

Offering Memorandum

ANZ Bank New Zealand Limited
(incorporated with limited liability in New Zealand)
as Issuer and Guarantor

ANZ New Zealand (Int'l) Limited
(incorporated with limited liability in New Zealand)
as Issuer

US\$10,000,000,000
Medium-Term Notes

Series A Notes
Due One Year or More from Date of Issue

ANZ Bank New Zealand Limited (“**ANZ New Zealand**”) and ANZ New Zealand (Int'l) Limited (“**ANZNIL**”) (each, an “**Issuer**” and, together, the “**Issuers**”), subject to compliance with all relevant laws, regulations and directives, may from time to time issue medium-term notes, due one year or more from the date of issue. Notes of ANZ New Zealand are referred to as “**ANZ NZ Notes**”, notes of ANZNIL are referred to as “**ANZNIL Notes**” and ANZ NZ Notes and ANZNIL Notes are collectively referred to as “**Notes**”. The payment of all amounts due in respect of any ANZNIL Notes will be unconditionally and irrevocably guaranteed by ANZ New Zealand (the “**Guarantee**”). Other than as set forth in the preceding sentence, the Notes are not guaranteed by any person, including our ultimate parent Australia and New Zealand Banking Group Limited.

The following terms may apply to the Notes:

- Mature one year or more from the date of issue;
- May be subject to redemption at the Issuer’s option or require repurchase at your option;
- A fixed interest rate, which may be zero if Notes are issued at a discount from the principal amount due at maturity, or a floating interest rate, or both fixed and floating rate;
- Floating interest rates may include:
 - Commercial Paper Rate
 - Treasury Rate
 - New Zealand Bank Bill Rate
 - Prime Rate
 - CMT Rate
 - Australian Bank Bill Rate
 - LIBOR
 - CD Rate
 - Eleventh District Cost of Funds Rate
 - EURIBOR
 - Federal Funds Rate
- Book-entry only form; and
- Minimum denomination of US\$200,000, and integral multiples of US\$1,000 (or the equivalent thereof in another currency or composite currency) in excess thereof.

The final terms of each Note will be specified in the relevant Final Terms (as defined herein). For more information, see “Description of the Notes and the Guarantee”.

Investing in the Notes involves risks. See “Risk Factors” beginning on page 22 of this Offering Memorandum.

Each initial and subsequent purchaser of the Notes offered hereby in making its purchase will be deemed to have made certain acknowledgements, representations and agreements intended to restrict the resale or other transfer of such Notes and may in certain circumstances be required to provide confirmation of compliance with such resale or other transfer restrictions below and as set forth in “Notice to Purchasers” and “Plan of Distribution”.

The Notes and the Guarantee are being offered and sold without registration under the United States Securities Act of 1933, as amended (the “**Securities Act**”): (A) to “qualified institutional buyers” (“**QIBs**”) as defined in Rule 144A under the Securities Act (“**Rule 144A**”) in reliance upon the exemptions provided by Section 4(a)(2) of the Securities Act and Rule 144A and (B) to certain persons in reliance upon Regulation S under the Securities Act (“**Regulation S**”). Prospective purchasers are hereby notified that the seller of the Notes may be relying on an exemption from the provisions of Section 5 of the Securities Act provided by Rule 144A. For a description of certain restrictions on resales and transfers, see “Notice to Purchasers” and “Plan of Distribution”.

The Notes are not protected accounts or deposit liabilities of the Issuers and, except as expressly stated in this Offering Memorandum, are not insured or guaranteed by (1) the Crown or any governmental agency of New Zealand, (2) the United States of America, the Federal Deposit Insurance Corporation or any other governmental agency of the United States or (3) the government or any government agency of any other jurisdiction.

Application will be made to the Financial Conduct Authority in its capacity as competent authority (the "**UK Listing Authority**") under the Financial Services and Markets Act 2000 (the "**FSMA**") for Notes issued within the period of 12 months from the date of this Offering Memorandum to be admitted to the official list of the UK Listing Authority (the "**Official List**") and an application will be made to the London Stock Exchange plc (the "**London Stock Exchange**") for such Notes to be admitted to trading on the London Stock Exchange's Regulated Market. In this Offering Memorandum, references to Notes being "**listed**" will mean that such Notes have been admitted to the Official List and have been admitted to trading on the London Stock Exchange's Regulated Market. The London Stock Exchange's Regulated Market is a "regulated market", for the purposes of Directive 2004/39/EC (the "**Markets in Financial Instruments Directive**").

The Notes will be issued in registered, book-entry only form and will be eligible for clearance through the facilities of The Depository Trust Company ("**DTC**") and its participants, including Euroclear Bank S.A./N.V. ("**Euroclear**") and Clearstream Banking, société anonyme ("**Clearstream, Luxembourg**").

Notice of the aggregate nominal amount of Notes, interest (if any) payable in respect of Notes, the issue price of Notes and any other terms and conditions which are applicable to a particular issuance of Notes (each, a "**Tranche**") will be set out in the relevant Final Terms relating to such Notes which, with respect to Notes to be listed on the London Stock Exchange, will be delivered to the UK Listing Authority and the London Stock Exchange on or before the date of issuance of the Notes of such Tranche.

In the case of any Notes which are to be admitted to trading on a regulated market within the European Economic Area or offered to the public in a Member State of the European Economic Area (each, a "**Member State**") in circumstances which would otherwise require the publication of a prospectus under Article 3 of Directive 2003/71/EC, as amended by Directive 2010/73/EU (the "**Prospectus Directive**"), the minimum denomination at the issue date shall be no less than €100,000 (or its equivalent in any other currency as at the date of issue of the Notes).

The credit ratings referred to in this Offering Memorandum in respect of ANZ New Zealand have been issued, and the credit ratings in respect of the Notes (when issued) will be issued, by one or more of Standard & Poor's (Australia) Pty. Ltd. ("**S&P**"), Moody's Investors Service Pty Limited ("**Moody's**"), and Fitch Australia Pty Ltd ("**Fitch**"). None of S&P, Moody's and Fitch is established in the European Union and none has applied for registration under Regulation (EC) No. 1060/2009 (as amended by Regulation (EC) No. 513/2011) (the "**CRA Regulation**") but their credit ratings are endorsed on an ongoing basis by Standard & Poor's Credit Market Services Europe Limited, Moody's Investors Service Ltd. and Fitch Ratings Ltd., respectively, pursuant to and in accordance with the CRA Regulation. Standard & Poor's Credit Market Services Europe Limited, Moody's Investors Service Ltd. and Fitch Ratings Ltd. are established in the European Union and are registered under the CRA Regulation.

The foreign currency sovereign credit ratings of New Zealand referred to in this Offering Memorandum have been issued by Standard & Poor's (Australia) Pty. Ltd. and Fitch (Hong Kong) Limited, neither of which is established in the European Union or has applied for registration under the CRA Regulation.

The credit rating of any Notes may be specified in the applicable Final Terms.

In general, European regulated investors are restricted from using a rating for regulatory purposes if such rating is not issued by a credit rating agency established in the European Union and registered under the CRA Regulation or issued by a credit rating agency established in a third country but whose credit ratings are endorsed by a credit rating agency established in the European Union and registered under the CRA Regulation, unless the rating is provided by a credit rating agency operating in the European Union before June 7, 2010 ("**European Entity**") which has submitted an application for registration in accordance with the CRA Regulation and such registration is not refused, or is provided by a third party country rating entity whose ratings are disclosed in that registration application as being ratings that will be endorsed by the European Entity. A credit rating is not a recommendation to buy, sell or hold securities and may be subject to revision, suspension or withdrawal at any time by the assigning rating organization.

Notice to Purchasers

NEITHER THE NOTES NOR THE GUARANTEE OFFERED HEREBY HAVE BEEN REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED (THE "SECURITIES ACT") OR THE SECURITIES LAWS OF ANY STATE OR APPROVED OR DISAPPROVED BY THE UNITED STATES SECURITIES AND EXCHANGE COMMISSION (THE "SEC") OR ANY STATE SECURITIES AUTHORITY. NEITHER THE SEC NOR ANY STATE SECURITIES AUTHORITY HAS PASSED UPON THE ACCURACY OR ADEQUACY OF THIS OFFERING MEMORANDUM. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE. THE NOTES AND THE GUARANTEE ARE BEING OFFERED AND SOLD TO QUALIFIED INSTITUTIONAL BUYERS WITHIN THE MEANING OF AND IN RELIANCE UPON THE EXEMPTIONS PROVIDED BY SECTION 4(a)(2) OF THE SECURITIES ACT, AND RULE 144A AND TO CERTAIN PERSONS IN RELIANCE ON REGULATION S UNDER THE SECURITIES ACT.

Each initial and subsequent purchaser of a Note or Notes will be deemed to have acknowledged, represented and agreed as follows:

(1) The Notes and the Guarantee have not been and will not be registered under the Securities Act or any other applicable securities law and, accordingly, neither the Notes nor the Guarantee may be offered, sold, transferred, pledged, encumbered or otherwise disposed of unless in a transaction exempt from registration under the Securities Act and any other applicable securities law.

(2) (A) It is a QIB, and is purchasing for its own account or solely for the account of one or more QIBs for which it acts as a fiduciary or agent, and such purchaser acknowledges that it is aware that the seller may rely upon the exemption from the provisions of Section 5 of the Securities Act provided by Rule 144A thereunder or (B) it is a purchaser acquiring such Notes in an offshore transaction within the meaning of Regulation S that is not a "U.S. person" (and is not acquiring such Notes for the account or benefit of a U.S. person) within the meaning of Regulation S.

(3) It agrees on its own behalf and on behalf of any account for which it is purchasing Notes, to offer, sell or otherwise transfer such Notes (A) only in minimum principal amounts of US\$200,000 or such larger principal amounts as shall be specified in the relevant Final Terms as the minimum denomination for the Notes of a relevant Tranche (or, in either case, the equivalent thereof in another currency or composite currency) and (B) prior to the date that is one year after the later of (i) the issue date of such Notes and (ii) the last date on which the Issuer thereof or any affiliate of the Issuer was the beneficial owner of such Notes (or any predecessor of such Notes) only (a) pursuant to the exemption from the registration requirements of the Securities Act provided by either Rule 144A or Regulation S, (b) to the Issuer, ANZ New Zealand (in the case of ANZNIL Notes) or any of their respective subsidiaries or an Agent that is a party to the Amended and Restated Distribution Agreement, dated as of January 20, 2015, among ANZ New Zealand, ANZNIL and the Agents named therein, as amended from time to time (the "Distribution Agreement") or (c) pursuant to an exemption from such registration requirements as confirmed in an opinion of counsel satisfactory to such Issuer and ANZ New Zealand (in the case of ANZNIL Notes). It acknowledges that each Note will contain a legend substantially to the effect of the foregoing paragraph (1) and this paragraph (3).

(4) It acknowledges that the Fiscal Agent referred to herein will register the transfer of any Note resold or otherwise transferred by such purchaser pursuant to clause (c) of the foregoing paragraph (3) only upon receipt of an opinion of counsel satisfactory to the Issuer and ANZ New Zealand (in the case of ANZNIL Notes).

(5) It acknowledges that the Issuers, the Agents and others will rely upon the truth and accuracy of the foregoing acknowledgments, representations and agreements and it agrees that, if any of the acknowledgments, representations or warranties deemed to have been made by it in connection with its purchase of Notes are no longer accurate, it shall promptly notify the Issuer of such Notes, ANZ New Zealand (in the case of ANZNIL Notes) and the Agent through which it purchased any Notes. If it is acquiring any Notes as a fiduciary or agent for one or more accounts, it represents that it has sole investment discretion with respect to each such account and that it has full power to make the foregoing acknowledgments, representations and agreements on behalf of each such account.

(6) Either (a) it is not a pension, profit-sharing or other employee benefit plan that is subject to the U.S. Employee Retirement Income Security Act of 1974, as amended ("ERISA") or Section 4975 of the U.S. Internal Revenue Code of 1986, as amended (the "Code") or any similar provision of applicable federal, state, local, foreign or other law, and it is not purchasing the Notes on behalf of or with the assets of any such plan or (b) its purchase and holding of the Notes, or exercise of any right thereunder, will not result in a non-exempt prohibited transaction for purposes of ERISA, the Code or, where applicable, any such similar law.

Each person receiving this Offering Memorandum acknowledges that (i) such person has been afforded an opportunity to request from the Issuers and to review, and has received, all additional information considered by it to be necessary to verify the accuracy and completeness of the information contained or incorporated by reference herein, (ii) it has not relied on any Agent or any person affiliated with any Agent in connection with

its investigation of the accuracy and completeness of such information or its investment decision and (iii) no person has been authorized to give any information or to make any representation concerning either Issuer, ANZ New Zealand (in the case of ANZNIL Notes) or the Notes offered hereby other than those contained herein and, if given or made, such other information or representation should not be relied upon as having been authorized by such Issuer, ANZ New Zealand (in the case of ANZNIL Notes) or any Agent.

This Offering Memorandum comprises a base prospectus for the purposes of Article 5.4 of the Prospectus Directive and relevant implementing measures in the United Kingdom. This Offering Memorandum supersedes and replaces in its entirety the Offering Memorandum dated January 20, 2015, for the ANZ New Zealand and ANZNIL medium-term note program.

This Offering Memorandum does not constitute, and may not be used for the purposes of, an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorized or to any person to whom it is unlawful to make such offer or solicitation, and no action is being taken to permit an offering of the Notes or the distribution of this Offering Memorandum in any jurisdiction where such action is required.

The Notes are subject to restrictions on transferability and resale. Investors may not transfer or resell the Notes except as described in this Offering Memorandum and as permitted under the Securities Act and other applicable securities laws. Investors may be required to bear the financial risks of an investment in the Notes for an indefinite period of time.

Each of the Issuers and the Guarantor accepts responsibility for the information contained in this document and to the best of the knowledge and belief of each of the Issuers and the Guarantor (which have taken all reasonable care to ensure that such is the case), the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of such information.

This Offering Memorandum should, in relation to each Tranche, be read and construed together with the relevant Final Terms.

In connection with the issue of any Tranche, the Agent or Agents (if any) named as the stabilizing manager(s) (or persons acting on behalf of any stabilizing managers) in the relevant Final Terms may over-allot or effect transactions with a view to supporting the market price of the Notes at a level higher than that which might otherwise prevail. However, there is no assurance that the stabilizing manager(s) (or persons acting on behalf of a stabilizing manager) will undertake stabilization action. Any stabilization action may begin on or after the date on which adequate public disclosure of the terms of the offer of the relevant Tranche is made and, if begun, may be ended at any time, but it must end no later than the earlier of 30 days after the issue date of the relevant Tranche and 60 days after the date of the allotment of the relevant Tranche. Any stabilization action or over-allotment must be conducted by the relevant stabilizing manager(s) (or person(s) acting on behalf of the stabilizing manager(s)) in accordance with all applicable laws and rules.

All references to websites in this Offering Memorandum, any Final Terms or any amendment or supplement hereto or thereto or in any document incorporated or deemed to be incorporated by reference in this Offering Memorandum are, unless expressly stated otherwise, intended to be inactive textual references for information only and any information contained in or accessible through any such website does not form a part of this Offering Memorandum, unless specifically stated in this Offering Memorandum or in any such document that all or any portion of such information is incorporated by reference in this Offering Memorandum.

Notice to New Hampshire Residents

NEITHER THE FACT THAT A REGISTRATION STATEMENT OR AN APPLICATION FOR A LICENSE HAS BEEN FILED UNDER CHAPTER 421-B OF THE NEW HAMPSHIRE REVISED STATUTES, 1955, AS AMENDED ("RSA") WITH THE STATE OF NEW HAMPSHIRE NOR THE FACT THAT A SECURITY IS EFFECTIVELY REGISTERED OR A PERSON IS LICENSED IN THE STATE OF NEW HAMPSHIRE CONSTITUTES A FINDING BY THE SECRETARY OF STATE OF THE STATE OF NEW HAMPSHIRE THAT ANY DOCUMENT FILED UNDER RSA 421-B IS TRUE, COMPLETE AND NOT MISLEADING. NEITHER ANY SUCH FACT NOR THE FACT THAT AN EXEMPTION OR EXCEPTION IS AVAILABLE FOR A SECURITY OR A TRANSACTION MEANS THAT THE SECRETARY OF STATE OF THE STATE OF NEW HAMPSHIRE HAS PASSED IN ANY WAY UPON THE MERITS OR QUALIFICATIONS OF, OR RECOMMENDED OR GIVEN APPROVAL TO, ANY PERSON, SECURITY OR TRANSACTION. IT IS UNLAWFUL TO MAKE, OR CAUSE TO BE MADE, TO ANY PROSPECTIVE PURCHASER, CUSTOMER OR CLIENT ANY REPRESENTATION INCONSISTENT WITH THE PROVISIONS OF THIS PARAGRAPH.

Available Information

Each prospective purchaser of the Notes is hereby offered the opportunity to ask questions of the Issuers concerning the terms and conditions of the offering and to request from the Issuers any additional information such prospective purchaser may consider necessary in making an informed investment decision or in order to verify the information set forth herein.

The Disclosure Statements of the ANZ New Zealand Group for the year ended September 30, 2014 (the "**2014 Disclosure Statement**") and the year ended September 30, 2013 (the "**2013 Disclosure Statement**"), which contain the audited consolidated financial statements of the ANZ New Zealand Group for the years ended September 30, 2014, 2013 and 2012 (the "**ANZ New Zealand Audited Financial Statements**"), and the Disclosure Statement of the ANZ New Zealand Group for the six months ended March 31, 2015 (the "**Half Year Disclosure Statement**" and, together with the 2014 Disclosure Statement and the 2013 Disclosure Statement, the "**Disclosure Statements**"), which contains the unaudited financial statements of the ANZ New Zealand Group for the six months ended March 31, 2015 and 2014 (the "**ANZ New Zealand Unaudited Financial Statements**" and, together with the ANZ New Zealand Audited Financial Statements, the "**ANZ New Zealand Financial Statements**"), are attached to this Offering Memorandum as Annex A. Information in each Disclosure Statement is superseded by information contained in each subsequent Disclosure Statement, and the information in each of the Disclosure Statements is superseded by information contained in this Offering Memorandum, in each case to the extent there are any inconsistencies.

For segment reporting purposes in the Disclosure Statements, the ANZ New Zealand Group is split into four business segments: Retail, Commercial, Wealth and Institutional. Segmental reporting has been updated to reflect minor changes to the ANZ New Zealand Group structure. Comparative data for the year ended September 30, 2013, has been adjusted to be consistent with the current segment definitions. Adjustments have not been made to the segment results for the year ended September 30, 2012 and, therefore, segment results for 2012 are compared to the unadjusted 2013 results so that they can be discussed on a consistent basis in the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations".

The audited financial statements of ANZNIL for the years ended September 30, 2014 and 2013 (the "**ANZNIL Audited Financial Statements**") and the unaudited financial statements of ANZNIL for the six months ended March 31, 2015 and 2014 (the "**ANZNIL Unaudited Financial Statements**" and, together with the ANZNIL Audited Financial Statements, the "**ANZNIL Financial Statements**") are attached to this Offering Memorandum as Annex A-1.

While any Notes remain outstanding, the relevant Issuer will, during any period in which ANZ New Zealand is not subject to Section 13 or 15(d) of the U.S. Securities Exchange Act of 1934, as amended (the "**Exchange Act**"), or exempt from reporting pursuant to Rule 12g3-2(b) under the Exchange Act, make available to any QIB who holds any Note and any prospective purchaser of a Note who is a QIB designated by the holder of such Note, upon the request of such holder or prospective purchaser, the information concerning ANZ New Zealand required to be provided to such holder or prospective purchaser by Rule 144A(d)(4) under the Securities Act.

If at any time the Issuers shall be required to prepare a supplementary prospectus pursuant to Section 87G of the FSMA, the Issuers will prepare and make available a supplement to this Offering Memorandum or a further Offering Memorandum which, in the case of a supplement in respect of any subsequent issue of Notes to be admitted to the Official List of the UK Listing Authority, will constitute a supplementary prospectus as required by the UK Listing Authority and Section 87G of the FSMA.

The Issuers will provide, without charge, to each person to whom a copy of this Offering Memorandum has been delivered, upon the request of such person, a copy of the Previous Conditions (as defined herein) or a copy of the Fiscal Agency Agreement (as defined herein). Written requests should be addressed to ANZ Bank New Zealand Limited, Level 8, P.O. Box 540, 1 Victoria Street, Wellington, 6011, New Zealand, Attention: The Treasurer. In addition, the Fiscal Agency Agreement will be available free of charge from the principal office in London of The Bank of New York Mellon in its capacity as paying agent for the Notes listed on the London Stock Exchange.

Certain Defined Terms

In this Offering Memorandum, unless the context otherwise requires:

- references to “**we**”, “**our**”, “**us**” or “**ANZ New Zealand Group**” are to ANZ New Zealand together with its consolidated subsidiaries (including, among others, ANZNIL);
- references to “**ANZ New Zealand**”, the “**bank**” or the “**Guarantor**” are to ANZ Bank New Zealand Limited or, prior to October 29, 2012, but after June 28, 2004, ANZ National Bank Limited, and prior to June 28, 2004, ANZ Banking Group (New Zealand) Limited;
- references to “**ANZNIL**” are to ANZ New Zealand (Int’l) Limited, formerly ANZ National (Int’l) Limited and NBNZ International Limited;
- references to “**ANZBGL**” are to our ultimate parent, Australia and New Zealand Banking Group Limited;
- references to the “**ANZ Group**” are to ANZBGL together with its consolidated subsidiaries (including, among others, ANZ New Zealand and ANZNIL);
- references to “**ANZ Wealth**” are to ANZ Wealth New Zealand Limited, a wholly-owned subsidiary of ANZ New Zealand, formerly known as OnePath Holdings (NZ) Limited;
- references to “**ANZ**” are to the ANZ New Zealand Group’s ANZ brand;
- references to “**APRA**” are to the Australian Prudential Regulation Authority;
- references to “**Final Terms**” are to a supplement hereto, which shall be substantially in the form attached hereto as Annex B, describing the terms of a Tranche; references to “**your Final Terms**” are to the Final Terms describing the specific terms of the Note(s) you purchase;
- references to the “**Fiscal Agency Agreement**” are to the fiscal agency agreement, dated as at March 15, 2005, as amended, among ANZ New Zealand, ANZNIL and The Bank of New York Mellon, as Fiscal Agent;
- references to “**ING NZ**” are to ING (NZ) Holdings Limited now known as ANZ Wealth;
- references to “**legislation**” include any amendments, re-enactments or replacement of legislation;
- references to the “**New Zealand branch of ANZBGL**” and the “**New Zealand branch**” are to the New Zealand branch established by ANZBGL that was registered on January 5, 2009;
- references to “**Noteholder**” are to a holder of Notes;
- references to “**Obligor**” are to any of the Issuers or the Guarantor;
- references to this “**Offering Memorandum**” are to this offering memorandum, the annexes hereto, any supplement hereto and any information incorporated herein by reference;
- references to “**one-year core funding ratio**” means all funding with residual maturity longer than one year plus 50% of tradable debt securities with original maturity of two years and with 6-12 months residual maturity plus non-market funding with residual maturity less than one year, discounted according to size bands, plus Tier 1 capital divided by total loans and advances;
- references to “**RBNZ**” are to the Reserve Bank of New Zealand;
- references to “**Retail**” are to ANZ New Zealand’s retail banking business, including its branch network;
- references to “**RMBS**” are to residential mortgage backed securities;
- references to “**six months ended March 31, 2015**” or “**March 2015 half year**” mean our fiscal half year ended March 31, 2015, and to “**six months ended March 31, 2014**”, and similar references have a comparable meaning and references to “**2014**” mean our fiscal year ended September 30, 2014 and references to 2013 and other years have a comparable meaning, in each case, unless the context requires otherwise;
- references to “**\$**”, “**New Zealand dollars**”, “**NZ\$**”, “**NZD**” or “**NZ dollars**” are to the lawful currency of New Zealand;

- references to "**A\$**" or "**Australian dollars**" are to the lawful currency of Australia;
- references to "**€**", "**EUR**", or "**euro**" are to the currency introduced at the start of the third stage of European economic and monetary union pursuant to the Treaty establishing the European Union as amended from time to time; and
- references to "**US\$**", "**USD**" or "**U.S. dollars**" are to the lawful currency of the United States.

Forward-Looking Statements

This Offering Memorandum contains various forward-looking statements regarding events and trends that are subject to risks and uncertainties that could cause the actual results and financial position of ANZ New Zealand or the ANZ New Zealand Group to differ materially from the information presented herein. When used in this Offering Memorandum, the words "estimate", "project", "intend", "anticipate", "believe", "expect", "may", "probability", "probably", "risk", "will", "seek", "would", "could", "should" and similar expressions, as they relate to the ANZ New Zealand Group and its management, are intended to identify such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as at the date hereof. Such statements constitute "forward-looking statements" for the purposes of the United States Private Securities Litigation Reform Act of 1995. The ANZ New Zealand Group does not undertake any obligation to publicly release the result of any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

For example, the forward-looking statements contained in this Offering Memorandum could be affected by:

- adverse conditions in global or regional debt and equity markets;
- general business and economic conditions in New Zealand and the external markets with which New Zealand trades or other jurisdictions in which we or our customers operate, in particular, Australia, Asia, Europe and U.S.;
- adverse conditions in the residential housing market in New Zealand;
- the impact of cyclones, tsunamis, floods, earthquakes and other natural disasters;
- continuing impacts of the global financial crisis, including volatile conditions in funding, equity, currency and asset markets;
- market liquidity and investor confidence;
- changes to our credit ratings;
- inflation, interest rate, exchange rate, market and monetary fluctuations and longer term changes;
- the impact of current, pending and future legislation, regulation (including capital, leverage and liquidity requirements), regulatory disclosures and taxation and accounting standards in New Zealand and worldwide;
- levels of credit risk and the adequacy of provisions to cover credit impairment;
- changes in consumer spending, saving and borrowing habits in New Zealand and external markets in which we, our customers or counterparties operate, in particular, Australia, Asia, Europe and U.S.;
- the effects of competition in the geographic and business areas in which we, our customers or our counterparties operate;
- our ability to maintain or increase market share and control expenses;
- our ability to complete, integrate and process acquisitions and dispositions;
- the timely development and acceptance of new products and services and the perceived overall value of these products and services by our customers;
- an adverse change to our reputation;
- the reliability and security of our technology and the various risks associated with changes to our information and technology systems;
- operational and environmental factors;
- demographic changes and changes in political, social, and economic conditions in New Zealand and any of the jurisdictions in which we, our customers or our counterparties operate;
- the impact of currency and commodity price fluctuations on New Zealand's agricultural exports and tourism sectors;

- the stability of New Zealand, Australian, international and regional financial systems and disruptions to financial markets, the continuing financial and credit turmoil in Europe and the U.S. and any losses we or our customers may experience as a result;
- the effectiveness of our risk management policies, including our internal processes, systems and employees;
- changes to the value of intangible assets; and
- various other factors beyond our control.

There can be no assurance that actual outcomes will not differ materially from the forward-looking statements contained in this Offering Memorandum.

Enforcement of Liabilities; Service of Process

ANZ New Zealand and ANZNIL are each registered under the Companies Act 1993 of New Zealand, incorporated in New Zealand and have limited liability. The directors and officers of ANZ New Zealand and ANZNIL and certain of the experts named herein reside outside the United States. In addition, a substantial portion of the assets of the ANZ New Zealand Group, those of the directors and officers and those of the experts are located outside of the United States. As a result, it may be difficult for United States investors to effect service of process within the United States upon ANZ New Zealand or ANZNIL or any of those persons or to enforce against ANZ New Zealand or ANZNIL or any of those persons, outside of the United States, judgments obtained in the United States courts predicated upon the civil liability provisions of the United States federal or state securities laws. ANZ New Zealand and ANZNIL have expressly submitted to the jurisdiction of any federal or state court in the Borough of Manhattan, The City of New York for the purpose of any suit, action or proceeding arising out of the offering of Notes.

Presentation of Financial Information

The ANZ New Zealand Financial Statements and the ANZNIL Financial Statements have been prepared in accordance with accounting practice generally accepted in New Zealand ("NZ GAAP") and do not contain a reconciliation to generally accepted accounting principles in the United States ("U.S. GAAP"). The ANZ New Zealand Financial Statements and the ANZNIL Financial Statements comply with the New Zealand equivalents to International Financial Reporting Standards ("NZ IFRS"), International Financial Reporting Standards ("IFRS") and Interpretations adopted by the International Accounting Standards Board ("IASB").

The independent auditors of the ANZ New Zealand Financial Statements and the ANZNIL Financial Statements for the 2014, 2013 and 2012 years are subject to auditing and auditor independence standards applicable in New Zealand, which differ from those applicable in the United States.

For the convenience of the reader, this Offering Memorandum contains translations of certain NZ dollar amounts into U.S. dollars at specified rates. These translations should not be construed as representations that the NZ dollar amounts actually represent such U.S. dollar amounts or could be converted into U.S. dollars at the rate indicated. See "Exchange Rates".

Due to rounding, the numbers presented throughout this Offering Memorandum may not add up precisely, and percentages may not precisely reflect absolute figures.

Overview

This overview highlights information contained elsewhere in this Offering Memorandum. This overview is not complete and does not contain all of the information that you should consider before investing in the Notes. You should carefully read the entire Offering Memorandum, including the section describing the risks of investing in the Notes under the caption "Risk Factors", before making an investment decision. Some of the statements in this overview constitute forward-looking statements. For more information, please see "Forward-Looking Statements".

ANZ Bank New Zealand Limited

ANZ New Zealand was incorporated under the Companies Act 1955 of New Zealand on October 23, 1979, was re-registered under the New Zealand Companies Act 1993 on June 13, 1997, and is a private company limited by shares. The registered office of ANZ New Zealand is located at ANZ Centre, 23-29 Albert Street, Auckland 1010, New Zealand and its New Zealand company number is 35976. The address of ANZ New Zealand's principal executive offices is ANZ Centre, 23-29 Albert Street, Auckland 1010, New Zealand and the phone number is +64 (9) 252 2974.

ANZ New Zealand is a registered bank under the Reserve Bank of New Zealand Act 1989 (the "**Reserve Bank Act**").

ANZ New Zealand dates back to 1840, when the Union Bank of Australia opened a branch in Wellington, New Zealand. ANZ New Zealand's ultimate parent company, ANZBGL, was formed through a series of mergers involving the Union Bank of Australia and its successors.

On December 1, 2003, ANZ Banking Group (New Zealand) Limited acquired NBNZ Holdings Limited and its consolidated subsidiaries including The National Bank of New Zealand Limited.

On June 26, 2004, ANZ Banking Group (New Zealand) Limited amalgamated with The National Bank of New Zealand Limited and changed its name to ANZ National Bank Limited. On November 30, 2009, ANZ New Zealand acquired ING Group's 51% shareholding in ING NZ, the ANZ New Zealand and ING Group wealth management and life insurance joint venture in New Zealand. As a result of the acquisition, ING NZ became a wholly-owned subsidiary of ANZ New Zealand and is now known as "ANZ Wealth".

ANZ New Zealand is the largest full-service banking group in New Zealand, according to the KPMG Financial Institutions Performance Survey Review, released by KPMG New Zealand in February 2015. On October 29, 2012, ANZ National Bank Limited changed its name to ANZ Bank New Zealand Limited and began combining its two banking brands (ANZ and The National Bank) under the ANZ brand. As at March 31, 2015, ANZ New Zealand Group had total assets of \$135,357 million and held the largest market share compared to other registered banks in New Zealand in most customer segments in which it participates.

As at March 31, 2015, ANZ New Zealand held approximately 30% and the New Zealand branch of ANZBGL held approximately 2% of the total assets held by registered banks in New Zealand, based on the RBNZ Standard Statistical Return for registered banks.

Competitive strengths

We believe our competitive strengths are as follows:

- We are New Zealand's largest bank, with more dedicated branches, ATMs and customers than any other New Zealand bank.
- We have a leading market share in New Zealand in all major business segments, a diverse business mix reflecting the makeup of the economy.
- We have multiple well-respected brands and a combined customer base of over 2 million.
- We maintain strong local corporate governance and New Zealand-based management.
- We can leverage the super-regional strategy of the ANZ Group.

Our Strategy

We aspire to be New Zealand's best bank by helping New Zealanders become more successful. To that end we have five strategic priorities:

1. Leverage our scale advantage by building and enabling our world class sales teams to capture cross sell and share growth.
2. Empower customers and drive efficiency and sales through further developing digital and payment capability.
3. Maximize our scale advantage by simplifying our products, processes, policies and technology, leveraging Group investment.
4. Improve the usage of our data to better understand our customer needs and deliver personalized solutions.
5. Improve our connections between frontline channels to support customer interactions.

Recent Developments

Changes to ANZ New Zealand Executive

On March 2, 2015, Mr. Mike Bullock became Chief Operating Officer of ANZ New Zealand. Mr. Bullock was previously ANZ New Zealand's General Manager of Institutional and Commercial Operations within Global Technology Services & Operations. Mr. Bullock has taken over the role from Mr. Craig Sims.

Contingent Liabilities

On December 3, 2014, the Commerce Commission and the Financial Markets Authority ("FMA") announced settlements with ANZ New Zealand relating to the Commission's and the FMA's investigations into the promotion, sale and offer of interest rate swaps to rural customers from 2005 to 2009. The settlement included a payment fund of \$18.5 million and a contribution of \$550,000 to the Commission's and the FMA's costs. As part of the settlement agreement with the Commerce Commission, ANZ New Zealand agreed not to oppose the Commission seeking a declaration that between July 2005 and March 31, 2009, ANZ New Zealand breached section 9 of the Fair Trading Act 1986 by engaging in conduct that was misleading in relation to some of the customers who complained to the Commission by understating some of the risks and/or overstating some of the benefits of interest rate swap arrangements to those customers. The High Court made this declaration on May 28, 2015. The court also noted that ANZ New Zealand's conduct that led to the breach had not been intentional.

In June 2013, litigation funder Litigation Lending Services (NZ) Limited filed a representative action against ANZ New Zealand regarding certain fees charged to New Zealand customers. The potential outcome of this litigation cannot be determined with any certainty at this stage.

Amalgamation of life insurance companies

On November 30, 2014, ANZ New Zealand's two life insurance companies, OnePath Insurance Services (NZ) Limited and OnePath Life (NZ) Limited, were amalgamated. The amalgamation has resulted in a single licensed life-insurer, with one insurer license, prudentially regulated by the Reserve Bank, and having a single set of financial and actuarial reports.

The amalgamated company continues to operate as OnePath Life (NZ) Limited.

Reduction in dairy payout

In the recent RBNZ Monetary Policy Statement released on June 11, 2015 the following concern was noted:

Relative to last season's record payout, farmers' incomes in the 2014/15 season are expected to be around \$7 billion lower, representing a fall of about 3% of nominal GDP. Farmers typically smooth expenditure through price cycles, saving more during periods of high prices and borrowing during periods of low prices. As such, farmers' spending may not fall proportionately to the income decline. However, if the dairy payout is low in the 2015/16 season as well, farmers' spending could fall sharply. Moreover, there is a risk that lower cash flows may limit the ability of farmers to smooth their expenditure.

This may have an impact on ANZ New Zealand's future results.

ANZ New Zealand organizational structure

Business lines and executive team

Our business is organized into the following four major business segments: (1) Retail, (2) Commercial (comprising Business Banking, Commercial & Agri and UDC Finance Limited ("UDC"), a finance company providing asset finance), (3) Wealth and (4) Institutional. These segments are supported by centralized back office and corporate functions. Life insurance and fund management products are developed and procured

through ANZ Wealth's group of companies, which are wholly-owned subsidiaries of ANZ New Zealand. ANZ Wealth's products are distributed through the Retail segment.

Retail

Retail provides products and services to personal customers via the branch network, mortgage specialists, the contact center and a variety of self-service channels (internet banking, phone banking, ATMs, website and mobile phone banking). Core products include current and savings accounts, unsecured lending (credit cards, personal loans and overdrafts) and home loans secured by mortgages over property. Retail distributes insurance and investment products on behalf of the Wealth segment.

As at March 31, 2015, Retail had a network of 229 branches (a decrease of 32, compared to September 30, 2013, and 4, compared to September 30, 2014, due to the restructuring of the branch network), 680 ATMs and 8 mobile ATMs. Customers have access to phone and mobile phone banking and on-line banking services.

As at March 31, 2015, Retail had total loans of \$30.6 billion and total deposits of \$36.6 billion.

Commercial

Commercial provides services to Business Banking, Commercial & Agri, and UDC customers. Business Banking services are offered to small enterprises (typically with annual revenues of less than \$5 million). Commercial & Agri customers consist primarily of privately-owned small to medium enterprises but include firms with annual turnover of up to \$250 million. ANZ New Zealand's relationship with these businesses ranges from simple banking requirements with revenue from deposit and transactional facilities, and cash flow lending, to more complex funding arrangements with revenue sourced from a wider range of sources such as FX and trade products. UDC is principally involved in the financing and leasing of plant, vehicles and equipment, mainly for small and medium sized businesses, as well as investment products.

As at March 31, 2015, Commercial had total loans of \$60.6 billion and total deposits of \$24.8 billion, with total loans to Business Banking customers of \$23.0 billion and total deposits of \$13.2 billion and total loans to Commercial & Agri and UDC customers of \$37.6 billion and total deposits of \$11.6 billion.

Wealth

Wealth includes Private Wealth, Funds Management and Insurance businesses, which provide private banking investment, superannuation and insurance products and services.

As at March 31, 2015, Wealth businesses had total loans of \$1.8 billion and total deposits of \$5.3 billion.

As at March 31, 2015, funds managed by ANZ Wealth totaled approximately \$21.1 billion. As at March 31, 2015, the One Path Life (NZ) Limited insurance business comprised assets totalling \$958 million, which is 0.7% of the total consolidated assets of the ANZ New Zealand Group.

Institutional

Institutional provides financial services through a number of specialized units to large multi-banked corporations, often global, which require sophisticated product and risk management solutions. Those financial services include loan structuring, foreign exchange, wholesale money market services and transaction banking.

As at March 31, 2015, Institutional had total loans of \$7.7 billion and total deposits of \$13.5 billion.

Other

Other includes treasury and back office support functions, none of which constitutes a separately reportable segment.

As of the date of this Offering Memorandum, our executive team is comprised of the following roles:

Executive Team

- Chief Executive Officer
- Managing Director, Retail and Business Banking
- Managing Director, Commercial and Agri

- Managing Director Wealth
- Managing Director Institutional
- Chief Operating Officer
- Chief Financial Officer
- Chief Risk Officer
- General Manager Human Resources
- General Counsel & Company Secretary
- Head of Corporate Affairs
- Head of Marketing

Branding Strategy

ANZ New Zealand continues to simplify its brand portfolio.

The Retail, Commercial, Wealth and Institutional segments now all operate under the ANZ brand except in specialized markets.

In specialized markets, the ANZ New Zealand Group is further represented by the following brands:

- UDC (asset finance);
- ANZ Securities (online share and debt instrument trading);
- ANZ New Zealand Investments Limited (superannuation and investment products);
- OnePath Life (insurance); and
- Bonus Bonds.

Competition

The New Zealand financial services sector in which we operate is very concentrated and highly competitive. Our principal competitors are the three other major banks, ASB Bank Limited, Bank of New Zealand and Westpac Banking Corporation/Westpac New Zealand Limited. Each of these is a subsidiary or branch of a major Australian bank. Together with ANZ New Zealand, these banks participate across all customer segments from individuals to large corporates.

Competition also exists in specific business segments from other banks. The New Zealand Government-owned Kiwibank Limited is active in retail segments and Rabobank New Zealand Limited is active in retail deposits and agricultural lending markets. International banks such as Citigroup, HSBC and Deutsche Bank participate in a limited manner in the institutional market. GE Capital competes in the point-of-sale consumer finance and credit card market. Since late 2013, Industrial and Commercial Bank of China (ICBC), China Construction Bank (CCB) and Bank of China (BOC) have obtained banking licenses to establish New Zealand subsidiaries. Their initial focus appears to be in wholesale banking, in particular, trade banking to and from China.

Competition in the financial services sector can be intense and difficult to predict. Competition in the deposit market has increased rapidly in New Zealand, with banks attempting to grow their share of retail deposits and reduce their wholesale funding. Lending to the residential mortgage market accounts for over half of the lending in New Zealand by registered banks and this market is a key area of competitive tension.

In an attempt to help reduce the risk of a substantial downward correction in housing prices that could damage the financial sector, the RBNZ introduced loan-to-value ratio (LVR) restrictions for housing mortgage loans on October 1, 2013, requiring banks to restrict new residential mortgage lending at LVRs of over 80% to no more than 10% of the dollar value of their new housing lending flows. This has intensified competition between New Zealand banks for under 80% LVR housing loans, with special rates being used to win these customers. The RBNZ has recently announced that it will ease the existing LVR restriction for all residential lending outside the Auckland Council area from 10% to 15%. The LVR restrictions for borrowing within the Auckland Council area will remain at 10% but will be for loans to owner occupiers only. There will also be a new restriction requiring

residential property investors in the Auckland Council area using bank loans to have a deposit of at least 30% of the value of the property. These changes are likely to take effect from October 1, 2015 and we do not expect these changes to have much impact on competition between New Zealand banks.

Outside the banking sector, a number of smaller finance companies in New Zealand are active in the personal and commercial property markets through competitive lending and deposit product offerings, although their number has fallen in recent years. The non-banking sector constituted approximately 3% of total financial system assets as of March 31, 2015.

Significant Subsidiaries

The significant subsidiaries of ANZ New Zealand are as follows:

- ANZNIL;
- ANZ Wealth; and
- UDC.

Each of the subsidiaries listed above is incorporated in New Zealand and is 100% owned directly by ANZ New Zealand.

The subsidiaries listed above are either subsidiaries that, as at March 31, 2015, account for 10% or more of any of ANZ New Zealand's investments, operating surplus or assets for the most recent fiscal period or are considered by management to be of importance to ANZ New Zealand. As at March 31, 2015, ANZNIL accounts for more than 10% of ANZ New Zealand's consolidated total liabilities. UDC represents one of the non-bank brands of the ANZ New Zealand Group in New Zealand. Of the 52,352,000 ordinary shares issued by UDC, 31,600,000 ordinary shares are unpaid as to \$1.00 per share.

Employees

As at March 31, 2015, we employed 7,900 core full-time equivalent employees, consisting of 7,048 people employed on a full-time basis, 731 full time equivalent employees employed on a part-time basis, and 121 people on fixed-term contracts. In addition, we had a further 114 full-time equivalent employees employed on a casual basis and 203 independent contractors and temporary staff.

	As of March 31,			As of September 30,		
	2015	2014	2014	2013	2012	2011
Number of core full-time equivalent employees ¹	7,900	7,904	7,900	7,949	8,571	8,882

(1) All employees are located in New Zealand except for one employee located in ANZNIL's London branch. Core full-time equivalent employees include employees that are employed on a full-time basis, part-time basis or that are on a fixed term contract, but does not include casual employees or independent contractors.

Our core full-time equivalent employees remained stable with 7,900 as at both September 30, 2014 and March 31, 2015.

ANZ New Zealand's collective employment agreement with FirstUnion, which affects approximately 1,000 employees, expired on July 31, 2014, and we are currently in negotiations with FirstUnion for its renewal. These negotiations have been ongoing for some time and we cannot provide any assurance as to when they will conclude.

Despite the current lack of a new agreement with FirstUnion, we consider our relations with our employees generally to be satisfactory.

Properties

We operate from a substantial number of properties, both freehold and leasehold, throughout New Zealand. As of the date of this Offering Memorandum, our freehold portfolio consisted of 47 properties including head office buildings, residences, carparks and two data centers. Our most valuable freehold properties are Lady Ruby Drive Data Centre (Auckland), Aintree Ave Data Centre (Auckland), 170 Featherston Street (Wellington) and 1 Victoria Street (Wellington). We have entered into an agreement to sell 1 Victoria Street (Wellington) for approximately \$14.65 million, with settlement scheduled for December 2015.

As of the date of this Offering Memorandum, we lease approximately 656 properties including branches, offices, car parks and standalone ATM sites. We believe that all of our property, both freehold and leasehold, is well maintained and adequately insured.

ANZ New Zealand (Int'l) Limited

ANZNIL was incorporated under the Companies Act 1955 of New Zealand on December 8, 1986, was re-registered under the Companies Act 1993 of New Zealand on May 27, 1996, and is a wholly owned subsidiary of ANZ New Zealand. The registered office of ANZNIL is at ANZ Centre, 23-29 Albert Street, Auckland 1010, New Zealand and its New Zealand company number is 328154. ANZNIL's London branch is located at 28th Floor, 40 Bank Street, Canary Wharf, London E14 5EJ, United Kingdom and the phone number is +44 (20) 3229 2017.

The principal activities of ANZNIL include the provision of funding facilities to the ANZ New Zealand Group and wholesale financing, including issuance of U.S. Commercial Paper, Euro-Commercial Paper, Covered Bonds, U.S. Medium-Term Notes and Euro Medium-Term Notes.

ANZNIL's overseas activities (including the issue of Notes) are currently conducted through its London branch. ANZNIL has no subsidiary companies. ANZNIL is largely dependent on its parent, ANZ New Zealand, as ANZ New Zealand fully guarantees all obligations under ANZNIL's funding programs.

Overview of Terms

The Issuers	ANZ New Zealand and ANZNIL.
The Guarantor	ANZ New Zealand in the case of ANZNIL Notes.
The Agents	J.P. Morgan Securities LLC ANZ Securities, Inc. Barclays Capital Inc. Citigroup Global Markets Inc. Deutsche Bank Securities Inc. Goldman, Sachs & Co. HSBC Securities (USA) Inc. Merrill Lynch, Pierce, Fenner & Smith Incorporated Morgan Stanley & Co. LLC RBC Capital Markets, LLC Wells Fargo Securities, LLC Any other agents appointed in accordance with the terms of the Distribution Agreement.
Terms of the Notes and Guarantee	The Notes, which may be issued at their principal amount or at a premium to or discount from their principal amount, on an unsubordinated basis, may bear interest at a fixed or floating rate or be issued on a fully discounted basis and not bear interest. The interest rate or interest rate formula, if any, issue price, currency, terms of redemption or repayment, if any, and stated maturity will be established for each Note by the Issuer thereof at the issuance of such Note and will be indicated in the relevant Final Terms. The ANZNIL Notes issued by ANZNIL will be unconditionally and irrevocably guaranteed by ANZ New Zealand as described in "Description of the Notes and the Guarantee".
Method of distribution	The Notes are being offered from time to time by the Issuers through the Agents. The Issuers may also sell Notes to the Agents acting as principals for resale in the United States to QIBs and outside the United States to individuals that are not U.S. persons (as defined in Regulation S) and may sell Notes directly on their own behalf. See "Notice to Purchasers" and "Plan of Distribution".
Maximum amount	The aggregate principal amount (or, in the case of Notes issued at a discount from the principal amount, the aggregate initial offering price) of Notes outstanding at any time shall not exceed US\$10,000,000,000 or the approximate equivalent thereof in another currency calculated as at the issue date of the relevant Notes. The Issuers may increase this amount from time to time in accordance with the terms of the Distribution Agreement.
Status of the Notes	The Notes will be direct, unsecured and general obligations of the relevant Issuer and will rank equally with all other present and future unsecured and unsubordinated obligations of the relevant Issuer (other than any obligation preferred by mandatory provisions of applicable law).
Status of the Guarantee	The Guarantee of ANZ New Zealand with respect to ANZNIL Notes issued by ANZNIL will be a direct, unsecured and general obligation of ANZ New Zealand and will rank equally with all other present and future unsecured and unsubordinated obligations of ANZ New Zealand (other than any obligation preferred by mandatory provisions of applicable law).

Maturities..... Such maturities as may be agreed between the relevant Issuer and the relevant purchaser or Agent (as indicated in the relevant Final Terms as the Stated Maturity), subject to such minimum or maximum term as may be allowed or required from time to time by the relevant central bank (or equivalent body) or any laws or regulations applicable to the relevant Issuer or the relevant Specified Currency (as defined herein).

At the date of this Offering Memorandum, the minimum term of all Notes is one year. There is no maximum stated term.

Currency Subject to any applicable legal or regulatory restrictions, such currency or currencies as may be agreed between the relevant Issuer and the relevant purchaser or Agent (as indicated in the relevant Final Terms). See "Description of the Notes and the Guarantee—Currency of Notes".

Denomination and form..... The Notes will be issued in fully registered form in minimum denominations of US\$200,000 (or, in the case of Notes not denominated in U.S. dollars, the equivalent thereof in such Specified Currency, rounded down to the nearest 1,000 units of such foreign currency) and integral multiples of US\$1,000 (or, in the case of Notes not denominated in U.S. dollars, 1,000 units of such Specified Currency) in excess thereof.

In the case of any Notes which are to be admitted to trading on a regulated market within the European Economic Area or offered to the public in a Member State of the European Economic Area in circumstances which would otherwise require the publication of a prospectus under the Prospectus Directive, the minimum denomination at the issue date shall be no less than €100,000 (or its equivalent in any other currency as at the date of issue of the Notes).

Notes sold to QIBs in reliance on Rule 144A will be represented by one or more global Notes (each, a "**Rule 144A Global Note**") registered in the name of a nominee of DTC. Notes sold to non-U.S. persons in offshore transactions in reliance on Regulation S will be represented by one or more global Notes (each, a "**Regulation S Global Note**" and, together with the Rule 144A Global Notes, the "**Global Notes**") registered in the name of a nominee of DTC. Definitive Notes will only be issued in limited circumstances. See "Legal Ownership and Book-Entry Issuance—Special considerations for Global Notes".

Interest rates..... Interest bearing Notes may be issued either as Fixed Rate Notes or Floating Rate Notes (each, as defined herein). Fixed Rate Notes will bear interest at the rate specified in the relevant Final Terms. Floating Rate Notes will bear interest based on an interest rate formula designated in the relevant Final Terms, which formula shall be one of: the Commercial Paper Rate, the Prime Rate, the CD Rate, the Federal Funds Rate, LIBOR, EURIBOR, the Treasury Rate, the CMT Rate, the New Zealand Bank Bill Rate, the Australian Bank Bill Rate, the Eleventh District Cost of Funds Rate. The interest rate on each Floating Rate Note will be calculated by reference to the specified interest rate (a) plus or minus the Spread (as defined herein), if any, and/or (b) multiplied by the Spread Multiplier (as defined herein), if any.

Floating Rate Notes may also have a maximum interest rate, a minimum interest rate or both or neither.

Interest payment dates..... Interest on Fixed Rate Notes will be payable annually or semiannually on the date or dates set forth in the relevant Final Terms, and at maturity, and interest on Floating Rate Notes will be payable quarterly on the dates set forth in the relevant Final Terms and at maturity.

Redemption and repurchase	<p>The relevant Final Terms will indicate either that such Notes cannot be redeemed prior to their stated maturity (other than for certain taxation reasons) or that such Notes will be redeemable at the option of the relevant Issuer upon giving not more than 60 days written notice nor less than 30 days written notice to the holders of such Notes on a date or dates specified prior to such stated maturity and at a price or prices as are indicated in the relevant Final Terms.</p> <p>The relevant Final Terms will indicate either that such Notes cannot be repurchased prior to their stated maturity or that the Notes will be repurchasable at the option of the holders of such Notes on a date or dates specified prior to the stated maturity upon giving no more than 45 days nor less than 30 days written prior notice to the Fiscal Agent.</p>
Redemption for taxation reasons	<p>The Notes may be redeemed at the option of the relevant Issuer, in whole but not in part, at the principal amount thereof plus accrued and unpaid interest in certain circumstances in which the relevant Issuer or, in the case of ANZNIL Notes, the Guarantor, would become obligated to pay additional amounts. See "Description of the Notes and the Guarantee—Payment of additional amounts" and "—Redemption for taxation reasons".</p>
Zero Coupon Notes	<p>Zero Coupon Notes will be offered and sold at a discount to their principal amounts and will not bear interest.</p>
Original Issue Discount Notes	<p>An Original Issue Discount Note will be issued at a price lower than its principal amount and will provide that, upon redemption or acceleration of its maturity, an amount less than its principal amount will be payable (as specified in the relevant Final Terms).</p>
Taxation	<p>All payments in respect of the Notes and the Guarantee will be made without deduction for or on account of withholding taxes imposed within New Zealand or the United Kingdom, except as described under "Description of the Notes and the Guarantee —Payment of additional amounts". For a discussion of certain tax considerations, see "Taxes".</p>
Rating	<p>The Notes when issued, will be rated Aa3 by Moody's, AA- by S&P and AA- by Fitch.</p> <p>A security rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by an assigning rating agency and any rating should be evaluated independently of any other information.</p>
Fiscal Agent	<p>The Bank of New York Mellon.</p>
Paying Agent	<p>The Bank of New York Mellon.</p>
Listing	<p>The Notes will be admitted to the Official List of the UK Listing Authority and admitted to trading on the London Stock Exchange's Regulated Market.</p>
Transfer Restrictions	<p>There are selling restrictions in relation to the United States, the United Kingdom, New Zealand, the European Economic Area, Japan, Hong Kong and such other jurisdictions as may be required in connection with the offering and sale of a Tranche as set forth in the relevant Final Terms. See "Plan of Distribution".</p>

Governing Law	New York, except as to authorization and execution by ANZ New Zealand and ANZNIL of the Notes, the Guarantee and the Fiscal Agency Agreement, which are governed by the laws of New Zealand.
Risk Factors	Prospective purchasers of the Notes should consider carefully all of the information set forth in this Offering Memorandum and, in particular, the information set forth under the caption "Risk Factors" in this Offering Memorandum before making an investment in the Notes.

Selected Consolidated Financial Information

The consolidated balance sheet information of the ANZ New Zealand Group as at March 31, 2015, March 31, 2014 and the income statement data for the six month periods ended March 31, 2015 and March 31, 2014 have been derived from the ANZ New Zealand Unaudited Financial Statements. The consolidated balance sheet information of the ANZ New Zealand Group for the fiscal years ended September 30, 2014, 2013, 2012, 2011 and 2010 have been derived from the ANZ New Zealand Group's audited consolidated financial statements for the years ended September 30, 2014, 2013, 2012, 2011 and 2010. The financial information contained in this Offering Memorandum should be read in conjunction with, and is qualified by reference to, the ANZ New Zealand Financial Statements. For additional information concerning our financial results, see "Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Offering Memorandum and the Disclosure Statements.

The ANZ New Zealand Financial Statements and the financial information included herein are prepared in accordance with New Zealand equivalents to International Financial Reporting Standards ("NZ IFRS"). The ANZ New Zealand Group Financial Statements comply with International Financial Reporting Standards ("IFRS"). IFRS differs in certain significant respects from U.S. GAAP.

Summary consolidated income statement

(1) For the convenience of the reader, the financial data for the six months ended March 31, 2015 has been translated from NZ dollars into U.S. dollars using the noon buying rate for March 31, 2015 of NZ\$1.00=US\$0.7485.

(2) From March 31, 2014 the classification of the balance sheet has been changed to reflect the nature of the financial assets and liabilities reported. Prior to the reclassification, the balance sheet was classified according to counterparty. This has resulted in changes to previously reported balance sheet classifications as at September 30, 2013. Minor changes in the overall total assets and total liabilities have also occurred due to the adoption of IAS19 *Employee Benefits*. As a result of this reclassification, available-for-sale assets, net loans and advances, other assets, deferred tax assets, deposits and other borrowings and payables and other liabilities for 2012, 2011 and 2010 are not comparable to those items for the other periods presented. Further details of the reclassification are included on page 59 of this Offering Memorandum and in Note 1 and Note 35 to the ANZ New Zealand Audited Financial Statements (attached as Annex A).

- (3) Certain amounts in the September 30, 2012 comparative information have been reclassified to ensure consistency with the 2013 presentation. As at September 30, 2012 \$107 million was added to both assets and liabilities. As a result of this reclassification, the total assets and liabilities for 2011 and 2010 are not comparable to those items for the other periods presented.
- (4) In years prior to the year ended September 30, 2012, collateral received and paid on derivative financial instruments was netted against derivative financial instruments assets and liabilities respectively. For the year ended September 30, 2012, these amounts were reclassified to amounts due to and from financial institutions respectively, to reflect more accurately the nature of these balances. Comparative data as at September 30, 2011, has been restated accordingly. As at September 30, 2011, collateral received of \$1,475 million was reclassified from derivative financial instrument assets to due to other financial institutions and collateral paid of \$944 million was reclassified from derivative financial instrument liabilities to due from other financial institutions. As a result of this reclassification, due from financial institutions, derivative financial instrument assets, total assets, due to financial institutions, derivative financial instrument liabilities and total liabilities for 2010 are not comparable to those items for 2012 and 2011.

(1) Source: ANZ New Zealand Group financial statements (otherwise noted in footnotes below)

(2) All shares of ANZ New Zealand Limited are owned by ANZ Holdings (New Zealand) Limited, a wholly-owned subsidiary of ANZBGL.

(3) On September 25, 2013, ANZ New Zealand issued preference shares to ANZ Holdings (New Zealand) Limited. These preference shares do not carry any voting rights. They are wholly classified as equity instruments, as there is no contractual obligation for ANZ New Zealand to either deliver cash or another financial instrument or to exchange financial instruments on a potentially unfavorable basis.

(4) Where applicable, ratios calculated using average balances have been referenced to the table "Average balance sheet and interest income/expense" on page 79 of this Offering Memorandum, unless otherwise stated, and the methodology for calculating average balances is included in that table.

(5) For the purpose of computing this ratio, earnings consist of operating profit before income tax and outside equity interests. Fixed charges consist of interest costs plus one-third of minimum rental payments under operating leases (estimated by management to be the interest factor of such rentals). The ratio is expressed as earnings divided by fixed charges.

(6) The RBNZ sets minimum capital requirements that ANZ New Zealand must comply with. From January 1, 2013, ANZ New Zealand has been required to comply with the RBNZ's Basel III requirements. The capital adequacy ratios and risk weighted exposures as at March 31, 2015, March 31, 2014, September 30, 2014 and September 30, 2013, in the above table have been calculated under the Basel III framework, utilizing the internal ratings based approach. The comparative capital adequacy and risk weighted exposures for the other periods presented in the table have been calculated under the Basel II framework, and are not directly comparable to these items for March 31, 2015, March 31, 2014, September 30, 2014, and September 30, 2013.

- (7) Net interest income divided by average interest earning assets.
- (8) The difference between the average interest rate on average interest earning assets and the average interest rate on average interest bearing liabilities.
- (9) Operating expenses of the banking business divided by total income from ordinary banking activities.
- (10) Banking operating profit after tax divided by average risk weighted exposures. Averages are based on quarterly balances. The ratio is annualized.
- (11) All employees are located in New Zealand except for one employee located in ANZNIL's London branch. Core full-time equivalent employees include employees that are employed on a full-time basis, part-time basis or that are on a fixed term contract but does not include casual employees or independent contractors.
- (12) For the convenience of the reader, the financial data for the six months ended March 31, 2015 has been translated from NZ dollars into U.S. dollars using the noon buying rate for March 31, 2015 of NZ\$1.00=US\$0.7485.

Risk Factors

Any investment in the Notes will involve risks including, without limitation, those described in this section. All material risks that have been identified by us are included in this section. You should carefully consider the following discussion of the risk factors and the other information in this Offering Memorandum and any applicable Final Terms or other supplement and consult your own financial and legal advisers about the risks associated with the Notes including or incorporated by reference before deciding whether an investment in the Notes is suitable for you.

You should be aware that the risks set forth below are not the only ones facing us. Additional risks and uncertainties that we are unaware of, or that we currently deem immaterial, may also become important factors that affect us.

If any of the listed or unlisted risks actually occurs, our business, operations, financial condition or reputation could be materially adversely affected, with the result that the trading price of the Notes could decline and you could lose all or part of your investment.

As at the date of this Offering Memorandum, we believe that the following risk factors may affect our ability to fulfill our obligations under the Notes and could be material for the purpose of assessing the market risks associated with the Notes. If any of the following factors actually occurs, the trading price of the Notes could fall and investors may lose the value of their entire investment or part of it. These factors are contingencies that may or may not occur and we are not in a position to express a view on the likelihood of any such contingencies occurring.

Risks relating to our business

Adverse credit, currency and capital market conditions may significantly affect our ability to meet liquidity needs, adversely affect our access to international capital markets and increase our cost of funding.

The global financial crisis in 2008 and 2009 saw a sudden and prolonged dislocation in credit and capital markets, a contraction in global economic activity and the emergence of many challenges for financial services institutions worldwide that still persist. Sovereign risk in Europe and its potential impact on the European Union, the euro and financial institutions in Europe and globally emerged as a significant risk to the recovery prospects of the global economy. These also adversely affected our ability to raise medium/long-term funding in the international capital markets from time to time.

Recently, monetary easing in major economies has led to low interest rates which are encouraging investment in riskier assets, leading to a reduction in credit spreads, reduced market volatility and rising prices for both financial and real assets. High and rising asset prices could become a point of market vulnerability when interest rates begin to return to more normal levels. The current benign market conditions could unwind in a disorderly fashion, affecting the cost and availability of offshore funding for ANZ New Zealand.

We rely on credit and capital markets for funding our business. Continued or increased instability in these market conditions may limit our ability to replace, in a timely manner, maturing liabilities and access the capital necessary to fund and grow our business.

In the event that our current sources of funding prove to be insufficient, we may be forced to seek alternative financing. The availability of such alternative financing will depend on a variety of factors, including prevailing market conditions, the availability of credit, our credit ratings and credit capacity. The cost of these alternatives may be more expensive or on unfavorable terms, which could materially and adversely affect our results of operations, liquidity, capital resources and financial condition.

If we are unable to source appropriate funding, we may be forced to reduce our lending or begin to sell liquid securities. There is no assurance that we can obtain favorable prices on some or all of the securities we offer for sale. The credit, currency and capital market conditions could limit our ability to refinance maturing liabilities. Such actions could materially and adversely impact our business, results of operations, liquidity, capital resources and financial condition.

Changes in general business and economic conditions in New Zealand may adversely impact our results and we can give no assurance as to the likely future state of such conditions.

General business and economic conditions are a key consideration in assessing the risk of loss arising from the inability to adapt cost structures, products, pricing, or activities in response to lower than expected revenues, or higher than expected costs, caused by an unexpected adverse change in the economy and general business conditions or operating environment.

As we conduct substantially all of our lending business in New Zealand, our performance is influenced by economic conditions in New Zealand, including the level and cyclical nature of business activity, which in turn is affected by both domestic and international economic and political events. The New Zealand economy contracted sharply in 2008 and the first quarter of 2009. Since then, economic growth has been positive although economic conditions in New Zealand continue to fluctuate. A material downturn in the New Zealand economy could materially and adversely impact our results of operations, liquidity, capital resources and financial condition.

Economic and political factors and events in New Zealand which can adversely affect our performance and results include, but are not limited to, commodities volatility and results, short-term and long-term interest rates, inflation, monetary supply, fluctuations in both debt and equity capital markets, relative changes in foreign exchange rates, consumer confidence, the overall level of indebtedness of the economy and the relative strength of the New Zealand economy. For example, a general economic downturn, a fall in the housing market or the rural property market (including a decline in housing or rural property prices), a continued decrease in immigration, a continued increase in unemployment, or other events that negatively affect household or corporate incomes in New Zealand could decrease our asset values and the demand for our loan and non-loan products and services and increase the number of customers who fail to pay interest or repay principal on their loans.

New Zealand economic conditions may also be affected by geopolitical instability, including, among other factors, actual or potential conflict and terrorism. Our future performance may also be affected by the economic conditions of other regions with economic connections to New Zealand (in particular, New Zealand's major trading partners such as Australia or China). For example, a slowdown in the Chinese economy or a decline in commodity prices could affect the volume and price of New Zealand's exports, such as dairy products, with negative flow-on effects for farmers and those industries closely tied to the agricultural sector. See the section entitled "Overview – Recent Developments – Reduction in dairy payout."

In addition, an appreciation in the New Zealand dollar relative to other currencies could negatively impact New Zealand's agricultural exports and international tourism, whereas a depreciation would increase foreign debt service obligations.

Natural disasters such as (but not restricted to) cyclones, floods and earthquakes, and the economic and financial market implications of such disasters on domestic and global conditions can adversely impact the ANZ New Zealand Group's business, operations and financial condition.

Competition may adversely impact our results.

The financial services sector in New Zealand is highly competitive, particularly in those segments that are considered to provide higher growth prospects. Factors contributing to this include industry deregulation, mergers and acquisitions, changes in customers' needs and preferences, entry of new participants, development of new distribution and service methods and increased diversification of products by competitors and regulated changes in the rules governing the operations of banks and non-bank competitors. For example, in New Zealand non-banks are able to offer products and services traditionally provided by banks, such as automatic payment systems, mortgages, and credit cards. In addition, banks organized in jurisdictions outside New Zealand are subject to different levels of regulation and consequently some may have lower cost structures. Competition in the financial services sector can be intense and difficult to predict. Currently there is significant competition for customer deposits and residential secured mortgages among New Zealand banks. This is likely to continue as banks seek to diversify their sources of funding and drive asset growth.

The effect of the competitive market conditions in which we operate may have a material adverse effect on our financial performance and position including market share or margins. For example, increasing competition for customers can lead to a compression in our net interest margin, or increased advertising and related expenses to attract and retain customers.

We are subject to credit risk, which may adversely impact our results.

As a financial institution, we are exposed to the risks associated with extending credit to other parties. Less favorable business or economic conditions, whether generally or in a specific industry sector or geographic region or natural disasters, could cause customers or counterparties to experience adverse financial consequences, thereby exposing us to the increased risk that those customers or counterparties will fail to meet their obligations in accordance with agreed terms. We hold provisions to cover credit impairment. The amount of these provisions is determined by assessing the extent of impairment inherent within the current lending portfolio, based on current information. This process, which is critical to our financial results and condition, requires difficult, subjective and complex judgments, including forecasts of how current and future economic conditions might impair the ability of borrowers to repay their loans. However, if the information upon which the assessment is made proves to be inaccurate or if we fail to identify factors properly or fail to estimate accurately the impact of factors that are identified, the provisions made for credit impairment may be insufficient, which could have a material adverse effect on our financial performance.

In addition, in assessing whether to extend credit or enter into other transactions with customers and counterparties, we rely on information provided by or on behalf of customers or counterparties, including financial statements and other financial information. We may also rely on representations of customers and counterparties as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors. Our financial performance could be negatively impacted to the extent we rely on information that is inaccurate or materially misleading.

Sovereign risk may destabilize global financial markets adversely affecting all participants, including ANZ New Zealand.

Sovereign risk is the possibility that foreign governments will default on their debt obligations, increase borrowings, be unable to refinance their debts as and when they fall due, or nationalize participants in their economy. Sovereign risk remains in many economies, including the United States and in Europe. Should one sovereign default, there could be a cascading effect to other markets and countries, the consequences of which are difficult to predict and may be similar to or worse than those experienced during the global financial crisis and subsequent sovereign debt crises. Such events could destabilize global financial markets, adversely affecting all participants, including ANZ New Zealand.

Failure to maintain our credit ratings and those of our subsidiaries could adversely affect our cost of funds, liquidity, competitive position and access to capital markets.

The credit ratings assigned to us and our subsidiaries by rating agencies are based on an evaluation of a number of factors, including our ability to maintain a stable earnings stream, capital ratios, credit quality and risk management controls, funding sources, and liquidity monitoring procedures. A credit rating downgrade could be driven by the occurrence of one or more of the other risks identified in this section or by other events. In addition, a reduction in New Zealand's sovereign credit rating could adversely affect our credit rating.

The downgrade of ANZBGL's credit rating could adversely affect our credit rating.

If we fail to maintain our current credit ratings, this could adversely affect our cost of funds and related margins, our liquidity, our competitive position, existing contractual relations, the willingness of counterparties to transact with us and our ability to access capital markets. It could also trigger our obligations under certain bilateral provisions in some of our trading and collateralized financing contracts.

Credit ratings may be revised, withdrawn or suspended by the relevant credit rating agency at any time. In March 2015 and April 2015, Moody's Investors Service and Standard & Poor's respectively released new bank rating methodologies. This did not result in a change to credit ratings assigned to ANZ New Zealand by either Moody's Investors Service or Standard & Poor's, though there can be no assurance as to the future impact on our credit ratings. Credit ratings are not a recommendation by the relevant rating agency to invest in securities we offer.

A weakening of the real estate market in New Zealand would adversely affect us.

Residential and rural property lending, together with property finance, including real estate development and investment property finance, are important to our business.

A decrease in property valuations in New Zealand could result in a decrease in the amount of new lending we are able to write and/or increase the losses we may experience from our existing loans, which, in either case, could materially and adversely affect our financial condition and results of operation. A significant slowdown in the New Zealand housing market could adversely affect our business, operations and financial condition.

House prices in March 2015 were 16.9% higher in the Auckland region than a year earlier, compared with an annual increase of 3.2% for the rest of the country. A market correction could have the adverse effects described above. The RBNZ has recently announced several policy initiatives designed to curb house price inflation in Auckland. See the section entitled "Regulation and Supervision – Recent Developments."

An increase in the failure of third parties to honor their commitments in connection with our trading, lending, derivatives and other activities may adversely affect our results.

We are exposed to the potential risk of credit-related losses that can occur as a result of a counterparty being unable or unwilling to honor its contractual obligations. As with any financial services organization we assume counterparty risk in connection with our lending, trading, derivatives, insurance and other businesses where we rely on the ability of a third party (including reinsurers) to satisfy its financial obligations to us on a timely basis. We are also subject to the risk that our rights against third parties may not be enforceable in certain circumstances.

There is a risk that subsequent events will not be the same as assumed in our original assessment of the ability of a third party to satisfy its obligations. Such credit exposure may also be increased by a number of factors

including declines in the financial condition of the counterparty, the value of any assets we hold as collateral and the market value of the counterparty instruments and obligations it holds. Credit losses can and have resulted in financial services organizations realizing significant losses and in some cases failing altogether.

To the extent our credit exposure increases, the increase could have an adverse effect on our business and profitability if material unexpected credit losses occur.

We are subject to operational risk, which may adversely impact our results.

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events. This definition includes legal risk, and the risk of reputational loss or damage arising from inadequate or failed internal processes, people and systems, but excludes strategic risk.

Loss from operational risk events could adversely affect ANZ New Zealand's financial results. Such losses can include fines, penalties, loss or theft of funds or assets, legal costs, customer compensation, loss of shareholder value, reputational loss, loss of life or injury to people, and loss of property and/or information.

Operational risk is typically classified into the risk event type categories to measure and compare risks on a consistent basis. For examples of operational risk events, see the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations – Operational Risk".

Direct or indirect losses that occur as a result of operational failures, breakdowns, omissions or unplanned events could adversely affect ANZ New Zealand's financial results.

Notwithstanding anything in this risk factor, this risk factor should not be taken as implying that either of the Issuers or the Guarantor will be unable to comply with its obligations as a company with securities admitted to the Official List.

We are subject to market risk (including foreign exchange risk) and liquidity risk, which may adversely impact our results through exposure to trading positions and management of financial positions.

Market risk relates to the risk of loss arising from changes in interest rates, foreign exchange rates, credit spreads, equity prices and indices, prices of commodities, debt securities and other financial contracts including derivatives. Losses arising from these risks may have a material adverse effect on us.

We are also exposed to liquidity risk, which is the risk that we are unable to raise funds or have insufficient funds or there are unforeseen demands on cash and as a result, we are unable to meet our payment obligations as they fall due, including obligations to repay deposits and maturing wholesale and customer debt. Reduced liquidity could also lead to an increase in cost of our borrowings and possibly constrain the volume of new lending, which in each case could adversely affect our profitability.

As we conduct business in several different currencies, although mainly New Zealand dollars, our businesses may be affected by a change in currency exchange rates. Additionally, as our financial statements are prepared and stated in New Zealand dollars any appreciation in the New Zealand dollar against other currencies in which we earn revenues may adversely affect our reported earnings.

The appreciation in the New Zealand dollar relative to other currencies has adversely affected, and could continue to have an adverse effect on, certain portions of the New Zealand economy, including agricultural exports, international tourism, manufacturers, and import-competing producers. Similarly, depreciation in the New Zealand dollar relative to other currencies would increase debt service obligations in New Zealand dollar terms of unhedged exposures.

Disruption of information technology systems or failure to successfully implement new technology systems could significantly interrupt our business, which may adversely affect our business, operations and financial condition.

We are highly dependent on information systems and technology. Therefore, there is a risk that these, or the services we use or are dependent upon, might fail, including because of unauthorized access or use. Most of our daily operations are computer-based and information technology systems are essential to maintaining effective communications with customers. We are also conscious that threats to information systems and technology are continuously evolving and that cyber threats and risk of attacks are increasing. We may not be able to anticipate or implement effective measures to prevent or minimize disruptions that may be caused by all cyber threats. The exposure to systems risks includes the complete or partial failure of information technology systems or data center infrastructure, the inadequacy of internal and third party information technology systems due to, among other things, failure to keep pace with industry developments and the capacity of the existing systems to effectively accommodate growth, prevent unauthorized access and integrate existing and future acquisitions and alliances.

To manage these risks we have disaster recovery and information technology governance in place. However, the steps we are taking in this regard may not be effective and any failure of these systems could result in business interruption, customer dissatisfaction and ultimately loss of customers, financial compensation, damage to reputation and/or a weakening of our competitive position, which could adversely impact our business and have a material adverse effect on our financial condition and operations.

In addition, we have an ongoing need to update and implement new information technology systems, in part to assist us with satisfying regulatory demands, ensuring information security, enhancing computer-based banking services for our customers and integrating the various segments of our business. We may not implement these projects effectively or execute them efficiently, which could lead to increased project costs, delays in our ability to comply with regulatory requirements, failure of information security controls or a decrease in our ability to service our customers. We rely on ANZBGL to provide a number of information technology systems and any failure of ANZBGL systems could directly affect ANZ New Zealand.

ANZ New Zealand is exposed to risks associated with information security, which may adversely affect its financial results and reputation.

Information security means protecting information and information systems from unauthorized access, use, disclosure, disruption, modification, perusal, inspection, recording or destruction. As a financial institution, ANZ New Zealand handles a considerable amount of personal and confidential information about its customers and its own internal operations.

ANZ New Zealand employs a team of information security experts which is responsible for the implementation of ANZ Group's Information Security Policy. ANZ New Zealand also uses third parties to process and manage information on its behalf, and any failure on their part could adversely affect our business. ANZ New Zealand is conscious that threats to information systems are continuously evolving and that cyber threats and risk of attacks are increasing, and as such we may be unable to develop policies and procedures to adequately address or mitigate such risks. Accordingly, information about ANZ New Zealand and/or our clients may be inadvertently accessed, inappropriately distributed or illegally accessed or stolen. ANZ New Zealand may not be able to anticipate or to implement effective measures to prevent or minimize damage that may be caused by all information security threats. Any unauthorized access of ANZ New Zealand's information systems or unauthorized use of its confidential information could potentially result in disruption of our operations, breaches of privacy laws, regulatory sanctions, legal action, and claims for compensation or erosion to our competitive market position, which could adversely affect ANZ New Zealand's financial position and reputation.

Litigation and contingent liabilities may adversely impact our results.

We are subject to litigation, regulatory actions and contingent liabilities, which, if they crystallize, may adversely impact our results. While legal advice has been obtained and provisions as we have deemed necessary have been made and disclosed in the 2014 Disclosure Statement, there is a risk that these contingencies may be larger than anticipated or that additional litigation or other contingent liabilities will arise. Our current material contingent liabilities are described in "Recent Developments".

Details regarding ANZ New Zealand's material contingent liabilities as at March 31, 2015 are contained in Note 16 to ANZ New Zealand's unaudited financial statements for the six months ended March 31, 2015 (attached as Annex A to this Offering Memorandum).

There is a risk that these contingent liabilities in Note 16 may be larger than anticipated or that additional litigation or other contingent liabilities may arise.

Changes in fiscal and monetary policies may adversely impact our results.

The RBNZ regulates the supply of money and credit in New Zealand. Its policies determine in large part the cost of funds to us for lending and investing and the return we will earn on those loans and investments. Both of these affect our net interest margin and can materially affect the value of financial instruments we hold, such as debt securities and hedging instruments. The policies of the RBNZ can also affect our borrowers, potentially increasing the risk that they may fail to repay their loans. Changes in the RBNZ's policies are difficult to accurately predict.

Regulatory actions may adversely impact our results.

We are subject to laws, regulations and codes of practice in New Zealand, Australia and other countries in which we operate, trade, raise funds or in respect of which we have some other connection (including the United Kingdom and the United States). These regulations vary from country to country but generally are designed to protect depositors and the banking system as a whole, not holders of any Notes of any of the Issuers. In particular, the ANZ New Zealand Group's banking, funds management, and insurance activities are subject to extensive regulation, mainly relating to its liquidity levels, capital, solvency, provisioning, and insurance policy terms and conditions. As a result of the global financial crisis, we continue to expect increased

regulatory focus on capital and liquidity requirements, customer relations and other aspects of our business that may impose increased regulatory burdens. For example, the RBNZ, APRA, the Basel Committee on Banking Supervision and regulators in other jurisdictions have revised standards and released discussion papers, proposals and decisions in regards to strengthening the resilience of the banking and insurance sectors, including proposals and decisions to strengthen capital and liquidity requirements for the banking sector (widely known as “**Basel III**”).

The New Zealand Government and its agencies, including the RBNZ, the Commerce Commission and the Financial Markets Authority, have supervisory oversight over us. To the extent that we have operations, trade or raise funds in, or have some other connection with, countries other than Australia or New Zealand then such activities may be subject to the laws of, and regulation by agencies in, such countries, such as United States governmental agencies, including the Federal Reserve Board, the U.S. Department of Treasury and the Office of the Comptroller of the Currency, and United Kingdom agencies, including the Financial Conduct Authority, and other financial industry regulatory bodies in those countries and in other relevant countries. To the extent that these regulatory requirements limit our operations or flexibility they could adversely impact on our profitability and prospects. In addition, our failure to comply with applicable laws, regulations or codes of practice could result in the imposition of sanctions by regulatory agencies, compensatory action by affected persons, and could damage our reputation, in any jurisdiction.

These regulatory and other governmental agencies (including revenue and tax authorities) frequently review banking and tax laws, regulations and policies. Changes to laws, regulations or codes of practice, including changes in interpretation or implementation of laws, regulations or policies, could affect us in substantial and unpredictable ways and may even conflict with each other. These may include, among other things, increasing required levels of bank liquidity and capital adequacy, requiring changes to systems and processes, limiting the types, amount and composition of financial services and products we may offer, constraining outsourcing or offshoring arrangements and/or increasing the ability of non-banks to offer competing financial services and products, as well as changes to accounting standards, taxation laws and prudential regulatory requirements. For instance, Dodd-Frank Wall Street Reform and Consumer Protection Act (the “**Dodd-Frank Act**”) was signed into law in the United States in July 2010. The Dodd-Frank Act has many different components that affect many aspects, in the United States and internationally, of the business of banking, including securitization, proprietary trading, investing, OTC derivatives and other activities. Because different components of the Dodd-Frank Act are subject to oversight and implementation by different regulatory agencies in the U.S., the actual timing of the implementation of the different components has been varied, with some significantly implemented at this time and others still waiting to be implemented. The full impact of the Dodd-Frank Act on the Issuers continues to be evaluated as the rulemaking process continues and will depend on the timing and scope of the final rules implemented by U.S. regulatory agencies.

The Credit Contracts and Consumer Finance Amendment Act 2014 (“**CCCFA 2014**”) came fully into force on June 6, 2015 and introduced responsible lending principles and strengthened consumer rights in lending transactions. The Ministry of Consumer Affairs has published a responsible lending code setting out guidance for lenders on compliance with the responsible lending principles in the CCCFA 2014. Although the code is not binding on lenders, in any proceeding relating to the Credit Contracts and Consumer Finance Act 2003, evidence of compliance with the code will be treated as evidence of compliance with the binding responsible lending principles in the CCCFA 2014.

ANZ New Zealand is registered under the Reserve Bank of New Zealand Act 1989 (New Zealand) (“**RBNZ Act**”) and supervised by the RBNZ. As part of its registration, ANZ New Zealand is subject to Conditions of Registration imposed by the RBNZ. For details of ANZ New Zealand’s current Conditions of Registration, see “Regulation and Supervision—Conditions of Registration: ANZ Bank New Zealand Limited”. The Conditions of Registration may be changed at any time, though the RBNZ is required to give ANZ New Zealand notice and consider submissions made by ANZ New Zealand prior to any such change.

ANZ New Zealand is required to comply with Condition of Registration 11, which embodies the RBNZ’s policy on outsourcing and requires ANZ New Zealand to have the legal and practical ability to control and execute business functions to ensure the performance of certain outcomes relating to clearing and settlement, risk position identification and monitoring, and customer access to payment facilities.

ANZ New Zealand has received RBNZ accreditation as an advanced IRB and AMA bank under the principles laid out by the Basel Committee on Banking Supervision in respect of the Capital Accord (widely known as Basel III). That accreditation is subject to conditions and these have been incorporated into the current Conditions of Registration. We are regularly reviewed by both RBNZ and APRA in terms of maintaining that accreditation.

In the event that the RBNZ were to conclude that we did not satisfy these conditions, sanctions could be imposed on us. These could include increases in our required levels of capital or additional limitations on the conduct of our business. In addition, the RBNZ could require us to take additional steps and incur additional expense to satisfy the conditions.

ANZ New Zealand may face increased compliance costs as a result of United States tax legislation.

In March 2010, the United States enacted the Foreign Account Tax Compliance Act (“**FATCA**”) that requires non-United States banks and other financial institutions to provide information on United States account holders to the United States Federal tax authority, the Internal Revenue Service (“**IRS**”). The United States has entered into an intergovernmental agreement (“**IGA**”) with a number of jurisdictions (including New Zealand) that generally requires such jurisdictions to enact legislation or other binding rules pursuant to which local financial institutions and branches provide such information to their non-United States local revenue authority to forward to the IRS. If this information is not provided in a manner and form meeting the applicable requirements, a non-United States institution may be subjected to penalties and a 30% withholding tax may be applied to certain amounts paid to it. While such withholding tax may currently apply to certain payments derived from sources within the United States, no such withholding tax will be imposed on any payments derived from sources outside the United States that are made prior to January 1, 2017, at the earliest. New Zealand has signed an IGA with the United States and has enacted legislation to implement its agreement with the United States. Local guidance in relation to the enacted legislation is still evolving. ANZ New Zealand has made, and is expected to make, significant investments in order to comply with the requirements of FATCA and local laws implementing an IGA. For more information, see “Taxes—United States federal income taxation—FATCA Withholding” below.

We may experience challenges in managing our capital base, which could give rise to greater volatility in capital ratios, and materially impact our business and our ability to obtain funding.

Our capital base is critical to the management of our businesses and access to funding. We are required by the RBNZ to maintain adequate regulatory capital, and changes to the capital adequacy requirements imposed on ANZBGL by APRA could affect our business.

Under current regulatory requirements, risk weighted assets and expected loan losses increase as a counterparty’s risk grade worsens. These additional regulatory capital requirements compound any reduction in capital resulting from increased provisions for loan losses in times of stress. As a result, greater volatility in capital ratios may arise and may require us to hold additional capital.

Our capital ratios may be affected by a number of factors, such as lower earnings, increased asset growth, changes in the value of the New Zealand dollar against other currencies which impacts the foreign currency translation reserve and changes in business strategy (including acquisitions and investments or an increase in capital intensive businesses).

Global and domestic regulators, including the Basel Committee have released proposals and decisions to strengthen, among other things, the liquidity and capital requirements of banks and funds management and insurance entities. These proposals and decisions, together with any risks arising from any regulatory changes, are described above in the risk factor entitled “Regulatory actions may adversely affect our results” and in the section entitled “Regulation and Supervision”.

Application of and changes to accounting policies may adversely impact our results.

The accounting policies and methods that we apply are fundamental to how we record and report our financial position and results of our operations. The accounting policies for the ANZ New Zealand Financial Statements for the six months ended March 31, 2015 and for the years ended September 30, 2014, and September 30, 2013, are set forth in note 1 to the consolidated financial statements for the six months ended March 31, 2015 and for the year ended September 30, 2014. Management must exercise judgment in selecting and applying many of these accounting policies and methods so that not only do they comply with generally accepted accounting principles but they also reflect the most appropriate manner in which to record and report on the financial position and results of operations. However, these accounting policies may be applied inaccurately, resulting in a misstatement of financial position and results of operations.

In some cases, management must select an accounting policy or method from two or more alternatives, any of which might comply with generally accepted accounting principles and be reasonable under the circumstances yet might result in reporting materially different outcomes than would have been reported under another alternative.

We are subject to contagion and reputation risk which may adversely impact our results.

As we are part of a larger business group, we are vulnerable to financial and reputational damage by virtue of our association with other members of the ANZ Group, any of which may suffer the occurrence of a risk event. In our case, the damage may be financial and may impact our results if financial resources are withdrawn by ANZBGL to support us or another member of the ANZ Group. Reputation risk may arise as a result of a contagion event or as a result of our own actions. The reputational consequences (including damage to the ANZ Group franchise) of the occurrence of a risk event, for example major operational failure, may exceed the direct cost of the risk event itself and may impact on our results.

We are subject to acquisition and restructuring risk which may materially and adversely impact our results.

We regularly examine a range of corporate opportunities including material acquisitions and dispositions, with a view to determining whether those opportunities will enhance our strategic position and financial performance. Any corporate opportunity that is pursued could, for a variety of reasons, turn out to have a material adverse effect on our financial condition or results of operations. The successful implementation of our corporate strategy will depend on a range of factors such as potential funding strategies and challenges associated with integrating and adding value to acquired businesses.

There can be no assurance that any acquisition would have the anticipated positive results, including results relating to the total cost of integration, the time required to complete the integration, the amount of longer-term cost savings, the overall performance of the combined entity, or an improved price for ANZ Group securities. The ANZ New Zealand Group's operating performance, risk profile and capital structure may also be affected by these corporate opportunities and there is a risk that any of ANZ New Zealand's credit ratings may be placed on credit watch or downgraded if these opportunities are pursued.

Integration of an acquired business can be complex and costly, sometimes including combining relevant accounting and data processing systems, and management controls, as well as managing relevant relationships with employees, customers, counterparties, suppliers and other business partners. Integration efforts could create inconsistencies in standards, controls, procedures and policies, as well as divert management attention and resources. This could adversely affect the ANZ New Zealand Group's ability to conduct its business successfully and impact the ANZ New Zealand Group's operations or results. Additionally, there can be no assurance that employees, customers, counterparties, suppliers and other business partners of newly acquired businesses will remain as such post-acquisition, and the loss of employees, customers, counterparties, suppliers and other business partners could adversely affect the ANZ New Zealand Group's operations or results.

Acquisitions, disposals and restructuring may also result in business disruptions that cause the ANZ New Zealand Group to lose customers or cause customers to remove their business from the ANZ New Zealand Group to competing financial institutions. It is possible that the integration process related to acquisitions and restructurings could result in the disruption of the ANZ New Zealand Group's on-going businesses or inconsistencies in standards, controls, procedures and policies that could adversely affect the ANZ New Zealand Group's ability to maintain relationships with employees, customers, counterparties, suppliers and other business partners which could adversely affect the ANZ New Zealand Group's ability to conduct its business successfully.

ANZ New Zealand Group may experience reductions in the valuation of some of its assets, resulting in fair value adjustments that may have a material adverse effect on its earnings.

Under NZ IFRS, ANZ New Zealand Group recognizes at fair value:

- financial instruments classified as "held-for-trading" or "designated as at fair value through profit or loss";
- financial assets classified as "available-for-sale"; and
- derivatives.

Generally, in order to establish the fair value of these instruments, ANZ New Zealand Group relies on quoted market prices or, where the market for a financial instrument is not sufficiently active, fair values are based on discounted cash flow models or other market accepted valuation techniques. In certain circumstances, the data for individual financial instruments or classes of financial instruments used by such estimates or techniques may not be available or may become unavailable due to changes in market conditions. In these circumstances, the fair value is determined using data derived and extrapolated from market data, and tested against historic transactions and observed market trends.

The valuation models incorporate the impact of factors that would influence the fair value determined by a market participant. Principal inputs used in the determination of the fair value of financial instruments based on valuation techniques include data inputs such as statistical data on delinquency rates, foreclosure rates, actual losses, counterparty credit spreads, recovery rates, implied default probabilities, credit index tranche prices and correlation curves. These assumptions, judgments and estimates need to be updated to reflect changing trends and market conditions. The resulting change in the fair values of the financial instruments could have a material adverse effect on ANZ New Zealand Group's earnings.

We are exposed to insurance risk and potential fluctuations in investment and global securities markets, which may adversely affect our results.

Insurance risk is the risk of loss due to increases in policy benefits arising from variations in the incidence or severity of insured events. Insurance risk exposure arises in insurance business as the risk that claims payments are greater than expected. In the life insurance business this arises through mortality (death) and morbidity (illness and injury) risks being greater than expected. Since the full acquisition of ANZ Wealth (formerly known as ING (NZ) Holdings Limited), we have increased exposure to insurance risk in the life insurance business which may adversely affect our results.

The profitability of our funds management and insurance business is affected by changes in investment markets and weaknesses in global securities markets due to credit, liquidity or other problems which could result in a decline in our revenues from our funds management and insurance business.

We may be exposed to the impact of future climate change, geological, plant and animal, biological and other extrinsic events which may adversely affect our business, operations and financial condition.

We may be exposed to climate related events (including climate change). These events may include severe storms, droughts, cyclones, hurricanes, floods and rising sea levels. The impact of such events may temporarily interrupt or restrict the provision of some of our services and also adversely affect our collateral position in relation to credit facilities extended to customers.

We may also be exposed to other events such as geological events (volcanic or seismic activity, tsunamis), plant or animal diseases or other extrinsic events, such as flu pandemics. These may severely disrupt normal business activity and have a negative effect on our business, operations and financial condition. The most recent examples of this are the major earthquakes in the Canterbury area. While much of the widespread property damage was covered by public (Earthquake Commission) and private insurance, there have been and may continue to be negative impacts on property (and hence collateral) values and on future levels of insurance and reinsurance coverage across New Zealand. The insurance industry is progressively moving away from offering 'full replacement' housing insurance towards offering housing insurance on a 'sum insured' basis. A reduction in the value of New Zealand property as a result of geological events such as earthquakes could increase lending losses which may adversely affect our business operations and financial condition. As a consequence of our large market share in the New Zealand rural sector (particularly the dairy sector), climatic, disease and other risks that can have a large impact on these sectors could adversely impact our financial results.

See also "Risk Factors — We are subject to credit risk, which may adversely impact our results".

We may be exposed to the risk of impairment of goodwill and other intangible assets that may adversely affect our results.

In certain circumstances, the ANZ New Zealand Group may be exposed to a reduction in the value of intangible assets. As at March 31, 2015, the ANZ New Zealand Group carried a goodwill balance of \$3,233 million. The ANZ New Zealand Group is required to assess the recoverability of this goodwill balance on at least an annual basis based on a discounted cash flow calculation. Changes in the assumptions upon which the calculation is based, together with expected changes in future cash flows, could materially impact this assessment, resulting in the potential write-off of a part or all of the goodwill balance. Similarly, as at March 31, 2015, the ANZ New Zealand Group carried capitalized software balances and other intangible assets of \$229 million and the recoverability of these assets is assessed for indicators of impairment at least annually. In the event that software is no longer in use, or that the cash flows generated by the intangible assets do not support the carrying value, an impairment may be recorded, adversely impacting ANZ New Zealand Group's results.

The unexpected loss of key staff or inadequate management of human resources may adversely affect the ANZ New Zealand Group's business, operations and financial condition.

The ANZ New Zealand Group's ability to attract and retain suitably qualified and skilled employees is an important factor in achieving its strategic objectives. At ANZ New Zealand, there are certain individuals and key executives whose skills and reputation are critical to setting the strategic direction, successful management and growth of ANZ New Zealand, and whose unexpected loss due to resignation, retirement, death or illness may adversely affect its operations and financial condition. In addition, ANZ New Zealand may in the future have difficulty attracting highly qualified people to fill important roles, which could adversely affect the ANZ New Zealand Group's business, operations and financial condition.

The assets of the ANZNZ Covered Bond Trust are not available to creditors of ANZ New Zealand, including holders of Notes issued by ANZNIL or ANZ New Zealand.

Under the €5 billion ANZ New Zealand covered bond program, covered bond investors have full recourse to ANZNIL or ANZ New Zealand as issuer and ANZ New Zealand as guarantor and also to a cover pool of assets held by the ANZNZ Covered Bond Trust. The assets of the ANZNZ Covered Bond Trust are made up of certain housing loans and related securities originated by ANZ New Zealand and which are security for the guarantee by ANZNZ Covered Bond Trust Limited as trustee of the ANZNZ Covered Bond Trust of covered bonds issued by ANZ New Zealand or ANZNIL, from time to time.

As at March 31, 2015, the rights to cash flows associated with housing loans and related securities with a carrying value of \$7,010 million or 5.2% of ANZ New Zealand's total assets were held in the ANZNZ Covered Bond Trust. The assets of the ANZNZ Covered Bond Trust do not qualify for derecognition as ANZ New Zealand retains substantially all of the risks and rewards of the transferred assets. Therefore, the establishment of the covered bond program and the ANZNZ Covered Bond Trust do not change ANZ New Zealand's financial statements.

The covered bonds are guaranteed by ANZNZ Covered Bond Trust Limited as trustee of the ANZNZ Covered Bond Trust under the terms of the covered bond program. All obligations of ANZNIL, as issuer, are guaranteed by ANZ New Zealand. The assets of the ANZNZ Covered Bond Trust are not available to creditors of ANZ New Zealand, other than covered bondholders, including holders of Notes issued by ANZNIL or ANZ New Zealand, although ANZ New Zealand (or its liquidator or statutory manager) may have a claim against the residual assets of the ANZNZ Covered Bond Trust (if any) after all prior ranking creditors of the ANZNZ Covered Bond Trust have been satisfied.

We may be exposed to risks pertaining to the provision of advice, recommendations or guidance about financial products and services in the course of its sales and marketing activities which may adversely affect the ANZ New Zealand Group's business and operations.

Such risks can include:

- the provision of unsuitable or inappropriate advice (commensurate with a customer's objectives and appetite for risk),
- the representation of, or disclosure about, a product or service which is inaccurate, or does not provide adequate information about risks and benefits to customers,
- a failure to appropriately manage conflicts of interest within sales and /or promotion processes (including incentives and remuneration for staff engaged in promotion, sales and/or the provision of advice), and
- a failure to deliver product features and benefits in accordance with terms, disclosures, recommendations and/or advice.

Exposure to such risk may increase during periods of declining investment asset values (such as during a period of economic downturn or investment market volatility), leading to sub-optimal performance of investment products and/or portfolios that were not aligned with the customer's objectives and risk appetite.

We are regulated under various legislative mechanisms in the countries in which we operate that provide for consumer protection around advisory, marketing and sales practices. These may include, but are not limited to, appropriate management of conflicts of interest, appropriate accreditation standards for staff authorized to provide advice about financial products and services, disclosure standards, standards for ensuring adequate assessment of client/product suitability, quality assurance activities, adequate record keeping, and procedures for the management of complaints and disputes.

Risks pertaining to advice about financial products and services may result in material litigation (and associated financial costs), regulatory actions, and/or reputational consequences.

We are exposed to the risk of receiving significant regulatory fines and sanctions in the event of breaches of regulation and law relating to anti-money laundering, counter-terrorism financing, sanctions and market manipulation

Anti-money laundering, counter-terrorist financing, sanctions compliance and market manipulation have been the subject of increasing regulatory change and enforcement in recent years. The increasingly complicated environment in which we operate across the Asia Pacific region has heightened these operational and compliance risks. Furthermore, the upward trend in compliance breaches by global banks and the related fines and settlement sums means that these risks continue to be an area of focus for ANZ New Zealand.

While ANZ New Zealand believes it maintains appropriate policies, and has invested in procedures and internal controls aimed to detect, prevent and report money laundering, terrorist financing, market manipulation and sanctions breaches, the risk of non-compliance remains high given the scale and complexity of our business. A failure to operate a robust program to combat money laundering, bribery and terrorist financing or to ensure compliance with economic sanctions and market conduct norms could have serious legal and reputational consequences for ANZ New Zealand and its employees. Consequences can include fines, criminal and civil penalties, civil claims, reputational harm and limitations on doing business in certain jurisdictions.

Risks relating to the Notes

Investors may be subject to loss of some or all of their investment if any Obligor is subject to bankruptcy or insolvency proceedings or some other event occurs which impairs the ability of the Obligor to meet its obligations under the Notes. An investor may also lose some or all of its investment if it seeks to sell the relevant Notes prior to their scheduled maturity, and the sale price of the Notes in the secondary market is less than the initial investment or the relevant Notes are subject to certain adjustments in accordance with the terms and conditions of such Notes that may result in the scheduled amount to be paid of asset(s) to be delivered upon redemption being reduced to or being valued at an amount less than an investor's initial investment.

The Notes are subject to transfer restrictions under U.S. law.

The Notes have not been, and will not be, registered under the Securities Act or any other applicable securities laws and are being offered hereby to QIBs in transactions that are either exempt from registration pursuant to Section 4(a)(2) of, and Rule 144A under, the Securities Act, or are not subject to registration in reliance on Regulation S. Accordingly, under U.S. law the Notes are subject to certain restrictions on the resale and other transfer thereof as set forth under "Notice to Purchasers" and "Plan of Distribution". As a result of such restrictions, there can be no assurance as to the existence of a secondary market for the Notes or the liquidity of such market if one develops. Consequently, you must be able to bear the economic risk of an investment in your Notes for an indefinite period of time.

Redemption may adversely affect your return on the Notes.

If the relevant Issuer is obligated to pay additional amounts on the Notes or, in the case of the ANZNIL Notes, ANZ New Zealand is obligated to pay additional amounts under the Guarantee, the relevant Issuer may redeem the Notes. The relevant Final Terms may specify that the Notes are redeemable at our option. We may choose to redeem your Notes at times when prevailing interest rates are lower than when you invested. In addition, if your Notes are subject to mandatory redemption, we may be required to redeem your Notes at times when prevailing interest rates are lower than when you invested. As a result, you generally will not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate equal to or higher than that applicable to your Notes being redeemed.

Because Global Notes will be held by or on behalf of DTC and/or an alternative clearing system (including Euroclear and Clearstream, Luxembourg), holders of Notes issued in the form of Global Notes will have to rely on their procedures for transfer, payment and communication with the relevant Obligor.

Notes may be represented by one or more Global Notes. Such Global Notes will be deposited with a common depositary for DTC and/or an alternative clearing system (the "Depositary"). Apart from the circumstances described in this Offering Memorandum and Global Note, investors will not be entitled to Notes in definitive form. The Depositary, or its nominee, will be the sole registered owner and holder of all Notes represented by a Global Note, and investors will be permitted to own only indirect interests in a Global Note. Indirect interests must be held by means of an account with a broker, bank or other financial institution that in turn has an account with the Depositary or with another institution that does. Thus, an investor whose Note is represented by a Global Note will not be a holder of the Note, but only an indirect owner of an interest in the Global Note. As an indirect owner, an investor's rights relating to a Global Note will be governed by the account rules of the Depositary and those of the investor's financial institution or other intermediary through which it holds its interest (e.g., Euroclear or Clearstream, Luxembourg, if DTC is the Depositary), as well as general laws relating to securities transfers. We do not recognize this type of investor or any intermediary as a holder of Notes and instead deal only with the Depositary that holds the Global Note. An investor in a Global Note will be an indirect holder and must look to his or her own bank or broker for payments on the Notes and protection of his or her legal rights relating to the Notes.

See "Description of the Notes and the Guarantee—Payment mechanics for Notes" and "Legal Ownership and Book-Entry Issuance" for further discussion of the risks associated with holding Global Notes.

Floating Rate Notes with caps or floors bear certain risks.

Floating Rate Notes can be volatile investments. If they are structured to include caps or floors, their market values may be even more volatile than those for securities that do not include those features.

Inverse Floating Rate Notes with caps or floors bear certain risks.

Inverse floating rate Notes have an interest rate equal to a fixed rate minus a rate based upon a reference rate. The market values of those Notes typically are more volatile than market values of other conventional floating rate debt securities based on the same reference rate (and with otherwise comparable terms). Inverse floating rate Notes are more volatile because an increase in the reference rate not only decreases the interest

rate of the Notes, but may also reflect an increase in prevailing interest rates, which further adversely affects the market value of these Notes.

Because the Fiscal Agency Agreement contains no limit on the amount of additional debt that we may incur, our ability to make timely payments on the Notes you hold may be affected by the amount and terms of our future debt.

Our ability to make timely payments on our outstanding debt may depend on the amount and terms of our other obligations, including any outstanding Notes. The Fiscal Agency Agreement does not contain any limitation on the amount of indebtedness that we may issue in the future. As we issue additional Notes under the Fiscal Agency Agreement or incur other indebtedness, unless our earnings grow in proportion to our debt and other fixed charges, our ability to service the Notes on a timely basis may become impaired.

Fixed/Floating Rate Notes bear certain risks.

Fixed/floating rate Notes may bear interest at a rate that the Issuer may elect to convert from a fixed rate to a floating rate, or from a floating rate to a fixed rate. The Issuer's ability to convert the interest rate will affect the secondary market and the market value of the Notes since the Issuer may be expected to convert the rate when it is likely to produce a lower overall cost of borrowing. If the Issuer converts from a fixed rate to a floating rate, the spread on the fixed/floating rate Notes may be less favorable than then prevailing spreads on comparable floating rate Notes tied to the same reference rate. In addition, the new floating rate at any time may be lower than the rates on other Notes. If the Issuer converts from a floating rate to a fixed rate, the fixed rate may be lower than then prevailing rates on its Notes.

Notes issued at a substantial discount or premium bear certain risks.

The market values of securities issued at a substantial discount or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest bearing securities. Generally, the longer the remaining term of the securities, the greater the price volatility as compared to conventional interest bearing securities with comparable maturities.

Modification and waivers and substitution bear certain risks.

The terms of the Notes contain provisions for calling meetings of holders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

There may not be any trading market for the Notes; many factors affect the trading and market value of the Notes.

Upon issuance, the Notes may not have an established trading market. Although the Notes may be listed on the London Stock Exchange, we cannot ensure that a trading market for your Notes will ever develop or be maintained if developed. In addition to our creditworthiness, many factors affect the trading market for, and trading value of, the Notes. These factors include but are not limited to:

- the complexity and volatility of the formula applicable to the Notes (if any);
- the method of calculating the principal, premium and interest in respect of the Notes;
- the time remaining to the stated maturity of the Notes;
- the outstanding amount of the Notes;
- any redemption features of the Notes;
- the amount of other debt securities linked to the formula applicable to the Notes (if any);
- the level, direction and volatility of market interest rates generally;
- investor confidence and market liquidity; and
- our financial condition and results of operations.

There may be a limited number of buyers when you decide to sell the Notes. This may affect the price you receive for such Notes or the ability to sell such Notes at all. In addition, Notes that are designed for specific investment objectives or strategies often experience a more limited trading market and more price volatility

than those not so designed. You should not purchase the Notes unless you understand and know you can bear all of the investment risks involving the Notes.

The Notes may be de-listed, which may materially affect your ability to resell.

Any Notes that are listed on the London Stock Exchange may be de-listed. We may, but are not obligated to, seek an alternative listing. However, if such an alternative listing is not available or in our opinion is unduly burdensome, an alternative listing for the Notes may not be obtained. Although no assurance is made as to the liquidity of the Notes as a result of the listing on the London Stock Exchange, delisting the Notes from the London Stock Exchange may have a material adverse effect on your ability to resell your Notes in the secondary market.

Notes denominated or payable in or linked to a non-U.S. dollar currency are subject to exchange rate and exchange control risks.

If you invest in a non-U.S. dollar Note, you will be subject to significant risks not associated with an investment in a Note denominated and payable in U.S. dollars, including the possibility of material changes in the exchange rate between U.S. dollars and the applicable foreign currency and the imposition or modification of exchange controls by the applicable governments. We have no control over the factors that generally affect these risks, including economic, financial and political events and the supply and demand for the applicable currencies. Moreover, if payments on non-U.S. dollar Notes are determined by reference to a formula containing a multiplier or leverage factor, the effect of any change in the exchange rates between the applicable currencies will be magnified. In recent years, exchange rates between certain currencies have been highly volatile and volatility between these currencies or with other currencies may be expected in the future. Fluctuations between currencies in the past are not necessarily indicative, however, of fluctuations that may occur in the future. Depreciation of your payment currency would result in a decrease in the U.S. dollar equivalent yield of your non-U.S. dollar Notes, in the U.S. dollar equivalent value of the principal and any premium payable at maturity or any earlier redemption of your non-U.S. dollar Notes and, generally, in the U.S. dollar equivalent market value of your non-U.S. dollar Notes.

Governmental exchange controls could affect exchange rates and the availability of the payment currency for your non-U.S. dollar Notes on a required payment date. Even if there are no exchange controls, it is possible that your payment currency will not be available on a required payment date for circumstances beyond our control. In these cases, we will be allowed to satisfy our obligations in respect of your non-U.S. dollar Notes in U.S. dollars or delay payment. See "Description of the Notes and the Guarantee—Currency of Notes" and "Considerations Relating to Notes Denominated or Payable in or Linked to a Non-U.S. dollar Currency" for further discussion of these risks.

The Notes' credit ratings may not reflect all risks of an investment in the Notes.

The credit ratings of the Notes may not reflect the potential impact of all risks related to structure and other factors on any trading market for, or trading value of, the Notes. In addition, real or anticipated changes in the credit ratings of the Notes will generally affect any trading market for, or trading value of, the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by an assigning rating agency. Each rating should be evaluated independently of any other information.

The Notes are subject to changes in tax law which could have an adverse effect.

Statements in this Offering Memorandum concerning the taxation of holders of Notes are of a general nature and are based upon current tax law and published practice in the jurisdictions stated. Such law and practice is subject to change, possibly with retrospective effect, and this could adversely affect holders of Notes. In addition, any change in an Issuer's tax status or in taxation legislation or practice in a relevant jurisdiction could adversely impact the ability of the Issuers to service the Notes and the market value of the Notes.

FATCA withholding may apply to payments on Notes, including as a result of the failure of a Noteholder or a Noteholder's bank or broker to provide information to taxing authorities.

The United States may impose a withholding tax of as high as 30% on payments made with respect to the Notes, but the rules for calculating the amount of such withholding tax are still undetermined. This withholding tax generally will only apply to payments made on or after January 1, 2017, at the earliest, and only with respect to Notes issued or modified at least six months after the date on which final regulations implementing the rules for calculating the amount of such withholding tax are published in final form. The withholding tax, when it applies, may be imposed at any point in a series of payments unless the relevant payee (including a bank, broker or individual) at each point complies with information reporting, certification and related requirements. Accordingly, a Noteholder that holds Notes through a bank or broker could be subject to withholding if, for example, its bank or broker is subject to withholding because the bank or broker fails to comply with these requirements even though the holder itself might not otherwise have been subject to

withholding. If a payment on the Notes is subject to this withholding tax, no additional amounts will be paid, and a Noteholder will receive less than the amount of the expected payment.

Prospective investors should consult their tax advisors and their banks or brokers regarding the possibility of this withholding. For more information, see "Taxes—United States federal income taxation—FATCA Withholding" below.

Proposals to reform LIBOR and other benchmark indices.

The London Inter-Bank Offered Rate ("**LIBOR**") and the Euro Interbank Offered Rate ("**EURIBOR**") are the subject of recent national, international and other regulatory guidance and proposals for reform. Some of these reforms, such as the replacement of the British Bankers' Association as LIBOR administrator with ICE Benchmark Administration Limited are already effective while others are still to be implemented. The implementation of such reforms and consequential changes to LIBOR and EURIBOR may cause them to perform differently than in the past, which could have a material adverse effect on the value of any Floating Rate Notes where the interest rate is calculated with reference to LIBOR or EURIBOR or may have other consequences that cannot be predicted. For more information, see "Description of the Notes—Additional information about LIBOR" below.

Use of Proceeds

ANZNIL will on-lend the net proceeds from the sale of all ANZNIL Notes to ANZ New Zealand. ANZ New Zealand intends to use the net proceeds from the sales of Notes (including Notes issued by ANZNIL) to provide additional funds for operations, for general corporate purposes and such other purposes as may be specified in a supplement hereto.

Capitalization, Funding and Capital Adequacy

The following table sets out the consolidated capitalization and capital adequacy of the ANZ New Zealand Group as at March 31, 2015. This information has been extracted from the ANZ New Zealand Unaudited Financial Statements for the six months ended March 31, 2015, included as part of Annex A to this Offering Memorandum. For more information concerning our capitalization and capital adequacy see "Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Offering Memorandum and the Half Year Disclosure Statement.

	As at March 31, 2015	
	(US\$ millions, except as indicated) ¹	(NZ\$ millions, except as indicated)
Capitalization and Funding		
Settlement balances payable	1,206	1,611

- (1) For the convenience of the reader, the financial data for the six months ended March 31, 2015 has been translated from NZ dollars into U.S. dollars using the noon buying rate for March 31, 2015 of NZ\$1.00=US\$0.7485.
- (2) Certain subordinated debt issued by ANZ New Zealand is subordinated in right of payment to the claims of depositors and all creditors of that bank and qualifies as tier 2 capital under the RBNZ's transitional rules. Fixing the base at the nominal amount of such instruments outstanding at December 31, 2012, their recognition is capped at 60% of that base from January 1, 2015; 40% from January 1, 2016; 20% from January 1, 2017; and from January 1, 2018 onwards these instruments will not be included in regulatory capital.
- (3) Total equity at March 31, 2015 comprised (NZ\$ millions):

	March 31, 2015
Ordinary share capital	7,913
Preference share capital	300
Reserves	(11)
Retained earnings	3,423
Total equity	11,625

All of the ordinary share capital has been issued. The number of issued ordinary shares at March 31, 2015 was 2,670,755,498 of which 2,670,104,786 were fully paid. 650,712 shares were uncalled and unpaid.

ANZ New Zealand issued 300,000,000 preference shares to its immediate parent, ANZ Holdings (New Zealand) Limited, which do not carry any voting rights.

- (4) As at March 31, 2015, all funding was unsecured except for: UDC secured investments of \$1,629 million, covered bonds of \$4,382 million, securities sold under repurchase agreements of \$43 million, cash collateral received on derivative financial instruments of \$364 million, and derivative financial liabilities which are secured by \$2,123 million of cash collateral given on derivative financial instruments.
- (5) Face or contract value of contingent liabilities and guarantees outstanding as at March 31, 2015, amounted to \$2,296 million.
- (6) Total due to ANZBGL as at March 31, 2015 consisted of (NZ\$ millions):

	March 31, 2015
Settlement balances payable	352
Deposits and other borrowings	26
Derivative financial liabilities	2,683
Payables and other liabilities	12
Subordinated debt	1,013
Total due to ANZBGL	4,086

The following table sets out the capitalization and funding of ANZNIL as at March 31, 2015 and has been extracted from the ANZNIL Financial Statements for the six months ended March 31, 2015, attached as Annex A-1 to this Offering Memorandum.

NZ\$ millions, unless otherwise stated	As at March 31, 2015	
	US\$ millions¹	
Capitalization and Funding		
Due to other related parties	4	5
Accrued interest payable	25	34
Commercial paper	4,695	6,273
Current tax liabilities	1	1
Bonds and notes	10,652	14,231
Total equity ²	1	2
Total Capitalization and Funding^{3,4,5,6}	15,378	20,546

- (1) Translated from NZ dollars into U.S. dollars using the noon buying rate on March 31, 2015 of NZ\$1.00=US\$0.7485.
- (2) Total ANZNIL equity at March 31, 2015 consists of retained profits and ordinary share capital. All of ANZNIL's ordinary share capital has been issued. The number of issued and paid up ordinary shares as at March 31, 2015, was 500,000.
- (3) As at March 31, 2015 commercial paper of \$6,273 million and debt issuances of \$14,231 million issued by ANZNIL were guaranteed by ANZ New Zealand.
- (4) As at March 31, 2015 covered bonds with a carrying value of \$4,382 million included in debt issuances were also guaranteed by ANZNZ Covered Bond Trust Limited as trustee of ANZNZ Covered Bond Trust.
- (5) There were no contingent liabilities and guarantees of ANZNIL outstanding as at March 31, 2015.
- (6) As of the date of this Offering Memorandum, there has been no material change in the capitalization and funding and amount of contingent liabilities and guarantees of ANZNIL since March 31, 2015.

Exchange Rates

The following table sets forth for each of the fiscal years and months indicated:

- the high and low rates of exchange;
- the average rate of exchange based on the last day of each month during each of these periods; and
- the rate of exchange on the last day of each period,

in each case for the New Zealand dollar, expressed in U.S. dollars, based on the noon buying rate in New York City for cable transfers in New Zealand dollars as certified for customs purposes by the Federal Reserve Bank of New York. The New Zealand dollar is convertible into U.S. dollars at freely floating rates and there are currently no restrictions on the flow of New Zealand currency between New Zealand and the United States.

Exchange rates of U.S. dollars per NZ\$1.00

	At period end	High	Low	Period average ¹
Year ended September 30,

Regulation and Supervision

The supervisory role of the RBNZ

The Reserve Bank Act requires the RBNZ to exercise its powers of registration of banks and prudential supervision of registered banks for the purposes of:

- promoting the maintenance of a sound and efficient financial system; or
- avoiding significant damage to the financial system that could result from the failure of a registered bank.

The RBNZ's policy around the registration of banks aims to ensure that only financial institutions of appropriate standing and repute are able to become registered banks. Subject to this requirement, the RBNZ has stated that it intends to keep to a minimum any impediments to the entry of new registered banks, in order to encourage competition in the banking system.

The RBNZ's supervisory functions are aimed at encouraging the soundness and efficiency of the financial system as a whole, and are not aimed at preventing individual bank failures or at protecting creditors. The RBNZ seeks to achieve this by drawing on and enhancing disciplines that are naturally present in the market.

As a consequence, the RBNZ places considerable emphasis on a requirement that the banks disclose, on a quarterly basis, information on financial performance and risk positions, and on a requirement that directors regularly attest to certain key matters. These measures are intended to strengthen market disciplines and to ensure that responsibility for the prudent management of banks lies with those who the RBNZ considers are best placed to exercise that responsibility-the directors and management.

The main elements of the RBNZ's supervisory role include:

- requiring all banks to comply with certain minimum prudential requirements, which are applied through conditions of registration. These include constraints on connected exposure, minimum capital adequacy requirements and minimum standards for liquidity risk management, and are set out in more detail below;
- monitoring each registered bank's financial condition and compliance with conditions of registration, principally on the basis of published quarterly disclosure statements. This monitoring is intended to ensure that the RBNZ maintains familiarity with the financial condition of each bank and the banking system as a whole, and maintains a state of preparedness to invoke crisis management powers should this be necessary;
- consulting with the senior management of registered banks;
- using crisis management powers available to it under the Reserve Bank Act to intervene where a bank distress or failure situation threatens the soundness of the financial system;
- assessing whether a bank is carrying on business prudently;
- issuing guidelines on anti-money laundering and countering financing of terrorism;
- issuing guidelines on banks' internal capital adequacy process and liquidity policy;
- issuing guidelines on corporate governance; and
- maintaining close working relationships with parent bank supervisors (such as APRA in Australia) on bank-specific issues, policy issues and general matters relating to the condition of the financial system in New Zealand and in the countries where parent banks are domiciled.

The disclosure statements that are required to be issued quarterly by registered banks contain comprehensive corporate details and full financial statements at the full year, and unaudited interim financial statements at the half year and the off-quarters. They are subject to full external audit at the end of each financial year and a limited scope review at the end of each financial half-year. Each bank director is required to sign his or her bank's disclosure statements and to make certain attestations. A bank and its directors may incur criminal and civil penalties if the bank's disclosure statement contains information that is held to be false or misleading.

The RBNZ currently also requires all registered banks to obtain and maintain a credit rating from an approved organization and publish that rating in the quarterly disclosure statements.

In addition, the RBNZ has wide reaching powers to obtain further information, data and forecasts in connection with its supervisory functions, and to require that information, data, and forecasts be audited.

It also possesses a number of crisis management powers. Those powers include recommending that a bank's registration be cancelled, investigating the affairs of a registered bank, requiring that a registered bank consults with the RBNZ, giving directions to a registered bank, removing, replacing or appointing a director of a registered bank or recommending that a registered bank be subject to statutory management.

If a registered bank is declared to be subject to statutory management, no person may, amongst other things:

- commence or continue any action or other proceedings including proceedings by way of counterclaim against that bank;
- issue any execution, attach any debt, or otherwise enforce or seek to enforce any judgment or order obtained in respect of that bank;
- take any steps to put that bank into liquidation; or
- exercise any right of set off against that bank.

As part of the RBNZ's supervisory powers, a person must obtain the written consent of the RBNZ before giving effect to a transaction resulting in that person acquiring or increasing a "significant influence" over a registered bank. "Significant influence" means the ability to appoint 25% or more of the Board of Directors of a registered bank or a qualifying interest (e.g., legal or beneficial ownership) in 10% or more of its voting securities.

In assessing applications for consent to acquire a significant influence over a registered bank, the RBNZ has stated that it will have regard to the same matters as are relevant in assessing an application for registration as a registered bank. In giving its consent, the RBNZ may impose such terms and conditions as it thinks fit.

Recent Developments

In late 2013, RBNZ introduced restrictions on high loan-to-value ("**LVR**") lending. From October 1, 2013, New Zealand banks were required to restrict new residential mortgage lending at LVRs of over 80% to no more than 10% of the dollar value of their new residential mortgage lending. The RBNZ recently announced that it will ease the existing LVR restriction for all residential lending outside the Auckland Council area from 10% to 15%. The LVR restrictions for borrowing within the Auckland Council area will remain at 10% but will be for loans to owner occupiers only. These changes are likely to take effect from October 1, 2015. Additionally, the RBNZ announced on May 13, 2015 that it intends to introduce a restriction requiring residential property investors in the Auckland Council area using bank loans to have a deposit of at least 30% of the value of the property.

Following consultation, the RBNZ has announced that it is establishing a new asset class for loans to residential property investors. The proposed changes would increase the amount of capital that New Zealand banks are expected to hold for residential property investment loans. This new asset class is expected to take effect with respect to new loans from October 1, 2015, and from October 1, 2016 for existing loans.

The RBNZ is also continuing to work on an exercise with New Zealand's four largest banks, including ANZ New Zealand, to investigate differences in risk weights across internal bank models of housing and rural lending portfolios.

The RBNZ has announced that it is planning to undertake a review of bank capital requirements to ensure they reflect global and domestic changes in the banking system. This is in part prompted by the recent Australian Commonwealth Government Financial System Inquiry and recent consultations by the Basel Committee for Banking Supervision (including on a revised standardized approach, permanent capital floors within the IRB framework, and the modelling approach to operational risk). The RBNZ is at a preliminary stage of deliberations on a number of matters, including risk weights for standardized banks and Internal Ratings Based ("**IRB**") banks, capital ratios and disclosure requirements. If a preliminary view is reached that changes should be considered, the RBNZ has announced that it will consult stakeholders.

Following consultation by the RBNZ, the Reserve Bank of New Zealand (Covered Bonds) Amendment Act was passed in December 2013 (the "**Amendment Act**"). The Amendment Act's primary purpose is to establish a legislative framework for covered bonds in order to provide legal certainty as to the treatment of cover pool assets in the event of an issuer's liquidation or statutory management. The key aspects of the framework are:

- (a) mandatory registration of New Zealand banks' covered bond programs, subject to meeting registration requirements;
- (b) requiring cover pool assets to be held by a special purpose vehicle ("**SPV**") that is a separate legal entity from the issuer;

- (c) independent monitoring of cover pools by a cover pool monitor; and
- (d) clarification of the treatment of cover pool assets held by a covered bond SPV in the event that an issuer is placed into statutory management or liquidation.

Amendments to the program documents relating to the ANZ New Zealand covered bond program were made to comply with the requirements of the Amendment Act and the program was registered on August 8, 2014. Issuers are prohibited from issuing covered bonds other than under registered programs.

FATCA was enacted on March 18, 2010. FATCA imposes significant U.S. withholding taxes on non-U.S. financial institutions (such as ANZ New Zealand and many of its subsidiaries and affiliates) that fail to provide the IRS with information on certain non-U.S. accounts held by U.S. persons or, in some cases, held by non-U.S. entities with substantial U.S. owners. In the case of Australian and New Zealand institutions and branches, such information is to be furnished to the Australian Taxation Office and the Inland Revenue, respectively, which would then forward the information to the IRS pursuant to IGAs between the United States and Australia and New Zealand, respectively, as discussed below. The ANZ Group has made and is expected to make significant investments in order to comply with FATCA and its potentially onerous reporting requirements. Australia and New Zealand have enacted legislation to implement their IGAs with the United States. It is possible that some or all of the ANZ Group may become subject to U.S. withholding taxes under FATCA. Further, it is also possible that some or all of the ANZ Group may be required to make gross-up payments to others in respect of FATCA withholding under existing or future transaction documentation.

Dodd-Frank

The Dodd-Frank Act affects many aspects of the business of banking, in the United States and internationally, including securitization, proprietary trading, investing, OTC derivatives and other activities. Because different components of the Dodd-Frank Act are subject to oversight and implementation by different regulatory agencies in the United States, the actual timing of the implementation of the different components has been varied.

To date, the Commodity Futures Trading Commission (the "CFTC") has implemented a significant portion of its rules for the regulation of the over-the-counter swaps market, including rules concerning the registration of swap dealers, recordkeeping and reporting of swaps data, and the clearing and trading of certain interest-rate and index credit default swaps on exchanges and swap execution facilities. Because ANZBGL is a registered swap dealer under the CFTC regulations, the ANZ Group, including ANZ New Zealand, is subject to these CFTC requirements as well as certain additional business conduct rules that apply to ANZ Group's swap transactions with counterparties that are U.S. persons.

ANZ New Zealand is also subject to a provision of the Dodd-Frank Act that is commonly called the "Volcker Rule", which prohibits banks and their affiliates from engaging in certain proprietary trading and limits banks' sponsorship of, and investment in, private equity funds and hedge funds. In December 2013, U.S. regulators published final rules to implement the Volcker Rule and generally extended until July 2015 the time to conform to this rule and the related regulations. The Volcker Rule permits us and other non-U.S. banking entities to engage in activities that would otherwise be prohibited under the Volcker Rule to the extent that they are conducted solely outside the United States and certain other conditions are met. At this time, apart from investments by ANZ Group in developing a global compliance framework to ensure compliance with the Volcker Rule and the available exemptions, we do not expect the Volcker Rule to have a significant impact on our business activities, though development and monitoring of required compliance programs may require the expenditure of resources and management attention.

Conditions of Registration: ANZ Bank New Zealand Limited

These conditions apply on and after October 1, 2014, except as provided otherwise.

The registration of ANZ Bank New Zealand Limited (the "bank") as a registered bank is subject to the following conditions:

1. That—
 - (a) the Total capital ratio of the banking group is not less than 8%;
 - (b) the Tier 1 capital ratio of the banking group is not less than 6%;
 - (c) the Common Equity Tier 1 capital ratio of the banking group is not less than 4.5%;
 - (d) the Total capital of the banking group is not less than \$30 million; and
 - (e) the process in Subpart 2H of the Reserve Bank of New Zealand document: "Capital Adequacy Framework (Internal Models Based Approach)" (BS2B) dated October 2014 is followed for the recognition and repayment of capital.

For the purposes of this condition of registration,—

the scalar referred to in the Reserve Bank of New Zealand document "Capital Adequacy Framework (Internal Models Based Approach)" (BS2B) dated October 2014 is 1.06.

"Total capital ratio", "Tier 1 capital ratio", "Common Equity Tier 1 capital ratio", and "Total capital" must be calculated in accordance with the Reserve Bank of New Zealand document "Capital Adequacy Framework (Internal Models Based Approach)" (BS2B) dated October 2014.

- 1A. That—
 - (a) the bank has an internal capital adequacy assessment process ("ICAAP") that accords with the requirements set out in the document "Guidelines on a bank's internal capital adequacy assessment process ("ICAAP")" (BS12) dated December 2007;
 - (b) under its ICAAP the bank identifies and measures its "other material risks" defined as all material risks of the banking group that are not explicitly captured in the calculation of the Common Equity Tier 1 capital ratio, the Tier 1 capital ratio and the Total capital ratio under the requirements set out in the document "Capital Adequacy Framework (Internal Models Based Approach)" (BS2B) dated October 2014; and
 - (c) the bank determines an internal capital allocation for each identified and measured "other material risk".
- 1B. That the banking group complies with all requirements set out in the Reserve Bank of New Zealand document "Capital adequacy framework (Internal Models Based Approach)" (BS2B) dated October 2014.
- 1C. That, if the buffer ratio of the banking group is 2.5% or less, the bank must:
 - (a) according to the following table, limit the aggregate distributions of the bank's earnings to the percentage limit to distributions that corresponds to the banking group's buffer ratio:

Banking group's buffer ratio	Percentage limit to distributions of the bank's earnings
0% - 0.625%	0%
>0.625% - 1.25%	20%
>1.25% - 1.875%	40%
>1.875% - 2.5%	60%

- (b) prepare a capital plan to restore the banking group's buffer ratio to above 2.5% within any timeframe determined by the Reserve Bank for restoring the buffer ratio; and
- (c) have the capital plan approved by the Reserve Bank.

For the purposes of this condition of registration,—

“buffer ratio”, “distributions”, and “earnings” have the same meaning as in Part 3 of the Reserve Bank of New Zealand document: “Capital Adequacy Framework (Internal Models Based Approach)” (BS2B) dated October 2014.

the scalar referred to in the Reserve Bank of New Zealand document “Capital Adequacy Framework (Internal Models Based Approach)” (BS2B) dated October 2014 is 1.06.

2. That the banking group does not conduct any non-financial activities that in aggregate are material relative to its total activities.

In this condition of registration, the meaning of “material” is based on generally accepted accounting practice.

3. That the banking group’s insurance business is not greater than 1% of its total consolidated assets.

For the purposes of this condition of registration, the banking group’s insurance business is the sum of the following amounts for entities in the banking group:

- (a) if the business of an entity predominantly consists of insurance business and the entity is not a subsidiary of another entity in the banking group whose business predominantly consists of insurance business, the amount of the insurance business to sum is the total consolidated assets of the group headed by the entity; and
- (b) if the entity conducts insurance business and its business does not predominantly consist of insurance business and the entity is not a subsidiary of another entity in the banking group whose business predominantly consists of insurance business, the amount of the insurance business to sum is the total liabilities relating to the entity’s insurance business plus the equity retained by the entity to meet the solvency or financial soundness needs of its insurance business.

In determining the total amount of the banking group’s insurance business—

- (a) all amounts must relate to on balance sheet items only, and must comply with generally accepted accounting practice; and
- (b) if products or assets of which an insurance business is comprised also contain a non-insurance component, the whole of such products or assets must be considered part of the insurance business.

For the purposes of this condition of registration,—

“insurance business” means the undertaking or assumption of liability as an insurer under a contract of insurance:

“insurer” and “contract of insurance” have the same meaning as provided in sections 6 and 7 of the Insurance (Prudential Supervision) Act 2010.

4. That the aggregate credit exposures (of a non-capital nature and net of any allowances for impairment) of the banking group to all connected persons do not exceed the rating-contingent limit outlined in the following matrix:

Credit rating of the bank ¹	Connected exposure limit (% of the banking group’s Tier 1 capital)
AA/Aa2 and above	75
AA-/Aa3	70
A+/A1	60
A/A2	40
A-/A3	30
BBB+/Baa1 and below	15

(1) This table uses the rating scales of S&P, Fitch and Moody’s. (Fitch’s scale is identical to S&P’s.)

Within the rating-contingent limit, credit exposures (of a non-capital nature and net of any allowances for impairment) to non-bank connected persons shall not exceed 15 % of the banking group’s Tier 1 capital.

For the purposes of this condition of registration, compliance with the rating-contingent connected exposure limit is determined in accordance with the Reserve Bank of New Zealand document entitled "Connected Exposures Policy" (BS8) dated October 2014.

5. That exposures to connected persons are not on more favourable terms (e.g. as relates to such matters as credit assessment, tenor, interest rates, amortisation schedules and requirement for collateral) than corresponding exposures to non-connected persons.
6. That the bank complies with the following corporate governance requirements:
 - (a) the board of the bank must have at least five directors;
 - (b) the majority of the board members must be non-executive directors;
 - (c) at least half of the board members must be independent directors;
 - (d) an alternate director,—
 - (i) for a non-executive director must be non-executive; and
 - (ii) for an independent director must be independent;
 - (e) at least half of the independent directors of the bank must be ordinarily resident in New Zealand;
 - (f) the chairperson of the board of the bank must be independent; and
 - (g) the bank's constitution must not include any provision permitting a director, when exercising powers or performing duties as a director, to act other than in what he or she believes is the best interests of the company (i.e. the bank).

For the purposes of this condition of registration, "non-executive" and "independent" have the same meaning as in the Reserve Bank of New Zealand document entitled "Corporate Governance" (BS14) dated July 2014.

7. That no appointment of any director, chief executive officer, or executive who reports or is accountable directly to the chief executive officer, is made in respect of the bank unless:
 - (a) the Reserve Bank has been supplied with a copy of the curriculum vitae of the proposed appointee; and
 - (b) the Reserve Bank has advised that it has no objection to that appointment.
8. That a person must not be appointed as chairperson of the board of the bank unless:
 - (a) the Reserve Bank has been supplied with a copy of the curriculum vitae of the proposed appointee; and
 - (b) the Reserve Bank has advised that it has no objection to that appointment.
9. That the bank has a board audit committee, or other separate board committee covering audit matters, that meets the following requirements:
 - (a) the mandate of the committee must include: ensuring the integrity of the bank's financial controls, reporting systems and internal audit standards;
 - (b) the committee must have at least three members;
 - (c) every member of the committee must be a non-executive director of the bank;
 - (d) the majority of the members of the committee must be independent; and
 - (e) the chairperson of the committee must be independent and must not be the chairperson of the bank.

For the purposes of this condition of registration, "non-executive" and "independent" have the same meaning as in the Reserve Bank of New Zealand document entitled "Corporate Governance" (BS14) dated July 2014.

10. That a substantial proportion of the bank's business is conducted in and from New Zealand.
11. That the bank has legal and practical ability to control and execute any business, and any functions relating to any business, of the bank that are carried on by a person other than the bank, sufficient to achieve, under normal business conditions and in the event of stress or failure of the bank or of a service provider to the bank, the following outcomes:
 - (a) that the bank's clearing and settlement obligations due on a day can be met on that day;
 - (b) that the bank's financial risk positions on a day can be identified on that day;
 - (c) that the bank's financial risk positions can be monitored and managed on the day following any failure and on subsequent days; and
 - (d) that the bank's existing customers can be given access to payments facilities on the day following any failure and on subsequent days.

For the purposes of this condition of registration, the term "legal and practical ability to control and execute" is explained in the Reserve Bank of New Zealand document entitled "Outsourcing Policy" (BS11) dated January 2006.

12. That:
 - (a) the business and affairs of the bank are managed by, or under the direction or supervision of, the board of the bank;
 - (b) the employment contract of the chief executive officer of the bank or person in an equivalent position (together "CEO") is with the bank, and the terms and conditions of the CEO's employment agreement are determined by, and any decisions relating to the employment or termination of employment of the CEO are made by, the board of the bank; and
 - (c) all staff employed by the bank shall have their remuneration determined by (or under the delegated authority of) the board or the CEO of the bank and be accountable (directly or indirectly) to the CEO of the bank.
13. That the banking group complies with the following quantitative requirements for liquidity-risk management:
 - (a) the one-week mismatch ratio of the banking group is not less than zero per cent at the end of each business day;
 - (b) the one-month mismatch ratio of the banking group is not less than zero per cent at the end of each business day; and
 - (c) the one-year core funding ratio of the banking group is not less than 75 per cent at the end of each business day.

For the purposes of this condition of registration, the ratios identified must be calculated in accordance with the Reserve Bank of New Zealand documents entitled "Liquidity Policy" (BS13) dated July 2014 and "Liquidity Policy Annex: Liquid Assets" (BS13A) dated December 2011.

14. That the bank has an internal framework for liquidity risk management that is adequate in the bank's view for managing the bank's liquidity risk at a prudent level, and that, in particular:
 - (a) is clearly documented and communicated to all those in the organisation with responsibility for managing liquidity and liquidity risk;
 - (b) identifies responsibility for approval, oversight and implementation of the framework and policies for liquidity risk management;
 - (c) identifies the principal methods that the bank will use for measuring, monitoring and controlling liquidity risk; and

(d) considers the material sources of stress that the bank might face, and prepares the bank to manage stress through a contingency funding plan.

15. That no more than 10% of total assets may be beneficially owned by a SPV.

For the purposes of this condition,

“total assets” means all assets of the banking group plus any assets held by any SPV that are not included in the banking group’s assets:

“SPV” means a person—

- (a) to whom any member of the banking group has sold, assigned, or otherwise transferred any asset;
- (b) who has granted, or may grant, a security interest in its assets for the benefit of any holder of any covered bond; and
- (c) who carries on no other business except for that necessary or incidental to guarantee the obligations of any member of the banking group under a covered bond:

“covered bond” means a debt security issued by any member of the banking group, for which repayment to holders is guaranteed by a SPV, and investors retain an unsecured claim on the issuer.

16. That—

(a) no member of the banking group may give effect to a qualifying acquisition or business combination that meets the notification threshold, and does not meet the non-objection threshold, unless:

- (i) the bank has notified the Reserve Bank in writing of the intended acquisition or business combination and at least 10 working days have passed; and
- (ii) at the time of notifying the Reserve Bank of the intended acquisition or business combination, the bank provided the Reserve Bank with the information required under the Reserve Bank of New Zealand Banking Supervision Handbook document “Significant Acquisitions Policy” (BS15) dated December 2011; and

(b) no member of the banking group may give effect to a qualifying acquisition or business combination that meets the non-objection threshold unless:

- (i) the bank has notified the Reserve Bank in writing of the intended acquisition or business combination;
- (ii) at the time of notifying the Reserve Bank of the intended acquisition or business combination, the bank provided the Reserve Bank with the information required under the Reserve Bank of New Zealand Banking Supervision Handbook document “Significant Acquisitions Policy” (BS15) dated December 2011; and
- (iii) the Reserve Bank has given the bank a notice of non-objection to the significant acquisition or business combination.

For the purposes of this condition of registration, “qualifying acquisition or business combination”, “notification threshold” and “non-objection threshold” have the same meaning as in the Reserve Bank of New Zealand Banking Supervision Handbook document “Significant Acquisitions Policy” (BS15) dated December 2011.

17. That the bank is pre-positioned for Open Bank Resolution and in accordance with a direction from the Reserve Bank, the bank can –

(a) close promptly at any time of the day and on any day of the week and that effective upon the appointment of the statutory manager -

- (i) all liabilities are frozen in full; and

- (ii) no further access by customers and counterparties to their accounts (deposits, liabilities or other obligations) is possible;
- (b) apply a de minimis to relevant customer liability accounts;
- (c) apply a partial freeze to the customer liability account balances;
- (d) reopen by no later than 9am the next business day following the appointment of a statutory manager and provide customers access to their unfrozen funds;
- (e) maintain a full freeze on liabilities not pre-positioned for open bank resolution; and
- (f) reinstate customers' access to some or all of their residual frozen funds.

For the purposes of this condition of registration, "de minimis", "partial freeze", "customer liability account", and "frozen and unfrozen funds" have the same meaning as in the Reserve Bank of New Zealand document entitled "Open Bank Resolution (OBR) Pre-positioning Requirements Policy" (BS17) dated September 2013.

18. That the bank has an Implementation Plan that –

- (a) is up-to-date; and
- (b) demonstrates that the bank's prepositioning for Open Bank Resolution meets the requirements set out in the Reserve Bank document: "Open Bank Resolution Pre-positioning Requirements Policy" (BS17).

For the purposes of this condition of registration, "Implementation Plan" has the same meaning as in the Reserve Bank of New Zealand document "Open Bank Resolution (OBR) Pre-positioning Requirements Policy" (BS17) dated September 2013.

19. That the bank has a compendium of liabilities that –

- (a) at the product-class level lists all liabilities, indicating which are –
 - (i) pre-positioned for Open Bank Resolution; and
 - (ii) not pre-positioned for Open Bank Resolution;
- (b) is agreed to by the Reserve Bank; and
- (c) if the Reserve Bank's agreement is conditional, meets the Reserve Bank's conditions.

For the purposes of this condition of registration, "compendium of liabilities", and "prepositioned and non pre-positioned liabilities" have the same meaning as in the Reserve Bank of New Zealand document "Open Bank Resolution (OBR) Prepositioning Requirements Policy" (BS17) dated September 2013.

20. That on an annual basis the bank tests all the component parts of its Open Bank Resolution solution that demonstrates the bank's prepositioning for Open Bank Resolution as specified in the bank's Implementation Plan.

For the purposes of this condition of registration, "Implementation Plan" has the same meaning as in the Reserve Bank of New Zealand document "Open Bank Resolution (OBR) Pre-positioning Requirements Policy" (BS17) dated September 2013.

21. That, for a loan-to-valuation measurement period, the total of the bank's qualifying new mortgage lending amounts must not for residential properties with a loan-to-valuation ratio of more than 80%, exceed 10% of the total of the qualifying new mortgage lending amounts arising in the loan-to-valuation measurement period.

22. That the bank must not make a residential mortgage loan unless the terms and conditions of the loan contract or the terms and conditions for an associated mortgage require that a borrower obtain the

bank's agreement before the borrower can grant to another person a charge over the residential property used as security for the loan.

23. That the bank must not permit a borrower to grant a charge in favour of another person over a residential property used as security for a residential mortgage loan unless the sum of the lending secured by the charge and the loan value for the residential mortgage loan would not exceed 80% of the property value of the residential property when the lending secured by the charge is drawn down.
24. That the bank must not provide a residential mortgage loan if the residential property to be mortgaged to the bank as security for the residential mortgage loan is subject to a charge in favour of another person unless the total amount of credit secured by the residential property would not exceed 80% of the property value when the residential mortgage loan is drawn down.
25. That the bank must not act as broker or arrange for a member of its banking group to provide a residential mortgage loan.

In these conditions of registration, —

"banking group" —

- (a) means ANZ Bank New Zealand Limited (as reporting entity) and all other entities included in the group as defined in section 6(1) of the Financial Markets Conduct Act 2013 for the purposes of Part 7 of that Act (unless paragraph (b) applies); or
- (b) means ANZ Bank New Zealand Limited's financial reporting group (as defined in section 2(1) of the Financial Reporting Act 1993) if the Financial Reporting Act 1993 applies to the bank:

"generally accepted accounting practice" —

- (a) has the same meaning as in section 8 of the Financial Reporting Act 2013 (unless paragraph (b) applies); or.
- (b) means generally accepted accounting practice within the meaning of section 3 of the Financial Reporting Act 1993 if the bank is required to prepare financial statements in accordance with that practice.

In conditions of registration 21 to 25,—

"loan-to-valuation ratio", "loan value", "property value", "qualifying new mortgage lending amount" and "residential mortgage loan" have the same meaning as in the Reserve Bank of New Zealand document entitled "Framework for Restrictions on High-LVR Residential Mortgage Lending" (BS19) dated October 2014:

"loan-to-valuation measurement period" means—

- (a) the six calendar month period ending on the last day of March 2014; and
- (b) thereafter a period of three calendar months ending on the last day of the third calendar month, the first of which ends on the last day of April 2014.

ANZNIL

ANZNIL is not a registered bank, and so is not directly subject to the conditions of registration imposed by the RBNZ, nor is it directly regulated by the RBNZ under the Reserve Bank Act. However, it is part of the Banking Group for purposes of ANZ New Zealand's registration.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Prospective investors should read the following discussion of our financial condition and results of operations together with our financial statements and the notes to such financial statements, included in this Offering Memorandum. The presentation in this section contains forward looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward looking statements as a result of a number of factors, including, but not limited to, those set forth under the caption "Risk Factors" and elsewhere in this Offering Memorandum.

The following discussion is based on the ANZ New Zealand Financial Statements, which have been prepared in accordance with NZ IFRS, which differs from U.S. GAAP in certain significant respects.

Because ANZNIL's operations consist of providing funding to the ANZ New Zealand Group and because ANZ New Zealand provides the Guarantee with respect to the ANZNIL Notes, we do not believe that a discussion of ANZNIL's financial condition and results of operations would be meaningful to investors. However, the ANZNIL Financial Statements are attached to this Offering Memorandum as Annex A-1. The ANZNIL Financial Statements have not been prepared in accordance with EU IFRS.

Overview

ANZ New Zealand is a leading New Zealand commercial bank serving over 2 million customers in New Zealand. We are a wholly owned subsidiary of ANZBGL and a member of the ANZ Group, managed by our Board and Chief Executive in compliance with the requirements and regulations of our primary regulator, the RBNZ.

Our business is organized into the following four major business segments: (1) Retail, (2) Commercial (3) Wealth and (4) Institutional.

Our operations are affected by government actions, such as changes to taxation and government regulations in New Zealand, and the New Zealand economy.

We face substantial competition in New Zealand. Competition affects our profitability in terms of reduced interest rate spreads, the volume of new lending and income. See "Overview — ANZ Bank New Zealand Limited — Competition" and "Risk Factors" in this Offering Memorandum.

Critical accounting policies

Critical accounting policies under NZ IFRS as at March 31, 2015

The ANZ New Zealand Financial Statements are prepared in accordance with the New Zealand Companies Act 1993 and the Financial Reporting Act 1993. In addition, the ultimate parent company, ANZBGL, defines accounting policy for the ANZ Group. However, notwithstanding the existence of relevant accounting standards, there are a number of critical accounting treatments, which include complex or subjective decisions or assessments. All material changes to accounting policy are approved by the ANZ New Zealand Group's Audit Committee and ANZBGL's Audit Committee. A brief discussion of critical accounting policies applicable as at March 31, 2015, and their impact on us follows.

See Note 1 to the ANZ New Zealand Audited Financial Statements (attached as Annex A) for the Critical accounting policies under NZ IFRS as at September 30, 2014.

Credit provisioning

The accounting policy relating to measuring the impairment of loans and advances requires the ANZ New Zealand Group to assess impairment at least at each reporting date. The credit provisions raised (collective and individual) represent management's best estimate of the losses incurred in the loan portfolio at balance sheet date based on their experienced judgment.

The collective provision is estimated on the basis of historical loss experience for assets with credit characteristics similar to those in the collective pool. The historical loss experience is adjusted based on current observable data and events and an assessment of the impact of model risk. The provision also takes into account the impact of large concentrated losses within the portfolio and the economic cycle.

The use of such judgments and reasonable estimates is considered by management to be an essential part of the process and does not impact on the reliability of the provision.

Individual and collective provisioning involves the use of assumptions for estimating the amounts and timing of expected future cash flows. The process of estimating the amount and timing of cash flows involves

considerable management judgment. These judgments are revised regularly to reduce any differences between loss estimates and actual loss experience.

Derivatives and hedging

The ANZ New Zealand Group buys and sells derivatives as part of its trading operations and to hedge its interest rate risk, currency risk, price risk, credit risk and other exposures relating to non-trading positions.

A hedging instrument is a designated derivative whose fair value or cash flows are expected to offset changes in the fair value or cash flows of a designated hedged item. A hedged item is an asset, liability, firm commitment or highly probable forecast transaction that: (a) exposes the ANZ New Zealand Group to the risk of changes in fair value or future cash flows; and (b) is designated as being hedged.

Judgment is required in selecting and designating hedging relationships and assessing hedge effectiveness. NZ IAS 39 *Financial Instruments: Recognition and Measurement* does not specify a single method for assessing hedge effectiveness prospectively or retrospectively. The ANZ New Zealand Group adopts the hypothetical derivative approach to determine hedge effectiveness in line with current risk management strategies. Hedge ineffectiveness can arise for a number of reasons and whilst a hedge may pass the effectiveness tests above it may not be perfectly effective, leaving some volatility in the income statement.

The majority of outstanding derivative positions are transacted over-the-counter and therefore need to be valued using valuation techniques. Included in the determination of the fair value of derivatives is a credit valuation adjustment ("CVA") to reflect the creditworthiness of the counterparty. This is influenced by the mark-to-market of the derivative trades and by the movement in the market cost of credit. Further adjustments are made to account for the funding costs inherent in the derivative. Judgment is required to determine the appropriate cost of funding and the future expected cash flows used in this funding valuation adjustment ("FVA").

Goodwill

The carrying value of goodwill is subject to an impairment test to ensure that the current carrying value does not exceed its recoverable value at the balance sheet date. Any excess of carrying value over recoverable amount is taken to the income statement as an impairment write down.

Goodwill has been allocated for impairment purposes to the cash generating units at which the goodwill is monitored for internal reporting purposes. Impairment testing of purchased goodwill is performed by comparing the recoverable value of each cash-generating unit with the current carrying amount of its net assets, including goodwill. Judgment is required in identifying the cash-generating units to which goodwill and other assets are allocated for the purpose of impairment testing.

The recoverable amount is based on value-in-use calculations. These calculations use cash flow projections based on a number of financial budgets within each segment approved by management covering a three year period. Cash flow projections are based on a range of readily available economic assumptions including GDP and CPI. Cash flows beyond the three year period are extrapolated using a 3% growth rate.

These cash flow projections are discounted using a capital asset pricing model. As at February 28 2015, when the last valuation was prepared, a discount rate of 10.05% was applied to each cash-generating unit. The main variables in the calculation of the discount rate used are the risk free rate, the beta rate and the market risk premium. The risk free rate is based on the 10 year Government Bond Rate. The beta rate and the market risk premium are consistent with observable and comparative market rates applied in the regional banking sector. Market observable information is not readily available at the segment level therefore management performed stress tests for key sensitivities in each segment.

Management believes any reasonable possible change in the key assumptions on which the recoverable amount is based would not cause the ANZ New Zealand Group's carrying amount to exceed its recoverable amount.

As at March 31, 2015, the balance of goodwill recorded as an asset on our consolidated balance sheet as a result of acquisitions was \$3,233 million (\$3,233 million as at September 30, 2014).

Insurance policy assets

Insurance policy assets represent deferred policy acquisition costs less policy liabilities for life investment contracts and life insurance contracts. Policy liabilities are computed using statistical or mathematical models, expected to give approximately the same results as if an individual liability was calculated for each contract. The computations are made by suitably qualified personnel on the basis of recognized actuarial methods, with due regard to relevant actuarial principles and standards. Deferred policy acquisition costs are connected with

the measurement basis of the policy liabilities and are equally sensitive to the factors that are considered in the liability measurement.

The key factors that affect the estimation of these liabilities and the related assets are: the cost of providing the benefits and administering the contracts; mortality and morbidity experience; discontinuance rates; for life investment contracts, the amounts credited to policyholders' accounts compared to the returns on invested assets; interest rates; inflation; rates of taxation; and general market and economic conditions.

As at March 31, 2015, the balance of insurance policy assets recorded as an asset on our consolidated balance sheet was \$554 million (\$470 million as at September 30, 2014).

Results of operations

Six months ended March 2015 compared with six months ended March 2014 (consolidated results)

On May 15, 2015, we issued our unaudited financial statements for the six months ended March 31, 2015, which are included in the ANZ New Zealand Financial Statements attached to this Offering Memorandum as Annex A.

The table below sets forth our results for the six months ended March 31, 2015 and 2014 and for the year ended September 30, 2014.

Summary Income Statement

NZ\$ millions, unless otherwise stated	2015 US\$ millions ¹	Six months ended March 31,		Year ended
		2015	2014 ²	September 30, 2014 ³
Interest income	2,579	3,445	2,998	6,272
Interest expense	1,514	2,022	1,644	3,529
Net interest income	1,065	1,423	1,354	2,743
Other operating income	442	591	522	1,085
Net operating income	1,507	2,014	1,876	3,828
Operating expenses	565	755	727	1,489
Profit before credit impairment and income tax	942	1,259	1,149	2,339
Credit impairment charge / (release)	22	30	(42)	(16)
Profit before income tax	920	1,229	1,191	2,355
Income tax expense	255	340	324	639
Profit after income tax	665	889	867	1,716

(1) For the convenience of the reader, the financial data for the six months ended March 31, 2015 has been translated from NZ dollars into U.S. dollars using the noon buying rate for March 31, 2015 of NZ\$1.00=US\$0.7485.

(2) Source: ANZ New Zealand Group unaudited financial statements.

(3) Source: ANZ New Zealand Group audited financial statements.

For the six months ended March 31, 2015 and 2014, our results were reported based on four segments: (1) Retail, (2) Commercial (Business Banking, Commercial & Agri and UDC), (3) Wealth and (4) Institutional. These segments are consistent with those reported in the Disclosure Statements under NZ IFRS 8 *Operating Segments* and those used internally for evaluating operating segment performance and deciding how to allocate resources.

Profit after income tax for the March 2015 half year increased 3%, or \$22 million, over the March 2014 half year to \$889 million.

Net interest income increased 5% from \$1,354 million in the March 2014 half year to \$1,423 million in the March 2015 half year. The increase reflected lending volume growth and an increase in net interest spread of 3 basis points. Lending volumes increased 8% compared to the March 2014 half year, led by an 8% increase in housing loans. Lending margins declined due to competitive pressure and a larger proportion of customers taking out lower-margin fixed rate mortgages. This was offset by deposit volume growth and improved deposit margins.

Other operating income increased 13% from \$522 million in the March 2014 half year to \$591 million in the March 2015 half year. The main factors contributing to this increase included:

- Volatility in the mark-to-market of economic hedge derivatives. Fair value gains of \$8 million were recorded in the March 2015 half year, compared to fair value losses of \$15 million in the March 2014 half year.
- Policy Holder Liability gains driven by decreases in long term interest rates used to discount future cash flows, resulting in a positive revaluation of net life insurance contract assets of \$47 million in the March 2015 half year, compared with a positive revaluation of \$2 million in the 2014 half year.
- Fair value gains on the liquidity portfolio increased by \$18 million.
- Core markets contribution increased by \$35 million, driven by fair value gains and fee income from sales.
- Higher funds management and insurance income (\$12 million) driven by growth in funds under management.

The above factors were partly offset by an insurance settlement of \$91 million in the March 2014 half year relating to ANZ New Zealand's former involvement in the ING Diversified Yield Fund and ING Regular Income Fund.

Operating expenses increased 4% from \$727 million in the March 2014 half year to \$755 million in the March 2015 half year, driven by inflationary impacts and investment activity partly offset by productivity measures.

Credit impairment charge increased from a \$42 million release in the March 2014 half year to a \$30 million charge in the March 2015 half year. The individual provision charge increased \$17 million, with provision write-backs slowing. A decrease of \$55 million in collective provision release was due to portfolio growth and the reduced rate of improvement in credit quality compared to the March 2014 half year.

Summary Balance Sheet

NZ\$ millions (unless otherwise stated)	As at March 31,		
	2015	2015	2014
	US\$ millions ¹		
Assets			
Cash	1,839	2,457	1,717

(1) For the convenience of the reader, the financial data for the six months ended March 31, 2015 has been translated from NZ dollars into U.S. dollars using the noon buying rate for March 31, 2015 of NZ\$1.00=US\$0.7485.

(2) Total of the carrying value of each asset class multiplied by their assigned risk weighting, as defined by the RBNZ.

Total assets increased by 9%, or \$11,532 million, from \$123,825 million as at March 31, 2014 to \$135,357 million as at March 31, 2015. Key influences on asset balances included the following:

- Assets held for liquidity purposes comprise cash, settlement balances receivable, trading securities and available-for-sale assets. These assets in aggregate increased \$997 million compared to March 31, 2014.
- The balances of derivative financial instruments reflect the revaluations of these instruments to market values. The net balance of asset and liability positions increased \$145 million from a net liability of \$901 million as at March 31, 2014 to a net liability of \$1,046 million as at March 31, 2015. This increase mainly comprised fair value losses on cross currency swaps driven by a weakening Euro, partly offset by fair value gains on cross currency swaps driven by a strengthening US dollar.
- Net loans and advances at March 31, 2015 increased \$7,304 million, compared to March 31, 2014. Gross loans and advances increased \$6,997 million, or 7%, with \$4,283 million of this being in term housing loans. The provision for credit impairment decreased by \$84 million compared to March 31, 2014 to \$638 million at March 31, 2015, which is netted off against gross loans and advances.

Total liabilities increased by 10%, or \$11,672 million, from \$112,060 million as at March 31, 2014 to \$123,732 million as at March 31, 2015. Key influences on liability balances were:

- Deposits and other borrowings increased by 8%, or \$6,685 million, at March 31, 2015 compared to March 31, 2014. Customer deposits increased 8%, or \$6,269 million. Short term wholesale borrowings increased \$416 million.
- Debt increased by \$1,281 million compared to March 31, 2014.
- Subordinated debt increased by \$1,212 million compared to March 31, 2014.

Six months ended March 2015 compared with six months ended March 2014 (results by segment)

The following segments are reported based on the major customer groups:

- Retail
- Commercial
- Wealth
- Institutional
- Other includes treasury and back office support functions, none of which constitutes a separately reportable segment

The following table shows the results of our business segments for the March 2015 half year and the March 2014 half year:

NZ\$ millions	Six months ended March 31,	
	2015	2014
Retail	223	207
Commercial	365	370
Wealth	67	121
Institutional	166	164
Other	68	5
Profit after income tax	889	867

Retail

The following table shows the results of Retail for the March 2015 half year and the March 2014 half year.

NZ\$ millions	Six months ended March 31,	
	2015	2014
Net interest income	475	442
Other operating income	160	164
Net operating income	635	606
Operating expenses	308	308
Profit before credit impairment and income tax	327	298
Credit impairment charge	17	10
Profit before income tax	310	288
Income tax expense	87	81
Profit after income tax	223	207
Loans and advances	30,614	29,531
Deposits	36,590	32,656

Retail profit after income tax of \$223 million for the March 2015 half year increased 8% compared to the March 2014 half year.

- Net interest income increased 7%, or \$33 million, driven by net margin improvement and lending volume growth. Stronger margins reflected improvement in deposit margins which have more than offset lower lending margins.
- Other operating income decreased 2%, or \$4 million, reflecting a reduction in account fees with customers increasingly utilizing digital technology to manage their accounts.
- The provision for credit impairment charge increased \$7 million. The individual provision charge was \$8 million lower, reflecting a slowing in the level of new provisions. The release from collective provision was \$15 million lower, due to portfolio growth and the reduced rate of improvement in credit quality compared to the March 2014 half year.
- Loans and advances increased 4% in the March 2015 half year compared to the March 2014 half year, partly reflecting a lower volume of mortgages held in the New Zealand Branch of ANZBGL. Excluding this factor, lending growth was 1%. Deposit volumes increased by 12% in the March 2015 half year compared to the March 2014 half year.

Commercial

The following table shows the results of Commercial for the March 2015 half year and the March 2014 half year.

NZ\$ millions	Six months ended March 31,	
	2015	2014
Net interest income	718	664
Other operating income	49	50
Net operating income	767	714
Operating expenses	258	251
Profit before credit impairment and income tax	509	463
Credit impairment charge / (release)	3	(50)
Profit before income tax	506	513
Income tax expense	141	143
Profit after income tax	365	370
Loans and advances	60,589	55,405
Deposits	24,837	22,549

The Commercial business comprises Business Banking, Commercial & Agri and UDC.

Commercial profit after income tax of \$365 million for the March 2015 year decreased 1%, or \$5 million, compared to the March 2014 half year.

- Net interest income increased 8%, or \$54 million, with a positive impact from volume growth.
- Other operating income decreased by 2%, or \$1 million.
- Operating expenses increased 3%, or \$7 million.
- The credit impairment charge increased by \$53 million. The individual provision charge increased by \$17 million driven provision write-backs slowing in the Commercial & Agri portfolio. The collective provision release decreased by \$36 million due to portfolio growth and the reduced rate of improvement in credit quality compared to the March 2014 half year.
- Loans and advances increased 9% in the March 2015 half year compared to the March 2014 half year, led by growth in Business Banking housing loans and Commercial lending. Deposits increased 10% in the March 2015 half year compared to the March 2014 half year.

Wealth

The following table shows the results of Wealth for the March 2015 half year and the March 2014 half year.

NZ\$ millions	Six months ended March 31,	
	2015	2014
Net interest income	34	26
Other operating income	122	202
Net operating income	156	228
Operating expenses	69	67
Profit before credit impairment and income tax	87	161
Credit impairment charge / (release)	-	(1)
Profit before income tax	87	162
Income tax expense	20	41
Profit after income tax	67	121
Loans and advances	1,819	1,563
Deposits	5,307	5,211

Wealth profit after income tax of \$67 million for the March 2015 half year decreased by 45%, or \$54 million, compared to the March 2014 half year.

- Net interest income increased 31%, or \$8 million, driven by improved deposit margins and growth in deposit volumes in the Private Bank business.
- Other operating income decreased by 40%, or \$80 million, with the result for the March 2014 half year including an insurance settlement relating to ANZ New Zealand's former involvement in the ING Diversified Yield Fund and ING Regular Income Fund (\$91 million). Excluding this item, other operating income increased by 10%, or \$11 million, from growth in the Insurance and Funds Management businesses.
- Costs increased 3%, or \$2 million.
- The provision for credit impairment release decreased by \$1 million.

Institutional

The following table shows the results of Institutional for the March 2015 half year and the March 2014 half year.

NZ\$ millions	Six months ended March 31,	
	2015	2014
Net interest income	138	177
Other operating income	196	141
Net operating income	334	318
Operating expenses	93	92
Profit before credit impairment and income tax	241	226
Credit impairment charge / (release)	10	(1)
Profit before income tax	231	227
Income tax expense	65	63
Profit after income tax	166	164
Loans and advances	7,673	6,894
Deposits	13,530	13,580

Institutional profit after income tax of \$166 million for the March 2015 half year increased 1%, or \$2 million, compared to the March 2014 half year.

- Net operating income increased 5%, or \$16 million, with stronger core trading and sales performance (\$27 million) offsetting lesser contribution from the liquidity portfolio (\$16 million) driven by movement in credit spreads on the assets in the portfolio.
- Operating expenses increased 1%, or \$1 million.
- The provision for credit impairment charge increased \$11 million.
- Lending increased 11%, or \$779 million, reflecting growth in Global Loans. Deposits were flat.

Other

The following table shows the results of other segments for the March 2015 half year and the March 2014 half year.

NZ\$ millions	Six months ended March 31,	
	2015	2014
Profit after income tax	68	5

Other segments mainly comprise support and Treasury functions that are centrally managed, with costs substantially charged to the operating business units, including (i) the shareholder functions unit, which holds the ANZ New Zealand Group's equity, including subordinated debt; (ii) certain significant items including the costs of organizational restructuring; and (iii) non-core items, including volatility related to derivatives entered into to manage interest rate and foreign exchange risk that are not designated in accounting hedge relationships but are considered to be economic hedges.

The main components in the March 2015 half year results were:

- Policy Holder Liability gains driven by volatility in long term interest rates used to discount future cash flows, resulting in a positive revaluation of net life insurance contract assets of \$47 million in the March 2015 half year, compared with a positive revaluation of \$2 million in the March 2014 half year.
- Mark to market of economic hedge derivatives. Fair value gains of \$8 million were recorded in the March 2015 half year, compared to fair value losses of \$15 million in the March 2014 half year.

Reclassification of the balance sheet

During the year ended September 30, 2014, the classification of ANZ New Zealand's balance sheet was changed to more consistently reflect the nature of the financial assets and liabilities. Prior to this reclassification, the balance sheet was classified according to both nature and counterparty. The key changes include:

Assets

- Securities purchased under agreements to resell in less than three months previously reported in liquid assets are now classified as cash.
- Money at call, bills receivable and remittances in transit previously reported in liquid assets are now classified as either cash, settlement balances receivable or net loans and advances depending on the nature of the asset.
- Loans to other banks previously reported in due from other financial institutions are now classified as net loans and advances.
- Collateral paid previously reported in due from other financial institutions is now classified separately.
- Issued security settlements previously reported in other assets are now classified as settlement balances receivable.

Liabilities

- Loans from other banks previously reported in due to other financial institutions are now classified as deposits and other borrowings.
- Collateral received previously reported in due to other financial institutions is now classified separately.
- Issued security settlements previously reported in other liabilities is now classified as settlement balances payable.

The following table sets forth the restatements to our historical financials:

Unaudited NZ\$ millions	September 30, 2013		
	As reported	Change	Restated
Assets			
Liquid assets	2,496	(2,496)	-
Due from other financial institutions	1,570	(1,570)	-
Cash	-	2,206	2,206
Settlement balances receivable	-	514	514
Collateral paid	-	1,002	1,002
Available-for-sale assets	782	160	942
Net loans and advances	90,489	348	90,837

Total liabilities	108,971	19	108,990
Equity	11,467	(13)	11,454

Adjustments have not been made to the balance sheet classifications in the discussion of the year ended September 30, 2013 compared with the year ended September 30, 2012, so that they can be discussed on a consistent basis.

Year ended September 2014 compared with year ended September 2013 (consolidated results)

On November 19, 2014, we issued our audited financial statements for the year ended September 30, 2014, which are included in the ANZ New Zealand Audited Financial Statements attached to this Offering Memorandum as Annex A.

The table below sets forth our results for the years ended September 30, 2014, 2013 and 2012.

Summary Income Statement

NZ\$ millions, unless otherwise stated	Year ended September 30,			
	2014 US\$ millions ¹	2014 ²	2013 ²	2012 ²
Interest income	4,885	6,272	5,957	6,017
Interest expense	2,748	3,529	3,344	3,335

Profit after income tax	1,336	1,716	1,371	1,325

(1) For the convenience of the reader, the financial data for the year ended September 30, 2014, has been translated from NZ dollars into U.S. dollars using the noon buying rate for September 30, 2014, of NZ\$1.00=US\$0.7788.

(2) Source: ANZ New Zealand Group audited financial statements.

For the years ended September 30, 2014 and 2013, results were reported based on four segments: (1) Retail, (2) Commercial (Business Banking, Commercial & Agri and UDC), (3) Wealth and (4) Institutional. These segments are consistent with those reported in the Disclosure Statements under NZ IFRS 8 *Operating Segments* and those used internally for evaluating operating segment performance and deciding how to allocate resources.

Profit after income tax for 2014 increased 25%, or \$345 million, to \$1,716 million.

Net interest income increased 5% in the 2014 year from \$2,613 million in 2013 to \$2,743 million in 2014. The increase reflected strong lending volume growth partly offset by a contraction in net interest spread of 6 basis points in a competitive environment. Net interest margin increase was driven by deposit margins increasing due to a higher percentage of non interest bearing deposits, partly offset by customers taking out lower-margin fixed rate mortgages. Lending volumes increased 6%, reflecting strong growth in mortgages. Customer deposits increased 8% over the 2014 year.

Other operating income increased 32% from \$823 million in 2013 to \$1,085 million in 2014. The main factors contributing to this increase included:

- An insurance settlement of \$91 million in the September 2014 financial year relating to ANZ New Zealand's former involvement in the ING Diversified Yield Fund and ING Regular Income Fund.
- Funds management and insurance income increased \$36 million driven by growth in funds under management and improved lapse rates in the Insurance business.
- Policy Holder Liability gains driven by volatility in long term interest rates used to discount future cash flows resulting in a positive revaluation of net insurance policy assets of \$24 million in 2014 compared to a negative revaluation of \$35 million in 2013.
- Volatility in the mark-to-market of economic hedge derivatives. Fair value gains of \$36 million were recorded in the September 2014 financial year, compared to fair value losses of \$34 million in the September 2013 financial year.

The above factors were partly offset by revenue forgone (\$23 million) and gain on sale (\$14 million) following divestment of the EFTPOS New Zealand business during the second half of the 2013 financial year not recurring in 2014.

Operating expenses decreased 2% from \$1,512 million in 2013 to \$1,489 million in 2014. The main factors in this decrease were:

- Project and restructuring costs of \$22 million included in 2013 relating to the integration of the core banking system.
- Costs associated with the divestment of the EFTPOS New Zealand business in 2013 were not incurred in 2014 (\$12 million).

Excluding the above items, operating expenses increased 1%, or \$11 million, in 2014 compared with 2013.

The provision for credit impairment charge decreased \$79 million in 2014 compared with 2013. The individual provision charge was \$75 million, which was 40% lower than in 2013, reflecting a slowing in the rate of new provisions. The collective provision result improved due to a release from provision of \$91 million in 2014, compared with a release of \$62 million for the 2013 year. The release from the credit cycle provision in 2014 was \$14 million lower than the release in 2013. Excluding this item, the collective provision release was \$43 million higher than that for 2013.

Net interest income

The following table shows our net interest income for the years ended September 30, 2014 and 2013.

NZ\$ millions	Year ended September 30,	
	2014	2013
Interest income	6,272	5,957
Interest expense	3,529	3,344
Net interest income	2,743	2,613

Net interest income totaled \$2,743 million for 2014, an increase of \$130 million, or 5%, from 2013. Volume/rate analysis of the increase in net interest income attributed a \$178 million increase due to volume growth and a \$48 million decrease due to lower net yields or interest spread. Key influences on the result are discussed below:

Movements in average margin

The overall interest spread decreased 6 basis points from 2.04% in 2013 to 1.98% in 2014, with the yield on total average interest earning assets increasing 6 basis points, and the yield paid on total average interest bearing liabilities increasing 12 basis points. Key influences on the result included the following:

- The yield on trading securities increased 32 basis points from 3.71% in 2013 to 4.03% in 2014, mainly in the liquidity portfolio of fixed rate, non-government bonds and government bonds.
- The average yield on net loans and advances decreased by 7 basis points from 6.11% in 2013 to 6.04% in 2014. This reflected the impact of competition, particularly in fixed rate mortgages, which has led to a fall in margins. The preference of customers for fixed rate lending during 2014, as opposed to variable rate lending, also increased the proportion of fixed rate mortgages in the lending book.
- The average yield on commercial paper, deposits and other borrowings increased 5 basis points from 3.39% in 2013 to 3.44% in 2014; and the average yield on bonds and notes increased 30 basis points from 4.59% in 2013 to 4.89% in 2014. This reflects the 100 basis point increase in the Official Cash Rate during the 2014 year.

Movements in average volume

- Average interest earning assets increased \$4,417 million, or 4%, in 2014 compared with 2013. This increase was mainly in net loans and advances which increased by \$5,078 million, or 6%, during 2014. This reflected strong growth in the mortgages market and more modest growth in the Business and Commercial markets.
- Average interest bearing liabilities increased by \$1,932 million during 2014.

- Deposits and commercial paper borrowings increased by \$4,872 million. This growth was largely in customer deposits. ANZ New Zealand has focused growth initiatives on current accounts bearing interest (savings accounts, online call accounts) which have lower costs compared to term deposits.
- Bonds, notes and subordinated debt decreased \$1,083 million during 2014.

Other operating income

The following table shows our other operating income for the years ended September 30, 2014 and 2013.

NZ\$ millions	Year ended September 30,	
	2014	2013
Net fee income	408	423
Funds management and insurance income	325	234
Net gain on foreign exchange trading	157	154
Net gain / (loss) on trading securities and derivatives	53	9
Share of associates' profit	3	7
Other income	139	(4)
Other operating income	1,085	823

Other operating income totaled \$1,085 million for 2014, an increase of \$262 million, or 32%, over 2013. Key influences on the result included the following:

- Net fee income decreased \$15 million, or 4%. This mainly reflected lower fee income from Business Banking during the year, following the sale of EFTPOS New Zealand Limited.
- Funds management and insurance income increased \$91 million, or 39%. This was mainly driven by volatility in long term interest rates used to discount future cash flows, which resulted in a positive revaluation of net insurance policy assets of \$24 million in 2014 compared to a negative revaluation of \$35 million in 2013. Higher funds management and insurance income increased \$36 million driven by growth in funds under management and improved lapse rates in the Insurance business.
- The aggregate of net foreign exchange trading gains and gains on trading securities increased \$47 million in 2014. This mainly reflected an improved result from the revaluation of the liquidity portfolio driven by strong demand for bonds during the first half of the year and stronger FX earnings in the clearing business.
- Other income increased \$143 million due to:
 - Volatility in the mark-to-market of economic hedge derivatives. Fair value gains of \$36 million were recorded in the September 2014 financial year, compared to fair value losses of \$34 million in the September 2013 financial year.
 - An insurance settlement of \$91 million in the September 2014 financial year relating to ANZ New Zealand's former involvement in the ING Diversified Yield Fund and ING Regular Income Fund.

Operating expenses

The following table shows our operating expenses for the years ended September 30, 2014 and 2013.

NZ\$ millions	Year ended September 30,	
	2014	2013
Personnel costs	845	838
Premises and equipment costs	174	171
Other costs	470	503
Operating expenses	1,489	1,512

Operating expenses totaled \$1,489 million for 2014, a decrease of \$23 million, or 2%, over 2013. Key influences on the result included the following:

- Personnel costs increased \$7 million, or 1%. An increase in costs due to inflation was offset in part by productivity gains due to a reduction in full-time equivalent employees from simplifying the business.
- Premises and equipment costs increased \$3 million, or 2%, reflecting the impact of increased investment.
- Other costs decreased \$33 million, or 7%, compared with 2013 including \$22 million for project and restructuring costs relating to the integration of the core banking system which were incurred in 2013 not recurring in 2014.

Provision for credit impairment

Provision for credit impairment release totaled \$16 million for 2014, an improvement of \$79 million compared with 2013.

- The individual provision charge was \$50 million lower, with lower rates of new provisions raised and loss rates continuing to improve.
- The collective provision was a release from the provision of \$91 million in 2014, compared with a release of \$62 million for the 2013 year. This result included a release of the credit cycle provision that was \$14 million less in 2014 than the release in 2013. Excluding this item, the collective provision release was \$43 million more than that for 2013, reflecting the improvement in credit quality despite lending growth.

Summary Balance Sheet

NZ\$ millions (unless otherwise stated)	2014 US\$ millions ¹	2014	2013 ³ Restated for comparability	2013	As at September 30, 2012 ⁴ Restated for comparability

(1) For the convenience of the reader, the financial data for the year ended September 30, 2014 has been translated from NZ dollars into U.S. dollars using the noon buying rate for September 30, 2014 of NZ\$1.00=US\$0.7788.

(2) Represents amounts due to ANZ Holdings (New Zealand) Limited, the immediate parent company of ANZ New Zealand.

(3) From September 30, 2014, the classification of the balance sheet has changed to reflect the nature of the financial assets and financial liabilities reported. Prior to the reclassification the balance sheet was classified according to counterparty. This has resulted in changes to previously reported balance sheet classifications for September 30, 2013. Further details of the restated amounts are included on page 59 of this Offering Memorandum and in Note 1 and Note 35 to the ANZ New Zealand Audited Financial Statements (attached as Annex A).

(4) Collateral paid and received as at September 30, 2012, which had previously been netted against derivative financial instruments, was reclassified to amounts due to and from other financial institutions to ensure consistency with the non-restated 2013 presentation. As a result, as at September 30, 2012, \$107 million was added to both assets and liabilities.

Other Banking Data

	RBNZ Minimum	September, 30	
		2014	2013
Capital adequacy ratios			
Common Equity Tier 1 capital (%)	4.5	10.7	10.4
Tier 1 capital (%)	6.0	11.1	10.8
Total capital (%)	8.0	12.3	12.4
Risk-weighted exposures (NZ\$ millions) ¹		73,427	72,193

(1) Total of the carrying value of each asset class multiplied by their assigned risk weighting, as defined by the RBNZ.

Total assets increased \$8,471 million, from \$120,444 million at September 30, 2013, to \$128,915 million at September 30, 2014. Key influences on the movement in assets included:

- Assets held for liquidity purposes comprise cash, settlement balances receivable, trading securities, and available-for-sale assets. These assets in aggregate increased \$1,217 million (\$15,199 million at September 30, 2014, from \$13,982 million at September 30, 2013). The increase in assets held for liquidity purposes was primarily due to unsettled bond trades as at September 30, 2014.
- The balance of derivative financial instruments reflects the revaluation of these instruments to market value. The net balance of asset and liability positions increased \$1,924 million from a net liability of \$725 million as at September 30, 2013, to a net asset of \$1,199 million as at September 30, 2014. This increase reflected net positive revaluations of NZD/USD foreign exchange contracts, driven by a weakening in the NZD during the second half of 2014.
- Net loans and advances increased \$5,462 million, or 6%, at September 30, 2014, compared to September 30, 2013. Gross loans and advances increased \$5,212 million, with \$3,196 million of this being in term housing loans. The provision for credit impairment decreased by \$160 million to \$666 million at September 30, 2014, which is netted against gross loans and advances.

Total liabilities increased by \$8,144 million, from \$108,990 million at September 30, 2013, to \$117,134 million at September 30, 2014. Key influences on the movement in liabilities included:

- Deposits and other borrowings increased \$5,203 million, or 7%, at September 30, 2014, compared to September 30, 2013. Customer deposits increased \$5,788 million, or 8%.
- Bonds and notes increased \$1,548 million during the year. The increase reflects new issuances of \$4,431 million, a positive FX impact of \$775 million, and maturities of \$3,684 million.

Year ended September 2014 compared with year ended September 2013 (results by segment).

The following segments were reported principally based on major customer groups:

- Retail
- Commercial
- Wealth
- Institutional
- Other includes treasury and back office support functions, none of which constitutes a separately reportable segment

The following table shows the results of our business segments for the year ended September 30, 2014:

NZ\$ millions	Year ended September 30,	
	2014	2013
Retail	399	333
Commercial	723	687
Wealth	182	80
Institutional	318	286
Other	94	(15)
Profit after income tax	1,716	1,371

Retail

NZ\$ millions	Year ended September 30,	
	2014	2013
Net interest income	895	839
Other operating income	317	319
Net operating income	1,212	1,158
Operating expenses	632	639
Profit before provision for credit impairment and income tax	580	519
Provision for credit impairment	25	55
Profit before income tax	555	464
Income tax expense	156	131
Profit after income tax	399	333
Loans and advances	29,579	28,631
Deposits	34,695	32,077

Retail profit after income tax of \$399 million for the 2014 year increased 20% compared to 2013.

- Net interest income increased 7%, driven by lending volume growth and net interest margin improvement. Net interest margin uplift was driven by an improved deposit funding ratio and deposit margin improvement. This has more than offset competitive pressure on the lending side and an unfavorable lending mix as customers switch to lower margin fixed rate products. Other operating income decreased 1%, mainly from a lower commission rate on the sale of insurance products.
- Operating costs were 1% lower. This was driven primarily by productivity gains from simplifying the business.
- The provision for credit impairment charges decreased \$30 million, reflecting lower levels of new provisions.
- Loans and advances increased 3%, driven by term housing loans. Deposit volumes grew by 8% during the year.

Commercial

NZ\$ millions	Year ended September 30,	
	2014	2013
Net interest income	1,355	1,300
Other operating income	95	127
Net operating income	1,450	1,427
Operating expenses	488	489
Profit before provision for credit impairment and income tax	962	938
Provision for credit impairment	(41)	(11)
Profit before income tax	1,003	949
Income tax expense	280	262
Profit after income tax	723	687
Loans and advances	57,781	53,728
Deposits	22,926	20,167

The Commercial business comprises Business Banking, Commercial & Agri and UDC.

Commercial profit after income tax of \$723 million for the 2014 year increased 5% compared with 2013.

- Net interest income increased 4%. This reflected positive impact from lending volume growth partly offset by net interest margin contraction across both the Commercial & Agri and Business Banking portfolios.
- Other operating income decreased 25%, reflecting the divestment of the EFTPOS New Zealand business during the second half of the 2013 financial year.
- Operating costs were \$1 million lower than the 2013 financial year. This was driven primarily by productivity gains from simplifying the business.
- The provision for credit impairment reduced by \$30 million in 2014, reflecting lower levels of new provisions. Loans and advances increased 8%, with the main growth occurring in Business Banking housing loans and commercial lending. Deposit volumes increased by 14% during the year.

Wealth

NZ\$ millions	Year ended September 30,	
	2014	2013
Net interest income	59	37
Other operating income	318	195
Net operating income	377	232
Operating expenses	137	139
Profit before provision for credit impairment and income tax	240	93
Provision for credit impairment	(1)	(1)
Profit before income tax	241	94
Income tax expense	59	14
Profit after income tax	182	80
Loans and advances	1,655	1,456
Deposits	5,130	4,687

Wealth profit after income tax of \$182 million for the 2014 year increased 128% compared to 2013.

- Net interest income increased \$22 million, driven by improved deposit margins. Other operating income increased \$123 million. The result includes an insurance settlement in March 2014 relating to ANZ New Zealand's former involvement in the ING Diversified Yield Fund and ING Regular Income Fund (\$91 million). Excluding this item, other operating income increased 16%, or \$32 million, from growth in the Insurance and Funds Management businesses.

- Operating costs were 1% lower, reflecting productivity gains.
- The provision for credit impairment release of \$1 million is the same as the 2013 level.

Institutional

NZ\$ millions	Year ended September 30,	
	2014	2013
Net interest income	325	357
Other operating income	298	251
Net operating income	623	608
Operating expenses	182	196
Profit before provision for credit impairment and income tax	441	412
Provision for credit impairment	1	20
Profit before income tax	440	392
Income tax expense	122	106
Profit after income tax	318	286
Loans and advances	7,286	7,022
Deposits	13,531	13,564

Institutional profit after income tax of \$318 million for the 2014 year increased 11% compared with the 2013 year.

- Net operating income increased 2% driven by Core Markets, with positive contributions from the Sales and Trading businesses and Transaction Banking partly offset by lower revenue in Global Loans.
- Costs were well managed, with total operating expenses 7% lower than 2013.
- The provision for credit impairment decreased \$19 million compared with 2013.

Other

NZ\$ millions	Year ended September 30,	
	2014	2013
Profit after income tax	94	(15)

Other businesses mainly comprise support and Treasury functions that are centrally managed, with costs substantially charged to the operating business units, including (i) the shareholder functions unit, which holds the ANZ New Zealand Group's equity, including subordinated debt; (ii) certain significant items including the costs of organizational restructuring; and (iii) non-core items, including volatility related to derivatives entered into to manage interest rate and foreign exchange risk that are not designated in accounting hedge relationships but are considered to be economic hedges.

The result in 2014 reflected the following:

- Mark-to-market of economic hedges derivatives. Fair value gains of \$36 million were recorded in 2014, compared to fair value losses of \$34 million in 2013.
- Project costs incurred in relation to the move to a single banking technology platform in 2013 of \$22 million.
- Policy Holder Liability gains driven by volatility in long term interest rates used to discount future cash flows, resulting in a positive revaluation of net insurance policy assets of \$24 million in 2014 compared to a negative revaluation of \$35 million in 2013.

Year ended September 2013 compared with year ended September 2012 (consolidated results)

The balance sheet numbers referred to in the "Management's Discussion and Analysis of Financial Condition and Results of Operations" for the year ended September 30, 2013, compared with year ended September 30, 2012, are as "reported", not "restated" numbers.

(1) For the convenience of the reader, the financial data for the year ended September 30, 2013 has been translated from NZ dollars into U.S. dollars using the noon buying rate for September 30, 2013 of NZ\$1.00=US\$0.8323.

(2) Source: ANZ New Zealand Group audited financial statements.

For the years ended September 30, 2013 and 2012 results were reported based on four segments: (1) Retail, (2) Commercial (Business Banking, Commercial & Agri and UDC), (3) Wealth and (4) Institutional. These segments are consistent with those reported in the Disclosure Statements under NZ IFRS 8 *Operating Segments* and those used internally for evaluating operating segment performance and deciding how to allocate resources.

Profit after income tax for 2013 increased 4%, or \$49 million, to \$1,374 million.

Net interest income decreased 3% in the 2013 year from \$2,682 million in 2012 to \$2,613 million in 2013. The decrease reflected a contraction in net interest spread of 13 basis points in a competitive environment, partly offset by the positive contribution from lending volume growth. Net interest margin contraction was driven by a greater proportion of customers taking out lower margin fixed rate mortgages and higher funding costs. Lending volumes increased 4% over the 12 months, led by growth in mortgages.

Other operating income decreased 18% from \$1,006 million in 2012 to \$823 million in 2013. The main factors contributing to this decrease included:

- A gain of \$87 million realized on the sale during 2012 of ANZ New Zealand's shareholding in Visa Inc. This investment was originally acquired as part of Visa's initial public offering in 2008.
- A gain of \$14 million realized on the sale during 2013 of subsidiary company EFTPOS New Zealand Limited.
- Volatility in the mark-to-market of economic hedge derivatives. Fair value losses of \$34 million were recorded in 2013, compared with fair value gains of \$14 million in 2012. Losses in 2013 reflected negative revaluations of hedges related to the Treasury term funding portfolio, driven by contractions in NZD/USD and NZD/EUR cross-currency basis swap spreads. In 2012, the portfolio also had a negative revaluation driven by a 4 cent appreciation in the NZD versus the USD, and contraction of cross-currency basis swap spreads. These losses in 2012 were more than offset by positive revaluations of interest rate swaps in the mismatch book, driven by interest rate falls.
- Funds management and insurance income decreased \$64 million, or 21%. This was mainly driven by volatility in long term interest rates used to discount future cash flows which resulted in a negative revaluation of net insurance policy assets of \$35 million compared to a positive revaluation of \$34 million in 2012.
- Retail fees increased 3%, mainly from the sale of insurance products.

Operating expenses decreased 13% in 2013 from \$1,742 million in 2012 to \$1,507 million. The main factors in this decrease were:

- Project and restructuring costs of \$22 million were incurred in 2013 compared with \$196 million in 2012. This reduction in costs related to the integration of the core banking system, with the project now winding down.
- Excluding the above items, costs decreased 4% compared with 2012. This reflected productivity gains realized from simplifying the business that offset other cost increases.

Provision for credit impairment charge decreased \$130 million in 2013. The individual provision charge was \$126 million or 50% lower, with loss and recovery rates continuing to improve. The individual provision loss rate (individual provision charge as a percentage of average net advances) for the 2013 year improved 16 basis points to 0.14%. The collective provision result was a release from provision of \$62 million, compared with a release of \$58 million for the 2012 year. The release from the credit cycle provision in 2013 was \$31 million higher than the release in 2012. Excluding this item, the collective provision release was lower than that for 2012, reflecting the impact of higher lending volumes, and a slowing in the rate of improvement in the lending portfolio.

Net interest income

The following table shows our net interest income for the years ended September 30, 2013 and 2012.

NZ\$ millions	Year ended September 30,	
	2013	2012
Interest income	5,957	6,017
Interest expense	3,344	3,335
Net interest income	2,613	2,682

Net interest income totaled \$2,613 million for 2013, a decrease of \$69 million, or 3%, from 2012. Volume/rate analysis of the decrease in net interest income attributed a \$122 million increase due to volume growth and a \$191 million decrease due to lower net yields or interest spread. Key influences on the result included the following:

Movements in average margin

The overall interest spread decreased 13 basis points from 2.17% to 2.04% during 2013, with the yield on total average interest earning assets decreasing 27 basis points, and the yield on total average interest bearing liabilities declining 14 basis points. Key influences on the result included the following:

- The average yield on loans and advances decreased by 18 basis points from 6.26% in 2012 to 6.08% in 2013. This reflected the impact of competition, particularly in fixed rate mortgages, which has led to a fall in margins. The preference of customers for fixed rate lending during 2013, as opposed to variable rate lending, also increased the proportion of fixed rate mortgages in the lending book.
- The yield on trading securities decreased 25 basis points from 3.96% in 2012 to 3.71% in 2013, mainly in the liquidity portfolio of fixed rate, non-government bonds and government bonds.
- The average cost of deposits and short-term borrowings decreased 15 basis points from 3.54% in 2012 to 3.39% in 2013. This reflected reduced competition for deposits due to the strong growth in the deposit market overall compared to the loan market.

Movements in average volume

- Average interest earning assets increased \$3,820 million, or 4%, during 2013.
- This increase was mainly in gross loans and advances which increased by \$3,029 million, or 4%, during 2013. This reflected strong growth in the mortgages market and more modest growth in the Business, Commercial and Agri markets.
- Average interest bearing liabilities increased by \$3,822 million during 2013.
- Deposits and short term borrowings increased by \$4,459 million. This growth was largely in customer deposits. ANZ New Zealand has focused growth initiatives on higher-margin current accounts bearing interest (savings accounts, online call accounts) with competitive pricing on these products compared to term deposits.

- Bonds, notes, long term borrowings and subordinated debt decreased \$1,114 million during 2013, due to deposit growth during the year exceeding asset growth.

Other operating income

The following table shows our other operating income for the years ended September 30, 2013 and 2012.

NZ\$ millions	Year ended September 30,	
	2013	2012
Net fee income	439	455
Funds management and insurance income	234	298
Net gain on foreign exchange trading	154	144
Net gain / (loss) on trading securities and derivatives	9	(13)
Share of associate profit	7	4
Other income	(20)	118
Other operating income	823	1,006

Other operating income totaled \$823 million for 2013, a decrease of \$183 million, or 18%, over 2012. Key influences on the result included the following:

- Net fee income decreased \$16 million, or 4%. This mainly reflected lower fee income from Business Banking during the year, following the sale of EFTPOS New Zealand Limited.
- Funds management and insurance income decreased \$64 million, or 21%. This was mainly driven by volatility in long term interest rates used to discount future cash flows and resulted in a negative revaluation of net insurance policy assets of \$35 million in 2013 compared to a positive revaluation of \$34 million in 2012.
- The aggregate of net foreign exchange trading gains and gains on trading securities increased \$32 million in 2013. This mainly reflected an improved result from the revaluation of the liquidity portfolio driven by strong demand for bonds during the first half of the year; and stronger FX earnings in the clearing business.
- Other income decreased \$138 million due to:
 - Volatility in the mark-to-market of economic hedge derivatives. Fair value losses of \$34 million were recorded in 2013, compared with fair value gains of \$14 million in 2012. Losses in 2013 reflected negative revaluations of hedges related to the Treasury term funding portfolio, driven by a contraction in NZD/USD and EUR/NZD cross-currency basis swap spreads. In 2012, the portfolio also had a negative revaluation, driven by a 4 cent appreciation in the NZD versus the USD, and contraction of cross-currency basis swap spreads. These losses in 2012 were more than offset by positive revaluations of interest rate swaps in the mismatch portfolio, driven by interest rate falls.
 - Gain realized on the sale during 2012 of ANZ New Zealand's shareholding in Visa Inc. (\$87 million).

Operating expenses

The following table shows our operating expenses for the years ended September 30, 2013 and 2012.

NZ\$ millions	Year ended September 30,	
	2013	2012
Personnel costs	833	942
Premises and equipment costs	171	206
Other costs	503	594
Operating expenses	1,507	1,742

Operating expenses totaled \$1,507 million for 2013, a decrease of \$235 million, or 13%, over 2012. Key influences on the result included the following:

- Personnel costs decreased \$109 million, or 12%. This reduction in costs related to the integration of the core banking system, with the project now winding down (\$68 million lower) and the associated reduction in full-time equivalent employees. The remainder of the reduction reflected the productivity gains from simplifying the business.
- Premises and equipment costs decreased \$35 million, or 17%, with the wind-down of the integration of the core banking system accounting for \$26 million of the decrease. The remainder reflected lower rental and depreciation costs.
- Other costs decreased \$91 million, or 15%, with the integration of the core banking system accounting for \$80 million of the decrease. The head office group charge paid to ANZBGL was \$14 million lower due to a refund arising from a change in charging methodology.

Provision for credit impairment

Provision for credit impairment charge totaled \$63 million for 2013, a decrease of \$130 million compared with 2012.

- The individual provision charge was \$126 million lower, with loss and recovery rates continuing to improve. The individual provision loss rate (individual provision charge as a percentage of average net loans and advances) for the 2013 year improved 16 basis points to 0.14%.
- The collective provision was a release from provision of \$62 million, compared with a release of \$58 million for the 2012 year. This result included a release of credit cycle provision that was \$31 million higher in 2013 than the release in 2012. Excluding this item, the collective provision release was lower than that for 2012, reflecting the impact of higher lending volumes, and a slowing in the rate of improvement in the lending book.

(1) For the convenience of the reader, the restated financial data for the year ended September 30, 2013 has been translated from NZ dollars into U.S. dollars using the noon buying rate for September 30, 2013, of NZ\$1.00=US\$0.8323.

(2) Represents amounts due to ANZ Holdings (New Zealand) Limited, the immediate parent company of ANZ New Zealand.

(3) From September 30, 2014, the classification of the balance sheet has changed to reflect the nature of the financial assets and financial liabilities reported. Prior to the reclassification the balance sheet was classified according to counterparty. This has resulted in changes to previously reported balance sheet classifications for September 30, 2013.

(4) Certain amounts in the September 30, 2012, comparative information have been reclassified to ensure consistency with the presentation of the financial data for the year ended September 30, 2013. As at September 30, 2012, \$107 million was added to both assets and liabilities. As a result of this reclassification, the total assets and liabilities for 2011 are not comparable to those items for 2013 and 2012.

Other Banking Data

	RBNZ Minimum	September, 30	
		2013	2012
Capital adequacy ratios under Basel III			
Common Equity Tier 1 capital (%)	4.5	10.4	n/a
Tier 1 capital (%)	6.0	10.8	n/a
Total capital (%)	8.0	12.4	n/a
Capital adequacy ratios under Basel II			
Tier 1 capital (%)	4.0	n/a	10.8
Total capital (%)	8.0	n/a	12.4
Risk-weighted exposures (NZ\$ millions) under Basel III ¹		72,193	n/a
Risk-weighted exposures (NZ\$ millions) under Basel II ¹		n/a	67,130

(1) Total of the carrying value of each asset class multiplied by their assigned risk weighting, as defined by the RBNZ.

Total assets decreased \$1,118 million, from \$121,556 million at September 30, 2012, to \$120,438 million at September 30, 2013. Key influences on the movement in assets included:

- Assets held for liquidity purposes comprise liquid assets, balances due from other financial institutions, trading securities, and available-for-sale assets. These assets in aggregate decreased \$1,780 million (\$15,168 million at September 30, 2013, and \$16,948 million at September 30, 2012). The reduction in liquid assets was primarily due to a higher than target level being held in September 30, 2012, as a result of the issuance of term debt in September 2012.
- The balance of derivative financial instruments reflects the revaluation of these instruments to market value. The net balance of asset and liability positions decreased \$452 million from a net liability of \$1,177 million as at September 30, 2012, to a net liability of \$725 million as at September 30, 2013. This decrease reflected positive revaluations of NZD/USD foreign exchange contracts, driven by a weakening in the NZD during the first three quarters of the year. Appreciation of the NZD during the final quarter moderated the overall impact.
- Net loans and advances increased \$3,811 million, or 4%, at September 30, 2013, compared to September 30, 2012. Gross loans and advances increased \$3,589 million, with \$3,440 million of this being in term loans – housing. The provision for credit impairment decreased by \$228 million to \$826 million at September 30, 2013, which is netted against gross loans and advances.
- Other assets increased by \$139 million driven by a higher value of unsettled security sales at September 30, 2013.

Total liabilities decreased by \$1,653 million, from \$110,624 million at September 30, 2012, to \$108,971 million at September 30, 2013. Key influences on the movement in liabilities included:

- Deposits and other borrowings increased \$4,045 million, or 5%, at September 30, 2013, compared to September 30, 2012. Customer deposits increased \$4,517 million, or 7%. The strong growth reflected ANZ New Zealand's focus on strengthening its balance sheet while supporting higher lending growth.
- The balance due to other financial institutions decreased \$242 million. This decrease was mainly due to a reduction in balances due to other ANZ Group entities.
- Bonds and notes decreased \$1,750 million during the year. The decline reflects the growth in deposits. During the year, there were issuances of \$2,167 million; a positive FX impact of \$607 million; and maturities of \$4,611 million.

Year ended September 2013 compared with year ended September 2012 (results by segment).

The following segments were reported principally based on major customer groups:

- Retail
- Commercial
- Wealth

- Institutional
- Other includes treasury and back office support functions, none of which constitutes a separately reportable segment

The following table shows the results of our business segments for the year ended September 30, 2013:

NZ\$ millions	Year ended September 30,	
	2013	2012
Retail	335	304
Commercial	688	591
Wealth	54	90
Institutional	281	313
Other	16	27
Profit after income tax	1,374	1,325

Retail

NZ\$ millions	Year ended September 30,	
	2013	2012
Net interest income	839	822
Other operating income	331	323
Net operating income	1,170	1,145
Operating expenses	650	670
Profit before provision for credit impairment and income tax	520	475
Provision for credit impairment	55	54
Profit before income tax	465	421
Income tax expense	130	117
Profit after income tax	335	304
Loans and advances	28,631	26,904
Deposits	32,077	30,538

Retail profit after income tax of \$335 million for the 2013 year increased 10% compared to 2012.

- Net interest income increased 2%, driven by lending volume growth and partly offset by margin contraction. Net interest margin contraction was driven by competitive pressure, and unfavorable lending mix from an increased proportion of fixed rate lending in the mortgage book. Other operating income increased 2%, mainly from stronger sales of insurance products.
- Operating costs were 3% lower. This was driven primarily by productivity gains that are reflected in lower staff numbers, and an optimized branch network (fewer branches, coverage maintained). These savings offset other cost increases.
- The provision for credit impairment charge increased \$1 million, reflecting lending growth and stable credit conditions.
- Loans and advances increased 6%, partly reflecting a lower volume of mortgages held in the New Zealand Branch of ANZBGL. Deposit volumes grew by 5% during the year.

Commercial

NZ\$ millions	Year ended September 30,	
	2013	2012
Net interest income	1,299	1,327
Other operating income	127	124
Net operating income	1,426	1,451
Operating expenses	488	505
Profit before provision for credit impairment and income tax	938	946
Provision for credit impairment	(12)	128
Profit before income tax	950	818
Income tax expense	262	227
Profit after income tax	688	591
Loans and advances	53,584	51,757
Deposits	20,167	19,106

The Commercial business comprises Business Banking, Commercial & Agri and UDC.

Commercial profit after income tax of \$688 million for the 2013 year increased 16% compared with 2012.

- Net interest income decreased 2%. This reflected net interest margin contraction across both the Commercial & Agri and Business Banking portfolios, partly offset by the positive impact from lending volume growth. Other operating income increased 2%, reflecting a gain on sale of EFTPOS New Zealand Limited (\$14 million) during the year which was partly offset by revenue forgone following the sale.
- Operating costs were 3% lower. This was driven primarily by productivity gains reflected in lower staff numbers and reduced discretionary expenditure.
- The provision for credit impairment declined by \$140 million in 2013. The individual provision charge was \$134 million lower than 2012, with the loss rate improving 27 basis points to 0.07%. Strong credit processes have ensured the continuation of the downward trend in delinquencies and maintained high recovery and rehabilitation rates. Loans and advances increased 4%, with the main growth in Business Banking mortgages. Deposit volumes increased by 6% during the year.

Wealth

NZ\$ millions	Year ended September 30,	
	2013	2012
Net interest income	36	26
Other operating income	157	228
Net operating income	193	254
Operating expenses	136	145
Profit before provision for credit impairment and income tax	57	109
Provision for credit impairment	(1)	1
Profit before income tax	58	108
Income tax expense	4	18
Profit after income tax	54	90
Loans and advances	1,456	1,244
Deposits	4,687	4,545

Wealth profit after income tax of \$54 million for the 2013 year decreased 40% compared to 2012, with the result affected by volatility in the revaluation of net insurance policy assets.

- Net interest income increased \$10 million, driven by improved deposit margins. Other operating income decreased \$71 million. This was mainly driven by volatility in long term interest rates used to discount future cash flows which resulted in a negative revaluation of net insurance policy assets of \$35 million compared to a positive revaluation of \$34 million in 2012. Excluding this item, other

operating income was marginally lower, with lower income from insurance partly offset by growth in funds management income.

- Operating costs were 6% lower, reflecting productivity gains.
- The provision for credit impairment charge decreased \$2 million, reflecting recoveries during 2013.

Institutional

NZ\$ millions	Year ended September 30,	
	2013	2012
Net interest income	351	408
Other operating income	253	228
Net operating income	604	636
Operating expenses	199	200
Profit before provision for credit impairment and income tax	405	436
Provision for credit impairment	21	11
Profit before income tax	384	425
Income tax expense	103	112
Profit after income tax	281	313
Loans and advances	6,818	6,773
Deposits	13,564	11,788

Institutional profit after income tax of \$281 million for the 2013 year decreased 10% compared with the 2012 year.

- Net operating income decreased 5% driven by a lower contribution from the Markets sales businesses, with trading volumes subdued as a result of the high NZD. Revenue from Global Loans was lower. This reflected a highly competitive sector with net interest margin reduced and lending growth constrained. This was partly offset by stronger revenues from Transaction Banking in the Trade and Clearing businesses, including strong growth in deposits.
- We believe costs were well managed, with total operating expenses 1% lower than 2012.
- The provision for credit impairment increased \$10 million compared with 2012, reflecting provision for a single name exposure.

Other

NZ\$ millions	Year ended September 30,	
	2013	2012
Profit after income tax	16	27

Other businesses mainly comprise support and Treasury functions that are centrally managed, with costs substantially charged to the operating business units, including (i) the shareholder functions unit, which holds the ANZ New Zealand Group's equity, including subordinated debt; (ii) certain significant items including the costs of organizational restructuring; and (iii) non-core items, including volatility related to derivatives entered into to manage interest rate and foreign exchange risk that are not designated in accounting hedge relationships but are considered to be economic hedges.

The result in 2013 reflected the following:

- Mark-to-market of economic hedges. Fair value losses of \$34 million were recorded in 2013, compared with fair value gains of \$14 million in 2012. Losses in 2013 reflected negative revaluations of hedges related to the Treasury term funding portfolio, driven by contractions in NZD/USD and NZD/EUR cross-currency basis swap spreads. In 2012, the portfolio also had a negative revaluation, driven by a 4 cent appreciation in the NZD versus the USD, and contraction of cross-currency basis swap spreads. In 2012 these losses were more than offset by positive revaluations of interest rate swaps in the mismatch portfolio, driven by interest rate falls.
- Project costs incurred in relation to the move to a single banking technology platform. These costs totaled \$22 million (\$16 million after tax) in 2013; and \$196 million (\$141 million after tax) in 2012. The reduction reflected completion of the majority of the project in 2012.

- Gain realized on the sale during 2012 of ANZ New Zealand's shareholding in Visa Inc. (\$87 million). This investment was originally acquired as part of Visa's initial public offering in 2008.

Average balance sheet and interest income/expense

The following table shows the major categories of interest earning assets and interest bearing liabilities and the respective interest rates that ANZ New Zealand earned or paid for the periods indicated. Average balances used are monthly averages. Interest income figures include interest income on non-accrual loans to the extent cash payments in the nature of interest have been received. Non-accrual loans are included under the interest earning asset category "Net loans and advances".

NZ\$ millions (unless otherwise stated)	2014			2013 ¹			Year ended September 30, 2012

(1) From September 30, 2014, the classification of the balance sheet has been changed to reflect the nature of the financial assets and liabilities reported. Prior to the reclassification, the balance sheet was classified according to counterparty. This has resulted in changes to previously reported balance sheet classifications as at September 30, 2013. Minor changes in the overall total assets and total liabilities have also occurred due to the adoption of IAS19 Employee Benefits. As a result of this reclassification, available-for-sale assets, net loans and advances, other assets, deferred tax assets, deposits and other borrowings and payables and other liabilities for 2012 are not comparable to those items for the other periods presented. Further details of the reclassification are included on page 59 of this Offering Memorandum and in Note 1 and Note 35 to the ANZ New Zealand Audited Financial Statements (attached as Annex A).

Volume and rate analysis

The following table attributes variances in our interest income and interest expense to changes in volume and rate for the year ended September 30, 2014, compared with the year ended September 30, 2013, and for the year ended September 30, 2013, compared with the year ended September 30, 2012. Volume and rate variances have been calculated on the movement in average balances and the change in the interest rates on average interest earning assets and average interest bearing liabilities.

Liquidity and funding

General

Our liquidity policies are designed to ensure that we maintain sufficient cash balances and liquid asset holdings to meet our obligations as they fall due, in both ordinary market conditions and during periods of stress. These obligations include the repayment of deposits on-demand or at their contractual maturity dates, the repayment of borrowings and loan capital as they mature, the payment of operating expenses and taxation, the payment of dividends to shareholders, and the ability to fund new and existing loan and contractual commitments.

Our funding policies are designed to achieve diversified sources of funding by product, term, maturity date, investor type, investor location, jurisdiction, currency and concentration, on a cost effective basis.

Liquid assets are defined by the willingness of the RBNZ to accept them as collateral.

Our principal sources of liquidity are:

- the maturity of marketable securities;
- interest and principal repayments received from customer loans;
- customer deposits;
- proceeds from bonds, notes, and subordinated debt issues;
- fee income;
- interest and dividends from investments;
- security repurchase agreements with the RBNZ; and
- related party loans and asset sales, particularly involving the New Zealand branch of ANZBGL.

Conditions in the international debt markets deteriorated significantly from the middle of 2007 until the middle of 2009, slowly improved later during 2009 and early 2010, and then deteriorated again from mid 2010 until early 2012 due to the European debt crisis. More recently conditions have improved. These periods highlight the fragile condition of the global financial markets. Although these crises are unrelated to events in New Zealand, we have been exposed to them due to our requirement to fund regularly in the offshore market. There have been periods since the middle of 2007 when short and/or long term funding markets have been virtually illiquid. While we have continued to fund in both short and long term markets at costs prevailing at the time, we have taken a number of actions to manage our short and long term funding risks effectively in this environment, including:

- increasing minimum holdings of liquid assets to improve our ability to manage periods of market illiquidity;
- establishing an “in-house” RMBS structure in October 2008 to generate securities that meet the RBNZ criteria for eligible collateral for repurchase transactions, which significantly increases our funding ability from the RBNZ. As at March 31, 2015, ANZ New Zealand held \$6,820 million of bonds which could be used for repurchase transactions with the RBNZ generating \$5,731 million of funding;
- ANZBGL has established a New Zealand branch which was registered on January 5, 2009. The ANZ New Zealand Board has approved the sale, from time-to-time, into the New Zealand branch of ANZBGL of up to \$15 billion of residential loans and mortgages. Such sales facilitate access by the New Zealand businesses to funding from ANZBGL and partially reduce ANZ New Zealand’s funding and capital requirements. As at March 31, 2015, ANZBGL New Zealand branch held approximately \$8.3 billion of residential loans;
- ensuring that the impact of increased funding costs is passed on to our businesses, which is reflected in pricing to customers;
- actively managing our maturity profile in line with our established policies and the RBNZ liquidity policy. For example the Core Funding Ratio (CFR) is derived from customer deposits, as determined by RBNZ, plus term debt with remaining life beyond 1 year divided by Total Loans and Advances. The RBNZ CFR minimum requirement is 75%; and
- establishing a covered bond program with a program limit of €5 billion in May 2011. The assets of the ANZNZ Covered Bond Trust, which was established in February 2011, are made up of certain housing loans and related securities originated by ANZ Bank New Zealand Limited and which are security for the guarantee by ANZNZ Covered Bond Trust Limited as trustee of the ANZNZ Covered Bond Trust of issuances of covered bonds by ANZ New Zealand or ANZNIL from time to time. Currently, ANZNIL has on issue covered bonds with a face value of €2,750 million and CHF300 million. As at March 31, 2015, the ANZNZ Covered Bond Trust Limited held approximately \$7.0 billion of loans.

The following table sets forth an analysis of our contractual cash obligations in respect to subordinated debt and debt issuances as at March 31, 2015. The amounts disclosed in the tables represent undiscounted future principal and interest cash flows and operating lease cash flows. As a result the amounts in the tables differ from those represented in the balance sheet.

NZ\$ millions	As at March 31, 2015			Total
	Due within 1 year	Due between 1 and 5 years	Due beyond 5 years	
Subordinated debt and debt issuances	6,112	11,811	4,488	22,411
Lease rental commitments	63	210	199	472
Total contractual cash obligations	6,175	12,021	4,687	22,883

Our current borrowing programs as at March 31, 2015, other than borrowings from our parent, ANZBGL, are summarized in the table below. In addition to these programs, from time to time we issue subordinated debt securities in the New Zealand market that are subject to APRA and RBNZ approval.

Active borrowing programs	Program size (millions)	Amount outstanding (millions)	Issuing entity	Principal market	Governing law
Euro Commercial Paper Program - short term	US\$10,000	-	ANZNIL ¹	Offshore non US-based	English
U.S. Commercial Paper Program - short term	US\$10,000	US\$4,702	ANZNIL ¹	Offshore US-based	New York
Domestic Term Note Program	NZ\$5,000	NZ\$3,325	ANZ New Zealand	On shore	New Zealand
Euro Medium-Term Note Program	US\$10,000	US\$2,781	ANZ New Zealand and ANZNIL ¹	Offshore non US-based	English
U.S. Medium-Term Note Program	US\$10,000	US\$4,600	ANZ New Zealand and ANZNIL ¹	Offshore US-based	New York
ANZNZ Covered Bond Program	€ 5,000	€ 3,036	ANZ New Zealand and ANZNIL ^{1,2}	Offshore	English
Domestic Registered Certificate of Deposits Program	Unlimited	NZ\$1,462	ANZ New Zealand	On shore	New Zealand

(1) Borrowing obligations guaranteed by ANZ New Zealand.

(2) Borrowing obligations guaranteed by ANZ New Zealand and ANZNZ Covered Bond Trust Limited. Currently, ANZNIL has on issue covered bonds with a face value of €2,750 million and CHF 300 million.

For an analysis of our borrowings by maturity, please see "Additional Financial and Statistical Information — Maturity distribution of borrowings" included elsewhere in this Offering Memorandum.

Our liquidity policies are adopted by ANZ New Zealand's Board to ensure that we have sufficient funds available to meet all our known and potential commitments.

Based on the level of resources within our businesses and our ability to access wholesale money markets and to issue debt securities should the need arise, we consider that our overall liquidity is sufficient to meet our current obligations to customers, policyholders and bondholders. Our business complies with the current liquidity requirements of the RBNZ.

Within our business, liquidity relates to our ability to make interest payments and to repay deposits. Our current policy is to ensure that liquid assets and funding capabilities are sufficient to meet expected cash flows under different scenarios. Our primary source of funding is from deposits, either on-demand or short-term deposits and term deposits. Although substantial portions of retail accounts are contractually repayable within one year, on-demand, or at short notice, customer deposit balances have traditionally provided a stable source of our core long-term funding.

We also access the New Zealand and international debt capital markets under our various funding programs. As at March 31, 2015, we had on issue \$20,027 million of term debt securities (bonds, notes and subordinated debt).

The cost and availability of our senior unsecured financing is influenced by credit ratings. As at June 30, 2015, credit ratings and outlook for our short-term and long-term senior unsecured debt were as follows:

Credit rating agency	Short-term debt	Long-term debt	Outlook
S&P	A-1+	AA-	Stable
Moody's	P-1	Aa3	Stable
Fitch	F1+	AA-	Stable

Credit ratings are neither a rating of securities nor a recommendation to buy, hold or sell securities and may be subject to suspension, reduction or withdrawal at any time by an assigning rating agency and any rating should be evaluated independently of any other information.

The ability to sell assets quickly is also an important source of our liquidity. We hold sizeable balances of government securities and other debt securities which could be sold or are eligible as collateral for borrowing from the RBNZ to provide additional funding should the need arise.

Internal RMBS Securitization

In May 2008, the RBNZ expanded the range of acceptable collateral that banks can pledge and borrow against as part of changes to its liquidity management arrangements designed to help ensure adequate liquidity for New Zealand financial institutions in the event that global market disruption were to intensify. From July 31, 2008, acceptable collateral includes RMBS that satisfy RBNZ criteria.

On October 10, 2008, ANZ New Zealand established an in-house RMBS facility that can issue securities meeting the RBNZ criteria. The establishment of this facility increased our funding capability from the RBNZ. It also resulted in ANZ New Zealand's financial statements recognizing a payable and receivable of equal amount totalling \$8,102 million as at March 31, 2015, to Kingfisher NZ Trust 2008-1, a consolidated entity. ANZ New Zealand's consolidated financial statements did not change as a result of establishing this facility.

Sale of Residential Mortgage Assets

As at March 31, 2015, the New Zealand branch of ANZBGL held approximately \$8.3 billion of residential mortgage assets purchased from ANZ New Zealand. These assets qualify for derecognition as ANZ New Zealand does not retain a continuing involvement in the transferred assets.

Off-balance sheet financial instruments

By their nature, our activities are principally related to the use of financial instruments including derivatives. We accept deposits from customers at both fixed and floating rates, and for various periods, and seek to earn an interest margin by investing these funds in high quality assets. We seek to increase these margins by consolidating short-term funds and lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

We also seek to earn interest margins through lending to commercial and retail borrowers with a range of credit standings. Such exposures involve not just on-balance sheet loans and advances; we also enter into guarantees and other commitments such as letters of credit and performance, and other, bonds.

We also trade in financial instruments where we take positions in traded and over-the-counter instruments, including derivatives, to take advantage of short-term market movements in debt securities and in currency and interest rate prices. With the exception of specific hedging arrangements, foreign exchange and interest rate exposures associated with these derivatives are normally offset by entering into counterbalancing positions, thereby controlling the variability in the net cash amounts required to liquidate market positions.

Derivatives

Derivatives, except for those that are specifically designated as effective hedging instruments, are classified as held for trading. The held for trading classification includes two categories of derivative instruments, those used in sales and market making activities (trading positions) and those used for our own risk management purposes that do not meet specific qualifying criteria for hedge accounting and therefore must be classified as trading. Derivatives are subject to the same types of credit and market risk as other financial instruments, and we manage these risks in a consistent manner.

The fair value of a derivative represents the aggregate net present value of the cash inflows and outflows required to extinguish the rights and obligations arising from the derivative in an orderly market as at the reporting date. Fair value does not indicate future gains or losses, but rather the unrealized gains and losses arising from marking to market all derivatives at a particular point in time.

Under NZ IFRS, all derivative financial instruments, including those used as hedging instruments, are measured at fair value and recognized in the balance sheet.

Collateral of \$800 million was received as at September 30, 2014, in relation to derivative financial instruments (September 30, 2013: \$438 million; September 30, 2012: \$257 million).

Collateral of \$783 million was paid as at September 30, 2014, in relation to derivative financial instruments (September 30, 2013: \$1,002 million; September 30, 2012: \$1,256 million).

Contingent liabilities and credit related commitments

We guarantee the performance of customers by issuing standby letters of credit and guarantees to third parties, including ANZBGL. The risk involved is essentially the same as the credit risk involved in extending loan facilities to customers, therefore these transactions are subjected to the same credit origination, portfolio management and collateral requirements as for customers applying for loans. As the facilities may expire without being drawn upon, the notional amounts do not necessarily reflect future cash requirements.

The gross value of the instruments and facilities reflects the level of our activity in the various products and not the much smaller net risk exposure. As we do not believe that any irrecoverable liability will arise from the settlement of these types of transactions, they are not recorded as on-balance sheet financial instruments.

We do not disclose fair value information in respect of off-balance sheet financial instruments, other than derivatives, as we do not believe the estimated fair value is material. Under NZ IFRS, the fair value of derivatives is already reflected in the financial statements.

The estimated face or contract values and credit equivalent amount for our off-balance sheet financial instruments are as follows:

NZ\$ millions	As at September 30,		
	2014 Face or Contract Value	2013 Face or Contract Value	2012 Face or Contract Value
Contingent liabilities			
Financial guarantees	925	997	731
Standby letters of credit	79	32	44

Contracts for outstanding capital expenditure			
Commitments with certain drawdown due within one year	15	24	43
Credit related commitments			
Commitments with certain drawdown due within one year	764	817	742
Commitments to provide financial services	27,378	24,446	24,698

Other contingent liabilities

See "Risk Factors—Litigation and contingent liabilities may adversely impact our results" in this Offering Memorandum.

Other

There are other outstanding court proceedings, claims and possible claims against us, the aggregate amount of which cannot readily be quantified or which is not considered material. Legal advice has been obtained and, in the light of such advice, provisions as deemed necessary have been made and are disclosed in our consolidated financial statements.

Capital adequacy

ANZ New Zealand's Conditions of Registration, set by the RBNZ, specify the minimum capital requirements with which ANZ New Zealand must comply. The Conditions of Registration require capital adequacy ratios for ANZ New Zealand to be calculated in accordance with the RBNZ document entitled "*Capital Adequacy Framework (Internal Models Based Approach)*" (BS2B).

From January 1, 2013, ANZ New Zealand is required to comply with the RBNZ's Basel III capital adequacy requirements.

The following table provides details of our Common Equity Tier 1, Tier 1 and Tier 2 capital position as at March 31, 2015, and March 31, 2014. The capital ratios are calculated using an internal models based approach and in accordance with RBNZ's Basel III capital standards.

NZ\$ millions, unless otherwise stated

	RBNZ Minimum	As at March 31, 2015	As at March 31, 2014

Capital Adequacy in New Zealand

The bank prudential supervisor in New Zealand is the RBNZ. It imposes capital adequacy requirements on banks, the objective of which is to ensure that an adequate level of capital is maintained, thereby providing a buffer to absorb unanticipated losses from activities. The RBNZ's approach to assessing capital adequacy focuses on credit risk associated with the bank's exposures, market and operational risks and the quality and quantity of a bank's capital.

ANZ New Zealand is accredited by the RBNZ to use the internal ratings based approach for calculating capital adequacy ratios.

The RBNZ has implemented the Basel III capital adequacy requirements, as modified to reflect New Zealand conditions, on January 1, 2013. From January 1, 2014, the RBNZ has also required most New Zealand incorporated banks, including ANZ New Zealand, to maintain a conservation buffer of 2.5% above the minimum ratios or face restrictions on distributions. The RBNZ also has the discretion (effective from January 1, 2014) to apply a countercyclical buffer of common equity with an indicative range of between 0 and 2.5%, although there is no formal upper limit.

From January 1, 2013, the RBNZ defines total regulatory capital as the sum of Tier 1 capital and Tier 2 capital. Tier 1 capital comprises Common Equity Tier 1 capital and Additional Tier 1 capital. Each category of capital is calculated net of the associated regulatory adjustments prescribed by the RBNZ.

Prior to January 1, 2013, the RBNZ defined total regulatory capital as Tier 1 capital plus Tier 2 capital less deductions from total capital. Tier 2 capital consisted of subordinated loan capital less any prescribed deductions.

ICAAP

ANZ New Zealand's ICAAP incorporates overall capital policies and objectives, capital management policies and plans, allocation of capital to business units and stress testing of both risk and capital positions.

ANZ New Zealand's core capital objectives are to:

- protect the interests of depositors, creditors and shareholders;
- ensure the safety and soundness of ANZ New Zealand's capital position; and
- ensure that the capital base supports ANZ New Zealand's risk appetite, and strategic business objectives, in an efficient and effective manner.

The ANZ New Zealand Board of Directors holds ultimate responsibility for ensuring that capital adequacy is maintained. This includes setting, monitoring and obtaining assurance for ANZ New Zealand's ICAAP policy and framework, standardized risk definitions for all material risks, materiality thresholds, capital adequacy targets, internal economic risk capital principles and risk appetite.

ANZ New Zealand has minimum and trigger levels for Common Equity Tier 1, Tier 1 and total capital to ensure sufficient capital is maintained to:

- meet minimum prudential requirements as defined in ANZ New Zealand's Conditions of Registration;
- ensure consistency with ANZ New Zealand's overall risk profile and financial positions, taking into account its strategic focus and business plan; and
- support the economic risk capital requirements of the business.

ANZ New Zealand's Asset & Liability Committee and its related Capital Management Forum are responsible for developing, implementing and maintaining ANZ New Zealand's ICAAP framework including on-going monitoring, reporting and compliance.

ANZ New Zealand's ICAAP is subject to periodic review conducted by internal audit.

ANZ New Zealand has complied with all externally imposed capital requirements to which it is subject during the current and comparative periods.

ANZ New Zealand's Capitalization

ANZ New Zealand's Common Equity Tier 1 capital adequacy ratio as at March 31, 2015, was 10.1%. The Common Equity Tier 1 capital adequacy ratio is a new capital adequacy ratio implemented by the RBNZ on January 1, 2013, as part of the RBNZ's Basel III reforms. The Tier 1 capital adequacy ratio was 12.4% as at March 31, 2015, and 11.1% as at September 30, 2014. The total capital adequacy ratio was 13.3% as at March 31, 2015, an increase from 12.3% as at September 30, 2014.

Risk weighted exposures

Credit Risk

Under the Internal Ratings Based Approach (“**IRB**”), banks use their own internal risk measures, subject to certain RBNZ impositions, for calculating the level of credit risk associated with customers and exposures, by way of the primary components of:

Probability of Default (“**PD**”) – an estimate of the level of risk of borrower default graded by way of rating models used both at loan origination and for ongoing monitoring;

Exposure at Default (“**EAD**”) – the expected facility exposure at default; and

Loss Given Default (“**LGD**”) – an estimate of the potential economic loss on a credit exposure, incurred as a result of obligor default and expressed as a percentage of the facility’s EAD. For retail mortgage exposures, New Zealand banks apply downturn LGDs according to Loan to Value (“**LVR**”) prescribed bands as set out in BS2B. For Farm Lending, ANZ New Zealand has adopted RBNZ prescribed LVR based downturn LGDs along with a minimum maturity of 2.5 years and the removal of the firm size adjustment.

For exposures classified under Specialized Lending, banks use slotting tables prescribed by the RBNZ rather than internal estimates to determine risk weighted exposures.

Under the IRB approach credit exposures (both on and off-balance sheet) are allocated to an asset class (sovereign, bank, corporate, retail mortgage and other retail) depending on borrower type. In addition equity exposures and other assets such as premises and equipment, cash and claims on the RBNZ are separately identified and risk weighted according to the requirements of BS2B.

For a minor number of portfolios the IRB approach is not adopted as, due to systems constraints or other reasons, determining IRB estimates is not currently feasible or appropriate. Risk weights for these exposures are calculated under a standardized methodology set out in the RBNZ document entitled “Capital Adequacy Framework (Standardized Approach)” (BS2A).

Operational Risk

Banks are required to hold capital against operational risks associated with their business. ANZ New Zealand uses the Advanced Measurement Approach for determining its regulatory capital requirement for operational risk in accordance with BS2B. Operational Risk capital is modelled at a New Zealand divisional level and then distributed and adjusted for the business environment and internal controls down to the business units using the Risk Scenario Methodology. The Risk Scenario Methodology is a risk based methodology that ensures that there is sufficient operational risk capital held as a buffer for rare and severe unexpected operational loss events that may impact the New Zealand business. The Methodology applies a combination of expert judgment, business unit risk profiles, audit findings and internal and external loss events to derive a series of business specific Risk Scenarios that are applied to the capital model. The Risk Scenario approach:

- Assesses the level of ANZ New Zealand’s exposure to specified risk scenarios;
- Assesses the scope and quality of ANZ New Zealand’s internal control environment, key operational processes and risk mitigants; and
- Directly links these assessments to operational risk capital.

ANZ New Zealand’s operational risk capital is calculated using the ANZBGL methodology, but with standalone New Zealand inputs to ensure there are no diversification benefits, as required by the RBNZ. The calculation does not incorporate any insurance mitigation impact.

Market Risk

Banks are required to hold capital against interest rate, foreign currency and equity risks (together, “**market risk**”). ANZ New Zealand uses a standardized methodology for the calculation of market risk as prescribed by the RBNZ’s BS2A/BS2B Capital Adequacy Framework.

Internal capital measurement

In accordance with its Conditions of Registration, ANZ New Zealand is also required to maintain an internal economic capital allocation for other material risks not covered by regulatory capital requirements. The measurement and management of any other material risks is covered in ANZ New Zealand’s Economic Capital model, which is used within its ICAAP. Economic capital is assessed as the unexpected loss measured to a

99.97% confidence level, which is consistent with ANZ New Zealand's risk appetite of maintaining its AA rating. The internal capital allocation for ANZ New Zealand's other material risks as at March 31, 2015, was \$437 million (\$485 million as at September 30, 2014), including pension risk, insurance risk, strategic equity risk, fixed asset risk, deferred acquisition cost risk, value-in-force risk, business retention risk and software risk.

Regulatory Capital

Following the implementation of Basel III by the RBNZ on January 1, 2013, regulatory capital comprises Common Equity Tier 1 capital, Additional Tier 1 capital (together, "**Tier 1 capital**") and Tier 2 capital. Each category of capital is calculated net of associated regulatory adjustments. The resultant amount of capital forms the total capital base.

Common Equity Tier 1 capital includes eligible paid-up ordinary shares, share premium, retained earnings (net of appropriations), accumulated other comprehensive income and other reserves (other than asset revaluation reserves), and minority interests less various prescribed regulatory deduction adjustments including goodwill.

Additional Tier 1 capital includes eligible perpetual shares or debt and Tier 2 capital includes eligible subordinated long-term debt. Both Additional Tier 1 capital and Tier 2 capital instruments must include non-viability trigger events. Additional Tier 1 Capital instruments classified as a liability under NZ GAAP must also include loss absorption requirements for a Common Equity Tier 1 trigger event. Additional Tier 1 capital and Tier 2 capital may also include certain Basel III non-compliant instruments issued before September 12, 2010, under the RBNZ's Basel III transitional arrangements, subject to a reducing cap from January 1, 2014, to January 1, 2018.

From January 1, 2013, New Zealand banks are required to maintain a minimum ratio of total capital to total risk weighted exposures of 8%, of which a minimum of 6% must be held in Tier 1 capital and 4.5% must be held in Common Equity Tier 1 capital. The numerator of the ratio is the capital base. The denominator of the ratio is total risk weighted exposures.

From January 1, 2014, where a capital adequacy ratio falls below its minimum ratio plus a buffer ratio, ANZ New Zealand must limit its aggregate distributions (including dividends, share buybacks and discretionary payments on Additional Tier 1 capital instruments) in accordance with its conditions of registration. The buffer ratio comprises a conservation buffer of common equity set at 2.5% of risk-weighted assets and also potentially a countercyclical buffer of common equity that will only be deployed when the RBNZ judges that excess private sector credit growth or rapid growth in asset prices is leading to a build-up of system-wide risk.

Risk Weighted Assets

Total required capital as at March 31, 2015 (Basel III)

Risk management policies

We recognize the importance of effective risk management to our business success. We are committed to achieving strong control and a distinctive risk management capability that enables ANZ New Zealand's business units to meet their performance objectives.

We approach risk through managing the various elements of the system as a whole rather than viewing them as independent and unrelated parts. The risk management function is independent of the business with clear delegations from the Board and operates within a comprehensive framework comprising:

- The Board, providing leadership, setting risk appetite/strategy and monitoring progress;
- A strong framework for development and maintenance of ANZ New Zealand's risk management policies, procedures and systems, overseen by an independent team of risk professionals;
- The use of risk tools, applications and processes to execute the global risk management strategy across ANZ New Zealand;
- Business unit level accountability, as the "first line of defense", and for the management of risks in alignment with our strategy; and
- Independent oversight to ensure business unit level compliance with policies, regulations and laws, and to provide regular risk evaluation and reporting.

We manage risk through an approval, delegation and limits structure. Regular reviews of the policies, systems and risk reports, including the effectiveness of the risk management systems, discussions covering our response to emerging risk issues and trends, and that the requisite culture and practices are in place across ANZ New Zealand, are conducted within ANZ New Zealand and also by ANZBGL. The Board has responsibility for reviewing all aspects of risk management.

The Board has ultimate responsibility for overseeing the effective deployment of risk management frameworks, policies and processes within New Zealand. Our Risk Committee, which is a sub-committee of the Board, assists with this function. The role of the Committee is to assist the Board in the effective discharge of its responsibilities for business, market, credit, capital, financial, operational, compliance, liquidity and reputational risk management, and to liaise and consult with the ANZBGL Risk Committee as required. We have an independent risk management function, which, via the Chief Risk Officer, coordinates risk management directly between Business Unit risk functions and ANZBGL Risk Management functions.

The risk management process is subject to oversight by the Risk Committee of the ANZBGL Board. This includes the review of risk portfolios and the establishment of prudential policies and controls.

Our risk management policies are essentially the same as ANZBGL's but are tailored where required to suit the local New Zealand regulatory and business environment.

The Audit Committee, which is a sub-committee of the Board, has responsibility for reviewing all aspects of published financial statements and internal and external audit processes. It meets at least four times a year, and reports directly to the Board.

Credit Risk

We have an overall lending objective of sound growth for appropriate returns. The credit risk management framework exists to provide a structured and disciplined process to support this objective.

This framework is top down, being defined firstly by our Vision and Values and secondly, by Credit Principles and Policies. We also maintain a bank-wide risk appetite framework and business writing strategies for each of our major business units which give practical effect to the credit and risk appetite frameworks. These strategy papers are reviewed by the appropriate management committees and the Board. The effectiveness of the credit risk management framework is validated through compliance and monitoring processes. These, together with portfolio selection, define and guide the credit process, organization and staff.

Risk Management's responsibilities for credit risk policy and management are executed through dedicated departments, which support our business units. All major business unit credit decisions require approval from both business writers and independent risk personnel.

Credit risk includes concentrations of credit risk, intra day credit risk, credit risk to bank counterparties and related party credit risk, and is the potential loss arising from the non-performance by the counterparty to an instrument or facility. Credit risk arises when funds are extended, committed, invested or otherwise exposed through contractual agreements, and encompasses both on and off-balance sheet instruments. Credit risk is controlled through a combination of approvals, limits, reviews and monitoring procedures that are carried out on a regular basis, the frequency of which is dependent on the level of risk. Credit risk policy and management is executed through the Chief Risk Officer who has various dedicated areas within the Risk Management division. Wholesale Risk services ANZ New Zealand's commercial, investment banking and rural lending activities through dedicated teams. Retail Risk services ANZ New Zealand's small business and consumer customers. The Portfolio Reporting team within Risk Management provides an independent overview of credit

risk across ANZ New Zealand at a portfolio level. We allow discretion for transaction approvals at the business unit level in both the retail and wholesale lending sectors, with larger transactions approved by Retail Risk and Wholesale Risk.

Market Risk

We have a market risk management and control framework, to support trading and balance sheet management activities. The framework incorporates a risk measurement approach to quantify the magnitude of market risk within the trading and balance sheet portfolios. This approach and related analysis identify the range of possible outcomes that can be expected over a given period of time, and establish the relative likelihood of those outcomes and allocate an appropriate amount of capital to support these activities.

Traded market risk is the risk of loss from changes in value of financial instruments due to movements in price factors for both physical and derivative trading positions. These risks are monitored daily against a comprehensive limit framework that includes Value at Risk ("**VaR**"), aggregate market position and sensitivity, product and geographic thresholds. The principal risk components of this monitoring process are:

- **Currency risk** is the potential loss arising from the decline in the value of a financial instrument, due to changes in foreign exchange rates or their implied volatilities.
- **Interest rate risk** is the potential loss arising from the change in the value of a financial instrument, due to changes in market interest rates or their implied volatilities.
- **Credit Spread risk** is the potential loss arising from a decline in value of an instrument due to a movement of its margin or spread relative to a benchmark.

VaR Methodology: All the above risks are measured using a VaR methodology. The VaR methodology is a statistical estimate of the likely daily loss and is based on historical market movements. The confidence level is such that there is a 99% probability that the loss will not exceed the VaR estimate on any given day. Conversely, there is a 1% probability of the decrease in market value exceeding the VaR estimate on any given day. We have adopted the historical simulation methodology as the standard for the calculation of VaR. This methodology is based on assessing the change in value of portfolios each day against historical prices.

Within overall strategies and policies, control of market risk exposures at ANZ New Zealand level is the responsibility of Market Risk, who work closely with the Markets and Treasury business units.

The Traded Market risk function provides specific oversight of each of the main trading areas and is responsible for the establishment of a VaR framework and detailed control limits. In all trading areas we have implemented models that calculate VaR exposures, monitor risk exposures against defined limits on a daily basis, and "stress test" trading portfolios. The Asset and Liability Committee ("**ALCO**"), comprising executive management, provides monthly oversight of Market Risk.

The Chief Risk Officer is responsible for daily review and oversight of traded market risk reports. The Chief Risk Officer has the authority for instructing the business to close exposures and withdraw limits where appropriate.

Balance Sheet Risk Management embraces the management of non-traded interest rate risk, liquidity and the risk to capital and earnings as a result of exchange rate movements. A specialist balance sheet management unit manages these, and is overseen by Risk Management and the ALCO.

- **Interest rate risk** management's objective is to produce strong and stable net interest income over time. We use simulation models to quantify the potential impact of interest rate changes on earnings and the market value of the balance sheet. Interest rate risk management focuses on two principal sources of risk: mismatches between the re-pricing dates of interest bearing assets and liabilities; and the investment of capital and other non-interest bearing liabilities in interest bearing assets. Non-traded interest rate risk is managed to both value and earnings at risk limits.
- **Currency risk** relates to the potential loss arising from the decline in the value of foreign currency positions due to changes in foreign exchange rates. For non-traded instruments in foreign currencies, the risk is monitored and is hedged in accordance with policy. Risk arising from individual funding and other transactions is actively managed. The total amounts of unmatched foreign currency assets and liabilities and consequent foreign currency exposures, arising from each class of financial asset and liability, whether recognized or unrecognized, within each currency are not material.
- **Liquidity risk** is the risk that under certain conditions, cash outflows can exceed cash inflows in a given period. We maintain sufficient liquid funds to meet commitments based on historical and forecasted cash flow requirements. Liquidity risk is measured through cash flow modelling, with profiles produced for both normal business and short-term crisis conditions. The RBNZ introduced a Liquidity Policy (BS13 and BS13A) covering the management of liquidity risk by registered banks in

New Zealand which took effect from March 30, 2010. A description of these requirements is covered under "Regulation and Supervision – Conditions of Registration".

- **Equity risk** is the potential loss arising from the decline in the value of equity instruments held by us due to changes in their equity market prices or implied volatilities.
- **Prepayment risk** is the potential risk to earnings or market value from when a customer prepays all or part of a fixed rate mortgage and where any customer fee charged is not sufficient to offset the loss in value to ANZ New Zealand of this financial asset due to movements in interest rates and other pricing factors. As far as possible the true economic cost is passed through to customers in line with their terms and conditions and relevant legislation.
- **Basis risk** is the potential risk to earnings or market value from differences between customer pricing and wholesale market pricing. This is managed through active review of product margins.

Operational Risk

Operational risk is the risk arising from day-to-day operational activities which may result in direct or indirect loss. These losses may result from failure to comply with policies, procedures, laws and regulations, from fraud or forgery, from a breakdown in the availability or integrity of services, systems and information, or damage to the Bank's reputation.

Examples include failure to comply with policy and legislation, human error, natural disasters, fraud and other malicious acts. Where appropriate, risks are mitigated by insurance.

Operational risk is typically classified into risk event type categories to measure and compare risks on a consistent basis. Examples of operational risk events according to category are as follows:

- **Internal Fraud:** Risk that fraudulent acts are planned, initiated or executed by employees (permanent, temporary or contractors) from inside the bank.
- **External Fraud:** Fraudulent acts or attempts which originate from outside the bank, including valueless cheques, counterfeit credit cards and loan applications in false names.
- **Employment Practices & Workplace Safety:** Risk to our employees' health and safety.
- **Clients, Products & Business Practices,** including risk of market manipulation, product defects, money laundering and misuse of customer information.
- **Business Disruption (including Systems Failures):** Risk that our banking operating systems are disrupted or fail. At ANZ, technology risks are key Operational Risks which fall under this category.
- **Damage to Physical Assets:** Risk that a natural disaster, terrorist or vandalism attack damages our buildings or property.
- **Execution, Delivery & Process Management:** Risk that we experience losses as a result of data entry errors, accounting errors or failed mandatory reporting.

Risk Management is responsible for establishing our operational risk framework and associated ANZ Group wide policies. Business units are responsible for the identification, analysis, assessment and treatment of operational risks on a day-to-day basis.

Business units have primary responsibility for the identification and management of operational risk with executive oversight provided by the relevant Retail and Wholesale Risk Forums. ANZ New Zealand's Operational Risk Executive Committee ("**OREC**") undertakes the governance function through the bi-monthly monitoring of operational risk performance across ANZ New Zealand. The Board and Risk Management conduct effective oversight through the approval of operational risk policies and frameworks and monitoring key operational risk metrics.

Compliance

We conduct our business in accordance with all relevant compliance requirements. In order to assist us to identify, manage, monitor and measure our compliance obligations, we have a comprehensive regulatory compliance framework in place, which addresses both external (regulatory) and internal compliance.

Risk Management, in conjunction with business unit staff, ensures we operate within a compliance infrastructure and framework that incorporates new and changing business obligations and processes.

The compliance policies and their supporting framework seek to minimize material risks to our reputation and value that could arise from non-compliance with laws, regulations, industry codes and internal standards and policies. Business units have primary responsibility for the identification and management of compliance. Our Risk Management division provides policy and framework, monitoring and reporting, as well as leadership in areas such as anti-money laundering procedures and matters of prudential compliance. OREC, the Chief Risk Officer, the ANZ New Zealand Board and the Risk Committee of the ANZBGL Board conduct Board and Executive oversight.

Internal Audit

Our Global Internal Audit function conducts independent and efficient reviews that assist the Board of Directors and management to meet their statutory and other obligations.

Global Internal Audit reports directly to the Chairman of the ANZ New Zealand Audit Committee and through to the Group General Manager Global Internal Audit ANZBGL. Under its Charter, Global Internal Audit conducts independent appraisals of the internal controls established by ANZ New Zealand's first (business) and second (ANZ Group's risk and finance functions) lines of defense. This shall include:

- Managing and monitoring all major and extreme residual risks to ANZ New Zealand;
- Enabling compliance with Board policies and management directives;
- Assessing the adequacy of ANZ New Zealand's compliance with the requirements of supervisory regulatory authorities;
- Representation in tripartite meetings with regulators, ANZ Group management and the external auditors;
- Supporting the economic and efficient management of resources; and
- Enhancing the effectiveness of operations undertaken by ANZ New Zealand.

In planning the audit activities, Global Internal Audit adopts a risk-based audit methodology that directs and concentrates resources to those areas of greatest significance, strategic concern and risk to the business. This encompasses reviews of major credit, market, technology and operating risks within the ANZ New Zealand Group. Significant findings are reported quarterly to the Audit Committee.

The Global Internal Audit Plan is approved by our Audit Committee and endorsed by the ANZBGL Audit Committee.

All issues and recommendations reported to management are tracked and monitored internally to ensure completion and agreed actions are undertaken where appropriate.

Additional Financial and Statistical Information

Set out below is additional financial and statistical information for our business for the periods indicated. For additional information concerning our financial results for the six months ended March 31, 2015, see "Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Offering Memorandum and the Disclosure Statements.

Assets and liabilities

The following table sets forth the assets and liabilities of our business as at the dates indicated:

NZ\$ millions	2014	2013 ¹ Restated	As at September 30,	
			2013	2012
Assets				
Liquid assets	n/a	n/a	2,496	2,831
Due from other financial institutions	n/a	n/a	1,570	1,722
Cash	1,822	2,206	n/a	n/a
Settlement balances receivable	855	514	n/a	n/a
Collateral paid	783	1,002	n/a	n/a
Trading securities	11,750	10,320	10,320	12,338

Net assets	11,781	11,454	11,467	10,932

(1) From September 30, 2014, the classification of the balance sheet has been changed to reflect the nature of the financial assets and liabilities reported. Prior to the reclassification, the balance sheet was classified according to counterparty. This has resulted in changes to previously reported balance sheet classifications as at September 30, 2013. Minor changes in the overall total assets and total liabilities have also occurred due to the adoption of IAS19 *Employee Benefits*. As a result of this reclassification, available-for-sale assets, net loans and advances, other assets, deferred tax assets, deposits and other borrowings and payables and other liabilities for 2012 are not comparable to those items for the other periods presented. Further details of the reclassification are included on page 59 of this Offering Memorandum and in Note 1 and Note 35 to the ANZ New Zealand Audited Financial Statements (attached as Annex A).

Credit risk concentration

The following table sets forth total lending risk by industry, including impaired assets, specific provisions and write-offs:

NZ\$ millions	As at March 31, 2015					
	Total lending	Impaired assets	Specific provision	Write-offs	Recoveries	Net write-off
Agriculture, forestry, fishing & mining	18,801	189	59	2	1	1
Business & property services	9,748	47	25	3	-	3
Construction	1,389	12	9	-	-	-

Total lending	96,969	634	215	176	29	147

Mortgagee Sales

Under New Zealand property law, holders of registered mortgages are able to exercise their right of power of sale when the customer has breached the terms of their loan or mortgage. Before any mortgagee sale can be initiated, a notice under the Property Law Act 2007 ("PLA Notice") must be issued. The PLA Notice is the formal legal notice of default and advises the customer that unless ANZ New Zealand is repaid in full by a set date then ANZ New Zealand may exercise its right of power of sale.

The table below shows the actual PLA Notices issued and mortgagee sales concluded from January 2011 to March 2015.

	2011											
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
PLA issued	125	136	118	92	72	86	62	75	138	104	166	35
Mortgagee sales concluded	35	29	26	21	24	23	38	40	47	13	22	32
	2012											
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

PLA issued	60	43	51									
Mortgagee sales concluded	10	6	7									

Interest rate exposures

The interest rate sensitivity analysis of on-balance sheet financial assets and liabilities has been prepared on the basis of contractual maturity or next re-pricing date, whichever is the earlier, except where the contractual terms are not considered to be reflective of interest rate sensitivity, for example, those assets and liabilities priced at the ANZ New Zealand Group's discretion. In such cases, the rate sensitivity is based upon historically observed and/or anticipated rate sensitivity.

Interest rate exposure is monitored by an independent function to ensure that aggregate risk is managed within Board determined policy. The policy ensures that we are not exposed to unpalatable variations in economic value and net interest income due to interest rates. Simulation modelling and net gap analysis are undertaken, taking into account the projected change in asset and liability levels and mix. The aggregate interest rate exposure of the balance sheet, including net interest income at risk over the next two years, and the present value sensitivity of the net gap, are reviewed on a monthly basis, under various interest rate scenarios.

Our repricing "gap position" as at September 30, 2014, is shown in the following table:

NZ\$ millions	As at September 30, 2014						
	Total	less than 3 months	3 to 6 months	6 to 12 months	1 to 2 years	Beyond 2 years	Non-interest Bearing
Financial assets

General banking statistics

The following table provides ratio information relating to our business:

	2014	2013	2012	As at September 30,	
(%, unless otherwise stated)				2011	2010
Cost to income ratio ¹	38.90	44.00	47.23	49.37	49.48
Cost to average total banking assets ratio ²	1.19	1.24	1.42	1.47	1.34
Capital adequacy ratio ³	12.30	12.41	12.48	12.74	13.11
Risk-weighted exposures (NZ\$ millions) ⁴	73,427	72,193	67,130	70,837	68,779
Return on average risk-weighted exposures ⁵	2.38	1.95	1.93	1.56	1.18
Net interest margin ⁶	2.48	2.46	2.62	2.57	2.43
Net interest spread ⁷	1.98	2.04	2.12	2.11	2.00
Non-interest income as a percentage of assets ⁸	0.87	0.68	0.82	0.75	0.63
Non-interest income as a percentage of total income ⁹	28.34	23.95	27.28	25.07	23.52

(1) Operating expenses of the banking business divided by total income from ordinary banking activities.

(2) Operating expenses of the banking business divided by average total banking assets as shown in the average banking assets and liabilities statement.

(3) Capital base divided by total risk weighted exposures, as defined by the RBNZ.

(4) Risk weighted exposures as at September 30, 2014, and September 30, 2013, have been calculated under the Basel III framework, whereas the comparative risk weighted exposures for the other periods presented in the table have been calculated under the Basel II framework, and are not directly comparable. For more information, see "Regulatory Capital" in this Offering Memorandum.

(5) Banking operating profit after tax divided by average risk weighted exposures. Averages are based on quarterly balances. The ratio is annualized.

(6) Net interest income divided by average interest earning assets.

(7) The difference between the average interest rate on average interest earning assets and the average interest rate on average interest bearing liabilities.

(8) Total income from ordinary banking activities less net interest income divided by average banking assets.

(9) Total income from ordinary banking activities less net interest income divided by total income from ordinary banking activities.

Loans and advances by category

Our portfolio by category of loans and advances is set forth in the following table. The statistics reflect our gross loan advances including provisions and net of unearned income.

NZ\$ millions	As at September 30,				
	2014	2013 ¹	2012	2011	2010
Overdrafts	1,744	1,841	1,881	1,847	2,131
Credit card outstandings	1,580	1,458	1,395	1,367	1,388
Term loans - Housing	52,717	49,521	46,123	43,636	43,887
Term loans - Non-housing	39,622	37,673	37,749	37,398	39,179
Lease receivables	277	351	n/a	n/a	n/a
Hire purchase	837	721	n/a	n/a	n/a
Other	125	125	n/a	n/a	n/a
Finance lease receivables	n/a	n/a	806	768	726
Gross loans and advances	96,902	91,690	87,954	85,016	87,311
Provision for impairment	(666)	(826)	(1,054)	(1,156)	(1,398)
Unearned finance income	(212)	(214)	(258)	(256)	(273)
Capitalized brokerage / mortgage origination fees	208	156	98	35	43
Customer liability for acceptances	67	31	n/a	n/a	n/a
Deferred fee revenue and expenses	n/a	n/a	(60)	(51)	(49)
Fair value hedge adjustment	n/a	n/a	(2)	22	279
Total net loans and advances	96,299	90,837	86,678	83,610	85,913

(1) From September 30, 2014, the classification of the balance sheet has been changed to reflect the nature of the financial assets and liabilities reported. Prior to the reclassification, the balance sheet was classified according to counterparty. This has resulted in changes to previously reported balance sheet classifications as at September 30, 2013. As a result of this reclassification net loans and advances for 2012, 2011 and 2010 are not comparable for other periods presented. Further details of the restated amounts are included on page 59 of this Offering Memorandum and in Note 1 and Note 35 to the ANZ New Zealand Audited Financial Statements (attached as Annex A).

Performance statistics

The following table sets forth our average interest earning assets, net interest income, gross earning rate, net interest margin and net interest spread for the periods indicated:

NZ\$ millions (unless otherwise stated)	Year ended September 30,		
	2014	2013	2012
Average interest earning assets	110,797	106,380	102,560
Net interest income	2,743	2,613	2,682
Gross earning rate (%) ¹	5.66	5.60	5.87
Net interest margin (%) ²	2.48	2.46	2.62
Net interest spread (%) ³	1.98	2.04	2.12

(1) Average interest rate received on interest earning assets.

(2) Average interest rate received on interest earning assets less the average interest rate paid on interest bearing liabilities.

(3) Net interest income as a percentage of average interest earning assets.

On-balance sheet and off-balance sheet exposures subject to internal ratings based approach

The following table sets forth our on-balance sheet and off-balance sheet exposures under the Internal Ratings Based approach:

As at March 31, 2015

NZ\$ millions (unless otherwise stated)	Total exposure or principal amount	Exposure at default	Exposure-weighted LGD used for the capital calculation (%)	Exposure-weighted risk weight (%)	Risk weighted exposure ¹	Total capital requirement
On-balance sheet exposures						
Corporate	34,497	34,408	36	54	19,663	1,573
Sovereign	10,328	10,152	5	1	112	8
Bank	4,695	3,353	60	26	922	74

Gross impaired assets & 90 days past due assets as a percentage of gross loans and advances (%)	0.67	0.81	1.21	1.79	2.37	2.62

Non-Performing Loans

Impaired loans have reduced by 25% from \$634 million at September 30, 2014, to \$474 million at March 31, 2015. That decrease was experienced across most business sectors through asset realization, restatement to performing and write-offs. We continue our strategy of working with customers to return them to a productive status or to achieve maximum recoveries for us and the customer. Given subdued sales volumes across some asset markets, this strategy can involve extended work-outs for some customers but it is achieving adequate levels of assets realized or repaid, or provisions recovered. Bad debts written-off in the 6 months to March 31, 2015 were \$65 million.

Provision for credit impairment

ANZ New Zealand's lending portfolio is largely secured against residential property, rural land, commercial property and other business assets.

Reflecting that collateral backing, approximately 59% of ANZ New Zealand's impaired assets are covered by collateral security generally comprising real estate assets. ANZ New Zealand adopts loan recovery processes that aim to maximize the realizable value of these securities in order to reduce write-offs and increase the recoveries achievable for ANZ New Zealand and its customers. Individual recovery strategies are reviewed regularly to ensure they remain appropriate for the current and forecast business environment and the respective property markets.

The credit impairment charge for the half year increased \$4 million from \$26 million at September 30, 2014, to \$30 million at March 31, 2015. The individual provision charge decreased by \$22 million from \$57 million at September 30, 2014, to \$35 million at March 31, 2015, as a result of lower new and increased provision charges. The collective provision charge increased by \$26 million from \$31 million (credit) at September 30, 2014, to \$5 million (credit) at March 31, 2015, due to reduced improvement in credit quality compared to the September 2014 half in addition to lower economic cycle overlay releases.

The following table sets forth details of our provisions for impaired assets for the periods indicated:

NZ\$ millions (unless otherwise stated)	As at					As at September 30,	
	March 31,	2014	2013	2012	2011	2010	
	2015

Balance at the end of the period	192	215	284	450	494	605	

The provision for impairment expressed as a percentage of gross impaired assets less interest reserved (%):

Individual provisions	40.51	33.91	31.52	32.94	28.62	30.19
Total provisions	134.60	105.04	91.68	77.16	66.97	69.76
Collective provision for impairment expressed as a percentage of credit risk-weighted exposures (%)	0.69	0.72	0.87	1.06	1.11	1.36

Loan quality

We maintain a systematic, continuous approach to the collection of loan arrears, and we issue notices of arrears or defaults in terms detailed in policies and procedures. For purposes of loan quality, we distinguish between commercial loans and other (including residential mortgage) loans. We generally classify commercial loans and housing loans as either performing, impaired or, in some cases, restructured assets.

We monitor consumer loan quality by independently verifying arrears and producing and distributing detailed credit performance reports to management. In addition, we closely examine the trends on arrears of various products within the portfolio to ensure measures are taken to correct and control any adverse trends that may be identified. We manage commercial loans through a watch and control list process pursuant to detailed policies and procedures. Secured impaired assets and larger unsecured impaired assets are managed individually and are subject to continuous review of recovery strategy and the adequacy of provisioning levels.

Impaired assets are credit exposures where there is doubt as to whether the full contractual amount (including interest) will be received, and/or where a material credit obligation is 90 days past due but not well secured, or

is a portfolio managed facility that can be held for up to 180 days past due, or where concessional terms have been provided due to the financial difficulties of the customer.

Our individual provisioning policy varies depending on the category of lending provided. We raise an individual provision on non-accrual loans based on expected security realization values less selling costs.

Non-accrual loans

The following table sets forth our impaired assets and details of individual provisions for credit impairment for the dates indicated:

NZ\$ millions, unless otherwise stated	As at March 31, 2015	2014	2013	2012	As at September 30, 2011 2010	
Gross balances of impaired assets						
with individual provisions set aside	460	593	887	1,203	1,704	1,987
without individual provisions set aside	14	41	14	163	22	17
Gross impaired assets	474	634	901	1,366	1,726	2,004
Individual provision for credit impairment	192	215	284	450	494	605
Net impaired assets	282	419	617	916	1,232	1,399
Net impaired assets as a percentage of gross loans and advances (%)	0.28	0.43	0.67	1.04	1.45	1.60

Past due loans

The following table shows the net amount of our past due loans, which are loans where repayment of the facility was contractually 90 days or more in arrears for the dates indicated. Interest on these past due loans is accrued and brought to account in the income statement.

NZ\$ millions	As at March 31, 2015	2014	2013	2012	As at September 30, 2011 2010	
Gross loans past due not subject to individual provision ¹	202	150	208	210	288	292
Gross impaired assets	474	634	901	1,366	1,726	2,004
Total past due loans	676	784	1,109	1,576	2,014	2,296

(1) Despite the arrears of such loans, an assessment of the value of the security, including mortgage insurance in the case of residential loans, indicates that principal and interest should be recovered in full.

Provision for credit impairment

The following table sets forth details of our provision for credit impairment on our loan portfolio and other assets for the periods indicated:

NZ\$ millions, unless otherwise stated	As at March 31, 2015	2014	2013	2012	Year ended September 30, 2011 2010

Registered Certificates of Deposit	1,386	-	-	-	1,386
Other wholesale borrowings	259	-	-	-	259
Gross wholesale borrowings	11,520	12,464	604	1,144	25,732

The amounts in this table represent undiscounted principal and interest cash obligations measured at the period end exchange rate. As a result the amounts in the tables differ from those presented in the balance sheet.

Average deposits

Details of our average deposits and short term borrowings are provided in the following table for the dates indicated.

NZ\$ millions, unless otherwise stated	Year ended September 30,					
	2014		2013 ²		2012	
	Average balance	Average rate paid (%)	Average balance	Average rate paid (%)	Average balance	Average rate paid (%)
Term deposits ¹	36,335	4.12	37,488	3.93	37,504	4.07
Other deposits and borrowings	34,684	2.68	29,719	2.73	24,340	2.70
Commercial paper	6,169	3.71	5,110	3.33	4,726	3.68
	77,188	3.44	72,316	3.39	66,570	3.54

(1) Term deposits include quoted rate term deposits, negotiable certificates of deposit and floating rate certificates of deposit.

(2) From September 30, 2014, the classification of the balance sheet has been changed to reflect the nature of the financial assets and liabilities reported. Prior to the reclassification, the balance sheet was classified according to counterparty. This has resulted in changes to previously reported balance sheet classifications as at September 30, 2013. As a result of this reclassification deposits and other borrowings for 2012 are not comparable to those for 2014 and 2013. Further details of the restated amounts are included on page 59 of this Offering Memorandum and in Note 1 and Note 35 to the ANZ New Zealand Audited Financial Statements (attached as Annex A).

Certificates of deposit and other term deposit maturities

The following table shows the maturity profile of our certificates of deposit and other term deposits. The amounts disclosed in the table represent undiscounted future principal cash flows:

NZ\$ millions	As at September 30, 2014			
	3 months or less	Over 3 months through 12 months	Over 12 months	Total
Certificates of deposit	1,221	165	-	1,386
Other term deposits	15,492	15,793	3,473	34,758
Total certificates of deposits and other term deposits	16,713	15,958	3,473	36,144

Trading securities

The following table shows the book value and market value of our holdings of trading securities as at the dates indicated:

NZ\$ millions	As at September 30,

Maximum amount outstanding at any month end during the year	6,951	6,343	6,170
Average amount outstanding during the year	6,169	5,113	4,726
Weighted average interest rate during the year (%)	3.71	3.33	3.68

Australia and New Zealand Banking Group Limited

The following information regarding our parent, ANZBGL, is presented solely for your reference. ANZBGL is not providing a guarantee or any other type of credit support of the ANZ NZ Notes or the ANZNIL Notes.

Introduction

ANZBGL and its subsidiaries (together, the “**ANZ Group**”), which began its Australian operations in 1835 and its New Zealand operations in 1840, is one of the four major banking groups headquartered in Australia. ANZBGL is a public company limited by shares incorporated in Australia and was registered in the State of Victoria on July 14, 1977. ANZBGL’s registered office is located at Level 9, 833 Collins Street, Docklands, Victoria, 3008, Australia and the telephone number is +61 3 9683 9999. Its Australian Company Number is ACN 005 357 522.

As of the close of trading on March 31, 2015, ANZBGL had a market capitalization of approximately A\$101.3 billion. As of March 31, 2015, ANZBGL had total assets of A\$860.1 billion, and shareholders’ equity of A\$52.1 billion. ANZBGL’s principal ordinary share listing and quotation is on the Australian Securities Exchange (“**ASX**”). Its ordinary shares are also quoted on the New Zealand Stock Exchange (“**NZX**”).

The ANZ Group is committed to delivering strong total shareholder returns and above peer earnings growth over the business cycle. To do this the ANZ Group will continue to:

- strengthen its position in its core markets of Australia and New Zealand by growing its Retail and Commercial operations, driving productivity benefits, leveraging its super regional strategy and using technology to drive better functionality;
- focus its Asia Pacific expansion primarily on Institutional Banking, supporting its Australian and New Zealand customers, targeting profitable markets and segments in which the ANZ Group has expertise and which are connected through trade and capital flows;
- achieve greater efficiency and control through the use of scalable common infrastructure and platforms;
- maintain strong liquidity and actively manage capital to enhance return on equity;
- build on its super regional capabilities; and
- apply strict criteria when reviewing existing investment and new inorganic opportunities.

Principal activities of the ANZ Group

The principal activities of ANZ Group’s major operating divisions are:

Australia

The Australia division comprises the Retail and Corporate and Commercial Banking business units.

• Retail

Retail is responsible for delivering a full range of banking services to consumer customers, using capabilities in product management, analytics, customer research, segmentation, strategy and marketing.

- **Home Loans** provides housing finance to consumers in Australia for both owner occupied and investment purposes, as well as providing housing finance for overseas investors.
- **Cards and Payments** provides unsecured lending products to retail customers.
- **Deposits** provides transaction banking, savings and investment products, such as term deposits and cash management accounts.

Retail delivers banking solutions to customers across multiple distribution channels including the Australian branch network, ANZ Direct, specialist sales channels and digital channels (including goMoney, Internet Banking, anz.com). The retail distribution network provides retail and wealth solutions to consumers, as well as providing small business solutions and meeting the various cash and check handling needs of corporate, commercial and institutional customers.

- **Corporate and Commercial Banking**

- **Corporate Banking** provides a full range of banking services including traditional relationship banking and sophisticated financial solutions, primarily to large private companies, smaller listed companies and multi-national corporation subsidiaries.
- **Regional Business Banking** provides a full range of banking services to non-metropolitan commercial and agricultural (including corporate) customers.
- **Business Banking** provides a full range of banking services, to metropolitan based small to medium sized business clients with a turnover of A\$5 million up to A\$125 million.
- **Small Business Banking** provides a full range of banking services to metropolitan and regional based small businesses in Australia with a turnover of up to A\$5 million and lending up to A\$1 million.
- **Esanda** provides motor vehicle and equipment finance.

International and Institutional Banking

International and Institutional Banking (“IIB”) division comprises Global Products, Retail Asia Pacific and Asia Partnerships. IIB services three main customer segments: Global Banking, International Banking and Retail Asia Pacific. Global Banking serves institutional customers with multi product and multi geographic requirements; International Banking serves institutional customers with less complex needs; and Retail Asia Pacific focuses on affluent and emerging affluent customers across 21 countries.

- **Global Products** service Global Banking and International Banking customers across three product sets:
 - **Global Transaction Banking** which provides working capital and liquidity solutions including documentary trade, supply chain financing, structured trade finance as well as cash management solutions, deposits, payments and clearing.
 - **Global Markets** which provides risk management services to clients globally on foreign exchange, interest rates, credit, commodities, debt capital markets and wealth solutions. Global Markets provide origination, underwriting, structuring and risk management services, advice and sale of credit and derivative products. The business unit also manages ANZ Group’s interest rate exposure as well as its liquidity position.
 - **Global Loans and Advisory** which provides specialized loan structuring and execution, loan syndication, project and export finance, debt structuring and acquisition finance, structured asset finance and corporate advisory.
 - **Retail Asia Pacific** provides end-to-end financial solutions to individuals and small businesses including deposits, credit cards, loans, investments and insurance. Leveraging the ANZ Group’s distinctive footprint, the ANZ Group enables clients’ access to opportunities across the region and connects them to specialists for their banking needs in each location.
 - **Asia Partnerships** comprises strategic partnerships and investments across Asia which provide the ANZ Group with local business and relationship access as well as country and regulatory insights. (Asia Partnerships include AMMB Holdings Berhad in Malaysia, PT Bank Pan Indonesia in Indonesia, Shanghai Rural Commercial Bank in China and Bank of Tianjin in China).

New Zealand

For information on ANZBGL’s New Zealand operations, please see “Management’s Discussion and Analysis of Financial Conditions and Results of Operations — Overview” in this Offering Memorandum.

Global Wealth

The Global Wealth division comprises Funds Management, Insurance and Private Wealth business units, which provide investment, superannuation, insurance and private banking solutions to customers across the Asia-Pacific region to make it easier for them to connect with, protect and grow their wealth.

- **Private Wealth** includes global private banking business which specializes in assisting individuals and families to manage, grow and preserve their wealth.
- **Funds Management** includes the Pensions and Investment business and E*TRADE.

- **Insurance** includes Life Insurance, General Insurance and ANZ Lenders Mortgage Insurance.
- **Corporate and Other** includes income from invested capital and profits from the Advice and Distribution business.

Global Technology, Services and Operations (“GTSO”) and Group Center

GTSO and Group Center provide support to the operating divisions, including technology, operations, shared services, property, risk management, financial management, strategy, marketing, human resources and corporate affairs. The Group Center includes Group Treasury and Shareholder Functions.

Restrictions on ANZBGL’s ability to provide material financial support

In accordance with the requirements issued by APRA pursuant to its Prudential Standards, ANZBGL, as our ultimate parent, may not provide material financial support to us contrary to the following:

- ANZBGL should not undertake any third party dealings with the prime purpose of supporting our business;
- ANZBGL must not hold unlimited exposures to us (e.g., not provide a general guarantee covering any of our obligations);
- ANZBGL must not enter into cross default clauses whereby a default by us on an obligation (whether financial or otherwise) triggers or is deemed to trigger a default of ANZBGL in its obligations;
- the Board of ANZBGL, in determining limits on acceptable levels of exposure to us should have regard to:
 - the level of exposure that would be approved to unrelated third parties of broadly equivalent credit status; and
 - the impact on ANZBGL’s stand alone capital and liquidity positions and its ability to continue operating in the event of a failure by us; and
- ANZBGL must ensure that the level of exposure to us does not exceed the following limits (unless otherwise approved by APRA):
 - on an individual exposure basis, - 50% of ANZBGL’s Level 1 total capital base; and
 - on an aggregate exposure basis (being exposures to all authorized deposit taking institutions (as defined by the Banking Act 1959 of Australia) (including overseas-based equivalents) related to ANZBGL) - 150% of ANZBGL’s Level 1 total capital base.

ANZBGL has not provided material financial support to us contrary to any of the above requirements.

APRA has informed the four major Australian banks, including ANZBGL, that it is reviewing the level of non-equity and contingent funding that can be provided to their respective New Zealand banking subsidiaries and branches. Whilst details of this review are still preliminary and subject to further discussions with APRA, we believe that ANZBGL will continue to be able to provide financial support to ANZ New Zealand. We expect that any changes, if implemented, will be made with an appropriate transition period determined by APRA to allow ANZ New Zealand to adjust to any new arrangements.

Additionally, the provision of any support by ANZBGL is subordinated to other obligations or debts required to be preferred by law, including without limitation the rights of holders of protected accounts pursuant to a statutory priority given to such accounts by the Banking Act of Australia 1959 (the “**Banking Act**”). The Banking Act requires APRA to exercise its powers and functions for the protection of the depositors of the several Australian “authorized deposit-taking institutions” (“**ADIs**”), of which ANZBGL is one, and for the promotion of financial system stability in Australia.

Section 13A(3) of the Banking Act provides that if an ADI becomes unable to meet its obligations or suspends payment, the assets of the ADI in Australia are available to meet the ADI’s liabilities in the following order:

- (a) first, the ADI’s liabilities (if any) to APRA in respect of the repayment of any amounts which APRA has paid to that ADI’s depositors under the financial claims scheme (the “Financial Claims Scheme”) established under the Banking Act;

- (b) second, the ADI's debts (if any) to APRA in reimbursement of APRA's costs incurred in exercising its powers and performing its functions under the Financial Claims Scheme in respect of the ADI;
- (c) third, the ADI's liabilities (if any) in Australia in relation to protected accounts that account-holders keep with the ADI;
- (d) fourth, the ADI's debts (if any) to the Reserve Bank of Australia;
- (e) fifth, the ADI's liabilities (if any) under an industry support contract that is certified under section 11CB of the Banking Act; and
- (f) sixth, the ADI's other liabilities (if any) in the order of their priority apart from paragraphs (a) to (e) above.

Section 16 of the Banking Act provides that APRA's costs (including costs in the nature of remuneration and expenses) of being in control of an ADI's business, or of having an administrator in control of an ADI's business, are payable from the ADI's funds and are a debt due to APRA. Subject to subsection 13A(3) of the Banking Act, such debts due to APRA by an ADI have priority in a winding-up of the ADI over all other unsecured debts.

Further, under section 86 of the Reserve Bank Act 1959 of the Commonwealth of Australia, debts due by a bank (such as ANZBGL) to the Reserve Bank of Australia shall in a winding-up of that bank have, subject to subsection 13A(3) of the Banking Act, priority over all other debts.

The above description of the liabilities which are mandatorily preferred by law is not exhaustive.

Overview of the New Zealand Banking Industry

The RBNZ publishes a semi-annual Financial Stability Report, in which it assesses and reports on the soundness and efficiency of the New Zealand financial system. The following section is an excerpt from the RBNZ Financial Stability Report dated May 2015 (the “**RBNZ Report**”). The information in this section has been accurately reproduced and as far as we are aware and are able to ascertain, no facts have been omitted that would render the reproduced information inaccurate or misleading. For more information, please see the full RBNZ Report, which is available from the RBNZ’s website at http://www.rbnz.govt.nz/financial_stability/financial_stability_report/. The information in the RBNZ Report is not necessarily up to date as of the date of this Offering Memorandum. Additionally, it is not incorporated by reference herein and does not form part of this Offering Memorandum.

The financial system is sound and operating effectively, supporting growth in the economy. Bank capital, liquidity and funding buffers remain above required minima, while asset quality and underlying profitability are strong. Regulatory changes over recent years have helped to improve prudential standards for banks, non-bank deposit takers (“**NBDTs**”) and insurers. There has been continued progress in processing claims related to the Canterbury earthquakes, although significant uncertainties remain.

The financial system continues to face three key areas of risk. Household sector debt is high relative to incomes and house prices are overvalued on several measures, particularly in Auckland where prices have increased rapidly in recent months. The rise in Auckland house prices reflects ongoing supply constraints, increased demand driven by record net immigration, low mortgage interest rates and increased investor participation. House prices have become very elevated in Auckland, and financial stability could be tested if prices were to fall sharply, which could occur if adverse economic conditions led to a reduction in debt repayment capacity. In contrast with Auckland, house price inflation in most other parts of New Zealand has remained relatively subdued.

Following recent consultation, the Reserve Bank is establishing a new asset class for bank loans to residential property investors. These loans will attract a higher risk weighting than for owner-occupier mortgages, requiring more capital to be held against these loans. The Bank is also proposing some changes to its policy on high loan-to-value ratio (“**LVR**”) lending to recognize the financial stability risks arising from housing market conditions in Auckland. The changes, which are proposed to be introduced from October 1, 2015, involve a new restriction on loans to property investors in the Auckland region with an LVR of greater than 70% (i.e. to set a speed limit¹ on such loans at close to zero). For all residential lending outside the Auckland region, the Bank is proposing to increase the existing speed limit for loans with an LVR of greater than 80% from 10% to 15%, to recognize relatively subdued housing market conditions outside Auckland. The Bank will issue a consultation paper in late May to outline these proposals in further detail and seek feedback.

The second area of risk for the financial system relates to the dairy sector, which is experiencing a sharp fall in incomes in the current season due to lower international prices. Around 11% of farm debt held by farmers with both negative cash flow and elevated LVRs. Financial stress in the dairy sector could rise markedly if low global milk prices persist beyond the current season. The extent of recovery in Chinese milk demand, following a large build-up of inventories in 2013, will be an important influence on global milk prices.

The third source of risk arises from global financial conditions, which remain extremely loose, in part reflecting recent monetary easing in Europe and Japan aimed at supporting economic recovery. Low interest rates are encouraging investment in riskier assets, leading to a reduction in credit spreads, reduced market volatility and rising prices for both financial and real assets. High and rising asset prices could become a point of vulnerability when interest rates begin to return to more normal levels. There is also a risk that the current benign market conditions could unwind in a disorderly fashion, affecting the cost and availability of offshore funding for New Zealand banks.

With the financial system facing significant and increasing risks, it is critical that banks maintain their capital and liquidity buffers, and apply prudent lending standards. Banks should ensure that any new capital instruments continue to maintain loss-bearing capacity, in view of the significant risks the sector faces. The Reserve Bank plans to undertake a review of current bank capital requirements in light of global and domestic changes affecting the banking system in recent years.

The Reserve Bank is continuing to make improvements to its financial oversight regime. Good progress has been made on the stocktake of registered bank and NBDT regulations, with public consultation on specific proposals expected to take place in the second half of 2015. The Reserve Bank also expects to consult with the banks later in the year on a best practice guide for the conduct of stress tests, following a review of the models and processes used by the major banks late last year.

¹ In this context “speed limit” means the amount of applicable new residential mortgage lending that can have a LVR greater than or equal to the prescribed LVR percentage.

Board of Directors of ANZ Bank New Zealand Limited

Composition of Board of Directors

At the date of this Offering Memorandum, the members of ANZ New Zealand's Board were as follows:

Name	Age	Position
John Judge	61	Chairman
David Hisco	51	Director and Chief Executive Officer
Antony Carter	57	Independent Non-Executive Director
Joan Withers	61	Independent Non-Executive Director
Mark Verbiest	57	Independent Non-Executive Director
Michael Smith	58	Non-Executive Director, Chief Executive Officer, ANZBGL
Shayne Elliott	51	Non-Executive Director, Chief Financial Officer, ANZBGL

For purposes of this Offering Memorandum, the business address of each member of the Board of Directors is ANZ Centre, 23-29 Albert Street, Auckland 1010, New Zealand.

As at the date of this Offering Memorandum, no conflicts of interest and no potential conflicts of interest exist between any duties owed to ANZ New Zealand by the members of its Board of Directors listed above and their private interests and/or other duties outside of the ANZ New Zealand Group. In respect of potential conflicts of interest that may arise in the future, ANZ New Zealand has processes for the management of such conflicts such that we do not expect any actual conflict of interest would arise.

The Board of ANZ New Zealand has adopted a Board Charter which sets out the Board's purpose, powers and responsibilities.

John Judge. Mr. Judge joined the Board on December 22, 2008. He was appointed Chairman on June 23, 2012 following the retirement of Sir Dryden Spring, the previous chairman. Mr. Judge was Chief Executive of Ernst & Young New Zealand from 1995 to 2007 and brings considerable experience in Australasian business and financial and analytical knowledge to the Board. He is also a director of Fletcher Building Limited, Fletcher Building Industries Limited and The New Zealand Initiative Limited. He is also an advisory board member for the University of Otago School of Business.

David Hisco. Mr. Hisco was appointed Director and Chief Executive Officer of ANZ New Zealand on October 13, 2010. Previously, Mr. Hisco was ANZ Group Managing Director Commercial for Australia based in Melbourne. He was appointed to replace Dr. Jennifer Fagg who resigned as Chief Executive Officer and as a Director of ANZ New Zealand on September 1, 2010. Mr. Hisco is a member of the ANZBGL management board and Global Head of Retail for ANZBGL. During his 30-year career at ANZ, Mr. Hisco has held a number of senior executive roles in retail and commercial banking, including two years as Managing Director of UDC in New Zealand between 1998 and 2000 and was Chair of the New Zealand Banker's Association for the 2012/2013 year. Mr. Hisco holds a Bachelor of Business (Accounting) from Deakin University, a Graduate Diploma in Business Administration from Monash University, and an Executive Masters of Business Administration from Monash University (Mt Eliza).

Antony Carter. Mr. Carter was appointed as an independent non-executive director of ANZ New Zealand on August 26, 2011 following the resignation of Dr. Don Brash. Mr. Carter was managing director of Foodstuffs (Auckland) and Foodstuffs (New Zealand), New Zealand's largest retail organization, from 2001 to 2010. Mr. Carter has extensive experience in retailing, having joined Foodstuffs in 1994. Prior to this he owned and operated several Mitre 10 hardware stores and was a director and later chairman of Mitre 10 New Zealand Limited. Mr. Carter is Chairman of Air New Zealand Limited, Blues Management Limited and Fisher & Paykel Healthcare Corporation Limited and a director of Fletcher Building Industries Limited and Fletcher Building Limited.

Michael Smith OBE. Mr. Smith joined the ANZ Bank New Zealand Limited Board as a Director on October 1, 2007, following the retirement of Mr. John McFarlane as a Director on September 30, 2007. Mr. Smith also succeeded Mr. McFarlane as the Chief Executive and Managing Director of ANZBGL, the ultimate parent company of ANZ Bank New Zealand Limited. Mr. Smith is Chairman of the Australian Bankers' Association Incorporated; Executive Chairman of the Chongqing Mayor's International Economic Advisory Council; a director of The Financial Markets Foundation for Children, Financial Literacy Australia Limited, the International Monetary Conference and the Institute of International Finance Inc.; and a member of the Business Council of Australia, the Australian Government Financial Literacy Advisory Board, the Asia Business Council, the Shanghai International Financial Advisory Council and Monash Industry Council of Advisers; and a Fellow of The Hong Kong Management Association. Until June 2007, Mr. Smith was President and Chief Executive Officer, The Hongkong and Shanghai Banking Corporation Limited. Previous positions held by Mr. Smith include Chairman, Hang Seng Bank Limited; Global Head of Commercial Banking for the HSBC Group; Chairman, HSBC Bank Malaysia Berhad; and Chief Executive Officer of HSBC Argentina Holdings SA. Mr. Smith joined the HSBC Group

in 1978 and during his career he has held a wide variety of roles in Commercial, Institutional and Investment Banking, Planning and Strategy, Operations and General Management.

Shayne Elliott. Mr. Elliott was appointed a non-executive director of the Board of ANZ New Zealand on August 11, 2009. Mr. Elliott was appointed Chief Financial Officer of ANZBGL on June 1, 2012, formerly holding the position of Chief Financial Officer Designate with ANZBGL from March 1, 2012, and prior to that, Chief Executive Officer, Institutional with ANZBGL. Mr. Elliott took up the position of Chief Executive Officer, Institutional with ANZBGL in June 2009, having spent more than twenty years at Citigroup. Before joining ANZBGL, Mr. Elliott was Head of Business Development for EFG Hermes, the largest investment bank in the Middle East. Mr. Elliott has a significant breadth of experience in banking at a regional and a country level, and in all aspects of the industry. Mr. Elliott is a Director of AMMB Holdings Berhad.

Joan Withers. Mrs. Withers was appointed as an independent non-executive Director of the Board of ANZ New Zealand on July 1, 2013. Mrs. Withers has an extensive career in management and governance roles in New Zealand, being the former CEO of Fairfax Media and The Radio Network and current Chairperson of Television New Zealand Limited. Mrs. Withers is also the Chair of Mighty River Power Limited and is on the advisory board of The Treasury. Mrs. Withers has an MBA from the University of Auckland and is the author of "A Girl's Guide to Business" which was published by Penguin in 1998.

Mark Verbiest. Mr. Verbiest was appointed as an independent Director of the Board of ANZ New Zealand on October 10, 2013. Mr. Verbiest has extensive experience in telecommunications, corporate governance and the digital economy. Mr. Verbiest brings a wealth of knowledge gained from a variety of sectors, including SOEs, Government bodies and the private sector. Mr. Verbiest is currently Chairman of Spark New Zealand Limited and Transpower New Zealand Limited. Mr. Verbiest is also a Director of Willis Bond General Partner Limited and Freightways Limited.

Remuneration of ANZ New Zealand directors

Our directors were paid an aggregate of \$811,761.00, \$616,742.06 and \$641,454.78 in directors' fees for the years ended September 30, 2014, 2013 and 2012, respectively.

Related party transactions

As permitted under New Zealand law, we extend loans to directors and executives. Such loans are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons. For further information refer to Note 23 of the 2014 Disclosure Statement and Note 16 of the Half-Year Disclosure Statement (attached as Annex A).

Board committees

To assist in the execution of its responsibilities, the Board has established committees, including an Audit Committee, a Human Resources Committee and a Risk Committee, each with a charter, to assist and support the Board in the conduct of its duties and obligations. The Chairman of the Board is a member of each committee.

Audit Committee-The purpose of the Audit Committee is to assist the Board in its review and approval of:

- (a) The financial reporting principles and policies, controls, systems and procedures of ANZ New Zealand and its subsidiaries;
- (b) The compliance of ANZ New Zealand and its subsidiaries with applicable local financial reporting, prudential reporting and audit requirements as well as those of ANZ Group;
- (c) The effectiveness of ANZ New Zealand's internal control and risk management framework;
- (d) The work and internal audit standards of Global Internal Audit;
- (e) The integrity of ANZ New Zealand's and its subsidiaries' financial statements and the independent audit thereof and compliance with relevant legal and regulatory requirements thereof;
- (f) Any due diligence and the provision of significant reports to regulatory bodies; and
- (g) Prudential supervision procedures required by regulatory bodies to the extent relating to financial reporting.

The current members of the Audit Committee are Mr. Verbiest (Chairman), Mr. Judge, Mr. Elliott, Mrs. Withers and Mr. Carter.

Human Resources Committee—This Committee is responsible for reviewing and, where necessary, making recommendations to the Board in respect of remuneration policies and terms of service, including remuneration relating to the Chairperson, Directors, Chief Executive, and nominated senior management and executive officers.

The current members of the Human Resources Committee are Mr. Judge (Chairman), Mr. Carter, Mr. Verbiest, Mr. Smith and Mrs. Withers.

Risk Committee—The purpose of the Risk Committee is to:

- (a) Assist ANZ New Zealand’s Board in the effective discharge of its responsibilities for business, market, credit, capital, financial, operational, compliance, liquidity and reputational risk management; and
- (b) Liaise and consult with the ANZ Group Risk Committee to assist it to discharge its responsibilities.

The current members of the Risk Committee are Mr. Carter (Chairman), Mr. Verbiest, Mr. Judge, Mr. Elliott and Mrs. Withers.

Board practices

Currently, our Board consists of seven directors, four of whom are independent non-executive directors. The Board includes one executive of ANZ New Zealand (the Chief Executive) and two executives of ANZBGL. Board composition is reviewed when a vacancy arises or if it is considered that the Board would benefit from the services of a new director, given the existing mix of skills and experience of the Board.

Under our Conditions of Registration, no appointment of any director or chief executive officer or chairperson shall be made to the Board unless a copy of the curriculum vitae of the proposed appointee has been provided to the RBNZ and the RBNZ has advised that it has no objection to the appointment. The Conditions of Registration require that at least half of the directors on the Board be independent and that the chairperson is not an employee of ANZ New Zealand.

The Board collectively and each director individually has the right to seek independent professional advice at ANZ New Zealand’s expense.

In accordance with the Companies Act 1993 of New Zealand, directors must keep the Board advised, on an on-going basis, of any interest that could potentially conflict with our own interests. A director who is interested in a transaction may attend meetings and vote on a matter relating to the transaction. However, the Board has adopted a guideline whereby a director with an interest in a transaction should not be present during any discussions, and should not vote on any matter pertaining to that particular transaction.

ANZ New Zealand’s constitution

ANZ New Zealand’s constitution is available online on the searchable register at www.business.govt.nz/companies/. Under ANZ New Zealand’s constitution, the Board holds all necessary powers for the management of the business and operation of the company. In particular, there are no restrictions in ANZ New Zealand’s constitution on ANZ New Zealand borrowing or providing a guarantee.

The Board has the power to issue shares in different classes and on different terms and conditions. Under the constitution, the Board is expressly authorized to issue further shares ranking equally with, or in priority to, existing shares, whether as to voting rights or distributions or otherwise and such issue is not deemed to be an action affecting the rights attached to the existing shares. However, where ANZ New Zealand takes action which affects the rights attached to shares (other than by way of issue of further shares ranking equally with, or in priority to, existing shares) such action must be approved by special resolution of each affected interest group. There are no restrictions in ANZ New Zealand’s constitution on changes in capital, rights to own securities or restrictions on foreign shareholders.

There is no shareholding qualification for directors of ANZ New Zealand, and no mandatory retirement age. The Board has the power to fix each director’s remuneration and ANZ New Zealand shall indemnify every director or employee out of the assets of ANZ New Zealand to the maximum extent permitted by law. Directors can be appointed and removed by the shareholders of ANZ New Zealand, although the Board has the power at any time to also appoint directors.

Under the Companies Act 1993 of New Zealand, directors who are interested in a transaction of ANZ New Zealand are required to disclose their interest. Failure to disclose this interest will not affect the validity of the transaction or the ability of the director to attend and vote at the relevant board meeting, but the director can be personally liable and if ANZ New Zealand does not receive fair value under the transaction, the transaction may be voided within three months of its disclosure to all shareholders of ANZ New Zealand.

In regard to shareholders, the power to:

- alter, revoke or adopt a new constitution,
- approve a major transaction, or
- approve an amalgamation, put ANZ New Zealand into liquidation or apply for the removal of ANZ New Zealand from the register of companies,

must be exercised by special resolution of the shareholders under the Companies Act 1993 of New Zealand. All other powers reserved to shareholders may be exercised by an ordinary resolution of shareholders. Resolutions can be passed at a meeting of shareholders or pursuant to a written resolution in lieu of a meeting.

Board of Directors of ANZNIL

At the date of this Offering Memorandum, the members of ANZNIL's Board were as follows:

Name	Age	Principal Outside Activities
David Hisco	51	Chief Executive Officer and Director, ANZ New Zealand
Antonia Watson	45	Chief Financial Officer, ANZ New Zealand
Anthony Bradshaw	56	Managing Director of the New Zealand Branch of ANZBGL and Head of Asset and Liability Management, ANZ New Zealand

For purposes of this Offering Memorandum, the business address of each director of the board of ANZNIL is ANZ Centre, 23-29 Albert Street, Auckland 1010, New Zealand.

As at the date of this Offering Memorandum, no conflicts of interest and no potential conflicts of interest exist between any duties owed to ANZNIL by the members of its board of directors listed above and their private interests and/or other duties outside of ANZNIL. In respect of potential conflicts of interest that may arise in the future, ANZNIL has processes for the management of such conflicts such that we do not expect any actual conflict of interest would arise. However, the Board acts in accordance with a guideline whereby a director with an interest in a transaction should not be present during any discussions, and should not vote on any matter pertaining to that particular transaction.

Description of the Notes and the Guarantee

The general terms of the ANZ NZ Notes and the ANZNIL Notes are identical, except as described herein and except that the ANZNIL Notes will have the benefit of ANZ New Zealand's Guarantee as described further in the "Guarantee". For convenience and unless otherwise indicated, in this section entitled "Description of the Notes and the Guarantee," references to "we", "our" and "us" refer to ANZ New Zealand or ANZNIL, as the applicable Issuer of the debt securities. However, references to "ANZ New Zealand" refer only to ANZ Bank New Zealand Limited and not to its consolidated subsidiaries. Also, in this section, references to "Holders" mean those persons who own Notes registered in their own names, on the books that ANZ New Zealand, ANZNIL or the Fiscal Agent maintains for this purpose, and not those persons who own beneficial interests in Notes registered in street name or in Notes issued in book-entry form through the Depository. Owners of beneficial interests in the Notes should read the section below entitled "Legal Ownership and Book-Entry Issuance".

This section summarizes the material terms that will apply generally to the Notes. Each Tranche will have financial and other terms specific to it, and the specific terms of each Note will be described in the Final Terms that will accompany this Offering Memorandum. Such Final Terms will be in substantially the form attached as Annex B to this Offering Memorandum.

As you read this section, please remember that the specific terms of your Note as described in your Final Terms will supplement the general terms described in this section.

This section is only a summary

The Fiscal Agency Agreement and its associated documents, including your Note and your Final Terms, contain the full legal text of the matters described in this section. The Fiscal Agency Agreement, the Guarantee and the Notes are governed by New York law, except as to authorization and execution by ANZ New Zealand and ANZNIL of these documents, which are governed by the laws of New Zealand. See "Available Information" for information on how to obtain a copy of the Fiscal Agency Agreement.

This section and your Final Terms summarize all the material terms of the Fiscal Agency Agreement and your Note. They do not, however, describe every aspect of the Fiscal Agency Agreement and your Note. For example, in this section entitled "Description of the Notes and the Guarantee" and your Final Terms, we use terms that have been given special meaning in the Fiscal Agency Agreement, but we describe the meaning of only the more important of those terms.

The Notes will be issued under the Fiscal Agency Agreement

The Notes are governed by a document called a Fiscal Agency Agreement. The Fiscal Agency Agreement is a contract between ANZNIL, ANZ New Zealand, both as Issuer of the ANZ NZ Notes and as Guarantor of the ANZNIL Notes, and The Bank of New York Mellon, which will initially act as fiscal agent and paying agent (the "**Fiscal Agent**"). The Fiscal Agent performs administrative duties for us such as sending you interest payments and notices.

See "Our relationship with the Fiscal Agent" below for more information about the Fiscal Agent.

We may issue other series of debt securities

The Fiscal Agency Agreement permits us to issue different series of debt securities from time to time. We may also issue Notes in such amounts, at such times and on such terms as we wish. The Notes will differ from one another, and from other series, in their terms.

When we refer to the "**Notes**" or these "**Notes**", we mean ANZ New Zealand's Medium-Term Notes, Series A, or ANZNIL's Medium-Term Notes, Series A, as applicable. When we refer to the "**Series A Medium-Term Notes**" or "**ANZ NZ Notes**", we mean ANZ New Zealand's Medium-Term Notes, Series A or ANZNIL's Medium-Term Notes, Series A, as applicable. When we refer to "**ANZNIL Notes**", we mean ANZNIL's Medium-Term Notes, Series A. When we refer to a "**Series**" of debt securities, we mean a series, such as the Series A Notes or the Series B Notes, issued under the Fiscal Agency Agreement.

Amounts that we may issue

The Fiscal Agency Agreement does not limit the aggregate amount of debt securities that we may issue, nor does it limit the number of series or the aggregate amount of any particular series that we may issue. Also, if we issue Notes having the same terms in a particular offering, we may "reopen" that offering at any later time and offer additional Notes having those terms.

We intend to issue Notes from time to time, initially in an amount having the aggregate offering price specified on the cover of this Offering Memorandum. However, we may issue additional Notes in amounts that exceed the amount on the cover at any time, without your consent and without notifying you.

Our affiliates may use this Offering Memorandum to resell Notes in market-making transactions from time to time, including both Notes that we have issued before the date of this Offering Memorandum and Notes that we have not yet issued. We describe these transactions under "Notice to Purchasers" and "Plan of Distribution" below.

The Fiscal Agency Agreement and the Notes do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Notes or the Fiscal Agency Agreement.

Guarantee

ANZ New Zealand will fully and unconditionally guarantee to each Holder of an ANZNIL Note authenticated and delivered by the Fiscal Agent the due and punctual payment of the principal of, and premium, if any, and interest on, such ANZNIL Note, when and as the same shall become due and payable, whether at stated maturity, by declaration of acceleration, call for redemption or otherwise, in accordance with the terms of such ANZNIL Note and of the Fiscal Agency Agreement.

How the Notes and Guarantee rank against other debt

Neither the Notes nor the Guarantee will be secured by any property or assets of ANZ New Zealand or its subsidiaries, including ANZNIL. Thus, by owning a Note, you are one of our unsecured creditors.

Neither the Notes nor the Guarantee will be subordinated to any of ANZ New Zealand's or, in the case of the ANZNIL Notes, ANZNIL's other debt obligations. This means that, in a bankruptcy or liquidation proceeding against us or ANZNIL, the Notes and Guarantee would rank equally in right of payment with all of ANZ New Zealand's and ANZNIL's other unsecured and unsubordinated debt, except for obligations mandatorily preferred by law.

Principal amount, stated maturity and maturity

The principal amount of a Note means the principal amount payable at its stated maturity, unless that amount is not determinable, in which case the principal amount of a Note is its face amount. The term "stated maturity" with respect to any Note means the day on which the principal amount of your Note is scheduled to become due, as specified in the relevant Final Terms. The principal may become due sooner, by reason of redemption or acceleration after a default or otherwise in accordance with the terms of the Note. The day on which the principal actually becomes due, whether at the stated maturity or earlier, is called the maturity of the principal.

We also use the terms "stated maturity" and "maturity date" to refer to the days when other payments become due. For example, we may refer to a regular interest payment date when an instalment of interest is scheduled to become due as the "stated maturity" of that instalment.

When we refer to the "stated maturity" or the "maturity date" of a Note without specifying a particular payment, we mean the stated maturity or maturity date, as the case may be, of the principal.

Currency of Notes

Amounts that become due and payable on your Note in cash will be payable in a currency, composite currency, basket of currencies or currency unit or units specified in your Final Terms. We refer to this currency, composite currency, basket of currencies or currency unit or units as a "Specified Currency". The Specified Currency for your Note will be U.S. dollars, unless your Final Terms states otherwise. Some Notes may have different Specified Currencies for principal, premium and interest. You will have to pay for your Notes by delivering the requisite amount of the Specified Currency for the principal to any of the Agents that we name in your Final Terms, unless other arrangements have been made between you and us or you and any such Agents. We will make payments on your Notes in the Specified Currency, except as described below in "— Payment mechanics for Notes". See "Considerations Relating to Notes Denominated or Payable in or Linked to a Non-U.S. dollar Currency" below for more information about risks of investing in Notes of this kind.

Types of Notes

We may issue any of the following types of Notes and any other types of Notes that may be described in a supplement hereto:

Fixed Rate Notes

A Note of this type (a "**Fixed Rate Note**") will bear interest at a fixed rate described in the relevant Final Terms. This type includes notes which bear no interest and are instead issued at a price lower than the principal amount ("**Zero Coupon Notes**"). See "**Original Issue Discount Notes**" below for more information about Zero Coupon Notes and other Original Issue Discount Notes.

Each Fixed Rate Note, except any Zero Coupon Note, will bear interest from its issue date or from the most recent date to which interest on the Note has been paid or made available for payment. Interest will accrue on the principal of a Fixed Rate Note at the fixed yearly rate stated in the relevant Final Terms, until the principal is paid or made available for payment or the Note is converted or exchanged. Each payment of interest due on an interest payment date or at maturity will include interest accrued from and including the last date to which interest has been paid, or made available for payment, or from the issue date if none has been paid or made available for payment, to but excluding the interest payment date or the maturity date. We will compute interest on Fixed Rate Notes on the basis of a 360-day year of twelve 30-day months or, if specified in your Final Terms, on the basis of a 365-day year. We will pay interest on each interest payment date and on the maturity date as described below under "**Payment mechanics for Notes**".

Floating Rate Notes

A Note of this type (a "**Floating Rate Note**") will bear interest at rates that are determined by reference to an interest rate formula. In some cases, the rates may also be adjusted by adding or subtracting a Spread or multiplying by a Spread Multiplier (each as defined herein) and may be subject to a minimum rate or a maximum rate. The various interest rate formulas and these other features are described below in "**Interest rates-Floating Rate Notes**".

Each Floating Rate Note will bear interest from its issue date or from the most recent date to which interest on the Note has been paid or made available for payment. Interest will accrue on the principal of a Floating Rate Note at the yearly rate determined according to the interest rate formula stated in the relevant Final Terms, until the principal is paid or made available for payment or until it is converted or exchanged. We will pay interest on each interest payment date and on the maturity date as described below under "**Payment mechanics for Notes**".

Original Issue Discount Notes

A Note of this type (an "**Original Issue Discount Note**") may be a Fixed Rate Note or a Floating Rate Note. An Original Issue Discount Note is issued at a price lower than its principal amount and provides that, upon redemption or acceleration of its maturity, an amount less than its principal amount will be payable. An Original Issue Discount Note may be a Zero Coupon Note. A Note issued at a discount to its principal may, for U.S. federal income tax purposes, be considered to have been issued with original issue discount, regardless of the amount payable upon redemption or acceleration of maturity. See "**Taxes — United States federal income taxation — United States Holders — Original issue discount**" below for a brief description of the U.S. federal income tax consequences of owning a Note considered to have been issued with original discount for U.S. federal income tax purposes.

Information in the Final Terms

Your Final Terms will describe one or more of the following terms of your Notes:

- the title of your Notes;
- the stated maturity;
- the Specified Currency or currencies for principal, premium and interest, if not U.S. dollars;
- the price at which we originally issue your Note, expressed as a percentage of the principal amount, and the issue date;
- whether your Note is a Fixed Rate Note, a Floating Rate Note, an Original Issue Discount Note (which may be a Zero Coupon Note) or any combination of the foregoing;
- if your Note is a Fixed Rate Note, the yearly rate at which your Note will bear interest, if any, and the interest payment dates, if different from those stated below under "**Interest rates — Fixed Rate Notes**", and the conditions, if any, under which each Note may convert into or be exchangeable for a Floating Rate Note;
- if your Note is a Floating Rate Note, the interest rate basis, which may be one of the eleven Base Rates described in "**Interest rates — Floating Rate Notes**" below; any applicable index currency or

Index Maturity (each, as defined herein), Spread or Spread Multiplier or initial, maximum or minimum rate; the interest reset, determination, calculation and interest payment dates; the day count used to calculate interest payments for any period; and the Calculation Agent, all of which we describe under “— Interest rates — Floating Rate Notes” below and the conditions, if any, under which each Note may convert into or be exchangeable for a Fixed Rate Note;

- if your Note is an Original Issue Discount Note, the yield to maturity;
- if applicable, the circumstances under which your Note may be redeemed at our option or repaid at the Holder’s option before the stated maturity, including any redemption commencement date, repayment date(s), redemption price(s) and redemption period(s), all of which we describe under “— Redemption and repayment” below;
- the authorized denominations, if other than denominations of US\$200,000, and multiples of US\$1,000;
- the Depository for your Note, if other than DTC, and any circumstances under which the Holder may request Notes in non-global form, if we choose not to issue your Note in book-entry form only;
- the name of each offering Agent;
- the discount or commission to be received by the offering Agent or Agents;
- the net proceeds to the Issuer; and
- the names and duties of any co-agents, depositaries, Paying Agents, transfer agents, exchange rate agents or registrars for your Note.

Form of Notes

We will issue each Note in global-i.e., book-entry-form only. Notes in book-entry form will be represented by a global security registered in the name of a Depository, which will be the Holder of all the Notes represented by the global security. Those who own beneficial interests in a Global Note (as defined under “Legal Ownership and Book-Entry Issuance — What is a Global Note?”) will do so through participants in the Depository’s securities clearance system, and the rights of these indirect owners will be governed solely by the applicable procedures of the Depository and its participants. We describe Global Notes below under “Legal Ownership and Book-Entry Issuance”.

In addition, we will issue each Note in registered form, without coupons.

Interest rates

This subsection describes the different kinds of interest rates that may apply to your Note, if it bears interest.

Fixed Rate Notes

Interest on a Fixed Rate Note will be payable annually or semi-annually on the date or dates specified in your Final Terms and at maturity. Any payment of principal, premium and interest for any Fixed Rate Note required to be made on an interest payment date that is not a business day (as defined herein) will be postponed to the next succeeding business day (and Following Business Day Convention will be specified in your Final Terms) as if made on the date that payment was due, and no interest will accrue on that payment for the period from and after the interest payment date to the date of that payment on the next succeeding business day. For each Fixed Rate Note that bears interest, interest will accrue, and we will compute and pay accrued interest, as described under “— Types of Notes-Fixed Rate Notes” above and “— Payment mechanics for Notes” below. The yield for Fixed Rate Notes will be specified in your Final Terms. This yield is calculated as at the Issue Date and on the basis of the issue price.

Floating Rate Notes

In this subsection, we use several specialized terms relating to the manner in which floating interest rates are calculated. These terms appear in bold, italicized type the first time they appear, and we define these terms in “— Special rate calculation terms” at the end of this subsection.

For each Floating Rate Note, interest will accrue, and we will compute and pay accrued interest, as described under “— Types of Notes-Floating Rate Notes” above and “— Payment mechanics for Notes” below. In addition, the following will apply to Floating Rate Notes.

Base Rates

We currently expect to issue Floating Rate Notes that bear interest at rates based on one or more of the following "Base Rates":

- Commercial Paper Rate;
- Prime Rate;
- LIBOR;
- EURIBOR;
- Treasury Rate;
- CMT Rate;
- CD Rate;
- Federal Funds Rate;
- New Zealand Bank Bill Rate;
- Australian Bank Bill Rate; and/or
- Eleventh District Cost of Funds Rate.

We describe each of the Base Rates in further detail below in this subsection.

If you purchase a Floating Rate Note, your Final Terms will specify the type of Base Rate that applies to your Note.

Each Floating Rate Note will be issued as described below. The applicable Note and any relevant Final Terms will specify certain terms with respect to which each Floating Rate Note is being delivered, including: whether such Floating Rate Note is a "Regular Floating Rate Note," a "Floating Rate/Fixed Rate Note," a "Fixed Rate/Floating Rate Note," or an "Inverse Floating Rate Note," the Fixed Rate Commencement Date or Floating Rate Commencement Date (each as defined herein), if applicable, the fixed interest rate, if applicable, Base Rate, initial interest rate, if any, initial Interest Reset Date, interest reset period and dates, interest period and dates, record dates, Index Maturity, maximum interest rate and/or minimum interest rate, if any, and Spread and/or Spread Multiplier, if any, as such terms are defined below. If the applicable Base Rate is LIBOR or the CMT Rate, the applicable Note and any relevant Final Terms will also specify the index currency and the Designated LIBOR Page or the Designated CMT Reuters Page, as applicable, as such terms are defined below.

The interest rate borne by the Floating Rate Notes will be determined as follows:

- unless such Floating Rate Note is designated as a "Floating Rate/Fixed Rate Note," a "Fixed Rate/Floating Rate Note" or an "Inverse Floating Rate Note," or as having an addendum attached or having "other/additional provisions" apply, in each case relating to a different interest rate formula, such Floating Rate Note will be designated as a "Regular Floating Rate Note" and, except as described below or as specified in the applicable Note, will bear interest at the rate determined by reference to the applicable Base Rate (a) plus or minus the applicable Spread, if any, and/or (b) multiplied by the applicable Spread Multiplier, if any. Commencing on the first Interest Reset Date occurring after the issue date (the "**initial Interest Reset Date**"), the rate at which interest on such Regular Floating Rate Note shall be payable will be reset as at each Interest Reset Date; provided, however, that the interest rate in effect for the period, if any, from the issue date to the initial Interest Reset Date will be the initial interest rate;
- if such Floating Rate Note is designated as a "Floating Rate/Fixed Rate Note," then, except as described below or as specified in the applicable Note, such Floating Rate Note will bear interest at the rate determined by reference to the applicable Base Rate (a) plus or minus the applicable Spread, if any, and/or (b) multiplied by the applicable Spread Multiplier, if any. Commencing on the initial Interest Reset Date, the rate at which interest on such Floating Rate/Fixed Rate Note will be payable will be reset as at each Interest Reset Date; provided, however, that (x) the interest rate in effect for the period, if any, from the issue date to the initial Interest Reset Date will be the initial interest rate and (y) the interest rate in effect for the period commencing on the date specified in the relevant Final Terms (the "**Fixed Rate Commencement Date**") to the maturity date will be the fixed interest rate, if such rate is specified in the applicable Note and the relevant Final Terms or, if no such fixed interest

rate is specified, the interest rate in effect thereon on the business day immediately preceding the Fixed Rate Commencement Date;

- if such Floating Rate Note is designated as a "Fixed Rate/Floating Rate Note," then, except as described below or as specified in the applicable Note and the relevant Final Terms, such Floating Rate Note will bear interest at the fixed rate specified in such Note from the issue date to the date specified in the relevant Final Terms (the "**Floating Rate Commencement Date**") and the interest rate in effect for the period commencing on such Floating Rate Commencement Date will be the rate determined by reference to the applicable Base Rate (x) plus or minus the applicable Spread, if any, and/or (y) multiplied by the applicable Spread Multiplier, if any, each as specified in such Note or the relevant Final Terms. Commencing on the first Interest Reset Date after such Floating Rate Commencement Date, the rate at which interest on such Fixed Rate/Floating Rate Note will be payable will be reset as at each Interest Reset Date;
- if such Floating Rate Note is designated as an "Inverse Floating Rate Note," then, except as described below or as specified in the applicable Note, such Floating Rate Note will bear interest at the fixed interest rate minus the rate determined by reference to the applicable Base Rate (a) plus or minus the applicable Spread, if any, and/or (b) multiplied by the applicable Spread Multiplier, if any; provided, however, that, unless otherwise specified in the applicable Note and the relevant Final Terms, the interest rate thereon will not be less than zero. Commencing on the initial Interest Reset Date, the rate at which interest on such Inverse Floating Rate Note will be payable will be reset as at each Interest Reset Date; provided, however, that the interest rate in effect for the period, if any, from the issue date to the initial Interest Reset Date will be the initial interest rate.

Initial Base Rate. For any Floating Rate Note, the Base Rate in effect from the issue date to the first Interest Reset Date will be the "Initial Base Rate" as specified in the relevant Final Terms. We will specify the Initial Base Rate in the relevant Final Terms.

Spread or Spread Multiplier. In some cases, the Base Rate for a Floating Rate Note may be adjusted:

- by adding or subtracting a specified number of basis points, called the "Spread", with one basis point being 0.01%; or
- by multiplying the Base Rate by a specified percentage, called the "Spread Multiplier".

If you purchase a Floating Rate Note, your Final Terms will specify whether a Spread or Spread Multiplier will apply to your Note and, if so, the amount of the Spread or Spread Multiplier.

Maximum and minimum Rates. The actual interest rate, after being adjusted by the Spread or Spread Multiplier, may also be subject to either or both of the following limits:

- a maximum rate-i.e., a specified upper limit that the actual interest rate in effect at any time may not exceed; and/or
- a minimum rate-i.e., a specified lower limit that the actual interest rate in effect at any time may not fall below.

If you purchase a Floating Rate Note, your Final Terms will specify whether a maximum rate and/or minimum rate will apply to your Note and, if so, what those rates are.

Whether or not a maximum rate applies, the interest rate on a Floating Rate Note will in no event be higher than the maximum rate permitted by New York law, as it may be modified by U.S. federal law of general application. Under current New York law, the maximum rate of interest, with some exceptions, for any loan in an amount less than US\$250,000 is 16% and for any loan in the amount of US\$250,000 or more but less than US\$2,500,000 is 25% per year on a simple interest basis. These limits do not apply to loans of US\$2,500,000 or more.

The rest of this subsection describes how the interest rate and the interest payment dates will be determined, and how interest will be calculated, on a Floating Rate Note.

Interest Reset Dates. The rate of interest on a Floating Rate Note will be reset by the Calculation Agent daily, weekly, monthly, quarterly, semi-annually, annually or at some other interval specified in the relevant Final Terms. The date on which the interest rate resets and the reset rate becomes effective is called the Interest Reset Date. The Interest Reset Date will be as follows:

- for Floating Rate Notes that reset daily, each business day;

- for Floating Rate Notes that reset weekly and are not Treasury Rate Notes, the Wednesday of each week;
- for Treasury Rate Notes that reset weekly, the Tuesday of each week, except as otherwise described in the next to last paragraph under “— Interest Determination Dates” below;
- for Floating Rate Notes that reset monthly and are not Eleventh District Cost of Funds Rate Notes, the third Wednesday of each month;
- for Eleventh District Cost of Fund Rate Notes that reset monthly, the first calendar day of each month;
- for Floating Rate Notes that reset quarterly, the third Wednesday of March, June, September and December of each year;
- for Floating Rate Notes that reset semi-annually, the third Wednesday of each of two months of each year as specified in the relevant Final Terms; and
- for Floating Rate Notes that reset annually, the third Wednesday of one month of each year as specified in the relevant Final Terms.

For a Floating Rate Note, the interest rate in effect on any particular day will be the interest rate determined with respect to the latest Interest Reset Date that occurs on or before that day. There are several exceptions, however, to the reset provisions described above.

The Base Rate in effect from the issue date to the first Interest Reset Date will be the Initial Base Rate. For Floating Rate Notes that reset daily or weekly, the Base Rate in effect for each day following the second business day before an interest payment date to, but excluding, the interest payment date, and for each day following the second business day before the maturity date to, but excluding, the maturity date, will be the Base Rate in effect on that second business day.

If any Interest Reset Date for a Floating Rate Note would otherwise be a day that is not a business day, the Interest Reset Date will be postponed to the next day that is a business day. For a EURIBOR or LIBOR Note, however, if that business day is in the next succeeding calendar month, the Interest Reset Date will be the immediately preceding business day.

Interest Determination Dates. The interest rate that takes effect on an Interest Reset Date will be determined by the Calculation Agent by reference to a particular date called an “Interest Determination Date”. Except as otherwise specified in the relevant Final Terms:

- For all Floating Rate Notes other than Eleventh District Cost of Funds Rate Notes, LIBOR Notes, EURIBOR Notes, Treasury Rate Notes, New Zealand Bank Bill Rate Notes and Australian Bank Bill Rate Notes, the Interest Determination Date relating to a particular Interest Reset Date will be the second business day before the Interest Reset Date.
- For Eleventh District Cost of Funds Rate Notes, the Interest Determination Date relating to a particular Interest Reset Date will be the last working day in the first calendar month preceding that Interest Reset Date, on which the FHLB of San Francisco publishes the index (as defined herein). We refer to an Interest Determination Date for an Eleventh District Cost of Funds Rate Note as an “Eleventh District Cost of Funds Rate Note Interest Determination Date”.
- For LIBOR Notes, the Interest Determination Date relating to a particular Interest Reset Date will be the second London business day preceding the Interest Reset Date, unless the index currency is pounds sterling, in which case the Interest Determination Date will be the Interest Reset Date. We refer to an Interest Determination Date for a LIBOR Note as a “LIBOR Interest Determination Date”.
- For EURIBOR Notes, the Interest Determination Date relating to a particular Interest Reset Date will be the second euro business day preceding the Interest Reset Date. We refer to an Interest Determination Date for a EURIBOR Note as a “EURIBOR Interest Determination Date”.
- For Treasury Rate Notes, the Interest Determination Date relating to a particular Interest Reset Date, which we refer to as a “Treasury Interest Determination Date”, will be the day of the week in which the Interest Reset Date falls on which Treasury Bills—i.e., direct obligations of the U.S. government—would normally be auctioned. Treasury Bills are usually sold at auction on the Monday of each week, unless that day is a legal holiday, in which case the auction is usually held on the following Tuesday, except that the auction may be held on the preceding Friday. If as the result of a legal holiday an auction is held on the preceding Friday, that Friday will be the Treasury Interest Determination Date relating to the Interest Reset Date occurring in the next succeeding week. If the auction is held on a

day that would otherwise be an Interest Reset Date, then the Interest Reset Date will instead be the first business day following the auction date.

- For Australian Bank Bill Rate Notes and New Zealand Bank Bill Rate Notes, the Interest Determination Date will be the same day as the Interest Reset Date.

The "Interest Determination Date" pertaining to a Floating Rate Note, the interest rate of which is determined by reference to two or more Base Rates, will be the most recent business day which is at least two business days prior to the applicable Interest Reset Date for such Floating Rate Note on which each Base Rate is determinable. Each Base Rate will be determined as of such date, and the applicable interest rate will take effect on the applicable Interest Reset Date.

Interest Calculation Dates. As described above, the interest rate that takes effect on a particular Interest Reset Date will be determined by reference to the corresponding Interest Determination Date. Except for LIBOR Notes, EURIBOR Notes, New Zealand Bank Bill Rate Notes and Australian Bank Bill Rate Notes, however, the determination of the rate will actually be made on a day no later than the corresponding interest calculation date. The interest calculation date will be the earlier of the following:

- the tenth calendar day after the Interest Determination Date or, if that tenth calendar day is not a business day, the next succeeding business day; and
- the business day immediately preceding the interest payment date or the maturity date, whichever is the day on which the next payment of interest will be due.

The Calculation Agent need not wait until the relevant interest calculation date to determine the interest rate if the rate information it needs to make the determination is available from the relevant sources sooner.

Interest Payment Dates. The interest payment dates for a Floating Rate Note will depend on when the interest rate is reset and, unless we specify otherwise in the relevant Final Terms, will be as follows:

- for Floating Rate Notes that reset daily, weekly or monthly, the third Wednesday of each month or the third Wednesday of March, June, September and December of each year, as specified in the relevant Final Terms;
- for Floating Rate Notes that reset quarterly, the third Wednesday of March, June, September and December of each year;
- for Floating Rate Notes that reset semi-annually, the third Wednesday of the two months of each year specified in the relevant Final Terms; or
- for Floating Rate Notes that reset annually, the third Wednesday of the month specified in the relevant Final Terms.

Regardless of these rules, if a Note is originally issued after the Regular Record Date (as defined herein) and before the date that would otherwise be the first interest payment date, the first interest payment date will be the date that would otherwise be the second interest payment date.

If any interest payment date other than the maturity date for any Floating Rate Note would otherwise be a day that is not a business day, that interest payment date will be postponed to the next succeeding business day (and Following Business Day Convention will be specified in your Final Terms), except that in the case of a LIBOR Note or a EURIBOR Note where that business day falls in the next succeeding calendar month, that interest payment date will be the immediately preceding business day (and Modified Following Business Day Convention will be specified in your Final Terms). If the maturity date of a Floating Rate Note falls on a day that is not a business day, the required payment of principal, premium and interest will be made on the next succeeding business day as if made on the date that payment was due, and no interest will accrue on that payment for the period from and after the maturity date to the date of that payment on the next succeeding business day.

Calculation of interest. Calculations relating to Floating Rate Notes will be made by the "Calculation Agent", an institution that we appoint as our agent for this purpose. That institution may include any affiliate of ours, such as ANZBGL. The relevant Final Terms for a particular Floating Rate Note will name the institution that we have appointed to act as the Calculation Agent for that Note as of its issue date. We have initially appointed The Bank of New York Mellon as our Calculation Agent for any Floating Rate Notes. We may appoint a different institution to serve as Calculation Agent from time to time after the issue date of the Note without your consent and without notifying you of the change.

For each Floating Rate Note, the Calculation Agent will determine, on or before the corresponding interest calculation or determination date, the interest rate that takes effect on each Interest Reset Date. In addition,

the Calculation Agent will calculate the amount of interest that has accrued during each interest period-i.e., the period from and including the issue date, or the last date to which interest has been paid or made available for payment, to but excluding the payment date. For each interest period, the Calculation Agent will calculate the amount of accrued interest by multiplying the face or other specified amount of the Floating Rate Note by an accrued interest factor for the interest period. This factor will equal the sum of the interest factors calculated for each day during the interest period. The interest factor for each day will be calculated by dividing the interest rate, expressed as a decimal, applicable to that day by the following:

- 360, in the case of Commercial Paper Rate Notes, Prime Rate Notes, LIBOR Notes, Eleventh District Cost of Funds Rate Notes, EURIBOR Notes, CD Rate Notes and Federal Funds Rate Notes; or
- the actual number of days in the year, in the case of Treasury Rate Notes, CMT Rate Notes, New Zealand Bank Bill Rate Notes and Australian Bank Bill Rate Notes.

Upon the request of the Holder of any Floating Rate Note, the Calculation Agent will provide for that Note the interest rate then in effect and, if determined, the interest rate that will become effective on the next Interest Reset Date. The Calculation Agent's determination of any interest rate, and its calculation of the amount of interest for any interest period, will be final and binding in the absence of manifest error.

All percentages resulting from any calculation relating to a Note will be rounded upward or downward, if necessary, to the nearest one hundred-thousandth of a percentage point, with five one millionths of a percentage point rounded upward, e.g., 9.876541% (or .09876541) being rounded down to 9.87654% (or .0987654) and 9.876545% (or .09876545) being rounded up to 9.87655% (or .0987655). All amounts used in or resulting from any calculation relating to a Floating Rate Note will be rounded upward or downward, as appropriate, to the nearest cent, in the case of U.S. dollars, or to the nearest corresponding hundredth of a unit, in the case of a currency other than U.S. dollars, with one-half cent or one-half of a corresponding hundredth of a unit or more being rounded upward.

In determining the Base Rate that applies to a Floating Rate Note during a particular interest period, the Calculation Agent may obtain rate quotes from various banks or dealers active in the relevant market. Those reference banks and dealers may include the Calculation Agent itself and its affiliates, as well as any underwriter, dealer or agent participating in the distribution of the relevant Floating Rate Notes and its affiliates, and they may include affiliates of ANZ New Zealand.

Commercial Paper Rate Notes

If you purchase a Commercial Paper Rate Note, your Note will bear interest at a Base Rate equal to the Commercial Paper Rate as adjusted by the Spread or Spread Multiplier, if any, specified in the applicable Final Terms.

The Commercial Paper Rate for each interest period will be the Money Market Yield of the rate for the relevant Interest Determination Date and for commercial paper having the Index Maturity specified in the applicable Final Terms, as published in H.15(519) under the heading "Commercial Paper—Financial". If the Commercial Paper Rate cannot be determined as described above, the following procedures will apply.

- If the rate described above does not appear in H.15(519) at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from that source at that time, then the Commercial Paper Rate will be the rate, for the relevant Interest Determination Date, for commercial paper having the Index Maturity specified in the applicable Final Terms, as published in H.15 daily update or any other recognized electronic source used for displaying that rate, in each case, under the heading "Commercial Paper—Financial".
- If the rate described above does not appear in H.15(519), H.15 daily update or another recognized electronic source at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, then the Commercial Paper Rate will be calculated by the Calculation Agent and will be the Money Market Yield of the arithmetic mean of the following offered rates for U.S. dollar commercial paper that has the relevant Index Maturity and is placed for an industrial issuer whose bond rating is "AA", or the equivalent, from a nationally recognized rating agency: the rates offered as of 11:00 A.M., New York City time, on the relevant Interest Determination Date, by three leading U.S. dollar commercial paper dealers in New York City selected by the Calculation Agent.
- If fewer than three dealers selected by the Calculation Agent are quoting as described above, the Commercial Paper Rate for the new interest period will be the Commercial Paper Rate in effect for the prior interest period. If the Initial Base Rate has been in effect for the prior interest period, it will remain in effect for the new interest period.

Prime Rate Notes

If you purchase a Prime Rate Note, your Note will bear interest at a Base Rate equal to the Prime Rate as adjusted by the Spread or Spread Multiplier, if any, specified in the applicable Final Terms. The Prime Rate for each interest period will be the rate, for the relevant Interest Determination Date, published in H.15(519) under the heading "Bank Prime Loan". If the Prime Rate cannot be determined as described above, the following procedures will apply.

- If the rate described above does not appear in H.15(519) at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from that source at that time, then the Prime Rate will be the rate, for the relevant Interest Determination Date, as published in H.15 daily update, or another recognized electronic source used for the purpose of displaying that rate, in each case, under the heading "Bank Prime Loan".
- If the rate described above does not appear in H.15(519), H.15 daily update or another recognized electronic source at 3:00 P.M., New York City time, on the relevant interest calculation date, unless the calculation is made earlier and the rate is available from one of those sources at that time, then the Prime Rate will be the arithmetic mean, as determined by the Calculation Agent, of the following rates as they appear on the Reuters Page US PRIME1: the rate of interest publicly announced by each bank appearing on that page as that bank's prime rate or base lending rate, as of 11:00 A.M., New York City time, on the relevant Interest Determination Date.
- If fewer than four of these rates appear on the Reuters Page US PRIME1, the Prime Rate will be the arithmetic mean of the prime rates or base lending rates, as of the close of business on the relevant Interest Determination Date, of three major banks in New York City selected by the Calculation Agent. For this purpose, the Calculation Agent will use rates quoted on the basis of the actual number of days in the year divided by a 360-day year.
- If fewer than three banks selected by the Calculation Agent are quoting as described above, the Prime Rate for the new interest period will be the Prime Rate in effect for the prior interest period. If the Initial Base Rate has been in effect for the prior interest period, it will remain in effect for the new interest period.

LIBOR Notes

If you purchase a LIBOR Note, your Note will bear interest at a Base Rate equal to LIBOR for deposits in U.S. dollars or any other index currency, as specified in the applicable Final Terms. In addition, the applicable LIBOR Base Rate will be adjusted by the Spread or Spread Multiplier, if any, specified in the applicable Final Terms. LIBOR will be determined in the following manner:

- LIBOR will be the offered rate appearing on the Designated LIBOR Page, as of 11:00 A.M., London time, on the relevant LIBOR Interest Determination Date, for deposits of the relevant index currency having the relevant Index Maturity beginning on the relevant Interest Reset Date. The applicable Final Terms will indicate the index currency, the Index Maturity, and the Designated LIBOR Page that apply to your LIBOR Note.
- If no such rate appears on the Designated LIBOR Page, then LIBOR will be determined on the basis of the rates, at approximately 11:00 A.M., London time, on the relevant LIBOR Interest Determination Date, at which deposits of the following kind are offered to prime banks in the London interbank market by four major banks in that market selected by the Calculation Agent: deposits of the index currency having the relevant Index Maturity, beginning on the relevant Interest Reset Date, and in a representative amount. The Calculation Agent will request the principal London office of each of these banks to provide a quotation of its rate. If at least two quotations are provided, LIBOR for the relevant LIBOR Interest Determination Date will be the arithmetic mean of the quotations.
- If fewer than two quotations are provided as described in the prior paragraph, LIBOR for the relevant LIBOR Interest Determination Date will be the arithmetic mean of the rates for loans of the following kind to leading European banks quoted, at approximately 11:00 A.M., in the principal financial center, on that LIBOR Interest Determination Date, by three major banks in that financial center selected by the Calculation Agent: loans of the index currency having the relevant Index Maturity, beginning on the relevant Interest Reset Date, and in a representative amount.
- If fewer than three banks selected by the Calculation Agent are quoting as described in the prior paragraph, LIBOR for the new interest period will be LIBOR in effect for the prior interest period. If the Initial Base Rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

EURIBOR Notes

If you purchase a EURIBOR Note, your Note will bear interest at a Base Rate equal to the interest rate for deposits in euros designated as EURIBOR and sponsored jointly by the European Banking Federation and ACI—the Financial Market Association (or any company established by the joint sponsors for purposes of compiling and publishing that rate). In addition, the EURIBOR Base Rate will be adjusted by the Spread or Spread Multiplier, if any, specified in the applicable Final Terms. EURIBOR will be determined in the following manner:

- EURIBOR will be the offered rate for deposits in euros having the Index Maturity specified in the applicable Final Terms, beginning on the relevant Interest Reset Date, as that rate appears on Reuters Page EURIBOR01 as of 11:00 A.M., Brussels time, on the relevant EURIBOR Interest Determination Date.
- If the rate described in the prior paragraph does not appear on Reuters Page EURIBOR01, EURIBOR will be determined on the basis of the rates, at approximately 11:00 A.M., Brussels time, on the relevant EURIBOR Interest Determination Date, at which deposits of the following kind are offered to prime banks in the euro-zone interbank market by the principal euro-zone office of each of four major banks in that market selected by the Calculation Agent: euro deposits having the relevant Index Maturity, beginning on the relevant Interest Reset Date, and in a representative amount. The Calculation Agent will request the principal euro-zone office of each of these banks to provide a quotation of its rate. If at least two quotations are provided, EURIBOR for the relevant EURIBOR Interest Determination Date will be the arithmetic mean of the quotations.
- If fewer than two quotations are provided as described in the prior paragraph, EURIBOR for the relevant EURIBOR Interest Determination Date will be the arithmetic mean of the rates for loans of the following kind to leading euro-zone banks quoted, at approximately 11:00 A.M., Brussels time on that EURIBOR Interest Determination Date, by four major banks in the euro-zone selected by the Calculation Agent: loans of euros having the relevant Index Maturity, beginning on the relevant Interest Reset Date, and in a representative amount.
- If fewer than four banks selected by the Calculation Agent are quoting as described in the prior paragraph, EURIBOR for the new interest period will be EURIBOR in effect for the prior interest period. If the Initial Base Rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

Treasury Rate Notes

If you purchase a Treasury Rate Note, your Note will bear interest at a Base Rate equal to the Treasury Rate as adjusted by the Spread or Spread Multiplier, if any, specified in the applicable Final Terms.

“**Treasury Rate**” means the rate for the auction held on the Interest Determination Date of direct obligations of the United States (Treasury Bills) having the Index Maturity specified in the applicable Final Terms as that rate appears on Reuters Page US AUCTION10 or Reuters Page US AUCTION11 under the heading “INVEST RATE”.

If the Treasury Rate cannot be determined in the manner described in the prior paragraph, the following procedures will apply:

- If the rate described above does not appear on either page by 3:00 P.M., New York City time, on the relevant interest calculation date (unless the calculation is made earlier and the rate is available from that source at that time), the Treasury Rate will be the bond equivalent yield of the auction rate, for the relevant Interest Determination Date and for treasury bills of the kind described above, as announced by the U.S. Department of the Treasury.
- If the auction rate described in the prior paragraph is not so announced by 3:00 P.M., New York City time, on the relevant interest calculation date, or if no such auction is held for the relevant week, then the Treasury Rate will be the bond equivalent yield of the rate, for the relevant Interest Determination Date and for treasury bills having a remaining maturity closest to the specified Index Maturity, as published in H.15(519) under the heading “U.S. government securities/Treasury bills/secondary market”.
- If the rate described in the prior paragraph does not appear in H.15(519) by 3:00 P.M., New York City time, on the relevant interest calculation date (unless the calculation is made earlier and the rate is available from one of those sources at that time), then the Treasury Rate will be the rate, for the relevant Interest Determination Date and for treasury bills having a remaining maturity closest to the specified Index Maturity, as published in H.15 daily update, or another recognized electronic source used for displaying that rate, under the heading “U.S. government securities/Treasury bills/secondary market”.

- If the rate described in the prior paragraph does not appear in H.15 daily update, H.15(519) or another recognized electronic source by 3:00 P.M., New York City time, on the relevant interest calculation date (unless the calculation is made earlier and the rate is available from one of those sources at that time), the Treasury Rate will be the bond equivalent yield of the arithmetic mean of the following secondary market bid rates for the issue of treasury bills with a remaining maturity closest to the specified Index Maturity: the rates bid as of approximately 3:30 P.M., New York City time, on the relevant Interest Determination Date, by three primary U.S. government securities dealers in New York City selected by the Calculation Agent.
- If fewer than three dealers selected by the Calculation Agent are quoting as described in the prior paragraph, the Treasury Rate in effect for the new interest period will be the Treasury Rate in effect for the prior interest period. If the initial base rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

CMT Rate Notes

If you purchase a CMT Rate Note, your Note will bear interest at a Base Rate equal to the CMT Rate as adjusted by the Spread or Spread Multiplier, if any, specified in the applicable Final Terms.

The CMT Rate will be any of the following rates displayed on the Designated CMT Reuters Page under the heading "Treasury Constant Maturities" for the designated CMT Index Maturity:

- if the Designated CMT Reuters Page is the Reuters Page FRBCMT, the rate for the relevant Interest Determination Date; or
- if the Designated CMT Reuters Page is the Reuters Page FEDCMT, the weekly or monthly average, as specified in the applicable Final Terms, for the week that ends immediately before the week in which the relevant Interest Determination Date falls, or for the month that ends immediately before the month in which the relevant Interest Determination Date falls, as applicable.

If the CMT Rate cannot be determined in this manner, the following procedures will apply.

- If the applicable rate described above is not displayed on the relevant Designated CMT Reuters Page at 3:00 P.M., New York City time, on the relevant interest calculation date (unless the calculation is made earlier and the rate is available from that source at that time), then the CMT Rate will be the applicable treasury constant maturity rate described above-i.e., for the designated CMT Index Maturity and for either the relevant Interest Determination Date or the weekly or monthly average, as applicable, - as published in H.15(519) under the heading "Treasury Constant Maturities".
- If the applicable rate described above does not appear in H.15(519) at 3:00 P.M., New York City time, on the relevant interest calculation date (unless the calculation is made earlier and the rate is available from one of those sources at that time), then the CMT Rate will be the Treasury constant maturity rate, or other U.S. Treasury Rate, for the designated CMT Index Maturity and with reference to the relevant Interest Determination Date, that:
 - is published by the Board of Governors of the Federal Reserve System, or the U.S. Department of the Treasury, and
 - is determined by the Calculation Agent to be comparable to the applicable rate formerly displayed on the Designated CMT Reuters Page and published in H.15(519).
- If the rate described in the prior paragraph does not appear at 3:00 P.M., New York City time, on the relevant interest calculation date (unless the calculation is made earlier and the rate is available from one of those sources at that time), then the CMT Rate will be the yield to maturity of the arithmetic mean of the following secondary market offered rates for the most recently issued Treasury Notes (as defined below) having an original maturity of approximately the designated CMT Index Maturity and a remaining term to maturity of not less than the designated CMT Index Maturity minus one year, and in a representative amount: the offered rates, as of approximately 3:30 P.M., New York City time, on the relevant Interest Determination Date, of three primary U.S. government securities dealers in New York City selected by the Calculation Agent. In selecting these offered rates, the Calculation Agent will request quotations from five of these primary dealers and will disregard the highest quotation-or, if there is equality, one of the highest-and the lowest quotation-or, if there is equality, one of the lowest. "Treasury Notes" are direct, non-callable, fixed rate obligations of the U.S. government.
- If the Calculation Agent is unable to obtain three quotations of the kind described in the prior paragraph, the CMT Rate will be the yield to maturity of the arithmetic mean of the following secondary market offered rates for Treasury Notes with an original maturity longer than the designated CMT Index Maturity, with a remaining term to maturity closest to the designated CMT

Index Maturity and in a representative amount: the offered rates, as of approximately 3:30 P.M., New York City time, on the relevant Interest Determination Date, of three primary U.S. government securities dealers in New York City selected by the Calculation Agent. In selecting these offered rates, the Calculation Agent will request quotations from five of these primary dealers and will disregard the highest quotation-or, if there is equality, one of the highest-and the lowest quotation-or, if there is equality, one of the lowest. If two Treasury Notes with an original maturity longer than the designated CMT Index Maturity have remaining terms to maturity that are equally close to the designated CMT Index Maturity, the Calculation Agent will obtain quotations for the Treasury Note with the shorter remaining term to maturity.

- If fewer than five but more than two of these primary dealers are quoting as described in each of the prior two paragraphs, then the CMT Rate for the relevant Interest Determination Date will be based on the arithmetic mean of the offered rates so obtained, and neither the highest nor the lowest of those quotations will be disregarded.
- If two or fewer primary dealers selected by the Calculation Agent are quoting as described in the prior paragraph, the CMT Rate in effect for the new interest period will be the CMT Rate in effect for the prior interest period. If the Initial Base Rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

CD Rate Notes

If you purchase a CD Rate Note, your Note will bear interest at a Base Rate equal to the CD Rate as adjusted by the Spread or Spread Multiplier, if any, specified in the applicable Final Terms.

The CD Rate will be the rate, for the relevant Interest Determination Date, for negotiable U.S. dollar certificates of deposit having the Index Maturity specified in the applicable Final Terms, as published in the source specified in the applicable Final Terms. If the CD Rate cannot be determined in this manner, the following procedures will apply.

- If the rate described above does not appear in the source specified in the applicable Final Terms at 3:00 P.M., New York City time, on the relevant interest calculation date (unless the calculation is made earlier and the rate is available from that source at that time), then the CD Rate will be the rate, for the relevant Interest Determination Date, described above as published in the source specified in the applicable Final Terms or another recognized electronic source used for displaying that rate, under the heading specified in the applicable Final Terms.
- If the rate described in the prior paragraph does not appear in the source specified in the applicable Final Terms or another recognized electronic source at 3:00 P.M., New York City time, on the relevant interest calculation date (unless the calculation is made earlier and the rate is available from one of those sources at that time), the CD Rate will be the arithmetic mean of the following secondary market offered rates for negotiable U.S. dollar certificates of deposit of major U.S. money center banks with a remaining maturity closest to the specified Index Maturity, and in a representative amount: the rates offered as of 10:00 A.M., New York City time, on the relevant Interest Determination Date, by three leading nonbank dealers in negotiable U.S. dollar certificates of deposit in New York City, as selected by the Calculation Agent.
- If fewer than three dealers selected by the Calculation Agent are quoting as described in the prior paragraph, the CD Rate in effect for the new interest period will be the CD Rate in effect for the prior interest period. If the Initial Base Rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

Federal Funds Rate Notes

If you purchase a Federal Funds Rate Note, your Note will bear interest at a Base Rate equal to the Federal Funds Rate and adjusted by the Spread or Spread Multiplier, if any, specified in the applicable Final Terms.

The Federal Funds Rate will be the rate for U.S. dollar federal funds for the relevant Interest Determination Date, as published in H.15(519) opposite the heading "Federal Funds (Effective)", as that rate is displayed on Reuters Page FEDFUNDS1 under the heading "EFFECT". If the Federal Funds Rate cannot be determined in this manner, the following procedures will apply.

- If the rate described above is not displayed on Reuters Page FEDFUNDS1 at 3:00 P.M., New York City time, on the relevant interest calculation date (unless the calculation is made earlier and the rate is available from that source at that time), then the Federal Funds Rate, for the relevant Interest Determination Date, will be the rate described above as published in H.15 daily update, or another recognized electronic source used for displaying that rate, under the heading "Federal funds (effective)".

- If the rate described in the prior paragraph is not displayed on Reuters Page FEDFUNDS1 and does not appear in H.15(519), H.15 daily update or another recognized electronic source at 3:00 P.M., New York City time, on the relevant interest calculation date (unless the calculation is made earlier and the rate is available from one of those sources at that time), the Federal Funds Rate will be the arithmetic mean of the rates for the last transaction in overnight, U.S. dollar federal funds arranged, before 9:00 A.M., New York City time, on the business day following the relevant Interest Determination Date, by three leading brokers of U.S. dollar federal funds transactions in New York City selected by the Calculation Agent.
- If fewer than three brokers selected by the Calculation Agent are quoting as described in the prior paragraph, the Federal Funds Rate in effect for the new interest period will be the Federal Funds Rate in effect for the prior interest period. If the Initial Base Rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

New Zealand Bank Bill Rate Notes

If you purchase a New Zealand Bank Bill Rate Note, your Note will bear interest at a Base Rate equal to the New Zealand Bank Bill Rate as adjusted by the Spread or Spread Multiplier, if any, specified in your Final Terms.

The New Zealand Bank Bill Rate will be determined by the Calculation Agent on the relevant Interest Determination Date by taking the FRA settlement rate quoted on the Reuters Page BKBM as of 10:45 A.M., Wellington time for bank accepted bills of exchange (as defined in the Bills of Exchange Act 1908, New Zealand) having a term equal to the Index Maturity specified in your Final Terms. If the New Zealand Bank Bill Rate cannot be determined in this manner, the following procedures will apply:

- If the FRA settlement rate does not appear on the Reuters Page BKBM, as of 10:45 A.M., Wellington time, on the relevant Interest Determination Date, then the New Zealand Bank Bill Rate for that Interest Determination Date, will be determined by the Calculation Agent by taking the mean buying and selling rates for bank accepted bills of exchange (as defined in the Bills of Exchange Act 1908, New Zealand) having a term equal to the Index Maturity specified in your Final Terms, quoted to the Calculation Agent at approximately 10:45 A.M., Wellington time, on the Interest Reset Date by four major financial institutions in the New Zealand market authorized to quote on the Reuters Page BKBM selected by the Calculation Agent, eliminating the highest and the lowest mean rates and taking the arithmetic mean of the remaining mean rates and then, if necessary, rounding the resulting figure upwards to four decimal places.
- If the financial institutions selected by the Calculation Agent are not quoting as described above, the New Zealand Bank Bill Rate in effect for the new interest period will be the New Zealand Bank Bill Rate in effect for the prior interest period. If the Initial Base Rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

Australian Bank Bill Rate Notes

If you purchase an Australian Bank Bill Rate Note, your Note will bear interest at a Base Rate equal to the Australian Bank Bill Rate as adjusted by the Spread or Spread Multiplier, if any, specified in the applicable Final Terms.

The Australian Bank Bill Rate will be the average mid rate for a maturity equal or closest to the Index Maturity specified in the applicable Final Terms quoted on the Reuters Page BBSW at approximately 10:15 A.M., Sydney time, on the relevant Interest Determination Date. If the Australian Bank Bill Rate cannot be determined in this manner, the following procedures will apply.

- If the rate does not appear on the Reuters Page BBSW, at approximately 10:15 A.M., Sydney time, on the relevant Interest Determination Date, then the Australian Bank Bill Rate, for that Interest Determination Date, will be determined by the Calculation Agent by taking the mean buying and selling rates for a bill (which for the purpose of this definition means a bill of exchange of the type specified for the purpose of quoting on the Reuters Page BBSW) having a tenor equal or closest to the Index Maturity specified in the applicable Final Terms, quoted at approximately 10:15 A.M., Sydney time, on the Interest Determination Date by five major financial institutions in the Australian market authorized to quote on the Reuters Page BBSW selected by the Calculation Agent on application by the Calculation Agent, eliminating the highest and the lowest mean rates and taking the arithmetic mean of the remaining mean rates and then, if necessary, rounding the resulting figure upwards to four decimal places.
- If the financial institutions selected by the Calculation Agent are not quoting as described above, the Australian Bank Bill Rate in effect for the new interest period will be the Australian Bank Bill Rate in effect for the prior interest period. If the Initial Base Rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

Business Day

The term "***business day***" means, for any Note, unless otherwise specified in the applicable Final Terms, a day that meets all of the following applicable requirements:

- for all Notes, is a Monday, Tuesday, Wednesday, Thursday or Friday that is not a day on which banking institutions in The City of New York, the City of Wellington, New Zealand, the City of Auckland, New Zealand or the City of London generally are authorized or obligated by law, regulation or executive order to close;
- if the Note is a LIBOR Note, is also a London business day;
- if the Note has a Specified Currency other than U.S. dollars or euros, is also a day on which banking institutions are not authorized or obligated by law, regulation or executive order to close in the principal financial center of the country issuing the Specified Currency;
- if the Note is a EURIBOR Note or has a Specified Currency of euros, or is a LIBOR Note for which the Index Currency is euros, is also a euro business day; and
- solely with respect to any payment or other action to be made or taken at any place of payment designated by us outside The City of New York, is a Monday, Tuesday, Wednesday, Thursday or Friday that is not a day on which banking institutions in such place of payment generally are authorized or obligated by law, regulation or executive order to close.

Eleventh District Cost of Funds Rate Notes

If you purchase an Eleventh District Cost of Funds Rate Note, your Note will bear interest at a Base Rate equal to the Eleventh District Cost of Funds Rate as adjusted by the Spread or Spread Multiplier, if any, specified in the applicable Final Terms.

The Eleventh District Cost of Funds Rate will be the rate equal to the monthly weighted average cost of funds for the calendar month immediately before the month in which the relevant Eleventh District Cost of Funds Rate Interest Determination Date falls, as that rate appears on Reuters Page COFI/ARMS under the heading "11th Dist COFI:" as of 11:00 A.M., San Francisco time, on that date. If the Eleventh District Cost of Funds Rate cannot be determined in this manner, the following procedures will apply.

- If the rate described above does not appear on Reuters Page COFI/ARMS on the relevant Interest Determination Date, then the Eleventh District Cost of Funds Rate for that date will be the monthly weighted average cost of funds paid by institutions that are members of the Eleventh Federal Home Loan Bank District for the calendar month immediately before the month in which the relevant Interest Determination Date falls, as most recently announced by the FHLB of San Francisco as that cost of funds.
- If the FHLB of San Francisco fails to announce the cost of funds described in the prior paragraph on or before the relevant Interest Determination Date, the Eleventh District Cost of Funds Rate in effect for the new interest period will be the Eleventh District Cost of Funds Rate in effect for the prior interest period. If the Initial Base Rate has been in effect for the prior interest period, however, it will remain in effect for the new interest period.

Special Rate Calculation Terms

In this subsection entitled "-Interest rates", we use several terms that have special meanings relevant to calculating floating interest rates. We describe these terms as follows:

The term "**bond equivalent yield**" means a yield expressed as a percentage and calculated in accordance with the following formula:

$$\text{bond equivalent yield} = \frac{D \times N}{360 - (D \times M)} \times 100$$

where

- "D" means the annual rate for Treasury Bills quoted on a bank discount basis and expressed as a decimal;
- "N" means 365 or 366, as the case may be; and
- "M" means the actual number of days in the applicable interest reset period.

The term **“Designated CMT Index Maturity”** means the Index Maturity for a CMT Rate Note and will be the original period to maturity of a U.S. Treasury security specified in the applicable Final Terms. If no such original maturity period is so specified, the designated CMT Index Maturity will be 2 years.

The term **“Designated CMT Reuters Page”** means the Reuters Page specified in the applicable Final Terms that displays treasury constant maturities as reported in H.15(519). If no Reuters Page is so specified, then the applicable page will be Reuters Page FEDCMT. If Reuters Page FEDCMT applies but the applicable Final Terms does not specify whether the weekly or monthly average applies, the weekly average will apply.

The term **“Designated LIBOR Page”** means the display on the Reuters 3000 Xtra Service, or any successor service, on the “LIBOR01” page or “LIBOR02” page, as specified in the applicable Final Terms, or any replacement page or pages on which London interbank rates of major banks for the relevant index currency are displayed.

The term **“euro business day”** means any day on which the Trans-European Automated Real-Time Gross Settlement Express Transfer which utilizes a single shared platform and which was launched on November 19, 2007 (TARGET2) System, or any successor system, is open for business.

The term **“euro-zone”** means, at any time, the region comprised of the member states of the European Economic and Monetary Union that, as of that time, have adopted a single currency in accordance with the Treaty on European Union of February 1992.

“FHLB of San Francisco” means the Federal Home Loan Bank of San Francisco.

“H. 15(519)” means “Statistical Release H.15(519), Selected Interest Rates,” or any successor publication as published weekly by the Board of Governors of the Federal Reserve System.

“H. 15 daily update” means the daily update of H.15(519), available through the world wide website of the Board of Governors of the Federal Reserve System at <http://www.federalreserve.gov/releases/h15/update>, or any successor site or publication.

The term **“index currency”** means, with respect to a LIBOR Note, the currency specified as such in the applicable Final Terms. The index currency may be U.S. dollars or any other currency, and will be U.S. dollars unless another currency is specified in the applicable Final Terms.

The term **“Index Maturity”** means, with respect to a Floating Rate Note, the period to maturity of the instrument or obligation on which the interest rate formula is based, as specified in the applicable Final Terms.

“London business day” means any day on which dealings in the relevant index currency are transacted in the London interbank market.

The term **“Money Market Yield”** means a yield expressed as a percentage and calculated in accordance with the following formula:

$$\text{money market yield} = \frac{D \times 360}{360 - (D \times M)} \times 100$$

where

- “D” means the annual rate for commercial paper quoted on a bank discount basis and expressed as a decimal; and
- “M” means the actual number of days in the relevant interest reset period.

The term **“principal financial center”** means (i) the capital city of the country issuing the Specified Currency in the applicable Note (which in the case of those countries whose currencies were replaced by the euro, will be Brussels, Belgium) or (ii) the capital city of the country to which the relevant index currency, if applicable, relates, except, in each case, with respect to United States dollars, euros, Australian dollars, Canadian dollars, New Zealand dollars, South African rand and Swiss francs, the principal financial center will be The City of New York, London (solely in the case of the relevant LIBOR index currency), Sydney, Toronto, Auckland, Johannesburg and Zurich, respectively.

The term **“representative amount”** means an amount that, in the Calculation Agent’s judgment, is representative of a single transaction in the relevant market at the relevant time.

“Reuters Page” means the display on the Reuters 3000 Xtra Service, or any successor service, on the page or pages specified in this offering memorandum or the applicable Final Terms, or any replacement page or pages on that service.

“Reuters Page BBSW” means the display on the Reuters Page designated as “BBSW” or any replacement page or pages on which quotations for Australian bank accepted bills of exchange are displayed.

“Reuters Page BKBM” means the display on the Reuters Page designated as “BKBM” or any replacement page or pages on which quotations for New Zealand bank accepted bills of exchange (as defined in the Bills Exchange Act 1908, New Zealand) are displayed.

“Reuters Page COFI/ARMS” means the display on the Reuters Page designated as “COFI/ARMS” or any replacement page or pages on that service for the purpose of displaying such a rate.

“Reuters Page EURIBOR01” means the display on the Reuters Page designated as “EURIBOR01” or any replacement page or pages on which euro-zone interbank rates of major banks for euro are displayed.

“Reuters Page FEDFUNDS1” means the display on the Reuters Page designated as “FEDFUNDS1” or any replacement page or pages.

“Reuters Page FEDCMT” means the display on the Reuters Page designated as “FEDCMT” or any replacement page or pages.

“Reuters Page FRBCMT” means the display on the Reuters Page designated “FRBCMT” or any replacement page or pages.

“Reuters Page US AUCTION10” means the display on the Reuters Page designated as “US AUCTION10” or any replacement page or pages.

“Reuters Page US AUCTION11” means the display on the Reuters Page designated as “US AUCTION11” or any replacement page or pages.

“Reuters Page US PRIME1” means the display on the Reuters Page designated as “US PRIME1” or any replacement page or pages on which prime rates or base lending rates of major U.S. banks are displayed.

If, when we use the terms Designated CMT Reuters Page, Designated LIBOR Reuters Page, H.15(519), H.15 daily update, Reuters Page FEDFUNDS1, Reuters Page US AUCTION10, Reuters Page US AUCTION11, Reuters Page COFI/ARMS Reuters Page BKBM or Reuters Page BBSW, we refer to a particular heading or headings on any of those pages, those references include any successor or replacement heading or headings as determined by the Calculation Agent.

Payment of additional amounts

We will make all payments in respect of the Notes to all Holders of such Notes without withholding or deduction for, or on account of, any taxes, assessments or other governmental charges (“**relevant tax**”) imposed or levied by or on behalf of New Zealand or, in the case of the ANZNIL Notes, the United Kingdom or any political subdivision or authority in or of either of the foregoing jurisdictions or any other jurisdiction where the payor is domiciled or has a principal place of business (each, a “**relevant jurisdiction**”) unless the withholding or deduction is required by law. In that event, we will pay such additional amounts as may be necessary so that the net amount received by the Holder of the Notes, after such withholding or deduction, will equal the amount that the Holder would have received in respect of the Notes without such withholding or deduction. However, we will pay no additional amounts:

- to the extent that the relevant tax is New Zealand tax and is imposed on a Holder who is not a New Zealand Alien (as defined herein);
- to the extent that the relevant tax is imposed or levied by virtue of the Holder, or the beneficial owner, of the Notes having some connection (whether present, past or future) with a relevant jurisdiction, other than mere receipt of such payment or being a Holder, or the beneficial owner, of the Notes;
- to the extent that the relevant tax is imposed or levied by virtue of the Holder, or the beneficial owner, of the Notes not complying with any statutory requirements or not presenting any form or certificate or not having made a declaration of non-residence in, or lack of connection with, a relevant jurisdiction or any similar claim for exemption, if the relevant Issuer or its agent has provided the Holder, or the beneficial owner, of the Notes with at least 60 days’ prior written notice of an opportunity to comply with such statutory requirements or make a declaration or claim;
- to the extent that the relevant tax is imposed or levied by virtue of the Holder, or the beneficial owner, of the Notes having presented for payment more than 30 days after the date on which the payment in respect of the Notes first became due and payable or the date on which payment thereof is duly provided for, whichever occurs later;

- to the extent that the relevant tax is imposed on a payment to an individual and is required to be made pursuant to European Council Directive 2003/48/EC or any other Directive implementing the conclusions of the ECOFIN Council meeting of November 26-27, 2000 on the taxation of savings income or any law implementing or complying with, or introduced in order to conform to, such Directive;
- to the extent that the relevant tax is imposed or levied by virtue of the Holder, or the beneficial owner, of the Notes having presented the Notes, where the Holder, or beneficial owner, of the Notes would be able to avoid such withholding or deduction by presenting the Notes to another Paying Agent in a Member State of the European Union;
- to the extent that the relevant tax is imposed or levied by virtue of the Holder, or the beneficial owner, of the Notes having presented the Notes for payment in a relevant jurisdiction, unless the Notes could not have been presented for payment elsewhere; or
- to the extent any combination of the above applies.

In addition, we will pay no additional amounts to any Holder who is a New Zealand Alien and who is a fiduciary or partnership or person other than the sole beneficial owner of the payment in respect of the Notes to the extent such payment would, under the laws of a relevant jurisdiction, be treated as being derived or received for tax purposes by a beneficiary or settlor with respect to such fiduciary or a member of such partnership or a beneficial owner who would not have been entitled to additional amounts had it been the Holder of the Notes.

The term “**New Zealand Alien**” means a registered Holder who is not resident in New Zealand for the purposes of the Income Tax Act 2007 and who does not engage in business in New Zealand through a fixed establishment (as defined in the Income Tax Act 2007) in New Zealand.

In addition, any amounts to be paid on the Notes will be paid net of any deduction or withholding imposed or required pursuant to Sections 1471 through 1474 of the Code, i.e., FATCA, any current or future regulations or official interpretations thereof, any agreement entered into pursuant to Section 1471(b) of the Code, or any fiscal or regulatory legislation, rules or practices adopted pursuant to any intergovernmental agreement entered into in connection with the implementation of such Sections of the Code, and no additional amounts will be required to be paid on account of any such deduction or withholding.

Whenever we refer in this Offering Memorandum or any Final Terms, in any context, to the payment of the principal of, or any premium or interest on, any Note or the net proceeds received on the sale or exchange of any Note, we mean to include the payment of additional amounts to the extent that, in that context, additional amounts are, were or would be payable.

Redemption and repayment

Your Note will not be entitled to the benefit of any sinking fund, that is, we will not deposit money on a regular basis into any separate custodial account to repay your Note. In addition, we will not be entitled to redeem your Note before its stated maturity unless your Final Terms specifies a redemption commencement date. You will not be entitled to require us to buy your Note from you, before its stated maturity, unless your Final Terms specifies one or more repayment dates.

If your Final Terms specifies a redemption commencement date or a repayment date, it will also specify one or more redemption prices or repayment prices, which may be expressed as a percentage of the principal amount of your Note. It may also specify one or more redemption periods during which the redemption prices relating to a redemption of Notes during those periods will apply.

If your Final Terms specify a redemption commencement date, your Note will be redeemable at our option at any time on or after that date or at a specified time or times. If we redeem your Note, we will do so at the specified redemption price, together with interest accrued to the redemption date. If different prices are specified for different redemption periods, the price we pay will be the price that applies to the redemption period during which your Note is redeemed.

If your Final Terms specifies a repayment date, your Note will be repayable at the Holder’s option on the specified repayment date at the specified repayment price, together with interest accrued to the repayment date.

If we exercise an option to redeem any Note, we will give to the Holder written notice of the principal amount of the Note to be redeemed, not less than 30 days nor more than 60 days before the applicable redemption date. If we choose to redeem a Tranche in part, the Fiscal Agent will select the Notes that will be redeemed by such usual method as it deems fair and appropriate. We will give the notice in the manner described below in “— Notices”.

If a Note represented by a Global Note is subject to repayment at the Holder's option, the Depositary or its nominee, as the Holder, will be the only person that can exercise the right to repayment. Any indirect owners who own beneficial interests in the Global Note and wish to exercise a repayment right must give proper and timely instructions to their banks or brokers through which they hold their interests, requesting that they notify the Depositary to exercise the repayment right on their behalf. Different firms have different deadlines for accepting instructions from their customers, and you should take care to act promptly enough to ensure that your request is given effect by the Depositary before the applicable deadline for exercise.

Street name and other indirect owners should contact their banks or brokers for information about how to exercise a repayment right in a timely manner. We or our affiliates may purchase Notes from investors who are willing to sell from time to time in private transactions at negotiated prices. Notes that we or they purchase may, at our discretion, be held, resold or cancelled.

Redemption for taxation reasons

We will have the right to redeem a Tranche in whole, but not in part, at any time following the occurrence of a Tax Event (as defined herein); provided, however, that, if at the time there is available to us the opportunity to eliminate the Tax Event by taking some ministerial action, such as filing a form or making an election, or pursuing some other similar reasonable measure that in our sole judgment has or will cause no adverse effect on us or any of our subsidiaries or affiliates and will involve no material cost, we will pursue that measure in lieu of redemption. We may not deliver a notice of redemption earlier than 90 days before the earliest date on which ANZ New Zealand or ANZNIL would be obligated to pay any additional amounts (if a payment in respect of a Note was due on this date), and we may only deliver a notice of redemption if our obligation to pay additional amounts remains in effect.

"**Tax Event**" means that there has been an amendment to or change in the laws or regulations of a relevant jurisdiction, or any amendment to or change in an official interpretation or application of such laws or regulations, which amendment or change is effective on or after the issue date of the relevant Notes or, in the event the relevant Issuer of the Notes has merged, consolidated or sold substantially all of its assets after such date, the most recent date of such merger, consolidation or asset sale, following which any payment on a Tranche (or, in the case of the ANZNIL Notes, any payment on the Guarantee) is, or will be, subject to withholding or deduction in respect of any taxes, assessments or other governmental charges that did not apply prior to such amendment, change, proposed change, decision, pronouncement or action, and such obligation could not be avoided by the use of reasonable measures available to the relevant Issuer (or, in the case of the ANZNIL Notes, the Guarantor).

If we redeem Notes in these circumstances, the redemption price of each Note redeemed will be equal to 100% of the principal amount of such Note plus accrued and unpaid interest on such debt security to the date of redemption.

Mergers and similar transactions

We and ANZNIL are generally permitted to merge or consolidate with another corporation or other entity. We and ANZNIL are also permitted to sell our assets substantially as an entirety to another corporation or other entity. However, we or ANZNIL, as applicable, may not take any of these actions unless all the following conditions are met:

- If the successor entity in the transaction is not ANZ New Zealand or ANZNIL, as applicable, the successor entity must be organized as a corporation, partnership or trust and, unless the assumption occurs by operation of law, must expressly assume our obligations under the Notes and the Fiscal Agency Agreement with respect to the Notes. The successor entity may be organized under the laws of New Zealand, the United Kingdom, the United States or any State thereof, the District of Columbia or any other member country of the Organization for Economic Cooperation and Development;
- Immediately after the transaction, no default under the Notes has occurred and is continuing. For this purpose, "default under the Notes" means an Event of Default with respect to the Notes or any event that would be an Event of Default with respect to the Notes if the requirements for giving us default notice and for our default having to continue for a specific period of time were disregarded. We describe these matters below under "— Default, remedies and waiver of default"; and
- In the case of the successor entity, if such entity is not organized and validly existing under the laws of New Zealand or the United Kingdom, such successor entity shall expressly agree:
 - to indemnify each holder of the Notes against any tax, assessment or governmental charge required to be withheld or deducted from any payment to such holder as a consequence of such consolidation, merger, conveyance, transfer or lease; and

- that all payments pursuant to the Notes shall be made without withholding or deduction for, on account of, any tax of whatever nature imposed or levied on behalf of the jurisdiction of organization of such successor entity, or any political subdivision or taxing authority thereof or therein, unless such tax is required by such jurisdiction or any such subdivision or authority to be withheld or deducted, in which case such successor entity will pay such additional amounts in order that the net amounts received by the holders after such withholding or deduction will equal the amount which would have been received in respect of the Notes in the absence of such withholding or deduction, subject to the same exceptions as would apply with respect to the payment by ANZ New Zealand or ANZNIL of additional amounts in respect of the Notes (substituting the jurisdiction of organization of such successor entity for New Zealand or the United Kingdom). For the avoidance of doubt, any amounts to be paid on the Notes by such successor entity will be paid net of any deduction or withholding imposed or required pursuant to Sections 1471 through 1474 of the Code, i.e., the Foreign Account Tax Compliance Act, or FATCA, any current or future regulations or official interpretations thereof, any agreement entered into pursuant to Section 1471(b) of the Code, or any fiscal or regulatory legislation, rules or practices adopted pursuant to any intergovernmental agreement entered into in connection with the implementation of such Sections of the Code, and no additional amounts will be required to be paid on account of any such deduction or withholding.

If the conditions described above are satisfied with respect to the Notes, and we deliver an officer's certificate and an opinion of counsel to that effect, we will not need to obtain the approval of the holders of the Notes in order to merge or consolidate or to sell our assets. Also, these conditions will apply only if we wish to merge or consolidate with another entity or sell our assets substantially as an entirety to another entity. We will not need to satisfy these conditions if we enter into other types of transactions, including any transaction in which we acquire the stock or assets of another entity, any transaction that involves a change of control of ANZ New Zealand or ANZNIL, as applicable, but in which we do not merge or consolidate and any transaction in which we sell less than substantially all of our assets.

Also, if we or ANZNIL merge, consolidate or sell our assets substantially as an entirety and the successor is a non-New Zealand entity, neither we nor any successor would have any obligation to compensate you for any resulting adverse tax consequences relating to the Notes.

Covenant defeasance

We will specify in the relevant Final Terms whether or not the provisions for covenant defeasance described below apply to your Note.

Under current U.S. federal tax law, we can make a deposit and no longer be subject to any covenant or agreement that would otherwise grant you a right to accelerate the maturity of the Notes. This is called covenant defeasance. In that event, you would lose the protection of those restrictive covenants. In order to achieve covenant defeasance for any Notes, the following conditions must be satisfied:

- We must deposit in trust for the benefit of all direct Holders of the Notes a combination of money and U.S. government or U.S. government agency notes or bonds that will generate enough cash, in the written opinion of a nationally recognized firm of independent public accountants to make interest, principal and any other payments on the Notes on their various due dates.
- We must deliver to the defeasance trustee, who may be the Fiscal Agent, a legal opinion of counsel confirming that under current U.S. federal income tax law we may make the above deposit without causing the Holders of Notes to be taxed on the Notes any differently than if we did not make the deposit and just repaid the Notes ourselves.

No Event of Default or event which with notice or lapse of time or both would become an Event of Default shall have occurred and be continuing on the date the deposit in trust described above is made.

The covenant defeasance must not result in a breach or violation of, or constitute a default under, any other agreement or instrument to which we are a party or by which we are bound.

The covenant defeasance must not result in the trust described above constituting an investment company as defined in the Investment Company Act of 1940, as amended, or the trust must be qualified under that Act or exempt from regulation thereunder.

We must deliver to the defeasance trustee a certificate to the effect that the Notes, if then listed on the London Stock Exchange, will not be delisted as a result of the deposit in trust described above.

We must deliver to the Fiscal Agent and the defeasance trustee a certificate and an opinion of counsel, each stating that all the conditions described above have been satisfied.

If we accomplish covenant defeasance on your Note, you can still look to us for repayment of your Note in the event of any shortfall in the trust deposit. You should note, however, that if one of the remaining events of default occurred, such as our bankruptcy, and your Note became immediately due and payable, there may be a shortfall. Depending on the event causing the default, you may not be able to obtain payment of the shortfall.

Default, remedies and waiver of default

You will have special rights if an Event of Default with respect to your Note occurs and is continuing, as described in this subsection.

Events of Default

When we refer to an Event of Default with respect to the Notes, we mean any of the following:

- We do not pay the principal or any premium on any Note on the due date;
- We do not pay interest on any Note within 30 days after the due date;
- We remain in breach of any covenant we make for the benefit of the relevant Notes, for 60 days after we receive written notice of default stating that we are in breach and requiring us to remedy the breach. The notice must be sent by the Fiscal Agent or the holders of at least 10% in principal amount of the Notes; or
- In the case of ANZ NZ Notes, ANZ New Zealand or, in the case of ANZNIL Notes, either ANZNIL or ANZ New Zealand file for bankruptcy or other events of bankruptcy, insolvency or reorganization relating to either ANZ New Zealand or ANZNIL, as applicable, occur.

Remedies if an Event of Default occurs

If an Event of Default has occurred with respect to any Note and has not been cured or waived, the Holder of the Note may, at its option, by written notice to the relevant Issuer and the Fiscal Agent, and, in the case of ANZNIL Notes, to ANZ New Zealand, declare the principal of that Note to be due and payable immediately.

Waiver of default

The holders of not less than 50% in principal amount of the Notes may waive a default for all Notes. If this happens, the default will be treated as if it has not occurred. No one can waive a payment default on your Note, however, without the approval of the particular Holder of that Note.

Book-entry and other indirect owners should consult their banks or brokers for information on how to give notice or direction to or make a request of the Fiscal Agent and how to declare or cancel an acceleration of the maturity. Book-entry and other indirect owners are described below under "Legal Ownership and Book-Entry Issuance".

Modification of the Fiscal Agency Agreement and waiver of covenants

There are three types of changes we can make to the Fiscal Agency Agreement and the Notes, and these changes may have U.S. federal tax consequences for Holders.

Changes requiring each Holder's approval

First, there are changes that cannot be made without the written consent or the affirmative vote or approval of each Holder affected by the change. Here is a list of those types of changes:

- change the due date for the payment of principal of, or premium, if any, or any installment of interest on any Note;
- reduce the principal amount of any Note, the portion of any principal amount that is payable upon acceleration of the maturity of the Note, the interest rate or any premium payable upon redemption;
- change the currency of any payment on a Note;
- change our obligation to pay additional amounts;
- shorten the period during which redemption of the Notes is not permitted or permit redemption during a period not previously permitted;

- change the place of payment on a Note;
- reduce the percentage of principal amount of the Notes outstanding necessary to modify, amend or supplement the Fiscal Agency Agreement or the Notes or to waive past defaults or future compliance;
- reduce the percentage of principal amount of the Notes outstanding required to adopt a resolution or the required quorum at any meeting of Holders of Notes at which a resolution is adopted; or
- change any provision in a Note with respect to redemption at the Holders' option in any manner adverse to the interests of any Holder of the Notes.

Changes not requiring approval

The second type of change does not require any approval by Holders. These changes are limited to curing any ambiguity or curing, correcting or supplementing any defective provision, or modifying the Fiscal Agency Agreement, the Guarantee or the Notes in any manner determined by us and the Fiscal Agent to be consistent with the Notes and the Guarantee and not adverse to the interest of any Holder.

Changes requiring majority approval

Any other change to the Fiscal Agency Agreement and the Notes would require the following approval:

- The written consent of the Holders of at least 50% of the aggregate principal amount of the Notes at the time outstanding; or
- The adoption of a resolution at a meeting at which a quorum of Holders is present by 50% of the aggregate principal amount of the Notes then outstanding represented at the meeting.

The same 50% approval would be required for us to obtain a waiver of any of our covenants in the Fiscal Agency Agreement. Our covenants include the promises we make about merging, which we describe above under “— Mergers and similar transactions”. If the Holders approve a waiver of a covenant, we will not have to comply with it.

The quorum at any meeting called to adopt a resolution will be persons holding or representing a majority in aggregate principal amount of the Notes at the time outstanding and, at any reconvened meeting adjourned for lack of a quorum, 25% of the aggregate principal amount of the Notes outstanding. For purposes of determining whether Holders of the aggregate principal amount of Notes required for any action or vote, or for any quorum, have taken the action or vote, or constitute a quorum, the principal amount of any particular Note may differ from its principal amount at stated maturity but will not exceed its stated face amount upon original issuance.

We will be entitled to set any day as a record date for determining which Holders of book-entry Notes are entitled to make, take or give requests, demands, authorizations, directions, notices, consents, waivers or other action, or to vote on actions, authorized or permitted by the Fiscal Agency Agreement. In addition, record dates for any book-entry Note may be set in accordance with procedures established by the Depositary from time to time. Therefore, record dates for book-entry Notes may differ from those for other Notes. Book-entry and other indirect owners should consult their banks or brokers for information on how approval may be granted or denied if we seek to change the Fiscal Agency Agreement or any Notes or request a waiver.

Special rules for action by Holders

When Holders take any action under the Fiscal Agency Agreement, such as giving a notice of default, declaring an acceleration, approving any change or waiver or giving the Fiscal Agent an instruction, we will apply the following rules.

Only outstanding Notes are eligible

Only Holders of outstanding Notes will be eligible to participate in any action by Holders. Also, we will count only outstanding Notes in determining whether the various percentage requirements for taking action have been met. For these purposes, a Note will not be “outstanding”:

- if it has been surrendered for cancellation;
- if we have deposited or set aside, in trust for its Holder, money for its payment or redemption;
- if we have fully defeased it as described above under “— Covenant defeasance”; or

- if we or one of our affiliates, such as ANZBGL, is the owner.

Eligible principal amount of some Notes

In some situations, we may follow special rules in calculating the principal amount of a Note that is to be treated as outstanding for the purposes described above. This may happen, for example, if the principal amount is payable in a non-U.S. dollar currency increases over time or is not to be fixed until the maturity date.

For any Note of the kind described below, we will decide how much principal amount to attribute to the Note as follows:

- For an Original Issue Discount Note, we will use the principal amount that would be due and payable on the action date if the maturity of the Note were accelerated to that date because of a default;
- For a Note whose principal amount is not known, we will use any amount that we indicate in the relevant Final Terms for that Note; or
- For Notes with a principal amount denominated in one or more non-U.S. dollar currencies or currency units, we will use the U.S. dollar equivalent, which we will determine.

Form, exchange and transfer of Notes

If any Notes cease to be issued in registered global form, they will be issued:

- only in fully registered form;
- without interest coupons; and
- unless we indicate otherwise in your Final Terms, in denominations of US\$200,000, or greater (or the equivalent thereof in another currency or composite currency).

Holders may exchange their Notes for Notes of smaller denominations or combine them into fewer Notes of larger denominations, as long as the total principal amount is not changed. You may not exchange your Notes for Notes of a different series or having different terms.

Holders may exchange or transfer their Notes at the office of the Fiscal Agent. They may also replace lost, stolen, destroyed or mutilated Notes at that office. We have appointed the Fiscal Agent to act as our agent for registering Notes in the names of Holders and transferring and replacing Notes. We may appoint another entity to perform these functions or perform them ourselves.

Holders will not be required to pay a service charge to transfer or exchange their Notes, but they may be required to pay for any tax or other governmental charge associated with the exchange or transfer. The transfer or exchange, and any replacement, will be made only if our transfer agent is satisfied with the Holder's proof of legal ownership. The transfer agent may require an indemnity before replacing any Notes.

If we have designated additional transfer agents for your Note, they will be named in your Final Terms. We may appoint additional transfer agents or cancel the appointment of any particular transfer agent. We may also approve a change in the office through which any transfer agent acts.

If any Notes are redeemable and we redeem less than all those Notes, we may block the transfer or exchange of those Notes during the period beginning 15 days before the day we mail the notice of redemption and ending on the day of that mailing, in order to freeze the list of Holders to prepare the mailing. We may also refuse to register transfers of or exchange any Note selected for redemption, except that we will continue to permit transfers and exchanges of the unredeemed portion of any Note being partially redeemed.

If a Note is issued as a Global Note, only the Depository-e.g., DTC, Euroclear and Clearstream, Luxembourg-will be entitled to transfer and exchange the Note as described in this subsection, because the Depository will be the sole Holder of the Note.

Payment mechanics for Notes

Who receives payment?

If interest is due on a Note on an interest payment date, we will pay the interest to the person in whose name the Note is registered at the close of business on the Regular Record Date relating to the interest payment date as described below under "— Payment and record dates for interest". If interest is due at maturity, we will pay

the interest to the person entitled to receive the principal of the Note. If principal or another amount besides interest is due on a Note at maturity, we will pay the amount to the Holder of the Note against surrender of the Note at a proper place of payment or, in the case of a Global Note, in accordance with the applicable policies of the Depository, which will be DTC, Euroclear or Clearstream, Luxembourg.

Payment and record dates for interest

Interest on any Fixed Rate Note will be payable with the frequency specified by your Final Terms on the date or dates set forth in your Final Terms and at maturity. The Regular Record Date relating to an interest payment date for any Fixed Rate Note will also be set forth in your Final Terms. The Regular Record Date relating to an interest payment date for any Floating Rate Note will be the 15th calendar day before that interest payment date. These record dates will apply regardless of whether a particular record date is a "business day", as defined above. For the purpose of determining the Holder at the close of business on a Regular Record Date when business is not being conducted, the close of business will mean 5:00 P.M., New York City time, on that day.

How we will make payments due in U.S. dollars

We will follow the practice described in this subsection when paying amounts due in U.S. dollars. Payments of amounts due in other currencies will be made as described in the next subsection.

Payments on Global Notes. We will make payments on a Global Note in accordance with the applicable policies as in effect from time to time of the Depository, which will be DTC, Euroclear or Clearstream, Luxembourg. Under those policies, we will pay directly to the Depository, or its nominee, and not to any indirect owners who own beneficial interests in the Global Note. An indirect owner's right to receive those payments will be governed by the rules and practices of the Depository and its participants, as described below in the section entitled "Legal Ownership and Book-Entry Issuance-What is a Global Note?"

Payments on non-Global Notes. We will make payments on a Note in non-global, registered form as follows. We will pay interest that is due on an interest payment date by check mailed on the interest payment date to the Holder at his or her address shown on the Fiscal Agent's records as of the close of business on the Regular Record Date. We will make all other payments by check at the Paying Agent described below, against surrender of the Note. All payments by check will be made in next-day funds-*i.e.*, funds that become available on the day after the check is cashed.

Alternatively, if a non-Global Note has a face amount of at least US\$5,000,000 and the Holder asks us to do so, we will pay any amount that becomes due on the Note by wire transfer of immediately available funds to an account at a bank in the City of New York on the due date. To request wire payment, the Holder must give the Paying Agent appropriate wire transfer instructions at least five business days before the requested wire payment is due. In the case of any interest payment due on an interest payment date, the instructions must be given by the person or entity who is the Holder on the relevant Regular Record Date. In the case of any other payment, payment will be made only after the Note is surrendered to the Paying Agent. Any wire instructions, once properly given, will remain in effect unless and until new instructions are given in the manner described above.

Book-entry and other indirect owners should consult their banks or brokers for information on how they will receive payments on their Notes.

How we will make payments due in other currencies

We will follow the practice described in this subsection when paying amounts that are due in a Specified Currency other than U.S. dollars.

Payments on Global Notes. We will make payments on a Global Note in accordance with the applicable policies as in effect from time to time of the Depository, which will be DTC, Euroclear or Clearstream, Luxembourg. DTC will be the Depository for all Notes in global form. We understand that DTC's policies, as currently in effect, are as follows.

If you are an indirect owner of Global Notes denominated in a Specified Currency other than U.S. dollars and if you have the right to elect to receive payments in that other currency and do so elect, you must notify the participant through which your interest in the Global Note is held of your election:

- on or before the applicable Regular Record Date, in the case of a payment of interest; or
- on or before the 16th day before the stated maturity, or any redemption or repayment date, in the case of payment of principal or any premium.

Your participant must, in turn, notify DTC of your election on or before the third DTC business day after that Regular Record Date, in the case of a payment of interest, and on or before the 12th DTC business day before the stated maturity, or on the redemption or repayment date if your Note is redeemed or repaid earlier, in the case of a payment of principal or any premium.

DTC, in turn, will notify the Paying Agent of your election in accordance with DTC's procedures.

If complete instructions are received by the participant and forwarded by the participant to DTC, and by DTC to the Paying Agent, on or before the dates noted above, the Paying Agent, in accordance with DTC's instructions, will make the payments to you or your participant by wire transfer of immediately available funds to an account maintained by the payee with a bank located in the country issuing the Specified Currency or in another jurisdiction acceptable to us and the Paying Agent.

If the foregoing steps are not properly completed, we expect DTC to inform the Paying Agent that payment is to be made in U.S. dollars. In that case, we or our agent will convert the payment to U.S. dollars in the manner described below under "— Conversion to U.S. dollars". We expect that we or our agent will then make the payment in U.S. dollars to DTC, and that DTC in turn will pass it along to its participants.

Book-entry and other indirect owners of a Global Note denominated in a currency other than U.S. dollars should consult their banks or brokers for information on how to request payment in the Specified Currency.

Payments on non-Global Notes. Except as described in the last paragraph under this heading, we will make payments on Notes in non-global form in the applicable Specified Currency. We will make these payments by wire transfer of immediately available funds to any account that is maintained in the applicable Specified Currency at a bank designated by the Holder and is acceptable to us and the Fiscal Agent. To designate an account for wire payment, the Holder must give the Paying Agent appropriate wire instructions at least five business days before the requested wire payment is due. In the case of any interest payment due on an interest payment date, the instructions must be given by the person or entity who is the Holder on the Regular Record Date. In the case of any other payment, the payment will be made only after the Note is surrendered to the Paying Agent. Any instructions, once properly given, will remain in effect unless and until new instructions are properly given in the manner described above.

If a Holder fails to give instructions as described above, we will notify the Holder at the address in the Fiscal Agent's records and will make the payment within five business days after the Holder provides appropriate instructions. Any late payment made in these circumstances will be treated under the Fiscal Agency Agreement as if made on the due date, and no interest will accrue on the late payment from the due date to the date paid.

Although a payment on a Note in non-global form may be due in a Specified Currency other than U.S. dollars, we will make the payment in U.S. dollars if the Holder asks us to do so. To request U.S. dollar payment, the Holder must provide appropriate written notice to the Fiscal Agent at least five business days before the next due date for which payment in U.S. dollars is requested. In the case of any interest payment due on an interest payment date, the request must be made by the person or entity who is the Holder on the Regular Record Date. Any request, once properly made, will remain in effect unless and until revoked by notice properly given in the manner described above.

Book-entry and other indirect owners of a Note with a Specified Currency other than U.S. dollars should contact their banks or brokers for information about how to receive payments in the Specified Currency or in U.S. dollars.

Conversion to U.S. dollars. When we are asked by a Holder to make payments in U.S. dollars of an amount due in another currency, either on a Global Note or a non-Global Note as described above, the exchange rate agent described below will calculate the U.S. dollar amount the Holder receives in the exchange rate agent's discretion. A Holder that requests payment in U.S. dollars will bear all associated currency exchange costs, which will be deducted from the payment.

When the Specified Currency is not available. If we are obligated to make any payment in a Specified Currency other than U.S. dollars, and the Specified Currency or any successor currency is not available to us due to circumstances beyond our control—such as the imposition of exchange controls or a disruption in the currency markets—we will be entitled to satisfy our obligation to make the payment in that Specified Currency by making the payment in U.S. dollars, on the basis of the exchange rate determined by the exchange rate agent described below, in its discretion.

The foregoing will apply to any Note, whether in global or non-global form, and to any payment, including a payment at the maturity date. Any payment made under the circumstances and in a manner described above will not result in a default under any Note or the Fiscal Agency Agreement.

Exchange rate agent. If we issue a Note in a Specified Currency other than U.S. dollars, we will appoint a financial institution to act as the exchange rate agent and will name the institution initially appointed when the

Note is originally issued in the relevant Final Terms. We may select ANZBGL or another of our affiliates to perform this role. We may change the exchange rate agent from time to time after the issue date of the Note without your consent and without notifying you of the change.

All determinations made by the exchange rate agent will be in its sole discretion unless we state in this Offering Memorandum that any determination requires our approval. In the absence of manifest error, those determinations will be conclusive for all purposes and binding on you and us, without any liability on the part of the exchange rate agent.

Additional information about LIBOR

The Financial Conduct Authority (UK), together with the British Bankers' Association (the "BBA"), have taken steps intended to strengthen the oversight of the process to set LIBOR rates. With effect from July 1, 2013, the publication of individual banks' daily borrowing rate submission to LIBOR is delayed for three months. The daily publication of the final LIBOR rates has been continued and was not affected by this change. The BBA also transferred responsibility for LIBOR to ICE Benchmark Administration Limited, a subsidiary of InterContinental Exchange Group, Inc. As the LIBOR administrator, ICE Benchmark Administration Limited is responsible for compiling and distributing the LIBOR rate, as well as providing internal governance and oversight. The transfer of the administration from BBA LIBOR Ltd, a subsidiary of BBA, to ICE Benchmark Administration Limited became effective on February 1, 2014.

Payment when offices are closed

If any payment is due on a Note on a day that is not a business day, we will make the payment on the next day that is a business day. Payments postponed to the next business day in this situation will be treated under the Fiscal Agency Agreement as if they were made on the original due date. Postponement of this kind will not result in a default under any Note or the Fiscal Agency Agreement. However, if any interest payment date, other than the one that falls on the maturity date for a EURIBOR Note or a LIBOR Note would otherwise fall on a day that is not a business day and the next business day falls in the next calendar month, then the interest payment date will be advanced to the next preceding day that is a business day. The term business day has a special meaning, which we describe above under "— Interest rates — Floating Rate Notes — Special rate calculation terms".

Paying Agents

We may appoint one or more financial institutions to act as our paying agents, at whose designated offices Notes in non-global entry form may be surrendered for payment at their maturity. We call each of those offices a "Paying Agent". We may add, replace or terminate Paying Agents from time to time; provided that at all times there will be a Paying Agent in the Borough of Manhattan, The City of New York. We may also choose to act as our own Paying Agent. Initially, we have appointed the Fiscal Agent, at its corporate trust office in New York City, as the Paying Agent. In addition, for so long as any Notes are listed on the Official List and admitted to trading on the London Stock Exchange's Regulated Market, we will maintain a Paying Agent with offices in the City of London, which we refer to as the "London Paying Agent". We have initially appointed the Fiscal Agent, at its corporate trust office in the City of London, as the London Paying Agent. We must notify the Fiscal Agent of changes in the Paying Agents.

Unclaimed payments

Regardless of who acts as Paying Agent, all money paid by us to a Paying Agent that remains unclaimed at the end of two years after the amount is due to a Holder will be repaid to us. After that two-year period, the Holder may look only to us for payment and not to the Fiscal Agent, any other Paying Agent or anyone else.

Notices

Notices to be given to Holders of a Global Note will be given only to the Depositary, in accordance with its applicable policies as in effect from time to time. Notices to be given to Holders of Notes not in global form will be sent by mail to the respective addresses of the Holders as they appear in the Fiscal Agent's records, and will be deemed given when mailed. Neither the failure to give any notice to a particular Holder, nor any defect in a notice given to a particular Holder, will affect the sufficiency of any notice given to another Holder. Book-entry and other indirect owners should consult their banks or brokers for information on how they will receive notices.

Our relationship with the Fiscal Agent

The Bank of New York Mellon is initially serving as the Fiscal Agent for the Notes issued under the Fiscal Agency Agreement. The Bank of New York Mellon has provided commercial banking and other services for us and our affiliates in the past and may do so in the future. Among other things, The Bank of New York Mellon serves as trustee or agent with regard to other debt obligations of ANZBGL.

Prescription

There are no time limits affecting the validity of claims to interest and repayment of principal under the Notes.

Governing law

The Notes, the Guarantee and the Fiscal Agency Agreement are governed by, and construed in accordance with, the laws of the State of New York without reference to the State of New York principles regarding conflicts of laws, except that all matters governing authorization and execution of the Notes, the Guarantee and the Fiscal Agency Agreement by ANZ New Zealand or ANZNIL are governed by the laws of New Zealand. We have appointed Australia and New Zealand Banking Group Limited with its offices at 1177 Avenue of the Americas, New York, New York, 10036, United States, as our agent for service of process in The City of New York in connection with any action arising out of the sale of the Notes, the Guarantee or enforcement of the terms of the Fiscal Agency Agreement.

Legal Ownership and Book-Entry Issuance

In this section, we describe special considerations that will apply to Notes issued in global-i.e., book-entry-form. First we describe the difference between legal ownership and indirect ownership of Notes. Then we describe special provisions that apply to Global Notes.

Who is the legal owner of a registered Note?

Each Note in registered form will be represented either by a certificate issued in definitive form to a particular investor or by one or more global securities representing the entire issuance of Notes. We refer to those who have Notes registered in their own names, on the books that we or the Fiscal Agent or other agent maintain for this purpose, as the “Holders” of those Notes. These persons are the legal Holders of the Notes. We refer to those who, indirectly through others, own beneficial interests in Notes that are not registered in their own names as indirect owners of those Notes. As we discuss below, indirect owners are not legal Holders, and investors in Notes issued in book-entry form or in street name will be indirect owners.

Book-entry owners

We will issue each Note in book-entry form only. This means that Notes will be represented by one or more Global Notes registered in the name of a financial institution that holds them as Depositary on behalf of other financial institutions that participate in the Depositary’s book-entry system. These participating institutions, in turn, hold beneficial interests in the Notes on behalf of themselves or their customers.

Under the Fiscal Agency Agreement, only the person in whose name a Note is registered is recognized as the Holder. Consequently, for Notes issued in global form, we will recognize only the Depositary as the Holder and we will make all payments on the Notes, including deliveries of any property other than cash, to the Depositary. The Depositary passes along the payments it receives to its participants, which, in turn, pass the payments along to their customers who are the beneficial owners. The Depositary and its participants do so under agreements they have made with one another or with their customers; they are not obligated to do so under the terms of the Notes.

As a result, investors will not own Notes directly. Instead, they will own beneficial interests in a Global Note, through a bank, broker or other financial institution that participates in the Depositary’s book-entry system or holds an interest through a participant. As long as the Notes are issued in global form, investors will be indirect owners, and not Holders, of the Notes.

Street name owners

In the future, we may terminate a Global Note or issue Notes initially in non-global form. In these cases, investors may choose to hold their Notes in their own names or in street name. Notes held by an investor in street name would be registered in the name of a bank, broker or other financial institution that the investor chooses, and the investor would hold only a beneficial interest in those Notes through an account he or she maintains at that institution.

For Notes held in street name, we will recognize only the intermediary banks, brokers and other financial institutions in whose names the Notes are registered as the Holders and we will make all payments on those Notes, including deliveries of any property other than cash, to them. These institutions pass along the payments they receive to their customers who are the beneficial owners, but only because they agree to do so in their customer agreements or because they are legally required to do so, not because they are obligated to do so under the terms of the Notes. Investors who hold Notes in street name will be indirect owners, not Holders, of those Notes.

Legal Holders

Our obligations, as well as the obligations of the Fiscal Agent under the Fiscal Agency Agreement and the obligations, if any, of any third parties employed by us or any other agent, run only to the Holders of the Notes. We do not have obligations to investors who hold beneficial interests in Global Notes, in street name or by any other indirect means. This will be the case whether an investor chooses to be an indirect owner of a Note or has no choice because we are issuing the Notes only in global form.

For example, once we make a payment or give a notice to the Holder, we have no further responsibility for that payment or notice even if that Holder is required, under agreements with Depositary participants or customers or by law, to pass it along to the indirect owners but does not do so. Similarly, if we want to obtain the approval of the Holders for any purpose—*e.g.*, to amend the Fiscal Agency Agreement or to relieve us of the consequences of a default or of our obligation to comply with a particular provision of the Fiscal Agency Agreement—we would seek the approval only from the Holders, and not the indirect owners, of the relevant Notes. Whether and how the Holders contact the indirect owners is up to the Holders.

When we refer to “you” in this Offering Memorandum, we mean those who invest in the Notes being offered by this Offering Memorandum, whether they are the Holders or only indirect owners of those Notes. When we refer to “your Notes” in this Offering Memorandum, we mean the Notes in which you will hold a direct or indirect interest.

Special considerations for indirect owners

If you hold Notes through a bank, broker or other financial institution, either in book-entry form or in street name, you should check with your own institution to find out:

- how it handles securities payments and notices;
- whether it imposes fees or charges;
- whether and how you can instruct it to exercise any rights to purchase or sell Notes or to exchange or convert a Note for or into other property;
- how it would handle a request for the Holders’ consent, if ever required;
- whether and how you can instruct it to send you Notes registered in your own name so you can be a Holder, if that is permitted in the future;
- how it would exercise rights under the Notes if there were a default or other event triggering the need for Holders to act to protect their interests; and
- if the Notes are in book-entry form, how the Depository’s rules and procedures will affect these matters.

What is a Global Note?

We will issue each Note in book-entry form only. Each Note issued in book-entry form will be represented by a Global Note that we deposit with and register in the name of one or more financial institutions or clearing systems, or their nominees, which we select. A financial institution or clearing system that we select for any Note for this purpose is called the “Depository” for that Note. A Note will usually have only one Depository but it may have more.

A Global Note may represent one or any other number of individual Notes. Generally, all Notes represented by the same Global Note will have the same terms. A Global Note may not be transferred to or registered in the name of anyone other than the Depository or its nominee or a successor to the Depository or its nominee, unless special termination situations arise. We describe those situations below under “—Holder’s option to obtain a non-Global Note; special situations when a Global Note will be terminated”. As a result of these arrangements, the Depository, or its nominee, will be the sole registered owner and Holder of all Notes represented by a Global Note, and investors will be permitted to own only indirect interests in a Global Note. Indirect interests must be held by means of an account with a broker, bank or other financial institution that, in turn, has an account with the Depository or with another institution that does. Thus, an investor whose Note is represented by a Global Note will not be a Holder, but only an indirect owner of an interest in the Global Note.

If the relevant Final Terms indicate that the Note will be issued in global form only, then the Note will be represented by a Global Note at all times unless and until the Global Note is terminated. We describe the situations in which this can occur below under “—Holder’s option to obtain a non-Global Note; special situations when a Global Note will be terminated”. If termination occurs, we may issue the Notes through another book-entry clearing system or decide that the Notes may no longer be held through any book-entry clearing system.

Special considerations for Global Notes

As an indirect owner, an investor’s rights relating to a Global Note will be governed by the account rules of the Depository and those of the investor’s financial institution or other intermediary through which it holds its interest (*e.g.*, Euroclear or Clearstream, Luxembourg, if DTC is the Depository), as well as general laws relating to securities transfers. We do not recognize this type of investor or any intermediary as a Holder and instead deal only with the Depository that holds the Global Note.

If Notes are issued only in the form of a Global Note, an investor should be aware of the following:

- An investor cannot cause the Notes to be registered in his or her own name, and cannot obtain non-global certificates for his or her interest in the Notes, except in the special situations we describe below;

- An investor will be an indirect holder and must look to his or her own bank or broker for payments on the Notes and protection of his or her legal rights relating to the Notes, as we describe above under “—Who is the legal owner of a registered Note?”;
- An investor may not be able to sell interests in the Notes to some insurance companies and other institutions that are required by law to own their securities in non-book-entry form;
- An investor may not be able to pledge his or her interest in a Global Note in circumstances where certificates representing the Notes must be delivered to the lender or other beneficiary of the pledge in order for the pledge to be effective;
- The Depository’s policies will govern payments, deliveries, transfers, exchanges, notices and other matters relating to an investor’s interest in a Global Note, and those policies may change from time to time. We and the Fiscal Agent will have no responsibility for any aspect of the Depository’s policies, actions or records of ownership interests in a Global Note. We and the Fiscal Agent also do not supervise the Depository in any way;
- The Depository will require that those who purchase and sell interests in a Global Note within its book-entry system use immediately available funds and your broker or bank may require you to do so as well; and
- Financial institutions that participate in the Depository’s book-entry system and through which an investor holds its interest in the Global Notes, directly or indirectly, may also have their own policies affecting payments, deliveries, transfers, exchanges, notices and other matters relating to the Notes, and those policies may change from time to time. For example, if you hold an interest in a Global Note through Euroclear or Clearstream, Luxembourg when DTC is the Depository, Euroclear or Clearstream, Luxembourg, as applicable, will require those who purchase and sell interests in that Global Note through them to use immediately available funds and comply with other policies and procedures, including deadlines for giving instructions as to transactions that are to be effected on a particular day. There may be more than one financial intermediary in the chain of ownership for an investor. We do not monitor and are not responsible for the policies or actions or records of ownership interests of any of those intermediaries.

Delivery and form

Notes issued pursuant to Rule 144A initially will be represented by one or more Global Notes (collectively, the “**Rule 144A Global Notes**”). Notes issued in reliance on Regulation S initially will be represented by one or more Global Notes (collectively, the “**Regulation S Global Notes**”). Upon issuance, the Global Notes will be deposited with the Fiscal Agent as custodian for DTC, in New York, New York, and registered in the name of Cede & Co. (DTC’s partnership nominee) or such other name as may be requested by an authorized representative of DTC, in each case for credit to an account of a direct or indirect participant in DTC as described below. Beneficial interests in the Rule 144A Global Notes may not be exchanged for beneficial interests in the Regulation S Global Notes at any time except in the limited circumstances described below. See “—Exchanges among the Global Notes”.

Except as set forth below, the Global Notes may be transferred, in whole and not in part, only to another nominee of DTC or to a successor of DTC or its nominee. Beneficial interests in the Global Notes may not be exchanged for Notes in the definitive form except in the limited circumstances described below. See “—Holder’s option to obtain a non-Global Note; special situations when a Global Note will be terminated”.

Exchanges among the Global Notes

Beneficial interests in a Rule 144A Global Note may be transferred to a person who takes delivery in the form of an interest in a Regulation S Global Note upon receipt by the Fiscal Agent of a written certificate in the form provided in the Fiscal Agency Agreement that such transfer is being made in accordance with Rule 904 of Regulation S.

Beneficial interests in a Regulation S Global Note may be transferred to a person who takes delivery in the form of an interest in a Rule 144A Global Note upon receipt by the Fiscal Agent of a written certificate in the form provided in the Fiscal Agency Agreement that such transfer is being made in accordance with Rule 144A.

The Notes will be subject to certain restrictions on transfer and will bear a restrictive legend as described under “Notice to Purchasers”. In addition, transfers of beneficial interests in the Global Notes will be subject to the applicable rules and procedures of DTC and its direct or indirect participants (including, if applicable, those of Euroclear and Clearstream, Luxembourg), which may change from time to time.

Holder's option to obtain a non-Global Note; special situations when a Global Note will be terminated

If we issue any of those Notes in book-entry form but we choose to give the beneficial owners of those Notes the right to obtain non-Global Notes, any beneficial owner entitled to obtain non-Global Notes may do so by following the applicable procedures of the Depository, any transfer agent or registrar for that series and that owner's bank, broker or other financial institution through which that owner holds its beneficial interest in the Notes. If you are entitled to request a non-global certificate and wish to do so, you will need to allow sufficient lead time to enable us or our agent to prepare the requested certificate.

In addition, in a few special situations described below, a Global Note will be terminated and interests in it will be exchanged for certificates in non-global form representing the Notes it represented. After that exchange, the choice of whether to hold the Notes directly or in street name will be up to the investor. Investors must consult their own banks or brokers to find out how to have their interests in a Global Note transferred on termination to their own names, so that they will be Holders. We have described the rights of Holders and street name investors above under "—Who is the legal owner of a registered Note?".

The special situations for termination of a Global Note are as follows:

- if the Depository notifies us that it is unwilling, unable or no longer qualified to continue as Depository for that Global Note;
- if we notify the Fiscal Agent that we wish to terminate that Global Note; or
- if an Event of Default has occurred and is continuing with regard to these Notes.

If a Global Note is terminated, only the Depository, and not we or the Fiscal Agent, is responsible for deciding the names of the institutions in whose names the Notes represented by the Global Note will be registered and, therefore, who will be the Holders of those Notes.

Considerations relating to DTC, Euroclear and Clearstream, Luxembourg

DTC. DTC has advised us that it is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code and a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues, and money market instruments (from over 100 countries) that DTC's participants ("**DTC participants**") deposit with DTC. DTC also facilitates the post-trade settlement among DTC participants of sales and other securities transactions in deposited securities through electronic computerized book-entry transfers and pledges between DTC participants' accounts. This eliminates the need for physical movement of securities certificates. DTC participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("**DTCC**"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies and clearing corporations that clear through or maintain a custodial relationship with a DTC participant, either directly or indirectly ("**Indirect DTC participants**"). The DTC rules applicable to DTC's participants are on file with the SEC. More information about DTC can be found at its Internet Web site at www.dtcc.com, a website the contents of which are not incorporated by reference into this Offering Memorandum.

Purchases of Notes under the DTC system must be made by or through Direct Participants, which will receive a credit for those Notes on DTC's records. The ownership interest of each actual purchaser of each Note ("**beneficial owner**") is in turn to be recorded on DTC participants' and Indirect DTC participants' records. Beneficial owners will not receive written confirmation from DTC of their purchase. Beneficial owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the DTC participant or Indirect DTC participant through which the beneficial owner entered into the transaction. Transfers of ownership or other interests in Notes in DTC may be made only through DTC participants. Indirect DTC participants are required to effect transfers through a DTC participant.

DTC has no knowledge of the actual beneficial owners of the Notes. DTC's records reflect only the identity of the DTC participants to whose accounts the Notes are credited, which may or may not be the beneficial owners. DTC participants and Indirect DTC participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications concerning the Notes by DTC to DTC participants, by DTC participants to Indirect DTC participants, and by DTC participants and Indirect DTC participants to beneficial owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

So long as DTC, or its nominee, is a registered owner of the Global Notes, payments of redemption proceeds, distributions, principal and interest on the Notes will be made in immediately available funds to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit DTC participants' accounts, upon DTC's receipt of funds and corresponding detailed information from us or the trustee, on the payment date in accordance with their respective holdings shown on DTC's records. Payments by DTC participants or Indirect DTC participants to beneficial owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name", and will be the responsibility of such DTC participants and Indirect DTC participants and not the responsibility of DTC, the Fiscal Agent or us, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of redemption proceeds, distributions, principal and interest to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of ANZ New Zealand or the Fiscal Agent. Disbursement of payments to DTC participants will be DTC's responsibility, and disbursement of payments to the beneficial owners will be the responsibility of DTC participants and Indirect DTC participants.

Because DTC can only act on behalf of DTC participants, who in turn act on behalf of Indirect DTC participants, and because owners of beneficial interests in the Notes holding through DTC will hold interests in the Notes through DTC participants or Indirect DTC participants, the ability of the owners of beneficial interests to pledge the Notes to persons or entities that do not participate in DTC, or otherwise take actions with respect to the Notes, may be limited.

Ownership of interests in the Notes held by DTC will be shown on, and the transfer of that ownership will be effected only through, records maintained by DTC, the DTC participants and the Indirect DTC participants. The laws of some jurisdictions require that certain persons take physical delivery in definitive form of securities which they own. Consequently, the ability to transfer beneficial interests in the Notes held by DTC is limited to that extent. Euroclear and Clearstream, Luxembourg may hold interests in the Global Notes as DTC Participants.

The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that we believe to be reliable, but we take no responsibility for the accuracy thereof.

Clearstream, Luxembourg. Clearstream, Luxembourg holds securities for its participating organizations ("**Clearstream, Luxembourg participants**") and facilitates the clearance and settlement of securities transactions between Clearstream, Luxembourg participants through electronic book-entry changes in accounts of Clearstream, Luxembourg participants, thereby eliminating the need for physical movement of certificates. Clearstream, Luxembourg provides to Clearstream, Luxembourg participants, among other things, services for safekeeping, administration, clearance and settlement of internationally traded securities and securities lending and borrowing. Clearstream, Luxembourg also interfaces with domestic securities markets in several countries. Clearstream, Luxembourg is registered as a bank in Luxembourg, and as such is subject to regulation by the Commission de Surveillance du Secteur Financier, and the Banque Centrale du Luxembourg which supervise and oversee the activities of Luxembourg banks. Clearstream, Luxembourg participants are world wide financial institutions including underwriters, securities brokers and dealers, banks, trust companies and clearing corporations, and may include the Agents. Indirect access to Clearstream, Luxembourg is available to other institutions that clear through or maintain a custodial relationship with a Clearstream, Luxembourg participant. Clearstream, Luxembourg has established an electronic bridge with Euroclear as the operator of the Euroclear system (the "**Euroclear Operator**") in Brussels to facilitate settlement of trades between Clearstream, Luxembourg and the Euroclear Operator.

Distributions with respect to Notes held beneficially through Clearstream, Luxembourg will be credited to cash accounts of Clearstream, Luxembourg participants in accordance with its rules and procedures, to the extent received by the depository for Clearstream, Luxembourg.

Euroclear. Euroclear holds securities and book-entry interests in securities for participating organizations ("**Euroclear participants**") and facilitates the clearance and settlement of securities transactions between Euroclear participants, and between Euroclear participants and participants of certain other securities intermediaries through electronic book-entry changes in accounts of such participants or other securities intermediaries. Euroclear provides Euroclear participants, among other things, with safekeeping, administration, clearance and settlement, securities lending and borrowing, and related services. Euroclear participants are investment banks, securities brokers and dealers, banks, central banks, supranationals, custodians, investment managers, corporations, trust companies and certain other organizations, and may include the Agents. Non-participants in Euroclear may hold and transfer beneficial interests in a Global Note through accounts with a Euroclear participant or any other securities intermediary that holds a book-entry interest in a Global Note through one or more securities intermediaries standing between such other securities intermediary and Euroclear.

Securities clearance accounts and cash accounts with the Euroclear Operator are governed by the Terms and Conditions Governing Use of Euroclear and the related Operating Procedures of the Euroclear System, and applicable Belgian law (collectively, the "**Terms and Conditions**"). The Terms and Conditions governs transfers of securities and cash within Euroclear, withdrawals of securities and cash from Euroclear, and receipts of payments with respect to securities in Euroclear. All securities in Euroclear are held on a fungible basis without attribution of specific certificates to specific securities clearance accounts. The Euroclear Operator acts under the Terms and Conditions only on behalf of Euroclear participants, and has no record or relationship with persons holding through Euroclear participants.

Distributions with respect to Notes held beneficially through Euroclear will be credited to the cash accounts of Euroclear participants in accordance with the Terms and Conditions, to the extent received by the depositary for Euroclear.

Special payment and timing considerations for transactions in Euroclear and Clearstream, Luxembourg

Payments, deliveries, transfers, exchanges, notices and other matters relating to the Notes made through Euroclear or Clearstream, Luxembourg must comply with the rules and procedures of those systems. Those systems could change their rules and procedures at any time. We have no control over those systems or their participants and we take no responsibility for their activities. Transactions between participants in Euroclear or Clearstream, Luxembourg, on the one hand, and participants in DTC, on the other hand, when DTC is the Depositary, would also be subject to DTC's rules and procedures.

Notes which are accepted for clearance through Euroclear and Clearstream, Luxembourg systems will be allocated a Common Code and an International Securities Identification Number, or ISIN. The Common Code and ISIN will be included in the Final Terms applicable to such Notes.

Investors will be able to make and receive through Euroclear and Clearstream, Luxembourg payments, deliveries, transfers, exchanges, notices and other transactions involving any Notes held through those systems only on days when those systems are open for business. Those systems may not be open for business on days when banks, brokers and other institutions are open for business in the United States.

In addition, because of time-zone differences, U.S. investors who hold their interests in the Notes through these systems and wish to transfer their interests, or to receive or make a payment or delivery or exercise any other right with respect to their interests, on a particular day may find that the transaction will not be effected until the next business day in Luxembourg or Brussels, as applicable. Thus, investors who wish to exercise rights that expire on a particular day may need to act before the expiration date. In addition, investors who hold their interests through both DTC and Euroclear or Clearstream, Luxembourg may need to make special arrangements to finance any purchases or sales of their interests between the U.S. and European clearing systems, and those transactions may settle later than would be the case for transactions within one clearing system.

Considerations Relating to Notes Denominated or Payable in or Linked to a Non-U.S. dollar Currency

If you intend to invest in a non-U.S. dollar Note—*e.g.*, a Note whose principal and/or interest is payable in a currency other than U.S. dollars or that may be settled by delivery of or reference to a non-U.S. dollar currency or property denominated in or otherwise linked to a non-U.S. dollar currency—you should consult your own financial and legal advisors as to the currency risks entailed by your investment. Notes of this kind may not be an appropriate investment for investors who are unsophisticated with respect to non-U.S. dollar currency transactions.

The information in this Offering Memorandum is directed primarily to investors who are U.S. residents. Investors who are not U.S. residents should consult their own financial and legal advisors about currency-related risks particular to their investment.

An investment in a non-U.S. dollar Note involves currency-related risks

An investment in a non-U.S. dollar Note entails significant risks that are not associated with a similar investment in a Note that is payable solely in U.S. dollars and where settlement value is not otherwise based on a non-U.S. dollar currency. These risks include the possibility of significant changes in rates of exchange between the U.S. dollar and the various non-U.S. dollar currencies or composite currencies and the possibility of the imposition or modification of foreign exchange controls or other conditions by either the United States or non-U.S. governments. The existence, magnitude and longevity of these risks generally depend on factors over which we have no control and that cannot be readily foreseen, such as economic events and market expectations the operation of and the identity of persons and entities trading on interbank and interdealer foreign exchange markets in the United States and elsewhere, political, legislative, accounting, tax and other regulatory events and the supply of and demand for the relevant currencies in the global markets. Changes in exchange rates may also affect the amount and character of any payment for purposes of U.S. federal income taxation. See “Taxes — United States federal income taxation” below.

Changes in currency exchange rates can be volatile and unpredictable

Rates of exchange between the U.S. dollar and many other currencies have been highly volatile, and this volatility may continue and perhaps spread to other currencies in the future. Fluctuations in currency exchange rates could adversely affect an investment in a Note denominated in, or whose value is otherwise linked to, a Specified Currency other than U.S. dollars. Depreciation of the Specified Currency against the U.S. dollar could result in a decrease in the U.S. dollar- equivalent value of payments on the Note, including the principal payable at maturity or settlement value payable upon exercise. That, in turn, could cause the market value of the Note to fall. Depreciation of the Specified Currency against the U.S. dollar could result in a loss to the investor on a U.S. dollar basis.

Government policy can adversely affect currency exchange rates and an investment in a non-U.S. dollar Note

Currency exchange rates can either float or be fixed by sovereign governments. From time to time, governments use a variety of techniques, such as intervention by a country’s central bank or imposition of regulatory controls or taxes, to affect the exchange rate of their currencies. Governments may also issue a new currency to replace an existing currency or alter the exchange rate or exchange characteristics by devaluation or revaluation of a currency. Thus, a special risk in purchasing non-U.S. dollar Notes is that their yields or payouts could be significantly and unpredictably affected by governmental actions. Even in the absence of governmental action directly affecting currency exchange rates, political or economic developments in the country issuing the Specified Currency for a non-U.S. dollar Note or elsewhere could lead to significant and sudden changes in the exchange rate between the U.S. dollar and the Specified Currency. These changes could affect the value of the Note as participants in the global currency markets move to buy or sell the Specified Currency or U.S. dollars in reaction to these developments.

Governments have imposed from time to time and may in the future impose exchange controls or other conditions, including taxes, with respect to the exchange or transfer of a Specified Currency that could affect exchange rates as well as the availability of a Specified Currency for a Note at its maturity or on any other payment date. In addition, the ability of a Holder to move currency freely out of the country in which payment in the currency is received or to convert the currency at a freely determined market rate could be limited by governmental actions.

Non-U.S. dollar Notes may permit us to make payments in U.S. dollars or delay payment if we are unable to obtain the Specified Currency

Notes payable in a currency other than U.S. dollars may provide that, if the other currency is subject to convertibility or transferability restrictions, market disruption or other conditions affecting its availability at or about the time when a payment on the Notes comes due because of circumstances beyond our control, we will

be entitled to make the payment in U.S. dollars or delay making the payment. These circumstances could include the imposition of exchange controls or our inability to obtain the other currency because of a disruption in the currency markets. If we made payment in U.S. dollars, the exchange rate we would use would be determined in the manner described above under "Description of the Notes and the Guarantee-Payment mechanics for Notes-How we will make payments due in other currencies-When the Specified Currency is not available". A determination of this kind may be based on limited information and would involve certain discretion on the part of our exchange rate agent. As a result, the value of the payment in U.S. dollars an investor would receive on the payment date may be less than the value of the payment the investor would have received in the other currency if it had been available, or may be zero. In addition, a government may impose extraordinary taxes on transfers of a currency. If that happens, we will be entitled to deduct these taxes from any payment on Notes payable in that currency.

We will not adjust non-U.S. dollar Notes to compensate for changes in currency exchange rates

Except as described above, we will not make any adjustment or change in the terms of a non-U.S. dollar Note in the event of any change in exchange rates for the relevant currency, whether in the event of any devaluation, revaluation or imposition of exchange or other regulatory controls or taxes or in the event of other developments affecting that currency, the U.S. dollar or any other currency. Consequently, investors in non-U.S. dollar Notes will bear the risk that their investment may be adversely affected by these types of events.

In a lawsuit for payment on a non-U.S. dollar Note, an investor may bear currency exchange risk

Our Notes will be governed by New York law. Under Section 27 of the New York Judiciary Law, a state court in the State of New York rendering a judgment on a Note denominated in a currency other than U.S. dollars would be required to render the judgment in the Specified Currency; however, the judgment would be converted into U.S. dollars at the exchange rate prevailing on the date of entry of the judgment. Consequently, in a lawsuit for payment on a Note denominated in a currency other than U.S. dollars, investors would bear currency exchange risk until judgment is entered, which could be a long time.

In courts outside New York, investors may not be able to obtain judgment in a Specified Currency other than U.S. dollars. For example, a judgment for money in an action based on a non-U.S. dollar Note in many other U.S. federal or state courts ordinarily would be enforced in the United States only in U.S. dollars. The date used to determine the rate of conversion of the currency in which any particular Note is denominated into U.S. dollars will depend upon various factors, including which court renders the judgment.

Information about exchange rates may not be indicative of future performance

If we issue a non-U.S. dollar Note, we may include in the relevant Final Terms a currency supplement that provides information about historical exchange rates for the relevant non-U.S. dollar currency or currencies. Any information about exchange rates that we may provide will be furnished as a matter of information only, and you should not regard the information as indicative of the range of, or trends in, fluctuations in currency exchange rates that may occur in the future. That rate will likely differ from the exchange rate used under the terms that apply to a particular Note.

All determinations made by the exchange rate agent will be in its sole discretion. In the absence of manifest error, those determinations will be conclusive for all purposes and binding on you and us, without any liability on the part of the exchange rate agent.

Taxes

The information below summarizes the advice received by the ANZ New Zealand Board of Directors and is applicable to ANZ New Zealand and (except in so far as express reference is made to the treatment of other persons) to persons who are subject to New Zealand taxation, United Kingdom taxation and United States federal taxation and hold Notes as an investment or, for United States federal tax purposes, as capital assets. It is based on current New Zealand, United Kingdom and United States tax law and published practice, which law or practice is subject to subsequent change (potentially with retrospective effect). Certain classes of Holders may be taxed under special rules and are not considered.

United States federal income taxation

This section describes the material United States federal income tax consequences of owning the Notes we are offering. It applies to you only if you acquire Notes in the offering and you hold your Notes as capital assets for tax purposes. This section does not apply to you if you are a member of a class of Holders subject to special rules, such as:

- a dealer in securities or currencies,
- a trader in securities that elects to use a mark-to-market method of accounting for your securities holdings,
- a bank,
- a life insurance company,
- a tax-exempt organization,
- a person that owns Notes that are a hedge or that are hedged against interest rate or currency risks,
- a person that owns Notes as part of a straddle or conversion transaction for tax purposes, or
- A person that purchases or sells Notes as part of a wash sale for tax purposes, or
- a United States Holder (as defined below) whose functional currency for tax purposes is not the U.S. dollar.

This section deals only with Notes that are due to mature 30 years or less from the date on which they are issued. The United States federal income tax consequences of owning Notes that are due to mature more than 30 years from their date of issue will be discussed in the relevant Final Terms. This section is based on the Code, its legislative history, existing and proposed regulations under the Code, published rulings and court decisions, all as currently in effect. These laws are subject to change, possibly on a retroactive basis.

If a partnership holds the Notes, the United States federal income tax treatment of a partner will generally depend on the status of the partner and the tax treatment of the partnership. A partner in a partnership holding the Notes should consult its tax advisor with regard to the United States federal income tax treatment of an investment in the Notes.

The tax consequences of any particular Note depend on its terms, and any particular offering of Notes may have features or terms that cause the U.S. federal income tax treatment of the Notes to differ materially from the discussion below.

Please consult your own tax advisor concerning the consequences of owning these Notes in your particular circumstances under the Code and the laws of any other taxing jurisdiction.
--

United States Holders

This subsection describes the tax consequences to a United States Holder. You are a United States Holder if you are a beneficial owner of a Note and you are:

- a citizen or resident of the United States,
- a domestic corporation (including an entity treated as a domestic corporation for United States federal income tax purposes),
- an estate whose income is subject to United States federal income tax regardless of its source, or

- a trust if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust.

If you are not a United States Holder, this subsection does not apply to you and you should refer to “– United States alien Holders” below.

Payments of interest

Except as described below in the case of interest on a “discount Note” that is not “qualified stated interest”, each as defined below under “– Original issue discount – General”, you will be taxed on any interest on your Note, whether payable in U.S. dollars or a foreign currency, including a composite currency or basket of currencies, as ordinary income at the time you receive the interest or when it accrues, depending on your method of accounting for United States tax purposes.

Interest paid by us on the Notes and original issue discount, if any, accrued with respect to the Notes (as described below under “–Original issue discount”) and any additional amounts paid with respect to withholding tax on the Notes, including withholding tax on payments of such additional amounts (“**additional amounts**”) is income from sources outside the United States subject to the rules regarding the foreign tax credit allowable to a United States Holder. Under the foreign tax credit rules, interest and original issue discount and additional amounts paid with respect to the Notes will, depending on your circumstances, be either “passive category” or “general category” income for purposes of computing the foreign tax credit.

Foreign Currency Notes – Cash basis taxpayers. If you are a taxpayer that uses the cash receipts and disbursements method of accounting for tax purposes and you receive an interest payment that is denominated in, or determined by reference to, a foreign currency, you must recognize income equal to the U.S. dollar value of the interest payment, based on the exchange rate in effect on the date of receipt, regardless of whether you actually convert the payment into U.S. dollars.

Foreign Currency Notes – Accrual basis taxpayers. If you are a taxpayer that uses an accrual method of accounting for tax purposes, you may determine the amount of income that you recognize with respect to an interest payment denominated in, or determined by reference to, a foreign currency by using one of two methods. Under the first method, you will determine the amount of income accrued based on the average exchange rate in effect during the interest accrual period or, with respect to an accrual period that spans two taxable years, that part of the period within the taxable year.

If you elect the second method, you would determine the amount of income accrued on the basis of the exchange rate in effect on the last day of the accrual period, or, in the case of an accrual period that spans two taxable years, the exchange rate in effect on the last day of the part of the period within the taxable year. Additionally, under this second method, if you receive a payment of interest within five business days of the last day of your accrual period or taxable year, you may instead translate the interest accrued into U.S. dollars at the exchange rate in effect on the day that you actually receive the interest payment. If you elect the second method it will apply to all debt instruments that you hold at the beginning of the first taxable year to which the election applies and to all debt instruments that you subsequently acquire. You may not revoke this election without the consent of the IRS.

When you actually receive an interest payment, including a payment attributable to accrued but unpaid interest upon the sale or retirement of your Note, denominated in, or determined by reference to, a foreign currency for which you accrued an amount of income, you will recognize ordinary income or loss measured by the difference, if any, between the exchange rate that you used to accrue interest income and the exchange rate in effect on the date of receipt, regardless of whether you actually convert the payment into U.S. dollars.

Original issue discount

General. If you own a Note, other than a short-term Note with a term of one year or less, it will be treated as a discount Note issued at an original issue discount if the amount by which the Note's stated redemption price at maturity exceeds its issue price is more than a de minimis amount. Generally, a Note's issue price will be the first price at which a substantial amount of Notes included in the issue of which the Note is a part is sold to persons other than bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters, placement agents, or wholesalers. A Note's stated redemption price at maturity is the total of all payments provided by the Note that are not payments of qualified stated interest. Generally, an interest payment on a Note is qualified stated interest if it is one of a series of stated interest payments on a Note that are unconditionally payable at least annually at a single fixed rate, with certain exceptions for lower rates paid during some periods, applied to the outstanding principal amount of the Note. There are special rules for variable rate Notes that are discussed under “–Variable rate notes”.

In general, your Note is not a discount Note if the amount by which its stated redemption price at maturity exceeds its issue price is less than the de minimis amount of ¼ of 1 percent of its stated redemption price at maturity multiplied by the number of complete years to its maturity. Your Note will have de minimis original issue discount if the amount of the excess is less than the de minimis amount. If your Note has de minimis

original issue discount, you must include the de minimis amount in income as stated principal payments are made on the Note, unless you make the election described below under “–Election to treat all interest as original issue discount”. You can determine the includible amount with respect to each such payment by multiplying the total amount of your Note’s de minimis original issue discount by a fraction equal to:

- the amount of the principal payment made

divided by:

- the stated principal amount of the Note.

Generally, if your discount Note matures more than one year from its date of issue, you must include original issue discount, or “OID”, in income before you receive cash attributable to that income. The amount of OID that you must include in income is calculated using a constant-yield method, and generally you will include increasingly greater amounts of OID in income over the life of your Note. More specifically, you can calculate the amount of OID that you must include in income by adding the daily portions of OID with respect to your discount Note for each day during the taxable year or portion of the taxable year that you hold your discount Note. You can determine the daily portion by allocating to each day in any accrual period a pro rata portion of the OID allocable to that accrual period. You may select an accrual period of any length with respect to your discount Note and you may vary the length of each accrual period over the term of your discount Note. However, no accrual period may be longer than one year and each scheduled payment of interest or principal on the discount Note must occur on either the first or final day of an accrual period.

You can determine the amount of OID allocable to an accrual period by:

- multiplying your discount Note’s adjusted issue price at the beginning of the accrual period by your Note’s yield to maturity, and then
- subtracting from this figure the sum of the payments of qualified stated interest on your Note allocable to the accrual period.

You must determine the discount Note’s yield to maturity on the basis of compounding at the close of each accrual period and adjusting for the length of each accrual period. Further, you determine your discount Note’s adjusted issue price at the beginning of any accrual period by:

- adding your discount Note’s issue price and any accrued OID for each prior accrual period, and then
- subtracting any payments previously made on your discount Note that were not qualified stated interest payments.

If an interval between payments of qualified stated interest on your discount Note contains more than one accrual period, then, when you determine the amount of OID allocable to an accrual period, you must allocate the amount of qualified stated interest payable at the end of the interval, including any qualified stated interest that is payable on the first day of the accrual period immediately following the interval, pro rata to each accrual period in the interval based on their relative lengths. In addition, you must increase the adjusted issue price at the beginning of each accrual period in the interval by the amount of any qualified stated interest that has accrued prior to the first day of the accrual period but that is not payable until the end of the interval. You may compute the amount of OID allocable to an initial short accrual period by using any reasonable method if all other accrual periods, other than a final short accrual period, are of equal length.

The amount of OID allocable to the final accrual period is equal to the difference between:

- the amount payable at the maturity of your Note, other than any payment of qualified stated interest, and
- your Note’s adjusted issue price as of the beginning of the final accrual period.

Acquisition premium. If you purchase your Note for an amount that is less than or equal to the sum of all amounts, other than qualified stated interest, payable on your Note after the purchase date but is greater than the amount of your Note’s adjusted issue price, as determined above under “–General”, the excess is acquisition premium. If you do not make the election described below under “–Election to treat all interest as original issue discount”, then you must reduce the daily portions of OID by a fraction equal to:

- the excess of your adjusted basis in the Note immediately after purchase over the adjusted issue price of the Note

divided by:

- the excess of the sum of all amounts payable, other than qualified stated interest, on the Note after the purchase date over the Note's adjusted issue price.

Pre-Issuance accrued interest. An election may be made to decrease the issue price of your Note by the amount of pre-issuance accrued interest if:

- a portion of the initial purchase price of your Note is attributable to pre-issuance accrued interest,
- the first stated interest payment on your Note is to be made within one year of your Note's issue date, and
- the payment will equal or exceed the amount of pre-issuance accrued interest.

If this election is made, a portion of the first stated interest payment will be treated as a return of the excluded pre-issuance accrued interest and not as an amount payable on your Note.

Notes subject to contingencies including optional redemption. Your Note is subject to a contingency if it provides for an alternative payment schedule or schedules applicable upon the occurrence of a contingency or contingencies, other than a remote or incidental contingency, whether such contingency relates to payments of interest or of principal. In such a case, you must determine the yield and maturity of your Note by assuming that the payments will be made according to the payment schedule most likely to occur if:

- the timing and amounts of the payments that comprise each payment schedule are known as of the issue date and
- one of such schedules is significantly more likely than not to occur.

If there is no single payment schedule that is significantly more likely than not to occur, other than because of a mandatory sinking fund, you must include income on your Note in accordance with the general rules that govern contingent payment obligations.

Notwithstanding the general rules for determining yield and maturity, if your Note is subject to contingencies, and either you or we have an unconditional option or options that, if exercised, would require payments to be made on the Note under an alternative payment schedule or schedules, then:

- in the case of an option or options that we may exercise, we will be deemed to exercise or not exercise an option or combination of options in the manner that minimizes the yield on your Note, and
- in the case of an option or options that you may exercise, you will be deemed to exercise or not exercise an option or combination of options in the manner that maximizes the yield on your Note.

If both you and we hold options described in the preceding sentence, those rules will apply to each option in the order in which they may be exercised. You may determine the yield on your Note for the purposes of those calculations by using any date on which your Note may be redeemed or repurchased as the maturity date and the amount payable on the date that you chose in accordance with the terms of your Note as the principal amount payable at maturity.

If a contingency, including the exercise of an option, actually occurs or does not occur contrary to an assumption made according to the above rules then, except to the extent that a portion of your Note is repaid as a result of this change in circumstances and solely to determine the amount and accrual of OID, you must redetermine the yield and maturity of your Note by treating your Note as having been retired and reissued on the date of the change in circumstances for an amount equal to your Note's adjusted issue price on that date.

Election to treat all interest as original issue discount. You may elect to include in gross income all interest that accrues on your Note using the constant-yield method described above under "-General", with the modifications described below. For purposes of this election, interest will include stated interest, OID, de minimis original issue discount, market discount, de minimis market discount and unstated interest, as adjusted by any amortizable bond premium, described below under "-Notes purchased at a premium," or acquisition premium.

If you make this election for your Note, then, when you apply the constant-yield method:

- the issue price of your Note will equal your cost,
- the issue date of your Note will be the date you acquired it, and
- no payments on your Note will be treated as payments of qualified stated interest.

Generally, this election will apply only to the Note for which you make it; however, if the Note has amortizable bond premium, you will be deemed to have made an election to apply amortizable bond premium against interest for all debt instruments with amortizable bond premium, other than debt instruments the interest on which is excludible from gross income, that you hold as of the beginning of the taxable year to which the election applies or any taxable year thereafter. Additionally, if you make this election for a market discount Note, you will be treated as having made the election discussed below under “–Market discount” to include market discount in income currently over the life of all debt instruments having market discount that you acquire on or after the first day of the first taxable year to which the election applies. You may not revoke any election to apply the constant-yield method to all interest on a Note or the deemed elections with respect to amortizable bond premium or market discount Notes without the consent of the IRS.

Variable rate notes. Your Note will be a variable rate note if:

- your Note’s issue price does not exceed the total noncontingent principal payments by more than the lesser of:
 1. .015 multiplied by the product of the total noncontingent principal payments and the number of complete years to maturity from the issue date, or
 2. 15 percent of the total noncontingent principal payments; and
- your Note provides for stated interest, compounded or paid at least annually, only at:
 1. one or more qualified floating rates,
 2. a single fixed rate and one or more qualified floating rates,
 3. a single objective rate, or
 4. a single fixed rate and a single objective rate that is a qualified inverse floating rate.

Your Note will have a variable rate that is a qualified floating rate if:

- variations in the value of the rate can reasonably be expected to measure contemporaneous variations in the cost of newly borrowed funds in the currency in which your Note is denominated; or
- the rate is equal to such a rate multiplied by either:
 1. a fixed multiple that is greater than 0.65 but not more than 1.35 or
 2. a fixed multiple greater than 0.65 but not more than 1.35, increased or decreased by a fixed rate; and
- the value of the rate on any date during the term of your Note is set no earlier than three months prior to the first day on which that value is in effect and no later than one year following that first day.

If your Note provides for two or more qualified floating rates that are within 0.25 percentage points of each other on the issue date or can reasonably be expected to have approximately the same values throughout the term of the Note, the qualified floating rates together constitute a single qualified floating rate.

Your Note will not have a qualified floating rate, however, if the rate is subject to certain restrictions (including caps, floors, governors, or other similar restrictions) unless such restrictions are fixed throughout the term of the Note or are not reasonably expected to significantly affect the yield on the Note.

Your Note will have a variable rate that is a single objective rate if:

- the rate is not a qualified floating rate,
- the rate is determined using a single, fixed formula that is based on objective financial or economic information that is not within the control of or unique to the circumstances of the issuer or a related party, and
- the value of the rate on any date during the term of your Note is set no earlier than three months prior to the first day on which that value is in effect and no later than one year following that first day.

Your Note will not have a variable rate that is an objective rate, however, if it is reasonably expected that the average value of the rate during the first half of your Note's term will be either significantly less than or significantly greater than the average value of the rate during the final half of your Note's term.

An objective rate as described above is a qualified inverse floating rate if:

- the rate is equal to a fixed rate minus a qualified floating rate and
- the variations in the rate can reasonably be expected to inversely reflect contemporaneous variations in the cost of newly borrowed funds.

Your Note will also have a single qualified floating rate or an objective rate if interest on your Note is stated at a fixed rate for an initial period of one year or less followed by either a qualified floating rate or an objective rate for a subsequent period, and either:

- the fixed rate and the qualified floating rate or objective rate have values on the issue date of the Note that do not differ by more than 0.25 percentage points or
- the value of the qualified floating rate or objective rate is intended to approximate the fixed rate.

Commercial Paper Rate Notes, Prime Rate Notes, LIBOR Notes, EURIBOR Notes, Treasury Rate Notes, CMT Rate Notes, CD Rate Notes, Federal Funds Rate Notes, Eleventh District Cost of Funds Rate Notes, New Zealand Bank Bill Rate Notes and Australian Bank Bill Rate Notes generally will be treated as variable rate Notes under these rules.

In general, if your variable rate Note provides for stated interest at a single qualified floating rate or objective rate, or one of those rates after a single fixed rate for an initial period, all stated interest on your Note is qualified stated interest. In this case, the amount of OID, if any, is determined by using, in the case of a qualified floating rate or qualified inverse floating rate, the value as of the issue date of the qualified floating rate or qualified inverse floating rate, or, for any other objective rate, a fixed rate that reflects the yield reasonably expected for your Note.

If your variable rate Note does not provide for stated interest at a single qualified floating rate or a single objective rate, and also does not provide for interest payable at a fixed rate other than a single fixed rate for an initial period of one year or less that meets one of the two requirements described above, you generally must determine the interest and OID accruals on your Note by:

- determining a fixed rate substitute for each variable rate provided under your variable rate Note,
- constructing the equivalent fixed rate debt instrument, using the fixed rate substitute described above,
- determining the amount of qualified stated interest and OID with respect to the equivalent fixed rate debt instrument, and
- adjusting for actual variable rates during the applicable accrual period.

When you determine the fixed rate substitute for each variable rate provided under the variable rate Note, you generally will use the value of each variable rate as of the issue date or, for an objective rate that is not a qualified inverse floating rate, a rate that reflects the reasonably expected yield on your Note.

If your variable rate Note provides for stated interest either at one or more qualified floating rates or at a qualified inverse floating rate, and also provides for stated interest at a single fixed rate other than at a single fixed rate for an initial period of one year or less that meets one of the two requirements described above, you generally must determine interest and OID accruals by using the method described in the previous paragraph. However, your variable rate Note will be treated, for purposes of the first three steps of the determination, as if your Note had provided for a qualified floating rate, or a qualified inverse floating rate, rather than the fixed rate. The qualified floating rate, or qualified inverse floating rate, that replaces the fixed rate must be such that the fair market value of your variable rate Note as of the issue date approximates the fair market value of an otherwise identical debt instrument that provides for the qualified floating rate, or qualified inverse floating rate, rather than the fixed rate.

Short-term Notes. In general, if you are an individual or other cash basis United States Holder of a short-term Note (*i.e.*, a Note with a maturity of one year or less), you are not required to accrue OID, as specially defined below for the purposes of this paragraph, for United States federal income tax purposes unless you elect to do so (although it is possible that you may be required to include any stated interest in income as you receive it). If you are an accrual basis taxpayer, a taxpayer in a special class, including, but not limited to, a regulated investment company, common trust fund, or a certain type of pass-through entity, or a cash basis taxpayer

who so elects, you will be required to accrue OID on short-term Notes on either a straight-line basis or under the constant-yield method, based on daily compounding. If you are not required and do not elect to include OID in income currently, any gain you realize on the sale or retirement of your short-term Note will be ordinary income to the extent of the accrued OID, which will be determined on a straight-line basis unless you make an election to accrue the OID under the constant-yield method, through the date of sale or retirement. However, if you are not required and do not elect to accrue OID on your short-term Notes, you will be required to defer deductions for interest on borrowings allocable to your short-term Notes in an amount not exceeding the deferred income until the deferred income is realized.

When you determine the amount of OID subject to these rules, you must include all interest payments on your short-term Note, including stated interest, in your short-term Note's stated redemption price at maturity.

Foreign currency discount Notes. If your discount Note is denominated in, or determined by reference to, a foreign currency, you must determine OID for any accrual period on your discount Note in the foreign currency and then translate the amount of OID into U.S. dollars in the same manner as stated interest accrued by an accrual basis United States Holder, as described under “–United States Holders-Payments of interest”. You may recognize ordinary income or loss when you receive an amount attributable to OID in connection with a payment of interest or the sale or retirement of your Note.

Market discount

You will be treated as if you purchased your Note, other than a short-term Note, at a market discount, and your Note will be a market discount Note if:

- you purchase your Note for less than its issue price as determined above under “– Original issue discount – General” and
- the difference between the Note's stated redemption price at maturity or, in the case of a discount Note, the Note's revised issue price, and the price you paid for your Note is equal to or greater than 1/4 of 1 percent of your Note's stated redemption price at maturity or revised issue price, respectively, multiplied by the number of complete years to the Note's maturity. To determine the revised issue price of your Note for these purposes, you generally add any OID that has accrued on your Note to its issue price.

If your Note's stated redemption price at maturity or, in the case of a discount Note, its revised issue price, exceeds the price you paid for the Note by less than 1/4 of 1 percent multiplied by the number of complete years to the Note's maturity, the excess constitutes de minimis market discount, and the rules discussed below are not applicable to you.

You must treat any gain you recognize on the maturity or disposition of your market discount Note as ordinary income to the extent of the accrued market discount on your Note. Alternatively, you may elect to include market discount in income currently over the life of your Note. If you make this election, it will apply to all debt instruments with market discount that you acquire on or after the first day of the first taxable year to which the election applies. You may not revoke this election without the consent of the IRS. If you own a market discount Note and do not make this election, you will generally be required to defer deductions for interest on borrowings allocable to your Note in an amount not exceeding the accrued market discount on your Note until the maturity or disposition of your Note.

You will accrue market discount on your market discount Note on a straight-line basis unless you elect to accrue market discount using a constant-yield method. If you make this election, it will apply only to the Note with respect to which it is made and you may not revoke it.

Notes purchased at a premium

If you purchase your Note for an amount in excess of its principal amount, you may elect to treat the excess as amortizable bond premium. If you make this election, you will reduce the amount required to be included in your income each year with respect to interest on your Note by the amount of amortizable bond premium allocable to that year, based on your Note's yield to maturity. If your Note is denominated in, or determined by reference to, a foreign currency, you will compute your amortizable bond premium in units of the foreign currency and your amortizable bond premium will reduce your interest income in units of the foreign currency. Gain or loss recognized that is attributable to changes in exchange rates between the time your amortized bond premium offsets interest income and the time of the acquisition of your Note is generally taxable as ordinary income or loss. If you make an election to amortize bond premium, it will apply to all debt instruments, other than debt instruments the interest on which is excludible from gross income, that you hold at the beginning of the first taxable year to which the election applies or that you thereafter acquire, and you may not revoke it without the consent of the IRS. See also “– Original issue discount – Election to treat all interest as original issue discount”.

Purchase, sale and retirement of the Notes

Your tax basis in your Note will generally be the U.S. dollar cost, as defined below, of your Note, adjusted by:

- adding any OID or market discount previously included in income with respect to your Note, and then
- subtracting any payments on your Note that are not qualified stated interest payments and any amortizable bond premium applied to reduce interest on your Note.

If you purchase your Note with foreign currency, the U.S. dollar cost of your Note will generally be the U.S. dollar value of the purchase price on the date of purchase. However, if you are a cash basis taxpayer, or an accrual basis taxpayer if you so elect, and your Note is traded on an established securities market, as defined in the applicable Treasury regulations, the U.S. dollar cost of your Note will be the U.S. dollar value of the purchase price on the settlement date of your purchase.

You will generally recognize gain or loss on the sale or retirement of your Note equal to the difference between the amount you realize on the sale or retirement and your tax basis in your Note. If your Note is sold or retired for an amount in foreign currency, the amount you realize will be the U.S. dollar value of such amount on the date the Note is disposed of or retired, except that in the case of a Note that is traded on an established securities market, as defined in the applicable Treasury regulations, a cash basis taxpayer, or an accrual basis taxpayer that so elects, will determine the amount realized based on the U.S. dollar value of the foreign currency on the settlement date of the sale.

You will recognize capital gain or loss when you sell or retire your Note, except to the extent:

- described above under “– Original issue discount-Short-term Notes” or “– Market discount”,
- attributable to accrued but unpaid interest, or
- attributable to changes in exchange rates as described below.

Capital gain of a noncorporate United States Holder is generally taxed at a preferential rate where the Holder has a holding period greater than one year.

You must treat any portion of the gain or loss that you recognize on the sale or retirement of a Note as ordinary income or loss to the extent attributable to changes in exchange rates. However, you will take exchange gain or loss into account only to the extent of the total gain or loss you realize on the transaction.

Exchange of amounts in other than U.S. dollars

If you receive foreign currency as interest on your Note or on the sale or retirement of your Note, your tax basis in the foreign currency will equal its U.S. dollar value when the interest is received or at the time of the sale or retirement. If you purchase foreign currency, you generally will have a tax basis equal to the U.S. dollar value of the foreign currency on the date of your purchase. If you sell or dispose of a foreign currency, including if you use it to purchase Notes or exchange it for U.S. dollars, any gain or loss recognized generally will be ordinary income or loss.

Medicare Tax

A United States Holder that is an individual or estate, or a trust that does not fall into a special class of trusts that is exempt from such tax, is subject to a 3.8% tax on the lesser of (1) the United States Holder’s “net investment income” (or “undistributed net investment income” in the case of an estate or trust) for the relevant taxable year and (2) the excess of the United States Holder’s modified adjusted gross income for the taxable year over a certain threshold (which in the case of individuals is between \$125,000 and \$250,000, depending on the individual’s circumstances). A United States Holder’s net investment income generally includes its interest income and its net gains from the disposition of Notes, unless such interest income or net gains are derived in the ordinary course of the conduct of a trade or business (other than a trade or business that consists of certain passive or trading activities). If you are a United States Holder that is an individual, estate or trust, you are urged to consult your tax advisors regarding the applicability of the Medicare tax to your income and gains in respect of your investment in the Notes.

Contingent Payment Obligations

The relevant Final Terms will discuss any special United States federal income tax rules with respect to Notes that are subject to the rules governing contingent payment obligations.

Treasury Regulations Requiring Disclosure of Reportable Transactions

U.S. Treasury regulations require United States taxpayers to report certain transactions that give rise to a loss in excess of certain thresholds (a "**Reportable Transaction**"). Under these regulations, if the Notes are denominated in a foreign currency, a United States Holder (or a United States alien Holder that holds the Notes in connection with a U.S. trade or business) that recognizes a loss with respect to the Notes that is characterized as an ordinary loss due to changes in currency exchange rates (under any of the rules discussed above) would be required to report the loss on IRS Form 8886 (Reportable Transaction Statement) if the loss exceeds the thresholds set forth in the regulations. For individuals and trusts, this loss threshold is \$50,000 in any single taxable year. For other types of taxpayers and other types of losses, the thresholds are higher. You should consult with your tax advisor regarding any tax filing and reporting obligations that may apply in connection with acquiring, owning and disposing of Notes.

Information with Respect to Foreign Financial Assets

Owners of "specified foreign financial assets" with an aggregate value in excess of \$50,000 (and in some circumstances, a higher threshold) may be required to file an information report with respect to such assets with their tax returns. "Specified foreign financial assets" include any financial accounts maintained by foreign financial institutions, as well as any of the following, but only if they are held for investment and not held in accounts maintained by financial institutions: (i) stocks and securities issued by non-United States persons, (ii) financial instruments and contracts that have non-United States issuers or counterparties, and (iii) interests in foreign entities. Notes should qualify as specified foreign financial assets unless held in accounts maintained by financial institutions. Holders are urged to consult their tax advisors regarding the application of this reporting requirement to their ownership of the Notes.

FATCA Withholding

Certain non-U.S. financial institutions must comply with information reporting requirements or certification requirements in respect of their direct and indirect United States shareholders and/or United States accountholders to avoid becoming subject to withholding on certain payments, either by reporting such information directly to the IRS or, in some cases, such as in the case of New Zealand institutions and branches, by reporting such information to their local revenue authority for it to forward to the IRS. The Issuers and other non-U.S. financial institutions may accordingly be required to report information regarding the Holder of Notes and to withhold on a portion of payments under the Notes to certain Holders that fail to comply with the relevant information reporting requirements (or hold Notes directly or indirectly through certain non-compliant intermediaries). However, such withholding would generally not apply to payments made before January 1, 2017. Moreover, such withholding would only apply to Notes issued at least six months after the date on which final regulations implementing such rules are enacted. Holders are urged to consult their own tax advisors and any banks or brokers through which they will hold Notes as to the consequences (if any) of these rules to them.

United States alien Holders

This subsection describes the tax consequences to a United States alien Holder. You are a United States alien Holder if you are a beneficial owner of a Note and you are, for United States federal income tax purposes:

- a nonresident alien individual,
- a foreign corporation, or
- an estate or trust that in either case is not subject to United States federal income tax on a net income basis on income or gain from a Note.

If you are a United States Holder, this subsection does not apply to you.

Under United States federal income and estate tax law, and subject to the discussion of backup withholding below, if you are a United States alien Holder of a Note, interest on a Note paid to you is exempt from United States federal income tax, including withholding tax, whether or not you are engaged in a trade or business in the United States, unless:

- you are an insurance company carrying on a United States insurance business to which the interest is attributable, within the meaning of the Code, or
- you both
 - have an office or other fixed place of business in the United States to which the interest is attributable and

- derive the interest in the active conduct of a banking, financing or similar business within the United States.

Purchase, sale, retirement and other disposition of the Notes

If you are a United States alien Holder of a Note, you generally will not be subject to United States federal income tax on gain realized on the sale, exchange or retirement of a Note unless:

- the gain is effectively connected with your conduct of a trade or business in the United States or
- you are an individual, you are present in the United States for 183 or more days during the taxable year in which the gain is realized and certain other conditions exist.

For purposes of the United States federal estate tax, the Notes will be treated as situated outside the United States and will not be includible in the gross estate of a Holder who is neither a citizen nor a resident of the United States (as specially defined for United States federal estate tax purposes) at the time of death.

Backup withholding and information reporting

If you are a noncorporate United States Holder, information reporting requirements, on IRS Form 1099, generally will apply to:

- payments of principal and interest on a Note within the United States, including payments made by wire transfer from outside the United States to an account you maintain in the United States, and
- the payment of the proceeds from the sale of a Note effected at a United States office of a broker.

Additionally, backup withholding will apply to such payments if you are a noncorporate United States Holder that:

- fails to provide an accurate taxpayer identification number,
- is notified by the IRS that you have failed to report all interest and dividends required to be shown on your federal income tax returns, or
- in certain circumstances, fails to comply with applicable certification requirements.

If you are a United States alien Holder, you are generally exempt from backup withholding and information reporting requirements with respect to:

- payments of principal and interest made to you outside the United States by the relevant Issuer or another non-United States payor, and
- other payments of principal and interest and the payment of the proceeds from the sale of a Note effected at a United States office of a broker, as long as the income associated with such payments is otherwise exempt from United States federal income tax, and:
 - the payor or broker does not have actual knowledge or reason to know that you are a United States person and you have furnished to the payor or broker:
 - an IRS Form W-8BEN, an IRS Form W-8BEN-E or an acceptable substitute form upon which you certify, under penalties of perjury, that you are a non-United States person, or
 - other documentation upon which it may rely to treat the payments as made to a non-United States person in accordance with U.S. Treasury regulations, or
 - you otherwise establish an exemption.

Payment of the proceeds from the sale of a Note effected at a foreign office of a broker generally will not be subject to information reporting or backup withholding. However, a sale of a Note that is effected at a foreign office of a broker will be subject to information reporting and backup withholding if:

- the proceeds are transferred to an account maintained by you in the United States,

- the payment of proceeds or the confirmation of the sale is mailed to you at a United States address, or
- the sale has some other specified connection with the United States as provided in U.S. Treasury regulations,

unless the broker does not have actual knowledge or reason to know that you are a United States person and the documentation requirements described above are met or you otherwise establish an exemption.

In addition, a sale of a Note effected at a foreign office of a broker will be subject to information reporting if the broker is:

- a United States person,
- a controlled foreign corporation for United States tax purposes,
- a foreign person 50% or more of whose gross income is effectively connected with the conduct of a United States trade or business for a specified three-year period, or
- a foreign partnership, if at any time during its tax year:
 - one or more of its partners are "U.S. persons", as defined in U.S. Treasury regulations, who in the aggregate hold more than 50% of the income or capital interest in the partnership, or
 - such foreign partnership is engaged in the conduct of a United States trade or business,

unless the broker does not have actual knowledge or reason to know that you are a United States person and the documentation requirements described above are met or you otherwise establish an exemption. Backup withholding will apply if the sale is subject to information reporting and the broker has actual knowledge that you are a United States person.

In addition, certain foreign brokers may be required to report the amount of gross proceeds from the sale or other disposition of notes under FATCA if you are, or are presumed to be, a United States person.

Any amount withheld under the backup withholding rules from a payment to you will be allowed as a refund or credit against your United States federal income tax, provided the required information is timely furnished to the IRS.

New Zealand taxation

The following is a summary of the New Zealand withholding tax treatment at the date of this Offering Memorandum in relation to payments of interest in respect of the Notes. The comments do not deal with other New Zealand tax aspects of acquiring, holding or disposing of Notes. The comments are based on current New Zealand tax law and published practice, which law or practice may be subject to subsequent change (potentially with retrospective effect). Each investor contemplating acquiring Notes is advised to consult a professional adviser in connection with the consequences relating to the acquisition, retention and disposition of Notes.

Resident withholding tax

ANZ New Zealand is and ANZNIL may be required by law to deduct New Zealand resident withholding tax from the payment of interest to the Holder of any Note on any interest payment date or the maturity date, and, similarly, ANZ New Zealand is required to make such deductions from payments under the Guarantee to the extent such payments constitute interest for New Zealand tax purposes, where:

- (a) the Holder is a resident of New Zealand for New Zealand income tax purposes or the Holder is engaged in business in New Zealand, through a fixed establishment (as defined in the Income Tax Act 2007) in New Zealand (a "**New Zealand Holder**"); and
- (b) at the time of such payment the New Zealand Holder does not hold a valid certificate of exemption for New Zealand resident withholding tax purposes.

Prior to any interest payment date or the maturity date, any New Zealand Holder:

- (a) must notify ANZ New Zealand or ANZNIL, as the case may be, or a Paying Agent that the New Zealand Holder is the Holder of a Note; and

- (b) must notify ANZ New Zealand or ANZNIL, as the case may be, or a Paying Agent of any circumstances, and provide ANZ New Zealand or ANZNIL, as the case may be, or the relevant Paying Agent with any information that may enable ANZ New Zealand or ANZNIL, as the case may be, to make the payment of interest to the New Zealand Holder without deduction on account of New Zealand resident withholding tax.

The New Zealand Holder must notify ANZ New Zealand or ANZNIL, or a Paying Agent as the case may be, prior to any interest payment date or the maturity date, of any change in the New Zealand Holder's circumstances from those previously notified that could affect ANZ New Zealand's or ANZNIL's, as the case may be, payment or withholding obligations in respect of any Note. By accepting payment of the full face amount of a Note or any interest thereon on any interest payment date or the maturity date, the New Zealand Holder will be deemed to have indemnified ANZ New Zealand or ANZNIL, as the case may be, for all purposes in respect of any liability which ANZ New Zealand or ANZNIL, as the case may be, may incur for not deducting any amount from such payment on account of New Zealand resident withholding tax.

Non-resident withholding tax

To the extent that New Zealand law requires a deduction on account of non-resident withholding tax to be made from the payment of interest, or a payment made under the Guarantee, to any Holder who is not a New Zealand Holder, ANZ New Zealand and ANZNIL intend (for so long as they do not incur any increased cost or detriment from so doing and are legally able to do so) to reduce the applicable rate of non-resident withholding tax to zero percent (in the case of Holders who are not New Zealand Holders and are not associated (as defined in the Income Tax Act 2007) with ANZ New Zealand or ANZNIL, as the case may be) by registering the program with the IRD and paying, on its own account, an approved issuer levy (which is currently equal to 2% of the relevant interest payment or the relevant payment under the Guarantee). It is not possible to use the approved issuer levy regime if the Holder is associated with ANZ New Zealand or ANZNIL, as the case may be.

Other taxes

No ad valorem stamp, issue, registration or similar taxes are payable in New Zealand in connection with the issue of the Notes or the Guarantee. Furthermore, a transfer of or agreement to transfer the Notes or the Guarantee executed outside of New Zealand will not be subject to New Zealand stamp duty.

United Kingdom taxation

The following is a summary of the United Kingdom withholding taxation treatment at the date hereof in relation to payments of principal and interest in respect of the Notes and the United Kingdom stamp duties treatment at the date hereof in relation to the issue and transfer of the Notes and issue of the Guarantee. The comments do not deal with other United Kingdom tax aspects of acquiring, holding or disposing of Notes. The comments relate only to the position of persons who are absolute beneficial owners of the Notes and is based on the current law and practice of Her Majesty's Revenue and Customs ("HMRC"). Prospective Holders should be aware that the particular terms of issue of any series of Notes as specified in the relevant Final Terms may affect the tax treatment of that and other series of Notes. The following is a general guide and should be treated with appropriate caution. Holders who are in any doubt as to their tax position should consult their professional advisers. Holders who may be liable to taxation in jurisdictions other than the United Kingdom in respect of their acquisition, holding or disposal of the Notes are particularly advised to consult their professional advisers as to whether they are so liable (and if so under the laws of which jurisdictions), since the following comments relate only to certain United Kingdom taxation aspects of payments in respect of the Notes. In particular, Holders should be aware that they may be liable to taxation under the laws of other jurisdictions in relation to payments in respect of Notes even if such payments may be made without withholding or deduction for or on account of taxation under the laws of the United Kingdom.

UK withholding tax on UK source interest

Interest on Notes may be paid by the relevant Issuer without withholding or deduction for or on account of United Kingdom income tax except in circumstances where such interest has a United Kingdom source ("**UK Interest**"). Interest on Notes may have a United Kingdom source where, for example, the Notes are issued by an Issuer acting through a branch or permanent establishment in the United Kingdom, the notes are secured on assets situated in the United Kingdom or the interest is paid out of funds maintained in the United Kingdom. Notes which carry a right to UK Interest are referred to in this United Kingdom taxation section as "UK Notes".

UK Notes will constitute "quoted Eurobonds" within the meaning of section 987 of the Income Tax Act 2007 provided they carry a right to interest and are, and continue to be, listed on a recognized stock exchange within the meaning of section 1005 Income Tax Act 2007. HMRC may designate certain exchanges as recognized stock exchanges. The London Stock Exchange is a recognized stock exchange for these purposes. Securities will be treated as listed on a recognized stock exchange only if they are both: (i) admitted to trading on that exchange and (ii) are either included in the official UK list or are listed in a qualifying country outside the UK in accordance with provisions corresponding to those generally applicable in EEA States. Provided that

the UK Notes are and continue to be quoted Eurobonds, payments of interest on the UK Notes may be made without withholding or deduction for or on account of United Kingdom income tax.

In addition to the exemption set out in the preceding paragraph, interest on UK Notes may be paid without withholding or deduction for or on account of United Kingdom income tax if the relevant Issuer is a "bank" for the purposes of section 878 Income Tax Act 2007 and so long as such payments are made by the relevant Issuer in the ordinary course of its business.

In all cases falling outside the exemptions described above, interest on UK Notes may fall to be paid under deduction of United Kingdom income tax at the basic rate (currently 20%) subject to such relief as may be available under the provisions of any applicable double taxation treaty or to any other exemption which may apply.

Payments by Guarantor

If the Guarantor makes any payments in respect of interest on UK Notes (or other amounts due under UK Notes other than the repayment of amounts subscribed for such UK Notes) such payments may be subject to United Kingdom withholding tax at the basic rate (currently 20%) subject to such relief as may be available under the provisions of any applicable double taxation treaty or any other exemption which may apply. Such payment by the Guarantor may not be eligible for all the exemptions described above in "UK withholding tax on UK source interest".

Other rules relating to United Kingdom withholding tax

Where Notes are to be, or may fall to be, redeemed at a premium, as opposed to being issued at a discount, then any such element of premium may constitute a payment of interest for UK tax purposes. Such payments of interest are subject to: (i) United Kingdom withholding tax in the same circumstances and subject to the same exemptions as are outlined above; and (ii) the same reporting requirements as outlined below. In certain cases, a discount could be treated in the same way.

Where interest has been paid under deduction of United Kingdom income tax, Holders who are not resident in the United Kingdom may be able to recover all or part of the tax deducted if there is an appropriate provision in any applicable double taxation treaty.

The references to "interest" in this United Kingdom taxation section mean "interest" as understood in United Kingdom tax law. The statements do not take any account of any different definitions of "interest" or "principal" which may prevail under any other law or which may be created by the terms and conditions of the Notes or any related documentation.

The above description of the United Kingdom withholding tax position assumes that there will be no substitution of an Issuer and does not consider the tax consequences of any such substitution.

UK stamp duties

No UK stamp duty, stamp duty reserve tax or other similar tax is payable in connection with the issue of the Notes or the Guarantee. No requirement to pay UK stamp duty should arise in respect of a document relating to any transfer of the Notes in any case where the document is executed outside, and does not relate to anything to be done within, the United Kingdom. No stamp duty will be payable on a document relating to a transfer of the Notes, and no stamp duty reserve tax will be payable in respect of any agreement to transfer Notes, if the Notes do not carry and have not carried any of the following:

- (a) a conversion right or rights to acquire other shares or securities;
- (b) a right to interest the amount of which exceeds a reasonable commercial return on the nominal amount of the capital;
- (c) a right to interest, the amount of which falls or has fallen to be determined to any extent by reference to results of, or of any part of, a business or to the value of any property; or
- (d) a right on repayment to an amount which exceeds the nominal amount of capital and is not reasonably comparable with what is generally repayable (in respect of a similar nominal amount of capital) under the terms of issue of loan capital listed in the Official List of the London Stock Exchange.

For Notes that do contain or have contained such a term then (assuming that any register relating to the Notes is kept outside the United Kingdom), no stamp duty reserve tax arises on any agreement to transfer such Notes unless the Notes give the Noteholders a right to allotments of or to subscribe for, or an option to acquire, or an interest in (or in dividends or other rights arising out of) stocks, shares or certain types of loan

capital in a company which are: (i) interests in a United Kingdom incorporated company; (ii) which are registered in a register kept in the United Kingdom; or (iii) are shares and are “paired” (as defined in section 99(6B) of the Finance Act 1986) with shares issued by a United Kingdom incorporated company.

Reporting Requirements

HMRC has powers, in certain circumstances, to obtain information about: payments derived from securities (whether income or capital); certain payments of interest (including the amount payable on the redemption of a deeply discounted security); and securities transactions.

The persons from whom HMRC can obtain information include: a person who receives (or is entitled to receive) a payment derived from securities; a person who makes such a payment (received from, or paid on behalf of, another person); a person by or through whom interest is paid or credited; a person who effects or is a party to securities transactions (which includes an issue of securities) on behalf of others; registrars or administrators in respect of securities transactions; and each registered or inscribed holder of securities.

The information HMRC can obtain includes: details of the beneficial owner of securities; details of the person for whom the securities are held, or the person to whom the payment is to be made (and, if more than one, their respective interests); information and documents relating to securities transactions; and, in relation to interest paid or credited on money received or retained in the United Kingdom, the identity of the security under which interest is paid.

HMRC may share certain information with tax authorities in other jurisdictions.

European Union savings directive

Under EC Council Directive 2003/48/EC on the taxation of savings income (the “**Savings Directive**”) each Member State is required to provide to the tax authorities of another Member State details of payments of interest or other similar income (“**Savings Income**”) made by a person within its jurisdiction to, or collected by such a person for, an individual or certain non-corporate entities, resident in that other Member State (interest payments on the Notes will for these purposes be Savings Income). However, for a transitional period, Austria instead applies a withholding system in relation to such payments, deducting tax at 35%. The transitional period is to terminate at the end of the first full fiscal year following agreement by certain non-EU countries to the exchange of information relating to such payments.

A number of non-EU countries, including Switzerland, and certain dependent or associated territories of certain Member States have adopted and implemented similar measures (either provision of information or transitional withholding—a withholding system in the case of Switzerland) in relation to payments of Savings Income made by a person within its jurisdiction to an individual, or to certain non-corporate entities, resident in a Member State.

In addition, Member States have entered into reciprocal arrangements with certain of those non-EU countries and dependent or associated territories of certain Member States in relation to payments of Savings Income made by a person in a Member State to an individual, or to certain non-corporate entities, resident in certain dependent or associated territories or non-EU countries.

Where an individual Holder receives a payment of Savings Income from any Member State or dependent or associated territory employing the withholding arrangement, the individual Holder may be able to elect not to have tax withheld. The formal requirements may vary slightly from jurisdiction to jurisdiction. They generally require the individual Holder to produce certain information (such as his tax number) and consent to details of payments and other information being transmitted to the tax authorities in his home state. Provided that the other Tax Authority receives all of the necessary information the payment will not suffer a withholding under the Savings Directive or the relevant law conforming with the directive in a dependent or associated territory.

On March 24, 2014, the Council of the European Union adopted a directive amending the Savings Directive (the “**Amending Directive**”), amending and broadening the scope of the requirements described above. The Amending Directive requires Member States to apply these new requirements from January 1, 2017, and if they were to take effect, the changes would expand the range of payments covered by the Savings Directive, in particular to include additional types of income payable on securities. The Amending Directive would also apply a “look through approach” to payments made via certain persons, entities or legal arrangements (including trusts and partnerships), where certain conditions are satisfied, where an individual resident in a Member State is regarded as the beneficial owner of the payment for the purposes of the Savings Directive. This approach may in some cases apply where the person, entity or arrangement is established or effectively managed outside of the European Union.

However, the European Commission has proposed the repeal of the Savings Directive no later than 1 January 2017, in the case of Austria and from 1 January 2016, in the case of all other Member States (subject to on-going requirements to fulfill administrative obligations such as the reporting and exchange of information

relating to, and accounting for withholding taxes on, payments made before those dates and to certain other transitional provisions in the case of Austria). This is to prevent overlap between the Savings Directive and a new automatic exchange of information regime to be implemented under EC Council Directive 2011/16/EU on administrative cooperation in the field of taxation (as amended by EC Council Directive 2014/107/EU). The proposal also provides that, if it proceeds, Member States will not be required to apply the new requirements of the Amending Directive.

FATCA developments in the United Kingdom and New Zealand

On September 12, 2012, the governments of the United Kingdom and the United States signed an Agreement to improve International Tax Compliance and to Implement FATCA (the "**UK-US Intergovernmental Agreement**"). On August 6, 2013, HM Treasury made the International Tax Compliance (United States of America) Regulations 2013 (the "**2013 Regulations**") to implement the UK-US Intergovernmental Agreement. These have subsequently been replaced by the International Tax Compliance Regulations 2015 (the "**2015 Regulations**"). The 2015 Regulations may require ANZNIL to supply HMRC with certain information which may then be passed on to the IRS.

On June 12, 2014, New Zealand entered into an intergovernmental agreement for the implementation of FATCA and associated memorandum of understanding with the U.S. (the "**NZ-US Intergovernmental Agreement**"). Under the terms of the NZ-US Intergovernmental Agreement, the Issuers will not be required to enter an agreement with the IRS, but will be required to comply with New Zealand legislation that has been implemented to give effect to the NZ-US Intergovernmental Agreement. In addition, unified market practices regarding FATCA have not yet developed.

General

Neither ANZ New Zealand nor ANZNIL nor any of the Agents makes any comment about the treatment for taxation purposes of payment or receipts in respect of the Notes. Each investor contemplating acquiring Notes is advised to consult a professional adviser in connection with the consequences relating to the acquisition, retention and disposition of Notes.

Employee Retirement Income Security Act

A fiduciary of a pension, profit-sharing or other employee benefit plan (a “**plan**”) subject to the U.S. Employee Retirement Income Security Act of 1974, as amended (“**ERISA**”), should consider the fiduciary standards of ERISA in the context of the plan’s particular circumstances before authorizing an investment in the Notes. Accordingly, among other factors, the fiduciary should consider whether the investment would satisfy the prudence and diversification requirements of ERISA and would be consistent with the documents and instruments governing the plan, and whether the investment would involve a prohibited transaction under Section 406 of ERISA or Section 4975 of the Code.

Section 406 of ERISA and Section 4975 of the Code prohibit plans, as well as individual retirement accounts and Keogh plans subject to Section 4975 of the Code (also “**plans**”), from engaging in certain transactions involving “plan assets” with persons who are “parties in interest” under ERISA or “disqualified persons” under the Code (“**parties in interest**”) with respect to the plan. A violation of these prohibited transaction rules may result in civil penalties or other liabilities under ERISA and/or an excise tax under Section 4975 of the Code for those persons, unless exemptive relief is available under an applicable statutory, regulatory or administrative exemption. Certain employee benefit plans and arrangements including those that are governmental plans (as defined in Section 3(32) of ERISA), certain church plans (as defined in Section 3(33) of ERISA) and foreign plans (as described in Section 4(b)(4) of ERISA) (“**non-ERISA arrangements**”) are not subject to the requirements of ERISA or Section 4975 of the Code but may be subject to similar provisions under applicable federal, state, local, foreign or other regulations, rules or laws (“**similar laws**”).

The acquisition of the Notes by a plan with respect to which we or certain of our affiliates is or becomes a party in interest may constitute or result in a prohibited transaction under ERISA or Section 4975 of the Code, unless those Notes are acquired pursuant to and in accordance with an applicable exemption. Section 408(b)(17) of ERISA and Section 4975(d)(20) of the Code provide an exemption for the purchase and sale of securities where neither ANZ nor any of its affiliates have or exercise any discretionary authority or control or render any investment advice with respect to the assets of the plan involved in the transaction and the plan pays no more and receives no less than “adequate consideration” in connection with the transaction (the “**service provider exemption**”). The U.S. Department of Labor has also issued five prohibited transaction class exemptions, or “**PTCEs**”, that may provide exemptive relief if required for direct or indirect prohibited transactions that may arise from the purchase or holding of the Notes. These exemptions are:

- PTCE 84-14, an exemption for certain transactions determined or effected by independent qualified professional asset managers;
- PTCE 90-1, an exemption for certain transactions involving insurance company pooled separate accounts;
- PTCE 91-38, an exemption for certain transactions involving bank collective investment funds;
- PTCE 95-60, an exemption for transactions involving certain insurance company general accounts; and
- PTCE 96-23, an exemption for plan asset transactions managed by in-house asset managers.

Any purchaser or holder of Notes or any interest therein will be deemed to have represented by its purchase and holding of the Notes that it either (1) is not a plan and is not purchasing those Notes on behalf of or with “plan assets” of any plan or (2) its purchase or holding of Notes, or exercise of any right thereunder will not result in a non-exempt prohibited transaction for purposes of ERISA or the Code. In addition, any purchaser or holder of Notes or any interest therein which is a non-ERISA arrangement will be deemed to have represented by its purchase or holding of the Notes that its purchase and holding will not constitute or result in a non-exempt violation of the provisions of any similar law.

Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is important that fiduciaries or other persons considering purchasing Notes on behalf of or with “plan assets” of any plan or non-ERISA arrangement consult with their counsel regarding the availability of exemptive relief under any of the PTCEs listed above, the service provider exemption or any other applicable exemption, or the potential consequences of any purchase or holding under similar laws, as applicable.

If you are an insurance company or the fiduciary of a pension plan or an employee benefit plan, and propose to invest in Notes, you should consult your legal counsel.

Plan of Distribution

The Notes are being offered on a periodic basis for sale by the Issuers through J.P. Morgan Securities LLC, ANZ Securities, Inc., Barclays Capital Inc., Citigroup Global Markets Inc., Deutsche Bank Securities Inc., Goldman, Sachs & Co., HSBC Securities (USA) Inc., Merrill Lynch, Pierce, Fenner & Smith Incorporated, Morgan Stanley & Co. LLC, RBC Capital Markets, LLC and Wells Fargo Securities, LLC and each agent appointed from time to time by the Issuers under and in accordance with the terms of the Distribution Agreement (the "Agents"), each of which has agreed to use its reasonable best efforts to solicit offers to purchase the Notes. The applicable Issuer will pay the applicable Agent a commission which will equal the percentage of the principal amount of any such Note sold through such Agent set forth in the relevant Final Terms. An Issuer may also sell Notes to an Agent, as principal, at a discount from the principal amount thereof, and such Agent may later resell such Notes to investors and other purchasers at varying prices related to prevailing market prices at the time of sale as determined by such Agent. An Issuer may also sell Notes directly to, and may solicit and accept offers to purchase directly from, investors on its own behalf in those jurisdictions where it is authorized to do so. The Notes will be offered in accordance with the provisions of the Distribution Agreement.

In addition, the Agents may offer the Notes they have purchased as principal to other Agents. The Agents may sell Notes to any Agent at a discount. Unless otherwise indicated, any Note sold to an Agent as principal will be purchased by such Agent at a price equal to 100% of the principal amount thereof less a percentage equal to the commission applicable to any agency sale of a Note of identical term, and may be resold by such Agent to investors and other purchasers from time to time in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale or may be resold to certain dealers as described above. After the initial offering of Notes to be resold to investors and other purchasers on a fixed offering price basis, the offering price, concession and discount may be changed.

Each Issuer reserves the right to withdraw, cancel or modify the offer made hereby without notice and may reject orders in whole or in part whether placed directly with such Issuer or through an Agent. Each Agent will have the right, in its discretion reasonably exercised, to reject any offer to purchase Notes received by it, in whole or in part.

In connection with an offering of Notes purchased by one or more Agents as principal on a fixed offering price basis, such Agent(s) will be permitted to over-allot or engage in transactions that stabilize the price of Notes. These transactions may consist of bids or purchases for the purpose of pegging, fixing or maintaining the price of Notes. If the Agent creates or the Agents create, as the case may be, a short position in Notes, that is, if it sells or they sell Notes in an aggregate principal amount exceeding that set forth in the relevant Final Terms, such Agent(s) may reduce that short position by purchasing Notes in the open market. In general, purchase of Notes for the purpose of stabilization or to reduce a short position could cause the price of Notes to be higher than it might be in the absence of such purchases. Such stabilization if commenced, may be discontinued at any time and must be brought to an end after a limited period. Such stabilization, if any, shall be in compliance with all laws.

None of the Issuers, ANZ New Zealand (in the case of ANZNIL Notes) or any of the Agents makes any representation or prediction as to the direction or magnitude of any effect that the transactions described in the immediately preceding paragraph may have on the price of Notes. In addition, none of the Issuers, ANZ New Zealand (in the case of ANZNIL Notes) or any of the Agents make any representation that the Agents will engage in any such transactions or that such transactions, once commenced, will not be discontinued without notice.

The Agents may from time to time purchase and sell Notes in the secondary market, but they are not obligated to do so, and there can be no assurance that there will be a secondary market for the Notes or liquidity in the secondary market if one develops. From time to time, the Agents may make a market in the Notes.

The Issuers have agreed to indemnify the several Agents against and to make contributions relating to certain liabilities, including liabilities under the Securities Act. The Agents and their respective affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, financing and brokerage activities. The Agents may engage in transactions with, or perform services for, the Issuers in the ordinary course of business.

Some of the Agents or their affiliates have, directly or indirectly, performed investment and/or commercial banking or financial advisory services for the Issuers or their affiliates, for which they may have received customary fees and commissions, and they expect to provide these services to the Issuers and their affiliates in the future, for which they may also receive customary fees and commissions. In the ordinary course of their various business activities, the Agents and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers, and such investment and securities activities may involve securities and instruments of the Issuers. If any of the Agents or their affiliates have a lending relationship with us, certain of those Agents or their affiliates routinely hedge, and certain other of those Agents or their affiliates may hedge, their credit exposure to us consistent with their

customary risk management policies. Typically, these Agents and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in our securities, including potentially the Notes offered hereby. Any such credit default swaps or short positions could adversely affect future trading prices of the Notes offered hereby. The Agents and their respective affiliates may also make investment recommendations and publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long or short positions in such securities and instruments.

United States

The Notes are not being registered under the Securities Act in reliance upon Regulation S under the Securities Act and the exemptions from registration provided by Section 4(a)(2) of the Securities Act and Rule 144A. The Notes are being offered hereby only (A) to QIBs in reliance on Rule 144A and (B) to persons other than U.S. persons (as defined in Regulation S) in offshore transactions in reliance upon Regulation S. The minimum principal amount of Notes which may be purchased for any account is US\$200,000 or such larger principal amounts as shall be specified in the relevant Final Terms as the minimum denomination for the Notes of a relevant Tranche (or, in either case, the equivalent thereof in another currency or composite currency).

Prior to any issuance of Notes in reliance on Regulation S, each relevant agent will be deemed to represent and agree that it will send to each distributor, dealer or person receiving a selling concession, fee or other remuneration that purchases Notes from them during the distribution compliance period (as defined in Regulation S) a confirmation or notice substantially to the following effect:

"The Notes covered hereby have not been registered under the U.S. Securities Act of 1933, as amended (the "**Securities Act**"), and may not as a matter of U.S. law be offered and sold within the United States or to, or for the account or benefit of, U.S. persons (i) as part of their distribution at any time or (ii) otherwise until 40 days after the later of the commencement of the offering and the closing date, except in either case in accordance with Regulation S (or Rule 144A, if available) under the Securities Act. Terms used above have the meaning given to them by Regulation S".

Until the expiration of the period ending 40 days after the later of the commencement of the offering and the issue date of the Notes, an offer or sale of Notes within the United States by a dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act if such offer or sale is made otherwise than in accordance with Rule 144A under the Securities Act or pursuant to another exemption from Registration under the Securities Act.

There is no undertaking to register the Notes hereafter and they cannot be resold except pursuant to an effective registration statement or an exemption from the registration requirements of the Securities Act. Each purchaser of the Notes offered hereby in making its purchase shall be deemed to have made the acknowledgments, representations and agreements as set forth under "Notice to Purchasers" contained on pages i and ii hereof.

United Kingdom

Each Agent has represented and agreed, and each further Agent appointed under the Distribution Agreement will be required to represent and agree, that:

- (i) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) received by it in connection with the issue or sale of any Notes in circumstances in which Section 21(1) of the FSMA does not apply to the relevant Issuer and, in the case of ANZNIL Notes, ANZ New Zealand as guarantor; and
- (ii) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to any Notes in, from or otherwise involving the United Kingdom.

New Zealand

No action has been or will be taken by any Issuer, the Guarantor or the Agents which would permit a public or regulated offering of any of the Notes, or possession or distribution of any offering material in relation to the Notes, in New Zealand.

Each Agent will be deemed to represent and agree, and each further Agent appointed under the Distribution Agreement will represent and agree, that it has not offered, sold or delivered and will not directly or indirectly offer, sell or deliver any Note, and it will not distribute any offering memorandum or advertisement in relation to any offer of Notes, in New Zealand, other than to any or all of the following persons only:

- (a) "wholesale investors" as that term is defined in clauses 3(2)(a), (c) and (d) of Schedule 1 to the Financial Markets Conduct Act 2013 of New Zealand (the "FMC Act"), being a person who is:
- (i) an "investment business";
 - (ii) "large"; or
 - (iii) a "government agency",
- in each case as defined in Schedule 1 to the FMC Act; and
- (b) in other circumstances where there is no contravention of the FMC Act, provided that (without limiting paragraph (a) above) Notes may not be offered or transferred to any "eligible investors" (as defined in the FMC Act) or any person that meets the investment activity criteria specified in clause 38 of Schedule 1 to the FMC Act.

In addition, each Agent will be deemed to represent and agree that it has not offered or sold, and will not offer or sell, any Notes to persons whom it believes to be persons to whom any amounts payable on the Notes are or would be subject to New Zealand resident withholding tax, unless such persons certify that they hold a valid certificate of exemption for New Zealand resident withholding tax purposes and provide a New Zealand tax file number to such Agent (in which event the Agent shall provide details thereof to the relevant Issuer or to the Fiscal Agent).

Japan

The Notes have not been and will not be registered under the Financial Instruments and Exchange Law of Japan (Law No. 25 of 1948, as amended) (the "FIEL"), and each Agent will be deemed to represent and agree that it has not offered or sold, and agrees not to offer or sell the Notes, directly or indirectly, in Japan or to, or for the benefit of, any Japanese Person or to others for re-offering or resale, directly or indirectly, in Japan or to, or for the benefit of, a Japanese Person, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the FIEL and other applicable laws, regulations and ministerial guidelines of Japan. For the purpose of this paragraph "Japanese Person" means any person resident in Japan, including any corporation or other entity organized under the laws of Japan.

Hong Kong

Each Agent will be deemed to represent and agree that it has not offered or sold and will not offer or sell the Notes by means of any document other than (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies Ordinance (Cap. 32) of the Laws of Hong Kong ("CO"), (ii) "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571) of the Laws of Hong Kong ("SFO") and any rules made thereunder or (iii) in other circumstances which do not result in this Offering Memorandum being a "prospectus" within the meaning of the CO, and it has not issued or had in its possession for the purpose of issue, and will not issue or have in its possession for the purpose of issue, whether in Hong Kong or elsewhere, any advertisement, invitation or document relating to the Notes, which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to Notes which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" within the meaning of the SFO and any rules made thereunder.

Public Offer Selling Restriction under the Prospectus Directive

In relation to each Member State of the European Economic Area which has implemented the Prospectus Directive (each, a "Relevant Member State"), each Agent has represented and agreed, and each further Agent appointed under the Distribution Agreement will be required to represent and agree, that with effect from and including the date on which the Prospectus Directive is implemented in that Relevant Member State (the "Relevant Implementation Date"), it has not made and will not make an offer of Notes which are the subject of the offering contemplated by this Offering Memorandum, as completed by the Final Terms in relation thereto, to the public in that Relevant Member State except that it may, with effect from and including the Relevant Implementation Date, make an offer of such Notes to the public in that Relevant Member State:

- (i) at any time to any legal entity which is a qualified investor as defined in the Prospectus Directive;
- (ii) at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in the Prospectus Directive), subject to obtaining the prior consent of the relevant Agent or Agents nominated by the relevant Issuer for any such offer; or
- (iii) at any time in any other circumstances falling within Article 3(2) of the Prospectus Directive,

provided that no such offer of Notes referred to in (i) to (iii) above shall require the relevant Issuer or any Agent to publish a prospectus pursuant to Article 3 of the Prospectus Directive or supplement a prospectus pursuant to Article 16 of the Prospectus Directive.

For the purposes of this provision, the expression “**offer of Notes to the public**” in relation to any Notes in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe for the Notes, as the same may be varied in that Relevant Member State by any measure implementing the Prospectus Directive in that Relevant Member State, the expression “**Prospectus Directive**” means Directive 2003/71/EC (as amended, including by Directive 2010/73/EU), and includes any relevant implementing measure in the Relevant Member State.

Legal Matters

The validity of the Notes under New York law will be passed upon for us by our United States counsel Sullivan & Cromwell, Melbourne, Australia. The validity of the Notes under New York law will be passed upon for the Agents by their United States counsel, Sidley Austin LLP, New York, New York, United States. The validity of the Notes under New Zealand law will be passed upon for us by our New Zealand counsel Russell McVeagh, Wellington, New Zealand. These opinions will be conditioned upon, and subject to certain assumptions regarding future action required to be taken by the relevant Issuer, ANZ New Zealand (in the case of ANZNIL Notes) and the Fiscal Agent in connection with the issuance and sale of any particular Note, the specific terms of Notes and other matters which may affect the validity of Notes but which cannot be ascertained at the date of such opinions.

Independent Auditors

The consolidated financial statements of ANZ Bank New Zealand Limited and its subsidiaries as at September 30, 2014, and September 30, 2013, and for each of the years then ended have been audited by KPMG, independent accountants, as stated in their reports appearing herein.

With respect to the unaudited interim financial statements of ANZ Bank New Zealand Limited and its subsidiaries as at and for the six month period ended March 31, 2015, included herein, the independent accountants have reported that they applied limited procedures in accordance with professional standards in New Zealand for a review of such financial statements. However, their separate report included herein states that they did not audit and they do not express an opinion on those interim financial statements. Accordingly, the degree of reliance on their report on such financial statements should be restricted in light of the limited nature of the review procedures applied.

The financial statements of ANZ New Zealand (Int'l) Limited as at September 30, 2014, and September 30, 2013, and for each of the years then ended have been audited by KPMG, independent accountants, as stated in their reports appearing herein.

With respect to the unaudited interim financial statements of ANZ New Zealand (Int'l) Limited as at and for the period ended March 31, 2015, included herein, the independent accountants have reported that they applied limited procedures in accordance with professional standards in New Zealand for a review of such financial statements. However, their separate report included herein states that they did not audit and they do not express an opinion on those interim financial statements. Accordingly, the degree of reliance on their report on such financial statements should be restricted in light of the limited nature of the review procedures applied.

General Information

1. The admission of the program to listing on the Official List of the UK Listing Authority and to trading on the London Stock Exchange's Regulated Market is expected to take effect on or about July 3, 2015. The price of the Notes on the price list of the London Stock Exchange will be expressed as a percentage of their principal amount (exclusive of accrued interest). Any Tranche intended to be admitted to listing on the Official List of the UK Listing Authority and admitted to trading on the London Stock Exchange's Regulated Market will be admitted to listing and trading upon submission to the UK Listing Authority and the London Stock Exchange of the relevant Final Terms and any other information required by the UK Listing Authority and the London Stock Exchange, subject in each case to the issue of the relevant Notes. Prior to admission to trading, dealings will be permitted by the London Stock Exchange in accordance with its rules. Transactions will normally be effected for delivery on the third working day in London after the day of the transaction.
2. Save as disclosed in the "Recent Developments" section of this Offering Memorandum under the heading "Contingent Liabilities", there are no governmental, legal or arbitration proceedings (including any such proceedings which are pending or threatened of which either Issuer is aware) during the last 12 months which may have, or have had in the recent past, significant effects on the financial position or profitability of each Issuer and, in the case of ANZ New Zealand, its subsidiaries taken as a whole.
3. Since September 30, 2014, there has been no material adverse change in the prospects of each Issuer and, in the case of ANZ New Zealand, its subsidiaries taken as a whole and the ANZ New Zealand Group. Since March 31, 2015, there has been no significant change in the financial or trading position of the ANZ New Zealand Group and ANZNIL.
4. There are no material contracts having been entered into outside the ordinary course of any of the Issuers' businesses, which could result in any group member of any Issuer being under an obligation or entitlement that is material to that Issuer's ability to meet its obligation to Noteholders in respect of the securities being issued.
5. For so long as Notes may be issued pursuant to this Offering Memorandum or any Notes shall be outstanding, the following documents will be available, during usual business hours on any weekday (Saturdays, Sundays and public holidays excepted), for inspection at the office of the Fiscal Agent, the London Paying Agent and the relevant Issuer:
 - (i) the constitutive documents of the relevant Issuer;
 - (ii) the Fiscal Agency Agreement;
 - (iii) the Guarantee;
 - (iv) any Final Terms;
 - (v) a copy of this Offering Memorandum together with any supplement to this Offering Memorandum or further Offering Memorandum;
 - (vi) copies of the most recent publicly available audited accounts of the ANZ New Zealand Group for the financial years ending September 30, 2014 and 2013, including copies of the report of the independent auditor thereon; and
 - (vii) copies of the most recently available audited accounts of ANZNIL for the years ended September 30, 2014 and 2013, including copies of the report of the independent auditor thereon.
6. The price and amount of Notes to be issued under the program will be determined by each relevant Issuer and the relevant Agent at the time of issue in accordance with the prevailing market conditions at such time.
7. The Issuers do not intend to provide any post-issuance information in relation to any issue of Notes.
8. The establishment of the program and the issue of the Notes by it thereunder was authorized (i) by resolutions of the board of directors of ANZ New Zealand on August 13, 2004, February 16, 2006, October 12, 2006, June 19, 2008, December 2, 2008 and April 15, 2010 (ii) by resolutions of the board of directors of ANZNIL on March 4, 2005, March 23, 2006, September 18, 2006, November 28, 2008, December 23, 2008, September 2, 2010 and November 23, 2011 and (iii) by resolutions of the shareholder of ANZNIL on February 10, 2005 and February 16, 2006.

Glossary of Terms

In this Registered Bank Disclosure Statement (Disclosure Statement) unless the context otherwise requires:

- (a) Bank means ANZ Bank New Zealand Limited;
- (b) Banking Group means the Bank and all its controlled entities;
- (c) Immediate Parent Company means ANZ Holdings (New Zealand) Limited;
- (d) Ultimate Parent Bank means Australia and New Zealand Banking Group Limited;
- (e) Overseas Banking Group means the worldwide operations of Australia and New Zealand Banking Group Limited including its controlled entities;
- (f) New Zealand business means all business, operations, or undertakings conducted in or from New Zealand identified and treated as if it were conducted by a company formed and registered in New Zealand;
- (g) NZ Branch means the New Zealand business of the Ultimate Parent Bank;
- (h) ANZ New Zealand means the New Zealand business of the Overseas Banking Group;
- (i) Registered Office is Ground Floor, ANZ Centre, 23-29 Albert Street, Auckland, New Zealand, which is also the Banking Group's address for service;
- (j) RBNZ means the Reserve Bank of New Zealand;
- (k) APRA means the Australian Prudential Regulation Authority;
- (l) the Order means the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order 2014; and
- (m) Any term or expression which is defined in, or in the manner prescribed by, the Order shall have the meaning given in or prescribed by the Order.

General Disclosures

This Disclosure Statement has been issued in accordance with the Order.

Credit Rating Information

The Bank has three credit ratings, which are applicable to its long-term senior unsecured obligations. The Bank's credit ratings are:

Rating Agency	Current Credit Rating	Qualification
Standard & Poor's	AA-	Outlook Stable
Moody's Investors Service	Aa3	Outlook Stable
Fitch Ratings	AA-	Outlook Stable

Guarantors

No obligations of the Bank are guaranteed as at 14 May 2015.

ANZNZ Covered Bond Trust

Certain debt securities (Covered Bonds) issued by the Bank's wholly owned subsidiary, ANZ New Zealand (Int'l) Limited, are guaranteed by ANZNZ Covered Bond Trust Limited (the Covered Bond Guarantor), solely in its capacity as trustee of ANZNZ Covered Bond Trust. The Covered Bond Guarantor has guaranteed the payment of interest and principal of Covered Bonds with a carrying value as at 31 March 2015 of \$4,382 million, pursuant to a guarantee which is secured over a pool of assets. The Covered Bond Guarantor's address for service is Level 9, 34 Shortland Street, Auckland, New Zealand. The Covered Bond Guarantor is not a member of the Banking Group and has no credit ratings applicable to its long term senior unsecured obligations payable in New Zealand dollars. The Covered Bonds have been assigned a long term rating of Aaa and AAA by Moody's Investors Service and Fitch Ratings respectively. Details of the pool of assets that secure this guarantee are provided in Note 7.

Changes to Conditions of Registration

The conditions of registration applying to the Bank were amended on 1 October 2014 to refer to revised versions of the RBNZ documents *Capital Adequacy Framework (Internal Models Based Approach)* (BS2B), *Connected Exposures Policy* (BS8) and *Framework for Restrictions on High-LVR Residential Mortgage Lending* (BS19).

Directorate

As at 14 May 2015 there have been no changes to the Directors of the Bank since 30 September 2014, the balance date of the last full year disclosure statement.

Auditor

The Banking Group's auditor is KPMG, Chartered Accountants, Level 9, 10 Customhouse Quay, Wellington, New Zealand.

Notes to the Financial Statements

1. Significant Accounting Policies

(i) Reporting entity and statement of compliance

These interim financial statements are for the Banking Group for the six months ended 31 March 2015. They have been prepared in accordance with New Zealand Generally Accepted Accounting Practice as appropriate for profit oriented entities, the requirements of NZ IAS 34 *Interim Financial Reporting*, IAS 34 *Interim Financial Reporting* and the Order, and should be read in conjunction with the Banking Group's financial statements for the year ended 30 September 2014.

(ii) Basis of measurement

These financial statements have been prepared on a going concern basis in accordance with historical cost concepts except that the following assets and liabilities are stated at their fair value:

- derivative financial instruments, including in the case of fair value hedging, the fair value of any applicable underlying exposure;
- financial instruments held for trading;
- financial assets treated as available-for-sale; and
- financial instruments designated at fair value through profit and loss.

(iii) Changes in accounting policies

The accounting policies adopted by the Banking Group are consistent with those adopted and disclosed in the previous full year Disclosure Statement.

(iv) Presentation currency and rounding

The amounts contained in the financial statements are presented in millions of New Zealand dollars, unless otherwise stated.

(v) Comparatives

Amounts in the cash flow statement for cash and cash equivalents and net changes in operating assets and liabilities have been updated for the revised definition of cash and cash equivalents applied in the previous full year Disclosure Statement.

(vi) Principles of consolidation

The financial statements consolidate the financial statements of the Bank and its subsidiaries.

2. Other Operating Income

\$millions	Unaudited 6 months to 31/03/2015	Unaudited 6 months to 31/03/2014	Audited Year to 30/09/2014

Loss on sale of mortgages to NZ Branch	(2)	(14)	(23)
Other income	22	9	36
Total other operating income	<u>230</u>	<u>278</u>	<u>547</u>

Notes to the Financial Statements

3. Segment Analysis

The Banking Group is organised into four major business segments for segment reporting purposes - Retail, Commercial, Wealth and Institutional. Centralised back office and corporate functions support these segments. These segments are consistent with internal reporting provided to the chief operating decision maker, being the Bank's Chief Executive Officer.

Segmental reporting has been updated to reflect minor changes to the Banking Group's structure. Comparative data has been adjusted to be consistent with the current period's segment definitions.

Retail

Retail provides products and services to personal customers via the branch network, mortgage specialists, the contact centre and a variety of self-service channels (internet banking, phone banking, ATMs, website and mobile phone banking). Core products include current and savings accounts, unsecured lending (credit cards, personal loans and overdrafts) and home loans secured by mortgages over property. Retail distributes insurance and investment products on behalf of the Wealth segment.

Commercial

Commercial provides services to Business Banking, Commercial & Agri, and UDC customers. Business Banking

services are offered to small enterprises (typically with annual revenues of less than \$5 million). Commercial & Agri customers consist of primarily privately owned medium to large enterprises. The Banking Group's relationship with these businesses ranges from simple banking requirements with revenue from deposit and transactional facilities, and cash flow lending, to more complex funding arrangements with revenue sourced from a wider range of products. UDC is principally involved in the financing and leasing of plant, vehicles and equipment, mainly for small and medium sized businesses, as well as investment products.

Wealth

Wealth comprises the Private Wealth, Funds Management and Insurance businesses, which provide private banking, investment, superannuation and insurance products and services.

Institutional

Institutional provides financial services through a number of specialised units to large multi-banked corporations, often global, which require sophisticated product and risk management solutions. Those financial services include loan structuring, foreign exchange, wholesale money market services and transaction banking.

Other

Other includes treasury and back office support functions, none of which constitutes a separately reportable segment.

Business segment analysis¹

\$ millions	Retail	Commercial	Wealth ²	Institutional	Other ³	Total
Unaudited 6 months to 31/03/2015						
External revenues	476	1,556	72	461	(551)	2,014
Intersegment revenues	159	(789)	84	(127)	673	-
Total revenues	635	767	156	334	122	2,014
Profit after income tax	223	365	67	166	68	889
Unaudited 6 months to 31/03/2014						
External revenues	513	1,356	152	397	(542)	1,876
Intersegment revenues	93	(642)	76	(79)	552	-
Total revenues	606	714	228	318	10	1,876
Profit after income tax	207	370	121	164	5	867
Audited year to 30/09/2014						
External revenues	991	2,850	211	802	(1,026)	3,828
Intersegment revenues	225	(1,395)	165	(177)	1,182	-
Total revenues	1,216	1,455	376	625	156	3,828
Profit after income tax	412	717	181	320	86	1,716

¹ Intersegment transfers are accounted for and determined on an arm's length or cost recovery basis.

² Wealth external revenues for the six months to 31 March 2014 and year to 30 September 2014 includes the \$91 million insurance settlement relating to the Bank's former involvement in the ING Diversified Yield fund and the ING Regular Income Fund.

³ This segment has negative external revenues as this segment incurs funding costs on behalf of the Banking Group and is reimbursed internally.

Credit quality of financial assets that are past due but not impaired

A large portion of retail credit exposures, such as residential mortgages, are generally well secured. That is, the fair value of associated security should be sufficient to ensure that the Banking Group will recover the entire amount owing over the life of the facility and there is reasonable assurance that collection efforts will result in payment of the amounts due in a timely manner.

Total financial assets pledged as collateral	11,599	10,451	10,467

ANZNZ Covered Bond Trust (the Covered Bond Trust)

Substantially all of the assets of the Covered Bond Trust are made up of certain housing loans and related securities originated by the Bank which are security for the guarantee by ANZNZ Covered Bond Trust Limited as trustee of the Covered Bond Trust of issuances of covered bonds by the Bank, or its wholly owned subsidiary ANZ New Zealand (Int'l) Limited, from time to time. The assets of the Covered Bond Trust are not available to creditors of the Bank, although the Bank (or its liquidator or statutory manager) may have a claim against the residual assets of the Covered Bond Trust (if any) after all prior ranking creditors of the Covered Bond Trust have been satisfied.

The Banking Group continues to recognise the assets of the Covered Bond Trust on its balance sheet as, although they are pledged as security for covered bonds, the Bank retains substantially all the risks and rewards of ownership.

Total subordinated debt issued	2,342	1,129	1,144
Less subordinated debt instruments held by the Bank	(1)	-	-
Total subordinated debt	2,341	1,129	1,144

¹ These instruments qualify as additional tier 1 capital.

² These instruments are listed on the New Zealand Debt Market (NZDX). The Market Surveillance Panel of the NZX granted the Bank a waiver from the requirements of Listing Rules 10.3 (relating to the provision of preliminary announcements of half yearly and annual results to the NZX) and 10.4 (relating to preparing and providing a copy of half yearly and annual reports to the NZX).

³ These instruments qualify as tier 2 capital under RBNZ's transitional rules. Refer to Note 11 for further details.

⁴ This loan was repaid on 16 March 2015. Interest was payable half yearly in arrears at BBSW + 0.95% p.a.

Subordinated debt is subordinated in right of payment in the event of liquidation or wind up to the claims of depositors and all creditors of the Bank.

ANZ Capital Notes

- On 5 March 2015, the Bank issued 10.0 million convertible notes (ANZ NZ ICN) to the NZ Branch at \$100 each, raising \$1,003 million.
- On 31 March 2015, the Bank issued 500 million convertible notes (ANZ NZ CN) at \$1 each, raising \$500 million before issue costs.

ANZ Capital Notes (the notes) are fully paid mandatorily convertible non-cumulative perpetual subordinated notes.

As at 31 March 2015, ANZ NZ CN carried a BBB- credit rating from Standard and Poor's.

The notes are classified as debt given there are circumstances where the principal is converted into a variable number of shares of the Bank (ANZ NZ ICN) or the Ultimate Parent Bank (ANZ NZ CN) beyond the Bank's control.

Interest

Interest on the notes is non-cumulative and payable as follows:

- ANZ NZ ICN: payable semi-annually in arrears in March and September in each year. The interest rate is based on a floating rate equal to the aggregate of the New Zealand 6 month bank bill rate plus a 380 basis point margin.
- ANZ NZ CN: payable quarterly in arrears in February, May, August and November in each year. The interest rate is fixed at 7.2% per annum until 25 May 2020, and thereafter will be based on a floating rate equal to the aggregate of the New Zealand 3 month bank bill rate plus a 350 basis point margin.

Interest payments are subject to the Bank's absolute discretion and certain payment conditions being satisfied (including RBNZ and APRA (ANZ NZ CN only) requirements). If interest is not paid on the notes the Bank may not, except in limited circumstances, pay dividends on its ordinary shares

or undertake a share buy-back or other capital reduction until interest is next paid.

Conversion features

On 24 March 2025 (ANZ NZ ICN) or 25 May 2022 (ANZ NZ CN) or an earlier date under certain circumstances, the relevant notes will mandatorily convert into a variable number of ordinary shares of the:

- Bank based on the net assets per share in the Bank's most recently published Disclosure Statement (ANZ NZ ICN); or
- Ultimate Parent Bank based on the average market price of the Ultimate Parent Bank's ordinary shares over a specified period prior to conversion less a 1% discount, subject to a maximum conversion number (ANZ NZ CN).

The mandatory conversion will be deferred for a specified period if the conversion tests are not met.

The Bank may be required to convert some or all of the notes if a common equity capital trigger event, or an RBNZ or APRA (ANZ NZ CN only) non-viability trigger event occurs. The ANZ ICN will convert into ordinary shares of the Bank and the ANZ CN will convert into ordinary shares of the Ultimate Parent Bank.

A common equity capital trigger event occurs if the:

- Banking Group's common equity tier 1 capital ratio is equal to or less than 5.125%; or
- Overseas Banking Group's Level 2 common equity tier 1 capital ratio is equal to or less than 5.125% (ANZ CN only).

An RBNZ non-viability trigger event occurs if the RBNZ directs the Bank to convert or write off the notes or a statutory manager is appointed to the Bank and decides the Bank must convert or write off the notes. An APRA non-viability trigger event occurs if APRA notifies the Ultimate Parent Bank that, without the conversion or write-off of certain securities or a public sector injection of capital (or equivalent support), it

Notes to the Financial Statements

considers that the Ultimate Parent Bank would become non-viable.

On 25 May 2020 the Bank has the right to, subject to satisfying certain conditions, redeem (subject to receiving RBNZ's and APRA's prior approval), or convert into ordinary shares of the Ultimate Parent Bank, all or some of the ANZ NZ CN at its discretion on similar terms as mandatory conversion.

On 24 March 2023 the Bank has the right to, subject to satisfying certain conditions, redeem (subject to receiving RBNZ's prior approval), or convert into ordinary shares of the Bank, all or some of the ANZ NZ ICN at its discretion on similar terms as mandatory conversion.

Rights of holders in event of liquidation

The notes rank equally with each other and with the Bank's preference shares and lower than perpetual subordinated debt. Holders of the notes do not have any right to vote in general meetings of the Bank.

Perpetual subordinated debt

Perpetual subordinated debt instruments are classified as debt reflecting an assessment of the key terms and conditions of the instruments, and an assessment of the ability, and likelihood of interest payments being deferred. Certain of these instruments have interrelationships that have been considered in this assessment.

NZD 835,000,000 bond

This bond was issued by the Bank on 18 April 2008.

The Bank may elect to redeem the bond on 18 April 2018 (the Call Date) or any interest payment date subsequent to 18 April 2018. Interest is payable half yearly in arrears on 18 April and 18 October each year, up to and including the Call Date and then quarterly thereafter. Should the bond not be called at the Call Date, the Coupon Rate from the Call Date onwards will be set on a quarterly basis to the three month FRA rate plus 3.00%.

As at 31 March 2015, this bond carried a BBB+ rating by Standard and Poor's and an A3 rating by Moody's.

The coupon interest on the bond was 9.66% until 18 April 2013 when it reset to 5.28% for the five year period to 18 April 2018.

AUD 10,000,000 loan

This loan was drawn down by the Bank on 27 March 2013 and has no fixed maturity. Interest is payable half yearly in arrears on 15 March and 15 September each year. The Bank may repay the loan on any interest payment date after the NZD 835,000,000 bond has been repaid in full.

Coupon interest is BBSW + 2.4% p.a., increasing to BBSW + 4.4% p.a. from 15 September 2018.

¹ Certain instruments issued by the Bank qualify as tier 2 capital instruments subject to phase-out under RBNZ Basel III transition arrangements. Fixing the base at the nominal amount of such instruments outstanding at 31 December 2012, their recognition is capped at 60% of that base from 1 January 2015; 40% from 1 January 2016; 20% from 1 January 2017; and from 1 January 2018 onwards these instruments will not be included in regulatory capital.

² A summary of the terms of these instruments is included in note 9.

Notes to the Financial Statements

Terms of ordinary share capital

All ordinary shares share equally in dividends and any proceeds available to ordinary shareholders on the winding up of the Bank. On a show of hands every member who is present at a meeting in person or by proxy or by representative is entitled to one vote, and upon a poll every member shall have one vote for each share held.

Terms of preference shares

All preference shares were issued on 25 September 2013 by the Bank to the Immediate Parent and do not carry any voting rights. The preference shares are wholly classified as equity instruments as there is no contractual obligation for the Bank to either deliver cash or another financial instrument or to exchange financial instruments on a potentially unfavourable basis. The key terms of the preference shares are as follows:

Dividends

Dividends are payable at the discretion of the Directors of the Bank and are non-cumulative. The Bank must not resolve to pay any dividend or make any other distribution on its ordinary shares until the next preference share dividend payment date if the Directors elect to not pay a dividend on the preference shares.

Should the Bank elect to pay a dividend, the dividend is payable at 72% of BKBM + 3.25% p.a., with dividend payments scheduled to be made in March and September each year.

Redemption features

The preference shares are redeemable, subject to prior written approval of the RBNZ, by the Bank providing notice in writing to holders of the preference shares:

- on any date on or after a change to laws or regulations that adversely affects the regulatory capital or tax treatment of the preference shares; or
- on any dividend payment date on or after 1 March 2019; or
- on any date after 1 March 2019 if the Bank has ceased to be a wholly owned subsidiary of the Ultimate Parent Bank.

The preference shares may be redeemed for nil consideration should an RBNZ non-viability trigger event, as defined in the RBNZ document Capital Adequacy Framework (Internal Models Based Approach) (BS2B), occur.

Rights of holders in event of liquidation

In the event of a liquidation of the Bank, holders of preference shares are entitled to available subscribed capital per share, *pari passu* with all holders of existing preference shares and ANZ Capital notes but in priority to all holders of ordinary shares. They have no entitlement to participate in further distribution of profits or assets.

Capital requirements of the Banking Group

Total	151,759	76,193	6,095

¹ Total credit risk weighted exposures include a scalar of 1.06 in accordance with the Bank's Conditions of Registration.

Notes to the Financial Statements

Implementation of the advanced internal ratings based approach to credit risk measurement

The Banking Group adheres to the standards of risk grading and risk quantification as set out for Internal Ratings Based (IRB) banks in the RBNZ document *Capital Adequacy Framework (Internal Models Based Approach)* (BS2B).

Under this IRB Framework banks use their own measures for calculating the level of credit risk associated with customers and exposures, by way of the primary components of:

Probability of Default (PD): An estimate of the level of risk of borrower default graded by way of rating models used both at loan origination and for ongoing monitoring;

Exposure at Default (EAD): The expected facility exposure at default. Total credit risk-weighted exposures include a scalar of 1.06 in accordance with the Bank's Conditions of Registration; and

Loss Given Default (LGD): An estimate of the potential economic loss on a credit exposure, incurred as a consequence of obligor default and expressed as a percentage of the facility's EAD. For Retail Mortgage exposures the Bank is required to apply the downturn LGDs according to loan to value (LVR) bands as set out in BS2B. For farm lending exposures the Banking Group is required to adopt RBNZ prescribed downturn LVR based LGDs, along with a minimum maturity of 2.5 years and the removal of the firm-size adjustment.

For exposures classified under Specialised Lending, the Banking Group uses slotting tables supplied by the RBNZ rather than internal estimates.

The exceptions to IRB treatment are three minor portfolios where, due to systems constraints, determining these IRB risk estimates is not currently feasible or appropriate. Risk weights for these exposures are calculated under a separate treatment as set out in the RBNZ document *Capital Adequacy Framework (Standardised Approach)* (BS2A).

Cash	271	-	-	-
New Zealand dollar denominated claims on the Crown and the RBNZ	1,953	-	-	-
Other assets	1,512	100	1,602	128
Total other IRB credit risk exposures	3,736	40	1,602	128

Other exposures have been calculated in accordance with BS2B.

Credit risk mitigation

The Banking Group assesses the integrity and ability of counterparties to meet their contractual financial obligations for repayment. The Banking Group generally takes collateral security in the form of real property or a security interest in personal property, except for major government, bank and corporate counterparties of strong financial standing. Longer term consumer finance, in the form of housing loans, is generally secured against real estate while short term revolving consumer credit is generally unsecured.

As at 31 March 2015, under the IRB approach, the Banking Group had \$1,042 million of Corporate exposures covered by guarantees where the presence of the guarantees was judged to reduce the underlying credit risk of the exposures. Information on the total value of exposures covered by financial guarantees and eligible financial collateral is not disclosed, as the effect of these guarantees and collateral on the underlying credit risk exposures is not considered to be material.

Operational risk

The Banking Group uses the Advanced Measurement Approach for determining its regulatory capital requirement for operational risk calculated in accordance with BS2B. As at 31 March 2015 the Banking Group had an implied risk weighted exposure of \$5,496 million for operational risk and an operational risk capital requirement of \$440 million.

Market risk

The aggregate market risk exposures below have been calculated in accordance with BS2B. The peak end-of-day market risk exposures are for the half-year ended 31 March 2015.

\$ millions	Implied risk weighted exposure		Aggregate capital charge		Peak occurred on
	Period end	Peak	Period end	Peak	
Unaudited 31/03/2015					
Interest rate risk	5,863	7,615	469	609	12/11/2014
Foreign currency risk	81	132	6	11	9/12/2014
Equity risk	2	2	-	-	28/01/2015
	<u>5,946</u>		<u>475</u>		

Pillar II capital for other material risks

The Banking Group has an Internal Capital Adequacy Assessment Process (ICAAP) which complies with the requirements of the Bank's Conditions of Registration.

Under the Banking Group's ICAAP it identifies and measures all "other material risks", which are those material risks that are not explicitly captured in the calculation of the Banking Group's tier 1 and total capital ratios. The other material risks identified by the Banking Group include pension risk, insurance risk, strategic equity risk, fixed asset risk, deferred acquisition cost risk, value in-force risk, business retention risk and software risk.

The Banking Group's internal capital allocation for these other material risks is \$437 million (31/03/2014 \$471 million; 30/09/2014 \$485 million).

The Banking Group regularly reviews the methodologies used to calculate the economic capital allocated to other material risks. Updated capital methodologies (particularly relating to software, strategic equity and value in-force risk) were applied in March 2015 and prior periods restated accordingly.

Notes to the Financial Statements

Capital adequacy of the Ultimate Parent Bank

Basel III capital ratios

	Overseas Banking Group			Ultimate Parent Bank (Extended Licensed Entity)		
	31/03/2015	31/03/2014	30/09/2014	31/03/2015	31/03/2014	30/09/2014
Unaudited						
Common equity tier 1 capital	8.7%	8.3%	8.8%	8.8%	8.3%	9.1%
Tier 1 capital	10.6%	10.3%	10.7%	10.9%	10.6%	11.3%
Total capital	12.6%	12.1%	12.7%	13.1%	12.5%	13.4%

For calculation of minimum capital requirements under Pillar 1 (Capital Requirements) of the Basel Accord, APRA has accredited the Overseas Banking Group to use the Advanced Internal Ratings Based (AIRB) methodology for calculation of credit risk weighted assets and the Advanced Measurement Approach (AMA) for the operational risk weighted asset equivalent.

Under prudential regulations, the Overseas Banking Group is required to maintain a Prudential Capital Ratio (PCR) as determined by APRA. The Overseas Banking Group exceeded the PCR set by APRA as at 31 March 2015 and for the comparative prior periods.

The Overseas Banking Group is required to publicly disclose Pillar 3 financial information as at 31 March 2015. The Overseas Banking Group's Pillar 3 disclosure document for the quarter ended 31 March 2015, in accordance with APS 330: *Public Disclosure of Prudential Information*, discloses capital adequacy ratios and other prudential information. This document can be accessed at the website anz.com.

Residential mortgages by loan-to-valuation ratio

As required by the RBNZ, LVRs are calculated as the current exposure secured by a residential mortgage divided by the Banking Group's valuation of the security property at origination of the exposure. Off balance sheet exposures include undrawn and partially drawn residential mortgage loans as well as commitments to lend. Commitments to lend are formal offers for housing lending which have been accepted by the customer.

Unaudited \$ millions LVR range	31/03/2015		Total
	On-balance sheet	Off-balance sheet

Notes to the Financial Statements

12. Financial Risk Management

Concentrations of credit risk

Concentrations of credit risk arise when a number of customers are engaged in similar business activities or activities within the same geographic region, or when they have similar risk characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions.

Analysis of financial assets by industry sector is based on Australian and New Zealand Standard Industrial Classification (ANZSIC) codes.

Unaudited 31/03/2015 \$ millions	Cash, settlements receivable and collateral paid	Trading securities and available-for- sale assets	Derivative financial instruments	Net loans and advances ³	Other financial assets	Credit related commitments ⁴	Total

Interest sensitivity gap	7,793	25,128	(17,168)	573	749	6,496	(7,985)

Liquidity portfolio

The Banking Group holds a diversified portfolio of cash and high quality liquid securities to support liquidity risk management. The size of the Banking Group's liquidity portfolio is based on the amount required to meet its liquidity policy and includes both items classified as cash and those classified as operating assets in the Condensed Cash Flow Statement.

Unaudited 31/03/2015 \$ millions	Cash	Trading Securities	Available-for- sale securities	Total
Cash and balances with central banks	2,235	-	-	2,235
Securities purchased under agreement to resell	186	-	-	186

Other bonds	-	5,460	-	5,460
Total liquidity portfolio	2,421	11,763	813	14,997

The Bank also held unencumbered internal residential mortgage backed securities which would entitle the Banking Group to enter into repurchase transactions with a value of \$5,731 million at 31 March 2015.

Notes to the Financial Statements

Funding Composition

The Banking Group actively uses balance sheet disciplines to prudently manage the funding mix. The Banking Group employs funding metrics to ensure that an appropriate proportion of its assets are funded from stable sources, including customer liabilities, longer-dated wholesale debt (with remaining term exceeding one year) and equity.

Analysis of funding liabilities by industry sector is based on ANZSIC codes.

\$ millions	Unaudited 31/03/2015

² Other includes exposures to electricity, gas and water, communications and personal services.

³ Funding via ANZ New Zealand (Int'l) Limited is classified as either from the United States or Europe, as the company conducts overseas funding activities through its London branch which is passed through to the Bank.

Notes to the Financial Statements

Contractual maturity analysis of financial assets and liabilities

The following tables present the Banking Group's financial assets and liabilities within relevant contractual maturity groupings, based on the earliest date on which the Banking Group may be required to realise an asset or settle a liability. The amounts disclosed in the tables represent undiscounted future principal and interest cash flows and may differ to the amounts reported on the balance sheet.

The contractual maturity analysis for off-balance sheet commitments and contingent liabilities has been prepared using the earliest date at which the Banking Group can be called upon to pay. The liquidity risk of credit related commitments and contingent liabilities may be less than the contract amount, and does not necessarily represent future cash requirements as many of these facilities are expected to be only partially used or to expire unused.

The Banking Group does not manage its liquidity risk on this basis.

13. Fair Value Measurements

Financial assets and financial liabilities not measured at fair value

Below is a comparison of the carrying amounts as reported on the balance sheet and fair value of financial asset and liability categories other than those categories where the carrying amount is at fair value or considered a reasonable approximation of fair value.

The fair values below have been calculated using discounted cash flow techniques where contractual future cash flows of the instrument are discounted using discount rates incorporating wholesale market rates or market borrowing rates of debt with similar maturities or a yield curve appropriate for the remaining term to maturity.

\$ millions	Unaudited 31/03/2015		Unaudited 31/03/2014		Audited 30/09/2014	
	Carrying amount	Fair value	Carrying amount	Fair value	Carrying amount	Fair value
Assets						
Net loans and advances ¹	100,695	101,043	93,391	93,383	96,299	96,397
Liabilities						
Deposits and other borrowings ²	88,142	88,215	81,457	81,468	84,019	84,042
Debt issuances ¹	17,686	17,862	16,405	16,583	17,042	17,225
Subordinated debt	2,341	2,343	1,129	1,098	1,144	1,137

¹ Fair value hedging is applied to certain financial instruments within these categories. The resulting fair value adjustments mean that the carrying value differs from the amortised cost.

² Includes commercial paper (note 8) designated at fair value through profit or loss.

Financial assets and financial liabilities measured at fair value in the balance sheet

The Banking Group uses a valuation method within the following hierarchy to determine the carrying amount of assets and liabilities held at fair value, all of which are recurring fair value measurements. There are no assets or liabilities measured at fair value on a non-recurring basis.

- Level 1 – Financial instruments that have been valued by reference to unadjusted quoted prices in active markets for identical financial instruments. This category includes financial instruments valued using quoted yields where available for specific debt securities.
- Level 2 – Financial instruments that have been valued through valuation techniques incorporating inputs other than quoted prices within Level 1 that are observable for a similar financial asset or liability, either directly or indirectly.
- Level 3 – Financial instruments that have been valued using valuation techniques which incorporate significant inputs that are not based on observable market data (unobservable inputs).

There have been no substantial changes in the valuation techniques applied to different classes of financial instruments during the period.

Valuation hierarchy

¹ During the period, available-for-sale assets of \$159 million and Investments backing insurance contract liabilities of \$126 million were reclassified from Level 1 to Level 2 following a reassessment of available pricing information. Transfers into and out of Level 1 and Level 2 are deemed to have occurred as of the beginning of the reporting period in which the transfer occurred.

Notes to the Financial Statements

14. Concentrations of Credit Risk to Individual Counterparties

The Banking Group measures its concentration of credit risk in respect to bank counterparties on the basis of approved exposures, and in respect to non-bank counterparties on the basis of limits.

For the six months ended 31 March 2015 there were no individual counterparties, excluding connected parties, governments and banks with long term credit ratings of A- or above, where the Banking Group's period end or peak end-of-day credit exposure equalled or exceeded 10% of the Banking Group's equity as at the end of the period.

15. Insurance Business

The Banking Group conducts insurance business through its subsidiary OnePath Life (NZ) Limited. OnePath Insurance Services (NZ) Limited, which was a subsidiary of OnePath Life (NZ) Limited, also conducted insurance business until it amalgamated with OnePath Life (NZ) Limited on 30 November 2014.

The Banking Group's aggregate amount of insurance business comprises the total consolidated assets of OnePath Life (NZ) Limited of \$958 million (31/03/2014: \$787 million; 30/09/2014 \$850 million), which is 0.7% (31/03/2014: 0.6%; 30/09/2014 0.7%) of the total consolidated assets of the Banking Group.

16. Credit Related Commitments, Guarantees and Contingent Liabilities

\$ millions	Face or contract value		
	Unaudited 31/03/2015	Unaudited 31/03/2014	Audited 30/09/2014
Credit related commitments			
Commitments with certain drawdown due within one year	1,348	1,073	764
Commitments to provide financial services	29,315	25,816	27,378
Total credit related commitments	30,663	26,889	28,142
Guarantees and contingent liabilities			
Financial guarantees	906	985	925
Standby letters of credit	52	60	79
Transaction related contingent items	1,245	1,222	1,321
Trade related contingent liabilities	93	66	111
Total guarantees and contingent liabilities	2,296	2,333	2,436

The Banking Group guarantees the performance of customers by issuing standby letters of credit and guarantees to third parties, including its Ultimate Parent Bank. To reflect the risk associated with these transactions, they are subjected to the same credit origination, portfolio management and collateral requirements as for customers that apply for loans. The contract amount represents the maximum potential amount that could be lost if the counterparty fails to meet its financial obligations. As the facilities may expire without being drawn upon, the notional amounts do not necessarily reflect future cash requirements.

Other contingent liabilities

On 11 March 2013, litigation funder Litigation Lending Services (NZ) Limited announced plans for a representative action against banks in New Zealand for certain fees charged to New Zealand customers over the past six years. Proceedings were filed against the Bank on 25 June 2013. The potential outcome of this litigation cannot be determined with any certainty at this stage.

The Banking Group has other contingent liabilities in respect of actual and possible claims and court proceedings.

On 3 December 2014, the Commerce Commission and the Financial Markets Authority (FMA) announced settlements with the Bank relating to the Commission's and the FMA's investigations into the promotion, sale and offer of interest rate swaps to rural customers from 2005 to 2009; the settlement includes a payment fund of \$18.5 million and a contribution to the Commission's and the FMA's costs.

An assessment of the Banking Group's likely loss in respect of these matters has been made on a case-by-case basis and provision made where deemed necessary.

Directors' Statement

As at the date on which this Disclosure Statement is signed, after due enquiry, each Director believes that:

- (i) The Disclosure Statement contains all the information that is required by the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order 2014; and
- (ii) The Disclosure Statement is not false or misleading.

Over the six months ended 31 March 2015, after due enquiry, each Director believes that:

- (i) ANZ Bank New Zealand Limited has complied with all Conditions of Registration that applied during that period;
- (ii) Credit exposures to connected persons were not contrary to the interests of the Banking Group;
- (iii) ANZ Bank New Zealand Limited had systems in place to monitor and control adequately the Banking Group's material risks, including credit risk, concentration of credit risk, interest rate risk, currency risk, equity risk, liquidity risk, operational risk and other business risks, and that those systems were being properly applied.

This Disclosure Statement is dated, and has been signed by or on behalf of all Directors of the Bank on, 14 May 2015.

Independent Auditor's Review Report

To the Shareholder of ANZ Bank New Zealand Limited

We have reviewed pages 3 to 27 of the interim financial statements of ANZ Bank New Zealand Limited (the Bank) and its subsidiary companies (the Banking Group) prepared and disclosed in accordance with the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order 2014 (the Order) and the supplementary information prescribed in Schedules 3, 5, 7, 11, 13, 16 and 18 of the Order. The interim financial statements, and supplementary information, provide information about the past financial performance and cash flows of the Banking Group and its financial position as at 31 March 2015.

Directors' responsibility for the disclosure statement

The Directors of ANZ Bank New Zealand Limited are responsible for the preparation and presentation of the Disclosure Statement, which includes interim financial statements prepared in accordance with Clause 25 of the Order which give a true and fair view of the financial position of the Banking Group as at 31 March 2015 and its financial performance and cash flows for the six months ended on that date. The Directors are also responsible for such internal controls as the Directors determine are necessary to enable the preparation of the Disclosure Statement that is free from material misstatement whether due to fraud or error.

They are also responsible for the preparation of supplementary information in the Disclosure Statement which fairly states the matters to which it relates in accordance with Schedules 3, 5, 7, 11, 13, 16 and 18 of the Order.

Reviewer's responsibility

We are responsible for reviewing the interim financial statements and the supplementary information, disclosed in accordance with Clause 25, Schedules 5, 7, 11, 13, 16 and 18 of the Order and presented to us by the Directors.

Our responsibility is to express a conclusion on the interim financial statements (excluding the supplementary information) based on our review. We conducted our review in accordance with NZ SRE 2410: *Review of Financial Statements Performed by the Independent Auditor of the Entity*. NZ SRE 2410 requires us to conclude whether anything has come to our attention that causes us to believe that the financial statements are not prepared, in all material respects, in accordance with NZ IAS 34: *Interim Financial Reporting*. As the auditor of the Banking Group, NZ SRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial statements.

We are responsible for reviewing the supplementary information (excluding the supplementary information relating to capital adequacy) in order to report to you whether, in our opinion on the basis of the procedures described below, anything has come to our attention that would cause us to believe that the supplementary information does not fairly state the matters to which it relates in accordance with Schedules 5, 7, 13, 16 and 18 of the Order.

We are responsible for reviewing the supplementary information relating to capital adequacy in order to state whether, on the basis of the procedures described below, anything has come to our attention that would cause us to believe that the information disclosed in accordance with Schedule 11 is not in all material respects prepared in accordance with the Bank's Conditions of Registration and with the Bank's internal models for credit risk and operational risk as accredited by the Reserve Bank of New Zealand and disclosed in accordance with Schedule 11 of the Order.

A review of interim financial statements in accordance with NZ SRE 2410 is a limited assurance engagement. The auditor performs procedures, primarily consisting of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. The procedures performed in a review are substantially less than those performed in an audit conducted in accordance with International Standards on Auditing (New Zealand). Accordingly we do not express an audit opinion on those financial statements.

KPMG has also provided other audit related services to the Banking Group. In addition, certain partners and employees of our firm may also deal with the Banking Group on normal terms within the ordinary course of trading activities of the Banking Group. These matters have not impaired our independence as auditors of the Banking Group. We have no other relationship with, or interest in, the Banking Group.

Review opinion

We have examined the interim financial statements including the supplementary information and based on our review, which is not an audit, nothing has come to our attention that causes us to believe that:

- a. the interim financial statements (excluding the supplementary information) do not present fairly, in all material respects, the financial position of the Banking Group as at 31 March 2015 and its financial performance and cash flows for the six months ended on that date in accordance with NZ IAS 34: *Interim Financial Reporting*;
- b. the supplementary information prescribed by Schedules 5, 7, 13, 16 and 18 of the Order does not fairly state the matters to which it relates in accordance with those Schedules; and
- c. the supplementary information relating to capital adequacy as required by Schedule 11 of the Order, is not in all material respects prepared in accordance with the Bank's Conditions of Registration and with the Bank's internal models for credit risk and operational risk as accredited by the Reserve Bank of New Zealand, and disclosed in accordance with Schedule 11 of the Order.

Our review was completed on 14 May 2015 and our review opinion is expressed as at that date.

Glossary of Terms

In this Registered Bank Disclosure Statement (Disclosure Statement) unless the context otherwise requires:

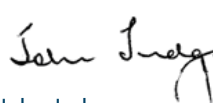

- (a) Bank means ANZ Bank New Zealand Limited;
- (b) Banking Group means the Bank and all its controlled entities;
- (c) Immediate Parent Company means ANZ Holdings (New Zealand) Limited;
- (d) Ultimate Parent Bank means Australia and New Zealand Banking Group Limited;
- (e) Overseas Banking Group means the worldwide operations of Australia and New Zealand Banking Group Limited including its controlled entities;
- (f) New Zealand business means all business, operations, or undertakings conducted in or from New Zealand identified and treated as if it were conducted by a company formed and registered in New Zealand;
- (g) NZ Branch means the New Zealand business of the Ultimate Parent Bank;
- (h) ANZ New Zealand means the New Zealand business of the Overseas Banking Group;
- (i) Registered Office is Ground Floor, ANZ Centre, 23-29 Albert Street, Auckland, New Zealand, which is also the Banking Group's address for service;
- (j) RBNZ means the Reserve Bank of New Zealand;
- (k) APRA means the Australian Prudential Regulation Authority;
- (l) the Order means the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order 2014; and
- (m) Any term or expression which is defined in, or in the manner prescribed by, the Order shall have the meaning given in or prescribed by the Order.

Annual Report

Pursuant to section 211(3) of the Companies Act 1993, the shareholder of the Bank has agreed that the Annual Report of the Bank and the Banking Group need not comply with any of the paragraphs (a), and (e) to (j) of subsection (1) and subsection (2) of section 211.

Accordingly, there is no information to be provided in this Annual Report other than the financial statements for the year ended 30 September 2014 and the audit report on those financial statements.

For and on behalf of the Board of Directors:

John Judge
Chairman
18 November 2014

David Hisco
Executive Director
18 November 2014

General Disclosures

General Matters

The Disclosure Statement has been issued in accordance with the Order.

The Bank is incorporated under the Companies Act 1993. The Bank is wholly owned by its Immediate Parent Company and ultimately by the Ultimate Parent Bank. The Immediate Parent Company of the Bank is incorporated in New Zealand and owned by ANZ Funds Pty Limited and the Ultimate Parent Bank (both incorporated in Australia). The address for service for the Ultimate Parent Bank is ANZ Centre Melbourne, Level 9, 833 Collins Street, Docklands, Victoria 3008, Australia.

The Immediate Parent Company has the power under the Bank's Constitution to appoint any person as a Director of the Bank either to fill a casual vacancy or as an additional Director or to remove any person from the office of Director, from time to time by giving written notice to the Bank. No appointment of a new Director may occur unless the RBNZ confirms that it does not object to the appointment.

Credit Rating Information

As at 18 November 2014 the Bank has three credit ratings, which are applicable to its long-term senior unsecured obligations which are payable in New Zealand in New Zealand dollars.

The Bank's Credit Ratings, which have not changed in the last two years, are:

Rating Agency	Current Credit Rating	Qualification
Standard & Poor's	AA-	Outlook Stable
Moody's Investors Service	Aa3	Outlook Stable
Fitch Ratings	AA-	Outlook Stable

General Disclosures

The following table describes the credit rating grades available:

	Standard & Poor's	Moody's Investors Service	Fitch Ratings
The following grades display investment grade characteristics:			
Ability to repay principal and interest is extremely strong. This is the highest investment category.	AAA	Aaa	AAA
Very strong ability to repay principal and interest.	AA	Aa	AA
Strong ability to repay principal and interest although somewhat susceptible to adverse changes in economic, business or financial conditions.	A	A	A
Adequate ability to repay principal and interest. More vulnerable to adverse changes.	BBB	Baa	BBB
The following grades have predominantly speculative characteristics:			
Significant uncertainties exist which could affect the payment of principal and interest on a timely basis.	BB	Ba	BB
Greater vulnerability and therefore greater likelihood of default.	B	B	B
Likelihood of default now considered high. Timely repayment of principal and interest is dependent on favourable financial conditions.	CCC	Caa	CCC
Highest risk of default.	CC to C	Ca to C	CC to C
Obligations currently in default.	D	-	RD & D

Credit ratings from Standard & Poor's and Fitch Ratings may be modified by the addition of "+" or "-" to show the relative standing within the "AA" to "B" categories. Moody's Investors Service applies numerical modifiers 1, 2, and 3 to each of the "Aa" to "Caa" classifications, with 1 indicating the higher end and 3 the lower end of the rating category.

Material Financial Support

In accordance with requirements issued by APRA pursuant to its Prudential Standards, the Ultimate Parent Bank may not provide material financial support to the Bank contrary to the following:

- the Ultimate Parent Bank should not undertake any third party dealings with the prime purpose of supporting the business of the Bank;
- the Ultimate Parent Bank should not hold unlimited exposures (should be limited as to specified time and amount) in the Bank (e.g. not provide a general guarantee covering any of the Bank's obligations);
- the Ultimate Parent Bank should not enter into cross default clauses whereby a default by the Bank on an obligation (whether financial or otherwise) is deemed to trigger a default of the Ultimate Parent Bank in its obligations;
- the Board of the Ultimate Parent Bank in determining limits on acceptable levels of exposure to the Bank should have regard to:
 - the level of exposure that would be approved to third parties of broadly equivalent credit status. In this regard, prior consultation (and in some cases

approval) is required before entering exceptionally large exposures;

- the impact on the Ultimate Parent Bank's capital and liquidity position and its ability to continue operating in the event of a failure by the Bank; and
 - the level of exposure to the Bank not exceeding:
 - 50% on an individual exposure basis; and
 - 150% in aggregate (being exposures to all similar regulated entities related to the Ultimate Parent Bank)
- of the Ultimate Parent Bank's capital base.

Additionally, the Ultimate Parent Bank may not provide material financial support in breach of the Australian Banking Act (1959). This requires APRA to exercise its powers and functions for the protection of a bank's depositors and in the event of a bank becoming unable to meet its obligations or suspending payment, the assets of the bank in Australia shall be available to meet that bank's deposit liabilities in Australia in priority to all other liabilities of the bank.

The Ultimate Parent Bank has not provided material financial support to the Bank contrary to any of the above requirements.

Guarantors

No material obligations of the Bank are guaranteed as at 18 November 2014.

ANZNZ Covered Bond Trust

Certain debt securities (Covered Bonds) issued by the Bank's wholly owned subsidiary, ANZ New Zealand (Int'l) Limited, are guaranteed by ANZNZ Covered Bond Trust Limited (the Covered Bond Guarantor), solely in its capacity as trustee of ANZNZ Covered Bond Trust. The Covered Bond Guarantor has guaranteed the payment of interest and principal of Covered Bonds with a carrying value as at 30 September 2014 of \$3,928 million, pursuant to a guarantee which is secured over a pool of assets. The Covered Bond Guarantor's address for service is Level 35, Vero Centre, 48 Shortland Street, Auckland, New Zealand. The Covered Bond Guarantor is not a member of the Banking Group and has no credit ratings applicable to its long term senior unsecured obligations payable in New Zealand dollars. The Covered Bonds have been assigned a long term rating of Aaa and AAA by Moody's Investors Service and Fitch Ratings respectively. Details of the pool of assets that secure this guarantee are provided in Note 34.

Notes to the Financial Statements

1. Significant Accounting Policies

(a) Basis of preparation

(i) Statement of compliance

These financial statements have been prepared in accordance with the requirements of the Companies Act 1993, the Financial Reporting Act 1993 and the Order. The Bank's financial statements are for ANZ Bank New Zealand Limited as a separate entity and the Banking Group's financial statements are for the Bank's consolidated group, which includes subsidiaries and associates.

These financial statements have been prepared in accordance with New Zealand Generally Accepted Accounting Practice. They comply with New Zealand equivalents to International Financial Reporting Standards (NZ IFRS) and other applicable Financial Reporting Standards, as appropriate for profit-oriented entities. The financial statements comply with International Financial Reporting Standards (IFRS).

The principal accounting policies adopted in the preparation of these financial statements are set out below.

(ii) Use of estimates and assumptions

Preparation of the financial statements requires the use of management judgement, estimates and assumptions that affect reported amounts and the application of policies. Actual results may differ from these estimates.

Discussion of the critical accounting estimates, which include complex or subjective decisions or assessments, are covered in note 2. Such estimates will require review in future periods.

(iii) Basis of measurement

The financial statements have been prepared in accordance with the historical cost basis except that the following assets and liabilities are stated at their fair value:

- derivative financial instruments, including in the case of fair value hedging, the fair value adjustment on the underlying hedged exposure;
- available-for sale financial assets;
- financial instruments held for trading;
- financial instruments designated at fair value through profit and loss.

(iv) Changes in accounting policies and application of new accounting standards

All new and amending NZ IFRSs applicable for the first time to the Banking Group in the year ended 30 September 2014 have been applied to these financial statements effective from their required date of application. The initial application of these standards and interpretations have not resulted in any material change to the Banking Group's reported result or financial position, and have largely resulted in changes to disclosures.

The accounting policies are consistent with those of the previous financial year except as noted below.

- *Defined benefit liabilities:* The amendments to NZ IAS 19 *Employee Benefits* have been applied retrospectively, in accordance with transitional

provisions, with the net impact of initial application recognised in retained earnings as at 1 October 2012. The balances of payables and other liabilities and the associated deferred tax asset have been restated for subsequent periods.

- *Cash and cash equivalents:* Loans and advances with financial institution counterparties with original maturities of less than 90 days and remittances in transit have been removed from the definition of cash equivalents. These balances are now included in net loans and advances and settlement balances receivable respectively. The associated cash inflows/outflows form part of cash flows from operating activities. The Banking Group considers that this change better reflects the characteristics of those financial instruments.

(v) Rounding

The amounts in the financial statements have been rounded to the nearest million dollars, except where otherwise stated.

(vi) Comparatives

In addition to restatements resulting from the initial application of the amendment to NZ IAS 19, certain amounts in the comparative information have been reclassified to ensure consistency with the current year's presentation. Further information on material changes to comparative information is included in note 35.

(vii) Principles of consolidation

Subsidiaries

The consolidated financial statements of the Banking Group comprise the financial statements of the Bank and all its subsidiaries.

An entity, including a structured entity, is considered a subsidiary of the Banking Group when it is determined that control over the entity exists. Control is deemed to exist when the Banking Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Power is assessed by examining existing rights that give the Banking Group the current ability to direct the relevant activities of the entity. At times, the determination of control can be judgemental. Further detail on the judgement involved in assessing control has been provided in note 2.

The effect of all transactions between entities in the Banking Group is eliminated. Where subsidiaries have been sold during the year, their operating results have been included to the date of disposal. When control ceases, the assets and liabilities of the subsidiary and other components of equity are derecognised. Any resulting gain or loss is recognised in profit or loss.

In the Bank's financial statements, investments in subsidiaries are carried at cost less accumulated impairment losses.

Notes to the Financial Statements

Associates

The Banking Group applies the equity method of accounting for associates.

The Banking Group's share of results of associates is included in the consolidated income statement. Shares in associates are carried in the consolidated balance sheet at cost plus the Banking Group's share of post acquisition net assets less accumulated impairment. Interests in associates are reviewed for any indication of impairment at least at each reporting date. Where an indication of the impairment exists, the recoverable amount of the associate is determined as the higher of the associate's fair value less costs to sell and its value in use. A discounted cash flow methodology and other methodologies, such as the capitalisation of earnings method, are used to determine the reasonableness of the valuation.

In the Bank's financial statements investments in subsidiaries and associates are carried at cost less accumulated impairment losses.

(viii) Foreign currency translation

Functional and presentation currency

Items included in the financial statements of each of the Banking Group's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The Banking Group's financial statements are presented in New Zealand dollars, which is the Banking Group's functional and presentation currency.

Foreign currency transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities resulting from foreign currency transactions are subsequently translated at the spot rate at reporting date.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different to those at which they were initially recognised or included in a previous financial report, are recognised in the income statement in the period in which they arise.

Translation differences on non-monetary items measured at fair value through profit or loss are reported as part of the fair value gain or loss on these items.

Translation differences on non-monetary items measured at fair value through equity, such as equities classified as available-for-sale financial assets, are included in the available-for-sale revaluation reserve in equity.

(b) Income recognition

Income is recognised to the extent that it is probable that economic benefits will flow to the Banking Group and that revenue can be reliably measured.

(i) Interest income

Interest income is recognised as it accrues, using the effective interest method.

The effective interest method calculates the amortised cost of a financial asset or financial liability and allocates the interest income or interest expense, including any fees

and directly related transaction costs that are an integral part of the effective interest rate, over the expected life of the financial asset or liability so as to achieve a constant yield on the financial asset or liability.

For assets subject to prepayment, expected life is determined on the basis of the historical behaviour of the particular asset portfolio, taking into account contractual obligations and prepayment experience assessed on a regular basis.

(ii) Fee and commission income

Fees and commissions received that are integral to the effective interest rate of a financial asset are recognised using the effective interest method. For example, loan commitment fees, together with related direct costs, are deferred and recognised as an adjustment to the effective interest rate on a loan once drawn. Commitment fees to originate a loan which is unlikely to be drawn down are recognised as fee income as the service is provided.

Fees and commissions that relate to the execution of a significant act (for example, advisory or arrangement services, placement fees and underwriting fees) are recognised when the significant act has been completed.

Fees charged for providing ongoing services (for example, maintaining and administering existing facilities) are recognised as income over the period the service is provided.

(iii) Dividend income

Dividends are recognised as revenue when the right to receive payment is established.

(iv) Gain or loss on sale of assets

The gain or loss on the disposal of assets is determined as the difference between the carrying amount of the assets at the time of disposal and the proceeds of disposal net of incremental disposal costs. This is recognised as an item of other income in the period in which the significant risks and rewards of ownership are transferred to the buyer.

(c) Expense recognition

Expenses are recognised in the income statement on an accruals basis.

(i) Interest expense

Interest expense on financial liabilities measured at amortised cost is recognised in the income statement as it accrues using the effective interest method.

(ii) Loan origination expenses

Certain loan origination expenses are an integral part of the effective interest rate of a financial asset measured at amortised cost. These loan origination expenses include:

- fees and commissions payable to brokers and certain customer incentive payments in respect of originating lending business; and
- other expenses of originating lending business, such as external legal costs and valuation fees, provided these are direct and incremental costs related to the issue of a financial asset.

Such loan origination expenses are initially recognised as part of the cost of acquiring the financial asset and amortised as part of the effective yield of the financial

Notes to the Financial Statements

asset over its expected life using the effective interest method.

(iii) Lease payments

Leases entered into by the Banking Group as lessee are predominantly operating leases, and the operating lease payments are recognised as an expense on a straight-line basis over the lease term.

(d) Income tax

(i) Income tax expense

Income tax on earnings for the year comprises current and deferred tax and is based on the applicable tax law. It is recognised in the income statement as tax expense, except when it relates to items credited directly to equity, in which case it is recorded in equity, or where it arises from the initial accounting for a business combination, in which case it is included in the determination of goodwill.

(ii) Current tax

Current tax is the expected tax payable on taxable income for the year, based on tax rates (and tax laws) which are enacted or substantively enacted by the reporting date and including any adjustment for tax payable in previous periods. Current tax for current and prior periods is recognised as a liability (or asset) to the extent that it is unpaid (or refundable).

(iii) Deferred tax

Deferred tax is accounted for using the comprehensive tax balance sheet method. It is generated by temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax base.

Deferred tax assets, including those related to the tax effects of income tax losses and credits available to be carried forward, are recognised only to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences or unused tax losses and credit can be utilised.

Deferred tax liabilities are recognised for all taxable temporary differences, other than those relating to taxable temporary differences arising from goodwill. They are also recognised for taxable temporary differences arising on investments in subsidiaries, branches, associates and joint ventures, except where the Banking Group is able to control the reversal of the temporary differences and it is probable that temporary differences will not reverse in the foreseeable future. Deferred tax assets associated with these interests are recognised only to the extent that it is probable that the temporary difference will reverse in the foreseeable future and there will be sufficient taxable profits against which to utilise the benefits of the temporary difference.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period(s) when the asset and liability giving rise to them are realised or settled, based on tax rates and tax laws that have been enacted or substantively enacted by the reporting date. The measurement reflects the tax consequences that would follow from the manner in which the Banking

Group, at the reporting date, recovers or settles the carrying amount of its assets and liabilities.

(iv) Offsetting

Current and deferred tax assets and liabilities are offset only to the extent that they relate to income taxes imposed by the same taxation authority, there is a legal right and intention to settle on a net basis and it is allowed under the tax law of the relevant jurisdiction.

(e) Assets

Financial assets

(i) Financial assets and liabilities at fair value through profit or loss

Trading securities are financial instruments acquired principally for the purpose of selling in the short-term or which are a part of a portfolio which is managed for short-term profit-taking. Trading securities are initially recognised and subsequently measured in the balance sheet at their fair value.

Derivatives that are not effective accounting hedging instruments are carried at fair value through profit or loss. In addition, certain financial assets and liabilities are designated and measured at fair value through profit or loss where the following applies:

- the asset represents investments backing insurance policy liabilities;
- doing so eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets and liabilities, or recognising the gains or losses thereon, on different bases;
- a group of financial assets or financial liabilities or both is managed and its performance evaluated on a fair value basis; or
- the financial instrument contains an embedded derivative, unless the embedded derivative does not significantly modify the cash flows or it is clear, with little or no analysis, that it would not be separately recorded.

Changes in the fair value (gains or losses) of these financial instruments are recognised in the income statement in the period in which they occur.

Purchases and sales of trading securities are recognised on trade date.

(ii) Derivative financial instruments

Derivative financial instruments are contracts whose value is derived from one or more underlying price index or other variables. They include swaps, forward rate agreements, futures, options and combinations of these instruments.

Derivative financial instruments are entered into for trading purposes (including customer-related reasons) or for hedging purposes (where the derivative instruments are used to hedge the Banking Group's exposures to interest rate risk, currency risk, price risk, credit risk and other exposures relating to non-trading positions).

Derivative financial instruments are recognised initially at fair value with gains or losses from subsequent measurement at fair value being recognised in the income

Notes to the Financial Statements

statement. Valuation adjustments are integral in determining the fair value of derivatives. This includes a credit valuation adjustment (CVA) to reflect the credit worthiness of the counterparty and funding valuation adjustment (FVA) to account for the funding cost inherent in the portfolio.

Where the derivative is designated and is effective as a hedging instrument, the timing of the recognition of any resultant gain or loss in the income statement is dependent on the hedging designation. These hedging designations and associated accounting are as follows:

Fair value hedge

Where the Banking Group hedges the fair value of a recognised asset or liability or firm commitment, changes in the fair value of the derivative designated as a fair value hedge are recognised in the income statement. Changes in the fair value of the hedged item attributable to the hedged risk are reflected in adjustments to the carrying value of the hedged item, which are also recognised in the income statement.

Hedge accounting is discontinued when the hedge instrument expires or is sold, terminated, exercised or no longer qualifies for hedge accounting. The resulting adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to the income statement over the period to maturity of the hedged item. If the hedged item is sold or repaid, the unamortised fair value adjustment is recognised immediately in the income statement.

Cash flow hedge

The Banking Group designates derivatives as cash flow hedges where the instrument hedges the variability in cash flows of a recognised asset or liability, a foreign exchange component of a firm commitment, or a highly probable forecast transaction. The effective portion of changes in the fair value of derivatives qualifying and designated as cash flow hedges is deferred to the hedging reserve, which forms part of shareholders' equity. Any ineffective portion is recognised immediately in the income statement. Amounts deferred in equity are recognised in the income statement in the period during which the hedged forecast transactions take place.

When the hedge expires, is sold, terminated, exercised, or no longer qualifies for hedge accounting, the cumulative amount deferred in equity remains in the hedging reserve, and is subsequently transferred to the income statement when the hedged item is recognised in the income statement.

When a forecast hedged transaction is no longer expected to occur, the amount deferred in equity is recognised immediately in the income statement.

Derivatives that do not qualify for hedge accounting

All gains and losses from changes in the fair value of derivatives that are not designated in a hedging relationship but are entered into to manage the interest rate and foreign exchange risk of the Banking Group are recognised in the income statement. Under certain circumstances, the component of the fair value change in the derivative which relates to current period realised and

accrued interest is included in net interest income. The remainder of the fair value movement is included in other income.

(iii) Available-for-sale assets

Available-for-sale assets comprise non-derivative financial assets which the Banking Group designates as available-for-sale but which are not deemed to be held principally for trading purposes, and include equity investments and quoted debt securities.

They are initially recognised at fair value plus transaction costs. Subsequent gains or losses arising from changes in fair value are included as a separate component of equity in the available-for-sale revaluation reserve. When the asset is sold, the cumulative gain or loss relating to the asset is transferred to the income statement.

Where there is objective evidence of impairment on an available-for-sale asset, the cumulative loss related to that asset is removed from equity and recognised in the income statement, as an impairment expense for debt instruments or as non-interest income for equity instruments. If, in a subsequent period, the amount of an impairment loss relating to an available-for-sale debt instrument decreases and the decrease can be linked objectively to an event occurring after the impairment event, the loss is reversed through the income statement through the impairment expense line.

Purchases and sales of available-for-sale financial assets are recognised on trade date, being the date on which the Banking Group commits to purchase or sell the asset.

(iv) Net loans and advances

Loans and advances are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Banking Group provides money to a debtor with no intention of trading the loans and advances. The loans and advances are initially recognised at fair value plus transaction costs that are directly attributable to the issue of the loan or advance. They are subsequently measured at amortised cost using the effective interest method, unless specifically designated on initial recognition at fair value through profit or loss.

All loans are graded according to the level of credit risk.

Net loans and advances include direct finance provided to customers such as bank overdrafts, credit cards, term loans, finance lease receivables and commercial bills.

Impairment of loans and advances

Loans and advances are reviewed at least at each reporting date for impairment. Credit impairment provisions are raised for exposures that are known to be impaired. Exposures are impaired and impairment losses are recorded if, and only if, there is objective evidence of impairment as a result of one or more loss events, that occurred after the initial recognition of the loan and prior to the reporting date, and that loss event, or events, has had an impact on the estimated future cash flows of the individual loan or the collective portfolio of loans that can be reliably estimated.

Notes to the Financial Statements

Impairment is assessed for assets that are individually significant (or on a portfolio basis for small value loans) and then on a collective basis for those exposures not individually known to be impaired.

Exposures that are assessed collectively are placed in pools of similar assets with similar risk characteristics. The required provision is estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the collective pool. The historical loss experience is adjusted based on current observable data such as changed economic conditions. The provision also takes account of the impact of inherent risk of large concentrated losses within the portfolio and an assessment of the economic cycle.

The estimated impairment losses are measured as the difference between the asset's carrying amount and the estimated future cash flows discounted to their present value. As this discount unwinds during the period between recognition of impairment and recovery of the cash flow, it is recognised in interest income. The process of estimating the amount and timing of cash flows involves considerable management judgement. These judgements are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

Impairment of capitalised acquisition expenses is assessed through comparing the actual behaviour of the portfolio against initial expected life assumptions.

The provision for impairment loss (individual and collective) is deducted from loans and advances in the balance sheet and the movement for the reporting period is reflected in the income statement.

When a loan is uncollectible, either partially or in full, it is written off against the related provision for loan impairment. Unsecured facilities are normally written-off when they become 180 days past due or earlier in the event of the customer's bankruptcy or similar legal release from the obligation. However, a certain level of recoveries is expected after the write-off, which is reflected in the amount of the provision for credit losses. In the case of secured facilities, remaining balances are written-off after proceeds from the realisation of collateral have been received, if there is a shortfall.

Where impairment losses recognised in previous periods have subsequently decreased or no longer exist, such impairment losses are reversed in the income statement.

A provision is also raised for off-balance sheet items such as commitments that are considered likely to result in an expected loss.

(v) *Lease receivables*

Contracts to lease assets and hire purchase agreements are classified as finance leases if they transfer substantially all the risks and rewards of ownership of the asset to the customer or an unrelated third party. All other lease contracts are classified as operating leases.

(vi) *Repurchase agreements*

Securities sold under repurchase agreements are retained in the financial statements where substantially all the risks and rewards of ownership remain with the Banking Group,

and a counterparty liability is disclosed under deposits and other borrowings. The difference between the sale price and the repurchase price is accrued over the life of the repurchase agreement and charged to interest expense in the income statement.

Securities purchased under agreements to resell, where the Banking Group does not acquire the risks and rewards of ownership, are recorded as cash or net loans and advances depending on the term of the agreement. The security is not included in the balance sheet. Interest income is accrued on the underlying loan amount.

Securities borrowed are not recognised in the balance sheet, unless these are sold to third parties, at which point the obligation to repurchase is recorded as a financial liability at fair value with fair value movements included in the income statement.

(vii) *Derecognition*

The Banking Group enters into transactions where it transfers financial assets recognised on its balance sheet yet retains either all the risks and rewards of the transferred assets or a portion of them. If all, or substantially all, the risks and rewards are retained, the transferred assets are not derecognised from the balance sheet.

In transactions where substantially all the risks and rewards of ownership of a financial asset are neither retained nor transferred, the Banking Group derecognises the asset if control over the asset is lost. In transfers where control over the asset is retained, the Banking Group continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset. The rights and obligations retained or created in the transfer are recognised separately as assets and liabilities as appropriate.

Non-financial assets

(viii) *Goodwill*

Goodwill represents the excess of the purchase consideration over the fair value of the identifiable net assets of a controlled entity at the date of gaining control. Goodwill is recognised as an asset and not amortised, but is assessed for impairment at least annually or more frequently if there is an indication that the goodwill may be impaired. Where the assessment results in the goodwill balance exceeding the value of expected future benefits, the difference is charged to the income statement. Any impairment of goodwill is not subsequently reversed.

(f) **Liabilities**

Financial liabilities

(i) *Deposits and other borrowings*

Deposits and other borrowings include certificates of deposit, interest bearing deposits, UDC secured investments, commercial paper and other related interest and non-interest bearing financial instruments. Deposits and other borrowings, excluding commercial paper, are initially recognised at fair value plus transaction costs and subsequently measured at amortised cost. The interest expense is recognised using the effective interest method. Commercial paper is designated at fair value through

Notes to the Financial Statements

profit or loss, with fair value movements recorded directly in the income statement, which reflects the basis on which it is managed.

(ii) *Bonds, notes and subordinated debt*

Bonds, notes and subordinated debt are accounted for in the same way as deposits and other borrowings, except for those bonds and notes which are designated at fair value through profit or loss on initial recognition, with fair value movements recorded in the income statement.

(iii) *Financial guarantee contracts*

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due. Financial guarantees are issued in the ordinary course of business, consisting of letters of credit, guarantees and acceptances. Financial guarantees are initially recognised in the financial statements at fair value on the date the guarantee was given; typically this is the premium received. Subsequent to initial recognition, the Banking Group's liabilities under such guarantees are measured at the higher of their amortised amount and the best estimate of the expenditure required to settle any financial obligation arising at the balance sheet date. These estimates are determined based on experience of similar transactions and history of past losses.

(iv) *Derecognition*

Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled or expires.

(g) **Equity**

(i) *Shares*

Issued shares are recognised at the amount paid per share net of directly attributable issue costs.

(ii) *Reserves*

Available-for-sale revaluation reserve

This reserve includes changes in the fair value of available-for-sale financial assets, net of tax. These changes are transferred to the income statement (in non-interest income) when the asset is derecognised. Where the asset is impaired, the changes are transferred to the impairment expense line in the income statement for debt instruments and in the case of equity instruments to non-interest income.

Cash flow hedging reserve

This reserve includes the fair value gains and losses associated with the effective portion of designated cash flow hedging instruments.

(h) **Presentation**

(i) *Offsetting of income and expenses*

Income and expenses are not offset unless required or permitted by an accounting standard. This generally arises in the following circumstances:

- where transaction costs form an integral part of the effective interest rate of a financial instrument which is measured at amortised cost, these are

offset against the interest income generated by the financial instrument;

- where gains and losses relating to fair value hedges are assessed as being effective; or
- where gains and losses arise from a group of similar transactions, such as foreign exchange gains and losses.

(ii) *Offsetting of financial assets and liabilities*

Assets and liabilities are offset and the net amount reported in the balance sheet only where there is:

- a current enforceable legal right to offset the asset and liability; and
- an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(iii) *Statement of cash flows*

For cash flow statement presentation purposes, cash and cash equivalents includes cash and nostro balances included in settlement balances receivable and settlement balances payable.

Certain cash flows have been netted in order to provide more meaningful disclosure, as many of the cash flows are received and disbursed on behalf of customers and reflect the activities of the customers rather than those of the Banking Group. These include customer loans and advances, customer deposits, certificates of deposit, related party balances and trading securities.

(iv) *Goods and services tax*

Income, expenses and assets are recognised net of the amount of goods and services tax (GST) except where the amount of GST incurred is not recoverable from the Inland Revenue Department (IRD). In these circumstances, the GST is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated with the amount of GST included. The net amount of GST recoverable from, or payable to, the IRD is included as other assets or other liabilities in the balance sheet.

Cash flows are included in the cash flow statement on a net basis. The GST components of cash flows arising from investing and financing activities, which are recoverable from, or payable to, the IRD are classified as operating cash flows.

(v) *Segment reporting*

Operating segments are distinguishable components of the Banking Group that provide products or services that are subject to risks and rewards that are different to those of other operating segments. The Banking Group operates predominately in the banking industry within New Zealand. The Banking Group has very limited exposure to risk associated with operating in different economic environments or political conditions. On this basis no geographical segment information is provided.

(i) **Other**

(i) *Contingent liabilities*

Contingent liabilities acquired in a business combination are individually measured at fair value at the acquisition date. At subsequent reporting dates the value of such

Notes to the Financial Statements

contingent liabilities is reassessed based on the estimate of expenditure required to settle the contingent liability.

Other contingent liabilities are not recognised in the balance sheet but disclosed in Note 33 unless it is considered remote that the Banking Group will be liable to settle the possible obligation.

(ii) Accounting Standards not early adopted

The following standards and amendments were available for early adoption but have not been applied by the Banking Group in these financial statements. The Banking Group currently does not intend to apply any of these pronouncements until their effective date.

Standards and amendments effective for periods commencing after 1 January 2018

NZ IFRS 9 Financial Instruments

This standard is being released in phases and once finalised will replace NZ IAS 39 *Financial Instruments: Recognition and Measurement* in its entirety. The phases currently issued are:

- Phase 1: Specifies a simpler methodology for classifying and measuring financial assets, with two primary measurement categories: amortised cost and fair value.
- Phase 2: Simplifies hedge accounting requirements which more closely align with risk management activities undertaken when hedging financial and non-financial risks. Includes new impairment requirements that introduce an expected credit loss impairment model. Introduces a fair value through other comprehensive income classification for financial assets when the business model is to collect contractual cash flows and to sell financial assets.

The Banking Group is assessing the impact on the financial statements.

Notes to the Financial Statements

2. Critical Estimates and Judgement Used in Applying Accounting Policies

There are a number of critical accounting treatments which include complex or subjective judgements and estimates that may affect the reported amounts of assets and liabilities in the financial statements. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

An explanation of the judgements and estimates made by the Banking Group, in the process of applying its accounting policies, that have the most significant effect on the amounts recognised in the financial statements are set out below.

Critical accounting estimates and assumptions

Credit provisioning

The accounting policy relating to measuring the impairment of loans and advances requires the Banking Group to assess impairment at least at each reporting date. The credit provisions raised (collective and individual) represent management's best estimate of the losses incurred in the loan portfolio at balance date based on their experienced judgement.

The collective provision is estimated on the basis of historical loss experience for assets with credit characteristics similar to those in the collective pool. The historical loss experience is adjusted based on current observable data and events and an assessment of the impact of model risk. The provision also takes into account the impact of large concentrated losses within the portfolio and the economic cycle.

The use of such judgements and reasonable estimates is considered by management to be an essential part of the process and does not impact on the reliability of the provision.

Individual and collective provisioning involves the use of assumptions for estimating the amounts and timing of expected future cash flows. The process of estimating the amount and timing of cash flows involves considerable management judgement. These judgements are revised regularly to reduce any differences between loss estimates and actual loss experience.

Refer to Note 13 for details of credit impairment provisions.

Critical judgements in applying the Banking Group's accounting policies

Financial instruments at fair value

The Banking Group's financial instruments measured at fair value are stated in note 1(a)(iii). In estimating fair value the Banking Group uses, wherever possible, quoted market prices in an active market for the financial instrument.

In the event that there is no active market for the instrument, fair value is based on present value estimates or other market accepted valuation techniques. The valuation models incorporate the impact of bid/ask spread, counterparty credit spreads and other factors that would influence the fair value determined by a market participant. The selection of appropriate valuation techniques, methodology and inputs

requires judgement. These are reviewed and updated as market practice evolves.

Derivatives and hedging

The Banking Group buys and sells derivatives as part of its trading operations and to hedge its interest rate risk, currency risk, price risk, credit risk and other exposures relating to non-trading positions.

A hedging instrument is a designated derivative whose fair value or cash flows are expected to offset changes in the fair value or cash flows of a designated hedged item. A hedged item is an asset, liability, firm commitment or highly probable forecast transaction that: (a) exposes the Banking Group to the risk of changes in fair value or future cash flows; and (b) is designated as being hedged.

Judgement is required in selecting and designating hedging relationships and assessing hedge effectiveness. NZ IAS 39 *Financial Instruments: Recognition and Measurement* does not specify a single method for assessing hedge effectiveness prospectively or retrospectively. The Banking Group adopts the hypothetical derivative approach to determine hedge effectiveness in line with current risk management strategies. Hedge ineffectiveness can arise for a number of reasons and whilst a hedge may pass the effectiveness tests above it may not be perfectly effective, leaving some volatility in the income statement.

The majority of outstanding derivative positions are transacted over-the-counter and therefore need to be valued using valuation techniques. Included in the determination of the fair value of derivatives is a credit valuation adjustment (CVA) to reflect the creditworthiness of the counterparty. This is influenced by the mark-to-market of the derivative trades and by the movement in the market cost of credit. Further adjustments are made to account for the funding costs inherent in the derivative. Judgment is required to determine the appropriate cost of funding and the future expected cashflows used in this funding valuation adjustment (FVA).

Structured entities

A structured entity is an entity in which voting or similar rights are not the dominant factor in deciding who controls the entity, such as when voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. Structured entities are generally created to achieve a narrow and well defined objective with restrictions around their ongoing activities and are often thinly capitalised with a reliance on debt financing for support.

The Banking Group assesses, at inception and periodically, whether a structured entity should be consolidated based on the accounting policy outlined in note 1. Such assessments are predominantly securitisation activities and involvement with managed funds. When assessing whether the Banking Group controls (and therefore consolidates) a structured entity, judgement is required about whether the Banking Group has power over the relevant activities as well as exposure to variable returns of the structured entity. All involvement, rights and exposure to returns are considered when assessing if control exists.

The Banking Group is deemed to have power over a managed fund when it performs the function of Manager of

Notes to the Financial Statements

that managed fund. Whether the Banking Group controls the managed fund depends on whether it holds that power as principal, or as an agent for other investors. The Banking Group is considered the principal, and thus controls an managed fund, when it cannot be easily removed from the position of Manager by other investors and has variable returns through significant aggregate economic interest in that managed fund. In all other cases the Banking Group is considered to be acting in an agency capacity and does not control the managed fund.

Structured entities are consolidated when control exists. In other cases the Banking Group may simply have an interest in or may sponsor a structured entity but not consolidate it.

The Banking Group considers itself the sponsor of an unconsolidated structured entity where it is the primary party involved in the design and establishment of that structured entity and:

- where the Banking Group is the major user of that structured entity; or
- the Banking Group's name appears in the name of that structured entity or on its products; or
- the Banking Group provides implicit or explicit guarantees of that entity's performance.

Goodwill

Refer to Note 17 for details of goodwill held by the Banking Group.

The carrying value of goodwill is subject to an impairment test to ensure that the current carrying value does not exceed its recoverable value at the balance sheet date. Any excess of carrying value over recoverable amount is taken to the income statement as an impairment write down.

Goodwill has been allocated for impairment purposes to the cash generating units at which the goodwill is monitored for internal reporting purposes. Impairment testing of purchased goodwill is performed by comparing the recoverable value of each cash generating unit with the current carrying amount of its net assets, including goodwill. Judgement is required in identifying the cash-generating units to which goodwill and other assets are allocated for the purpose of impairment testing.

The recoverable amount is based on value-in-use calculations. These calculations use cash flow projections based on a number of financial budgets within each segment approved by management covering a three year period. Cash flow projections are based on a range of readily available economic assumptions including GDP and CPI. Cash flows beyond the three year period are extrapolated using a 3% growth rate.

These cash flow projections are discounted using a capital asset pricing model. As at 28 February 2014 when the last valuation was prepared, a discount rate of 11.09% was applied to each cash generating unit. The main variables in the calculation of the discount rate used are the risk free rate, the beta rate and the market risk premium. The risk free rate is based on the 10 year Government Bond Rate. The beta rate and the market risk premium are consistent with observable and comparative market rates applied in the regional banking sector. Market observable information is not readily available at the segment level therefore management performed stress tests for key sensitivities in each segment.

Management believes any reasonable possible change in the key assumptions on which the recoverable amount is based would not cause the Banking Group's carrying amount to exceed its recoverable amount.

Notes to the Financial Statements

3. Risk Management Policies

The Banking Group recognises the importance of effective risk management to its business success. Management is committed to achieving strong control and a distinctive risk management capability that enables the Banking Group business units to meet their performance objectives.

The Banking Group approaches risk through managing the various elements of the system as a whole rather than viewing them as independent and unrelated parts. The risk management division (Risk Management) is independent of the business, with clear delegations from the Board, and operates within a comprehensive framework comprising:

- The Board providing leadership, setting risk appetite/strategy and monitoring progress;
- A strong framework for development and maintenance of Banking Group-wide risk management policies, procedures and systems, overseen by an independent team of risk professionals;
- The use of sophisticated risk tools, applications and processes to execute the global risk management strategy across the Banking Group;
- Business unit level accountability, as the “first line of defence”, for the management of risks in alignment with the Banking Group’s strategy; and
- Independent oversight to ensure business unit level compliance with policies, regulations and laws, and to provide regular risk evaluation and reporting.

The Banking Group manages risk through an approval, delegation and limits structure. Regular reviews of the policies, systems and risk reports, including the effectiveness of the risk management systems, discussions covering the Banking Group’s response to emerging risk issues and trends, and that the requisite culture and practices are in place across the Banking Group, are conducted within the Banking Group and also by the Ultimate Parent Bank. The Board has responsibility for reviewing all aspects of risk management.

The Board has ultimate responsibility for overseeing the effective deployment of risk management frameworks, policies and processes within New Zealand. The Bank’s Risk Committee assists the Board in this function. The role of the Risk Committee is to assist the Board in the effective discharge of its responsibilities for business, market, credit, operational, compliance, liquidity, product and reputational risk management, and to liaise and consult with the Ultimate Parent Bank Risk Committee as required. Risk Management, via the Chief Risk Officer, coordinates risk management activities directly between Business Unit risk functions and Ultimate Parent Bank Group Risk Management functions.

The risk management process is subject to oversight by the Risk Committee of the Ultimate Parent Bank Board. This includes the review of risk portfolios and the establishment of prudential policies and controls.

The Banking Group’s risk management policies are essentially the same as the Ultimate Parent Bank, but are tailored where required to suit the local New Zealand regulatory and business environment.

The Audit Committee, which is a sub-committee of the Board, has responsibility for ensuring the integrity of the Banking Group’s financial controls, reporting systems and internal audit standards. It meets at least four times a year

and reports directly to the Board. All members of the Audit Committee are non-executive directors.

Financial risk management

Refer to Note 27 for detailed disclosures on the Banking Group’s financial risk management policies.

Operational Risk

Operational risk is the risk arising from day to day operational activities which may result in direct or indirect loss. These losses may result from failure to comply with policies, procedures, laws and regulations, from fraud or forgery, from a breakdown in the availability or integrity of services, systems and information, or damage to the Banking Group’s reputation.

Examples include failure to comply with policy and legislation, human error, natural disasters, fraud and other malicious acts. Where appropriate, risks are mitigated by insurance.

Risk Management is responsible for establishing the Banking Group’s operational risk framework and associated Banking Group-wide policies. Business units are responsible for the identification, analysis, assessment and treatment of operational risks on a day-to-day basis.

Business units have primary responsibility for the identification and management of operational risk with executive oversight provided by the relevant Retail and Wholesale Risk Forums. The Bank’s Operational Risk Executive Committee (OREC) undertakes the governance function through the bi-monthly monitoring of operational risk performance across the Banking Group. The Board and Risk Management conduct effective oversight through the approval of operational risk policies and frameworks and monitoring key operational risk metrics.

Compliance

The Banking Group conducts its business in accordance with all relevant compliance requirements. In order to assist the Banking Group identify, manage, monitor and measure its compliance obligations, the Banking Group has a comprehensive regulatory compliance framework in place, which addresses both external (regulatory) and internal compliance.

Risk Management, in conjunction with business unit staff ensure the Banking Group operates within a compliance infrastructure and framework that incorporates new and changing business obligations and processes.

The compliance policies and their supporting framework seek to minimise material risks to the Banking Group’s reputation and value that could arise from non-compliance with laws, regulations, industry codes and internal standards and policies. Business units have primary responsibility for the identification and management of compliance. Risk Management provides policy and framework, measurement, monitoring and reporting, as well as leadership in areas such as anti-money laundering procedures and matters of prudential compliance. The Bank’s OREC, the Chief Risk Officer, the Board and the Risk Committee of the Ultimate Parent Bank Board conduct board and executive oversight.

Notes to the Financial Statements

Global Internal Audit

Global Internal Audit is a function independent of management whose role is to provide the Board and management with an effective and independent appraisal of the internal controls established by management. Operating under a Board approved Charter, the reporting line for the outcomes of work conducted by Global Internal Audit is direct to the Chair of the Audit Committee, with a direct communication line to the Chief Executive Officer and the external auditor.

The Global Internal Audit Plan is developed utilising a risk based approach and is refreshed on a quarterly basis. The Audit Committee approves the plan, the associated budget and any changes.

All audit activities are conducted in accordance with local and international auditing standards, and the results of the activities are reported to the Audit Committee, Risk Committee and management. These results influence the performance assessment of business heads.

Furthermore, Global Internal Audit monitors the remediation of audit issues and highlights the current status of any outstanding audits.

³ Includes fees for controls reports, comfort letters and other agreed upon procedures engagements.

⁴ Amounts include fees for audits of annual financial statements and audits of summary financial statements for inclusion in prospectuses for ANZ PIE funds, and comfort letters and other agreed upon procedures engagements for The Bonus Bonds Trust and ANZ Staff Foundation.

It is the Banking Group's policy that, subject to the approval of the Ultimate Parent Bank's Audit Committee, KPMG can provide assurance and other audit-related services that, while outside the scope of the statutory audit, are consistent with the role of auditor. KPMG may not provide services that are perceived to be in conflict with the role of auditor. Services that are perceived to be in conflict with the role of auditor include consulting advice and subcontracting of operational activities normally undertaken by management, and engagements where the auditor may ultimately be required to express an opinion on its own work.

Notes to the Financial Statements

7. Segment Analysis

The Banking Group is organised into four major business segments for segment reporting purposes - Retail, Commercial, Wealth and Institutional. Centralised back office and corporate functions support these segments. These segments are consistent with internal reporting provided to the chief operating decision maker, being the Bank's Chief Executive Officer.

Segmental reporting has been updated to reflect minor changes to the Banking Group's structure. Comparative data has been adjusted to be consistent with the current year's segment definitions.

Retail

Retail provides products and services to personal customers via the branch network, mortgage specialists, the contact centre and a variety of self service channels (internet banking, phone banking, ATMs, website and mobile phone banking). Core products include current and savings accounts, unsecured lending (credit cards, personal loans and overdrafts) and home loans secured by mortgages over property. Retail distributes insurance and investment products on behalf of the Wealth segment.

Commercial

Commercial provides services to Business Banking, Commercial & Agri, and UDC customers. Business Banking services are offered to small enterprises (typically with annual revenues of less than \$5 million). Commercial & Agri customers consist of primarily privately owned medium to large enterprises. The Banking Group's relationship with these businesses ranges from simple banking requirements with revenue from deposit and transactional facilities, and cash flow lending, to more complex funding arrangements with revenue sourced from a wider range of products. UDC is principally involved in the financing and leasing of plant, vehicles and equipment, mainly for small and medium sized businesses, as well as investment products.

Wealth

Wealth comprises the Private Wealth, Funds Management and Insurance businesses, which provide private banking, investment, superannuation and insurance products and services.

Institutional

Institutional provides financial services through a number of specialised units to large multi-banked corporations, often global, which require sophisticated product and risk management solutions. Those financial services include loan structuring, foreign exchange, wholesale money market services and transaction banking.

Other

Other includes treasury and back office support functions, none of which constitutes a separately reportable segment.

10. Derivative Financial Instruments

The use of derivatives and their sale to customers as risk management products is an integral part of the Banking Group's trading activities. Derivatives are also used to manage the Banking Group's own exposure to fluctuations in exchange and interest rates as part of its own asset and liability management activities.

Derivatives are subject to the same types of credit and market risk as other financial instruments and the Banking Group manages these risks in a consistent manner.

Derivatives, except for those that are specifically designated as effective hedging instruments, are classified as held for trading.

Derivatives held for trading

The held for trading classification includes two categories of derivative instruments: those held as trading positions and those used for the Banking Group's balance sheet risk management.

Trading positions

Trading positions consist of both sales to customers and market making activities. Sales to customers include the structuring and marketing of derivative products to customers which enable them to take or mitigate risks. Market making activities consist of derivatives entered into principally for the purpose of generating profits from short-term fluctuations in price or margins. Positions may be traded actively or held over a period of time to benefit from expected changes in market rates.

Balance sheet risk management

The Banking Group designates certain balance sheet risk management derivatives into hedging relationships in order to minimise income statement volatility. This volatility is created by differences in the timing of recognition of gains and losses between the derivative and the hedged item. Hedge accounting is not applied to all balance sheet risk management positions as some balance sheet risk management derivatives are classified as held for trading.

Derivatives in hedging relationships

Fair value hedges

The Banking Group's fair value hedges principally consist of interest rate swaps that are used to protect against changes in the fair value of fixed-rate long-term financial instruments due to movements in market interest rates.

Gain / (loss) on fair value hedges attributable to the hedged risk

\$ millions	Banking Group		Bank	
	30/09/2014	30/09/2013	30/09/2014	30/09/2013

- hedging instrument	42	(72)	42	(72)
Net ineffectiveness on qualifying fair value hedges	1	-	1	-

Notes to the Financial Statements

Cash flow hedges

The Banking Group's cash flow hedges comprise interest rate swaps that are used to protect against exposures to variability in future interest cash flows on non-trading assets and liabilities which bear interest at variable rates or which are expected to be refunded or reinvested in the future. The amounts and timing of future cash flows, representing both principal and interest flows, are projected for each portfolio of financial assets and liabilities on the basis of their forecast repricing profile. This forms the basis for identifying gains and losses on the effective portions of derivatives designated as cash flow hedges.

Analysis of the cash flow hedging reserve

\$ millions	Banking Group		Bank	
	30/09/2014	30/09/2013	30/09/2014	30/09/2013
Deferred gain / (loss) attributable to hedges of:				
Variable rate loan assets	(29)	(18)	(29)	(18)
Variable rate liabilities	-	15	-	15
Short term re-issuances of fixed rate customer and wholesale deposit liabilities	22	29	22	29
Total cash flow hedging reserve	(7)	26	(7)	26

All underlying hedged cash flows are expected to be recognised in the income statement in the period in which they occur, which is anticipated to take place over the next ten years (30/09/2013 ten years).

¹ The impairment loss on an impaired asset is calculated as the difference between the asset's carrying amount and the estimated future cash flows discounted to its present value using the original effective interest rate for the asset. This discount unwinds as interest income over the period the asset is held.

Less bonds and notes held by the Bank		(8)	(32)	(8)	(32)
Total bonds and notes		17,042	15,494	3,277	2,687

Bonds and notes, other than covered bonds, are unsecured and rank equally with other unsecured liabilities of the Banking Group.

¹ These bonds and notes are issued by ANZ New Zealand (Int'l) Limited and are guaranteed by the Bank.

Notes to the Financial Statements

22. Subordinated Debt

\$ millions	Banking Group		Bank	
	30/09/2014	30/09/2013	30/09/2014	30/09/2013
NZD 835,000,000 perpetual subordinated bond ¹	835	835	835	835
AUD 265,740,000 perpetual subordinated floating rate loan ¹	298	299	298	299
AUD 10,000,000 perpetual subordinated floating rate loan	11	11	11	11
Total subordinated debt issued	1,144	1,145	1,144	1,145
Less subordinated debt instruments held by the Bank	-	(1)	-	(1)
Total subordinated debt	1,144	1,144	1,144	1,144

¹These instruments qualify as tier 2 capital under RBNZ's transitional rules. Refer to Note 26 for further details.

Subordinated debt is subordinated in right of payment in the event of liquidation or wind up to the claims of depositors and all creditors of the Bank.

Subordinated debt instruments are classified as debt reflecting an assessment of the key terms and conditions of the instruments, and an assessment of the ability, and likelihood of interest payments being deferred. Certain of these instruments have interrelationships that have been considered in this assessment.

NZD 835,000,000 bond

This bond was issued by the Bank on 18 April 2008. The Bank did not elect to redeem the bond on 18 April 2013 (the First Call Date). The Bank may elect to redeem the bond on 18 April 2018 (the Second Call Date) or any interest payment date subsequent to 18 April 2018. Interest is payable half yearly in arrears on 18 April and 18 October each year, up to and including the Second Call Date and then quarterly thereafter. Should the bond not be called at the Second Call Date, the Coupon Rate from the Second Call Date onwards will be set on a quarterly basis to the three month FRA rate plus 3.00%.

As at 30 September 2014, this bond carried a BBB+ rating by Standard and Poor's and an A3 rating by Moody's.

The coupon interest on the bond was 9.66% until 18 April 2013 when it reset to 5.28% for the five year period to 18 April 2018.

This bond is listed on the New Zealand Exchange (NZX). The Market Surveillance Panel of the NZX granted the Bank a waiver from the requirements of Listing Rules 10.4 (relating to the provision of preliminary announcements of half yearly and annual results to the NZX) and 10.5 (relating to preparing and providing a copy of half yearly and annual reports to the NZX).

AUD 265,740,000 loan

This loan was drawn down by the Bank on 27 September 1996 and has no fixed maturity. Interest is payable half yearly in arrears at BBSW + 0.95% p.a., with interest payments due on 15 March and 15 September each year.

AUD 10,000,000 loan

This loan was drawn down by the Bank on 27 March 2013 and has no fixed maturity. Interest is payable half yearly in arrears on 15 March and 15 September each year. The bank may repay the loan on any interest payment date after both the NZD 835,000,000 bond and AUD 265,740,000 loan have been repaid in full.

Coupon interest is BBSW + 2.4% p.a., increasing to BBSW + 4.4% p.a. from 15 September 2018.

23. Related Party Transactions

Key management personnel

Key management personnel are defined as the Directors and senior management of the Banking Group - those persons having the authority and responsibility for planning, directing and controlling the activities of the entity. The information below includes transactions with those individuals, their close family members and their subsidiaries.

Loans made to and deposits held by key management personnel are made in the course of ordinary business on normal commercial terms and conditions no more favourable than those given to other employees or customers. Loans are on terms of repayment that range between fixed, variable and interest only, all of which have been made in accordance with the Bank's lending policies.

All transactions with key management personnel (including personally related parties) are conducted on an arm's length basis in the ordinary course of business and on commercial terms and conditions. These transactions principally consist of the provision of financial and investment services.

Transactions with other related parties

The Bank and Banking Group undertake transactions with the Immediate Parent Company, the Ultimate Parent Bank, other members of the Overseas Banking Group and associates.

These transactions principally consist of funding and hedging transactions, the provision of other financial and investment services, technology and process support, and compensation for share based payments made to Banking Group employees. Transactions with related parties outside of the Banking Group are conducted on an arm's length basis and on normal commercial terms.

In addition the Bank undertakes similar transactions with subsidiaries, which are eliminated in the consolidated Banking Group financial statements. Included within the Bank's transactions with subsidiaries is the provision of administrative functions to some subsidiaries for which no payments have been made.

24. Current and Non-current Assets and Liabilities

Assets and liabilities are classified as current if:

- it is expected they will be realised, consumed or settled in the normal operating cycle or within twelve months after the end of the reporting date; or
- they are held primarily for trading; or
- they are assets that are cash or a cash equivalent; or
- they are liabilities where there is no unconditional right to defer settlement for at least twelve months.

Non-current assets include premises and equipment and intangible assets as well as financial assets of a long-term nature. Non-current liabilities include financial and non-financial liabilities which are expected to be settled after twelve months from balance date.

For the purposes of this disclosure, the fair value of both trading and hedging derivatives has been classified as current. For more information on the contractual timing of expected outflows and inflows in relation to hedging derivatives refer to Note 27.

Total share capital	2,970,755,498	2,000,755,498	8,213	7,243

Ordinary shares

650,712 of the ordinary shares are uncalled (30/09/2013 650,712 shares uncalled).

During the year ended 30 September 2014 the Bank paid ordinary dividends of \$2,340 million (30/09/2013 \$1,065 million) to the Immediate Parent Company (equivalent to \$1.20 per share) (30/09/2013 equivalent to \$0.63 per share).

All ordinary shares share equally in dividends and any proceeds available to ordinary shareholders on winding up of the Bank. On a show of hands every member who is present at a meeting in person or by proxy or by representative is entitled to one vote, and upon a poll every member shall have one vote for each share held.

Preference shares

All preference shares were issued by the Bank to the Immediate Parent and do not carry any voting rights. The preference shares are wholly classified as equity instruments as there is no contractual obligation for the Bank to either deliver cash or another financial instrument or to exchange financial instruments on a potentially unfavourable basis. The key terms of the preference shares are as follows:

Dividends

Dividends are payable at the discretion of the directors of the Bank and are non-cumulative. The Bank must not resolve to pay any dividend or make any other distribution on its ordinary shares until the next preference dividend payment date if the Directors elect to not pay a dividend on the preference shares.

Should the Bank elect to pay a dividend, the dividend is payable at 72% of BKBM + 3.25% p.a., with dividend payments due on 1 March and 1 September each year, beginning on 1 March 2014.

Redemption features

The preference shares are redeemable, subject to prior written approval of the RBNZ, by the Bank providing notice in writing to holders of the preference shares:

- on any date on or after a change to laws or regulations that adversely affects the regulatory capital or tax treatment of the preference shares; or
- on any dividend payment date on or after 1 March 2019; or
- on any date after 1 March 2019 if the Bank has ceased to be a wholly owned subsidiary of the Ultimate Parent Bank.

The preference shares may be redeemed for nil consideration should a non-viability trigger event occur.

Rights of holders in event of liquidation

In the event of liquidation, holders of preference shares are entitled to available subscribed capital per share, *pari passu* with all holders of existing preference shares but in priority to all holders of ordinary shares. They have no entitlement to participate in further distribution of profits or assets.

The preference shares qualify as "additional tier 1 capital" for capital adequacy purposes.

Notes to the Financial Statements

26. Capital Adequacy

Capital management policies

The Banking Group's core capital objectives are to:

- Protect the interests of depositors, creditors and shareholders;
- Ensure the safety and soundness of the Banking Group's capital position; and
- Ensure that the capital base supports the Banking Group's risk appetite, and strategic business objectives, in an efficient and effective manner.

The Board holds ultimate responsibility for ensuring that capital adequacy is maintained. This includes: setting, monitoring and obtaining assurance for the Banking Group's Internal Capital Adequacy Assessment Process ("ICAAP") policy and framework; standardised risk definitions for all material risks; materiality thresholds; capital adequacy targets; internal economic risk capital principles; and risk appetite.

The Banking Group has minimum and trigger levels for common equity tier 1, tier 1 and total capital that ensure sufficient capital is maintained to:

- Meet minimum prudential requirements imposed by regulators;
- Ensure consistency with the Banking Group's overall risk profile and financial positions, taking into account its strategic focus and business plan; and
- Support the economic risk capital requirements of the business.

The Banking Group's Asset & Liability Committee and its related Capital Management Forum are responsible for developing, implementing and maintaining the Banking Group's ICAAP framework, including ongoing monitoring, reporting and compliance. The Banking Group's ICAAP is subject to independent and periodic review conducted by Internal Audit.

The Banking Group has complied with all externally imposed capital requirements to which it is subject during the current and comparative periods.

¹ These instruments qualify as tier 2 capital under the RBNZ's transitional rules. Fixing the base at the nominal amount of such instruments outstanding at 31 December 2012, their recognition is capped at 80% of that base from 1 January 2014; 60% from 1 January 2015; 40% from 1 January 2016; 20% from 1 January 2017; and from 1 January 2018 onwards these instruments will not be included in regulatory capital.

² Total credit risk weighted exposures include a scalar of 1.06 in accordance with the Bank's Conditions of Registration.

Notes to the Financial Statements

Implementation of the advanced internal ratings based approach to credit risk measurement

The Banking Group adheres to the standards of risk grading and risk quantification as set out for Internal Ratings Based (IRB) banks in the RBNZ document *Capital Adequacy Framework (Internal Models Based Approach)* (BS2B).

Under this IRB Framework banks use their own measures for calculating the level of credit risk associated with customers and exposures, by way of the primary components of:

Probability of Default (PD): An estimate of the level of risk of borrower default graded by way of rating models used both at loan origination and for ongoing monitoring;

Exposure at Default (EAD): The expected facility exposure at default. Total credit risk-weighted exposures include a scalar of 1.06 in accordance with the Bank's Conditions of Registration; and

Loss Given Default (LGD): An estimate of the potential economic loss on a credit exposure, incurred as a consequence of obligor default and expressed as a percentage of the facility's EAD. For Retail Mortgage exposures the Bank is required to apply the downturn LGDs according to loan to value (LVR) bands as set out in BS2B. For farm lending exposures the Banking Group is required to adopt RBNZ prescribed downturn LVR based LGDs, along with a minimum maturity of 2.5 years and the removal of the firm-size adjustment.

For exposures classified under Specialised Lending, the Banking Group uses slotting tables supplied by the RBNZ rather than internal estimates.

The exceptions to IRB treatment are three minor portfolios where, due to systems constraints, determining these IRB risk estimates is not currently feasible or appropriate. Risk weights for these exposures are calculated under a separate treatment as set out in the RBNZ document *Capital Adequacy Framework (Standardised Approach)* (BS2A).

Classification of Banking Group exposures according to rating approach

Internal ratings based approach

IRB Asset Class	Borrower Type	Rating Approach
Sovereign	Crown	IRB - Advanced
	RBNZ	IRB - Advanced
	Any other sovereign and its central bank	IRB - Advanced
Bank	Registered banks	IRB - Advanced
Corporate	Corporation, partnerships or proprietorships that do not fit any other asset classification	IRB - Advanced
	Corporate Small to Medium Enterprises ("SME") with turnover of less than \$50 million	IRB - Advanced
Retail Mortgages	Individuals' borrowings against residential property	IRB - Advanced
Other Retail	Other lending to individuals (including credit cards)	IRB - Advanced
	SME business borrowers	IRB - Advanced
Corporate sub-class - Specialised lending	Project finance	IRB - Slotting
	Income producing real estate	IRB - Slotting
Equity		IRB
Other assets	All other assets not falling within any of the above classes	IRB

Standardised approach

Exposure class	Exposure Type	Reason for Standardised Approach	Future Treatment
Corporate	Merchant card prepayment exposures	System constraints	Move to IRB
	Corporate credit cards	System constraints	Move to IRB
Bank	Qualifying Central Counterparty (QCCP)	Required by Basel III	Standardised

Notes to the Financial Statements

Controls surrounding credit risk rating systems

The term "Rating Systems" covers all of the methods, processes, controls, data collection and technology that support the assessment of credit risk, the assignment of internal credit risk ratings and the quantification of associated default and loss estimates.

All material aspects of the Rating Systems and risk estimate processes are governed by the Banking Group's Risk Committee. Risk grades are an integral part of reporting to senior management and executives. Management and staff of credit risk functions, in conjunction with the relevant Retail and Wholesale Risk Committees, regularly assess the performance of the rating systems, identify any areas for improvement and monitor progress on previously identified development work needed.

The Banking Group's Rating Systems are governed by a comprehensive framework of controls that operate at the business unit and support centres, and through central audit and validation processes. All policies, model designs, model reviews, methodologies, validations, responsibilities, systems and processes supporting the ratings systems are fully documented.

The Banking Group's Retail and Wholesale ratings functions work closely with the Ultimate Parent Bank's risk ratings functions, are independent of operational lending activities and are responsible for the ratings strategies and ongoing management of credit risk models within New Zealand. The annual review of models used across the Banking Group is a function undertaken by the ANZ Decision Model Validation Unit, which is also independent of credit risk operational functions and is responsible for overseeing the design, implementation and performance of all rating models in the Banking Group.

The target approach to modelling for the Banking Group is to deploy the model most suitable for the environment. At present this involves an approach to modelling that combines models developed in New Zealand and models developed by the Ultimate Parent Bank, tested and validated for use in New Zealand, as appropriate.

Total other IRB credit risk exposures	2,729	45	1,289	103

Other exposures have been calculated in accordance with BS2B.

Credit risk mitigation

The Banking Group assesses the integrity and ability of counterparties to meet their contractual financial obligations for repayment. The Banking Group generally takes collateral security in the form of real property or a security interest in personal property, except for major government, bank and corporate counterparties of strong financial standing. Longer term consumer finance, in the form of housing loans, is generally secured against real estate while short term revolving consumer credit is generally unsecured.

As at 30 September 2014, under the IRB approach, the Banking Group had \$1,121 million of Corporate exposures covered by guarantees where the presence of the guarantees was judged to reduce the underlying credit risk of the exposures. Information on the total value of exposures covered by financial guarantees and eligible financial collateral is not disclosed, as the effect of these guarantees and collateral on the underlying credit risk exposures is not considered to be material.

Operational risk

The Banking Group uses the Advanced Measurement Approach for determining its regulatory capital requirement for operational risk calculated in accordance with BS2B. As at 30 September 2014 the Banking Group had an implied risk weighted exposure of \$5,336 million for operational risk and an operational risk capital requirement of \$427 million.

Operational risk capital is modelled at a New Zealand geographic level and then distributed and adjusted for the business environment and internal controls down to the business units using the Risk Scenario Methodology. This methodology ensures that there is sufficient operational risk capital held as a buffer for rare and severe unexpected operational loss events that may impact the New Zealand business. The Methodology applies a combination of expert judgement, business unit risk profiles, audit findings, and internal and external loss events to derive a series of business specific Risk Scenarios that are applied to the capital model. The Risk Scenario approach

- assesses the level of the Bank's exposure to specified risk scenarios;
- assesses the scope and quality of the Bank's internal control environment, key operational processes and risk mitigants; and
- directly links the risk scenarios to operational risk capital.

The Banking Group's operating risk capital is calculated using the Ultimate Parent Bank's methodology, but with standalone New Zealand inputs to ensure there are no diversification benefits.

The Banking Group does not incorporate any insurance mitigation impact into its capital number. Accordingly, there are no insurance related questions contained within the Risk Scenario Methodology.

Market risk

The aggregate market risk exposures below have been calculated in accordance with BS2B. The peak end-of-day market risk exposures are for the half-year ended 30 September 2014.

\$ millions	Implied risk weighted exposure		Aggregate capital charge		Peak occurred on
	Period end	Peak	Period end	Peak	
Unaudited 30/09/2014					
Interest rate risk	5,653	5,829	452	466	26/09/2014
Foreign currency risk	52	162	4	13	16/07/2014
Equity risk	2	2	-	-	1/07/2014
	<u>5,707</u>		<u>456</u>		

Notes to the Financial Statements

Pillar II capital for other material risks

The Banking Group has an Internal Capital Adequacy Assessment Process (ICAAP) which complies with the requirements of the Bank's Conditions of Registration.

Under the Banking Group's ICAAP it identifies and measures all "other material risks", which are those material risks that are not explicitly captured in the calculation of the Banking Group's tier 1 and total capital ratios. The other material risks identified by the Banking Group include business risk, pension risk, insurance risk, funds management risk, lapse risk, premises and equipment risk and capitalised origination fees risk.

The Banking Group's internal capital allocation for these other material risks is \$369 million (30/09/2013 \$343 million).

The Banking Group regularly reviews the methodologies used to calculate the economic capital allocated to other material risks. Updated capital methodologies (particularly relating pension risk and business retention risk) were applied in November 2013 and prior periods restated accordingly.

Capital adequacy of the Ultimate Parent Bank

Basel III capital ratios

	Overseas Banking Group		Ultimate Parent Bank (Extended Licensed Entity)	
	30/09/2014	30/09/2013	30/09/2014	30/09/2013
Unaudited				
Common equity tier 1 capital	8.8%	8.5%	9.1%	8.5%
Tier 1 capital	10.7%	10.4%	11.3%	10.6%
Total capital	12.7%	12.2%	13.4%	12.5%

For calculation of minimum capital requirements under Pillar 1 (Capital Requirements) of the Basel Accord, APRA has accredited the Overseas Banking Group to use the Advanced Internal Ratings Based (AIRB) methodology for calculation of credit risk weighted assets and the Advanced Measurement Approach (AMA) for the operational risk weighted asset equivalent.

Under prudential regulations, the Overseas Banking Group is required to maintain a Prudential Capital Ratio (PCR) as determined by APRA. The Overseas Banking Group exceeded the PCR set by APRA as at 30 September 2014 and for the comparative prior periods.

The Overseas Banking Group is required to publicly disclose Pillar 3 financial information as at 30 September 2014. The Overseas Banking Group's Pillar 3 disclosure document for the quarter ended 30 September 2014, in accordance with APS 330: *Public Disclosure of Prudential Information*, discloses capital adequacy ratios and other prudential information. This document can be accessed at the website anz.com.

Notes to the Financial Statements

Residential mortgages by loan-to-valuation ratio

As required by the RBNZ, LVRs are calculated as the current exposure secured by a residential mortgage divided by the Banking Group's valuation of the security property at origination of the exposure. Off balance sheet exposures include undrawn and partially drawn residential mortgage loans as well as commitments to lend. Commitments to lend are formal offers for housing lending which have been accepted by the customer.

Unaudited \$ millions LVR range	30/09/2014		Total
	On-balance sheet	Off-balance sheet	
Does not exceed 60%	19,161	3,531	22,692
Exceeds 60% and not 70%	9,445	982	10,427

Notes to the Financial Statements

27. Financial Risk Management

Strategy in using financial instruments

Financial instruments are fundamental to the Banking Group's business, constituting the core element of its operations. Accordingly, the risks associated with financial instruments are a significant component of the risks faced by the Banking Group. Financial instruments create, modify or reduce the credit, market and liquidity risks of the Banking Group's balance sheet. The Banking Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Banking Group.

The risk management and policy control framework applicable to the entities comprising the Banking Group has been set by the Board and Risk Committee of the Bank or the Ultimate Parent Bank, as appropriate. Likewise oversight and monitoring of material risk exposures of the Banking Group is undertaken by the Risk Management functions of the Bank and also the Ultimate Parent Bank. Throughout this document, references to the Risk Management of the operations within the entities comprising the Banking Group, implicitly involves oversight by both related entities.

Credit risk

Credit risk is the risk of financial loss from counterparties being unable to fulfil their contractual obligations. The Banking Group assumes credit risk in a wide range of lending and other activities in diverse markets and many jurisdictions. Credit risks arise not only from traditional lending to customers, but also from inter-bank, treasury, international trade and capital market activities around the world.

The Banking Group has an overall lending objective of sound growth for appropriate returns. The credit risk objectives of the Banking Group are set by the Board and are implemented and monitored within a tiered structure of delegated authority, designed to oversee multiple facets of credit risk, including business writing strategies, credit policies/controls, single exposures, portfolio monitoring and risk concentrations.

Credit risk management

A credit risk management framework is in place across the Banking Group with the aim of ensuring a structured and disciplined approach is maintained in achieving the objectives set by the Board. The framework focuses on policies, people, skills, controls, risk concentrations and portfolio balance. It is supported by portfolio analysis and business-writing strategies, which guide lending decisions and identify segments of the portfolio requiring attention. The effectiveness of the framework is monitored through a series of compliance and reporting processes.

An independent Risk Management function is staffed by risk specialists. In regard to credit risk management, the objective is for Risk Management to provide robust credit policies, to make independent credit decisions, and to provide strong support to front line staff in the application of sound credit practices. In addition to providing independent credit assessment on lending decisions, Risk Management also performs key roles in portfolio management by development and validation of credit risk measurement systems, loan asset

quality reporting, and development of credit standards and policies.

The credit risk management framework is top down. The framework is defined by the Banking Group's credit principles and policies. The effectiveness of the credit risk management framework is validated through the compliance and monitoring processes.

Risk Management's responsibilities for credit risk policy and management are executed through dedicated departments, which support the business units. All major business unit credit decisions require approval from both business writers and independent risk personnel.

Credit risk is controlled through a combination of approvals, limits, reviews and monitoring procedures that are carried out on a regular basis, the frequency of which is dependent upon the level of risk. Credit risk policy and management is executed through the Chief Risk Officer, who is responsible for various dedicated areas within the Risk Management division. Wholesale Risk services the Banking Group's commercial, investment banking and rural lending activities through dedicated teams. Retail Risk services the Banking Group's small business and consumer customers. The Credit Reporting team within Risk Management provides an independent overview of credit risk across the Bank at a portfolio level. The Banking Group allows sole discretion for transaction approvals at the business unit level in both the retail and wholesale lending sectors, with larger transactions approved by Retail Risk and Wholesale Risk.

The credit risk review function within Global Internal Audit also provides a further independent check mechanism to ensure the quality of credit decisions. This includes providing independent periodic checks on asset quality and compliance with the agreed standards and policies across the Banking Group.

Country risk management

Some customer credit risks involve country risk, whereby actions or events at a national or international level could disrupt servicing of commitments. Country risk arises when payment or discharge of an obligation will, or could, involve the flow of funds from one country to another or involve transactions in a currency other than the domestic currency of the relevant country.

Country ratings are assigned to each country where the Banking Group incurs country risk and have a direct bearing on the Banking Group's risk appetite for each country. The country rating is determined through a defined methodology based around external ratings agencies' ratings and internal specialist opinion. It is also a key risk consideration in the Banking Group's capital pricing model for cross border flows.

The recording of country limits provides the Banking Group with a means to identify and control country risk. Country limits ensure that there is a country-by-country ceiling on exposures that involve country risk. They are recorded by time to maturity and purpose of exposure, e.g., trade, markets and project finance. Country limits are managed centrally by the Ultimate Parent Bank, through a global country risk exposure management system managed by a specialist unit within Institutional Risk.

Notes to the Financial Statements

Portfolio stress testing

Stress testing is integral to strengthening the predictive approach to Risk Management and is a key component to managing risk appetite and business writing strategies. It creates greater understanding of impacts on financial performance through modelling relationships and sensitivities between geographic, industry and business unit exposures under a range of macro economic scenarios.

The Ultimate Parent Bank has a dedicated stress testing team that assists business and risk executives in the Banking Group to model and report periodically to management and the Board Risk Committee on a range of scenarios and stress tests.

Portfolio analysis and reporting

Credit portfolios are actively monitored at each layer of the risk structure to ensure credit deterioration is quickly detected and mitigated through the implementation of remediation strategies.

Businesses incurring credit risk undertake regular and comprehensive analysis of their credit portfolios. Issue identification and adherence to performance benchmarks are reported to Risk Management and business executives through a series of reports including monthly 'asset quality' reporting. This process is undertaken by or overseen by Risk Management ensuring an efficient and independent conduit exists to identify and communicate emerging credit issues to Banking Group executives and the Board.

Collateral management

Banking Group credit principles specify lending only what the counterparty has the capacity and ability to repay and the Banking Group sets limits on the acceptable level of credit risk. Acceptance of credit risk is firstly based on the counterparty's assessed capacity to meet contractual obligations (i.e., interest and capital repayments). Obtaining collateral is only used to mitigate credit risk. Procedures are designed to ensure collateral is managed, legally enforceable, conservatively valued and adequately insured where appropriate. Banking Group policy sets out the types of acceptable collateral, including:

- Cash;
- Mortgages over property;
- Charges over business assets, e.g., premises, stock and debtors;
- Charges over financial instruments, e.g., debt securities and equities in support of trading facilities; and
- Financial guarantees.

In the event of customer default, any loan security is usually held as mortgagee in possession while action is taken to

realise it. Therefore the Banking Group does not usually hold any real estate or other assets acquired through the enforcement of security.

The Banking Group uses ISDA Master Agreements to document derivatives' activities to limit exposure to credit losses. The credit risk is reduced by a master agreement to the extent that, if an event of default occurs, all contracts with the counterparty are terminated and settled on a net basis. Further, it is the Banking Group's preferred practice to include all products covered by the ISDA in the Credit Support Annex (CSA) in order to achieve further credit exposure reduction. Under a CSA, collateral is passed between the parties, depending on the aggregate mark-to-market (positive or negative) of derivative trades between the two entities, to mitigate the market contingent counterparty risk inherent in the outstanding positions.

Concentrations of credit risk

Concentrations of credit risk arise when a number of customers are engaged in similar business activities or activities within the same geographic region, or when they have similar risk characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions.

The Banking Group monitors its portfolios to identify and assess risk concentrations. Concentration limits are used to guard against large single customer or correlated credit risks. Risk Management, Business Unit executives and senior management monitor large exposure concentrations through a monthly list of the Banking Group's top corporate exposures. The ANZ Credit and Market Risk Committee and Board Risk Committee regularly review a comprehensive list of single customer concentration limits and customers' adherence to these limits.

Analyses of financial assets by industry sector are based on Australian and New Zealand Standard Industrial Classification (ANZSIC) codes. Notes on the following tables:

- 1 Government and local authority includes exposures to government administration and defence, education and health and community services.
- 2 Other includes exposures to electricity, gas and water, communications and personal services.
- 3 Net loans and advances exclude individual and collective provisions for credit impairment held in respect of credit related commitments.
- 4 Credit related commitments comprise undrawn facilities, customer contingent liabilities and letters of offer.

Notes to the Financial Statements

Maximum exposure to credit risk

The following table presents the maximum exposure to credit risk for on and off balance sheet financial instruments before taking account of the financial effect of any collateral held or other credit enhancements, unless such collateral meets the offsetting criteria in NZ IAS 32 *Financial Instruments: Presentation*.

The table also provides a quantification of the value of the financial charges the Banking Group holds over a borrower's specific asset (or assets) where the Banking Group is able to enforce the collateral in satisfying a debt in the event of the borrower failing to meet its contractual obligations. For the purposes of this disclosure, where the collateral held is valued at more than the corresponding credit exposure, the financial effect is capped at the value of the credit exposure. In respect of derivative financial instruments, the assessed collateral is the amount of cash collateral received and does not include the effect of any netting arrangements under ISDAs.

The most common types of collateral include:

- Security over real estate including residential, commercial, industrial and rural property;
- Cash deposits; and
- Other security over business assets including specific plant and equipment, inventory and accounts receivables.

The Banking Group also manages its credit risk by accepting other types of collateral such as guarantees and security interests over the assets of a customer's business. The assignable value of such credit mitigants is less certain and their financial effect has not been quantified for disclosure purposes. Credit exposures shown as not fully secured may benefit from such credit mitigants.

Credit quality

A core component of the Banking Group's credit risk management capability is the risk grading framework used across all major business units. A set of risk grading principles and policies is supported by a complementary risk grading methodology. Pronouncements by the International Basel Committee on Banking Supervision have been encapsulated in these principles and policies, including governance, validation and modelling requirements.

The Banking Group's risk grade profile changes dynamically through new counterparty lending and existing counterparty movements in either risk or volume. All counterparty risk grades are subject to frequent review, including statistical and behavioural reviews in consumer and small business segments, and individual counterparty reviews in segments with larger single name borrowers.

Notes to the Financial Statements

Impairment and provisioning of financial assets

The Banking Group's policy relating to the recognition and measurement of impaired assets conforms to the RBNZ's guidelines.

Loans are classified as either performing or impaired. Impaired assets are credit exposures where: there is doubt as to whether the full contractual amount (including interest) will be received; a material credit obligation is 90 days past due but not well secured; they are portfolio managed and can be held for up to 180 days past due; or concessional terms have been provided due to the financial difficulties of the customer.

An exposure is classified as past due but not impaired (less than 90 days) where the value of collateral is sufficient to repay both the principal debt and all other potential interest or there is no concern as to the creditworthiness of the counterparty in question.

The past due but not impaired (over 90 days) classification applies where contractual payments are past due by 90 days or more, or where the facility remains outside of contractual arrangements for 90 or more consecutive days, but the Banking Group believes that impairment is not appropriate on the basis of the level of security/collateral available, or the facility is portfolio managed.

The provision for credit impairment represents management's best estimate of the losses incurred in the loan portfolio at balance date based on its experienced judgement.

Distribution of gross loans and advances assets by credit quality

The credit quality of the portfolio of loans and advances is assessed by reference to the Banking Group's risk grading principles and policies supported by a complementary risk grading methodology.

Distribution by asset class of gross loans and advances by credit quality

Notes to the Financial Statements

Credit quality of gross loans and advances neither past due nor impaired

The credit quality of financial assets is assessed by the Banking Group using internal ratings which aim to reflect the relative ability of counterparties to fulfil, on time, their credit-related obligations, and is based on their current probability of default.

Internal ratings

Strong risk rating - Corporate customers demonstrating superior stability in their operating and financial performance over the long-term, and whose debt servicing capacity is not significantly vulnerable to foreseeable events. Retail customers with low expected loss. This rating band broadly corresponds to ratings "Aaa" to "Ba1" and "AAA" to "BB+" of Moody's Investors Service and Standard & Poor's respectively.

Satisfactory risk rating - Corporate customers consistently demonstrating sound operational and financial stability over the medium to long term, even though some may be susceptible to cyclical trends or variability in earnings. Retail customers with moderate expected loss. This rating band broadly corresponds to ratings "Ba2" to "B1" and "BB" to "B+" of Moody's Investors Service and Standard & Poor's respectively.

Substandard but not past due or impaired - Corporate customers demonstrating some operational and financial instability, with variability and uncertainty in profitability and liquidity projected to continue over the short and possibly medium term. Retail customers with higher expected loss. This rating band broadly corresponds to ratings "B2" to "Caa" and "B" to "CCC" of Moody's Investors Service and Standard & Poor's respectively.

Movements in the rating categories between balance dates are due to both changes in the underlying internal ratings applied to customers and to new loans written or loans rolling off.

Credit quality of financial assets that are past due but not impaired

Ageing analysis of past due loans is used by the Banking Group to measure and manage credit quality. Financial assets that are past due but not impaired include those:

- Assessed, approved and managed on a portfolio basis within a centralised environment (for example, credit cards and personal loans);
- Held on a productive basis until they are 180 days past due; and
- Managed on an individual basis.

A large portion of retail credit exposures, such as residential mortgages, are generally well secured. That is, the fair value of associated security is sufficient to ensure that the Banking Group will recover the entire amount owing over the life of the facility and there is reasonable assurance that collection efforts will result in payment of the amounts due in a timely manner.

Market risk

Market risk is the risk to the Banking Group's earnings arising from changes in interest rates, currency exchange rates, credit spreads, or from fluctuations in bond, commodity or equity prices. Market risk is generated through both trading activities and the interest rate risk inherent in the banking book.

The Banking Group conducts trading operations in interest rates, foreign exchange, commodities and debt securities.

The Banking Group has a detailed risk management and control framework to support its trading and balance sheet management activities. The framework incorporates a risk measurement approach to quantify the magnitude of market risk within trading and balance sheet portfolios. This approach, and related analysis, identifies the range of possible outcomes that can be expected over a given period of time, establishes the relative likelihood of those outcomes and allocates an appropriate amount of capital to support these activities.

Market risk management and control responsibilities

The Board Risk Committee has delegated responsibility for the oversight of market risk to the Asset & Liability Committee (ALCO), chaired by the Chief Financial Officer of the Bank. ALCO are required to ensure that market risk exposure across Traded and Non-Traded portfolios remains within the risk appetite specified by the Board Risk Committee. ALCO receive regular reporting on a range of trading and balance sheet market risk exposures.

The Risk Management division of the Banking Group, through the Chief Risk Officer, is responsible for the day-to-day oversight of market risk. This includes the implementation of a comprehensive limit and policy framework to control the amount of risk that the Banking Group will accept. Market risk limits are allocated at various levels and are reported and monitored on a daily basis. The detailed limit framework allocates individual limits to manage and control asset classes (e.g., interest rates, foreign exchange), risk factors (e.g., interest rates, volatilities) and profit and loss limits (to monitor and manage the performance of the trading portfolios).

Additional oversight and monitoring of material risk exposures of the Banking Group is undertaken by the Risk Management functions of the Ultimate Parent Bank.

Within overall strategies and policies, the control of market risk is the joint responsibility of business units and Risk Management, with the delegation of market risk limits from the Board Risk Committee to both Risk Management and the business units.

These risks are monitored daily against a comprehensive limit framework that includes Value at Risk, aggregate market position and sensitivity, product and geographic thresholds. To facilitate the management, control, measurements and reporting of market risk, the Banking Group has grouped market risk into two broad categories:

Notes to the Financial Statements

a. Traded market risk

This is the risk of loss from changes in the value of financial instruments due to movements in price factors for both physical and derivative trading positions. They arise in trading transactions where the Banking Group acts as principal with clients or with the market. The principal risk categories monitored are:

- Currency risk is the potential loss arising from the decline in the value of a financial instrument due to changes in foreign exchange rates or their implied volatilities.
- Interest rate risk is the potential loss arising from the change in the value of a financial instrument due to changes in market interest rates or their implied volatilities.
- Credit spread risk is the potential loss arising from a change in value of an instrument due to a movement of its margin or spread relative to a bench mark.

b. Non-traded market risk (or balance sheet risk)

This comprises the management of non-traded interest rate risk, liquidity, and the risk to capital and earnings as a result of movements in market rates.

Some instruments do not fall into either category but also expose the Banking Group to market risk. These include equity securities classified as available-for-sale. Regular reviews are performed to substantiate the valuation of these types of instruments.

In all trading areas the Banking Group has implemented models that calculate Value at Risk (“VaR”) exposures, monitor risk exposures against defined limits on a daily basis, and “stress test” trading portfolios.

VaR measure

A key measure of market risk is VaR. VaR is a statistical estimate of the likely daily loss and is based on historical market movements.

The confidence level is such that there is a 99% probability that the loss will not exceed the VaR estimate on any given day. Conversely there is 1% probability of the decrease in market value exceeding the VaR estimate on any given day.

The Banking Group’s standard VaR approach for both traded and non-traded risk is historical simulation. The Banking Group calculates VaR using historical changes in market rates and prices over the previous 500 business days. Traded and Non-Traded VaR is calculated using a one-day holding period.

It should be noted that because VaR is driven by actual historical observations, it is not an estimate of the maximum loss that the Banking Group could experience from an extreme market event. As a result of this limitation, the Banking Group utilises a number of other risk measures (e.g. stress testing) and associated detailed control limits to measure and manage market risk.

Traded market risks

\$ millions	Period end	Banking Group Value at risk at 99% confidence		Average for year
		High for year	Low for year	
30/09/2014				
Foreign exchange risk	0.3	1.1	-	0.4
Interest rate risk	1.5	3.1	0.9	1.8
Credit spread risk	0.3	0.6	0.1	0.3
Diversification benefit	(0.6)	n/a	n/a	(0.7)
Total VaR	1.5	3.3	0.9	1.8
30/09/2013				
Foreign exchange risk	0.3	1.4	-	0.3
Interest rate risk	2.1	3.7	1.1	2.3
Credit spread risk	0.4	1.0	0.2	0.4
Diversification benefit	(0.8)	n/a	n/a	(0.7)
Total VaR	2.0	4.1	1.2	2.3

Traded market risk VaR is calculated separately for foreign exchange and for interest rate/debt markets businesses as well as for the Banking Group. The diversification benefit reflects the historical correlation between foreign exchange, interest rate and debt markets.

To supplement the VaR methodology, the Banking Group applies a wide range of stress tests, both on individual portfolios and at the Banking Group level. The Banking Group's stress-testing regime provides senior management with an assessment of the financial impact of identified extreme events on market risk exposures of the Banking Group.

Non-traded market risk (or balance sheet risk)

The principal objectives of balance sheet management are to manage net interest income sensitivity while maintaining acceptable levels of interest rate and liquidity risk and to manage the market value of the Banking Group's capital. Liquidity risk is dealt with in the next section.

Notes to the Financial Statements

Interest rate risk

The objective of balance sheet interest rate risk management is to mitigate the negative impact of movements in wholesale interest rates on the earnings of the Banking Group's banking book. Non-traded interest rate risk relates to the potential adverse impact to earnings from changes in market interest rates. This risk arises from two principal sources: mismatches between the repricing dates of interest bearing assets and liabilities; and the investment of capital and other non-interest bearing liabilities in interest bearing assets.

As part of normal business activity the Banking Group has additional risks from fixed rate mortgage prepayments and basis risk:

- Prepayment risk is the potential risk to earnings or market value from when a customer prepays all or part of a fixed rate mortgage and where any customer fee charged is not sufficient to offset the loss in value to the Banking Group of this financial asset due to movements in interest rates and other pricing factors. As far as possible the true economic cost is passed through to customers in line with their terms and conditions and relevant legislation.
- Basis risk is the potential risk to earnings or market value from differences between customer pricing and wholesale market pricing. This is managed through active review of product margins.

Non-traded interest rate risk is managed to both value and earnings at risk limits. Interest rate risk is reported using three measures: VaR; scenario analysis (to a 1% shock); and interest rate sensitivity gap. This treatment excludes the effect of prepayment and basis risk.

a. Non-traded interest rate risk VaR

\$ millions	Period end	Banking Group		
		High for year	Low for year	Average for year
30/09/2014				
Value at risk at 99% confidence	10.7	10.7	8.0	8.9
30/09/2013				
Value at risk at 99% confidence	9.2	14.3	7.7	11.1

b. Scenario analysis – a 1% shock on the next 12 months' net interest income

A 1% overnight parallel positive shift in the yield curve is modelled to determine the potential impact on net interest income over the succeeding 12 months. This is a standard risk quantification tool.

The figures in the table below indicate the outcome of this risk measure for the current and comparative periods – expressed as a percentage of reported net interest income. The sign indicates the nature of the rate sensitivity with a positive number signifying that a rate increase is positive for net interest income over the next 12 months. Conversely, a negative number signifies that a rate increase is negative for the next 12 months' net interest income.

Impact of 1% rate shock	Banking Group	
	30/09/2014	30/09/2013
Period end	1.1%	1.1%
Maximum exposure	1.9%	2.0%
Minimum exposure	0.8%	0.6%
Average exposure (in absolute terms)	1.3%	1.3%

The extent of mismatching between the repricing characteristics and timing of interest bearing assets and liabilities at any point has implications for future net interest income.

Interest rate sensitivity gap

The interest rate sensitivity gap analysis provides information about the Banking Group's exposure to interest rate risk.

Sensitivity to interest rates arises from mismatches in the period to repricing of assets and that of the corresponding liability funding. These mismatches are managed within policy guidelines for mismatch positions.

The following tables represent the interest rate sensitivity of the Banking Group's assets, liabilities and off balance sheet instruments by showing the periods in which these instruments may reprice (that is, when interest rates applicable to each asset or liability can be changed).

The repricing gaps are based upon contractual repricing.

Equity price risk

The portfolio of financial assets classified as available-for-sale contains equity investment holdings held for longer term strategic intentions. These equity investments are also subject to market risk which is not captured by the VaR measures for traded and non-traded market risks. The fair value of these securities as at 30 September 2014 was \$2 million (30/09/2013 \$2 million). A 10 per cent reduction in the value of the available-for-sale equity securities would not be material.

Notes to the Financial Statements

Foreign currency related risks

This risk relates to the potential loss arising from the decline in the value of foreign currency positions due to changes in foreign exchange rates.

For non-traded instruments in foreign currencies, the risk is monitored and is hedged in accordance with policy. Risk arising from individual funding and other transactions is actively managed. The total amounts of unmatched foreign currency assets and liabilities, and consequent foreign currency exposures arising from each class of financial asset and liability, whether recognised or unrecognised, within each currency are not material.

The net open position in each foreign currency represents the net on-balance sheet assets and liabilities in that foreign currency aggregated with the net expected future cash flows from off-balance sheet purchases and sales from foreign exchange transactions in that foreign currency. The amounts are stated in New Zealand dollar equivalents translated using the spot exchange rates as at balance sheet date.

Notes to the Financial Statements

Liquidity risk

Liquidity risk is the risk that the Banking Group is unable to meet its payment obligations as they fall due. The timing mismatch of cash flows and the related liquidity risk is inherent in all banking operations and is closely monitored by the Banking Group.

The Banking Group's liquidity and funding risks are governed by a detailed policy framework which is approved by the Risk Committees of the Bank's and Ultimate Parent Bank's Boards. The core objective of the Banking Group's framework is to manage liquidity to meet obligations as they fall due, without incurring unacceptable losses.

Central to the Banking Group's liquidity risk management approach is the establishment of a liquidity risk appetite framework to which the Banking Group must conform at all times. The risk appetite for liquidity has been set as low, and this objective is achieved by the Banking Group managing liquidity risks within the boundaries of the following requirements and principles:

- Maintaining the ability to meet all payment obligations in the immediate term.
- Ensuring the ability to meet "survival horizons" under a range of the Banking Group specific and general market liquidity stress scenarios.
- Maintaining strength in the Banking Group's balance sheet structure to ensure long term resilience in the Banking Group's liquidity and funding risk profile.
- Limiting the potential earnings at risk associated with unexpected increases in funding costs or the liquidation of assets under stress.
- Ensuring the liquidity management framework is compatible with regulatory requirements.
- Daily liquidity reporting and scenario analysis, quantifying the Banking Group's positions.
- Targeting a diversified funding base, avoiding undue concentrations by investor type, maturity, market source and currency.
- Holding a portfolio of high quality liquid assets to protect against adverse funding conditions and to support day-to-day operations.
- Establishing detailed contingency plans to cover different liquidity crisis events.

Management of liquidity and funding risks are overseen by ALCO.

Supervision and Regulation

The RBNZ requires the Bank to have a comprehensive Board approved liquidity strategy defining: policy, systems and procedures for measuring, assessing, reporting and managing domestic and foreign currency liquidity. This also includes a formal contingency plan for dealing with a liquidity crisis. The Banking Group is required to meet one week and one month liquidity mismatch ratios and a one year core funding ratio each day.

Scenario Modelling

A key component of the Banking Group's liquidity management framework is scenario modelling. Liquidity is assessed under different scenarios, including going-concern, name-crisis and various survival horizons.

Going-concern: reflects the normal behaviour of cash flows in the ordinary course of business. The Banking Group must be

able to meet all commitments and obligations under a going concern scenario, within the Banking Group's normal funding capacity ('available to fund' limit), over at least the following 30 calendar days. In estimating the funding requirement, the Banking Group models expected cash flows by reference to historical behaviour and contractual maturity data.

Name-crisis: refers to a potential name-specific liquidity crisis scenario which models the behaviour of cash flows where there is a problem (real or perceived) which may include, but is not limited to, operational issues, doubts about the solvency of the Banking Group, or adverse rating changes. Under this scenario the Banking Group may have significant difficulty rolling over or replacing funding. Under the liquidity policy the Banking Group must be cash flow positive over an eight calendar day period.

Survival horizons: The global financial crisis has highlighted the importance of differentiating between stressed and normal market conditions in a name-specific crisis and the different behaviour that offshore and domestic wholesale funding markets can exhibit during market stress events. The Banking Group has linked its liquidity risk appetite to defined liquidity "survival horizons" (i.e. the time period under which the Banking Group must maintain a positive cash flow position). The following stressed scenarios are modelled:

- Extreme Short Term Crisis Scenario: A name-specific stress during a period of market stress.
- Short Term Crisis Scenario: A name-specific stress during a period of normal markets conditions.
- Global Funding Market Disruption: Stressed global wholesale funding markets leading to a closure of domestic and offshore markets.
- Offshore Funding Market Disruption: Stressed global wholesale funding markets leading to a closure of offshore markets only.

As of 30 September 2014 the Banking Group was in compliance with all of the above scenarios.

Wholesale funding

The Banking Group's wholesale funding strategy is designed to deliver a sustainable portfolio of wholesale funds that balances cost efficiency while targeting diversification by markets, investors, currencies, maturities and funding structures. Short-term wholesale funding requirements, with a contractual maturity of less than one year, are managed through the Treasury and Markets operations. Long-term wholesale funding is managed and executed through Treasury operations.

The Banking Group also uses maturity concentration limits under the wholesale funding and liquidity management framework. Maturity concentration limits ensure that the Banking Group does not become reliant on issuing large volumes of new wholesale funding within a short time period. Funding instruments used to meet the wholesale borrowing requirement must be on a pre-established list of approved products.

Notes to the Financial Statements

Funding capacity and debt issuance planning

The Banking Group adopts a conservative approach to determine its funding capacity. Funding capacity limits are determined at the Ultimate Parent Bank level and allocated to individual sites based on their requirements. Annually, a funding plan is approved by the Bank's Board. The plan is supplemented by monthly updates and is linked to the Banking Group's three year strategic planning cycle.

Funding Composition

The Banking Group actively uses balance sheet disciplines to prudently manage the funding mix. The Banking Group employs funding metrics to ensure that an appropriate proportion of its assets are funded from stable sources, including customer liabilities, longer-dated wholesale debt (with remaining term exceeding one year) and equity. This approach recognises that long-term wholesale debt and other sticky liabilities have favourable liquidity characteristics.

Analysis of funding liabilities by industry sector is based on Australian and New Zealand Standard Industrial Classification (ANZSIC) codes.

³ The Banking Group classifies funding via ANZ New Zealand (Int'l) as either from the United States or Europe based on the respective programmes.

Notes to the Financial Statements

Liquidity portfolio management

The Banking Group holds a diversified portfolio of cash and high-quality highly-liquid securities to support liquidity risk management. The size of the Banking Group's liquidity portfolio is based on the amount required to meet its internal and regulatory liquidity scenario metrics.

Total liquidity portfolio \$ millions	Banking Group		Bank	
	30/09/2014	30/09/2013	30/09/2014	30/09/2013
Balances with central banks	1,309	1,709	1,309	1,709

Certificates of deposit	159	159	159	159
Government, local body stock and bonds	6,318	5,522	6,318	5,522
Government treasury bills	380	387	380	387
Other bonds	5,135	5,069	5,135	5,069
Total liquidity portfolio	13,301	12,887	13,301	12,887

Assets held for managing liquidity risk include short term cash held with the RBNZ, New Zealand Government securities, securities issued by supranational agencies, securities issued by highly rated banks and securities issued by State Owned Enterprises, Local Authorities and highly rated NZ domestic corporates. These assets would be accepted as collateral by the RBNZ in repurchase transactions. At 30 September 2014 the Banking Group would be eligible to enter into repurchase transactions with a value of \$11,536 million. The Banking Group also held unencumbered internal residential mortgage backed securities ("RMBS") which would entitle the Banking Group to enter into repurchase transactions with a value of \$5,709 million at 30 September 2014 (the RBNZ has imposed a cap limiting the amount of RMBS deemed as eligible in the liquidity portfolio to 4% of total assets).

Liquidity crisis contingency planning

The Banking Group maintains liquidity crisis contingency plans defining an approach for analysing and responding to a liquidity-threatening event on a group wide basis. The framework includes:

- the establishment of crisis severity/stress levels;
- clearly assigned crisis roles and responsibilities;
- early warning signals indicative of an approaching crisis, and mechanisms to monitor and report these signals;
- outlined action plans, and courses of action for altering asset and liability behaviour;
- procedures for crisis management reporting, and covering cash-flow shortfalls;
- guidelines determining the priority of customer relationships in the event of liquidity problems; and
- assigned responsibilities for internal and external communications.

Notes to the Financial Statements

Contractual maturity analysis of financial assets and liabilities

The following tables present the Banking Group's financial assets and liabilities within relevant contractual maturity groupings, based on the earliest date on which the Bank or the Banking Group may be required to realise an asset or settle a liability. The amounts disclosed in the tables represent undiscounted future principal and interest cash flows, except for derivatives held for trading where the full mark-to-market amount has been included in the less than three months category. As a result, the amounts in the tables below may differ to the amounts reported on the balance sheet.

The contractual maturity analysis for off-balance sheet commitments and contingent liabilities has been prepared using the earliest date at which the Banking Group or the Bank can be called upon to pay. The liquidity risk of credit related commitments and contingent liabilities may be less than the contract amount, and does not necessarily represent future cash requirements as many of these facilities are expected to be only partially used or to expire unused.

The Banking Group does not manage its liquidity risk on this basis.

UDC secured investments are constituted and secured by a trust deed between UDC Finance Limited and its independent trustee, Trustees Executors Limited. UDC Finance Limited has granted a charge over all its assets and undertaking, primarily net loans and advances, in favour of the Trustee.

Offsetting financial assets and financial liabilities

The following information relates to financial assets and liabilities which have been set off in the balance sheet and those which have not been set off but for which the Banking Group has enforceable master netting agreements in place with counterparties.

¹ The Banking Group enters into derivatives and repurchase and reverse repurchase agreements with various counterparties which are governed by industry standard master netting agreements. The Banking Group holds and provides cash and securities collateral in respect of derivative transactions covered by these agreements. The right to set off balances under these master netting agreements or to set off cash and securities collateral only arises in the event of non payment or default and, as a result, these arrangements do not qualify for offsetting under NZ IAS 32 *Financial Instruments: Presentation*.

² This is the amount of trading securities encumbered through repurchase agreements, see financial assets pledged as collateral table in this note.

³ Included in deposits from banks, see note 18.

Notes to the Financial Statements

29. Concentrations of Credit Risk to Individual Counterparties

The Banking Group measures its concentration of credit risk in respect to bank counterparties on the basis of approved exposures and in respect to non bank counterparties on the basis of limits. No account is taken of collateral, security and/or netting agreements which the Banking Group may hold in respect of the various counterparty exposures.

For the three month period ended 30 September 2014 there were no individual counterparties (excluding connected parties, governments and banks with long term credit ratings of A- or above) where the Banking Group's period end or peak end-of-day credit exposure equalled or exceeded 10% of equity (as at the end of the period).

Concentrations of credit risk to connected persons

Credit exposures to connected persons reported in the table below have been calculated partially on a bilateral net basis and partially on a gross basis. Netting has occurred (up to a limit of 125% of the Banking Group's tier 1 capital) in respect of certain transactions which are the subject of a bilateral netting agreement.

This information has been derived in accordance with the Bank's conditions of registration, the RBNZ document *Connected Exposures Policy* (BS8). The exposures are net of individual credit impairment allowances and exclude advances to connected persons of a capital nature.

Banking Group	30/09/2014		30/09/2013	
	Amount \$m	% of Tier 1 Capital	Amount \$m	% of Tier 1 Capital
Aggregate at end of year¹				
Bank connected persons (on gross basis, before netting)	7,318	90.0%	4,065	52.0%
Less: amount netted off	5,747	70.7%	3,073	39.3%
Bank connected persons (on partial bilateral net basis)	1,571	19.3%	992	12.7%
Peak end-of-day for the year²				
Bank connected persons (on gross basis, before netting)	6,510	80.1%	5,696	72.8%
Less: amount netted off	4,254	52.4%	3,334	42.6%
Bank connected persons (on partial bilateral net basis)	2,256	27.7%	2,362	30.2%
Rating-contingent limit³				
Bank connected persons (on a gross basis, before netting)	n/a	125.0%	n/a	125.0%
Bank connected persons (on partial bilateral net basis)	n/a	70.0%	n/a	70.0%
Non-bank connected persons	n/a	15.0%	n/a	15.0%

¹ The Banking Group has amounts due from the Immediate Parent Company and the Ultimate Parent Bank and other entities within the Overseas Banking Group arising in the ordinary course of business. These balances arise primarily from unrealised gains on trading and hedging derivative financial instruments with the Ultimate Parent Bank. As at 30 September 2014, the gross exposures to the Immediate Parent Company were \$6 million (30/09/2013 \$14 million). As at 30 September 2014, the gross exposures to the Ultimate Parent Bank were \$7,312 million (30/09/2013 \$4,051 million).

² The Banking Group has complied with the limits on aggregate credit exposure (of a non-capital nature and net of individual provisions) to connected persons and non-bank connected persons, as set out in the Conditions of Registration, at all times during the year. The peak end-of-day credit exposures for the year to connected persons are measured over Tier 1 Capital as at the end of the year.

³ Represents the maximum peak end-of-day aggregate credit exposures limit (of a non-capital nature and net of individual provisions) to all connected persons. This limit is based on the ratings applicable to the Bank's long term senior unsecured obligations payable in New Zealand in New Zealand dollars. Within the overall limit a sub-limit of 15% of Tier 1 Capital applies to aggregate credit exposures (exclusive of exposures of a capital nature and net of individual provisions) to non-bank connected persons. There have been no changes to these limits for the year ended 30 September 2014.

¹ Derivative financial instruments classified as held for trading include derivatives entered into as economic hedges which are not designated as accounting hedges.

² Fair value hedging is applied to certain financial assets within loans and advances and certain financial liabilities within bonds and notes. The resulting fair value adjustment means that the carrying value differs from the amortised cost.

Notes to the Financial Statements

Measurement of fair value

Valuation methodologies

The Banking Group has an established control framework that ensures fair value is either determined or validated by a function independent of the party that undertakes the transaction. The control framework ensures that all models are calibrated periodically to test that outputs reflect prices from observable current market transactions in the same instrument or other available observable market data.

Where quoted market prices are used, prices are independently verified from other sources. For fair values determined using a valuation model, the control framework may include, as applicable, independent development or validation of valuation models, any inputs to those models, any adjustments required outside of the valuation model and, where possible, independent validation of model outputs. In this way, continued appropriateness of the valuations is ensured.

In instances where the Banking Group holds offsetting risk positions, the Banking Group uses the portfolio exemption in NZ IFRS 13 *Fair Value Measurement* to measure the fair value of such groups of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position (that is, an asset) for a particular risk exposure or to transfer a net short position (that is, a liability) for a particular risk exposure.

The Group categorises its fair value measurements on the basis of inputs used in measuring fair value using the fair value hierarchy below:

- Level 1 – Financial instruments that have been valued by reference to unadjusted quoted prices in active markets for identical financial instruments. This category includes financial instruments valued using quoted yields where available for specific debt securities.
- Level 2 – Financial instruments that have been valued through valuation techniques incorporating inputs other than quoted prices within Level 1 that are observable for a similar financial asset or liability, either directly or indirectly.
- Level 3 – Financial instruments that have been valued using valuation techniques which incorporate significant inputs that are not based on observable market data (unobservable inputs).

Valuation techniques and inputs used

In the event that there is no quoted market price for the instrument, fair value is based on valuation techniques. The valuation models incorporate the impact of bid/ask spreads, counterparty credit spreads, funding costs and other factors that would influence the fair value determined by market participants.

The majority of valuation techniques employ only observable market data. However, for certain financial instruments the valuation technique may employ some data (valuation inputs or components) which is not readily observable in the current market. In these cases valuation inputs (or components of the overall value) are derived and extrapolated from other relevant market data and tested against historic transactions and observed market trends. To the extent that valuation is based on models or inputs that are not observable in the market, the determination of fair value can be more subjective, dependent on the significance of the unobservable input to the overall valuation.

The following valuation techniques have been applied to determine the fair values of financial instruments where there is no quoted price (level1) for the instrument:

- For instruments classified as trading securities and securities short sold, derivative financial assets and liabilities, available-for-sale assets, and investments backing insurance contract liabilities, fair value measurements are derived by using modelled valuations techniques (including discounted cash flow models) that incorporate market prices / yields for securities with similar credit risk, maturity and yield characteristics; and/or current market yields for similar instruments.
- For net loans and advances, deposits and other borrowings and debt issuances, discounted cash flow techniques are used where contractual future cash flows of the instrument are discounted using discount rates incorporating wholesale market rates or market borrowing rates of debt with similar maturities or a yield curve appropriate for the remaining term to maturity.
- The Banking Group holds units in an unlisted fund, included in available-for sale assets which does not trade in an active market. The fair value of these units is based on the estimated cashflows from the realisation of the underlying assets.

There have been no substantial changes in the valuation techniques applied to different classes of financial instruments during the year.

Transaction related contingent items	1,321	1,059	1,321	1,059
Trade related contingent liabilities	111	113	110	112
Total guarantees and contingent liabilities	2,436	2,201	2,435	2,200

The Banking Group guarantees the performance of customers by issuing standby letters of credit and guarantees to third parties, including its Ultimate Parent Bank. The risk involved is essentially the same as the credit risk involved in extending loan facilities to customers, therefore these transactions are subjected to the same credit origination, portfolio management and collateral requirements for customers applying for loans. As the facilities may expire without being drawn upon, the notional amounts do not necessarily reflect future cash requirements.

Other contingent liabilities

In October 2012, the Commerce Commission commenced an investigation, under the Fair Trading Act 1986, into the promotion and sale of interest rate swaps by certain banks (including the Bank) to rural customers. The investigation is ongoing and the outcome is not certain.

On 11 March 2013, litigation funder Litigation Lending Services (NZ) Limited announced plans for a representative action against banks in New Zealand for certain fees charged to New Zealand customers over the past six years. Proceedings were filed against the Bank on 25 June 2013. The potential outcome of this litigation cannot be determined with any certainty at this stage.

The Banking Group has other contingent liabilities in respect of actual and possible claims and court proceedings.

An assessment of the Banking Group's likely loss in respect of these matters has been made on a case-by-case basis and provision made where deemed necessary.

Notes to the Financial Statements

34. Structured Entities, Transferred Financial Assets, Fiduciary Activities and Insurance

Structured entities

The Banking Group's involvement with structured entities is mainly through securitisations and its funds management activities, which are outlined further below. The Banking Group has involvement with structured entities that may be established either by the Banking Group or by a third party.

Consolidated structured entities

Kingfisher NZ Trust 2008-1 (the Kingfisher Trust)

The Banking Group has established the Kingfisher Trust as an in-house residential mortgage backed securities facility that can issue securities meeting the RBNZ criteria to use as collateral in repurchase transactions with the RBNZ.

These assets do not qualify for derecognition as the Bank retains substantially all of the risks and rewards of the transferred assets.

As at 30 September 2014 and 30 September 2013 the Banking Group had not entered into any repurchase agreements with the RBNZ for residential mortgage backed securities and therefore no collateral had been accepted by the RBNZ under this facility.

ANZNZ Covered Bond Trust (the Covered Bond Trust)

Substantially all of the assets of the Covered Bond Trust are made up of certain housing loans and related securities originated by the Bank which are security for the guarantee by ANZNZ Covered Bond Trust Limited as trustee of the Covered Bond Trust of issuances of covered bonds by the Bank, or its wholly owned subsidiary ANZ New Zealand (Int'l) Limited, from time to time. The assets of the Covered Bond Trust are not available to creditors of the Bank, although the Bank (or its liquidator or statutory manager) may have a claim against the residual assets of the Covered Bond Trust (if any) after all prior ranking creditors of the Covered Bond Trust have been satisfied.

The Banking Group continues to recognise the assets of the Covered Bond Trust on its balance sheet as, although they are pledged as security for covered bonds, the Bank retains substantially all the risks and rewards of ownership.

Unconsolidated securitisations

The Banking Group also has an interest in unconsolidated securitisation entities through the provision of funding facilities or holding bonds or notes issued by such entities. The Banking Group's exposure to these entities is not material.

Transferred financial assets

Assets transferred to the Kingfisher Trust and the Covered Bond Trust

The Bank has purchased securities issued by both the Kingfisher Trust and the Covered Bond Trust in exchange for the transfer of the rights to the cash flows associated with the identified residential mortgages.

Repurchase transactions

Securities sold subject to repurchase agreements are not derecognised when substantially all the risks and rewards of ownership remain with the Bank.

The following table sets out the carrying values assets transferred by the Bank and the Banking Group to other entities and the associated liabilities to deliver the cashflows on those instruments.

\$ millions	Note	Banking Group		Bank	
		30/09/2014	30/09/2013	30/09/2014	30/09/2013
Securitisations^{1,2}					
Carrying amount of assets transferred		-	-	7,963	5,823
Carrying amount of associated liabilities		-	-	7,963	5,823
Covered Bonds¹					
Carrying amount of assets transferred		-	-	7,283	5,857
Carrying amount of associated liabilities		-	-	7,283	5,857
Repurchase agreements					
Carrying amount of assets transferred	28	47	108	47	108
Carrying amount of associated liabilities	28	47	107	47	107

¹ There are no balances for the Banking Group as the balances for the Bank relate to transfers to internal special purpose entities.

² The securitisation liabilities have recourse only to the pool of residential mortgages which have been securitised. The fair value of securitised assets is \$7,928 million (30/09/2013 \$5,823 million). The fair value of the associated liabilities is \$7,928 million (30/09/2013 \$5,823 million). The net position is nil (30/09/2013 nil).

Notes to the Financial Statements

Funds management and other fiduciary activities

Funds management

Certain subsidiaries of the Bank act as trustee and/or manager for a number of unit trusts and investment and superannuation funds. The Banking Group provides private banking services to a number of clients, including investment advice and portfolio management. The Banking Group is not responsible for any decline in performance of the underlying assets of the investors due to market forces.

As funds under management are not controlled by the Banking Group, they are not included in these financial statements. The Banking Group derives fee and commission income from the sale and management of investment funds and superannuation schemes, unit trusts and the provision of private banking services to customers. The Banking Group derives commission income from the sale of third party funds management products.

Some funds under management are invested in products owned or securities issued by the Banking Group and are recorded as liabilities in the balance sheet. At 30 September 2014, \$2,928 million of funds under management were invested in the Banking Group's own products or securities (30/09/2013 \$3,054 million).

Custodial services

The Banking Group provides custodial services to customers in respect of assets that are beneficially owned by those customers.

Funds managed and held in custody by the Banking Group

\$ millions	Banking Group	
	30/09/2014	30/09/2013
Kiwisaver and other managed funds	7,205	5,506
The Bonus Bonds Trust	3,196	3,259
ANZ PIE Fund ¹	715	833
Other investment portfolios ²	8,807	7,354
Total funds under management	19,923	16,952
Funds held in custody or as nominee on behalf of customers	7,427	6,365
Funds management fee income from structured entities	110	95

¹ The Banking Group established, and is considered to be the sponsor of, the ANZ PIE Fund. The ANZ PIE Fund invests only in deposits with the Bank. The Banking Group does not receive a management fee from, and does not have an interest in, the ANZ PIE Fund.

² These funds are not structured entities as they are investment portfolios managed on behalf of customers.

Provision of financial services

Financial services provided by the Banking Group to entities which are involved in trust, custodial, funds management and other fiduciary activities are provided on arm's length terms and conditions and at fair value. Any assets purchased from such entities have been purchased on an arm's length basis and at fair value. The Banking Group does not have any affiliated insurance entities or affiliated insurance groups that are not members of the Banking Group.

Except for standard lending facilities provided in the normal course of business on arm's length terms, the Banking Group has not provided any funding to entities where trust, custodial, funds management or other fiduciary activities are established, marketed and/or sponsored by a member of the Banking Group (30/09/2013 \$nil).

Insurance business

The Banking Group conducts insurance business through its subsidiaries OnePath Life (NZ) Limited and OnePath Insurance Services (NZ) Limited (together OnePath Insurance). OnePath Insurance provides a range of risk transfer insurance products, including life, lump sum trauma/disablement, income protection and medical cover. In addition, other entities within the Banking Group market and distribute a range of insurance products which are underwritten by OnePath Insurance, or by third party insurance companies.

The aggregate amount of insurance business in this group comprises assets totalling \$850 million (30/09/2013 \$779 million), which is 0.7% (30/09/2013 0.6%) of the total consolidated assets of the Banking Group.

OnePath Life (NZ) Limited and OnePath Insurance Services (NZ) Limited propose to amalgamate and continue as OnePath Life (NZ) Limited. The proposed amalgamation is subject to necessary consents and approvals, including from the RBNZ.

Risk management

The Bank and subsidiaries of the Bank participating in the activities identified above have in place policies and procedures to ensure that those activities are conducted in an appropriate manner. Should adverse conditions arise, it is considered that these policies and procedures will minimise the possibility that these conditions will adversely impact the Bank or the Banking Group. The policies and procedures include comprehensive and prominent disclosure of information regarding products, and formal and regular review of operations and policies by management.

Notes to the Financial Statements

35. Changes to Comparatives

Certain amounts in the comparative information have been reclassified to conform with current period financial statement presentations.

The classification of the balance sheet was changed during the period to more consistently reflect the nature of the financial assets and liabilities. Prior to this reclassification, the balance sheet was classified according to both nature and counterparty. The key changes include:

Assets

- Securities purchased under agreements to resell in less than three months previously reported in liquid assets and due from other financial institutions are now classified as cash.
- Money at call, bills receivable and remittances in transit previously reported in liquid assets are now classified as either cash, settlement balances receivable or net loans and advances depending on the nature of the asset.
- Loans to other banks previously reported in due from other financial institutions are now classified as net loans and advances.
- Collateral paid previously reported in due from other financial institutions is now classified separately.
- Issued security settlements previously reported in other assets are now classified as settlement balances receivable.

Liabilities

- Loans from other banks previously reported in due to other financial institutions are now classified as deposits and other borrowings.
- Collateral received previously reported in due to other financial institutions is now classified separately.
- Issued security settlements previously reported in other liabilities are now classified as settlement balances payable.

Minor changes in the overall total assets and total liabilities have also occurred due to an amendment to NZ IAS19 *Employee Benefits*.

The tables below show the impact of these changes on the balance sheet, together with the impact of the change in the definition of cash and cash equivalents explained in note 1. Associated amounts in the income statement, statement of comprehensive income and cash flow statement have been restated accordingly, and the impact of the changes to these statements is not material.

Directorate and Auditors

Any document or communication may be sent to any Director at the Registered Office. The document or communication should be marked for the attention of that Director.

Directors' interests

In order to ensure that members of the Board are reminded of their disclosure obligations under the Companies Act 1993, the following procedures are adopted:

- a. At least once in each year, Directors are requested to complete, in terms of section 140(1) of the Companies Act 1993, a disclosure of any interests which they have with the Bank itself. Directors are reminded at this time of their obligation under the Companies Act 1993 to disclose promptly any transaction or proposed transaction with the Bank in which they have an interest.
- b. Directors are also requested to make a general disclosure of their interest in other entities in terms of section 140(2) of the Companies Act 1993. In addition, they are requested to initiate a review of that disclosure if there are any significant alterations which occur subsequently during the period.

In addition to the written disclosures referred to above, Directors disclose relevant interests which they have before discussion of particular business items.

The Companies Act 1993 allows a Director with an interest in a transaction to participate in discussions and to vote on all matters relating to that particular transaction. However, the Board has adopted a guideline whereby a Director with an interest in a transaction should not be present during any discussions, and should not vote, on any matter pertaining to that particular transaction.

Transactions with Directors

No Director has disclosed that he/she or any immediate relative or professional associate has any dealing with the Banking Group which has been either entered into on terms other than those which would in the ordinary course of business be given to any other person of like circumstances or means or which could otherwise be reasonably likely to influence materially the exercise of the Director's duties as a Director of the Bank.

Board Members as at 18 November 2014

Independent Non-Executive Director and Chair

John Frederick Judge

B Com, FCA
Company Director
Auckland, New Zealand

Mr Judge is the Chair of the Remuneration Committee and a member of the Audit Committee and the Risk Committee.

Other directorships: Aquatx Holdings Limited, Biotelliga Limited, Biotelliga Holdings Limited, Biotelliga Nominees Limited, CIC28 Biotech Limited, Fletcher Building Limited, Fletcher Building Industries Limited, Janohn Limited, Sebca Limited, John Judge Limited, Cup Limited, Sails Friday Limited, The New Zealand Initiative Limited

Executive Director

David Duncan Hisco

B Bus, MBA
Chief Executive, ANZ Bank New Zealand Limited
Auckland, New Zealand

Other directorships: ANZ Holdings (New Zealand) Limited

Non-Executive Directors

Shayne Cary Elliott

B Com
Chief Financial Officer, Australia and New Zealand Banking Group Limited
Melbourne, Australia

Mr Elliott is a member of the Risk Committee and the Audit Committee.

Other directorships: ANZ Holdings (New Zealand) Limited, AMMB Holdings Berhad

Other directorships: Mighty River Power Limited, Television New Zealand Limited

Auditors

KPMG

Chartered Accountants
10 Customhouse Quay
P O Box 996
Wellington, New Zealand

Conditions of Registration

Conditions of Registration, applicable as at 30 September 2014. These Conditions of Registration have applied from 1 July 2014.

The registration of ANZ Bank New Zealand Limited ("the bank") as a registered bank is subject to the following conditions:

1. That-
 - (a) the Total capital ratio of the banking group is not less than 8%;
 - (b) the Tier 1 capital ratio of the banking group is not less than 6%;
 - (c) the Common Equity Tier 1 capital ratio of the banking group is not less than 4.5%;
 - (d) the Total capital of the banking group is not less than \$30 million; and
 - (e) the process in Subpart 2H of the Reserve Bank of New Zealand document: "Capital Adequacy Framework (Internal Models Based Approach)" (BS2B) dated July 2014 is followed for the recognition and repayment of capital.

For the purposes of this condition of registration,-

the scalar referred to in the Reserve Bank of New Zealand document "Capital adequacy framework (Internal Models Based Approach)" (BS2B) dated July 2014 is 1.06.

"Total capital ratio", "Tier 1 capital ratio", "Common Equity Tier 1 capital ratio", and "Total capital" must be calculated in accordance with the Reserve Bank of New Zealand document "Capital adequacy framework (Internal Models Based Approach)" (BS2B) dated July 2014.

1A. That-

- (a) the bank has an internal capital adequacy assessment process ("ICAAP") that accords with the requirements set out in the document "Guidelines on a bank's internal capital adequacy assessment process ('ICAAP')" (BS12) dated December 2007;
 - (b) under its ICAAP the bank identifies and measures its "other material risks" defined as all material risks of the banking group that are not explicitly captured in the calculation of the Common Equity Tier 1 capital ratio, the Tier 1 capital ratio and the Total capital ratio under the requirements set out in the document "Capital adequacy framework (Internal Models Based Approach)" (BS2B) dated July 2014; and
 - (c) the bank determines an internal capital allocation for each identified and measured "other material risk".
- 1B. That the banking group complies with all requirements set out in the Reserve Bank of New Zealand document "Capital adequacy framework (Internal Models Based Approach)" (BS2B) dated July 2014.
 - 1C. That, if the buffer ratio of the banking group is 2.5% or less, the bank must:
 - (a) according to the following table, limit the aggregate distributions of the bank's earnings to the percentage limit to distributions that corresponds to the banking group's buffer ratio:

Banking group's buffer ratio	Percentage limit to distributions of the bank's earnings
0% - 0.625%	0%
>0.625 - 1.25%	20%
>1.25 - 1.875%	40%
>1.875% - 2.5%	60%

- (b) prepare a capital plan to restore the banking group's buffer ratio to above 2.5% within any timeframe determined by the Reserve Bank for restoring the buffer ratio; and
- (c) have the capital plan approved by the Reserve Bank.

For the purposes of this condition of registration, —

"buffer ratio", "distributions", and "earnings" have the same meaning as in Part 3 of the Reserve Bank of New Zealand document: "Capital Adequacy Framework (Internal Models Based Approach)" (BS2B) dated July 2014.

the scalar referred to in the Reserve Bank of New Zealand document "Capital adequacy framework (Internal Models Based Approach)" (BS2B) dated July 2014 is 1.06.

2. That the banking group does not conduct any non-financial activities that in aggregate are material relative to its total activities.

In this condition of registration, the meaning of "material" is based on generally accepted accounting practice.
3. That the banking group's insurance business is not greater than 1% of its total consolidated assets.

For the purposes of this condition of registration, the banking group's insurance business is the sum of the following amounts for entities in the banking group:

- (a) if the business of an entity predominantly consists of insurance business and the entity is not a subsidiary of another entity in the banking group whose business predominantly consists of insurance business, the amount of the insurance business to sum is the total consolidated assets of the group headed by the entity; and
- (b) if the entity conducts insurance business and its business does not predominantly consist of insurance business and the entity is not a subsidiary of another entity in the banking group whose business predominantly consists of insurance business, the amount of the insurance business to sum is the total liabilities relating to the entity's insurance business plus the equity retained by the entity to meet the solvency or financial soundness needs of its insurance business.

In determining the total amount of the banking group's insurance business-

- (a) all amounts must relate to on balance sheet items only, and must comply with generally accepted accounting practice; and
- (b) if products or assets of which an insurance business is comprised also contain a non-insurance

Conditions of Registration

component, the whole of such products or assets must be considered part of the insurance business.

For the purposes of this condition of registration,-

“insurance business” means the undertaking or assumption of liability as an insurer under a contract of insurance:

“insurer” and “contract of insurance” have the same meaning as provided in sections 6 and 7 of the Insurance (Prudential Supervision) Act 2010.

4. That the aggregate credit exposures (of a non-capital nature and net of any allowances for impairment) of the banking group to all connected persons do not exceed the rating-contingent limit outlined in the following matrix:

Credit Rating of the bank ¹	Connected exposure limit (% of the banking group's Tier 1 capital)
AA/Aa2 and above	75
AA-/Aa3	70
A+/A1	60
A/A2	40
A-/A3	30
BBB+/Baa1 and below	15

¹ This table uses the rating scales of Standard & Poor's, Fitch Ratings and Moody's Investors Service. (Fitch Ratings' scale is identical to Standard & Poor's)

Within the rating-contingent limit, credit exposures (of a non-capital nature and net of any allowances for impairment) to non-bank connected persons shall not exceed 15 percent of the banking group's Tier 1 capital.

For the purposes of this condition of registration, compliance with the rating-contingent connected exposure limit is determined in accordance with the Reserve Bank of New Zealand document entitled “Connected Exposures Policy” (BS8) dated July 2014.

5. That exposures to connected persons are not on more favourable terms (e.g. as relates to such matters as credit assessment, tenor, interest rates, amortisation schedules and requirement for collateral) than corresponding exposures to non-connected persons.
6. That the bank complies with the following corporate governance requirements:
- the board of the bank must have at least five directors;
 - the majority of the board members must be non-executive directors;
 - at least half of the board members must be independent directors;
 - an alternate director,—
 - for a non-executive director must be non-executive; and
 - for an independent director must be independent;
 - at least half of the independent directors of the bank must be ordinarily resident in New Zealand;

- the chairperson of the board of the bank must be independent; and
- the bank's constitution must not include any provision permitting a director, when exercising powers or performing duties as a director, to act other than in what he or she believes is the best interests of the company (i.e. the bank).

For the purposes of this condition of registration, “non-executive” and “independent” have the same meaning as in the Reserve Bank of New Zealand document entitled “Corporate Governance” (BS14) dated July 2014.

7. That no appointment of any director, chief executive officer, or executive who reports or is accountable directly to the chief executive officer, is made in respect of the bank unless:
- the Reserve Bank has been supplied with a copy of the curriculum vitae of the proposed appointee; and
 - the Reserve Bank has advised that it has no objection to that appointment.
8. That a person must not be appointed as chairperson of the board of the bank unless:
- the Reserve Bank has been supplied with a copy of the curriculum vitae of the proposed appointee; and
 - the Reserve Bank has advised that it has no objection to that appointment.
9. That the bank has a board audit committee, or other separate board committee covering audit matters, that meets the following requirements:
- the mandate of the committee must include: ensuring the integrity of the bank's financial controls, reporting systems and internal audit standards;
 - the committee must have at least three members;
 - every member of the committee must be a non-executive director of the bank;
 - the majority of the members of the committee must be independent; and
 - the chairperson of the committee must be independent and must not be the chairperson of the bank.
- For the purposes of this condition of registration, “non-executive” and “independent” have the same meaning as in the Reserve Bank of New Zealand document entitled “Corporate Governance” (BS14) dated July 2014.
10. That a substantial proportion of the bank's business is conducted in and from New Zealand.
11. That the bank has legal and practical ability to control and execute any business, and any functions relating to any business, of the bank that are carried on by a person other than the bank, sufficient to achieve, under normal business conditions and in the event of stress or failure of the bank or of a service provider to the bank, the following outcomes:
- that the bank's clearing and settlement obligations due on a day can be met on that day;

Conditions of Registration

- (b) that the bank's financial risk positions on a day can be identified on that day;
- (c) that the bank's financial risk positions can be monitored and managed on the day following any failure and on subsequent days; and
- (d) that the bank's existing customers can be given access to payments facilities on the day following any failure and on subsequent days.

For the purposes of this condition of registration, the term "legal and practical ability to control and execute" is explained in the Reserve Bank of New Zealand document entitled "Outsourcing Policy" (BS11) dated January 2006.

12. That:

- (a) the business and affairs of the bank are managed by, or under the direction and supervision of, the board of the bank;
- (b) the employment contract of the chief executive officer of the bank or person in an equivalent position (together "CEO") is with the bank, and the terms and conditions of the CEO's employment agreement are determined by, and any decision relating to the employment or termination of employment of the CEO are made by, the board of the bank; and
- (c) all staff employed by the bank shall have their remuneration determined by (or under the delegated authority of) the board or the CEO of the bank and be accountable (directly or indirectly) to the CEO of the bank.

13. That the banking group complies with the following quantitative requirements for liquidity-risk management:

- (a) the one-week mismatch ratio of the banking group is not less than zero per cent at the end of each business day;
- (b) the one-month mismatch ratio of the banking group is not less than zero per cent at the end of each business day; and
- (c) the one-year core funding ratio of the banking group is not less than 75 per cent at the end of each business day.

For the purposes of this condition of registration, the ratios identified must be calculated in accordance with the Reserve Bank of New Zealand documents entitled "Liquidity Policy" (BS13) dated July 2014 and "Liquidity Policy Annex: Liquid Assets" (BS13A) dated December 2011.

14. That the bank has an internal framework for liquidity risk management that is adequate in the bank's view for managing the bank's liquidity risk at a prudent level, and that, in particular:

- (a) is clearly documented and communicated to all those in the organisation with responsibility for managing liquidity and liquidity risk;
- (b) identifies responsibility for approval, oversight and implementation of the framework and policies for liquidity risk management;

- (c) identifies the principal methods that the bank will use for measuring, monitoring and controlling liquidity risk; and
- (d) considers the material sources of stress that the bank might face, and prepares the bank to manage stress through a contingency funding plan.

15. That no more than 10% of total assets may be beneficially owned by a SPV.

For the purposes of this condition, —

"total assets" means all assets of the banking group plus any assets held by any SPV that are not included in the banking group's assets:

"SPV" means a person—

- (a) to whom any member of the banking group has sold, assigned, or otherwise transferred any asset;
- (b) who has granted, or may grant, a security interest in its assets for the benefit of any holder of any covered bond; and
- (c) who carries on no other business except for that necessary or incidental to guarantee the obligations of any member of the banking group under a covered bond:

"covered bond" means a debt security issued by any member of the banking group, for which repayment to holders is guaranteed by a SPV, and investors retain an unsecured claim on the issuer.

16. That—

- (a) no member of the banking group may give effect to a qualifying acquisition or business combination that meets the notification threshold, and does not meet the non-objection threshold, unless:
 - (i) the bank has notified the Reserve Bank in writing of the intended acquisition or business combination and at least 10 working days have passed; and
 - (ii) at the time of notifying the Reserve Bank of the intended acquisition or business combination, the bank provided the Reserve Bank with the information required under the Reserve Bank of New Zealand Banking Supervision Handbook document "Significant Acquisitions Policy" (BS15) dated December 2011; and
- (b) no member of the banking group may give effect to a qualifying acquisition or business combination that meets the non-objection threshold unless:
 - (i) the bank has notified the Reserve Bank in writing of the intended acquisition or business combination;
 - (ii) at the time of notifying the Reserve Bank of the intended acquisition or business combination, the bank provided the Reserve Bank with the information required under the Reserve Bank of New Zealand Banking Supervision Handbook document "Significant Acquisitions Policy" (BS15) dated December 2011; and

Conditions of Registration

- (iii) the Reserve Bank has given the bank a notice of non-objection to the significant acquisition or business combination.

For the purposes of this condition of registration, “qualifying acquisition or business combination”, “notification threshold” and “non-objection threshold” have the same meaning as in the Reserve Bank of New Zealand Banking Supervision Handbook document “Significant Acquisitions Policy” (BS15) dated December 2011.

17. That the bank is pre-positioned for Open Bank Resolution and in accordance with a direction from the Reserve Bank, the registered bank can—
- (a) close promptly at any time of the day and on any day of the week and that effective upon the appointment of the statutory manager—
 - (i) all liabilities are frozen in full; and
 - (ii) no further access by customers and counterparties to their accounts (deposits, liabilities or other obligations) is possible;
 - (b) apply a *de minimis* to relevant customer liability accounts;
 - (c) apply a partial freeze to the customer liability account balances;
 - (d) reopen by no later than 9am the next business day following the appointment of a statutory manager and provide customers access to their unfrozen funds;
 - (e) maintain a full freeze on liabilities not pre-positioned for open bank resolution; and
 - (f) reinstate customers’ access to some or all of their residual frozen funds.

For the purposes of this condition of registration, “*de minimis*”, “partial freeze”, “customer liability account”, and “frozen and unfrozen funds” have the same meaning as in the Reserve Bank of New Zealand document “Open Bank Resolution (OBR) Pre-positioning Requirements Policy” (BS17) dated September 2013.

18. That the registered bank has an Implementation Plan that—
- (a) is up-to-date; and
 - (b) demonstrates that the bank’s prepositioning for Open Bank Resolution meets the requirements set out in the Reserve Bank document: “Open Bank Resolution Pre-positioning Requirements Policy” (BS17).

For the purposes of this condition of registration, “Implementation Plan” has the same meaning as in the Reserve Bank of New Zealand document “Open Bank Resolution (OBR) Pre-positioning Requirements Policy” (BS17) dated September 2013.

19. That the bank has a compendium of liabilities that—
- (a) at the product-class level lists all liabilities, indicating which are—
 - (i) pre-positioned for Open Bank Resolution; and
 - (ii) not pre-positioned for Open Bank Resolution;

- (b) is agreed to by the Reserve Bank; and
- (c) if the Reserve Bank’s agreement is conditional, meets the Reserve Bank’s conditions.

For the purposes of this condition of registration, “compendium of liabilities” and “pre-positioned and non pre-positioned liabilities” have the same meaning as in the Reserve Bank of New Zealand document “Open Bank Resolution (OBR) Pre-positioning Requirements Policy” (BS17) dated September 2013.

20. That on an annual basis the bank tests all the component parts of its Open Bank Resolution solution that demonstrates the bank’s prepositioning for Open Bank Resolution as specified in the bank’s Implementation Plan.
- For the purposes of this condition of registration, “Implementation Plan” has the same meaning as in the Reserve Bank of New Zealand document “Open Bank Resolution (OBR) Pre-positioning Requirements Policy” (BS17) dated September 2013.
21. That, for a loan-to-valuation measurement period, the total of the bank’s qualifying new mortgage lending amounts must not for residential properties with a loan-to-valuation ratio of more than 80%, exceed 10% of the total of the qualifying new mortgage lending amounts arising in the loan-to-valuation measurement period.
22. That the bank must not make a residential mortgage loan unless the terms and conditions of the loan contract or the terms and conditions for an associated mortgage require that a borrower obtain the bank’s agreement before the borrower can grant to another person a charge over the residential property used as security for the loan.
23. That the bank must not permit a borrower to grant a charge in favour of another person over a residential property used as security for a residential mortgage loan unless the sum of the lending secured by the charge and the loan value for the residential mortgage loan would not exceed 80% of the property value of the residential property when the lending secured by the charge is drawn down.
24. That the bank must not provide a residential mortgage loan if the residential property to be mortgaged to the bank as security for the residential mortgage loan is subject to a charge in favour of another person unless the total amount of credit secured by the residential property would not exceed 80% of the property value when the residential mortgage loan is drawn down.
25. That the bank must not act as broker or arrange for a member of its banking group to provide a residential mortgage loan.

In these conditions of registration,—

“banking group”,—

- (a) means ANZ Bank New Zealand Limited (as reporting entity) and all other entities included in the group as defined in section 6(1) of the Financial Markets Conduct Act 2013 for the purposes of Part 7 of that Act (unless paragraph (b) applies); or
- (b) means ANZ Bank New Zealand Limited’s financial reporting group (as defined in section 2(1) of the

Conditions of Registration

Financial Reporting Act 1993) if the Financial Reporting Act 1993 applies to the bank:

“generally accepted accounting practice” —

- (a) has the same meaning as in section 8 of the Financial Reporting Act 2013 (unless paragraph (b) applies); or
- (b) means generally accepted accounting practice within the meaning of section 3 of the Financial Reporting Act 1993 if the bank is required to prepare financial statements in accordance with that practice.

In conditions of registration 21 to 25, —

“loan-to-valuation ratio”, “loan value”, “property value”, “qualifying new mortgage lending amount” and “residential mortgage loan” have the same meaning as in the Reserve Bank of New Zealand document entitled “Framework for Restrictions on High-LVR Residential Mortgage Lending” (BS19) dated July 2014:

“loan-to-valuation measurement period” means—

- (a) the six calendar month period ending on the last day of March 2014; and
- (b) thereafter a period of three calendar months ending on the last day of the third calendar month, the first of which ends on the last day of April 2014.

Directors' Statement

As at the date on which this Disclosure Statement is signed, after due enquiry, each Director believes that:

- (i) The Disclosure Statement contains all the information that is required by the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order 2014; and
- (ii) The Disclosure Statement is not false or misleading.

Over the year ended 30 September 2014, after due enquiry, each Director believes that:

- (i) ANZ Bank New Zealand Limited has complied with all Conditions of Registration that applied during that period;
- (ii) Credit exposures to connected persons were not contrary to the interests of the Banking Group;
- (iii) ANZ Bank New Zealand Limited had systems in place to monitor and control adequately the Banking Group's material risks, including credit risk, concentration of credit risk, interest rate risk, currency risk, equity risk, liquidity risk, operational risk and other business risks, and that those systems were being properly applied.

This Disclosure Statement is dated, and has been signed by all Directors of the Bank on, 18 November 2014.

Independent Auditor's Report

To the Shareholder of ANZ Bank New Zealand Limited

Report on the Bank and Banking Group Disclosure Statement

We have audited the accompanying financial statements and supplementary information of ANZ Bank New Zealand Limited (the Bank) and its subsidiaries (the Banking Group) on pages 4 to 76 of the Disclosure Statement. The financial statements comprise the balance sheets as at 30 September 2014, the statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information of the Bank and the Banking Group. The supplementary information comprises the information that is required to be disclosed under the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order 2014 (the Order).

Directors' Responsibility for the Disclosure Statement

The Directors are responsible for the preparation of the Bank and Banking Group Disclosure Statement, including financial statements prepared in accordance with Clause 24 of the Order, generally accepted accounting practice in New Zealand and International Financial Reporting Standards that give a true and fair view of the matters to which they relate. The Directors are also responsible for such internal controls as they determine are necessary to enable the preparation of the Bank and Banking Group financial statements that are free from material misstatement whether due to fraud or error.

The Directors are responsible for the preparation and fair presentation of supplementary information, in accordance with Schedules 2, 4, 7, 13, 14, 15 and 17 of the Order.

Auditor's Responsibility

Our responsibility is to express an opinion on the Disclosure Statement, including the financial statements prepared in accordance with Clause 24 of the Order and the supplementary information disclosed in accordance with Schedules 4, 7, 13, 14, 15 and 17 of the Order. We conducted our audit in accordance with International Standards on Auditing (New Zealand). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Bank and Banking Group financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the Bank and Banking Group financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the Bank and Banking Group's preparation of the financial statements that give a true and fair view of the matters to which they relate in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank and Banking Group's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates, as well as evaluating the presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

KPMG has also provided other audit related services to the Bank and Banking Group. In addition, certain partners and employees of our firm may also deal with the Bank and Banking Group on normal terms within the ordinary course of trading activities of the Bank and Banking Group. These matters have not impaired our independence as auditors of the Bank and Banking Group. We have no other relationship with, or interest in, the Bank and Banking Group.

Opinion on the Disclosure Statement

In our opinion the Disclosure Statement of the Bank and the Banking Group on pages 4 to 76 (excluding the supplemental information):

- a. complies with generally accepted accounting practice in New Zealand;
- b. complies with International Financial Reporting Standards; and
- c. gives a true and fair view of the financial position as at 30 September 2014 and of their financial performance and cash flows for the year ended on that date.

**Opinion on Supplementary Information**

In our opinion, the supplementary information that is required to be disclosed in accordance with Schedules 4, 7, 13, 14, 15 and 17 of the Order, and is included within notes 13, 14, 26, 27, 29 and 34 of the Disclosure Statement:

- a. has been prepared, in all material respects, in accordance with the guidelines issued pursuant to section 78(3) of the Reserve Bank of New Zealand Act 1989 and any Conditions of Registration;
- b. is in accordance with the books and records of the Bank and Banking Group; and
- c. fairly states the matters to which it relates in accordance with those Schedules.

Report on Supplementary Information Relating to Capital Adequacy

We have reviewed the Supplementary Information relating to Capital Adequacy, as disclosed in note 26 of the Disclosure Statement for the year ended 30 September 2014.

Directors' Responsibility for the Supplementary Information Relating to Capital Adequacy

The Directors are responsible for the preparation of Supplementary Information relating to Capital Adequacy that is required to be disclosed under Schedule 11 of the Order.

Auditor's Responsibility

Our responsibility is to express an opinion on the supplementary information relating to Capital Adequacy based on our review. We conducted our review in accordance with the review engagement standard RS-1 *Statement of Review Engagement Standards* issued by the External Reporting Board. Those standards require that we comply with ethical requirements and plan and perform the review to obtain limited assurance about whether the supplementary information relating to Capital Adequacy is, in all material respects:

- a. prepared in accordance with the Bank's Conditions of Registration;
- b. prepared in accordance with the Bank's internal models for credit risk and operational risk as accredited by the Reserve Bank of New Zealand; and
- c. disclosed in accordance with Schedule 11 of the Order.

A review is limited primarily to enquiries of Bank and Banking Group personnel and analytical review procedures applied to the financial data, and thus provides less assurance than an audit. We have not performed an audit in respect of the Capital Adequacy disclosures, and accordingly, we do not express an audit opinion on these disclosures.

Opinion on the Supplementary Information Relating to Capital Adequacy

Based on our review, nothing has come to our attention that causes us to believe that the supplementary information relating to capital adequacy prescribed by Schedule 11 of the Order, and disclosed in note 26 of the Disclosure Statement, is not, in all material respects:

- a. prepared in accordance with the Bank's Conditions of Registration;
- b. prepared in accordance with the Bank's internal models for credit risk and operational risk as accredited by the Reserve Bank of New Zealand; and
- c. disclosed in accordance with Schedule 11 of the Order.

Report on Other Legal and Regulatory Requirements

In accordance with the requirements of sections 16(1)(d) and 16(1)(e) of the Financial Reporting Act 1993, and clauses 2(1)(d) and 2(1)(e) of Schedule 1 of the Order, we report that:

- a. we have obtained all the information and explanations we have required; and
- b. in our opinion, proper accounting records have been kept by the Bank and Banking Group, as far as appears from our examination of those records.

Glossary of Terms

In this Disclosure Statement unless the context otherwise requires:

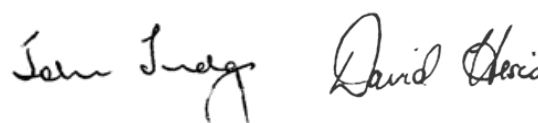

- (a) "Bank" means ANZ Bank New Zealand Limited;
- (b) "Banking Group" means ANZ Bank New Zealand Limited and all its subsidiaries;
- (c) "Immediate Parent Company" means ANZ Holdings (New Zealand) Limited;
- (d) "Ultimate Parent Bank" means Australia and New Zealand Banking Group Limited;
- (e) "Overseas Banking Group" means the worldwide operations of Australia and New Zealand Banking Group Limited including its subsidiaries;
- (f) "New Zealand business" means all business, operations, or undertakings conducted in or from New Zealand identified and treated as if it were conducted by a company formed and registered in New Zealand;
- (g) "NZ Branch" means the New Zealand business of the Ultimate Parent Bank;
- (h) "ANZ New Zealand" means the New Zealand business of the Overseas Banking Group;
- (i) "Registered Office" is, from 22 November 2013, Ground Floor, ANZ Centre, 23-29 Albert Street, Auckland, 1010, New Zealand, which is also the Banking Group's address for Service;
- (j) "RBNZ" means the Reserve Bank of New Zealand;
- (k) "APRA" means the Australian Prudential Regulation Authority;
- (l) "the Order" means the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order (No 2) 2013; and
- (m) Any term or expression which is defined in, or in the manner prescribed by, the Order shall have the meaning given in or prescribed by the Order.

Annual Report

Pursuant to section 211(3) of the Companies Act 1993 (the "Act"), the shareholder of the Bank has agreed that the Annual Report of the Bank and the Banking Group need not comply with any of the paragraphs (a), and (e) to (j) of subsection (1) and subsection (2) of section 211.

Accordingly, there is no information to be provided in this Annual Report other than the financial statements for the year ended 30 September 2013 and the audit report on those financial statements.

For and on behalf of the Board of Directors:

John Judge
Chairman
18 November 2013

David Hisco
Executive Director
18 November 2013

General Disclosures

General Matters

The Disclosure Statement has been issued in accordance with the Order.

The Bank is incorporated under the Companies Act 1993. The Bank is wholly owned by its Immediate Parent Company and ultimately by the Ultimate Parent Bank. The Immediate Parent Company of the Bank is incorporated in New Zealand and owned by ANZ Funds Pty Limited and the Ultimate Parent Bank (both incorporated in Australia). The address for service for the Ultimate Parent Bank is ANZ Centre Melbourne, Level 9, 833 Collins Street, Docklands, Victoria 3008, Australia.

The Immediate Parent Company has the power under the Bank's Constitution to appoint any person as a Director of the Bank either to fill a casual vacancy or as an additional Director or to remove any person from the office of Director, from time to time by giving written notice to the Bank. No appointment of a new Director may occur unless the RBNZ confirms that it does not object to the appointment.

Credit Rating Information

As at 18 November 2013 the Bank has three credit ratings, which are applicable to its long-term senior unsecured obligations which are payable in New Zealand in New Zealand dollars.

The Bank's Credit Ratings are:

Rating Agency	Current Credit Rating	Qualification
Standard & Poor's	AA-	Outlook Stable
Moody's Investors Service	Aa3	Outlook Stable
Fitch Ratings	AA-	Outlook Stable

General Disclosures

Changes in credit ratings over the last two years

On 1 December 2011, Standard and Poor's downgraded the Bank's long-term senior unsecured debt and deposit ratings from AA outlook stable to AA- outlook stable. This followed a similar one notch downgrade on the Ultimate Parent Bank and other major Australian banks.

On 30 January 2012, Fitch changed the outlook on the Bank's long-term senior unsecured debt and deposit ratings from positive to negative. This occurred simultaneously to a similar change in the outlook of ratings of the Ultimate Parent Bank and other major Australian banks. This was followed by a change in outlook from negative to stable on 24 February 2012.

There were no other changes to the Bank's credit ratings or qualifications during the two years ended 30 September 2013.

The following table describes the credit rating grades available:

	Standard & Poor's	Moody's Investors Service	Fitch Ratings
The following grades display investment grade characteristics:			
Ability to repay principal and interest is extremely strong. This is the highest investment category.	AAA	Aaa	AAA
Very strong ability to repay principal and interest.	AA	Aa	AA
Strong ability to repay principal and interest although somewhat susceptible to adverse changes in economic, business or financial conditions.	A	A	A
Adequate ability to repay principal and interest. More vulnerable to adverse changes.	BBB	Baa	BBB
The following grades have predominantly speculative characteristics:			
Significant uncertainties exist which could affect the payment of principal and interest on a timely basis.	BB	Ba	BB
Greater vulnerability and therefore greater likelihood of default.	B	B	B
Likelihood of default now considered high. Timely repayment of principal and interest is dependent on favourable financial conditions.	CCC	Caa	CCC
Highest risk of default.	CC to C	Ca to C	CC to C
Obligations currently in default.	D	-	RD & D

Credit ratings from Standard & Poor's and Fitch Ratings may be modified by the addition of "+" or "-" to show the relative standing within the "AA" to "B" categories. Moody's Investors Service applies numerical modifiers 1, 2, and 3 to each of the "Aa" to "Caa" classifications, with 1 indicating the higher end and 3 the lower end of the rating category.

Material Financial Support

In accordance with requirements issued by APRA pursuant to its Prudential Standards, the Ultimate Parent Bank may not provide material financial support to the Bank contrary to the following:

- the Ultimate Parent Bank should not undertake any third party dealings with the prime purpose of supporting the business of the Bank;
- the Ultimate Parent Bank should not hold unlimited exposures (should be limited as to specified time and amount) in the Bank (e.g. not provide a general guarantee covering any of the Bank's obligations);
- the Ultimate Parent Bank should not enter into cross default clauses whereby a default by the Bank on an obligation (whether financial or otherwise) is deemed to trigger a default of the Ultimate Parent Bank in its obligations;
- the Board of the Ultimate Parent Bank in determining limits on acceptable levels of exposure to the Bank should have regard to:
 - the level of exposure that would be approved to third parties of broadly equivalent credit status. In this regard, prior consultation (and in some cases approval) is required before entering exceptionally large exposures;
 - the impact on the Ultimate Parent Bank's capital and liquidity position and its ability to continue operating in the event of a failure by the Bank; and
- the level of exposure to the Bank not exceeding:
 - 50% on an individual exposure basis; and
 - 150% in aggregate (being exposures to all similar regulated entities related to the Ultimate Parent Bank)
 of the Ultimate Parent Bank's capital base.

Additionally, the Ultimate Parent Bank may not provide material financial support in breach of the Australian Banking Act (1959). This requires APRA to exercise its powers and functions for the protection of a bank's depositors and in the event of a bank becoming unable to meet its obligations or suspending payment, the assets of the bank in Australia shall be available to meet that bank's deposit liabilities in Australia in priority to all other liabilities of the bank.

The Ultimate Parent Bank has not provided material financial support to the Bank contrary to any of the above requirements.

Guarantors

No material obligations of the Bank are guaranteed as at 18 November 2013.

ANZNZ Covered Bond Trust

Certain debt securities ("Covered Bonds") issued by the Bank's wholly owned subsidiary, ANZ New Zealand (Int'l) Limited, are guaranteed by ANZNZ Covered Bond Trust Limited (the "Covered Bond Guarantor"), solely in its capacity as trustee of ANZNZ Covered Bond Trust. The Covered Bond Guarantor has guaranteed the payment of interest and principal of Covered Bonds with a carrying value as at 30 September 2013 of \$3,925 million, pursuant to a guarantee which is secured over a pool of assets. The Covered Bond Guarantor's address for service is Level 10, 141 Willis Street, Wellington, New Zealand. The Covered Bond Guarantor is not a member of the Banking Group and has no credit ratings applicable to its long term senior unsecured obligations payable in New Zealand dollars. The Covered Bonds have been assigned a long term rating of Aaa and AAA by Moody's Investors Service and Fitch Ratings respectively. Details of the pool of assets that secure this guarantee are provided in Note 36.

Notes to the Financial Statements

1. Significant Accounting Policies

(a) Basis of preparation

(i) Statement of compliance

These financial statements have been prepared in accordance with the requirements of the Companies Act 1993, the Financial Reporting Act 1993 and the Order. The Bank's financial statements are for ANZ Bank New Zealand Limited as a separate entity and the Banking Group's financial statements are for the Bank's consolidated group, which includes subsidiaries and associates.

These financial statements have been prepared in accordance with New Zealand Generally Accepted Accounting Practice. They comply with New Zealand equivalents to International Financial Reporting Standards ("NZ IFRS") and other applicable Financial Reporting Standards, as appropriate for profit-oriented entities. The financial statements comply with International Financial Reporting Standards ("IFRS").

The principal accounting policies adopted in the preparation of these financial statements are set out below.

(ii) Use of estimates and assumptions

Preparation of the financial statements requires the use of management judgement, estimates and assumptions that affect reported amounts and the application of policies. Actual results may differ from these estimates.

Discussion of the critical accounting estimates, which include complex or subjective decisions or assessments, are covered in note 2. Such estimates will require review in future periods.

(iii) Basis of measurement

The financial statements have been prepared in accordance with the historical cost basis except that the following assets and liabilities are stated at their fair value:

- derivative financial instruments, including in the case of fair value hedging, the fair value adjustment on the underlying hedged exposure;
- available-for sale financial assets;
- financial instruments held for trading;
- financial instruments designated at fair value through profit and loss.

(iv) Changes in accounting policies and application of new accounting standards

The accounting policies adopted by the Banking Group are consistent with those adopted and disclosed in the prior period. The Banking Group has applied, where relevant, all new or revised NZ IFRSs and NZ IFRS Interpretations applicable to annual reporting periods commencing on or before 1 October 2012. The initial application of these standards and interpretations has only resulted in changes to disclosures.

(v) Rounding

The amounts in the financial statements have been rounded to the nearest million dollars, except where otherwise stated.

(vi) Comparatives

Certain amounts in the comparative information have been reclassified to ensure consistency with the current year's presentation. The comparative figures in the notes to the financial statements relating to these items have been reclassified accordingly.

(vii) Principles of consolidation

Subsidiaries

The consolidated financial statements of the Banking Group comprise the financial statements of the Bank and all its subsidiaries where it is determined that there is capacity to control.

Control means the power to govern, directly or indirectly, the financial and operating policies of an entity so as to obtain benefits from its activities. All the facts of a particular situation are considered when determining whether control exists. Control is usually present when an entity has:

- power over more than one-half of the voting rights of the other entity;
- power to govern the financial and operating policies of the other entity;
- power to appoint or remove the majority of the members of the board of directors or equivalent governing body; or
- power to cast the majority of votes at meetings of the board of directors or equivalent governing body of the entity.

In addition, potential voting rights that are presently exercisable or convertible are taken into account in determining whether control exists.

In relation to special purpose entities control is deemed to exist where:

- in substance, the majority of the residual risks and rewards from their activities accrue to the Banking Group; or
- in substance, the Banking Group controls decision making powers so as to obtain the majority of the risks and rewards from their activities.

The effect of all transactions between entities in the Banking Group is eliminated.

Where subsidiaries have been sold or acquired during the year, their operating results have been included to the date of disposal or from the date of acquisition.

Associates

The Banking Group applies the equity method of accounting for associates.

The Banking Group's share of results of associates is included in the consolidated income statement. Shares in associates are carried in the consolidated balance sheet at cost plus the Banking Group's share of post acquisition net assets less accumulated impairment. Interests in associates are reviewed for any indication of impairment at least at each reporting date. Where an indication of the impairment exists, the recoverable amount of the associate is determined as the higher of the associate's fair value less costs to sell and its value in use. A discounted cash flow methodology and other methodologies, such as the capitalisation of earnings method, are used to determine the reasonableness of the valuation.

In the Bank's financial statements investments in subsidiaries and associates are carried at cost less accumulated impairment losses.

Notes to the Financial Statements

(viii) Foreign currency translation

Functional and presentation currency

Items included in the financial statements of each of the Banking Group's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The Banking Group's financial statements are presented in New Zealand dollars, which is the Banking Group's functional and presentation currency.

Foreign currency transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities resulting from foreign currency transactions are subsequently translated at the spot rate at reporting date.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different to those at which they were initially recognised or included in a previous financial report, are recognised in the income statement in the period in which they arise.

Translation differences on non-monetary items measured at fair value through profit or loss are reported as part of the fair value gain or loss on these items.

Translation differences on non-monetary items measured at fair value through equity, such as equities classified as available-for-sale financial assets, are included in the available-for-sale revaluation reserve in equity.

(b) Income recognition

Income is recognised to the extent that it is probable that economic benefits will flow to the Banking Group and that revenue can be reliably measured.

(i) Interest income

Interest income is recognised as it accrues, using the effective interest method.

The effective interest method calculates the amortised cost of a financial asset or financial liability and allocates the interest income or interest expense, including any fees and directly related transaction costs that are an integral part of the effective interest rate, over the expected life of the financial asset or liability so as to achieve a constant yield on the financial asset or liability.

For assets subject to prepayment, expected life is determined on the basis of the historical behaviour of the particular asset portfolio, taking into account contractual obligations and prepayment experience assessed on a regular basis.

(ii) Fee and commission income

Fees and commissions received that are integral to the effective interest rate of a financial asset are recognised using the effective interest method. For example, loan commitment fees, together with related direct costs, are deferred and recognised as an adjustment to the effective interest rate on a loan once drawn. Commitment fees to originate a loan which is unlikely to be drawn down are recognised as fee income as the service is provided.

Fees and commissions that relate to the execution of a significant act (for example, advisory or arrangement services, placement fees and

underwriting fees) are recognised when the significant act has been completed.

Fees charged for providing ongoing services (for example, maintaining and administering existing facilities) are recognised as income over the period the service is provided.

(iii) Dividend income

Dividends are recognised as revenue when the right to receive payment is established.

(iv) Gain or loss on sale of assets

The gain or loss on the disposal of assets is determined as the difference between the carrying amount of the assets at the time of disposal and the proceeds of disposal net of incremental disposal costs. This is recognised as an item of other income in the period in which the significant risks and rewards of ownership are transferred to the buyer.

(c) Expense recognition

Expenses are recognised in the income statement on an accruals basis.

(i) Interest expense

Interest expense on financial liabilities measured at amortised cost is recognised in the income statement as it accrues using the effective interest method.

(ii) Loan origination expenses

Certain loan origination expenses are an integral part of the effective interest rate of a financial asset measured at amortised cost. These loan origination expenses include:

- fees and commissions payable to brokers and certain customer incentive payments in respect of originating lending business; and
- other expenses of originating lending business, such as external legal costs and valuation fees, provided these are direct and incremental costs related to the issue of a financial asset.

Such loan origination expenses are initially recognised as part of the cost of acquiring the financial asset and amortised as part of the effective yield of the financial asset over its expected life using the effective interest method.

(iii) Lease payments

Leases entered into by the Banking Group as lessee are predominantly operating leases, and the operating lease payments are recognised as an expense on a straight-line basis over the lease term.

(d) Income tax

(i) Income tax expense

Income tax on earnings for the year comprises current and deferred tax and is based on the applicable tax law. It is recognised in the income statement as tax expense, except when it relates to items credited directly to equity, in which case it is recorded in equity, or where it arises from the initial accounting for a business combination, in which case it is included in the determination of goodwill.

(ii) Current tax

Current tax is the expected tax payable on taxable income for the year, based on tax rates (and tax laws) which are enacted or substantively enacted by the reporting date and including any adjustment for tax payable in previous periods. Current tax for current and prior periods is recognised as a liability

Notes to the Financial Statements

(or asset) to the extent that it is unpaid (or refundable).

(iii) Deferred tax

Deferred tax is accounted for using the comprehensive tax balance sheet method. It is generated by temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax base.

Deferred tax assets, including those related to the tax effects of income tax losses and credits available to be carried forward, are recognised only to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences or unused tax losses and credit can be utilised.

Deferred tax liabilities are recognised for all taxable temporary differences, other than those relating to taxable temporary differences arising from goodwill. They are also recognised for taxable temporary differences arising on investments in subsidiaries, branches, associates and joint ventures, except where the Banking Group is able to control the reversal of the temporary differences and it is probable that temporary differences will not reverse in the foreseeable future. Deferred tax assets associated with these interests are recognised only to the extent that it is probable that the temporary difference will reverse in the foreseeable future and there will be sufficient taxable profits against which to utilise the benefits of the temporary difference.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period(s) when the asset and liability giving rise to them are realised or settled, based on tax rates and tax laws that have been enacted or substantively enacted by the reporting date. The measurement reflects the tax consequences that would follow from the manner in which the Banking Group, at the reporting date, recovers or settles the carrying amount of its assets and liabilities.

(iv) Offsetting

Current and deferred tax assets and liabilities are offset only to the extent that they relate to income taxes imposed by the same taxation authority, there is a legal right and intention to settle on a net basis and it is allowed under the tax law of the relevant jurisdiction.

(e) Assets

Financial assets

(i) Financial assets and liabilities at fair value through profit or loss

Trading securities are financial instruments acquired principally for the purpose of selling in the short-term or which are a part of a portfolio which is managed for short-term profit-taking. Trading securities are initially recognised and subsequently measured in the balance sheet at their fair value.

Derivatives that are not effective accounting hedging instruments are carried at fair value through profit or loss. In addition, certain financial assets and liabilities are designated and measured at fair value through profit or loss where the following applies:

- the asset represents investments backing insurance policy liabilities;
- doing so eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets

and liabilities, or recognising the gains or losses thereon, on different bases;

- a group of financial assets or financial liabilities or both is managed and its performance evaluated on a fair value basis; or
- the financial instrument contains an embedded derivative, unless the embedded derivative does not significantly modify the cash flows or it is clear, with little or no analysis, that it would not be separately recorded.

Changes in the fair value (gains or losses) of these financial instruments are recognised in the income statement in the period in which they occur.

Purchases and sales of trading securities are recognised on trade date.

(ii) Derivative financial instruments

Derivative financial instruments are contracts whose value is derived from one or more underlying price index or other variables. They include swaps, forward rate agreements, futures, options and combinations of these instruments.

Derivative financial instruments are entered into for trading purposes (including customer-related reasons) or for hedging purposes (where the derivative instruments are used to hedge the Banking Group's exposures to interest rate risk, currency risk, price risk, credit risk and other exposures relating to non-trading positions).

Derivative financial instruments are recognised initially at fair value with gains or losses from subsequent measurement at fair value being recognised in the income statement. Valuation adjustments are integral in determining the fair value of derivatives. This includes a credit valuation adjustment (CVA) to reflect the credit worthiness of the counterparty and funding valuation adjustment (FVA) to account for the funding cost inherent in the portfolio.

Where the derivative is designated and is effective as a hedging instrument, the timing of the recognition of any resultant gain or loss in the income statement is dependent on the hedging designation. These hedging designations and associated accounting are as follows:

Fair value hedge

Where the Banking Group hedges the fair value of a recognised asset or liability or firm commitment, changes in the fair value of the derivative designated as a fair value hedge are recognised in the income statement. Changes in the fair value of the hedged item attributable to the hedged risk are reflected in adjustments to the carrying value of the hedged item, which are also recognised in the income statement.

Hedge accounting is discontinued when the hedge instrument expires or is sold, terminated, exercised or no longer qualifies for hedge accounting. The resulting adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to the income statement over the period to maturity of the hedged item. If the hedged item is sold or repaid, the unamortised fair value adjustment is recognised immediately in the income statement.

Notes to the Financial Statements

Cash flow hedge

The Banking Group designates derivatives as cash flow hedges where the instrument hedges the variability in cash flows of a recognised asset or liability, a foreign exchange component of a firm commitment, or a highly probable forecast transaction. The effective portion of changes in the fair value of derivatives qualifying and designated as cash flow hedges is deferred to the hedging reserve, which forms part of shareholders' equity. Any ineffective portion is recognised immediately in the income statement. Amounts deferred in equity are recognised in the income statement in the period during which the hedged forecast transactions take place.

When the hedge expires, is sold, terminated, exercised, or no longer qualifies for hedge accounting, the cumulative amount deferred in equity remains in the hedging reserve, and is subsequently transferred to the income statement when the hedged item is recognised in the income statement.

When a forecast hedged transaction is no longer expected to occur, the amount deferred in equity is recognised immediately in the income statement.

Derivatives that do not qualify for hedge accounting

All gains and losses from changes in the fair value of derivatives that are not designated in a hedging relationship but are entered into to manage the interest rate and foreign exchange risk of the Banking Group are recognised in the income statement. Under certain circumstances, the component of the fair value change in the derivative which relates to current period realised and accrued interest is included in net interest income. The remainder of the fair value movement is included in other income.

(iii) Available-for-sale assets

Available-for-sale assets comprise non-derivative financial assets which the Banking Group designates as available-for-sale but which are not deemed to be held principally for trading purposes, and include equity investments and quoted debt securities.

They are initially recognised at fair value plus transaction costs. Subsequent gains or losses arising from changes in fair value are included as a separate component of equity in the available-for-sale revaluation reserve. When the asset is sold, the cumulative gain or loss relating to the asset is transferred to the income statement.

Where there is objective evidence of impairment on an available-for-sale asset, the cumulative loss related to that asset is removed from equity and recognised in the income statement, as an impairment expense for debt instruments or as non-interest income for equity instruments. If, in a subsequent period, the amount of an impairment loss relating to an available-for-sale debt instrument decreases and the decrease can be linked objectively to an event occurring after the impairment event, the loss is reversed through the income statement through the impairment expense line.

Purchases and sales of available-for-sale financial assets are recognised on trade date, being the date on which the Banking Group commits to purchase or sell the asset.

(iv) Net loans and advances

Loans and advances are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Banking Group provides money to a debtor with no intention of trading the loans and advances. The loans and advances are initially recognised at fair value plus transaction costs that are directly attributable to the issue of the loan or advance. They are subsequently measured at amortised cost using the effective interest method, unless specifically designated on initial recognition at fair value through profit or loss.

All loans are graded according to the level of credit risk.

Net loans and advances include direct finance provided to customers such as bank overdrafts, credit cards, term loans, finance lease receivables and commercial bills.

Impairment of loans and advances

Loans and advances are reviewed at least at each reporting date for impairment. Credit impairment provisions are raised for exposures that are known to be impaired. Exposures are impaired and impairment losses are recorded if, and only if, there is objective evidence of impairment as a result of one or more loss events, that occurred after the initial recognition of the loan and prior to the reporting date, and that loss event, or events, has had an impact on the estimated future cash flows of the individual loan or the collective portfolio of loans that can be reliably estimated.

Impairment is assessed for assets that are individually significant (or on a portfolio basis for small value loans) and then on a collective basis for those exposures not individually known to be impaired.

Exposures that are assessed collectively are placed in pools of similar assets with similar risk characteristics. The required provision is estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the collective pool. The historical loss experience is adjusted based on current observable data such as changed economic conditions. The provision also takes account of the impact of inherent risk of large concentrated losses within the portfolio and an assessment of the economic cycle.

The estimated impairment losses are measured as the difference between the asset's carrying amount and the estimated future cash flows discounted to their present value. As this discount unwinds during the period between recognition of impairment and recovery of the cash flow, it is recognised in interest income. The process of estimating the amount and timing of cash flows involves considerable management judgement. These judgements are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

Impairment of capitalised acquisition expenses is assessed through comparing the actual behaviour of the portfolio against initial expected life assumptions.

The provision for impairment loss (individual and collective) is deducted from loans and advances in the balance sheet and the movement for the reporting period is reflected in the income statement.

When a loan is uncollectible, either partially or in full, it is written off against the related provision for loan

Notes to the Financial Statements

impairment. Unsecured facilities are normally written-off when they become 180 days past due or earlier in the event of the customer's bankruptcy or similar legal release from the obligation. However, a certain level of recoveries is expected after the write-off, which is reflected in the amount of the provision for credit losses. In the case of secured facilities, remaining balances are written-off after proceeds from the realisation of collateral have been received, if there is a shortfall.

Where impairment losses recognised in previous periods have subsequently decreased or no longer exist, such impairment losses are reversed in the income statement.

A provision is also raised for off-balance sheet items such as commitments that are considered likely to result in an expected loss.

(v) Lease receivables

Contracts to lease assets and hire purchase agreements are classified as finance leases if they transfer substantially all the risks and rewards of ownership of the asset to the customer or an unrelated third party. All other lease contracts are classified as operating leases.

(vi) Repurchase agreements

Securities sold under repurchase agreements are retained in the financial statements where substantially all the risks and rewards of ownership remain with the Banking Group, and a counterparty liability is disclosed under the classifications of due to other financial institutions or payables and other liabilities. The difference between the sale price and the repurchase price is accrued over the life of the repurchase agreement and charged to interest expense in the income statement.

Securities purchased under agreements to resell, where the Banking Group does not acquire the risks and rewards of ownership, are recorded as receivables in liquid assets, net loans and advances, or due from other financial institutions, depending on the term of the agreement and the counterparty. The security is not included in the balance sheet. Interest income is accrued on the underlying loan amount.

Securities borrowed are not recognised in the balance sheet, unless these are sold to third parties, at which point the obligation to repurchase is recorded as a financial liability at fair value with fair value movements included in the income statement.

(vii) Derecognition

The Banking Group enters into transactions where it transfers financial assets recognised on its balance sheet yet retains either all the risks and rewards of the transferred assets or a portion of them. If all, or substantially all, the risks and rewards are retained, the transferred assets are not derecognised from the balance sheet.

In transactions where substantially all the risks and rewards of ownership of a financial asset are neither retained nor transferred, the Banking Group derecognises the asset if control over the asset is lost. In transfers where control over the asset is retained, the Banking Group continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset. The rights and obligations retained or created in the transfer are recognised separately as assets and liabilities as appropriate.

Non-financial assets

(viii) Goodwill

Goodwill represents the excess of the purchase consideration over the fair value of the identifiable net assets of a controlled entity at the date of gaining control. Goodwill is recognised as an asset and not amortised, but is assessed for impairment at least annually or more frequently if there is an indication that the goodwill may be impaired. Where the assessment results in the goodwill balance exceeding the value of expected future benefits, the difference is charged to the income statement. Any impairment of goodwill is not subsequently reversed.

(f) Liabilities

Financial liabilities

(i) Deposits and other borrowings

Deposits and other borrowings include certificates of deposit, interest bearing deposits, debentures, commercial paper and other related interest and non-interest bearing financial instruments. Deposits and other borrowings, excluding commercial paper, are initially recognised at fair value plus transaction costs and subsequently measured at amortised cost. The interest expense is recognised using the effective interest method. Commercial paper is designated at fair value through profit or loss, with fair value movements recorded directly in the income statement, which reflects the basis on which it is managed.

(ii) Bonds, notes and loan capital

Bonds, notes and loan capital are accounted for in the same way as deposits and other borrowings, except for those bonds and notes which are designated at fair value through profit or loss on initial recognition, with fair value movements recorded in the income statement.

(iii) Financial guarantee contracts

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due. Financial guarantees are issued in the ordinary course of business, consisting of letters of credit, guarantees and acceptances. Financial guarantees are initially recognised in the financial statements at fair value on the date the guarantee was given; typically this is the premium received. Subsequent to initial recognition, the Banking Group's liabilities under such guarantees are measured at the higher of their amortised amount and the best estimate of the expenditure required to settle any financial obligation arising at the balance sheet date. These estimates are determined based on experience of similar transactions and history of past losses.

(iv) Derecognition

Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled or expires.

(g) Equity

(i) Shares

Issued shares are recognised at the amount paid per share net of directly attributable issue costs.

Notes to the Financial Statements

(ii) Reserves

Available-for-sale revaluation reserve

This reserve includes changes in the fair value of available-for-sale financial assets, net of tax. These changes are transferred to the income statement (in non-interest income) when the asset is derecognised. Where the asset is impaired, the changes are transferred to the impairment expense line in the income statement for debt instruments and in the case of equity instruments to non-interest income.

Cash flow hedging reserve

This reserve includes the fair value gains and losses associated with the effective portion of designated cash flow hedging instruments.

(h) Presentation

(i) Offsetting of income and expenses

Income and expenses are not offset unless required or permitted by an accounting standard. This generally arises in the following circumstances:

- where transaction costs form an integral part of the effective interest rate of a financial instrument which is measured at amortised cost, these are offset against the interest income generated by the financial instrument;
- where gains and losses relating to fair value hedges are assessed as being effective; or
- where gains and losses arise from a group of similar transactions, such as foreign exchange gains and losses.

(ii) Offsetting of financial assets and liabilities

Assets and liabilities are offset and the net amount reported in the balance sheet only where there is:

- a current enforceable legal right to offset the asset and liability; and
- an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(iii) Statement of cash flows

For cash flow statement presentation purposes, cash and cash equivalents includes: cash on hand; deposits held at call with other financial institutions; and other short term, highly liquid, investments with original terms of maturity of three months or less that are readily convertible to cash and which are subject to an insignificant risk of changes in value.

Certain cash flows have been netted in order to provide more meaningful disclosure, as many of the cash flows are received and disbursed on behalf of customers and reflect the activities of the customers rather than those of the Banking Group. These include customer loans and advances, customer deposits, certificates of deposit, related party balances and trading securities.

(iv) Goods and services tax

Income, expenses and assets are recognised net of the amount of goods and services tax ("GST") except where the amount of GST incurred is not recoverable from the Inland Revenue Department ("IRD"). In these circumstances, the GST is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated with the amount of GST included. The net amount of GST recoverable from, or payable to, the IRD is included as other assets or other liabilities in the balance sheet.

Cash flows are included in the cash flow statement on a net basis. The GST components of cash flows arising from investing and financing activities, which are recoverable from, or payable to, the IRD are classified as operating cash flows.

(v) Segment reporting

Operating segments are distinguishable components of the Banking Group that provide products or services that are subject to risks and rewards that are different to those of other operating segments. The Banking Group operates predominately in the banking industry within New Zealand. The Banking Group has very limited exposure to risk associated with operating in different economic environments or political conditions. On this basis no geographical segment information is provided.

(i) Other

(i) Contingent liabilities

Contingent liabilities acquired in a business combination are individually measured at fair value at the acquisition date. At subsequent reporting dates the value of such contingent liabilities is reassessed based on the estimate of expenditure required to settle the contingent liability.

Other contingent liabilities are not recognised in the balance sheet but disclosed in Note 35 unless it is considered remote that the Banking Group will be liable to settle the possible obligation.

(ii) Accounting Standards not early adopted

The following standards and amendments were available for early adoption but have not been applied by the Banking Group in these financial statements. The Banking Group currently does not intend to apply any of these pronouncements until their effective date.

Standards and amendments effective for periods commencing after 1 January 2013

The Banking Group does not expect any significant impact on the financial statements from the application of the following standards.

NZ IFRS 10 Consolidated Financial Statements

Establishes a new approach to determining which investees should be consolidated and provides a single model to be applied in the control analysis for all investors.

NZ IAS 27 (2011) Separate Financial Statements

Carries forward the existing accounting and disclosure requirements for separate financial statements.

The Banking Group is still assessing the impact of the following standards on the financial statements.

Amendments to NZ IFRS 7: Disclosures – Offsetting Financial Assets and Financial Liabilities

Requires additional disclosures for financial assets and liabilities that are set off, and recognised financial instruments that are subject to an enforceable master netting agreement.

NZ IFRS 13 Fair Value Measurement

Provides a single source of guidance on fair value measurement and requires certain disclosures regarding fair value.

Notes to the Financial Statements

NZ IFRS 12 Disclosure of Interests in Other Entities

Provides a single, consistent approach for disclosures of all interests in subsidiaries, joint arrangements, associates and structured entities.

Standards and amendments effective for periods commencing after 1 January 2015

NZ IFRS 9 Financial Instruments

Specifies a simpler methodology for classifying and measuring financial assets, with two primary measurement categories: amortised cost and fair value. Requires the amount of change in the fair value attributable to changes in credit risk of certain liabilities designated under the fair value option to be presented in other comprehensive income. The Banking Group is assessing the impact on the financial statements.

2. Critical Estimates and Judgement Used in Applying Accounting Policies

There are a number of critical accounting treatments which include complex or subjective judgements and estimates that may affect the reported amounts of assets and liabilities in the financial statements. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

An explanation of the judgements and estimates made by the Banking Group, in the process of applying its accounting policies, that have the most significant effect on the amounts recognised in the financial statements are set out below.

Critical accounting estimates and assumptions

Credit provisioning

The accounting policy relating to measuring the impairment of loans and advances requires the Banking Group to assess impairment at least at each reporting date. The credit provisions raised (collective and individual) represent management's best estimate of the losses incurred in the loan portfolio at balance date based on their experienced judgement.

The collective provision is estimated on the basis of historical loss experience for assets with credit characteristics similar to those in the collective pool. The historical loss experience is adjusted based on current observable data and events and an assessment of the impact of model risk. The provision also takes into account the impact of large concentrated losses within the portfolio and the economic cycle.

The use of such judgements and reasonable estimates is considered by management to be an essential part of the process and does not impact on the reliability of the provision.

Individual and collective provisioning involves the use of assumptions for estimating the amounts and timing of expected future cash flows. The process of estimating the amount and timing of cash flows involves considerable management judgement. These judgements are revised regularly to reduce any differences between loss estimates and actual loss experience.

Refer to Note 14 for details of credit impairment provisions.

Critical judgements in applying the Banking Group's accounting policies

Financial instruments at fair value

The Banking Group's financial instruments measured at fair value are stated in note 1(a)(iii). In estimating fair value the Banking Group uses, wherever possible, quoted market prices in an active market for the financial instrument.

In the event that there is no active market for the instrument, fair value is based on present value estimates or other market accepted valuation techniques. The valuation models incorporate the impact of bid/ask spread, counterparty credit spreads and other factors that would influence the fair value determined by a market participant. The selection of appropriate valuation techniques, methodology and inputs requires judgement. These are reviewed and updated as market practice evolves.

Derivatives and hedging

The Banking Group buys and sells derivatives as part of its trading operations and to hedge its interest rate risk, currency risk, price risk, credit risk and other exposures relating to non-trading positions.

A hedging instrument is a designated derivative whose fair value or cash flows are expected to offset changes in the fair value or cash flows of a designated hedged item. A hedged item is an asset, liability, firm commitment or highly probable forecast transaction that: (a) exposes the Banking Group to the risk of changes in fair value or future cash flows; and (b) is designated as being hedged.

Judgement is required in selecting and designating hedging relationships and assessing hedge effectiveness. NZ IAS 39 *Financial Instruments: Recognition and Measurement* does not specify a single method for assessing hedge effectiveness prospectively or retrospectively. The Banking Group adopts the hypothetical derivative approach to determine hedge effectiveness in line with current risk management strategies. Hedge ineffectiveness can arise for a number of reasons and whilst a hedge may pass the effectiveness tests above it may not be perfectly effective, leaving some volatility in the income statement.

The majority of outstanding derivative positions are transacted over-the-counter and therefore need to be valued using valuation techniques. Included in the determination of the fair value of derivatives is a credit valuation adjustment (CVA) to reflect the creditworthiness of the counterparty. This is influenced by the mark-to-market of the derivative trades and by the movement in the market cost of credit. Further adjustments are made to account for the funding costs inherent in the derivative. Judgment is required to determine the appropriate cost of funding and the future expected cashflows used in this funding valuation adjustment (FVA).

Goodwill

Refer to Note 18 for details of goodwill held by the Banking Group.

The carrying value of goodwill is subject to an impairment test to ensure that the current carrying value does not exceed its recoverable value at the balance sheet date. Any excess of carrying value

Notes to the Financial Statements

over recoverable amount is taken to the income statement as an impairment write down.

Goodwill has been allocated for impairment purposes to the cash generating units at which the goodwill is monitored for internal reporting purposes. Impairment testing of purchased goodwill is performed by comparing the recoverable value of each cash generating unit with the current carrying amount of its net assets, including goodwill. Judgement is required in identifying the cash-generating units to which goodwill and other assets are allocated for the purpose of impairment testing.

The recoverable amount is based on value-in-use calculations. These calculations use cash flow projections based on a number of financial budgets within each segment approved by management covering a three year period. Cash flow projections are based on a range of readily available economic assumptions including GDP and CPI. Cash flows beyond the three year period are extrapolated using a 3% growth rate.

These cash flow projections are discounted using a capital asset pricing model. As at 28 February 2013 when the last valuation was prepared, a discount rate of 11.61% was applied to each cash generating unit. The main variables in the calculation of the discount rate used are the risk free rate, the beta rate and the market risk premium. The risk free rate is based on the 10 year Government Bond Rate. The beta rate and the market risk premium are consistent with observable and comparative market rates applied in the regional banking sector. Market observable information is not readily available at the segment level therefore management performed stress tests for key sensitivities in each segment.

Management believes any reasonable possible change in the key assumptions on which the recoverable amount is based would not cause the Banking Group's carrying amount to exceed its recoverable amount.

3. Risk Management Policies

The Banking Group recognises the importance of effective risk management to its business success. Management is committed to achieving strong control and a distinctive risk management capability that enables the Banking Group business units to meet their performance objectives.

The Banking Group approaches risk through managing the various elements of the system as a whole rather than viewing them as independent and unrelated parts. The risk management division ("Risk Management") is independent of the business, with clear delegations from the Board, and operates within a comprehensive framework comprising:

- The Board providing leadership, setting risk appetite/strategy and monitoring progress;
- A strong framework for development and maintenance of Banking Group-wide risk management policies, procedures and systems, overseen by an independent team of risk professionals;
- The use of sophisticated risk tools, applications and processes to execute the global risk management strategy across the Banking Group;
- Business unit level accountability, as the "first line of defence", for the management of risks in alignment with the Banking Group's strategy; and

- Independent oversight to ensure business unit level compliance with policies, regulations and laws, and to provide regular risk evaluation and reporting.

The Banking Group manages risk through an approval, delegation and limits structure. Regular reviews of the policies, systems and risk reports, including the effectiveness of the risk management systems, discussions covering the Banking Group's response to emerging risk issues and trends, and that the requisite culture and practices are in place across the Banking Group, are conducted within the Banking Group and also by the Ultimate Parent Bank. The Board has responsibility for reviewing all aspects of risk management.

The Board has ultimate responsibility for overseeing the effective deployment of risk management frameworks, policies and processes within New Zealand. The Bank's Risk Committee assists the Board in this function. The role of the Risk Committee is to assist the Board in the effective discharge of its responsibilities for business, market, credit, operational, compliance, liquidity, product and reputational risk management, and to liaise and consult with the Ultimate Parent Bank Risk Committee as required. Risk Management, via the Chief Risk Officer, coordinates risk management activities directly between Business Unit risk functions and Ultimate Parent Bank Group Risk Management functions.

The risk management process is subject to oversight by the Risk Committee of the Ultimate Parent Bank Board. This includes the review of risk portfolios and the establishment of prudential policies and controls.

The Banking Group's risk management policies are essentially the same as the Ultimate Parent Bank, but are tailored where required to suit the local New Zealand regulatory and business environment.

The Audit Committee, which is a sub-committee of the Board, has responsibility for ensuring the integrity of the Banking Group's financial controls, reporting systems and internal audit standards. It meets at least four times a year and reports directly to the Board. All members of the Audit Committee are non-executive directors.

Financial risk management

Refer to Note 29 for detailed disclosures on the Banking Group's financial risk management policies.

Operational Risk

Operational risk is the risk arising from day to day operational activities which may result in direct or indirect loss. These losses may result from failure to comply with policies, procedures, laws and regulations, from fraud or forgery, from a breakdown in the availability or integrity of services, systems and information, or damage to the Banking Group's reputation.

Examples include failure to comply with policy and legislation, human error, natural disasters, fraud and other malicious acts. Where appropriate, risks are mitigated by insurance.

Risk Management is responsible for establishing the Banking Group's operational risk framework and associated Banking Group-wide policies. Business units are responsible for the identification, analysis, assessment and treatment of operational risks on a day-to-day basis.

Notes to the Financial Statements

Business units have primary responsibility for the identification and management of operational risk with executive oversight provided by the relevant Retail and Wholesale Risk Forums. The Bank's Operational Risk Executive Committee ("OREC") undertakes the governance function through the bi-monthly monitoring of operational risk performance across the Banking Group. The Board and Risk Management conduct effective oversight through the approval of operational risk policies and frameworks and monitoring key operational risk metrics.

Compliance

The Banking Group conducts its business in accordance with all relevant compliance requirements. In order to assist the Banking Group identify, manage, monitor and measure its compliance obligations, the Banking Group has a comprehensive regulatory compliance framework in place, which addresses both external (regulatory) and internal compliance.

Risk Management, in conjunction with business unit staff ensure the Banking Group operates within a compliance infrastructure and framework that incorporates new and changing business obligations and processes.

The compliance policies and their supporting framework seek to minimise material risks to the Banking Group's reputation and value that could arise from non-compliance with laws, regulations, industry codes and internal standards and policies. Business units have primary responsibility for the identification and management of compliance. Risk Management provides policy and framework, measurement, monitoring and reporting, as well as leadership in areas such as anti-money laundering procedures and matters of prudential compliance. The Bank's OREC, the Chief Risk Officer, the Board and the Risk Committee of the Ultimate Parent Bank Board conduct board and executive oversight.

Global Internal Audit

Global Internal Audit is a function independent of management whose role is to provide the Board and management with an effective and independent appraisal of the internal controls established by management. Operating under a Board approved Charter, the reporting line for the outcomes of work conducted by Global Internal Audit is direct to the Chair of the Audit Committee, with a direct communication line to the Chief Executive Officer and the external auditor.

The Global Internal Audit Plan is developed utilising a risk based approach and is refreshed on a quarterly basis. The Audit Committee approves the plan, the associated budget and any changes thereto.

All audit activities are conducted in accordance with local and international auditing standards, and the results thereof are reported to the Audit Committee, Risk Committee and management. These results influence the performance assessment of business heads.

Furthermore, Global Internal Audit monitors the remediation of audit issues and highlights the current status of any outstanding audits.

It is the Banking Group's policy that, subject to the approval of the Ultimate Parent Bank's Audit Committee, KPMG can provide assurance and other audit-related services that, while outside the scope of the statutory audit, are consistent with the role of auditor. KPMG may not provide services that are perceived to be in conflict with the role of auditor. Services that are perceived to be in conflict with the role of auditor include consulting advice and subcontracting of operational activities normally undertaken by management, and engagements where the auditor may ultimately be required to express an opinion on its own work.

Other services include taxation services and services for the audit or review of financial information other than financial reports including prudential supervision reviews, prospectus reviews and other audits required for local regulatory purposes.

The Bank is a member of an imputation group and can access imputation credits of the imputation group. The imputation credit balance for the Bank is the imputation credit balance of this imputation group. The imputation credit balance for the Banking Group includes the imputation credit balance in relation to both the imputation group and other companies in the the Banking Group that are not in the imputation group. The imputation credit balance available includes imputation credits that will arise from the payment of the amount of provision for income tax as at the reporting date.

¹ Deferred tax assets and liabilities are set-off where they relate to income tax levied by the same income tax authority on either the same taxable entity or different taxable entities within the same taxable group.

Notes to the Financial Statements

7. Segmental Analysis

For segment reporting purposes, the Banking Group is organised into four major business segments - Retail, Commercial, Wealth and Institutional. Centralised back office and corporate functions support these segments. These segments are consistent with internal reporting provided to the chief operating decision maker, being the Bank's Chief Executive Officer.

Segmental reporting has been updated to reflect minor changes to the Banking Group's structure. Comparative data has been adjusted to be consistent with the current year's segment definitions.

Retail

Retail provides products and services to personal customers via the branch network, mortgage specialists, the contact centre and a variety of self service channels (internet banking, phone banking, ATMs, website and mobile phone banking). Core products include current and savings accounts, unsecured lending (credit cards, personal loans and overdrafts) and home loans secured by mortgages over property. Retail distributes insurance and investment products on behalf of the Wealth segment.

Commercial

Commercial provides services to Business Banking, Commercial & Agri, and UDC customers. Business Banking services are offered to small enterprises (typically with annual revenues of less than \$5 million). Commercial & Agri customers consist of primarily privately owned medium to large enterprises. The Banking Group's relationship with these businesses ranges from simple banking requirements with revenue from deposit and transactional facilities, and cash flow lending, to more complex funding arrangements with revenue sourced from a wider range of products. UDC is principally involved in the financing and leasing of plant, vehicles and equipment, mainly for small and medium sized businesses, as well as investment products.

Wealth

Wealth includes private banking and investment services provided to high net worth individuals, the ANZ wealth management and OnePath insurance businesses, and other investment products.

Institutional

Institutional provides financial services through a number of specialised units to large multi-banked corporations, often global, who require sophisticated product and risk management solutions. Those financial services include loan structuring, foreign exchange, wholesale money market services and transaction banking.

Other

Other includes treasury and back office support functions, none of which constitutes a separately reportable segment.

11. Derivative Financial Instruments

The use of derivatives and their sale to customers as risk management products is an integral part of the Banking Group's trading activities. Derivatives are also used to manage the Banking Group's own exposure to fluctuations in exchange and interest rates as part of its own asset and liability management activities.

Derivatives are subject to the same types of credit and market risk as other financial instruments and the Banking Group manages these risks in a consistent manner.

Derivatives, except for those that are specifically designated as effective hedging instruments, are classified as held for trading.

Derivatives held for trading

The held for trading classification includes two categories of derivative instruments: those held as trading positions and those used for the Banking Group's balance sheet risk management.

Trading positions

Trading positions consist of both sales to customers and market making activities. Sales to customers include the structuring and marketing of derivative products to customers which enable them to take or mitigate risks. Market making activities consist of derivatives entered into principally for the purpose of generating profits from short-term fluctuations in price or margins. Positions may be traded actively or held over a period of time to benefit from expected changes in market rates.

Balance sheet risk management

The Banking Group designates certain balance sheet risk management derivatives into hedging relationships in order to minimise income statement volatility. This volatility is created by differences in the timing of recognition of gains and losses between the derivative and the hedged item. Hedge accounting is not applied to all balance sheet risk management positions as some balance sheet risk management derivatives are classified as held for trading.

Derivatives in hedging relationships

Fair value hedges

The Banking Group's fair value hedges principally consist of interest rate swaps that are used to protect against changes in the fair value of fixed-rate long-term financial instruments due to movements in market interest rates.

Gain / (loss) on fair value hedges attributable to the hedged risk

\$ millions	Banking Group		Bank	
	30/09/2013	30/09/2012	30/09/2013	30/09/2012

- hedging instrument	(72)	(45)	(72)	(45)
Net ineffectiveness on qualifying fair value hedges	-	(4)	-	(4)

Notes to the Financial Statements

Cash flow hedges

The Banking Group's cash flow hedges comprise interest rate swaps that are used to protect against exposures to variability in future interest cash flows on non-trading assets and liabilities which bear interest at variable rates or which are expected to be refunded or reinvested in the future. The amounts and timing of future cash flows, representing both principal and interest flows, are projected for each portfolio of financial assets and liabilities on the basis of their forecast repricing profile. This forms the basis for identifying gains and losses on the effective portions of derivatives designated as cash flow hedges.

Analysis of the cash flow hedging reserve

	Banking Group		Bank	
	30/09/2013	30/09/2012	30/09/2013	30/09/2012

Total provision for credit impairment	223	151	680	1,054	223	139	654	1,016

¹ The impairment loss on an impaired asset is calculated as the difference between the asset's carrying amount and the estimated future cash flows discounted to its present value using the original effective interest rate for the asset. This discount unwinds as interest income over the period the asset is held.

¹ Previously known as OnePath (NZ) Limited

² Previously known as OnePath Nominees (NZ) Limited

³ Previously known as OnePath Holdings (NZ) Limited

All subsidiaries and associates are incorporated in New Zealand, unless stated otherwise. The ownership interest percentage equates to the voting power held for all companies. Control of Kingfisher NZ Trust 2008-1 and ANZNZ Covered Bond Trust exists as the Banking Group retains substantially all the risks and rewards of the operations.

Movements in subsidiaries and associates

In December 2012 ANZ Capital NZ Limited sold its interest in Wyma Engineering (NZ) Limited.

In January 2013 NBNZ Holdings Hong Kong Limited was wound up.

In May 2013 the Bank sold its interest in EFTPOS New Zealand Limited. Control Nominees Limited acquired 100% of the share capital and subsequently amalgamated with Origin Mortgage Management Services (2011) Limited.

In July 2013 Silver Fern Life Brokers Limited amalgamated with Alos Holdings Limited.

In August 2013 Alos Holdings Limited amalgamated with National Bank of New Zealand Custodians Limited. Arawata Trust Company, NBNZ Holdings Limited and National Bank of New Zealand Custodians Limited amalgamated with Control Nominees Limited. Arawata Trust was wound up.

These transactions did not have a material impact on the financial statements of the Banking Group.

Employee entitlements ¹	120	135	116	130
Restructuring costs and surplus leased space ²	22	111	9	109
Non-lending losses, frauds and forgeries	2	1	2	1
Other ³	85	92	60	52
Total provisions	229	339	187	292

¹ The aggregate liability for employee entitlements largely comprises provisions for annual leave and long service leave.

² Restructuring costs and surplus leased space provisions arise from activities related to material changes in the scope of business undertaken by the Banking Group or the manner in which that business is undertaken and includes termination benefits. Costs relating to on-going activities are not provided for. Provision is made when the Banking Group is demonstrably committed, it is probable that the costs will be incurred, though their timing is uncertain, and the costs can be reliably estimated. The 2012 balance includes provisions related to the New Zealand Simplification programme, including implementation of a core banking system, a single bank brand and an optimised branch network.

³ Other provisions include provisions relating to make-good of leased premises, seismic obligations and the deferred settlement of obligations arising from managed funds.

23. Bonds and notes

AUD 265,740,000 perpetual subordinated floating rate loan ¹	299	333	299	333
AUD 10,000,000 perpetual subordinated floating rate loan	11	-	11	-
Total loan capital issued	1,145	1,168	1,145	1,168
Less loan capital instruments held by the Bank	(1)	-	(1)	-
Total loan capital	1,144	1,168	1,144	1,168

¹ These instruments qualify as tier two capital under RBNZ's transitional rules. Refer to Note 28 for further details.

Loan capital is subordinated in right of payment in the event of liquidation or wind up to the claims of depositors and all creditors of the Bank.

Loan capital instruments are classified as debt reflecting an assessment of the key terms and conditions of the instruments, and an assessment of the ability, and likelihood of interest payments being deferred. Certain of these instruments have interrelationships that have been considered in this assessment.

NZD 835,000,000 bond

This bond was issued by the Bank on 18 April 2008. The Bank did not elect to redeem the bond on 18 April 2013 (the "First Call Date"). The Bank may elect to redeem the bond on 18 April 2018 (the "Second Call Date") or any interest payment date subsequent to 18 April 2018. Interest is payable half yearly in arrears on 18 April and 18 October each year, up to and including the Second Call Date and then quarterly thereafter. Should the bond not be called at the Second Call Date, the Coupon Rate from the Second Call Date onwards will be set on a quarterly basis to the three month FRA rate plus 3.00%.

As at 30 September 2013, this bond carried a BBB+ rating by Standard and Poor's and an A3 rating by Moody's.

The coupon interest on the bond was 9.66% until 18 April 2013 when it reset to 5.28% for the five year period to 18 April 2018.

This bond is listed on the New Zealand Exchange ("NZX"). The Market Surveillance Panel of the NZX granted the Bank a waiver from the requirements of Listing Rules 10.4 (relating to the provision of preliminary announcements of half yearly and annual results to the NZX) and 10.5 (relating to preparing and providing a copy of half yearly and annual reports to the NZX).

AUD 265,740,000 loan

This loan was drawn down by the Bank on 27 September 1996 and has no fixed maturity. Interest is payable half yearly in arrears at BBSW + 0.95% p.a., with interest payments due on 15 March and 15 September each year.

AUD 10,000,000 loan

This loan was drawn down by the Bank on 27 March 2013 and has no fixed maturity. Interest is payable half yearly in arrears on 15 March and 15 September each year. The bank may repay the loan on any interest payment date after both the NZD 835,000,000 bond and AUD 265,740,000 loan have been repaid in full.

Coupon interest is BBSW + 2.4% p.a., increasing to BBSW + 4.4% p.a. from 15 September 2018.

25. Related Party Transactions

Key management personnel

Key management personnel are defined as the Directors and senior management of the Banking Group - those persons having the authority and responsibility for planning, directing and controlling the activities of the entity. The information above includes transactions with those individuals, their close family members and their subsidiaries.

Loans made to and deposits held by key management personnel are made in the course of ordinary business on normal commercial terms and conditions no more favourable than those given to other employees or customers. Loans are on terms of repayment that range between fixed, variable and interest only, all of which have been made in accordance with the Bank's lending policies.

All transactions with key management personnel (including personally related parties) are conducted on an arm's length basis in the ordinary course of business and on commercial terms and conditions. These transactions principally consist of the provision of financial and investment services.

Transactions with other related parties

The Bank and Banking Group undertake transactions with the Immediate Parent Company, Ultimate Parent Bank, other members of the Overseas Banking Group, associates and joint ventures.

These transactions principally consist of funding and hedging transactions, the provision of other financial and investment services, technology and process support, and compensation for share based payments made to Banking Group employees. Transactions with related parties outside of the Banking Group are conducted on an arm's length basis and on normal commercial terms.

In addition the Bank undertakes similar transactions with subsidiaries, which are eliminated in the consolidated Banking Group financial statements. Included within the Bank's transactions with subsidiaries is the provision of administrative functions to some subsidiaries for which no payments have been made.

Assets and liabilities are classified as current if:

- it is expected they will be realised, consumed or settled in the normal operating cycle or within twelve months after the end of the reporting date; or
- they are held primarily for trading; or
- they are assets that are cash or a cash equivalent; or
- they are liabilities where there is no unconditional right to defer settlement for at least twelve months.

Non-current assets include premises and equipment and intangible assets as well as financial assets of a long-term nature. Non-current liabilities include financial and non-financial liabilities which are expected to be settled after twelve months from balance date.

For the purposes of this disclosure, the fair value of both trading and hedging derivatives has been classified as current. For more information on the contractual timing of expected outflows and inflows in relation to hedging derivatives refer to Note 29.

Total paid in share capital	7,243	6,943	7,243	6,943

Ordinary shares

650,712 of the ordinary shares are uncalled (30/09/2012 650,712 shares uncalled).

During the year ended 30 September 2013 the Bank paid ordinary dividends of \$1,065 million to the Immediate Parent Company (equivalent to \$0.63 per share) (30/09/2012 the Bank paid ordinary dividends of \$1,150 million to the Immediate Parent Company (equivalent to \$0.68 per share)). There were no changes to ordinary share capital during the year ended 30 September 2013 (30/09/2012 \$nil).

All ordinary shares share equally in dividends and any proceeds available to ordinary shareholders on winding up of the Bank. On a show of hands every member who is present at a meeting in person or by proxy or by representative is entitled to one vote, and upon a poll every member shall have one vote for each share held.

Preference shares

All preference shares were issued by the Bank to the Immediate Parent and do not carry any voting rights. The preference shares are wholly classified as equity instruments as there is no contractual obligation for the Bank to either deliver cash or another financial instrument or to exchange financial instruments on a potentially unfavourable basis. The key terms of the preference shares are as follows:

Dividends

Dividends are payable at the discretion of the directors of the Bank and are non-cumulative. The Bank must not resolve to pay any dividend or make any other distribution on its ordinary shares until the next preference dividend payment date if the Directors elect to not pay a dividend on the preference shares.

Should the Bank elect to pay a dividend, the dividend is payable at 72% of BKBM + 3.25% p.a., with dividend payments due on 1 March and 1 September each year, beginning on 1 March 2014.

Redemption features

The preference shares are redeemable, subject to prior written approval of the RBNZ, by the Bank providing notice in writing to holders of the preference shares:

- on any date on or after a change to laws or regulations that adversely affects the regulatory capital or tax treatment of the preference shares; or
- on any dividend payment date on or after 1 March 2019; or
- on any date after 1 March 2019 if the Bank has ceased to be a wholly owned subsidiary of the Ultimate Parent Bank.

The preference shares may be redeemed for nil consideration should a non-viability trigger event occur.

Rights of holders in event of liquidation

In the event of liquidation, holders of preference shares are entitled to available subscribed capital per share, pari passu with all holders of existing preference shares but in priority to all holders of ordinary shares. They have no entitlement to participate in further distribution of profits or assets.

The preference shares qualify as "additional tier one capital" for capital adequacy purposes.

Notes to the Financial Statements

28. Capital Adequacy

Capital management policies

The Banking Group's core capital objectives are to:

- Protect the interests of depositors, creditors and shareholders;
- Ensure the safety and soundness of the Banking Group's capital position; and
- Ensure that the capital base supports the Banking Group's risk appetite, and strategic business objectives, in an efficient and effective manner.

The Board holds ultimate responsibility for ensuring that capital adequacy is maintained. This includes: setting, monitoring and obtaining assurance for the Banking Group's Internal Capital Adequacy Assessment Process ("ICAAP") policy and framework; standardised risk definitions for all material risks; materiality thresholds; capital adequacy targets; internal economic risk capital principles; and risk appetite.

The Banking Group has minimum and trigger levels for common equity tier one, tier one and total capital that ensure sufficient capital is maintained to:

- Meet minimum prudential requirements imposed by regulators;
- Ensure consistency with the Banking Group's overall risk profile and financial positions, taking into account its strategic focus and business plan; and
- Support the economic risk capital requirements of the business.

The Banking Group's Asset & Liability Committee and its related Capital Management Forum are responsible for developing, implementing and maintaining the Banking Group's ICAAP framework, including ongoing monitoring, reporting and compliance. The Banking Group's ICAAP is subject to independent and periodic review conducted by Internal Audit.

The Banking Group has complied with all externally imposed capital requirements to which it is subject during the current and comparative periods.

Adoption of Basel III capital framework

Effective 1 January 2013, RBNZ and APRA have adopted the majority of Basel III capital reforms in New Zealand and Australia respectively. The Basel III reforms include: increased capital deductions from common equity tier one capital, an increase in capitalisation rates (including prescribed minimum capital buffers, fully effective 1 January 2014 in New Zealand and 1 January 2016 in Australia), tighter requirements around new tier one and tier two securities and transitional arrangements for existing tier one and tier two securities that do not conform to the new regulations. Other changes include capital requirements for counterparty credit risk and an increase in the asset value correlation with respect to exposures to large and unregulated financial institutions.

Notes to the Financial Statements

Implementation of the advanced internal ratings based approach to credit risk measurement

The Banking Group adheres to the standards of risk grading and risk quantification as set out for Internal Ratings Based ("IRB") banks in the RBNZ document BS2B.

Under this IRB Framework banks use their own measures for calculating the level of credit risk associated with customers and exposures, by way of the primary components of:

Probability of Default ("PD"): An estimate of the level of risk of borrower default graded by way of rating models used both at loan origination and for ongoing monitoring;

Exposure at Default ("EAD"): The expected facility exposure at default. Total credit risk-weighted exposures include a scalar of 1.06 in accordance with the Bank's Conditions of Registration; and

Loss Given Default ("LGD"): An estimate of the potential economic loss on a credit exposure, incurred as a consequence of obligor default and expressed as a percentage of the facility's EAD. For Retail Mortgage exposures the Bank is required to apply the downturn LGDs according to loan to value ("LVR") bands as set out in BS2B. For farm lending exposures the Banking Group is required to adopt RBNZ prescribed downturn LVR based LGDs, along with a minimum maturity of 2.5 years and the removal of the firm-size adjustment.

For exposures classified under Specialised Lending, the Banking Group uses slotting tables supplied by the RBNZ rather than internal estimates.

The exceptions to IRB treatment are three minor portfolios where determining these IRB risk estimates is not currently feasible or appropriate. Risk weights for these exposures are calculated under a separate treatment as set out in the RBNZ document entitled 'Capital Adequacy Framework (Standardised Approach)' ("BS2A"), dated September 2013.

Classification of Banking Group exposures according to rating approach

Internal ratings based approach

IRB Asset Class	Borrower Type	Rating Approach
Sovereign	Crown	IRB - Advanced
	RBNZ	IRB - Advanced
	Any other sovereign and its central bank	IRB - Advanced
Bank	Registered banks	IRB - Advanced
Corporate	Corporation, partnerships or proprietorships that do not fit any other asset classification	IRB - Advanced
	Corporate Small to Medium Enterprises ("SME") with turnover of less than \$50 million	IRB - Advanced
Retail Mortgages	Individuals' borrowings against residential property	IRB - Advanced
Other Retail	Other lending to individuals (including credit cards)	IRB - Advanced
	SME business borrowers	IRB - Advanced
Corporate sub-class - Specialised lending	Project finance	IRB - Slotting
	Income producing real estate	IRB - Slotting
Equity		IRB
Other assets	All other assets not falling within any of the above classes	IRB

Standardised approach

Exposure class	Exposure Type	Reason for Standardised Approach	Future Treatment
Corporate	Merchant card prepayment exposures	System constraints	Move to IRB
	Corporate credit cards	System constraints	Move to IRB
	Qualifying Central Counterparty (QCCP)	Required by Basel III	Standardised

Notes to the Financial Statements

Controls surrounding credit risk rating systems

The term "Rating Systems" covers all of the methods, processes, controls, data collection and technology that support the assessment of credit risk, the assignment of internal credit risk ratings and the quantification of associated default and loss estimates.

All material aspects of the Rating Systems and risk estimate processes are governed by the Banking Group's Risk Committee. Risk grades are an integral part of reporting to senior management and executives. Management and staff of credit risk functions, in conjunction with the relevant Retail and Wholesale Risk Committees, regularly assess the performance of the rating systems, identify any areas for improvement and monitor progress on previously identified development work needed.

The Banking Group's Rating Systems are governed by a comprehensive framework of controls that operate at the business unit and support centres, and through central audit and validation processes. All policies, model designs, model reviews, methodologies, validations, responsibilities, systems and processes supporting the ratings systems are fully documented.

The Banking Group's Retail and Wholesale ratings functions work closely with the Ultimate Parent Bank's risk ratings functions, are independent of operational lending activities and are responsible for the ratings strategies and ongoing management of credit risk models within New Zealand. The annual review of models used across the Banking Group is a function undertaken by the ANZ Decision Model Validation Unit, which is also independent of credit risk operational functions and is responsible for overseeing the design, implementation and performance of all rating models in the Banking Group.

The target approach to modelling for the Banking Group is to deploy the model most suitable for the environment. At present this involves an approach to modelling that combines models developed in New Zealand and models developed by the Ultimate Parent Bank, tested and validated for use in New Zealand, as appropriate.

Capital requirements by asset class under the IRB approach

Cash	198	-	-	-
New Zealand dollar denominated claims on the Crown and the RBNZ	1,709	-	-	-
Other assets	1,149	100	1,218	97
Total other IRB credit risk exposures	3,056	38	1,218	97

Other exposures have been calculated in accordance with BS2B.

Credit risk mitigation

The Banking Group assesses the integrity and ability of counterparties to meet their contractual financial obligations for repayment. The Banking Group generally takes collateral security in the form of real property or a security interest in personal property, except for major government, bank and corporate counterparties of strong financial standing. Longer term consumer finance, in the form of housing loans, is generally secured against real estate while short term revolving consumer credit is generally unsecured.

As at 30 September 2013, under the IRB approach, the Banking Group had \$1,917 million of Corporate exposures covered by guarantees where the presence of the guarantees was judged to reduce the underlying credit risk of the exposures. Information on the total value of exposures covered by financial guarantees and eligible financial collateral is not disclosed, as the effect of these guarantees and collateral on the underlying credit risk exposures is not considered to be material.

Operational risk

The Banking Group uses the Advanced Measurement Approach for determining its regulatory capital requirement for operational risk calculated in accordance with BS2B. As at 30 September 2013 the Banking Group had an implied risk weighted exposure of \$5,526 million for operational risk and an operational risk capital requirement of \$442 million.

Operational risk capital is modelled at a New Zealand geographic level and then distributed and adjusted for the business environment and internal controls down to the business units using the Risk Scenario Methodology. This methodology ensures that there is sufficient operational risk capital held as a buffer for rare and severe unexpected operational loss events that may impact the New Zealand business. The Methodology applies a combination of expert judgement, business unit risk profiles, audit findings, and internal and external loss events to derive a series of business specific Risk Scenarios that are applied to the capital model. The Risk Scenario approach:

- Assesses the level of the Bank's exposure to specified risk scenarios;
- Assesses the scope and quality of the Bank's internal control environment, key operational processes and risk mitigants; and
- Directly links the risk scenarios to operational risk capital.

The Banking Group's operating risk capital is calculated using the Ultimate Parent Bank's methodology, but with standalone New Zealand inputs to ensure there are no diversification benefits.

The Banking Group does not incorporate any insurance mitigation impact into its capital number. Accordingly, there are no insurance related questions contained within the Risk Scenario Methodology.

Market risk

The aggregate market risk exposures below have been calculated in accordance with BS2B. The peak end-of-day market risk exposures are for the half-year ended 30 September 2013.

Banking Group 30/09/2013 (Unaudited)	Implied risk weighted exposure		Aggregate capital charge		Peak occurred on
	Period end \$m	Peak \$m	Period end \$m	Peak \$m	
Interest rate risk	4,241	5,346	339	428	1/07/2013
Foreign currency risk	37	98	3	8	16/08/2013
Equity risk	2	2	-	-	1/04/2013
	4,280		342		

Notes to the Financial Statements

Pillar II capital for other material risks

The Banking Group's ICAAP complies with the requirements of the Bank's Conditions of Registration. It identifies and measures all "other material risks", which are those material risks that are not explicitly captured in the calculation of the Banking Group's tier one and total capital ratios. The other material risks identified by the Banking Group include business risk, pension risk, insurance risk, funds management risk, lapse risk, premises and equipment risk and capitalised origination fees risk.

The Banking Group's internal capital allocation for these other material risks is \$365 million (30/09/2012: \$338 million).

The Banking Group regularly reviews the methodologies used to calculate the economic capital allocated to other material risks. Updated capital methodologies (particularly relating to fixed asset risk and business risk) were applied in November 2012 and the prior period restated accordingly.

Capital adequacy of the Ultimate Parent Bank

	Overseas Banking Group		Ultimate Parent Bank (Extended Licensed Entity)	
	30/09/2013	30/09/2012	30/09/2013	30/09/2012
	Basel III	Basel III	Basel III	Basel II
Common equity tier one capital	8.5%	8.0%	8.5%	n/a
Tier one capital	10.4%	9.7%	10.6%	11.4%
Total capital	12.2%	11.7%	12.5%	12.7%

For calculation of minimum capital requirements under Pillar 1 (Capital Requirements) of the Basel Accord, APRA has accredited the Overseas Banking Group to use the Advanced Internal Ratings Based methodology for calculation of credit risk weighted assets and the Advanced Measurement Approach for the operational risk weighted asset equivalent.

Under prudential regulations, the Overseas Banking Group is required to maintain Prudential Capital Requirements ("PCRs"), which are at least equal to that specified under Basel III (previously Basel II), as determined by APRA. The Overseas Banking Group exceeded the PCRs set by APRA as at 30 September 2013 and for the comparative prior periods.

The Overseas Banking Group is required to publicly disclose Pillar 3 financial information as at 30 September 2013. The Overseas Banking Group's Pillar 3 disclosure document for the year ended 30 September 2013, in accordance with APS 330: *Public Disclosure of Prudential Information*, discloses capital adequacy ratios and other prudential information. This document can be accessed at the website anz.com.

Retail mortgages by loan-to-valuation ratio ("LVR")

As required by the RBNZ, LVRs are calculated as the current exposure secured by a residential mortgage divided by the Banking Group's valuation of the security property at origination of the exposure. Off-balance sheet exposures include undrawn and partially undrawn residential mortgage loans as well as commitments to lend. Commitments to lend are formal offers for housing lending which have been accepted by the customer.

Unaudited 30/09/2013 \$ millions	On-balance sheet	Off-balance sheet	Total
LVR range			
0% - 59%	16,745	3,059	19,804

Notes to the Financial Statements

29. Financial Risk Management

Strategy in using financial instruments

Financial instruments are fundamental to the Banking Group's business, constituting the core element of its operations. Accordingly, the risks associated with financial instruments are a significant component of the risks faced by the Banking Group. Financial instruments create, modify or reduce the credit, market and liquidity risks of the Banking Group's balance sheet. The Banking Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Banking Group.

The risk management and policy control framework applicable to the entities comprising the Banking Group has been set by the Board and Risk Committee of the Bank or the Ultimate Parent Bank, as appropriate. Likewise oversight and monitoring of material risk exposures of the Banking Group is undertaken by the Risk Management functions of the Bank and also the Ultimate Parent Bank. Throughout this document, references to the Risk Management of the operations within the entities comprising the Banking Group, implicitly involves oversight by both related entities.

Credit risk

Credit risk is the risk of financial loss from counterparties being unable to fulfil their contractual obligations. The Banking Group assumes credit risk in a wide range of lending and other activities in diverse markets and many jurisdictions. Credit risks arise not only from traditional lending to customers, but also from inter-bank, treasury, international trade and capital market activities around the world.

The Banking Group has an overall lending objective of sound growth for appropriate returns. The credit risk objectives of the Banking Group are set by the Board and are implemented and monitored within a tiered structure of delegated authority, designed to oversee multiple facets of credit risk, including business writing strategies, credit policies/controls, single exposures, portfolio monitoring and risk concentrations.

Credit risk management

A credit risk management framework is in place across the Banking Group with the aim of ensuring a structured and disciplined approach is maintained in achieving the objectives set by the Board. The framework focuses on policies, people, skills, controls, risk concentrations and portfolio balance. It is supported by portfolio analysis and business-writing strategies, which guide lending decisions and identify segments of the portfolio requiring attention. The effectiveness of the framework is monitored through a series of compliance and reporting processes.

An independent Risk Management function is staffed by risk specialists. In regard to credit risk management, the objective is for Risk Management to provide robust credit policies, to make independent credit decisions, and to provide strong support to front line staff in the application of sound credit practices. In addition to providing independent credit assessment on lending decisions, Risk Management also performs key roles in portfolio management by development and validation of credit risk measurement systems, loan asset quality reporting, and development of credit standards and policies.

The credit risk management framework is top down. The framework is defined by the Banking Group's credit

principles and policies. The effectiveness of the credit risk management framework is validated through the compliance and monitoring processes.

Risk Management's responsibilities for credit risk policy and management are executed through dedicated departments, which support the business units. All major business unit credit decisions require approval from both business writers and independent risk personnel.

Credit risk is controlled through a combination of approvals, limits, reviews and monitoring procedures that are carried out on a regular basis, the frequency of which is dependent upon the level of risk. Credit risk policy and management is executed through the Chief Risk Officer, who is responsible for various dedicated areas within the Risk Management division. Wholesale Risk services the Banking Group's commercial, investment banking and rural lending activities through dedicated teams. Retail Risk services the Banking Group's small business and consumer customers. The Credit Reporting team within Risk Management provides an independent overview of credit risk across the Bank at a portfolio level. The Banking Group allows sole discretion for transaction approvals at the business unit level in both the retail and wholesale lending sectors, with larger transactions approved by Retail Risk and Wholesale Risk.

The credit risk review function within Global Internal Audit also provides a further independent check mechanism to ensure the quality of credit decisions. This includes providing independent periodic checks on asset quality and compliance with the agreed standards and policies across the Banking Group.

Country risk management

Some customer credit risks involve country risk, whereby actions or events at a national or international level could disrupt servicing of commitments. Country risk arises when payment or discharge of an obligation will, or could, involve the flow of funds from one country to another or involve transactions in a currency other than the domestic currency of the relevant country.

Country ratings are assigned to each country where the Banking Group incurs country risk and have a direct bearing on the Banking Group's risk appetite for each country. The country rating is determined through a defined methodology based around external ratings agencies' ratings and internal specialist opinion. It is also a key risk consideration in the Banking Group's capital pricing model for cross border flows.

The recording of country limits provides the Banking Group with a means to identify and control country risk. Country limits ensure that there is a country-by-country ceiling on exposures that involve country risk. They are recorded by time to maturity and purpose of exposure, e.g., trade, markets and project finance. Country limits are managed centrally by the Ultimate Parent Bank, through a global country risk exposure management system managed by a specialist unit within Institutional Risk.

Portfolio stress testing

Stress testing is integral to strengthening the predictive approach to Risk Management and is a key component to managing risk appetite and business writing strategies. It creates greater understanding of impacts on financial performance through modelling relationships and sensitivities between geographic, industry and business unit exposures under a range of macro economic scenarios.

Notes to the Financial Statements

The Ultimate Parent Bank has a dedicated stress testing team that assists business and risk executives in the Banking Group to model and report periodically to management and the Board Risk Committee on a range of scenarios and stress tests.

Portfolio analysis and reporting

Credit portfolios are actively monitored at each layer of the risk structure to ensure credit deterioration is quickly detected and mitigated through the implementation of remediation strategies.

Businesses incurring credit risk undertake regular and comprehensive analysis of their credit portfolios. Issue identification and adherence to performance benchmarks are reported to Risk Management and business executives through a series of reports including monthly 'asset quality' reporting. This process is undertaken by or overseen by Risk Management ensuring an efficient and independent conduit exists to identify and communicate emerging credit issues to Banking Group executives and the Board.

Collateral management

Banking Group credit principles specify lending only what the counterparty has the capacity and ability to repay and the Banking Group sets limits on the acceptable level of credit risk. Acceptance of credit risk is firstly based on the counterparty's assessed capacity to meet contractual obligations (i.e., interest and capital repayments). Obtaining collateral is only used to mitigate credit risk. Procedures are designed to ensure collateral is managed, legally enforceable, conservatively valued and adequately insured where appropriate. Banking Group policy sets out the types of acceptable collateral, including:

- Cash;
- Mortgages over property;
- Charges over business assets, e.g., premises, stock and debtors;
- Charges over financial instruments, e.g., debt securities and equities in support of trading facilities; and
- Financial guarantees.

In the event of customer default, any loan security is usually held as mortgagee in possession while action is taken to realise it. Therefore the Banking Group does not usually hold any real estate or other assets acquired through the enforcement of security.

The Banking Group uses ISDA Master Agreements to document derivatives' activities to limit exposure to credit losses. The credit risk is reduced by a master agreement to the extent that, if an event of default occurs, all contracts with the counterparty are terminated and settled on a net basis. Further, it is the Banking Group's preferred practice to include all products covered by the ISDA in the Credit Support Annex ("CSA") in order to achieve further credit exposure reduction. Under a CSA, collateral is passed between the parties, depending on the aggregate mark-to-market (positive or negative) of derivative trades between the two entities, to mitigate the market contingent counterparty risk inherent in the outstanding positions.

Concentrations of credit risk

Concentrations of credit risk arise when a number of customers are engaged in similar business activities or activities within the same geographic region, or when they have similar risk characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions.

The Banking Group monitors its portfolios to identify and assess risk concentrations. Concentration limits are used to guard against large single customer or correlated credit risks. Risk Management, Business Unit executives and senior management monitor large exposure concentrations through a monthly list of the Banking Group's top corporate exposures. The ANZ Credit and Market Risk Committee and Board Risk Committee regularly review a comprehensive list of single customer concentration limits and customers' adherence to these limits.

Analyses of financial assets by industry sector are based on Australian and New Zealand Standard Industrial Classification ("ANZSIC") codes.

Notes to the Financial Statements

Concentrations of credit risk analysis

² Other includes exposures to electricity, gas and water, communications and personal services.

³ Credit related commitments comprise undrawn facilities, customer contingent liabilities and letters of offer.

Notes to the Financial Statements

Maximum exposure to credit risk

The following table presents the maximum exposure to credit risk for on and off balance sheet financial instruments before taking account of the financial effect of any collateral held or other credit enhancements, unless such collateral meets the offsetting criteria in NZ IAS 32 *Financial Instruments: Presentation*.

The table also provides a quantification of the value of the financial charges the Banking Group holds over a borrower's specific asset (or assets) where the Banking Group is able to enforce the collateral in satisfying a debt in the event of the borrower failing to meet its contractual obligations. For the purposes of this disclosure, where the collateral held is valued at more than the corresponding credit exposure, the financial effect is capped at the value of the credit exposure. In respect of derivative financial instruments, the assessed collateral is the amount of cash collateral received and does not include the effect of any netting arrangements under ISDAs.

The most common types of collateral include:

- Security over real estate including residential, commercial, industrial and rural property;
- Cash deposits; and
- Other security over business assets including specific plant and equipment, inventory and accounts receivables.

The Banking Group also manages its credit risk by accepting other types of collateral such as guarantees and security interests over the assets of a customer's business. The assignable value of such credit mitigants is less certain and their financial effect has not been quantified for disclosure purposes. Credit exposures shown as not fully secured may benefit from such credit mitigants.

Credit quality

A core component of the Banking Group's credit risk management capability is the risk grading framework used across all major business units. A set of risk grading principles and policies is supported by a complementary risk grading methodology. Pronouncements by the International Basel Committee on Banking Supervision have been encapsulated in these principles and policies including governance, validation and modelling requirements.

The Banking Group's risk grade profile changes dynamically through new counterparty lending and existing counterparty movements in either risk or volume. All counterparty risk grades are subject to frequent review, including statistical and behavioural

reviews in consumer and small business segments, and individual counterparty reviews in segments with larger single name borrowers.

Impairment and provisioning of financial assets

The Banking Group's policy relating to the recognition and measurement of impaired assets conforms to the RBNZ's guidelines.

Loans are classified as either performing or impaired. Impaired assets are credit exposures where: there is doubt as to whether the full contractual amount (including interest) will be received; a material credit obligation is 90 days past due but not well secured; they are portfolio managed and can be held for up to 180 days past due; or concessional terms have been provided due to the financial difficulties of the customer.

Notes to the Financial Statements

An exposure is classified as past due but not impaired (less than 90 days) where the value of collateral is sufficient to repay both the principal debt and all other potential interest and there is no concern as to the creditworthiness of the counterparty in question.

The past due but not impaired (over 90 days) classification applies where contractual payments are past due by 90 days or more, or where the facility remains outside of contractual arrangements for 90 or more consecutive days, but the Banking Group believes that impairment is not appropriate on the basis of the level of security/collateral available, or the facility is portfolio managed.

The provision for credit impairment represents management's best estimate of the losses incurred in the loan portfolio at balance date based on its experienced judgement.

Distribution of gross loans and advances assets by credit quality

The credit quality of the portfolio of loans and advances is assessed by reference to the Banking Group's risk grading principles and policies supported by a complementary risk grading methodology.

Distribution by asset class of gross loans and advances by credit quality

Notes to the Financial Statements

Credit quality of gross loans and advances neither past due nor impaired

The credit quality of financial assets is assessed by the Banking Group using internal ratings which aim to reflect the relative ability of counterparties to fulfil, on time, their credit-related obligations, and is based on their current probability of default.

Internal ratings

Strong risk rating - Corporate customers demonstrating superior stability in their operating and financial performance over the long-term, and whose debt servicing capacity is not significantly vulnerable to foreseeable events. Retail customers with low expected loss. This rating band broadly corresponds to ratings "Aaa" to "Ba1" and "AAA" to "BB+" of Moody's Investors Service and Standard & Poor's respectively.

Satisfactory risk rating - Corporate customers consistently demonstrating sound operational and financial stability over the medium to long term, even though some may be susceptible to cyclical trends or variability in earnings. Retail customers with moderate expected loss. This rating band broadly corresponds to ratings "Ba2" to "B1" and "BB" to "B+" of Moody's Investors Service and Standard & Poor's respectively.

Substandard but not past due or impaired - Corporate customers demonstrating some operational and financial instability, with variability and uncertainty in profitability and liquidity projected to continue over the short and possibly medium term. Retail customers with higher expected loss. This rating band broadly corresponds to ratings "B2" to "Caa" and "B" to "CCC" of Moody's Investors Service and Standard & Poor's respectively.

Movements in the rating categories between balance dates are due to both changes in the underlying internal ratings applied to customers and to new loans written or loans rolling off.

Credit quality of financial assets that are past due but not impaired

Ageing analysis of past due loans is used by the Banking Group to measure and manage credit quality. Financial assets that are past due but not impaired include those:

- Assessed, approved and managed on a portfolio basis within a centralised environment (for example, credit cards and personal loans);
- Held on a productive basis until they are 180 days past due; and
- Managed on an individual basis.

A large portion of retail credit exposures, such as residential mortgages, are generally well secured. That is, the fair value of associated security is sufficient to ensure that the Banking Group will recover the entire amount owing over the life of the facility and there is reasonable assurance that collection efforts will result in payment of the amounts due in a timely manner.

Market risk

Market risk is the risk to the Banking Group's earnings arising from changes in interest rates, currency exchange rates, credit spreads, or from fluctuations in bond, commodity or equity prices. Market risk is generated through both trading activities and the interest rate risk inherent in the banking book.

The Banking Group conducts trading operations in interest rates, foreign exchange, commodities and debt securities. Trading operations largely focus on

supporting customer hedging and investing activities, rather than outright proprietary trading. A medium market risk appetite has been set for the Banking Group, which is reflected in its low/moderate market risk limit framework.

The Banking Group has a detailed risk management and control framework to support its trading and balance sheet management activities. The framework incorporates a risk measurement approach to quantify the magnitude of market risk within trading and balance sheet portfolios. This approach, and related analysis, identifies the range of possible outcomes that can be expected over a given period of time, establishes the relative likelihood of those outcomes and allocates an appropriate amount of capital to support these activities.

Market risk management and control responsibilities

The Board Risk Committee has delegated responsibility for the oversight of market risk to the Asset & Liability Committee ("ALCO"), chaired by the Chief Financial Officer of the Bank. ALCO are required to ensure that market risk exposure across Traded and Non-Traded portfolios remains within the risk appetite specified by the Board Risk Committee. ALCO receive regular reporting on a range of trading and balance sheet market risk exposures.

The Risk Management division of the Banking Group, through the Chief Risk Officer, is responsible for the day-to-day oversight of market risk. This includes the implementation of a comprehensive limit and policy framework to control the amount of risk that the Banking Group will accept. Market risk limits are allocated at various levels and are reported and monitored on a daily basis. The detailed limit framework allocates individual limits to manage and control asset classes (e.g., interest rates, foreign exchange), risk factors (e.g., interest rates, volatilities) and profit and loss limits (to monitor and manage the performance of the trading portfolios).

Additional oversight and monitoring of material risk exposures of the Banking Group is undertaken by the Risk Management functions of the Ultimate Parent Bank.

Within overall strategies and policies, the control of market risk is the joint responsibility of business units and Risk Management, with the delegation of market risk limits from the Board Risk Committee to both Risk Management and the business units.

These risks are monitored daily against a comprehensive limit framework that includes Value at Risk, aggregate market position and sensitivity, product and geographic thresholds. To facilitate the management, control, measurements and reporting of market risk, the Banking Group has grouped market risk into two broad categories:

a. Traded market risk

This is the risk of loss from changes in the value of financial instruments due to movements in price factors for both physical and derivative trading positions. They arise in trading transactions where the Banking Group acts as principal with clients or with the market. The principal risk categories monitored are:

- Currency risk is the potential loss arising from the decline in the value of a financial instrument due to changes in foreign exchange rates or their implied volatilities.
- Interest rate risk is the potential loss arising from the change in the value of a financial instrument

Notes to the Financial Statements

due to changes in market interest rates or their implied volatilities.

- Credit spread risk is the potential loss arising from a change in value of an instrument due to a movement of its margin or spread relative to a bench mark.

b. Non-traded market risk (or balance sheet risk)

This comprises the management of non-traded interest rate risk, liquidity, and the risk to capital and earnings as a result of movements in market rates.

Some instruments do not fall into either category but also expose the Banking Group to market risk. These include equity securities classified as available-for-sale. Regular reviews are performed to substantiate the valuation of these types of instruments.

In all trading areas the Banking Group has implemented models that calculate Value at Risk ("VaR") exposures, monitor risk exposures against defined limits on a daily basis, and "stress test" trading portfolios.

VaR measure

A key measure of market risk is VaR. VaR is a statistical estimate of the likely daily loss and is based on historical market movements.

The confidence level is such that there is a 99% probability that the loss will not exceed the VaR

Traded market risks

	Banking Group			
	Value at risk at 99% confidence			
\$ millions	Period end	High for year	Low for year	Average for year
30/09/2013				
Foreign exchange risk	0.3	1.4	-	0.3
Interest rate risk	2.1	3.7	1.1	2.3
Credit spread risk	0.4	1.0	0.2	0.4
Diversification benefit	(0.8)	n/a	n/a	(0.7)
Total VaR	2.0	4.1	1.2	2.3
30/09/2012				
Foreign exchange risk	0.2	1.4	0.2	0.4
Interest rate risk	2.7	6.4	1.6	3.6
Credit spread risk	0.4	1.2	0.2	0.7
Diversification benefit	(0.7)	n/a	n/a	(1.2)
Total VaR	2.6	6.3	1.5	3.5

Traded market risk VaR is calculated separately for foreign exchange and for interest rate/debt markets businesses as well as for the Banking Group. The diversification benefit reflects the historical correlation between foreign exchange, interest rate and debt markets.

To supplement the VaR methodology, the Banking Group applies a wide range of stress tests, both on individual portfolios and at the Banking Group level. The Banking Group's stress-testing regime provides senior management with an assessment of the financial impact of identified extreme events on market risk exposures of the Banking Group.

Non-traded market risk (or balance sheet risk)

The principal objectives of balance sheet management are to manage net interest income sensitivity while maintaining acceptable levels of interest rate and liquidity risk and to manage the market value of the Banking Group's capital. Liquidity risk is dealt with in the next section.

estimate on any given day. Conversely there is 1% probability of the decrease in market value exceeding the VaR estimate on any given day.

The Banking Group's standard VaR approach for both traded and non-traded risk is historical simulation. The Banking Group calculates VaR using historical changes in market rates and prices over the previous 500 business days. Traded and Non-Traded VaR is calculated using a one-day holding period.

It should be noted that because VaR is driven by actual historical observations, it is not an estimate of the maximum loss that the Banking Group could experience from an extreme market event. As a result of this limitation, the Banking Group utilises a number of other risk measures (e.g. stress testing) and associated detailed control limits to measure and manage market risk.

During the 2012 financial year, the Banking Group moved to monitoring Traded and Non-Traded VaR at the 99% confidence level only, having previously also used a 97.5% confidence level, as the 99% confidence level encompasses a wider range of potential outcomes. Non-Traded VaR at the 99% confidence level was not disclosed previously, so the comparative figures have been restated accordingly.

Notes to the Financial Statements

Interest rate risk

The objective of balance sheet interest rate risk management is to mitigate the negative impact of movements in wholesale interest rates on the earnings of the Banking Group's banking book. Non-traded interest rate risk relates to the potential adverse impact to earnings from changes in market interest rates. This risk arises from two principal sources: mismatches between the repricing dates of interest bearing assets and liabilities; and the investment of capital and other non-interest bearing liabilities in interest bearing assets.

As part of normal business activity the Banking Group has additional risks from fixed rate mortgage prepayments and basis risk:

- Prepayment risk is the potential risk to earnings or market value from when a customer prepays all or part of a fixed rate mortgage and where any customer fee charged is not sufficient to offset the loss in value to the Banking Group of this financial asset due to movements in interest rates and other pricing factors. As far as possible the true economic cost is passed through to customers in line with their terms and conditions and relevant legislation.
- Basis risk is the potential risk to earnings or market value from differences between customer pricing and wholesale market pricing. This is managed through active review of product margins.

Non-traded interest rate risk is managed to both value and earnings at risk limits. Interest rate risk is reported using three measures: VaR; scenario analysis (to a 1% shock); and interest rate sensitivity gap. This treatment excludes the effect of prepayment and basis risk.

a. Non-traded interest rate risk VaR

\$ millions	Period end	Banking Group		
		High for year	Low for year	Average for year
30/09/2013				
Value at risk at 99% confidence	9.2	14.3	7.7	11.1
30/09/2012				
Value at risk at 99% confidence	10.7	15.5	8.8	11.2

b. Scenario analysis – A 1% shock on the next 12 months' net interest income

A 1% overnight parallel positive shift in the yield curve is modelled to determine the potential impact on net interest income over the succeeding 12 months. This is a standard risk quantification tool.

The figures in the table below indicate the outcome of this risk measure for the current and comparative periods – expressed as a percentage of reported net interest income. The sign indicates the nature of the rate sensitivity with a positive number signifying that a rate increase is positive for net interest income over the next 12 months. Conversely, a negative number signifies that a rate increase is negative for the next 12 months' net interest income.

Impact of 1% rate shock	Banking Group	
	30/09/2013	30/09/2012
Period end	1.1%	1.1%
Maximum exposure	2.0%	2.3%
Minimum exposure	0.6%	0.9%
Average exposure (in absolute terms)	1.3%	1.7%

The extent of mismatching between the repricing characteristics and timing of interest bearing assets and liabilities at any point has implications for future net interest income.

Interest rate sensitivity gap

The interest rate sensitivity gap analysis provides information about the Banking Group's exposure to interest rate risk.

Sensitivity to interest rates arises from mismatches in the period to repricing of assets and that of the corresponding liability funding. These mismatches are managed within policy guidelines for mismatch positions.

The following tables represent the interest rate sensitivity of the Banking Group's assets, liabilities and off balance sheet instruments by showing the periods in which these instruments may reprice (that is, when interest rates applicable to each asset or liability can be changed).

The repricing gaps are based upon contractual repricing.

Equity price risk

The portfolio of financial assets classified as available-for-sale contains equity investment holdings held for longer term strategic intentions. These equity investments are also subject to market risk which is not captured by the VaR measures for traded and non-traded market risks. The fair value of these securities as at 30 September 2013 was \$2 million (30/09/2012 \$3 million). A 10 per cent reduction in the value of the available-for-sale equity securities would not be material.

Notes to the Financial Statements

Foreign currency related risks

This risk relates to the potential loss arising from the decline in the value of foreign currency positions due to changes in foreign exchange rates.

For non-traded instruments in foreign currencies, the risk is monitored and is hedged in accordance with policy. Risk arising from individual funding and other transactions is actively managed. The total amounts of unmatched foreign currency assets and liabilities, and consequent foreign currency exposures arising from each class of financial asset and liability, whether recognised or unrecognised, within each currency are not material.

The net open position in each foreign currency represents the net on-balance sheet assets and liabilities in that foreign currency aggregated with the net expected future cash flows from off-balance sheet purchases and sales from foreign exchange transactions in that foreign currency. The amounts are stated in New Zealand dollar equivalents translated using the spot exchange rates as at balance sheet date.

Notes to the Financial Statements

Liquidity risk

Liquidity risk is the risk that the Banking Group is unable to meet its payment obligations as they fall due. The timing mismatch of cash flows and the related liquidity risk is inherent in all banking operations and is closely monitored by the Banking Group.

The Banking Group's liquidity and funding risks are governed by a detailed policy framework which is approved by the Risk Committees of the Bank's and Ultimate Parent Bank's Boards. The core objective of the Banking Group's framework is to manage liquidity to meet obligations as they fall due, without incurring unacceptable losses.

Central to the Banking Group's liquidity risk management approach is the establishment of a liquidity risk appetite framework to which the Banking Group must conform at all times. The risk appetite for liquidity has been set as low, and this objective is achieved by the Banking Group managing liquidity risks within the boundaries of the following requirements and principles:

- Maintaining the ability to meet all payment obligations in the immediate term.
- Ensuring the ability to meet "survival horizons" under a range of the Banking Group specific and general market liquidity stress scenarios.
- Maintaining strength in the Banking Group's balance sheet structure to ensure long term resilience in the Banking Group's liquidity and funding risk profile.
- Limiting the potential earnings at risk associated with unexpected increases in funding costs or the liquidation of assets under stress.
- Ensuring the liquidity management framework is compatible with regulatory requirements.
- Daily liquidity reporting and scenario analysis, quantifying the Banking Group's positions.
- Targeting a diversified funding base, avoiding undue concentrations by investor type, maturity, market source and currency.
- Holding a portfolio of high quality liquid assets to protect against adverse funding conditions and to support day-to-day operations.
- Establishing detailed contingency plans to cover different liquidity crisis events.

Management of liquidity and funding risks are overseen by ALCO.

Supervision and Regulation

The RBNZ requires the Bank to have a comprehensive Board approved liquidity strategy defining: policy, systems and procedures for measuring, assessing, reporting and managing domestic and foreign currency liquidity. This also includes a formal contingency plan for dealing with a liquidity crisis. The Banking Group is required to meet one week and one month liquidity mismatch ratios and a one year core funding ratio each day.

Scenario Modelling

A key component of the Banking Group's liquidity management framework is scenario modelling. Liquidity is assessed under different scenarios, including "going-concern", "name-crisis" and various "survival horizons".

"Going-concern": reflects the normal behaviour of cash flows in the ordinary course of business. The Banking Group must be able to meet all commitments and obligations under a going concern scenario, within the Banking Group's normal funding capacity ('available to fund' limit), over at least the following 30 calendar days. In estimating the funding requirement, the Banking Group models expected cash flows by reference to historical behaviour and contractual maturity data.

"Name-crisis": refers to a potential name-specific liquidity crisis scenario which models the behaviour of cash flows where there is a problem (real or perceived) which may include, but is not limited to, operational issues, doubts about the solvency of the Banking Group, or adverse rating changes. Under this scenario the Banking Group may have significant difficulty rolling over or replacing funding. Under the liquidity policy the Banking Group must be cash flow positive over an eight calendar day period.

"Survival horizons": The global financial crisis has highlighted the importance of differentiating between stressed and normal market conditions in a name-specific crisis and the different behaviour that offshore and domestic wholesale funding markets can exhibit during market stress events. The Banking Group has linked its liquidity risk appetite to defined liquidity "survival horizons" (i.e. the time period under which the Banking Group must maintain a positive cash flow position). The following stressed scenarios are modelled:

- Extreme Short Term Crisis Scenario: A name-specific stress during a period of market stress.
- Short Term Crisis Scenario: A name-specific stress during a period of normal markets conditions.
- Global Funding Market Disruption: Stressed global wholesale funding markets leading to a closure of domestic and offshore markets.
- Offshore Funding Market Disruption: Stressed global wholesale funding markets leading to a closure of offshore markets only.

As of 30 September 2013 the Banking Group was in compliance with all of the above scenarios.

Wholesale funding

The Banking Group's wholesale funding strategy is designed to deliver a sustainable portfolio of wholesale funds that balances cost efficiency while targeting diversification by markets, investors, currencies, maturities and funding structures. Short-term wholesale funding requirements, with a contractual maturity of less than one year, are managed through the Treasury and Markets operations. Long-term wholesale funding is managed and executed through Treasury operations.

The Banking Group also uses maturity concentration limits under the wholesale funding and liquidity management framework. Maturity concentration limits ensure that the Banking Group does not become reliant on issuing large volumes of new wholesale funding within a short time period. Funding instruments used to meet the wholesale borrowing requirement must be on a pre-established list of approved products.

Funding capacity and debt issuance planning

The Banking Group adopts a conservative approach to determine its funding capacity. Funding capacity limits are determined at the Ultimate Parent Bank level and allocated to individual sites based on their requirements. Annually, a funding plan is approved by the Bank's Board. The plan is supplemented by monthly updates and is linked to the Banking Group's three year strategic planning cycle.

Notes to the Financial Statements

Funding Composition

The Banking Group actively uses balance sheet disciplines to prudently manage the funding mix. The Banking Group employs funding metrics to ensure that an appropriate proportion of its assets are funded from stable sources, including customer liabilities, longer-dated wholesale debt (with remaining term exceeding one year) and equity. This approach recognises that long-term wholesale debt and other sticky liabilities have favourable liquidity characteristics.

² Other includes exposures to electricity, gas and water, communications and personal services.

³ The Banking Group classifies funding via ANZ New Zealand (Int'l) as either from the United States or Europe based on the respective programmes.

Analysis of funding liabilities by industry sector is based on Australian and New Zealand Standard Industrial Classification ("ANZSIC") codes.

Notes to the Financial Statements

Liquidity portfolio management

The Banking Group holds a diversified portfolio of cash and high-quality highly-liquid securities to support liquidity risk management. The size of the Banking Group's liquidity portfolio is based on the amount required to meet its internal and regulatory liquidity scenario metrics.

Total liquidity portfolio \$ millions	Banking Group		Bank	
	30/09/2013	30/09/2012	30/09/2013	30/09/2012
Balances with central banks	1,709	1,973	1,709	1,973
Securities purchased under agreement to resell	41	105	41	105
Certificates of deposit	159	100	159	100
Government, local body stock and bonds	5,522	8,220	5,522	8,220
Government treasury bills	387	17	387	17
Other bonds	5,069	3,768	5,069	3,768
Total liquidity portfolio	12,887	14,183	12,887	14,183

Assets held for managing liquidity risk include short term cash held with the RBNZ, New Zealand Government securities, securities issued by supranational agencies, securities issued by highly rated banks and securities issued by State Owned Enterprises, Local Authorities and highly rated NZ domestic corporates. These assets would be accepted as collateral by the RBNZ in repurchase transactions. At 30 September 2013 the Banking Group would be eligible to enter into repurchase transactions with a value of \$10,759 million. The Banking Group also held unencumbered internal residential mortgage backed securities ("RMBS") which would entitle the Banking Group to enter into repurchase transactions with a value of \$4,200 million at 30 September 2013 (the RBNZ has imposed a cap limiting the amount of RMBS deemed as eligible in the liquidity portfolio to 4% of total assets).

Liquidity crisis contingency planning

The Banking Group maintains liquidity crisis contingency plans defining an approach for analysing and responding to a liquidity-threatening event on a group wide basis. The framework includes:

- the establishment of crisis severity/stress levels;
- clearly assigned crisis roles and responsibilities;
- early warning signals indicative of an approaching crisis, and mechanisms to monitor and report these signals;
- outlined action plans, and courses of action for altering asset and liability behaviour;
- procedures for crisis management reporting, and covering cash-flow shortfalls;
- guidelines determining the priority of customer relationships in the event of liquidity problems; and
- assigned responsibilities for internal and external communications.

Notes to the Financial Statements

Contractual maturity analysis of financial assets and liabilities

The following tables present the Banking Group's financial assets and liabilities within relevant contractual maturity groupings, based on the earliest date on which the Bank or the Banking Group may be required to realise an asset or settle a liability. The amounts disclosed in the tables represent undiscounted future principal and interest cash flows, except for derivatives held for trading where the full mart-to-market amount has been included in the less than three months category. As a result, the amounts in the tables below may differ to the amounts reported on the balance sheet.

The contractual maturity analysis for off-balance sheet commitments and contingent liabilities has been prepared using the earliest date at which the Banking Group or the Bank can be called upon to pay. The liquidity risk of credit related commitments and contingent liabilities may be less than the contract amount, and does not necessarily represent future cash requirements as many of these facilities are expected to be only partially used or to expire unused.

The Banking Group does not manage its liquidity risk on this basis.

Total financial assets pledged as collateral		9,129	8,588	6,967	6,485

Registered secured debenture stock is constituted and secured by a trust deed between UDC Finance Limited and its independent trustee, Trustees Executors Limited. The trust deed creates floating charges over all the assets, primarily loans and advances, of UDC Finance Limited.

31. Concentrations of Credit Risk to Individual Counterparties

The Banking Group measures its concentration of credit risk in respect to bank counterparties on the basis of approved exposures and in respect to non bank counterparties on the basis of limits. No account is taken of collateral, security and/or netting agreements which the Banking Group may hold in respect of the various counterparty exposures.

For the three month period ended 30 September 2013 there were no individual counterparties (excluding connected parties, governments and banks with long term credit ratings of A- or above) where the Banking Group's period end or peak end-of-day credit exposure equalled or exceeded 10% of equity (as at the end of the period).

Concentrations of credit risk to connected persons

Credit exposures to connected persons reported in the table below have been calculated partially on a bilateral net basis and partially on a gross basis. Netting has occurred (up to a limit of 125% of the Banking Group's tier one capital) in respect of certain transactions which are the subject of a bilateral netting agreement.

Banking Group	30/09/2013		30/09/2012	
	Amount \$m	% of Tier One Capital	Amount \$m	% of Tier One Capital
Aggregate at end of year¹				
Bank connected persons (on gross basis, before netting)	4,065	52.0%	4,708	65.0%
Less: amount netted off	3,073	39.3%	3,621	50.0%
Bank connected persons (on partial bilateral net basis)	992	12.7%	1,087	15.0%
Peak end-of-day for the year²				
Bank connected persons (on gross basis, before netting)	5,696	72.8%	5,939	82.0%
Less: amount netted off	3,334	42.6%	4,221	58.3%
Bank connected persons (on partial bilateral net basis)	2,362	30.2%	1,718	23.7%
Rating-contingent limit³				
Bank connected persons (on a gross basis, before netting)	n/a	125.0%	n/a	125.0%
Bank connected persons (on partial bilateral net basis)	n/a	70.0%	n/a	70.0%
Non-bank connected persons	n/a	15.0%	n/a	15.0%

¹ The Banking Group has amounts due from the Immediate Parent Company and the Ultimate Parent Bank and other entities within the Overseas Banking Group arising in the ordinary course of business. These balances arise primarily from unrealised gains on trading and hedging derivative financial instruments with the Ultimate Parent Bank. As at 30 September 2013, the gross exposures to the Immediate Parent Company were \$14 million (30/09/2012 \$97 million). As at 30 September 2013, the gross exposures to the Ultimate Parent Bank were \$4,051 million (30/09/2012 \$4,611 million).

² The Banking Group has complied with the limits on aggregate credit exposure (of a non-capital nature and net of individual provisions) to connected persons and non-bank connected persons, as set out in the Conditions of Registration, at all times during the year. The peak end-of-day credit exposures for the year to connected persons are measured over Tier One Capital as at the end of the year.

³ Represents the maximum peak end-of-day aggregate credit exposures limit (of a non-capital nature and net of individual provisions) to all connected persons. This limit is based on the ratings applicable to the Bank's long term senior unsecured obligations payable in New Zealand in New Zealand dollars. Within the overall limit a sub-limit of 15% of Tier One Capital applies to aggregate credit exposures (exclusive of exposures of a capital nature and net of individual provisions) to non-bank connected persons. There have been no changes to these limits for the year ended 30 September 2013.

¹ Derivative financial instruments classified as held for trading include derivatives entered into as economic hedges which are not designated as accounting hedges.

² Fair value hedging is applied to certain financial assets within loans and advances and certain financial liabilities within bonds and notes. The resulting fair value adjustment means that the carrying value differs from the amortised cost.

Notes to the Financial Statements

Estimation of fair value

Liquid assets, due from / to other financial institutions and balances with related parties

Where these financial instruments are short-term in nature, defined as those that reprice or mature in 90 days or less, or are receivable on demand, the carrying values are considered to approximate the fair values. When longer term in nature, fair value is based on quoted market prices, or for those debt issues where quoted market prices are not available, a discounted cash flow model using a yield curve appropriate for the remaining term to maturity of that debt instrument.

Trading securities, derivative financial instruments and available for sale assets

Fair value is based on quoted market prices, or broker or dealer price quotations. If this information is not available, fair value is estimated using quoted market prices for securities with similar credit, maturity and yield characteristics, or market accepted valuation models as appropriate (including discounted cash flow models) based on current market yields for similar types of instruments and the maturity of each instrument.

Net loans and advances

Fair value has been estimated through discounting future cash flows. For fixed rate loans and advances, the discount rate applied incorporates changes in wholesale market rates, the Banking Group's cost of wholesale funding and movements in customer margin. For floating rate loans, only changes in wholesale market rates and the Banking Group's cost of wholesale funding are incorporated in the discount rate. For variable rate loans where the Banking Group sets the applicable rate at its discretion, the carrying value is considered to approximate the fair value.

Other financial assets / liabilities

Included in this category are accrued interest and fees receivable / payable. For these balances the carrying value is considered to approximate the fair values, as they are short term in nature or are receivable / payable on demand.

Deposits and other borrowings

For interest bearing fixed maturity deposits and other borrowings without quoted market prices, market borrowing rates of interest for debt with a similar maturity are used to discount contractual cash flows. The fair value of a deposit liability without a specified maturity or at call is deemed to be the amount payable on demand at the reporting date. The fair value is not adjusted for any value expected to be derived from retaining the deposit for a future period of time.

Certain items included in deposits and other borrowings have been designated as financial liabilities at fair value through profit or loss and are carried at fair value.

Bonds and notes and loan capital

The aggregate fair value of bonds and notes and loan capital is calculated based on quoted market prices. For those debt issues where quoted market prices are not available, a discounted cash flow model using a yield curve appropriate for the remaining term to maturity of the debt instrument is used.

Valuation hierarchy

In determining the carrying amount of financial instruments held at fair value the Banking Group uses a valuation method within the following hierarchy:

"Level 1" - Quoted market price

Where an active market exists fair value is based on quoted market prices for identical financial instruments. The quoted market price is not adjusted for any potential impact that may be attributed to a large holding of the financial instrument.

"Level 2" - Valuation technique using observable inputs

In the event that there is no quoted market price for the instruments, fair values are based on present value estimates or other market accepted valuation techniques which include data from observable markets wherever possible.

"Level 3" - Valuation technique with significant non observable inputs

The majority of valuation techniques employ only observable market data. However, the Banking Group holds some investments in unlisted funds or other investments which do not trade in an active market. For these instruments the fair value cannot be determined in whole with reference to current market transactions or valuation techniques whose variables only include data from observable markets. Where observable market data is not available, the fair value is determined using broker quotes or valuation techniques, including discounted cash flow analysis, using data derived and extrapolated from market data and tested against historic transactions and observed market trends.

Trade related contingent liabilities	113	117	112	116
Total guarantees and contingent liabilities	2,201	1,805	2,200	1,804

The Banking Group guarantees the performance of customers by issuing standby letters of credit and guarantees to third parties, including its Ultimate Parent Bank. The risk involved is essentially the same as the credit risk involved in extending loan facilities to customers, therefore these transactions are subjected to the same credit origination, portfolio management and collateral requirements for customers applying for loans. As the facilities may expire without being drawn upon, the notional amounts do not necessarily reflect future cash requirements.

Other contingent liabilities

In October 2012, the Commerce Commission commenced an investigation, under the Fair Trading Act 1986, into the promotion and sale of interest rate swaps by certain banks (including the Bank) to rural customers. The investigation is ongoing and the possible outcome of the investigation cannot be determined with any certainty at this stage.

On 11 March 2013, litigation funder Litigation Lending Services (NZ) Limited announced plans for a representative action against banks in New Zealand for certain fees charged to New Zealand customers over the past six years. Proceedings were filed against the Bank on 25 June 2013. The potential outcome of this litigation cannot be determined with any certainty at this stage.

The Banking Group has other contingent liabilities in respect of actual and possible claims and court proceedings. An assessment of the Banking Group's likely loss in respect of these matters has been made on a case-by-case basis and provision made where deemed necessary.

36. Securitisation, Funds Management, Other Fiduciary Activities and Insurance

Securitisation

Kingfisher NZ Trust 2008-1 ("the Kingfisher Trust")

The Banking Group has established the Kingfisher Trust as an in-house residential mortgage backed securities facility that can issue securities meeting the RBNZ criteria to use as collateral in repurchase transactions with the RBNZ.

These assets do not qualify for derecognition as the Bank retains substantially all of the risks and rewards of the transferred assets.

As at 30 September 2013 and 30 September 2012 the Banking Group had not entered into any repurchase agreements with the RBNZ for residential mortgage backed securities and therefore no collateral had been accepted by the RBNZ under this facility.

ANZNZ Covered Bond Trust ("the Covered Bond Trust")

Substantially all of the assets of the Covered Bond Trust are made up of certain housing loans and related securities originated by the Bank which are security for the guarantee by ANZNZ Covered Bond Trust Limited as trustee of the Covered Bond Trust of issuances of covered bonds by the Bank, or its wholly owned subsidiary ANZ New Zealand (Int'l) Limited, from time to time. The assets of the Covered Bond Trust are not available to creditors of the Bank, although the Bank (or its liquidator or statutory manager) may have a claim against the residual assets of the Covered Bond Trust (if any) after all prior ranking creditors of the Covered Bond Trust have been satisfied.

The Banking Group continues to recognise the assets of the Covered Bond Trust on its balance sheet as, although they are pledged as security for covered bonds, the Bank retains substantially all the risks and rewards of ownership.

Assets transferred to the Kingfisher Trust and the Covered Bond Trust

The Bank has purchased securities issued by both the Kingfisher Trust and the Covered Bond Trust in exchange for the transfer of the rights to the cash flows associated with the identified residential mortgages. The residential mortgages continue to be recognised by the Bank because they do not qualify for derecognition. The following table sets out the carrying values of the residential mortgages transferred by the Bank to these special purpose entities and the associated liabilities to deliver the cashflows on those instruments.

Notes to the Financial Statements

\$ millions	Bank ¹	
	30/09/2013	30/09/2012
Securitisations²		
Carrying amount of assets transferred	5,823	5,102
Carrying amount of associated liabilities	5,823	5,127
Covered Bonds		
Carrying amount of assets transferred	5,857	4,977
Carrying amount of associated liabilities	5,857	4,977

¹ There are no balances for the Banking Group as the balances for the Bank relate to transfers to internal special purpose entities.

² The securitisation liabilities have recourse only to the pool of residential mortgages which have been securitised. The fair value of securitised assets is \$5,823 million (30/09/2012 \$5,127 million). The fair value of the associated liabilities is \$5,823 million (30/09/2012 \$5,127 million). The net position is nil (30/09/2012 nil).

Funds management and other fiduciary activities

Funds management

Certain subsidiaries of the Bank act as trustee and/or manager for a number of unit trusts and investment and superannuation funds. The Banking Group provides private banking services to a number of clients, including investment advice and portfolio management. The Banking Group is not responsible for any decline in performance of the underlying assets of the investors due to market forces.

As funds under management are not controlled by the Banking Group, they are not included in these financial statements. The Banking Group derives fee and commission income from the sale and management of investment funds and superannuation bonds, unit trusts and the provision of private banking services to a number of clients. The Banking Group derives commission income from the sale of third party funds management products.

Some funds under management are invested in products owned or securities issued by the Banking Group and are recorded as liabilities in the balance sheet. At 30 September 2013, \$3,054 million of funds under management were invested in the Banking Group's own products or securities (30/09/2012 \$3,114 million).

Custodial services

The Banking Group provides custodial services to customers in respect of assets that are beneficially owned by those customers.

Funds managed and held in custody by the Banking Group

\$ millions	Banking Group	
	30/09/2013	30/09/2012
Funds managed by ANZ New Zealand Investments Limited (formerly OnePath (NZ) Limited)	8,242	7,324
The Bonus Bonds Trust	3,259	3,188
Other discretionary funds	5,451	5,173
Total funds under management	16,952	15,685
Funds held in custody on behalf of customers	6,365	5,784

Provision of financial services

Financial services provided by the Banking Group to entities which are involved in trust, custodial, funds management and other fiduciary activities are provided on arm's length terms and conditions and at fair value. Any assets purchased from such entities have been purchased on an arm's length basis and at fair value. The Banking Group does not have any affiliated insurance entities or affiliated insurance groups that are not members of the Banking Group.

Except for standard lending facilities provided in the normal course of business on arm's length terms, the Banking Group has not provided any funding to entities where trust, custodial, funds management or other fiduciary activities are established, marketed and/or sponsored by a member of the Banking Group (30/09/2012 \$nil).

Insurance business

The Banking Group conducts an insurance business through its subsidiaries OnePath Life (NZ) Limited and its subsidiary OnePath Insurance Services (NZ) Limited (together "OnePath Insurance"), the assets, liabilities and operations of which are fully consolidated into the Banking Group. OnePath Insurance provides a range of risk transfer insurance products, including life, lump sum trauma/disablement, income protection and medical cover. In addition, other entities within the Banking Group market and distribute a range of insurance products which are underwritten by OnePath Insurance, or by third party insurance companies.

The aggregate insurance business conducted by OnePath Insurance comprises assets totalling \$779 million (30/09/2012: \$766 million), which is 0.6% (30/09/2012: 0.6%) of the total consolidated assets of the Banking Group.

Risk management

The Bank and subsidiaries of the Bank participating in the activities identified above have in place policies and procedures to ensure that those activities are conducted in an appropriate manner. Should adverse conditions arise, it is considered that these policies and procedures will minimise the possibility that these conditions will adversely impact the Bank or the Banking Group. The policies and procedures include comprehensive and prominent disclosure of information regarding products, and formal and regular review of operations and policies by management.

Directorate and Auditors

Any document or communication may be sent to any Director at the Registered Office. The document or communication should be marked for the attention of that Director.

Directors' interests

In order to ensure that members of the Board are reminded of their disclosure obligations under the Companies Act 1993, the following procedures are adopted:

- a. At least once in each year, Directors are requested to complete, in terms of section 140(1) of the Companies Act 1993, a disclosure of any interests which they have with the Bank itself. Directors are reminded at this time of their obligation under the Companies Act 1993 to disclose promptly any transaction or proposed transaction with the Bank in which they have an interest.
- b. Directors are also requested to make a general disclosure of their interest in other entities in terms of section 140(2) of the Companies Act 1993. In addition, they are requested to initiate a review of that disclosure if there are any significant alterations which occur subsequently during the period.

In addition to the written disclosures referred to above, Directors disclose relevant interests which they have before discussion of particular business items.

The Companies Act 1993 allows a Director with an interest in a transaction to participate in discussions and to vote on all matters relating to that particular transaction. However, the Board has adopted a guideline whereby a Director with an interest in a transaction should not be present during any discussions, and should not vote, on any matter pertaining to that particular transaction.

Transactions with Directors

No Director has disclosed that he/she or any immediate relative or professional associate has any dealing with the Banking Group which has been either entered into on terms other than those which would in the ordinary course of business be given to any other person of like circumstances or means or which could otherwise be reasonably likely to influence materially the exercise of the Director's duties as a Director of the Bank.

Board Members as at 18 November 2013

Independent Non-Executive Director and Chairman

John Frederick Judge

B Com, FCA
Company Director
Auckland, New Zealand

Mr Judge is the Chair of the Remuneration Committee and a member of the Audit Committee and the Risk Committee.

Other directorships: Aquatx Holdings Limited, Biotelliga Limited, Biotelliga Holdings Limited, Biotelliga Nominees Limited, CIC28 Biotech Limited, Fletcher Building Limited, Fletcher Building Industries Limited, Janohn Limited, Sebca Limited, John Judge Limited, Health TV Limited, Sails Friday Limited.

Executive Director

David Duncan Hisco

B Bus, MBA
Chief Executive, ANZ Bank New Zealand Limited
Auckland, New Zealand

Other directorships: ANZ Holdings (New Zealand) Limited.

Conditions of Registration

Conditions of Registration, applicable as at 30 September 2013. These Conditions of Registration have applied from 30 June 2013, except as provided otherwise.

The registration of ANZ Bank New Zealand Limited ("the bank") as a registered bank is subject to the following conditions:

1. That-

- (a) the Total capital ratio of the banking group is not less than 8 percent;
- (b) the Tier 1 capital ratio of the banking group is not less than 6 percent;
- (c) the Common Equity Tier 1 capital ratio of the banking group is not less than 4.5 percent; and
- (d) the Total capital of the banking group is not less than \$30 million; and
- (e) the process in Subpart 2H of the Reserve Bank of New Zealand document: "Capital Adequacy Framework (Internal Models Based Approach)" (BS2B) dated May 2013 is followed for the recognition and repayment of capital.

For the purposes of this condition of registration,-

the scalar referred to in the Reserve Bank of New Zealand document "Capital adequacy framework (Internal Models Based Approach)" (BS2B) dated May 2013 is 1.06.

"Total capital ratio", "Tier 1 capital ratio", "Common Equity Tier 1 capital ratio", and "Total capital" must be calculated in accordance with the Reserve Bank of New Zealand document "Capital adequacy framework (Internal Models Based Approach)" (BS2B) dated May 2013.

1A. That-

- (a) the bank has an internal capital adequacy assessment process ("ICAAP") that accords with the requirements set out in the document "Guidelines on a bank's internal capital adequacy assessment process ('ICAAP')" (BS12) dated December 2007;
- (b) under its ICAAP the bank identifies and measures its "other material risks" defined as all material risks of the banking group that are not explicitly captured in the calculation of the Common Equity Tier 1 capital ratio, the Tier 1 capital ratio and the Total capital ratio under the requirements set out in the document "Capital adequacy framework (Internal Models Based Approach)" (BS2B) dated May 2013; and
- (c) the bank determines an internal capital allocation for each identified and measured "other material risk".

1B. That the banking group complies with all requirements set out in the Reserve Bank of New Zealand document "Capital adequacy framework (Internal Models Based Approach)" (BS2B) dated May 2013.

1C. That, if the buffer ratio of the banking group is 2.5% or less, the bank must:

- (a) According to the following table, limit the aggregate distributions of the bank's earnings to the percentage limit to distributions that corresponds to the banking group's buffer ratio:

Banking group's buffer ratio	Percentage limit to distributions of the bank's earnings
0% - 0.625%	0%
>0.625 - 1.25%	20%
>1.25 - 1.875%	40%
>1.875% - 2.5%	60%

(b) prepare a capital plan to restore the banking group's buffer ratio to above 2.5% within any timeframe determined by the Reserve Bank for restoring the buffer ratio; and

(c) have the capital plan approved by the Reserve Bank.

For the purposes of this condition of registration,-

"buffer ratio", "distributions", and "earnings" have the same meaning as in Part 3 of the Reserve Bank of New Zealand document: "Capital Adequacy Framework (Internal Models Based Approach)" (BS2B) dated May 2013.

the scalar referred to in the Reserve Bank of New Zealand document "Capital adequacy framework (Internal Models Based Approach)" (BS2B) dated May 2013 is 1.06.

This condition of registration applies on and after 1 January 2014.

2. That the banking group does not conduct any non-financial activities that in aggregate are material relative to its total activities.

In this condition of registration, the meaning of "material" is based on generally accepted accounting practice.

3. That the banking group's insurance business is not greater than 1% of its total consolidated assets.

For the purposes of this condition of registration, the banking group's insurance business is the sum of the following amounts for entities in the banking group:

- (a) if the business of an entity predominantly consists of insurance business and the entity is not a subsidiary of another entity in the banking group whose business predominantly consists of insurance business, the amount of the insurance business to sum is the total consolidated assets of the group headed by the entity; and
- (b) if the entity conducts insurance business and its business does not predominantly consist of insurance business and the entity is not a subsidiary of another entity in the banking group whose business predominantly consists of insurance business, the amount of the insurance business to sum is the total liabilities relating to the entity's insurance business plus the equity retained by the entity to meet the solvency or financial soundness needs of its insurance business.

In determining the total amount of the banking group's insurance business

- (a) all amounts must relate to on balance sheet items only, and must comply with generally accepted accounting practice; and
- (b) if products or assets of which an insurance business is comprised also contain a non-insurance component, the whole of such

Conditions of Registration

products or assets must be considered part of the insurance business.

For the purposes of this condition of registration;

“insurance business” means the undertaking or assumption of liability as an insurer under a contract of insurance;

“insurer” and “contract of insurance” have the same meaning as provided in sections 6 and 7 of the Insurance (Prudential Supervision) Act 2010.

4. That the aggregate credit exposures (of a non-capital nature and net of any allowances for impairment) of the banking group to all connected persons do not exceed the rating-contingent limit outlined in the following matrix:

Credit Rating of the bank ¹	Connected exposure limit (% of the banking group's Tier 1 capital)
AA/Aa2 and above	75
AA-/Aa3	70
A+/A1	60
A/A2	40
A-/A3	30
BBB+/Baa1 and below	15

¹ This table uses the rating scales of Standard & Poor's, Fitch Ratings and Moody's Investors Service. (Fitch Ratings' scale is identical to Standard & Poor's)

Within the rating-contingent limit, credit exposures (of a non-capital nature and net of any allowances for impairment) to non-bank connected persons shall not exceed 15 percent of the banking group's tier 1 capital.

For the purposes of this condition of registration, compliance with the rating-contingent connected exposure limit is determined in accordance with the Reserve Bank of New Zealand document entitled “Connected Exposures Policy” (BS8) dated May 2013.

5. That exposures to connected persons are not on more favourable terms (e.g. as relates to such matters as credit assessment, tenor, interest rates, amortisation schedules and requirement for collateral) than corresponding exposures to non-connected persons.
6. That the bank complies with the following corporate governance requirements:
- the board of the bank must have at least five directors;
 - the majority of the board members must be non-executive directors;
 - at least half of the board members must be independent directors;
 - an alternate director,—
 - for a non-executive director must be non-executive; and
 - for an independent director must be independent;
 - at least half of the independent directors of the bank must be ordinarily resident in New Zealand;
 - the chairperson of the board of the bank must be independent; and
 - the bank's constitution must not include any provision permitting a director, when exercising

powers or performing duties as a director, to act other than in what he or she believes is the best interests of the company (i.e. the bank).

For the purposes of this condition of registration, “non-executive” and “independent” have the same meaning as in the Reserve Bank of New Zealand document entitled “Corporate Governance” (BS14) dated March 2011.

- That no appointment of any director, chief executive officer, or executive who reports or is accountable directly to the chief executive officer, is made in respect of the bank unless:
 - the Reserve Bank has been supplied with a copy of the curriculum vitae of the proposed appointee; and
 - the Reserve Bank has advised that it has no objection to that appointment.
- That a person must not be appointed as chairperson of the board of the bank unless:
 - the Reserve Bank has been supplied with a copy of the curriculum vitae of the proposed appointee; and
 - the Reserve Bank has advised that it has no objection to that appointment.
- That the bank has a board audit committee, or other separate board committee covering audit matters, that meets the following requirements:
 - the mandate of the committee must include: ensuring the integrity of the bank's financial controls, reporting systems and internal audit standards;
 - the committee must have at least three members;
 - every member of the committee must be a non-executive director of the bank;
 - the majority of the members of the committee must be independent; and
 - the chairperson of the committee must be independent and must not be the chairperson of the bank.

For the purposes of this condition of registration, “non-executive” and “independent” have the same meaning as in the Reserve Bank of New Zealand document entitled “Corporate Governance” (BS14) dated March 2011.
- That a substantial proportion of the bank's business is conducted in and from New Zealand.
- That the bank has legal and practical ability to control and execute any business, and any functions relating to any business, of the bank that are carried on by a person other than the bank, sufficient to achieve, under normal business conditions and in the event of stress or failure of the bank or of a service provider to the bank, the following outcomes:
 - that the bank's clearing and settlement obligations due on a day can be met on that day;
 - that the bank's financial risk positions on a day can be identified on that day;
 - that the bank's financial risk positions can be monitored and managed on the day following any failure and on subsequent days; and

Conditions of Registration

(d) that the bank's existing customers can be given access to payments facilities on the day following any failure and on subsequent days.

For the purposes of this condition of registration, the term "legal and practical ability to control and execute" is explained in the Reserve Bank of New Zealand document entitled "Outsourcing Policy" (BS11) dated January 2006.

12. That:

- (a) the business and affairs of the bank are managed by, or under the direction and supervision of, the board of the bank;
- (b) the employment contract of the chief executive officer of the bank or person in an equivalent position (together "CEO") is with the bank, and the terms and conditions of the CEO's employment agreement are determined by, and any decision relating to the employment or termination of employment of the CEO are made by, the board of the bank; and
- (c) all staff employed by the bank shall have their remuneration determined by (or under the delegated authority of) the board or the CEO of the bank and be accountable (directly or indirectly) to the CEO of the bank.

13. That the banking group complies with the following quantitative requirements for liquidity-risk management:

- (a) the one-week mismatch ratio of the banking group is not less than zero per cent at the end of each business day;
- (b) the one-month mismatch ratio of the banking group is not less than zero per cent at the end of each business day; and
- (c) the one-year core funding ratio of the banking group is not less than 75 per cent at the end of each business day.

For the purposes of this condition of registration, the ratios identified must be calculated in accordance with the Reserve Bank of New Zealand documents entitled "Liquidity Policy" (BS13) dated March 2011 and "Liquidity Policy Annex: Liquid Assets" (BS13A) dated December 2011.

14. That the bank has an internal framework for liquidity risk management that is adequate in the bank's view for managing the bank's liquidity risk at a prudent level, and that, in particular:

- (a) is clearly documented and communicated to all those in the organisation with responsibility for managing liquidity and liquidity risk;
- (b) identifies responsibility for approval, oversight and implementation of the framework and policies for liquidity risk management;
- (c) identifies the principal methods that the bank will use for measuring, monitoring and controlling liquidity risk; and
- (d) considers the material sources of stress that the bank might face, and prepares the bank to manage stress through a contingency funding plan.

15. That no more than 10% of total assets may be beneficially owned by a SPV.

For the purposes of this condition,-

"total assets" means all assets of the banking group plus any assets held by any SPV that are not included in the banking group's assets:

"SPV" means a person-

- (a) to whom any member of the banking group has sold, assigned, or otherwise transferred any asset;
- (b) who has granted, or may grant, a security interest in its assets for the benefit of any holder of any covered bond; and
- (c) who carries on no other business except for that necessary or incidental to guarantee the obligations of any member of the banking group under a covered bond:

"covered bond" means a debt security issued by any member of the banking group, for which repayment to holders is guaranteed by a SPV, and investors retain an unsecured claim on the issuer.

16. That-

- (a) no member of the banking group may give effect to a qualifying acquisition or business combination that meets the notification threshold, and does not meet the non-objection threshold, unless:
 - (i) the bank has notified the Reserve Bank in writing of the intended acquisition or business combination and at least 10 working days have passed; and
 - (ii) at the time of notifying the Reserve Bank of the intended acquisition or business combination, the bank provided the Reserve Bank with the information required under the Reserve Bank of New Zealand Banking Supervision Handbook document "Significant Acquisitions Policy" (BS15) dated December 2011; and
- (b) no member of the banking group may give effect to a qualifying acquisition or business combination that meets the non-objection threshold unless:
 - (i) the bank has notified the Reserve Bank in writing of the intended acquisition or business combination;
 - (ii) at the time of notifying the Reserve Bank of the intended acquisition or business combination, the bank provided the Reserve Bank with the information required under the Reserve Bank of New Zealand Banking Supervision Handbook document "Significant Acquisitions Policy" (BS15) dated December 2011; and
 - (iii) the Reserve Bank has given the bank a notice of non-objection to the significant acquisition or business combination.

For the purposes of this condition of registration, "qualifying acquisition or business combination", "notification threshold" and "non-objection threshold" have the same meaning as in the Reserve Bank of New Zealand Banking Supervision Handbook document "Significant Acquisitions Policy" (BS15) dated December 2011.

17. That the registered bank is pre-positioned for Open Bank Resolution and in accordance with a direction from the Reserve Bank, the registered bank can-

- (a) close promptly at any time of the day and on any day of the week and that effective upon the appointment of the statutory manager-

Conditions of Registration

- (i) all liabilities are frozen in full; and
 - (ii) no further access by customers and counterparties to their accounts (deposits, liabilities or other obligations) is possible;
 - (b) apply a *de minimus* to relevant customer liability accounts;
 - (c) apply a partial freeze to the customer liability account balances;
 - (d) reopen by no later than 9am the next business day following the appointment of a statutory manager and provide customers access to their unfrozen funds;
 - (e) maintain a full freeze on liabilities not pre-positioned for open bank resolution; and
 - (f) reinstate customers' access to some or all of their residual frozen funds.
18. That the registered bank has an Implementation Plan that-
- (a) is up-to-date; and
 - (b) demonstrates that the registered bank's prepositioning for Open Bank Resolution meets the requirements set out in the Reserve Bank document: "Open Bank Resolution Pre-positioning Requirements Policy" (BS17).
19. That the registered bank has a compendium of liabilities that-
- (a) at the product-class level lists all liabilities, indicating which are-
 - (i) pre-positioned for Open Bank Resolution; and
 - (ii) not pre-positioned for Open Bank Resolution;
 - (b) is agreed to by the Reserve Bank; and
 - (c) if the Reserve Bank's agreement is conditional, meets the Reserve Bank's conditions.
20. That on an annual basis the registered bank tests all the component parts of its OBR solution that demonstrates the registered bank's prepositioning for Open Bank Resolution as specified in their Implementation Plan.

For the purposes of this condition of registration, "*de minimus*", "partial freeze", "customer liability account", "frozen and unfrozen funds", "Implementation Plan", "compendium of liabilities", and "pre-positioned and non pre-positioned liabilities" have the same meaning as in the Reserve Bank document entitled "Open Bank Resolution (OBR) Pre-positioning Requirements Policy" (BS17) dated June 2013.

In these conditions of registration:

"banking group" means ANZ Bank New Zealand Limited's financial reporting group (as defined in section 2(1) of the Financial Reporting Act 1993):

"generally accepted accounting practice" has the same meaning as in section 2 of the Financial Reporting Act 1993.

Changes to conditions of registration effective 1 October 2013

The above conditions of registration have been amended effective 1 October 2013 to update cross-references to updated versions of the RBNZ documents BS2B, BS8 and BS17 and to add the following conditions restricting high loan-to-valuation residential mortgage lending:

21. That, for a loan-to-valuation measurement period, the total of the bank's qualifying new mortgage lending amounts must not for residential properties with a loan-to-valuation ratio of more than 80%, exceed 10% of the total of the qualifying new mortgage lending amounts arising in the loan-to-valuation measurement period.
22. That the bank must not make a residential mortgage loan unless the terms and conditions of the loan contract or the terms and conditions for an associated mortgage require that a borrower obtain the bank's agreement before the borrower can grant to another person a charge over the residential property used as security for the loan.
23. That the bank must not permit a borrower to grant a charge in favour of another person over a residential property used as security for a residential mortgage loan unless the sum of the lending secured by the charge and the loan value for the residential mortgage loan would not exceed 80% of the property value of the residential property when the lending secured by the charge is drawn down.
24. That the bank must not provide a residential mortgage loan if the residential property to be mortgaged to the bank as security for the residential mortgage loan is subject to a charge in favour of another person unless the total amount of credit secured by the residential property would not exceed 80% of the property value when the residential mortgage loan is drawn down.
25. That the bank must not act as broker or arrange for a member of its banking group to provide a residential mortgage loan.

In conditions of registration 21 to 25,—

"loan-to-valuation ratio", "loan value", "property value", "qualifying new mortgage lending amount" and "residential mortgage loan" have the same meaning as in the Reserve Bank of New Zealand document entitled "Framework for Restrictions on High-LVR Residential Mortgage Lending" (BS19) dated September 2013:

"loan-to-valuation measurement period" means—

- (a) the six calendar month period ending on the last day of March 2014; and
- (b) thereafter a period of three calendar months ending on the last day of the third calendar month, the first of which ends on the last day of April 2014.

Directors' Statement

As at the date on which this Disclosure Statement is signed, after due enquiry, each Director believes that:

- (i) The Disclosure Statement contains all the information that is required by the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order (No 2) 2013;
- (ii) The Disclosure Statement is not false or misleading.

Over the year ended 30 September 2013, after due enquiry, each Director believes that:

- (i) ANZ Bank New Zealand Limited has complied with all the Conditions of Registration;
- (ii) Credit exposures to connected persons were not contrary to the interests of the Banking Group;
- (iii) ANZ Bank New Zealand Limited had systems in place to monitor and control adequately the Banking Group's material risks, including credit risk, concentration of credit risk, interest rate risk, currency risk, equity risk, liquidity risk, operational risk and other business risks, and that those systems were being properly applied.

This Disclosure Statement is dated, and has been signed by or on behalf of all Directors of the Bank on 18 November 2013. On that date, the Directors of the Bank were:

Antony Carter

Shayne Elliott

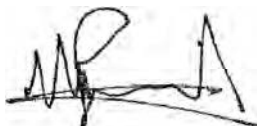

David Hisco

John Judge

Michael Smith, OBE

Mark Verbiest

Joan Withers

Independent Auditor's Report

To the Shareholder of ANZ Bank New Zealand Limited

Report on the Bank and Banking Group Disclosure Statement

We have audited the accompanying financial statements and supplementary information of ANZ Bank New Zealand Limited ("the Bank") (formerly ANZ National Bank Limited) and its subsidiaries ("the Banking Group") on pages 4 to 70 of the Disclosure Statement. The financial statements comprise the balance sheets as at 30 September 2013, the statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information of the Bank and the Banking Group. The supplementary information comprises the information that is required to be disclosed under the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order (No 2) 2013 (the "Order").

Directors' Responsibility for the Disclosure Statement

The Directors are responsible for the preparation of the Bank and Banking Group Disclosure Statement, including financial statements prepared in accordance with Clause 24 of the Order and generally accepted accounting practice in New Zealand, and that give a true and fair view of the matters to which they relate. The Directors are also responsible for such internal controls as they determine are necessary to enable the preparation of the Bank and Banking Group financial statements that are free from material misstatement whether due to fraud or error.

The Directors are responsible for the preparation and fair presentation of supplementary information, in accordance with Schedules 2, 4, 7, 13, 14, 15 and 17 of the Order.

Auditor's Responsibility

Our responsibility is to express an opinion on the Disclosure Statement, including the financial statements prepared in accordance with Clause 24 of the Order and the supplementary information disclosed in accordance with Schedules 4, 7, 13, 14, 15 and 17 of the Order. We conducted our audit in accordance with International Standards on Auditing (New Zealand). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Bank and Banking Group financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the Bank and Banking Group financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the Bank and Banking Group's preparation of the financial statements that gives a true and fair view of the matters to which they relate in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank and Banking Group's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates, as well as evaluating the presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Our firm has provided other services to the Bank and Banking Group in relation to audit related services. Partners and employees of our firm may also deal with the Bank and Banking Group within the ordinary course of the business of the Bank and Banking group. There are, however, certain restrictions on dealings which the partners and employees of our firm can have with the Bank and Banking Group. These matters have not impaired our independence as auditors of the Bank and Banking Group. The firm has no other relationship with, or interest in, the Bank or Banking Group.

Opinion on the Disclosure Statement

In our opinion the Disclosure Statement of the Bank and the Banking Group on pages 4 to 70 (excluding the supplemental information):

- complies with generally accepted accounting practice in New Zealand;
- complies with International Financial Reporting Standards; and
- gives a true and fair view of the financial position as at 30 September 2013 and of their financial performance and cash flows for the year ended on that date.

**Opinion on Supplementary Information**

In our opinion, the supplementary information that is required to be disclosed in accordance with Schedules 4, 7, 13, 14, 15 and 17 of the Order, and is included within notes 14, 15, 28, 29, 31, and 36 of the Disclosure Statement:

- has been prepared, in all material respects, in accordance with the guidelines issued pursuant to section 78(3) of the Reserve Bank of New Zealand Act 1989 and any Conditions of Registration;
- is in accordance with the books and records of the Bank and Banking Group; and
- fairly states the matters to which it relates in accordance with those Schedules.

Report on Supplementary Information Relating to Capital Adequacy

We have reviewed the Supplementary Information relating to Capital Adequacy, as disclosed in note 28 of the Disclosure Statement for the year ended 30 September 2013.

Directors' Responsibility for the Supplementary Information Relating to Capital Adequacy

The Directors are responsible for the preparation of Supplementary Information relating to Capital Adequacy that is required to be disclosed under Schedule 11 of the Order.

Auditor's Responsibility

Our responsibility is to express an opinion on the supplementary information relating to Capital Adequacy based on our review. We conducted our review in accordance with the Review Engagement Standards issued by the New Zealand Institute of Chartered Accountants. Those standards require that we comply with ethical requirements and plan and perform the review to obtain limited assurance about whether the supplementary information relating to Capital Adequacy is, in all material respects:

- prepared in accordance with the Bank's Conditions of Registration;
- prepared in accordance with the Bank's internal models for credit risk and operational risk as accredited by the Reserve Bank of New Zealand; and
- disclosed in accordance with Schedule 11 of the Order.

A review is limited primarily to enquiries of Bank and Banking Group personnel and analytical review procedures applied to the financial data, and thus provides less assurance than an audit. We have not performed an audit in respect of the Capital Adequacy disclosures, and accordingly, we do not express an audit opinion on these disclosures.

Opinion on the Supplementary Information Relating to Capital Adequacy

Based on our review, nothing has come to our attention that causes us to believe that the supplementary information relating to capital adequacy prescribed by Schedule 11 of the Order, and disclosed in note 28 of the Disclosure Statement, is not, in all material respects:

- prepared in accordance with the Bank's Conditions of Registration;
- prepared in accordance with the Bank's internal models for credit risk and operational risk as accredited by the Reserve Bank of New Zealand; and
- disclosed in accordance with Schedule 11 of the Order.

Report on Other Legal and Regulatory Requirements

In accordance with the requirements of sections 16(1)(d) and 16(1)(e) of the Financial Reporting Act 1993, and clauses 2(1)(d) and 2(1)(e) of Schedule 1 of the Order, we report that:

- we have obtained all the information and explanations we have required; and
- in our opinion, proper accounting records have been kept by the Bank and Banking Group, as far as appears from our examination of those records.

ANZ New Zealand (Int'l) Limited Interim Financial Statements

FOR THE SIX MONTHS ENDED 31 MARCH 2015

Interim Management Report

For the six months ended 31 March 2015

Nature of Business

ANZ New Zealand (Int'l) Limited (the Company) is incorporated in New Zealand under the Companies Act 1993. Its registered office is Ground Floor, ANZ Centre, 23-29 Albert Street, Auckland, 1010, New Zealand. The ultimate parent company is Australia and New Zealand Banking Group Limited (the Ultimate Parent).

The Company provides funding facilities and wholesale funding to its parent company, ANZ Bank New Zealand Limited (the Parent Company) including the issuance of U.S. Commercial Paper, Euro-Commercial Paper, U.S. Medium-Term Notes, Euro Medium-Term Notes and Covered Bonds. The Company's overseas activities are currently conducted through its London Branch. The Company has no subsidiaries.

There have not been any changes in the nature of the Company's business during the period.

Business Review

The increase in the Company's total liabilities from \$19,971 million as at 30 September 2014 to \$20,544 million as at 31 March 2015 has been driven primarily by issuances of U.S. Medium-Term Notes and Covered Bonds exceeding maturities of Euro Medium-Term Notes.

Net interest income of \$3 million for the six months to 31 March 2015 is consistent with interest income for the six months to 31 March 2014.

Principal Risks and Uncertainties

The Company expects minimal change to its principal risks and uncertainties over the next six months.

The Company's exposure to risk arises from the Company's operations as a financial intermediary and participant in the financial markets. All aspects of risk are managed within a framework of policies, limits, control procedures, systems and reporting. Risk exposures are independently monitored and controlled within predefined limits, with an internal reporting framework in place.

The Company carries minimal interest rate, liquidity and currency risk reflecting the Company's role as a financial intermediary. The Company's principal credit risk exposure continues to be to the Parent Company. Operational risk is managed through a comprehensive infrastructure of effective policies, procedures, businesses systems and compliance.

Other Information

- No important events have occurred since the end of the financial year.
- No significant changes are planned to the future operations of the Company.
- The Company is not involved in research and development.
- The Company has not acquired any of its own shares.
- The Company only operates through its London branch.

Directors

There have been no changes to the Directors of the Company since 30 September 2014.

Responsibility Statement

As at the date on which this Responsibility Statement is signed, after due enquiry and to the best of their knowledge, the Directors confirm that

- the interim financial statements have been prepared in accordance with NZ IAS 34 *Interim Financial Reporting* and IAS 34 *Interim Financial Reporting*; and
- the interim management report includes a fair review of the important events that have occurred during the first six months of the financial year, their impact on the interim financial statements and the principal risks and uncertainties for the remaining six months of the financial year.

Notes to the Financial Statements

1. Significant Accounting Policies

(i) Statement of compliance

These interim financial statements have been prepared in accordance with the requirements of NZ IAS 34 *Interim Financial Reporting* and IAS 34 *Interim Financial Reporting*, and should be read in conjunction with the financial statements for the year ended 30 September 2014.

(ii) Basis of measurement

These interim financial statements have been prepared on a going concern basis in accordance with historical cost concepts.

(iii) Changes in accounting policies

The accounting policies applied by the Company are consistent with those applied and disclosed in the previous full year financial statements.

(iv) Presentation currency and rounding

The amounts contained in the financial statements are presented in millions of New Zealand dollars.

2. Related parties

Cash and cash equivalents comprises short term deposits with the Parent Company.

Commercial paper, amounts due to other related parties and debt issuances are guaranteed by the Parent Company.

Covered Bonds

As at 31 March 2015, covered bonds of \$4,382 million (31/03/2014 \$3,828 million; 30/09/2014 \$3,928 million) included in debt issuances were guaranteed by ANZNZ Covered Bond Trust Limited as trustee of ANZNZ Covered Bond Trust (the Trust) under the terms of the Parent Company's covered bond programme.

Substantially all of the assets of the Trust are made up of certain housing loans and related securities originated by the Parent Company which are security for the guarantee by ANZNZ Covered Bond Trust Limited as trustee of the Trust of issuances of covered bonds by the Company, or the Parent Company, from time to time. The assets of the Trust are not available to creditors of the Company or the Parent Company, although the Company or the Parent Company (or its liquidator or statutory manager) may have a claim against the residual assets of the Trust (if any) after all prior ranking creditors of the Trust have been satisfied.

3. Fair Value Measurements

Financial assets and financial liabilities not measured at fair value

No assets or liabilities are carried at fair value. Below is a comparison of the carrying amounts as reported on the balance sheet and fair value of financial asset and liability categories other than those categories where the carrying amount is considered a reasonable approximation of fair value:

\$ millions	Unaudited 31/03/2015		Unaudited 31/03/2014		Audited 30/09/2014

Independent Auditor's Review Report

To the Shareholder of ANZ New Zealand (Int'l) Limited

We have completed a review of the interim financial statements of ANZ New Zealand (Int'l) Limited on pages 3 to 5 which comprise the balance sheet as at 31 March 2015, and the statement of comprehensive income, statement of changes in equity and the cash flow statement for the 6 months ended on that date, and a summary of significant accounting policies and other explanatory information.

Directors' responsibility

The Directors of ANZ New Zealand (Int'l) Limited are responsible for the preparation and fair presentation of interim financial statements in accordance with NZ IAS 34: *Interim Financial Reporting* and for such internal control as the Directors determine is necessary to enable the preparation and fair presentation of the interim financial statements that are free from material misstatement, whether due to fraud or error and which give a true and fair view of the financial position of ANZ New Zealand (Int'l) Limited as at 31 March 2015 and its financial performance and cash flows for the six months ended on that date.

Reviewer's responsibility

Our responsibility is to express a conclusion on the interim financial statements based on our review. We conducted our review in accordance with NZ SRE 2410: *Review of Financial Statements Performed by the Independent Auditor of the Entity*. NZ SRE 2410 requires us to conclude whether anything has come to our attention that causes us to believe that the financial statements are not prepared, in all material respects, in accordance with NZ IAS 34: *Interim Financial Reporting*. As the auditor of ANZ New Zealand (Int'l) Limited, NZ SRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial statements.

A review of interim financial statements in accordance with NZ SRE 2410 is a limited assurance engagement. The auditor performs procedures, primarily consisting of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures.

The procedures performed in a review are substantially less than those performed in an audit conducted in accordance with International Standards on Auditing (New Zealand). Accordingly we do not express an audit opinion on those financial statements.

Other than in our capacity as auditors we have no relationship with or interests in the company.

Review opinion

Based on our review, nothing has come to our attention that causes us to believe that these interim financial statements of ANZ New Zealand (Int'l) Limited do not present fairly, in all material respects, the financial position of the ANZ New Zealand (Int'l) Limited as at 31 March 2015, and of its financial performance and its cash flows for the 6 months ended on that date, in accordance with NZ IAS 34: *Interim Financial Reporting*.

Our review was completed on 14 May 2015 and our review opinion is expressed as at that date.

A handwritten signature in blue ink that reads 'KPMG'.

Cash Flow Statement	4
Notes to the Financial Statements	5
Independent Auditor's Report	11

Annual Report

For the year ended 30 September 2014

ANZ New Zealand (Int'l) Limited (the Company) is incorporated in New Zealand under the Companies Act 1993. Its registered office is, Ground Floor, ANZ Centre, 23-29 Albert Street, Auckland, 1010, New Zealand. The ultimate parent company is Australia and New Zealand Banking Group Limited (the Ultimate Parent).

Pursuant to section 211(3) of the Companies Act 1993, the shareholder of the Company has agreed that the Annual Report of the Company need not comply with any of the paragraphs (e) to (h) and (j) of subsection (1) and subsection (2) of section 211.

Management Report

Nature of Business

The Company provides funding facilities and wholesale funding to its parent company, ANZ Bank New Zealand Limited (the Parent Company) including the issuance of U.S. Commercial Paper, Euro-Commercial Paper, U.S. Medium-Term Notes, Euro Medium-Term Notes and Covered Bonds. The Company's overseas activities are currently conducted through its London Branch. The Company has no subsidiaries.

There have not been any material changes in the nature of the Company's business during the year.

Business Review

The increase in the Company's total assets from \$17,590 million as at 30 September 2013 to \$19,976 million as at 30 September 2014 has been driven primarily by the issuance of commercial paper and medium term notes in excess of those required to replace maturities and foreign exchange revaluations.

Net interest income was \$7 million for the year to 30 September 2014 (2013: \$7 million).

Principal Risks and Uncertainties

The Company expects minimal change to principal risks and uncertainties over the next year.

The Company's exposure to risk arises from the Company's operations as a financial intermediary and participant in the financial markets. All aspects of risk are managed within a framework of policies, limits, control procedures, systems and reporting, and risk exposures are independently monitored and controlled within predefined limits, with an internal reporting framework in place.

The Company carries minimal interest rate, liquidity and currency risk reflecting the Company's role as a financial intermediary. The Company's principal credit risk exposure continues to be to the Parent Company. Operational risk is managed through a comprehensive infrastructure of effective policies, procedures, businesses systems and compliance.

Other Information

- No important events have occurred since the end of the financial year.
- No significant changes are planned to the future operations of the Company.
- The Company is not involved in research and development.
- The Company has not acquired any of its own shares.
- The Company only operates through its London branch.

Directors

There have been no changes to the Directors of the Company since 30 September 2013.

Responsibility Statement

As at the date on which this Responsibility Statement is signed, after due enquiry and to the best of their knowledge, the Directors confirm that:

- (a) the financial statements, prepared in accordance with New Zealand Generally Accepted Accounting Practice and International Financial Reporting Standards, give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company; and
- (b) the management report of the Company includes a fair review of the development and performance of the business and the position of the Company and the principal risks and uncertainties that it faces.

Notes to the Financial Statements

1. Significant Accounting Policies

(a) Basis of preparation

(i) Statement of compliance

These financial statements have been prepared in accordance with the requirements of the Companies Act 1993 and the Financial Reporting Act 1993.

These financial statements have also been prepared in accordance with New Zealand Generally Accepted Accounting Practice. They comply with New Zealand equivalents to International Financial Reporting Standards (NZ IFRS) and other applicable Financial Reporting Standards, as appropriate to profit-oriented entities. The financial statements comply with International Financial Reporting Standards (IFRS).

The principal accounting policies adopted in the preparation of the financial statements are set out below.

(ii) Use of estimates and assumptions

The preparation of the financial statements requires the use of management judgement, estimates and assumptions that affect reported amounts and the application of policies. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable. Actual results may differ from these estimates.

(iii) Basis of measurement

These financial statements have been prepared on a going concern basis in accordance with historical cost concepts.

(iv) Rounding

The amounts contained in the financial statements have been rounded to the nearest million dollars, except where otherwise stated.

(v) Changes in accounting policies

There have been no changes in accounting policies or early adoption of accounting standards in the preparation and presentation of the financial statements.

(vi) Foreign currency translation

Functional and presentation currency

The financial statements are presented in New Zealand dollars, which is the Company's functional currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities resulting from foreign currency transactions are subsequently translated at the spot rate at reporting date.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different to those at which they were initially recognised or included in a previous financial report, are recognised in the statement of comprehensive income in the period in which they arise.

(b) Income and expense recognition

Interest income and interest expense are recognised in the statement of comprehensive income as they accrue, using the effective interest method.

The effective interest method calculates the amortised cost of a financial asset or financial liability and allocates the interest income or interest expense, including any fees and directly related transaction costs that are an integral part of the effective interest rate, over the expected life of the financial asset or liability. The application of the method has the effect of recognising income and expense on the financial asset or liability evenly in proportion to the amount outstanding over the period to maturity or repayment.

(c) Income tax

(i) Income tax expense

Income tax on profits for the period comprises current and deferred tax. It is recognised in the statement of comprehensive income as tax expense, except when it relates to items credited directly to equity, in which case it is recorded in equity.

(ii) Current tax

Current tax is the expected tax payable on taxable income for the period, based on tax rates (and tax laws) which are enacted or substantively enacted by the reporting date and including any adjustment for tax payable in previous periods. Current tax for current and prior periods is recognised as a liability (or asset) to the extent that it is unpaid (or refundable).

(d) Recognition and derecognition of financial assets and financial liabilities

(i) Recognition

Financial assets include amounts due from the Parent Company. Financial liabilities include commercial paper, amounts due to related parties and bonds and notes.

The Company recognises a financial asset or liability on its balance sheet when, and only when, the Company becomes a party to the contractual provisions of the financial asset or liability. Financial assets and financial liabilities are initially recognised at fair value including directly attributable transaction costs and subsequently measured at amortised cost.

(ii) Derecognition

The Company derecognises a financial asset from its balance sheet when, and only when, (i) the contractual rights to the cash flows from the financial asset expire, or (ii) the Company has transferred all or substantially all of the risks and rewards of ownership of the financial asset and no longer controls the financial asset. The Company derecognises a financial liability from its balance sheet, when and only when, it is extinguished.

(e) Presentation

(i) Offsetting of income and expenses

Income and expenses are not offset unless required or permitted by an accounting standard. This generally arises in the following circumstances:

- where gains and losses from a group of similar transactions are reported on a net basis such as foreign exchange gains and losses;
- where amounts are collected on behalf of third parties, where the Company is, in substance, acting as an agent only; or

Notes to the Financial Statements

- where costs are incurred on behalf of customers from whom the Company is reimbursed.

(ii) Offsetting of assets and liabilities

Assets and liabilities are offset and the net amount reported in the balance sheet only where:

- there is a current enforceable legal right to offset the asset and liability; and
- there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(iii) Cash flow statement

Cash and cash equivalents comprise cash at bank.

Certain cash flows have been netted in order to provide more meaningful disclosure, as many of the cash flows are received and immediately lent to the Parent Company. These cash flows are high volume and short term in nature and include commercial paper and related party balances.

(iv) Segment reporting

Business segments are distinguishable components of the Company that provide products or services that are subject to risks and rewards that are different to those of other business segments. Geographical segments provide products or services within a particular economic environment that is subject to risks and rewards that are

different to those components operating in other economic environments.

As the principal activity of the Company is the raising of external funding, which is on-lent to the Parent Company at a margin, and the majority of its revenue is not earned from external customers, the Company does not have any reportable segments.

(f) Other

(i) Accounting Standards not early adopted

The following standards and amendments were available for early adoption but have not been applied by the Company in these financial statements. The Company currently does not intend to apply any of these pronouncements until their effective date and is assessing their impact on its financial statements.

NZ IFRS 9 Financial Instruments (effective for periods commencing after 1 January 2018)

Specifies a simpler methodology for classifying and measuring financial assets, with two primary measurement categories: amortised cost and fair value. Requires the amount of change in the fair value attributable to changes in credit risk of certain liabilities designated under the fair value option to be presented in other comprehensive income.

2. Interest Expense

\$ millions	Year to 30/09/2014	Year to 30/09/2013
Commercial paper	14	16
Bonds and notes	226	339
Total interest expense	<u>240</u>	<u>355</u>

3. Income Tax

\$ millions	Year to 30/09/2014	Year to 30/09/2013
Reconciliation of the prima facie income tax payable on profit		
Profit before income tax	7	6
Prima facie income tax at 28%	2	2
Total income tax expense	<u>2</u>	<u>2</u>
Amounts recognised in the statement of comprehensive income		
Current tax	2	2

4. Commercial Paper

\$ millions	30/09/2014	30/09/2013
U.S. commercial paper	5,587	4,764
Euro commercial paper	470	-
Total commercial paper	<u>6,057</u>	<u>4,764</u>

Commercial paper issued is guaranteed by the Parent Company.

Notes to the Financial Statements

5. Bonds and notes

\$ millions	30/09/2014	30/09/2013
U.S. medium term notes	4,934	4,464
Euro medium term notes	4,774	4,349
Covered bonds	3,928	3,925
Total bonds and notes	13,636	12,738

Bonds and notes issued are guaranteed by the Parent Company. \$91 million (2013: \$206 million) of the notes also benefit from a supporting guarantee from the New Zealand Crown. Bonds and notes are unsecured and rank equally with other unsecured liabilities.

Covered Bonds

Substantially all of the assets of the ANZNZ Covered Bond Trust (the Trust) are made up of certain housing loans and related securities originated by the Parent Company which are security for the guarantee by ANZNZ Covered Bond Trust Limited as trustee of the Trust of issuances of covered bonds by the Company, or the Parent Company, from time to time. The assets of the Trust are not available to creditors of the Company or the Parent Company, although the Company or the Parent Company (or its liquidator or statutory manager) may have a claim against the residual assets of the Trust (if any) after all prior ranking creditors of the Trust have been satisfied.

6. Related Party Transactions

Transactions with other related parties

The Company undertakes transactions with the Parent Company and other members of the Australia and New Zealand Banking Group Limited group of companies (ANZ Group). These transactions principally consist of funding transactions. Other members of the ANZ Group provide administrative functions, including remuneration of key management personnel, to the Company for which no payments have been made.

All interest income is from the Parent Company. Interest expense on bonds and notes includes \$9 million (2013: \$25 million) paid to subsidiaries of the Ultimate Parent.

Audit fees and fees for other services have been paid to the auditors by the Parent Company without reimbursement.

\$ thousands	30/09/2014	30/09/2013
Audit or review of financial statements	36	36
Other services:		
Prospectus reviews	245	109
Securitisation pool audits	25	4
Total other services	270	113
Total fees paid to auditors by the Parent Company	307	149

Balances with related parties

Cash at bank comprises short term deposits with the Parent Company.

Amounts due from the Parent Company are lent on similar terms as the underlying funding raised.

At 30 September 2013, bonds and notes included \$1,267 million of notes that were issued to a subsidiary of the Ultimate Parent. These notes matured during the year.

Amounts due to other related parties are guaranteed by the Parent Company.

Notes to the Financial Statements

7. Current and Non-current Assets and Liabilities

\$ millions	30/09/2014		30/09/2013	
	Current	Non-current	Current	Non-current
Assets				
Cash at bank	179	-	2	-
Due from Parent Company	9,377	10,420	7,717	9,871
Total assets	9,556	10,420	7,719	9,871
Liabilities				
Accrued interest payable	98	-	83	-
Commercial paper	6,057	-	4,764	-
Current tax liabilities	1	-	1	-
Due to other related parties	179	-	-	-
Bonds and notes	3,216	10,420	2,867	9,871
Total liabilities	9,551	10,420	7,715	9,871

Assets and liabilities are classified as current if:

- it is expected they will be realised, consumed or settled in the normal operating cycle or within twelve months after the end of the reporting date; or
- they are held primarily for trading; or
- they are assets that are cash or a cash equivalent; or
- they are liabilities where there is no unconditional right to defer settlement for at least twelve months.

8. Equity

Capital management policies

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide funding for the shareholder and to maintain an optimal capital structure to reduce the cost of capital.

The Company's capital comprises issued share capital and retained earnings. The Company's dividend policy is to distribute all retained profits to the Parent Company.

Ordinary share capital

The Company's share capital consists of 500,000 (2013: 500,000) fully paid ordinary shares that have the rights and powers prescribed by Section 36 of the Companies Act 1993. The shares have a carrying value of \$499,900.

The dividend on ordinary shares was \$8.95 per share (2013: \$9.69 per share).

Notes to the Financial Statements

9. Financial Risk Management

Financial instruments are entered into by the Company in its operations as a financial intermediary. The Company's operations are matched funded to minimise interest rate, currency and liquidity risks.

There are no material off balance sheet instruments. All aspects of risk are managed within a framework of policies, limits, control procedures, systems and reporting. Risk exposures are independently monitored and controlled within predefined limits, with an internal reporting framework in place.

Credit risk

Credit risk is the potential that the counterparty to a financial transaction will fail to perform according to the terms and conditions of the contract, thus causing loss.

The Company's principal exposure is to the Parent Company and the carrying amount represents the Company's maximum and net exposure to credit risk.

Market risk

Interest rate risk

The following tables represent the interest rate sensitivity of the Company's assets and liabilities by showing the periods in which these instruments may reprice (that is, when interest rates applicable to each asset or liability can be changed). The repricing gaps are based on contractual repricing information.

\$ millions	Carrying value	At call or less than 3 months	3-6 months	6-12 months	1-5 years	Non interest bearing

Currency risk

Currency risk arises from changes in foreign exchange rates impacting on residual currency positions that may result from the Company's business as a financial intermediary.

Currency risk is monitored in terms of open positions to each currency, based on nominal value and the duration of each exposure. The total amount of foreign currency exposures, whether recognised or unrecognised, within each currency is not material.

Notes to the Financial Statements

Liquidity risk

Liquidity risk is the risk that under certain conditions, cash outflows can exceed cash inflows in a given period. Liquidity risk arises from mismatch in the final maturity of on-balance sheet assets and liabilities plus settlement of off-balance sheet activities.

The following maturity analysis of assets and liabilities has been prepared on the basis of the remaining period to contractual maturity as at balance date. The amounts represent principal and interest cash flows and may differ compared to the amounts reported on the balance sheet.

\$ millions	Total	Less than 3 months	3-12 months	1-5 years	Beyond 5 years	No specified maturity

Total financial liabilities	18,098	3,783	4,038	9,248	1,029	-
Net liquidity gap	23	11	3	9	-	-

10. Fair value of financial instruments

The methodologies and assumptions used when determining fair value depend on the terms and risk characteristics of the various instruments and include the following:

- for accrued interest payable, the carrying amount is equivalent to the fair value.
- for all other financial assets and financial liabilities, estimated fair values are based on market rates.

\$ millions	30/09/2014		30/09/2013

Independent Auditor's Report

To the Shareholder of ANZ New Zealand (Int'l) Limited

Report on the Financial Statements

We have audited the accompanying financial statements of ANZ New Zealand (Int'l) Limited (the Company) on pages 2 to 10. The financial statements comprise the balance sheet as at 30 September 2014, the statement of comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Directors' Responsibility for the Financial Statements

The directors are responsible for the preparation of financial statements in accordance with generally accepted accounting practice in New Zealand and International Financial Reporting Standards that give a true and fair view of the matters to which they relate, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing (New Zealand). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation of the financial statements that give a true and fair view of the matters to which they relate in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates, as well as evaluating the presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

KPMG has also provided other audit related services in relation to prospectus reviews and assurance services to the Company. These matters have not impaired our independence as auditors of the Company. We have no other relationship with, or interest in, the Company.

Opinion

In our opinion the financial statements on pages 2 to 10:

- Comply with generally accepted accounting practice in New Zealand;
- Comply with International Financial Reporting Standards; and
- Give a true and fair view of the financial position of the Company as at 30 September 2014 and of its financial performance and cash flows for the year then ended.

Report on other legal and regulatory requirements

In accordance with the requirements of sections 16(1)(d) and 16(1)(e) of the Financial Reporting Act 1993, we report that:

- We have obtained all the information and explanations that we have required; and
- In our opinion, proper accounting records have been kept by ANZ New Zealand (Int'l) Limited as far as appears from our examination of those records.

A handwritten signature of 'KPMG' in black ink, with a horizontal line underneath it.

For the year ended 30 September 2013

Contents

Annual Report	1
Statement of Comprehensive Income	2
Statement of Changes in Equity	2
Balance Sheet	3
Cash Flow Statement	4
Notes to the Financial Statements	5
Independent Auditor's Report	12

Annual Report

For the year ended 30 September 2013

ANZ New Zealand (Int'l) Limited ("the Company") is incorporated in New Zealand under the Companies Act 1993. Its registered office is, from 22 November 2013, Ground Floor, ANZ Centre, 23-29 Albert Street, Auckland, 1010, New Zealand. The ultimate parent company is Australia and New Zealand Banking Group Limited ("the Ultimate Parent"). The Company changed its name from ANZ National (Int'l) Limited on 29 October 2012.

Pursuant to section 211(3) of the Companies Act 1993, the shareholder of the Company has agreed that the Annual Report of the Company need not comply with any of the paragraphs (e) to (h) and (j) of subsection (1) and subsection (2) of section 211.

Management Report

Nature of Business

The Company provides funding facilities and wholesale funding to its parent company, ANZ Bank New Zealand Limited ("the Parent Company") (formerly ANZ National Bank Limited) including the issuance of U.S. Commercial Paper, Euro-Commercial Paper, U.S. Medium-Term Notes, Euro Medium-Term Notes and Covered Bonds. The Company's overseas activities are currently conducted through its London Branch. The Company has no subsidiaries.

There have not been any material changes in the nature of the Company's business during the year.

Business Review

The decrease in the Company's total assets from \$20,318 million as at 30 September 2012 to \$17,590 million as at 30 September 2013 has been driven primarily by the maturity of U.S. medium term notes with a carrying value at 30 September 2012 of \$3,891 million, which have only been partially replaced by new transactions.

Net interest income was \$7 million for the year to 30 September 2013 (2012: \$8 million). Net interest income reduced in line with the reduction in total assets.

Principal Risks and Uncertainties

The Company expects minimal change to principal risks and uncertainties over the next year.

The Company's exposure to risk arises from the Company's operations as a financial intermediary and participant in the financial markets. All aspects of risk are managed within a framework of policies, limits, control procedures, systems and reporting, and risk exposures are independently monitored and controlled within predefined limits, with an internal reporting framework in place.

The Company carries minimal interest rate, liquidity and currency risk reflecting the Company's role as a financial intermediary. The Company's principal credit risk exposure continues to be to the Parent Company. Operational risk is managed through a comprehensive infrastructure of effective policies, procedures, businesses systems and compliance.

Other Information

- No important events have occurred since the end of the financial year
- No significant changes are planned to the future operations of the Company.
- The Company is not involved in research and development.
- The Company has not acquired any of its own shares.
- The Company only operates through its London branch.

Directors

Nick Freeman and Jennifer Evans have taken up positions with the Ultimate Parent in Australia and resigned as directors of the Company on 7 December 2012 and 10 December 2012 respectively. Anthony Bradshaw and Antonia Watson were appointed directors of the Company on 10 December 2012.

There have been no other changes to the Directors of the Company since 30 September 2012.

Responsibility Statement

As at the date on which this Responsibility Statement is signed, after due enquiry and to the best of their knowledge, the Directors confirm that:

- (a) the financial statements, prepared in accordance with New Zealand Generally Accepted Accounting Practice and International Financial Reporting Standards, give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company; and
- (b) the management report of the Company includes a fair review of the development and performance of the business and the position of the Company and the principal risks and uncertainties that it faces.

Notes to the Financial Statements

1. Significant Accounting Policies

(a) Basis of preparation

(i) Statement of compliance

These financial statements have been prepared in accordance with the requirements of the Companies Act 1993 and the Financial Reporting Act 1993.

These financial statements have also been prepared in accordance with New Zealand Generally Accepted Accounting Practice. They comply with New Zealand equivalents to International Financial Reporting Standards ("NZ IFRS") and other applicable Financial Reporting Standards, as appropriate to profit-oriented entities. The financial statements comply with International Financial Reporting Standards ("IFRS").

The principal accounting policies adopted in the preparation of the financial statements are set out below.

(ii) Use of estimates and assumptions

The preparation of the financial statements requires the use of management judgement, estimates and assumptions that affect reported amounts and the application of policies. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable. Actual results may differ from these estimates.

(iii) Basis of measurement

These financial statements have been prepared on a going concern basis in accordance with historical cost concepts.

(iv) Rounding

The amounts contained in the financial statements have been rounded to the nearest million dollars, except where otherwise stated.

(v) Changes in accounting policies

There have been no changes in accounting policies or early adoption of accounting standards in the preparation and presentation of the financial statements.

(vi) Foreign currency translation

Functional and presentation currency

The financial statements are presented in New Zealand dollars, which is the Company's functional currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities resulting from foreign currency transactions are subsequently translated at the spot rate at reporting date.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different to those at which they were initially recognised or included in a previous financial report, are recognised in the income statement in the period in which they arise.

(b) Income and expense recognition

Interest income and interest expense are recognised in the statement of comprehensive income as they accrue, using the effective interest method.

The effective interest method calculates the amortised cost of a financial asset or financial liability and allocates the interest income or interest expense,

including any fees and directly related transaction costs that are an integral part of the effective interest rate, over the expected life of the financial asset or liability. The application of the method has the effect of recognising income and expense on the financial asset or liability evenly in proportion to the amount outstanding over the period to maturity or repayment.

(c) Income tax

(i) Income tax expense

Income tax on profits for the period comprises current and deferred tax. It is recognised in the income statement as tax expense, except when it relates to items credited directly to equity, in which case it is recorded in equity.

(ii) Current tax

Current tax is the expected tax payable on taxable income for the period, based on tax rates (and tax laws) which are enacted or substantively enacted by the reporting date and including any adjustment for tax payable in previous periods. Current tax for current and prior periods is recognised as a liability (or asset) to the extent that it is unpaid (or refundable).

(d) Recognition and derecognition of financial assets and financial liabilities

(i) Recognition

Financial assets include amounts due from the Parent Company. Financial liabilities include commercial paper, amounts due to related parties and bonds and notes.

The Company recognises a financial asset or liability on its balance sheet when, and only when, the Company becomes a party to the contractual provisions of the financial asset or liability. Financial assets and financial liabilities are initially recognised at fair value including directly attributable transaction costs and subsequently measured at amortised cost.

(ii) Derecognition

The Company derecognises a financial asset from its balance sheet when, and only when, (i) the contractual rights to the cash flows from the financial asset expire, or (ii) the Company has transferred all or substantially all of the risks and rewards of ownership of the financial asset and no longer controls the financial asset. The Company derecognises a financial liability from its balance sheet, when and only when, it is extinguished.

(e) Presentation

(i) Offsetting of income and expenses

Income and expenses are not offset unless required or permitted by an accounting standard. This generally arises in the following circumstances:

- where gains and losses from a group of similar transactions are reported on a net basis such as foreign exchange gains and losses;
- where amounts are collected on behalf of third parties, where the Company is, in substance, acting as an agent only; or
- where costs are incurred on behalf of customers from whom the Company is reimbursed.

(ii) Offsetting of assets and liabilities

Assets and liabilities are offset and the net amount reported in the balance sheet only where:

- there is a current enforceable legal right to offset the asset and liability; and

Notes to the Financial Statements

- there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

(iii) Cash flow statement

Cash and cash equivalents comprise cash at bank.

Certain cash flows have been netted in order to provide more meaningful disclosure, as many of the cash flows are received and immediately lent to the Parent Company. These cash flows are high volume and short term in nature and include commercial paper and related party balances.

(iv) Segment reporting

Business segments are distinguishable components of the Company that provide products or services that are subject to risks and rewards that are different to those of other business segments. Geographical segments provide products or services within a particular economic environment that is subject to risks and rewards that are different to those components operating in other economic environments.

As the principal activity of the Company is the raising of external funding, which is on-lent to the Parent Company at a margin, and the majority of its revenue is not earned from external customers, the Company does not have any reportable segments.

(f) Other

(i) Accounting Standards not early adopted

The following standards and amendments were available for early adoption but have not been applied by the Company in these financial statements. The Company currently does not intend to apply any of these pronouncements until their effective date and is assessing their impact on its financial statements.

NZ IFRS 9 Financial Instruments (effective for periods commencing after 1 January 2015)

Specifies a simpler methodology for classifying and measuring financial assets, with two primary measurement categories: amortised cost and fair value. Requires the amount of change in the fair value attributable to changes in credit risk of certain liabilities designated under the fair value option to be presented in other comprehensive income.

Notes to the Financial Statements

2. Interest Expense

\$ millions	Year to 30/09/2013	Year to 30/09/2012
Commercial paper	16	20
Bonds and notes	339	397
Total interest expense	355	417

3. Income Tax

\$ millions	Year to 30/09/2013	Year to 30/09/2012
Reconciliation of the prima facie income tax payable on profit		
Profit before income tax	6	7
Prima facie income tax at 28%	2	2
Total income tax expense	2	2
Amounts recognised in the statement of comprehensive income		
Current tax	2	2

4. Commercial Paper

\$ millions	30/09/2013	30/09/2012
U.S. commercial paper	4,764	4,954
Euro commercial paper	-	490
Total commercial paper	4,764	5,444

Commercial paper issued is guaranteed by the Parent Company.

5. Bonds and notes

\$ millions	30/09/2013	30/09/2012
U.S. medium term notes	4,464	7,423
Euro medium term notes	4,349	4,179
Covered bonds	3,925	2,962
Total bonds and notes	12,738	14,564

Bonds and notes issued are guaranteed by the Parent Company. \$206 million (2012: \$205 million) of the notes also benefit from a supporting guarantee from the New Zealand Crown. Bonds and notes are unsecured and rank equally with other unsecured liabilities.

Covered Bonds

Substantially all of the assets of the ANZNZ Covered Bond Trust (the "Trust") are made up of certain housing loans and related securities originated by the Parent Company which are security for the guarantee by ANZNZ Covered Bond Trust Limited as trustee of the Trust of issuances of covered bonds by the Company, or the Parent Company, from time to time. The assets of the Trust are not available to creditors of the Company or the Parent Company, although the Company or the Parent Company (or its liquidator or statutory manager) may have a claim against the residual assets of the Trust (if any) after all prior ranking creditors of the Trust have been satisfied.

Notes to the Financial Statements

6. Related Party Transactions

Transactions with other related parties

The Company undertakes transactions with the Parent Company and other members of the Australia and New Zealand Banking Group Limited group of companies ("ANZ Group"). These transactions principally consist of funding transactions. Other members of the ANZ Group provide administrative functions, including remuneration of key management personnel, to the Company for which no payments have been made.

Audit fees of \$32,633 (2012: \$32,633) have been paid by the Parent Company for nil consideration (2012: nil).

All interest income is from the Parent Company. Interest expense on bonds and notes includes \$25 million (2012: \$30 million) paid to subsidiaries of the Ultimate Parent.

Balances with related parties

Cash at bank comprises short term deposits with the Parent Company.

Amounts due from the Parent Company are lent on similar terms as the underlying funding raised.

Bonds and notes includes \$1,267 million (2012: \$1,257 million) of notes that have been issued to subsidiaries of the Ultimate Parent.

Amounts due to other related parties are guaranteed by the Parent Company.

7. Current and Non-current Assets and Liabilities

\$ millions	30/09/2013		30/09/2012	
	Current	Non-current	Current	Non-current
Assets				
Cash at bank	2	-	3	-
Due from Parent Company	7,717	9,871	9,704	10,611
Total assets	7,719	9,871	9,707	10,611
Liabilities				
Accrued interest payable	83	-	98	-
Commercial paper	4,764	-	5,444	-
Current tax liabilities	1	-	1	-
Due to other related parties	-	-	206	-
Bonds and notes	2,867	9,871	3,953	10,611
Total liabilities	7,715	9,871	9,702	10,611

Assets and liabilities are classified as current if:

- it is expected they will be realised, consumed or settled in the normal operating cycle or within twelve months after the end of the reporting date; or
- they are held primarily for trading; or
- they are assets that are cash or a cash equivalent; or
- they are liabilities where there is no unconditional right to defer settlement for at least twelve months.

8. Equity

Capital management policies

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to provide funding for the shareholder and to maintain an optimal capital structure to reduce the cost of capital.

The Company's capital comprises issued share capital and retained earnings. The Company's dividend policy is to distribute all retained profits to the Parent Company.

Ordinary share capital

The Company's share capital consists of 500,000 (2012: 500,000) fully paid ordinary shares that have the rights and powers prescribed by Section 36 of the Companies Act 1993. The shares have a carrying value of \$499,900.

The dividend on ordinary shares was \$9.69 per share (2012: \$16.58).

Notes to the Financial Statements

9. Financial Risk Management

Financial instruments are entered into by the Company in its operations as a financial intermediary. The Company's operations are matched funded to minimise interest rate, currency and liquidity risks.

There are no material off balance sheet instruments. All aspects of risk are managed within a framework of policies, limits, control procedures, systems and reporting. Risk exposures are independently monitored and controlled within predefined limits, with an internal reporting framework in place.

Credit risk

Credit risk is the potential that the counterparty to a financial transaction will fail to perform according to the terms and conditions of the contract, thus causing loss.

The Company's principal exposure is to the Parent Company and the carrying amount represents the Company's maximum and net exposure to credit risk.

Market risk

Interest rate risk

The impact of a 1% rate movement on the Company's net interest income would not have a material impact.

The following tables represent the interest rate sensitivity of the Company's assets and liabilities by showing the periods in which these instruments may reprice (that is, when interest rates applicable to each asset or liability can be changed). The repricing gaps are based on contractual repricing information.

Net repricing profile	6	3	(5)	-	-	8

Notes to the Financial Statements

Currency risk

Currency risk arises from changes in foreign exchange rates impacting on residual currency positions that may result from the Company's business as a financial intermediary.

Currency risk is monitored in terms of open positions to each currency, based on nominal value and the duration of each exposure. The total amount of foreign currency exposures, whether recognised or unrecognised, within each currency is not material.

Liquidity risk

Liquidity risk is the risk that under certain conditions, cash outflows can exceed cash inflows in a given period. Liquidity risk arises from mismatch in the final maturity of on-balance sheet assets and liabilities plus settlement of off-balance sheet activities.

The following maturity analysis of assets and liabilities has been prepared on the basis of the remaining period to contractual maturity as at balance date. The amounts represent principal and interest cash flows and may differ compared to the amounts reported on the balance sheet.

\$ millions	Total	Less than 3 months	3-12 months	1-5 years	Beyond 5 years	No specified maturity
30/09/2013						
Assets						
Cash at bank	2	2	-	-	-	-

Notes to the Financial Statements

10. Fair value of financial instruments

The methodologies and assumptions used when determining fair value depend on the terms and risk characteristics of the various instruments and include the following:

- for accrued interest payable, the carrying amount is equivalent to the fair value.
- for all other financial assets and financial liabilities, estimated fair values are based on market rates.

\$ millions	30/09/2013		30/09/2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets				
Cash at bank	2	2	3	3
Due from the Parent Company	17,588	17,743	20,315	20,457

Total financial liabilities	17,585	17,741	20,312	20,455

Independent Auditor's Report

To the Shareholder of ANZ New Zealand (Int'l) Limited

Report on the Financial Statements

We have audited the accompanying financial statements of ANZ New Zealand (Int'l) Limited ("the Company") on pages 2 to 11. The financial statements comprise the balance sheet as at 30 September 2013, the statements of comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Directors' Responsibility for the Financial Statements

The directors are responsible for the preparation of financial statements in accordance with generally accepted accounting practice in New Zealand and International Financial Reporting Standards that give a true and fair view of the matters to which they relate, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing (New Zealand). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the Company's preparation of the financial statements that give a true and fair view of the matters to which they relate in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates, as well as evaluating the presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Other than in our capacity as auditor we have no relationship with, or interests in, the Company.

Opinion

In our opinion the financial statements on pages 2 to 11:

- comply with generally accepted accounting practice in New Zealand;
- comply with International Financial Reporting Standards;
- give a true and fair view of the financial position of the Company as at 30 September 2013 and of its financial performance and cash flows for the year then ended.

Report on other legal and regulatory requirements

In accordance with the requirements of sections 16(1)(d) and 16(1)(e) of the Financial Reporting Act 1993, we report that:

- we have obtained all the information and explanations that we have required; and
- in our opinion, proper accounting records have been kept by ANZ New Zealand (Int'l) Limited as far as appears from our examination of those records.
