

**ROCKFIRE RESOURCES PLC**

Copperhead porphyry copper deposit,  
Queensland, Australia.

Limit of soil  
survey, with a  
copper-in-soil  
anomaly up to  
5500 ppm Cu

Background colour  
shows magnetic  
readings in  
nanoteslas (nT)

Regional north-west faults

5 drill holes, all of which  
intersected visible copper  
to a maximum drilled  
depth of 300 m

Series of discrete,  
parallel, north-south  
faults

Unexplored  
new target  
area

6 kms
