of impairment of disposal groups held for sale and of various expenses incurred or accrued to finalise the disposals.

3. Analyses by segment

Segment reporting

Operating segments reflect the Group's management structure and the way financial information is regularly reviewed by the Group's chief operating decision maker (CODM), which is defined as the Executive Board.

The CODM considers the business from both a geographic and product perspective, through three geographic Zones and several Globally Managed Businesses (GMB). Zones and GMB that meet the quantitative threshold of 10% of total sales or trading operating profit for all operating segments, are presented on a stand-alone basis as reportable segments. Even though it does not meet the reporting threshold, Nestlé Waters is reported separately for consistency with long-standing practice of the Group. Therefore, the Group's reportable operating segments are:

- Zone Europe, Middle East and North Africa (EMENA);
- Zone Americas (AMS);
- Zone Asia, Oceania and sub-Saharan Africa (AOA);
- Nestlé Waters;
- Nestlé Nutrition.

Other business activities and operating segments, including GMB that do not meet the threshold, like Nestlé Professional, Nespresso, Nestlé Health Science and Nestlé Skin Health, are combined and presented in Other businesses.

As some operating segments represent geographic Zones, information by product is also disclosed. The seven product groups that are disclosed represent the highest categories of products that are followed internally.

Segment results represent the contribution of the different segments to central overheads, unallocated research and development costs and the trading operating profit of the Group. Specific corporate expenses as well as specific research and development costs are allocated to the corresponding segments.

Depreciation and amortisation includes depreciation of property, plant and equipment and amortisation of intangible assets.

No segment assets and liabilities are regularly provided to the CODM to assess segment performance or to allocate resources and therefore segment assets and liabilities are not disclosed. However the Group discloses the invested capital, goodwill and intangible assets by segment and by product on a voluntary basis.

Invested capital comprises property, plant and equipment, trade and other receivables, assets held for sale, inventories, prepayments and accrued income as well as specific financial assets associated to the segments, less trade and other payables, liabilities directly associated with assets held for sale, non-current other payables as well as accruals and deferred income.

Goodwill and intangible assets are not included in invested capital since the amounts recognised are not comparable between segments due to differences in the intensity of acquisition activity and changes in accounting standards which were applicable at various points in time when the Group undertook significant acquisitions. Nevertheless, an allocation of goodwill and intangible assets by segment and product and the related impairment expenses are provided.

Inter-segment eliminations represent inter-company balances between the different segments.

3. Analyses by segment

Invested capital and goodwill and intangible assets by segment represent the situation at the end of the year, while the figures by product represent the annual average, as this provides a better indication of the level of invested capital.

Capital additions represent the total cost incurred to acquire property, plant and equipment, intangible assets and goodwill, including those arising from business combinations. Capital expenditure represents the investment in property, plant and equipment only.

Unallocated items represent items whose allocation to a segment or product would be arbitrary. They mainly comprise:

- corporate expenses and related assets/liabilities;
- research and development costs and related assets/liabilities; and
- some goodwill and intangible assets.

3.5 Geography

Sales and non-current assets in Switzerland and countries which individually represent at least 10% of the Group sales or 10% of the Group non-current assets are disclosed separately.

The analysis of sales is stated by customer location.

Non-current assets relate to property, plant and equipment, intangible assets and goodwill. Property, plant and equipment and intangible assets are attributed to the country of their legal owner. Goodwill is attributed to the countries of the affiliated companies where the related acquired business is operated.

In millions of CHF

4. Net other trading and operating income/(expenses)

Other trading income/(expenses)

These comprise restructuring costs, impairment of property, plant and equipment and intangible assets, litigations and onerous contracts, result on disposal of property, plant and equipment, and specific other income and expenses that fall within the control of operating segments.

Restructuring costs are restricted to dismissal indemnities and employee benefits paid to terminated employees upon the reorganisation of a business. It does not include dismissal indemnities paid for normal attrition, poor performance, professional misconduct, etc.

Other operating income/(expenses)

These comprise impairment of goodwill, results on disposals of businesses (including impairment and subsequent remeasurement of businesses classified as held for sale, as well as other directly related disposal costs like restructuring costs directly linked to businesses disposed of and legal, advisory and other professional fees), acquisition-related costs, the effect of the hyperinflation accounting and other income and expenses that fall beyond the control of operating segments and relate to events such as natural disasters and expropriation of assets.

4.1 Net other trading income/(expenses)

In millions of CHF

	Notes	2015	2014
Other trading income		78	110

Miscellaneous operating income		86	71
Other operating income		126	154
Loss on disposal of businesses	2	(462)	(592)
Impairment of goodwill	9	(338)	(1 908)
Miscellaneous operating expenses ^(a)		(300)	(768)
Other operating expenses		(1 100)	(3 268)
Total net other operating income/(expenses)		(974)	(3 114)

(a) Includes the effect of hyperinflation in Venezuela (see Note 22).

5. Net financial income/(expense)

Net financial income/(expense) includes net financing cost and net interest income/(expense) on defined benefit plans.

Net financing cost comprises the interest income earned on cash and cash equivalents and short-term investments, as well as the interest expense on financial debt (collectively termed "net debt"). These headings also include other income and expense such as exchange differences on net debt and results on related foreign currency and interest rate hedging instruments. Certain borrowing costs are capitalised as explained under the section on Property, plant and equipment.

In millions of CHF

	Notes	2015	2014
Interest income		73	89
Interest expense		(517)	(521)
Net financing cost		(444)	(432)
Interest income on defined benefit plans	10	28	46
Interest expense on defined benefit plans	10	(205)	(240)
Net interest income/(expense) on defined benefit plans		(177)	(194)
Other		(3)	(11)
Net financial income/(expense)		(624)	(637)

6. Inventories

Raw materials and purchased finished goods are valued at the lower of purchase cost calculated using the FIFO (first-in, first-out) method and net realisable value. Work in progress, sundry supplies and manufactured finished goods are valued at the lower of their weighted average cost and net realisable value. The cost of inventories includes the gains/losses on qualified cash flow hedges for the purchase of raw materials and finished goods.

In millions of CHF

	2015	2014
Raw materials, work in progress and sundry supplies	3 387	3 797
Finished goods	5 014	5 643
Allowance for write-down to net realisable value	(248)	(268)
	8 153	9 172

Inventories amounting to CHF 280 million (2014: CHF 240 million) are pledged as security for financial liabilities.

7. Trade and other receivables

7.1 By type

In millions of CHF

	2015	2014
Trade receivables	9 696	10 283
Other receivables	2 556	3 176
	12 252	13 459

The five major customers represent 12% (2014: 11%) of trade and other receivables, none of them individually exceeding 7% (2014: 6%).

7.2 Past due and allowance for doubtful receivables

Allowances for doubtful receivables represent the Group's estimates of losses that could arise from the failure or inability of customers to make payments when due. These estimates are based on the ageing of customers' balances, specific credit circumstances and the Group's historical bad receivables experience.

7. Trade and other receivables

In millions of CHF

	2015	2014
Not past due	10 811	11 801
Past due 1–30 days	791	851
Past due 31–60 days	196	254
Past due 61–90 days	115	108
Past due 91–120 days	68	60
Past due more than 120 days	595	737
Allowance for doubtful receivables	(324)	(352)
	12 252	13 459

Based on the historic trend and expected performance of the customers, the Group believes that the above allowance for doubtful receivables sufficiently covers the risk of default.

8. Property, plant and equipment

Property, plant and equipment are shown on the balance sheet at their historical cost. Depreciation is provided on components that have homogenous useful lives by using the straight-line method so as to depreciate the initial cost down to the residual value over the estimated useful lives. The residual values are 30% on head offices and nil for all other asset types.

The useful lives are as follows:

Buildings	20 – 40 years
Machinery and equipment	10 – 25 years
Tools, furniture, information technology and sundry equipment	3 – 10 years
Vehicles	3 – 8 years
Land is not depreciated.	

Useful lives, components and residual amounts are reviewed annually. Such a review takes into consideration the nature of the assets, their intended use including but not limited to the closure of facilities and the evolution of the technology and competitive pressures that may lead to technical obsolescence.

Depreciation of property, plant and equipment is allocated to the appropriate headings of expenses by function in the income statement.

Borrowing costs incurred during the course of construction are capitalised if the assets under construction are significant and if their construction requires a substantial period to complete (typically more than one year). The capitalisation rate is determined on the basis of the short-term borrowing rate for the period of construction. Premiums capitalised for leasehold land or buildings are amortised over the length of the lease. Government grants are recognised as deferred income which is released to the income statement over the useful life of the related assets. Grants that are not related to assets are credited to the income statement when they are received.

(a) Including borrowing costs.

At 31 December 2015, property, plant and equipment include CHF 551 million of assets under construction (2014: CHF 1189 million). Net property, plant and equipment held under finance leases amount to CHF 127 million (2014: CHF 171 million). Net property, plant and equipment of CHF 328 million are pledged as security for financial liabilities (2014: CHF 251 million).

At 31 December 2015, the Group was committed to expenditure amounting to CHF 637 million (2014: CHF 520 million).

Impairment of property, plant and equipment

Consideration is given at each balance sheet date to determine whether there is any indication of impairment of the carrying amounts of the Group's property, plant and equipment. Indication could be unfavourable development of a business under competitive pressures or severe economic slowdown in a given market as well as reorganisation of the operations to leverage their scale.

In assessing value in use, the estimated future cash flows are discounted to their present value, based on the time value of money and the risks specific to the country where the assets are located. The risks specific to the asset are included in the determination of the cash flows.

Impairment of property, plant and equipment arises mainly from the plans to optimise industrial manufacturing capacities by closing or selling inefficient production facilities.

9. Goodwill and intangible assets

Goodwill

Goodwill is initially recognised during a business combination (see Note 2). Subsequently it is measured at cost less impairment.

Intangible assets

This heading includes intangible assets that are internally generated or acquired, either separately or in a business combination, when they are identifiable and can be reliably measured. Internally generated intangible assets (essentially management information system software) are capitalised provided that there is an identifiable asset that will be useful in generating future benefits in terms of savings, economies of scale, etc.

Indefinite life intangible assets mainly comprise certain brands, trademarks and intellectual property rights. They are not amortised but tested for impairment annually or more frequently if an impairment indicator is triggered. The assessment of the classification of intangible assets as indefinite is reviewed annually.

Finite life intangible assets are amortised over the shorter of their contractual or useful economic lives. They comprise mainly management information systems, patents and rights to carry on an activity (e. g. exclusive rights to sell products or to perform a supply activity). Finite life intangible assets are amortised on a straight-line basis assuming a zero residual value: management information systems over a period ranging from 3 to 5 years; other finite intangible assets over the estimated useful life or the related contractual period, generally 5 to 20 years or longer, depending on specific circumstances. Useful lives and residual values are reviewed annually. Amortisation of intangible assets is allocated to the appropriate headings of expenses by function in the income statement.

Research and development

Internal research costs are charged to the income statement in the year in which they are incurred. Development costs are only recognised as assets on the balance sheet if all the recognition criteria set by IAS 38 – Intangible Assets are met before the products are launched on the market. Development costs are generally charged to the income statement in the year in which they are incurred due to uncertainties inherent in the development of new products because the expected future economic benefits cannot be reliably determined. As long as the products have not reached the market place, there is no reliable evidence that positive future cash flows would be obtained.

Payments made to third parties in order to in-license or acquire intellectual property rights, compounds and products are capitalised as they are separately identifiable and are expected to generate future benefits.

Capitalised development costs are subsequently accounted for as described in the section Intangible assets above.

(a) Goodwill: acquisition of businesses amounts to CHF 302 million (2014: CHF 2972 million) and disposal of businesses to CHF 37 million (2014: CHF 399 million).

(b) Annual impairment tests are performed in connection with goodwill impairment tests. Depending on the items tested, the level at which the test is applied is the goodwill CGU or lower.

9. Goodwill and intangible assets

At 31 December 2015, the Group was committed to expenditure amounting to CHF 75 million (2014: CHF 44 million).

Impairment of goodwill and intangible assets

Goodwill and indefinite life intangible assets are tested for impairment at least annually and upon the occurrence of an indication of impairment. Finite life intangible assets are tested when there is an indication of impairment.

The annual impairment tests are performed at the same time each year and at the cash generating unit (CGU) level. The Group defines its CGU for goodwill impairment testing based on the way that it monitors and derives economic benefits from the acquired goodwill. For indefinite life intangible assets, the Group defines its CGU as the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. The impairment tests are performed by comparing the carrying value of the assets of these CGU with their recoverable amount, based on their value in use, which corresponds to their future projected cash flows discounted at an appropriate pre-tax rate of return. Usually, the cash flows correspond to estimates made by Group Management in financial plans and business strategies covering a period of five years after making adjustments to consider the assets in their current condition. They are then projected to perpetuity using a multiple which corresponds to a steady or declining growth rate. The Group assesses the uncertainty of these estimates by making sensitivity analyses. The discount rate reflects the current assessment of the time value of money and the risks specific to the CGU (essentially country risk). The business risk is included in the determination of the cash flows. Both the cash flows and the discount rates include inflation.

An impairment loss in respect of goodwill is never subsequently reversed.

9.1 Impairment charge during the year

There are various impairments of goodwill (predominantly in Zone AOA) and intangible assets in 2015 (predominantly in Unallocated items). None of them are individually significant.

In 2014, an impairment of goodwill of CHF 1835 million was recorded with regards of the Direct Store Delivery system (DSD) CGU for Frozen Pizza and Ice Cream in the USA.

9.2 Annual impairment tests

Impairment reviews have been conducted for more than 200 items of goodwill and intangible assets with indefinite useful lives, allocated to more than 50 Cash Generating Units (CGU).

The following five CGUs have been considered as significant either with regard to the total goodwill or to the total intangible assets with indefinite useful life for which detailed results are presented hereafter: Wyeth Infant Nutrition, PetCare Zone AMS, Nestlé Skin Health, DSD for Frozen Pizza and Ice Cream – USA and Nestlé Infant Nutrition.

9. Goodwill and intangible assets

In millions of CHF

	2015			2014		
	Goodwill	Intangible assets with indefinite useful life	Total	Goodwill	Intangible assets with indefinite useful life	Total
Wyeth Infant Nutrition	4 661	4 593	9 254	4 951	4 509	9 460
PetCare Zone AMS	7 901	382	8 283	7 584	172	7 756
Nestlé Skin Health	2 946	4 020	6 966	3 037	4 098	7 135
DSD for Frozen Pizza and Ice Cream – USA ^(a)	2 517	1 771	4 288	2 518	1 772	4 290
Nestlé Infant Nutrition	3 748	1 315	5 063	3 660	1 316	4 976
Subtotal	21 773	12 081	33 854	21 750	11 867	33 617
<i>as % of total carrying amount</i>	<i>66%</i>	<i>78%</i>	<i>70%</i>	<i>63%</i>	<i>74%</i>	<i>66%</i>
Other CGUs	10 999	3 350	14 349	12 807	4 254	17 061
Total	32 772	15 431	48 203	34 557	16 121	50 678

(a) 2014: after impairment (see Note 9.1).

For all CGU, the recoverable amount is higher than its carrying amount. The recoverable amount has been determined based upon a value-in-use calculation. Cash flows have been projected over the next 5 years, except for Nestlé Skin Health for which a 10 year period has been used due to the product development cycle. They have been extrapolated using a steady or declining terminal growth rate and discounted at a pre-tax weighted average rate.

9. Goodwill and intangible assets

The following table summarises the key assumptions for each significant CGU:

				2015	
	Period of cash flow projections	Annual sales growth	Annual margin evolution	Terminal growth rate	Pre-tax discount rate
Wyeth Infant Nutrition	5 years	9% to 10%	Improvement	3.5%	7.5%
PetCare Zone AMS	5 years	3%	Stable	2.0%	7.3%
Nestlé Skin Health	10 years	12% to 21%	Improvement	2.4%	7.6%
DSD for Frozen Pizza and Ice Cream – USA	5 years	0% to 1%	Improvement	1.5%	7.7%
Nestlé Infant Nutrition	5 years	-4% to 5%	Improvement	3.6%	10.7%

				2014	
	Period of cash flow projections	Annual sales growth	Annual margin evolution	Terminal growth rate	Pre-tax discount rate
Wyeth Infant Nutrition	5 years	5% to 15%	Improvement	3.9%	7.4%
PetCare Zone AMS	5 years	4% to 6%	Stable	2.0%	7.6%
Nestlé Skin Health	10 years	10% to 24%	Improvement	2.4%	6.9%
DSD for Frozen Pizza and Ice Cream – USA	5 years	-2% to 1%	Improvement	1.5%	7.7%
Nestlé Infant Nutrition	5 years	-1% to 7%	Improvement	3.3%	11.3%

- The pre-tax discount rates have been computed based on external sources of information.
- The cash flows for the first five years were based upon financial plans approved by Group Management which are consistent with the Group's approved strategy for this period. They are based on past performance and current initiatives.
- The terminal growth rates have been determined to reflect the long-term view of the nominal evolution of the business.

Management believes that no reasonably possible change in any of the above key assumptions would cause the CGU's recoverable amount to fall below the carrying value of the CGUs except for the CGU DSD for Frozen Pizza and Ice Cream – USA. For this CGU, the following changes in the material assumptions lead to a situation where the value in use equals the carrying amount:

	Sensitivity
Sales growth (CAGR)	Decrease by 390 basis points
Margin improvement	Decrease by 45 basis points
Terminal growth rate	Decrease by 90 basis points
Pre-tax discount rate	Increase by 120 basis points

10. Employee benefits

10.1 Salaries and welfare expenses

The Group's total salaries and welfare expenses amount to CHF 16 342 million (2014: CHF 15 978 million). They are allocated to the appropriate headings of expenses by function.

10.2 Post-employment benefits

The liabilities of the Group arising from defined benefit obligations, and the related current service cost, are determined using the projected unit credit method. Actuarial advice is provided both by external consultants and by actuaries employed by the Group. The actuarial assumptions used to calculate the defined benefit obligations vary according to the economic conditions of the country in which the plan is located. Such plans are either externally funded (in the form of independently administered funds) or unfunded. The deficit or excess of the fair value of plan assets over the present value of the defined benefit obligation is recognised as a liability or an asset on the balance sheet.

Pension cost charged to the income statement consists of service cost (current and past service cost, gains and losses arising from settlement) and administration costs (other than costs of managing plan assets), which are allocated to the appropriate heading by function, and net interest expense or income, which is presented as part of net financial income/(expense). The actual return less interest income on plan assets, changes in actuarial assumptions, and differences between actuarial assumptions and what has actually occurred are reported in other comprehensive income.

Some benefits are also provided by defined contribution plans. Contributions to such plans are charged to the income statement as incurred.

Certain disclosures are presented by geographic area. The three regions disclosed are Europe, Middle East and North Africa (EMENA), Americas (AMS) and Asia, Oceania and sub-Saharan Africa (AOA). Each region includes the corresponding Zones as well as Nestlé Waters, Nestlé Nutrition, Nespresso, Nestlé Professional, Nestlé Health Science and Nestlé Skin Health.

Pensions and retirement benefits

Apart from legally required social security arrangements, the majority of Group employees are eligible for benefits through pension plans in case of retirement, death in service, disability and in case of resignation. Those plans are either defined contribution plans or defined benefit plans based on pensionable remuneration and length of service. All pension plans comply with local tax and legal restrictions in their respective country, including funding obligations.

The Group manages its pension plans by geographic area and the major plans, classified as defined benefit plans under IAS 19, are located in EMEA (Switzerland, UK and Germany) and in AMS (USA). In accordance with applicable legal frameworks, these plans have Boards of Trustees or General Assemblies which are generally independent from the Group and are responsible for the management and governance of the plans.

In Switzerland, Nestlé's pension plan is a cash balance plan where contributions are expressed as a percentage of the pensionable salary. The pension plan guarantees the amount accrued on the members' savings accounts, as well as a minimum interest on those savings accounts. At retirement date, the savings accounts are converted into pensions.

However, members may opt to receive a part of the pension as a lump sum. Increases of pensions in payment are granted on a discretionary basis by the Board of Trustees, subject to the financial situation of the plan. To be noted that there is also a defined benefit plan that has been closed to new entrants in 2013 and whose members below age 55 have been transferred to the cash balance plan. This heritage plan is a hybrid between a cash balance plan and a plan based on a final pensionable salary.

In the United Kingdom, Nestlé's pension plan is a career average plan with salary revaluation. Members accrue a pension defined on the average of their salaries during their career at Nestlé since 2010. The salaries are automatically revalued according to inflation subject to caps. Pensions earned before 2010 are also revalued according to inflation subject to a cap and similarly, pensions in payment are mandatorily adjusted, as well. At retirement, there is a lump sum option. Members have the option to switch between the defined benefit sections and a defined contribution section.

Nestlé's pension plan in Germany is a cash balance plan, where members benefit from a guarantee on their savings accounts. Contributions to the plan are expressed as a percentage of the pensionable salary. Increases to pensions in payment are granted in accordance with legal requirements. There is also a heritage plan, based on final pensionable salary, that has been closed to new entrants in 2006.

In the USA, Nestlé's primary pension plan is non-contributory for the employees. The plan is a pension equity design, under which members earn pension credits each year based on a schedule related to the sum of their age and service with Nestlé. A member's benefit is the sum of the annual pension credits earned multiplied by an average earning payable as a lump sum. However, in lieu of the lump sum, members have the option of converting the benefit to a monthly pension annuity. The plan does not provide for automatic pension increases.

Post-employment medical benefits and other employee benefits

Group companies, principally in AMS, maintain medical benefit plans, classified as defined benefit plans under IAS 19, which cover eligible retired employees. The obligations for other employee benefits consist mainly of end of service indemnities, which do not have the character of pensions.

Risks related to defined benefit plans

The main risks to which the Group is exposed in relation to operating defined benefit plans are:

- mortality risk: the assumptions adopted by the Group make allowance for future improvements in life expectancy. However, if life expectancy improves at a faster rate than assumed, this would result in greater payments from the plans and consequently increases in the plans' liabilities. In order to minimise this risk, mortality assumptions are reviewed on a regular basis.
- market and liquidity risks: these are the risks that the investments do not meet the expected returns over the medium to long-term. This also encompasses the mismatch between assets and liabilities. In order to minimise the risks, the structure of the portfolios is reviewed and asset-liability matching analyses are performed on a regular basis.

Plan amendments and restructuring events

Plans within the Group are regularly reviewed as to whether they are aligned with market practice in the local context. Should a review indicate that a plan needs to be changed, prior agreement with the local Board of Trustees or the General Assembly, the regulator and, if applicable, the members, is sought before implementing plan changes.

10. Employee benefits

During the year, there were minor plan amendments and restructuring events which have been recognised as past service costs and curtailments.

Asset-liability management and funding arrangement

Plan trustees or General Assemblies are responsible for determining the mix of asset classes and target allocations of the Nestlé's plans with the support of investment advisors. Periodical reviews of the asset mix are made by mandating external consultants to perform asset liability matching analyses. Such analyses aim at comparing dynamically the fair value of assets and the liabilities in order to determine the most adequate strategic asset allocation.

The overall investment policy and strategy for the Group's funded defined benefit plans is guided by the objective of achieving an investment return which, together with the contributions paid, is sufficient to maintain reasonable control over the various funding risks of the plans. As those risks evolve with the development of capital markets and asset management activities, the Group addresses the assessment and control process of the major investment pension risks. In order to protect the Group's defined benefit plans funding ratio and to mitigate the financial risks, protective measures on the investment strategies are in force. To the extent possible, the risks are shared equally amongst the different stakeholders.

The major categories of plan assets as a percentage of total plan assets of the Group's defined benefit plans are as follows:

	2015	2014
Equities	32%	32%
of which US equities	13%	13%
of which European equities	11%	10%
of which other equities	8%	9%
Debts	39%	38%
of which government debts	26%	26%
of which corporate debts	13%	12%
Real estate	10%	9%
Alternative investments	17%	18%
of which hedge funds	10%	10%
of which private equities	5%	6%
of which commodities	2%	2%
Cash/Deposits	2%	3%

Equity, government debts and commodities represent 60% (2014: 60%) of the plan assets. Almost all of them are quoted in an active market. Corporate debts, real estate, hedge funds and private equities represent 38% (2014: 37%) of the plan assets. Almost all of them are either not quoted or quoted in a market which is not active.

The plan assets of funded defined benefit plans include property occupied by affiliated companies with a fair value of CHF 24 million (2014: CHF 11 million). Furthermore, funded

10. Employee benefits

defined benefit plans are invested in Nestlé S.A. (or related) shares to the extent of CHF 43 million (2014: CHF 47 million). The Group's investment management principles allow such investment only when the position in Nestlé S.A. (or related) shares is passive, i.e. in line with the weighting in the underlying benchmark.

The Group expects to contribute CHF 703 million to its funded defined benefit plans in 2016.

10.2h Principal financial actuarial assumptions

The principal financial actuarial assumptions are presented by geographic area. Each item is a weighted average in relation to the relevant underlying component.

	EMEA	AMS	AOA	Total	EMEA	AMS	AOA	Total
Discount rates	2.1%	5.2%	4.5%	3.0%	2.2%	5.1%	4.4%	3.1%
Expected rates of salary increases	2.8%	2.8%	4.7%	3.0%	2.8%	2.9%	4.7%	3.0%
Expected rates of pension adjustments	1.4%	0.4%	1.8%	1.2%	1.4%	0.6%	1.9%	1.3%
Medical cost trend rates		6.1%		6.2%		5.7%		5.8%

10.2i Mortality tables and life expectancies by geographic area for Group's major defined benefit pension plans

Expressed in years

Country	Mortality table	2015		2014	
		Life expectancy at age 65 for a male member currently aged 65	Life expectancy at age 65 for a female member currently aged 65	2015	2014
EMENA					
Switzerland	LPP 2010	20.8	20.8	23.1	23.1
United Kingdom	S1NA	21.5	21.8	23.0	23.2
Germany	Heubeck Richttafeln 2005 G modifiziert	20.1	20.1	23.6	23.6
AMS					
USA	RP-2014	21.1	21.1	23.2	23.1

Life expectancy is reflected in the defined benefit obligations by using mortality tables of the country in which the plan is located. When those tables no longer reflect recent experience, they are adjusted by appropriate loadings.

10. Employee benefits

10.2j Sensitivity analyses on present value of defined benefit obligations by geographic area

The table below gives the present value of the defined benefit obligations when major assumptions are changed.

11. Equity compensation plans

Certain Group employees are eligible to receive long-term incentives in the form of equity compensation plans.

Equity compensation plans are settled either by remittance of Nestlé S.A. shares (accounted for as equity-settled share-based payment transactions) or by the payment of an equivalent amount in cash (accounted for as cash-settled share-based payment transactions).

Equity-settled share-based payment transactions are recognised in the income statement with a corresponding increase in equity over the vesting period. They are fair valued at grant date and measured using generally accepted pricing models. The cost of equity-settled share-based payment transactions is adjusted annually by the expectations of vesting, for the forfeitures of the participants' rights that no longer satisfy the plan conditions, as well as for early vesting.

Liabilities arising from cash-settled share-based payment transactions are recognised in the income statement over the vesting period. They are fair valued at each reporting date and measured using generally accepted pricing models. The cost of cash-settled share-based payment transactions is adjusted for the forfeitures of the participants' rights that no longer satisfy the plan conditions, as well as for early vesting.

Share-based payment cost recognised in the income statement

In millions of CHF

of which PSUP	(150)	(66)

The share-based payment costs are allocated to the appropriate headings of expenses by function in the income statement.

11. Equity compensation plans

Restricted Stock Unit Plan (RSUP)

Prior 2015, members of Group Management were awarded Restricted Stock Units (RSU) that entitled participants to receive freely disposable Nestlé S.A. shares (accounted for as equity-settled share-based payment transactions) or an equivalent amount in cash (accounted for as cash-settled share-based payment transactions) at the end of a three-year restriction period. In 2014, the grant was limited to members of the US affiliated companies.

Number of RSU in millions of units

	2015	2014
Outstanding at 1 January	6.9	9.9
Granted	—	0.5
Settled	(3.4)	(3.4)
Forfeited	(0.1)	(0.1)
Outstanding at 31 December	3.4	6.9
of which vested at 31 December	0.7	0.7
of which cash-settled at 31 December	1.2	2.0

The fair value of equity-settled RSU is determined on the basis of the market price of Nestlé S.A. shares at grant date, discounted at a risk-free interest rate and adjusted for the dividends that participants are not entitled to receive during the restricted period of three years. There were no equity-settled RSU granted in 2015 (2014: no equity-settled RSU granted).

For cash-settled outstanding RSU, the liability is re-measured at each reporting date based on subsequent changes in the market price of Nestlé S.A. shares. The average fair value of the cash-settled RSU outstanding at 31 December 2015 is CHF 71.87 (2014: CHF 70.74).

Performance Share Unit Plan (PSUP)

Members of the Executive Board and, as from 2014, members of Group Management are awarded Performance Share Units (PSU) that entitle participants to receive freely disposable Nestlé S.A. shares (accounted for as equity-settled share-based payment transactions) or an equivalent amount in cash (accounted for as cash-settled share-based payment transactions) at the end of a three-year restriction period. As from the 2015 PSU grant, shares received by members of the Executive Board are subject to an additional two-year blocking period.

Upon vesting, the number of shares delivered ranges from 0% to 200% of the initial grant and is determined by the degree by which the performance measures of the PSUP have been met. These measures are the relative Total Shareholder Return of the Nestlé S.A. share in relation to the STOXX Europe 600 Food & Beverage Net Return Index (as from 2014 the STOXX Global 1800 Food & Beverage Net Return Index); and the growth of the underlying earnings per share in constant currencies. Each of the two measures has equal weighting in determining the vesting level of the initial PSU award.

11. Equity compensation plans

Number of PSU in millions of units	2015	2014
Outstanding at 1 January	3.0	0.4
Granted	3.2	2.8
Settled	(0.3)	(0.2)
Forfeited	(0.1)	—
Outstanding at 31 December	5.8	3.0
of which vested at 31 December	—	—
of which cash-settled at 31 December	0.9	0.1

The fair value of the equity-settled PSU is determined using a valuation model which reflects the probability of overachievement or underachievement on the Total Shareholder Return measure, which is a market condition, and based on five-year historical data. The other inputs incorporated into the valuation model comprise the market price of Nestlé S.A. shares at grant date, discounted at a risk-free interest rate and adjusted for the dividends that participants are not entitled to receive during the restricted period of three years. The weighted average fair value of the equity-settled PSU granted in 2015 is CHF 71.03 (2014: CHF 63.70).

For cash-settled outstanding PSU, the liability is re-measured at each reporting date based on subsequent changes in the market price of Nestlé S.A. shares. The average fair value of the cash-settled PSU outstanding at 31 December 2015 is CHF 75.46 (2014: CHF 74.28).

12. Provisions and contingencies

Provisions

Provisions comprise liabilities of uncertain timing or amount that arise from restructuring plans, environmental, litigation and other risks. Provisions are recognised when there exists a legal or constructive obligation stemming from a past event and when the future cash outflows can be reliably estimated. Obligations arising from restructuring plans are recognised when detailed formal plans have been established and when there is a valid expectation that such plans will be carried out by either starting to implement them or announcing their main features. Obligations under litigation reflect Group Management's best estimate of the outcome based on the facts known at the balance sheet date.

Contingent assets and liabilities

Contingent assets and liabilities are possible rights and obligations that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not fully within the control of the Group.

of which expected to be settled within 12 months					564

(a) Including discounting of provisions.

Restructuring

Restructuring provisions arise from a number of projects across the Group. These include plans to optimise production, sales and administration structures, mainly in EMENA. Restructuring provisions are expected to result in future cash outflows when implementing the plans (usually over the following two to three years).

Litigation

Litigation provisions have been set up to cover tax, legal and administrative proceedings that arise in the ordinary course of the business. These provisions cover numerous separate cases whose detailed disclosure could be detrimental to the Group interests. The Group does not believe that any of these litigation proceedings will have a material adverse impact on its financial position. The timing of outflows is uncertain as it depends upon the outcome of the proceedings. In that instance, these provisions are not discounted because their present value would not represent meaningful information. Group Management does not believe it is possible to make assumptions on the evolution of the cases beyond the balance sheet date.

Other

Other provisions are mainly constituted by onerous contracts and various damage claims having occurred during the year but not covered by insurance companies. Onerous contracts result from unfavourable leases, breach of contracts or supply agreements above market prices in which the unavoidable costs of meeting the obligations under the contracts exceed the economic benefits expected to be received or for which no benefits are expected to be received.

12.2 Contingencies

The Group is exposed to contingent liabilities amounting to a maximum potential payment of CHF 1350 million (2014: CHF 2012 million) representing potential litigations of CHF 1322 million (2014: CHF 1914 million) and other items of CHF 28 million (2014: CHF 98 million). Potential litigations relate mainly to labour, civil and tax litigations in Latin America.

Contingent assets for litigation claims in favour of the Group amount to a maximum potential recoverable amount of CHF 149 million (2014: CHF 176 million).

13. Financial instruments

Financial assets

Financial assets are initially recognised at fair value plus directly attributable transaction costs. However when a financial asset at fair value to income statement is recognised, the transaction costs are expensed immediately. Subsequent remeasurement of financial assets is determined by their categorisation that is revisited at each reporting date.

In case of regular-way purchase or sale (purchase or sale under a contract whose terms require delivery within the time frame established by regulation or convention in the market place), the settlement date is used for both initial recognition and subsequent derecognition.

At each balance sheet date, the Group assesses whether its financial assets are to be impaired. Impairment losses are recognised in the income statement where there is objective evidence of impairment, such as where the issuer is in bankruptcy, default or other significant financial difficulty.

Financial assets are derecognised (in full or partly) when substantially all the Group's rights to cash flows from the respective assets have expired or have been transferred and the Group has neither exposure to substantially all the risks inherent in those assets nor entitlement to rewards from them.

Classes and categories of financial instruments

The Group classifies its financial instruments into the following categories: loans and receivables, financial assets designated at fair value through income statement, held-for-trading, available-for-sale assets and financial liabilities at amortised cost.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. This category includes the following classes of financial assets: loans; trade and other receivables; and cash at bank and in hand.

Subsequent to initial measurement, loans and receivables are carried at amortised cost using the effective interest rate method less appropriate allowances for doubtful receivables (see Note 7.2).

Financial assets designated at fair value through income statement

Certain investments are designated at fair value through the income statement because this reduces an accounting mismatch which would otherwise arise due to the remeasurement of certain liabilities using current market prices as inputs.

Held-for-trading assets and liabilities

Held-for-trading assets and liabilities are derivative financial instruments.

Subsequent to initial measurement, items classified as held-for-trading are carried at fair value and all their gains and losses, realised and unrealised, are recognised in the income statement unless they are part of a hedging relationship (refer to hedge accounting, see Note 13.2d).

Available-for-sale assets

Available-for-sale assets are those non-derivative financial assets that are either designated as such upon initial recognition or are not classified in any of the other categories of financial assets. This category includes the following classes of financial assets: bonds and bond funds, equities and equity funds, commercial paper, time deposits and other investments.

Subsequent to initial measurement, available-for-sale assets are stated at fair value with all unrealised gains or losses recognised against other comprehensive income until their disposal when such gains or losses are recognised in the income statement.

Interest and dividends from available-for-sale assets are recognised in the income statement.

Financial liabilities at amortised cost

Financial liabilities are initially recognised at the fair value of consideration received less directly attributable transaction costs.

Subsequent to initial measurement, financial liabilities are recognised at amortised cost. The difference between the initial carrying amount of the financial liabilities and their redemption value is recognised in the income statement over the contractual terms using the effective interest rate method. This category includes the following classes of financial liabilities: trade and other payables; commercial paper; bonds and other financial liabilities.

Financial liabilities at amortised cost are further classified as current and non-current depending whether these will fall due within 12 months after the balance sheet date or beyond.

Financial liabilities are derecognised (in full or partly) when either the Group is discharged from its obligation, they expire, are cancelled or replaced by a new liability with substantially modified terms.

(a) Carrying amount of these instruments is a reasonable approximation of their fair value. For bonds included in financial debt, see Note 13.1c.

(b) Liquid assets are composed of cash and cash equivalents and short-term investments.

(c) Include derivatives held in hedge relationships and those that are undesignated (categorised as held-for-trading), see Note 13.2d.

13.1b Fair value hierarchy of financial instruments

The Group determines the fair value of its financial instruments on the basis of the following hierarchy:

- i) The fair value of financial instruments quoted in active markets is based on their quoted closing price at the balance sheet date. Examples include exchange-traded commodity derivatives and other financial assets such as investments in equity and debt securities.
- ii) The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques using observable market data. Such valuation techniques include discounted cash flows, standard valuation models based on market parameters for interest rates, yield curves or foreign exchange rates, dealer quotes for similar instruments and use of comparable arm's length transactions. For example, the fair value of forward exchange contracts, currency swaps and interest rate swaps is determined by discounting estimated future cash flows using a risk-free interest rate.
- iii) The fair value of financial instruments that are measured on the basis of entity specific valuations using inputs that are not based on observable market data (unobservable inputs). When the fair value of unquoted instruments cannot be measured with sufficient reliability, the Group carries such instruments at cost less impairment, if applicable.

13. Financial instruments

Several bonds are hedged by currency and/or interest derivatives. The fair value of these derivatives is shown under derivative assets for CHF 78 million (2014: CHF 87 million) and under derivative liabilities for CHF 708 million (2014: CHF 359 million).

- (a) Subject to an interest rate and/or currency swap that creates a liability at floating rates in the currency of the issuer.
- (b) Subject to an interest rate and currency swap that creates a liability at fixed rates in the currency of the issuer.
- (c) This bond is composed of:
 - AUD 300 million subject to an interest rate and currency swap that creates a liability at fixed rates in the currency of the issuer; and
 - AUD 100 million subject to an interest rate and/or currency swap that creates a liability at floating rates in the currency of the issuer.
- (d) Subject to an interest rate swap.
- (e) Out of which EUR 375 million is subject to an interest rate swap.

13.2 Financial risks

In the course of its business, the Group is exposed to a number of financial risks: credit risk, liquidity risk, market risk (including foreign currency risk and interest rate risk, commodity price risk and equity price risk). This note presents the Group's objectives, policies and processes for managing its financial risk and capital.

Financial risk management is an integral part of the way the Group is managed. The Board of Directors determines the financial control principles as well as the principles of financial planning. The Chief Executive Officer organises, manages and monitors all financial risks, including asset and liability matters.

The Asset and Liability Management Committee (ALMC), chaired by the Chief Financial Officer, is the governing body for the establishment and subsequent execution of the Nestlé Group's Financial Asset and Liability Management Policy. It ensures implementation of strategies and achievement of objectives of the Group's financial asset and liabilities management, which are executed by the Centre Treasury, the Regional Treasury Centres and, in specific local circumstances, by the affiliated companies. The activities of the Centre Treasury and of the Regional Treasury Centres are supervised by an independent Middle Office, which verifies the compliance of the strategies proposed and/or operations executed within the approved guidelines and limits set by the ALMC. Approved Treasury Management Guidelines define and classify risks as well as determine, by category of transaction, specific approval, execution and monitoring procedures. In accordance with the aforementioned policies, the Group only enters into derivative transactions relating to assets, liabilities or anticipated future transactions.

13.2a Credit risk

Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. Credit risk arises on liquid assets, non-current financial assets, derivative assets, trade and other receivables.

The Group aims to minimise its financial credit risk through the application of risk management policies. Credit limits are set based on a counterparty value and a probability of default. The methodology used to set the list of counterparty limits includes Enterprise Value (EV), counterparty Credit Ratings (CR) and Credit Default Swaps (CDS). Evolution of counterparties is monitored regularly, taking into consideration EV, CR and CDS evolution. As a result of this review, changes on credit limits and risk allocation are carried out. The Group avoids the concentration of credit risk on its liquid assets by spreading them over several institutions and sectors.

Trade receivables are subject to credit limits, control and approval procedures in all the affiliated companies. Due to its large geographic base and number of customers, the Group is not exposed to material concentrations of credit risk on its trade receivables (see Note 7). Nevertheless, commercial counterparties are constantly monitored following the similar methodology used for financial counterparties.

The maximum exposure to credit risk resulting from financial activities, without considering netting agreements and without taking into account any collateral held or other credit enhancements, is equal to the carrying amount of the Group's financial assets.

Credit rating of financial assets

This includes liquid assets, non-current financial assets and derivative assets.

In millions of CHF

	2015	2014
Investment grade A– and above	7 719	11 895
Investment grade BBB+, BBB and BBB–	2 053	1 432
Non-investment grade (BB+ and below)	445	273
Not rated ^(a)	1 344	1 174
	11 561	14 774

(a) Mainly equity securities and other investments for which no credit rating is available.

The source of the credit ratings is Standard & Poor's; if not available, the Group uses other credit rating equivalents. The Group deals mainly with financial institutions located in Switzerland, the European Union and North America.

13.2b Liquidity risk

Liquidity risk management

Liquidity risk is the risk that a company may encounter difficulties in meeting its obligations associated with financial liabilities that are settled by delivering cash or other financial assets. Such risk may result from inadequate market depth or disruption or refinancing problems. The Group's objective is to manage this risk by limiting exposures in financial instruments that may be affected by liquidity problems and by maintaining sufficient back-up facilities. The Group does not expect any refinancing issues and in 2015 successfully extended the tenor of both its revolving credit facilities by one year:

- A new USD 4.9 billion and EUR 2.2 billion revolving credit facility with an initial maturity date of October 2016. The Group has the ability to convert the facility into a one year term loan.
- A USD 4.3 billion and EUR 1.8 billion revolving credit facility with a new maturity date of October 2020.

The facilities serve primarily as a backstop to the Group's short-term debt.

(b) The periods when the cash flow hedges affect the income statement do not differ significantly from the maturities disclosed above.

13.2c Market risk

The Group is exposed to risk from movements in foreign currency exchange rates, interest rates and market prices that affect its assets, liabilities and future transactions.

Foreign currency risk

The Group is exposed to foreign currency risk from transactions and translation.

Transactional exposures arise from transactions in foreign currency. They are managed within a prudent and systematic hedging policy in accordance with the Group's specific business needs through the use of currency forwards, futures, swaps and options.

Exchange differences recorded in the income statement represented a loss of CHF 156 million in 2015 (2014: loss of CHF 47 million). They are allocated to the appropriate headings of expenses by function.

Translation exposure arises from the consolidation of the financial statements of foreign operations in Swiss francs, which is, in principle, not hedged.

Value at Risk (VaR) based on historic data for a 250-day period and a confidence level of 95% results in a potential one-day loss for currency risk of less than CHF 10 million in 2015 and 2014.

The Group cannot predict the future movements in exchange rates, therefore the above VaR number neither represents actual losses nor considers the effects of favourable movements in underlying variables. Accordingly, the VaR number may only be considered indicative of future movements to the extent the historic market patterns repeat in the future.

Interest rate risk

The Group is exposed primarily to fluctuation in USD and EUR interest rates. Interest rate risk on financial debt is managed based on duration and interest management targets set by the ALMC through the use of fixed rate debt and interest rate swaps.

Taking into account the impact of interest derivatives, the proportion of financial debt subject to fixed interest rates for a period longer than one year represents 50% (2014: 54%).

Based on the structure of net debt at year end, an increase of interest rates of 100 basis points would cause an additional expense in Net financing cost of CHF 57 million (2014: CHF 39 million).

Price risk

Commodity price risk

Commodity price risk arises from transactions on the world commodity markets for securing the supplies of green coffee, cocoa beans and other commodities necessary for the manufacture of some of the Group's products.

The Group's objective is to minimise the impact of commodity price fluctuations and this exposure is hedged in accordance with the Nestlé Group policy on commodity price risk management. The regional Commodity Purchasing Competence Centres are responsible for managing commodity price risk on the basis of internal directives and centrally determined limits, generally through the use of exchange-traded commodity derivatives. The commodity price risk exposure of future purchases is managed using a combination of derivatives (mainly futures and options) and executory contracts. As a result of the short product business cycle of the Group, the majority of the anticipated future raw material transactions outstanding at the balance sheet date are expected to occur in the next year.

Equity price risk

The Group is exposed to equity price risk on investments. To manage the price risk arising from these investments, the Group diversifies its portfolios in accordance with the Guidelines set by the Board of Directors.

13.2d Derivative assets and liabilities and hedge accounting

Derivative financial instruments

The Group's derivatives mainly consist of currency forwards, futures, options and swaps; commodity futures and options; interest rate forwards, futures, options and swaps. Derivatives are mainly used to manage exposures to foreign exchange, interest rate and commodity price risk as described in section 13.2c Market risk.

Derivatives are initially recognised at fair value. They are subsequently remeasured at fair value on a regular basis and at each reporting date as a minimum, with all their gains and losses, realised and unrealised, recognised in the income statement unless they are in a qualifying hedging relationship.

Hedge accounting

The Group designates and documents certain derivatives and other financial assets or financial liabilities as hedging instruments against changes in fair values of recognised assets and liabilities (fair value hedges), highly probable forecast transactions (cash flow hedges) and hedges of net investments in foreign operations (net investment hedges). The effectiveness of such hedges is assessed at inception and verified at regular intervals and at least on a quarterly basis, using prospective and retrospective testing.

Fair value hedges

The Group uses fair value hedges to mitigate foreign currency and interest rate risks of its recognised assets and liabilities.

Changes in fair values of hedging instruments designated as fair value hedges and the adjustments for the risks being hedged in the carrying amounts of the underlying transactions are recognised in the income statement.

Cash flow hedges

The Group uses cash flow hedges to mitigate a particular risk associated with a recognised asset or liability or highly probable forecast transactions, such as anticipated future export sales, purchases of equipment and raw materials, as well as the variability of expected interest payments and receipts.

The effective part of the changes in fair value of hedging instruments is recognised in other comprehensive income, while any ineffective part is recognised immediately in the income statement. When the hedged item results in the recognition of a non-financial asset or liability, including acquired businesses, the gains or losses previously recognised in other comprehensive income are included in the measurement of the cost of the asset or of the liability. Otherwise the gains or losses previously recognised in other comprehensive income are removed and recognised in the income statement at the same time as the hedged transaction.

Net investment hedges

The Group uses net investment hedges to mitigate translation exposure on its net investments in affiliated companies.

The changes in fair values of hedging instruments are taken directly to other comprehensive income together with gains or losses on the foreign currency translation of the hedged investments. All of these fair value gains or losses are deferred in equity until the investments are disposed of.

Undesignated derivatives

Derivatives which are not designated in a hedging relationship are classified as undesignated derivatives. They are acquired in the frame of approved risk management policies even though hedge accounting is not applied.

	2015	2014
on hedged items	(189)	(107)
on hedging instruments	185	107

Ineffective portion of gains/(losses) of cash flow hedges and net investment hedges is not significant.

13.2e Capital risk management

The Group's capital management is driven by the impact on shareholders of the level of total capital employed. It is the Group's policy to maintain a sound capital base to support the continued development of its business.

The Board of Directors seeks to maintain a prudent balance between different components of the Group's capital. The ALMC monitors the capital structure and the net financial debt by currency. Net financial debt is defined as current and non-current financial liabilities less cash and cash equivalents and short-term investments.

The operating cash flow-to-net financial debt ratio highlights the ability of a business to repay its debts. As at 31 December 2015, the ratio was 92.7% (2014: 119.3%).

The Group's subsidiaries have complied with local statutory capital requirements as appropriate.

14. Taxes

The Group is subject to taxes in different countries all over the world. Taxes and fiscal risks recognised in the Consolidated Financial Statements reflect Group Management's best estimate of the outcome based on the facts known at the balance sheet date in each individual country. These facts may include but are not limited to change in tax laws and interpretation thereof in the various jurisdictions where the Group operates. They may have an impact on the income tax as well as the resulting assets and liabilities. Any differences between tax estimates and final tax assessments are charged to the income statement in the period in which they are incurred, unless anticipated.

Taxes include current and deferred taxes on profit as well as actual or potential withholding taxes on current and expected transfers of income from Group companies and tax adjustments relating to prior years. Income tax is recognised in the income statement, except to the extent that it relates to items directly taken to equity or other comprehensive income, in which case it is recognised against equity or other comprehensive income.

Deferred taxes are based on the temporary differences that arise when taxation authorities recognise and measure assets and liabilities with rules that differ from the principles of the Consolidated Financial Statements. They also arise on temporary differences stemming from tax losses carried forward.

Deferred taxes are calculated under the liability method at the rates of tax expected to prevail when the temporary differences reverse subject to such rates being substantially enacted at the balance sheet date. Any changes of the tax rates are recognised in the income statement unless related to items directly recognised against equity or other comprehensive income. Deferred tax liabilities are recognised on all taxable temporary differences excluding non-deductible goodwill. Deferred tax assets are recognised on all deductible temporary differences provided that it is probable that future taxable income will be available.

14. Taxes

14.1 Taxes recognised in the income statement

In millions of CHF

	2015	2014
Components of taxes		
Current taxes ^(a)	(3 156)	(3 148)
Deferred taxes	93	132
Taxes reclassified to other comprehensive income	(245)	(357)
Taxes reclassified to equity	3	6

Reconciliation of taxes		
Expected tax expense at weighted average applicable tax rate	(2 848)	(2 245)
Tax effect of non-deductible or non-taxable items	(135)	(527)
Prior years' taxes	250	92
Transfers to unrecognised deferred tax assets	(71)	(136)
Transfers from unrecognised deferred tax assets	27	12
Changes in tax rates	(10)	9
Withholding taxes levied on transfers of income	(304)	(357)
Other	(214)	(215)
Total taxes	(3 305)	(3 367)

(a) Current taxes related to prior years represent a tax income of CHF 118 million (2014: tax income of CHF 133 million).

The expected tax expense at weighted average applicable tax rate is the result from applying the domestic statutory tax rates to profits before taxes of each entity in the country it operates. For the Group, the weighted average applicable tax rate varies from one year to the other depending on the relative weight of the profit of each individual entity in the Group's profit as well as the changes in the statutory tax rates.

Net assets/(liabilities)	(1 420)	(1 133)

14.4 Unrecognised deferred taxes

The deductible temporary differences as well as the unused tax losses and tax credits for which no deferred tax assets are recognised expire as follows:

In millions of CHF

	2015	2014
Within one year	23	35
Between one and five years	434	331
More than five years	2 272	2 375
	2 729	2 741

At 31 December 2015, the unrecognised deferred tax assets amount to CHF 587 million (2014: CHF 629 million). In addition, the Group has not recognised deferred tax liabilities in respect of unremitted earnings that are considered indefinitely reinvested in foreign subsidiaries. At 31 December 2015, these earnings amount to CHF 18.0 billion (2014: CHF 20.0 billion). They could be subject to withholding and other taxes on remittance.

15. Associates and joint ventures

Associates are companies where the Group has the power to exercise a significant influence but does not exercise control. Significant influence may be obtained when the Group has 20% or more of the voting rights in the investee or has obtained a seat on the board of directors or otherwise participates in the policy-making process of the investee.

Joint ventures are contractual arrangements over which the Group exercises joint control with partners and where the parties have rights to the net assets of the arrangement.

Associates and joint ventures are accounted for using the equity method. The net assets and results are adjusted to comply with the Group's accounting policies. The carrying amount of goodwill arising from the acquisition of associates and joint ventures is included in the carrying amount of investments in associates and joint ventures.

(c) Includes a cumulative currency translation loss of CHF 56 million that has been recycled to the income statement.

15.1 L'Oréal

The Group holds 129 881 021 shares in L'Oréal, the world leader in cosmetics, representing a 23.2% participation in its equity after elimination of its treasury shares (2014: 129 881 021 shares representing a 23.4% participation).

On 8 July 2014, the Group sold 48 500 000 shares to L'Oréal for CHF 7342 million for cancellation. As a result, the participation in its equity after elimination of its treasury shares was reduced from 29.7% to 23.5%.

At 31 December 2015, the market value of the shares held amounts to CHF 21.8 billion (2014: CHF 21.8 billion).

18. Equity

18.1 Share capital issued

The share capital changed in 2015 as a consequence of the Share Buy-Back programme launched in 2014. The cancellation of shares was approved at the Annual General Meeting on 16 April 2015. The share capital was reduced by 36 400 000 shares from CHF 322 million to CHF 319 million.

As of 31 December 2015, the ordinary share capital of Nestlé S.A. authorised, issued and fully paid is composed of 3 188 400 000 registered shares with a nominal value of CHF 0.10 each. Each share confers the right to one vote. No shareholder may be registered with the right to vote for shares which it holds, directly or indirectly, in excess of 5% of the share capital. Shareholders have the right to receive dividends.

18.2 Conditional share capital

The conditional capital of Nestlé S.A. amounts to CHF 10 million as in the preceding year. It confers the right to increase the ordinary share capital, through the exercise of conversion or option rights in connection with debentures and other financial market instruments, by a maximum of CHF 10 million by the issue of a maximum of 100 000 000 registered shares with a nominal value of CHF 0.10 each. Thus the Board of Directors has at its disposal a flexible instrument enabling it, if necessary, to finance the activities of the Company through convertible debentures.

18.3 Treasury shares

Number of shares in millions of units

Purpose of holding	2015	2014
Trading	18.1	18.1
Share Buy-Back Programme	76.2	23.7
Long-Term Incentive Plans	9.6	14.6
	103.9	56.4

At 31 December 2015, the treasury shares held by the Group represent 3.3% of the share capital (2014: 1.7%). Their market value amounts to CHF 7748 million (2014: CHF 4113 million).

18.4 Number of shares outstanding

Treasury shares cancelled	(36.4)	36.4	—
At 31 December 2015	3 188.4	(103.9)	3 084.5

18.5 Translation reserve

The translation reserve comprises the cumulative gains and losses arising from translating the financial statements of foreign operations that use functional currencies other than Swiss Francs. It also includes the changes in the fair value of hedging instruments used for net investments in foreign operations.

18.6 Retained earnings and other reserves

Retained earnings represent the cumulative profits as well as remeasurement of defined benefit plans attributable to shareholders of the parent. Other reserves comprise the fair value reserve and the hedging reserve attributable to shareholders of the parent.

The fair value reserve includes the gains and losses on remeasuring available-for-sale financial instruments. At 31 December 2015, the reserve is CHF 36 million positive (2014: CHF 250 million positive).

The hedging reserve consists of the effective portion of the gains and losses on hedging instruments related to hedged transactions that have not yet occurred.

At 31 December 2015, the reserve is CHF 38 million negative (2014: CHF 108 million negative).

18.7 Non-controlling interests

The non-controlling interests comprise the portion of equity of subsidiaries that are not owned, directly or indirectly, by Nestlé S.A. These non-controlling interests are individually not material for the Group.

Acquisitions and disposals of non-controlling interests

The Group treats transactions with non-controlling interests that do not result in loss of control as transactions with equity holders in their capacity as equity holders. For purchases of shares from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying amount of net assets of the subsidiary is recorded in equity. The same principle is applied to disposals of shares to non-controlling interests.

18.8 Other comprehensive income

In millions of CHF

	Translation reserve	Retained earnings and other reserves	Total attributable to shareholders of the parent	Non-controlling interests	Total

Other comprehensive income for the year	3 556	(1 764)	1 792	108	1 900

18.9 Dividend

In accordance with Swiss law and the Company's Articles of Association, dividend is treated as an appropriation of profit in the year in which it is ratified at the Annual General Meeting and subsequently paid.

The dividend related to 2014 was paid on 22 April 2015 in accordance with the decision taken at the Annual General Meeting on 16 April 2015. Shareholders approved the proposed dividend of CHF 2.20 per share, resulting in a total dividend of CHF 6950 million.

Dividend payable is not accounted for until it has been ratified at the Annual General Meeting. At the meeting on 7 April 2016, a dividend of CHF 2.25 per share will be proposed, resulting in a total dividend of CHF 7002 million. For further details, refer to the Financial Statements of Nestlé S.A.

The Financial Statements for the year ended 31 December 2015 do not reflect this proposed distribution, which will be treated as an appropriation of profit in the year ending 31 December 2016.

19. Lease commitments

Leasing agreements which transfer to the Group substantially all the rewards and risks of ownership of an asset are treated as finance leases. All other leases are classified as operating leases.

Assets acquired under finance leases are capitalised and depreciated in accordance with the Group's policy on property, plant and equipment unless the lease term is shorter. The associated finance lease obligations are included under financial debt and the finance charge is presented as part of net financing cost.

Rentals under operating leases are charged to the income statement on a straight-line basis over the period of the lease.

19.1 Operating leases

In millions of CHF

	2015	2014
Minimum lease payments (Future value)		
Within one year	595	633
In the second year	476	530
In the third to the fifth year	905	1 044
After the fifth year	577	584
	2 553	2 791

Lease commitments relate mainly to buildings, industrial equipment, vehicles and IT equipment. The operating lease charge for the year 2015 amounts to CHF 679 million (2014: CHF 692 million).

19.2 Finance leases

In millions of CHF

Minimum lease payments	2015		2014	
	Present value	Future value	Present value	Future value
Within one year	42	44	46	48
In the second year	38	42	44	50
In the third to the fifth year	65	82	91	116
After the fifth year	33	54	54	92
	178	222	235	306

The difference between the future value of the minimum lease payments and their present value represents the discount on the lease obligations.

20. Transactions with related parties

20.1 Compensation of the Board of Directors and the Executive Board

Board of Directors

Members of the Board of Directors receive an annual compensation that varies with the Board and the Committee responsibilities as follows:

- Board members: CHF 280 000;
- members of the Chairman's and Corporate Governance Committee: additional CHF 200 000 (Chair CHF 300 000);
- members of the Compensation Committee: additional CHF 70 000 (Chair CHF 150 000);
- members of the Nomination Committee: additional CHF 40 000 (Chair CHF 100 000); and
- members of the Audit Committee: additional CHF 100 000 (Chair CHF 150 000).

The Chairman and the CEO Committee fees are included in their total compensation.

Half of the compensation is paid through the granting of Nestlé S.A. shares at the ex-dividend closing price. These shares are subject to a three-year blocking period.

With the exception of the Chairman and the CEO, members of the Board of Directors also receive an annual expense allowance of CHF 15 000 each. This allowance covers travel and hotel accommodation in Switzerland, as well as sundry out-of-pocket expenses. For Board members from outside Europe, the Company reimburses additionally their airline tickets. When the Board meets outside of Switzerland, all expenses are borne and paid directly by the Company.

The Chairman is entitled to a cash compensation, as well as Nestlé S.A. shares which are blocked for three years.

Executive Board

The total annual remuneration of the members of the Executive Board comprises a salary, a bonus (based on the individual's performance and the achievement of the Group's objectives), equity compensation and other benefits. Members of the Executive Board can choose to receive part or all of their bonus in Nestlé S.A. shares at the average closing price of the last ten trading days of January of the year of the payment of the bonus. These shares are subject to a three-year blocking period.

In millions of CHF

Pension	6	6

(a) For the detailed disclosures regarding the remunerations of the Board of Directors and the Executive Board that are required by Swiss law, refer to the Compensation report of Nestlé S.A. with the audited sections highlighted with a blue bar.

(b) Equity compensation plans are equity-settled share-based payment transactions whose cost is recognised over the vesting period as required by IFRS 2.

20.2 Transactions with associates and joint ventures

There are no significant transactions between the Group companies and associates.

The main transactions with joint ventures are loans granted by the Group whose outstanding balances as at 31 December 2015 amount to CHF 240 million (2014: CHF 247 million) and dividends and interest received which represent an amount of CHF 57 million (2014: CHF 115 million).

20.3 Other transactions

Nestlé Capital Advisers S.A. (NCA), one of the Group's subsidiaries, is an unregulated investment and actuarial adviser, based in Switzerland. Further to actuarial advice, NCA renders investment consulting services to some of the Group's pension funds, either directly or indirectly via the Robusta mutual fund umbrella, but NCA never executes trading and investment transactions. The fees received by NCA in 2015 for those activities amounted to CHF 12 million (2014: CHF 15 million).

Nestlé Capital Management Ltd (NCM), a 100% subsidiary of NCA, is an asset manager authorised and regulated by the Financial Conduct Authority, in the United Kingdom. NCM manages some of the assets of the Group's pension funds. In this function, NCM executes trading and investment transactions on behalf of these pension funds directly or for the Robusta mutual funds pension investment vehicles. The fees received by NCM in 2015 for those activities amounted to CHF 18 million (2014: CHF 21 million). The assets under direct management represented an amount of CHF 10.8 billion at 31 December 2015 (2014: CHF 11.4 billion).

In addition, Robusta Asset Management Ltd (RAML), a 100% subsidiary of NCA, is in charge of selecting and monitoring investment managers for the Robusta mutual funds pension investment vehicles. RAML has delegated most of its activities to third-parties, including NCA and hence no fee income is generated by RAML. Any remaining expenses are covered by means of fees deducted from its assets under management. The assets under supervision of RAML amounted to CHF 9.7 billion at 31 December 2015 (2014: CHF 10.4 billion). Of this amount CHF 6.7 billion (2014: CHF 7.4 billion) of assets are under direct management of NCM.

Furthermore, throughout 2015, no director of the Group had a personal interest in any transaction of significance for the business of the Group.

21. Guarantees

At 31 December 2015, the Group has given guarantees to third parties for an amount of CHF 945 million (2014: CHF 603 million). The most significant balance relates to the Nestlé UK pension fund (a related party).

22. Group exposure in Venezuela

Venezuela is a hyperinflationary economy where the government has established multiple foreign exchange rate systems, and strict exchange controls have been in place for many years. These systems have different exchange rates and are available for a relatively limited amount of currency.

All of the Group's foreign currency denominated transactions and balances of operations in Venezuela are translated into the local functional currency (VEF) at the rate they are expected to be settled, using the most appropriate official rate available.

For consolidation purposes only, the Group converts its Venezuelan operations using the Group's best estimate of the rate which would have been applicable to capital and dividend repatriations if they could have been made at the balance sheet date. This rate is reviewed periodically depending on the economic and regulatory developments in the country.

The Group applies hyperinflation accounting in Venezuela. As a result, the Group recognised during the period a re-measurement loss of CHF 75 million in the income statement (2014: loss of CHF 606 million), within Other operating expenses.

As at 31 December 2015, the remaining carrying amount of cash and cash equivalents exposed to a loss through income statement due to decline of purchasing power amounts to CHF 12 million (2014: CHF 51 million).

The Group will continue to monitor the situation closely in Venezuela and adjust its accounting treatment accordingly.

23. Events after the balance sheet date

The values of assets and liabilities at the balance sheet date are adjusted if there is evidence that subsequent adjusting events warrant a modification of these values. These adjustments are made up to the date of approval of the Consolidated Financial Statements by the Board of Directors.

At 17 February 2016, the date of approval for issue of the Consolidated Financial Statements by the Board of Directors, the Group has no subsequent events which either warrant a modification of the value of its assets and liabilities or any additional disclosure.

Report of the Statutory Auditor on the Consolidated Financial Statements

to the General Meeting of Nestlé S.A., Cham & Vevey

As statutory auditor, we have audited the consolidated financial statements (income statement, statement of comprehensive income, balance sheet, cash flow statement, statement of changes in equity and notes on pages 60 to 134) of Nestlé S.A. for the year ended 31 December 2015.

Board of Directors' responsibility

The Board of Directors is responsible for the preparation of the consolidated financial statements in accordance with International Financial Reporting Standards (IFRS) and the requirements of Swiss law. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error. The Board of Directors is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards as well as International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements for the year ended 31 December 2015 give a true and fair view of the financial position, the results of operations and the cash flows in accordance with International Financial Reporting Standards (IFRS) and comply with Swiss law.

Report on other legal requirements

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) and independence (article 728 CO and article 11 AOA) and that there are no circumstances incompatible with our independence.

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists, which has been designed for the preparation of consolidated financial statements according to the instructions of the Board of Directors.

We recommend that the consolidated financial statements submitted to you be approved.

- (a) 2011 restated following the changes in the cash flow statement described in Note 1 – Accounting policies (refer to Note 1 – Accounting Policies of the 2012 Consolidated Financial Statements).
- (b) Refer to Note 17.6 for definition. As from 2012, movements with non-controlling interests are no longer deducted. 2011 comparatives have been restated accordingly.
- (c) Profit per share for the year attributable to shareholders of the parent before impairments, restructuring costs, results on disposals and significant one-off items. The tax impact from the adjusted items is also adjusted for.
- (d) Calculated on the basis of the dividend for the year concerned, which is paid in the following year, and on high/low stock prices.

(e) As proposed by the Board of Directors of Nestlé S.A.

(f) 2012 restated following the implementation of IFRS 11 and IAS 19 revised, and adjusted following the final valuation of the Wyeth Nutrition acquisition (refer to Note 1 – Accounting Policies and Note 2 – Acquisitions and disposals of businesses of the 2012 Consolidated Financial Statements).

Companies of the Nestlé Group, joint arrangements and associates

In the context of the SIX Swiss Exchange Directive on Information relating to Corporate Governance, the disclosure criteria of the principal affiliated companies are as follows:

- operating companies are disclosed if their sales exceed CHF 10 million or equivalent;
- financial companies are disclosed if either their equity exceeds CHF 10 million or equivalent and/or the total balance sheet is higher than CHF 50 million or equivalent.

Entities directly held by Nestlé S.A. that are below the disclosure criteria are listed with a °.

Swiss based joint arrangements that are below the disclosure criteria are listed with a *.

All companies listed below are fully consolidated except for:

- 1) Joint ventures accounted for using the equity method;
- 2) Joint operations accounted for in proportion to the Nestlé contractual specified share (usually 50%);
- 3) Associates accounted for using the equity method.

Countries within the continents are listed according to the alphabetical order of the country names.

Percentage of capital shareholding corresponds to voting powers unless stated otherwise.

(a) 2014 comparative figures have been presented according to the new structure; refer to Note 1.

Notes to the annual accounts

1. Accounting policies

General

Nestlé S.A. (the Company) is the ultimate holding company of the Nestlé Group, domiciled in Cham and Vevey which comprises subsidiaries, associated companies and joint ventures throughout the world.

The accounts are prepared in accordance with accounting principles required by Swiss law (32nd title of the Swiss Code of Obligations). They are prepared under the historical cost convention and on an accrual basis. Where not prescribed by law, the significant accounting and valuation principles applied are described below.

First adoption of new accounting law

The financial statements for the year ended 31 December 2015 have been prepared in accordance with the new provisions of the Swiss law regarding accounting and financial reporting. To ensure the comparability of information, the comparative figures have been restated accordingly. The positions concerned by this restatement are identified by an ^(a).

The following positions are concerned:

- Expenses recharged from Group Companies are now disclosed on a separate line of the income statement.
- Administration and other expenses are now divided into two separate lines, personnel expenses and other expenses.
- The financial assets are now divided into two separate lines, financial assets and shareholdings.
- Short-term payables are now divided into interest-bearing liabilities and other current liabilities.
- Provisions have been split into current and non-current provisions.
- Treasury shares are now disclosed in deduction of the shareholders' equity. The reserve for treasury shares is therefore reclassified except for the shares owned by another Group company.

Foreign currency translation

Transactions in foreign currencies are recorded at the rate of exchange at the date of the transaction or, if hedged forward, at the rate of exchange under the related forward contract. Non-monetary assets and liabilities are carried at historical rates. Monetary assets and liabilities in foreign currencies are translated at year-end rates. Any resulting exchange differences are included in the respective income statement captions depending upon the nature of the underlying transactions. The aggregate unrealised exchange difference is calculated by reference to original transaction date

exchange rates and includes hedging transactions. Where this gives rise to a net loss, it is charged to the income statement whilst a net gain is deferred.

Hedging

The Company uses forward foreign exchange contracts, options, financial futures and currency swaps to hedge foreign currency flows and positions. Unrealised foreign exchange differences on hedging instruments are matched and accounted for with those on the underlying asset or liability. Long-term loans, in foreign currencies, used to finance investments in shareholdings are generally not hedged.

The Company also uses interest rate swaps to manage interest rate risk. The swaps are accounted for at fair value at each balance sheet date and changes in the market price are recorded in the income statement.

Income statement

Not currently transferable income is recognised only upon receipt.

In accordance with Swiss law and the Company's Articles of Association, dividends are treated as an appropriation of profit in the year in which they are ratified at the Annual General Meeting rather than as an appropriation of profit in the year to which they relate.

Taxes

This caption includes taxes on profit, capital and withholding taxes on transfers from Group companies.

Shareholdings and financial assets

The carrying value of shareholdings and loans comprises the cost of investment, excluding the incidental costs of acquisition, less any write-downs.

Shareholdings located in countries where the political, economic or monetary situation might be considered to carry a greater than normal level of risk are carried at a nominal value of one franc.

Shareholdings and loans are written down on a conservative basis, taking into account the profitability of the company concerned.

Property, plant and equipment

The Company owns land and buildings which have been depreciated in the past. Office furniture and equipment are fully depreciated on acquisition.

1. Accounting policies

Intangible assets

Trademarks and other industrial property rights are written off on acquisition or exceptionally over a longer period, not exceeding their useful lives.

Provisions

Provisions include present obligations as well as contingencies. A provision for uninsured risks is constituted to cover general risks not insured with third parties, such as consequential loss. Provisions for Swiss taxes are made on the basis of the Company's taxable capital, reserves and profit for the year. A general provision is maintained to cover possible foreign tax liabilities.

Prepayments and accrued income

Prepayments and accrued income are comprised of payments made in advance relating to the following year, and income relating to the current year which will not be received until after the balance sheet date (such as interest accruals on loans or deposits). The positive fair values of forward exchange contracts and interest rate swaps are also included in this caption.

Accruals and deferred income

Accruals and deferred income comprise expenses relating to the current year which will not be paid until after the balance sheet date and income received in advance, relating to the following year. The negative fair values of forward exchange contracts and interest rate swaps are also included in this caption.

2. Income from Group companies

This represents dividends and other income from Group companies.

3. Profit on disposal of assets

This represents mainly the net gains realised on the sale of financial assets, trademarks and other industrial property rights previously written down. In 2014, the net gain of CHF 7181 million on the sale of L'Oréal shares is included.

4. Financial income

Number of registered shares of nominal value CHF 0.10 each	3 188 400 000	3 224 800 000
In millions of CHF	319	322

According to article 5 of the Company's Articles of Association, no person or entity shall be registered with voting rights for more than 5% of the share capital as recorded in the commercial register. This limitation on registration also applies to persons who hold some or all of their shares through nominees pursuant to this article. In addition, article 11 provides that no person may exercise, directly or indirectly, voting rights, with respect to own shares or shares represented by proxy, in excess of 5% of the share capital as recorded in the commercial register.

At 31 December 2015, the share register showed 157 422 registered shareholders. If unprocessed applications for registration, the indirect holders of shares under American Depository Receipts and the beneficial owners of shareholders registered as nominees are also taken into account, the total number of shareholders probably exceeds 250 000. The Company was not aware of any shareholder holding, directly or indirectly, 5% or more of the share capital.

17. Changes in equity

(a) Refer to Note 18.

18. Reserve for treasury shares

At 31 December 2014, the reserve for own shares amounting to CHF 988 million represented the cost of 18 038 445 shares held for trading purposes. These shares were held by another Group company. At 31 December 2015, no shares were held by another Group company.

19. Treasury shares

In millions of CHF

		2015		2014
	Number	Amount	Number	Amount
Share Buy-Back Programme	76 240 000	5 489	23 742 030	1 645
Long-term incentive plans	9 655 655	542	14 596 288	842
For trading purposes	18 038 445	1 319	—	—
	103 934 100	7 350	38 338 318	2 487

The share capital has been reduced by 36 400 000 shares from CHF 322 million to CHF 319 million through the cancellation of shares purchased as part of the Share Buy-Back Programme. The purchase value of those cancelled shares amounts to CHF 2512 million.

During the year 88 897 970 shares were purchased as part of the Share Buy-Back Programme for CHF 6355 million.

The Company held 9 655 655 shares to cover long-term incentive plans. During the year 4 940 633 shares were delivered as part of the Nestlé Group remuneration plans for a total value of CHF 276 million. All treasury shares are valued at acquisition cost.

The total of own shares of 103 934 100 held by Nestlé S.A. at 31 December 2015 represents 3.3% of the Nestlé S.A. share capital (56 376 763 own shares held at 31 December 2014 by Group companies representing 1.7% of the Nestlé S.A. share capital).

20. Contingencies

At 31 December 2015, the total of the guarantees mainly for credit facilities granted to Group companies and commercial paper programmes, together with the buy-back agreements relating to notes issued, amounted to a maximum of CHF 41 057 million (2014: CHF 41 831 million).

21. Performance Share Units and shares for members of the Board and employees granted during the year

In millions of CHF

		2015		2014
	Number	Amount	Number	Amount
Performance Share Units granted to Nestlé S.A. employees ^(a)	291 688	21	311 495	20

Share plan for Board members ^(c)	97 504	6	118 524	7
	513 551	34	555 298	34

(a) Performance Share Units are disclosed at fair value at grant which corresponds to CHF 71.03 in 2015 (2014: CHF 63.70). Includes 216 708 Performance Share Units granted to Executive Board (2014: 215 125).

(b) Shares are valued at the average closing price of the last ten trading days of January, discounted by 16.038% to account for the blocking period of three years.

(c) Shares are valued at the closing price on the ex-dividend date, discounted by 16.038% to account for the blocking period of three years.

22. Full-time equivalents

For Nestlé S.A., the annual average number of full-time equivalents for the reporting year, as well as the previous year, did not exceed 250.

23. Events after the balance sheet date

There are no subsequent events which either warrant a modification of the value of the assets and liabilities or any additional disclosure.

24. Shares and stock options

Shares and stock options ownership of the non-executive members of the Board of Directors and closely related parties

(a) Including shares subject to a three-year blocking period.

(b) The ratio is one option for one Nestlé S.A. share.

For the detailed disclosures regarding the remunerations of the Board of Directors and the Executive Board that are required by Swiss law, refer to the Compensation report of Nestlé S.A. with the audited sections highlighted with a blue bar.

Proposed appropriation of profit

In CHF

	2015	2014
Retained earnings		
Profit brought forward	4 997 707 777	536 179 231
Profit for the year	7 825 389 939	11 500 096 775
	12 823 097 716	12 036 276 006
 We propose the following appropriation:		
Dividend for 2015, CHF 2.25 per share on 3 112 160 000 shares ^(a) (2014: CHF 2.20 on 3 199 349 195 shares) ^(b)	7 002 360 000	7 038 568 229
	7 002 360 000	7 038 568 229
 Profit to be carried forward	5 820 737 716	4 997 707 777

- (a) Depending on the number of shares issued as of the last trading day with entitlement to receive the dividend (8 April 2016). No dividend is paid on own shares held by the Nestlé Group. The respective amount will be attributed to the special reserve.
- (b) The amount of CHF 88 947 650, representing the dividend on 40 430 750 own shares held at the date of the dividend payment, has been transferred to the special reserve.

Provided that the proposal of the Board of Directors is approved by the Annual General Meeting, the gross dividend will amount to CHF 2.25 per share, representing a net amount of CHF 1.4625 per share after payment of the Swiss withholding tax of 35%. The last trading day with entitlement to receive the dividend is 8 April 2016. The shares will be traded ex-dividend as of 11 April 2016. The net dividend will be payable as from 13 April 2016.

The Board of Directors

Cham and Vevey, 17 February 2016

Report of the Statutory Auditor

to the General Meeting of Nestlé S.A., Cham & Vevey

As statutory auditor, we have audited the financial statements (income statement, balance sheet and notes to the annual accounts on pages 161 to 172) of Nestlé S.A. for the year ended 31 December 2015.

Board of Directors' responsibility

The Board of Directors is responsible for the preparation of the financial statements in accordance with the requirements of Swiss law and the Company's Articles of Association. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The Board of Directors is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements for the year ended 31 December 2015 comply with Swiss law and the Company's Articles of Association.

Report on other legal requirements

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) and independence (article 728 CO and article 11 AOA) and that there are no circumstances incompatible with our independence.

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists, which has been designed for the preparation of financial statements according to the instructions of the Board of Directors.

We further confirm that the proposed appropriation of available earnings complies with Swiss law and the Company's Articles of Association. We recommend that the financial statements submitted to you be approved.
